Administration

5. INDIVIDUAL COMMENTS AND RESPONSES

This section provides all comments that FRA received during the public comment period (December 22, 2017 to March 9, 2018) and FRA's responses. Both standard and unique responses are provided. For standard responses, refer to **Table H-4 in Appendix H, Section 1.3.2, Standard Responses to Comments**. Comments are presented as submitted, including spelling. Personal information (email, physical address, phone numbers, etc.) has been removed from public comments and replaced with [...].

All Aboard Arizona	2/10/2018	Website	This project will benefit the economy and residents of Texas while minimizing adverse impacts to the environment. Moving automobile trips to high speed rail will reduce air pollution, accidents and road congestion while improving connectivity between Dallas and Houston for business, cultural and entertainment purposes. Future connections to DFW airport and the Amtrak system by passenger rail will increase mobility and accessibility for residents and visitors alike. The design of "fully sealed corridors" utilizing Shinkansen technology will provide safety, comfort and efficiency for travelers.	Comment noted.
All Care Veterinary Hospital	2/21/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5.
All Care Veterinary Hospital	2/22/2018	Website	I have concerns about the high speed rail in Navarro County travelling through the intersection of 709 and 1394 cleaving Morgan Legacy Farm. At this highest portion in the county I believe significant damage will occur to the environment and water shed adversely impacting the migratory waters of the US. Further by separating access of the Morgan Legacy Farm Lodge from the Rodeo Arena and Guest Houses and Stables the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared. Our office staff has had over 100 employees and family members visit this ranch, ride horses, take hay rides and enjoy the unique experience not offered by any similar property....all at no cost. I would ask that this 5-7 mile portion scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic on the county that would occur if Morgan Legacy Farm is traversed.	Refer to LU-5.
All Care Veterinary Hospital	2/28/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5.
All Care Veterinary Hospital	2/28/2018	Website	The Morgan Creek Ranch (listed on tax roles as Morgan Legacy Farms) is an invaluable and beautiful place to decompress, relax and spend time with my family and friends. The Morgan Creek Ranch was created to serve as an oasis to family and friends of Brenda and Bob Morgan, as well as contribute to the local community, economy, and environment through development and improvement of the land and of multiple free standing buildings on the property, each with its unique purpose. A move north towards the existing power lines would preserve this beautiful location.	Refer to LU-5.
All Care Veterinary Hospital	2/28/2018	Website	Morgan Legacy Farms is an invaluable and beautiful place to decompress, relax and spend time with my family and friends. The farm was created to serve as an oasis to family and friends of Brenda and Bob Morgan, as well as contribute to the local community, economy, and environment through development and improvement of the land and of multiple free standing buildings on the property, each with its unique purpose. It's location close to the DFW metroplex allows easy and frequent visits; I fear that if the high speed rail goes through the property there will not be a comparable location. I am a veterinarian in the DFW metroplex, a job that has makes for high stress levels daily. Morgan Legacy Farms provides a safe location, free of charge to me, that can give me a chance to clear my head, relax and forget about the stress of the every day job. It is key to maintaining a healthy mentality. After educating myself in the current potential location through the Morgan Creek Ranch I firmly believe the other proposed option, north of the ranch near the power lines, would have less detrimental effects on the environment but also help my family and friends maintain healthy, reduced stress life styles.	Refer to LU-5.
All Care Veterinary Hospital	2/28/2018	Website	The Morgan Legacy Farms is an irreplaceable oasis for so many people. Over 900 people have visited this ranch which include church groups, Girl and Boy Scouts, Military Personnel, Police and Fire, students, and various political and professional persons, each has gotten to reap the benefits of the ranch. There is no comparable property near DFW that provides so many positive aspects, while remaining free to so many people. I strongly encourage you to consider changing the proposed route of the high speed rail to that location north of the ranch, near the power lines, as the benefit strongly outweighs the cost to those associated with Morgan Legacy Farms.	Refer to LU-5.
All Care Veterinary Hospital	2/27/2018	Website	I am opposed to the current planned route of the train that would destroy a culturally, economically, and historically significant ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easement would be less detrimental to the environment and save a unique irreplaceable property. As a veterinarian, I am acutely aware of the continuing loss of ranch and farm lifestyles that are a huge part of our country's history as well as economic well being. There is a massive economic significance to the loss of this lifestyle, as our country fails to produce its own resources and has to seek fulfillment of them elsewhere. The Morgan Legacy Farm is economically significant itself, but also significant in that it is helping educate future generations of potential ranchers and farmers. The large number of guests that have visited this ranch are exposed to a lifestyle that is fading in our city culture, and by moving the train route north and keeping this ranch alive, more children and potentially future farmers will be inspired to choose the farm or ranch lifestyle for themselves.	Refer to LU-5.

All Care Veterinary Hospital	3/4/2018	Website	I am opposed to the current proposed route of the train that would destroy a culturally, economically, and historically significant ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easement would be less detrimental to the environment and save a unique irreplaceable property. As a veterinarian, I am very concerned about the negative impact on native wildlife species as I understand the massive impacts that environmental destruction can have on a population of animals. The preferred route travels in one of the highest elevations which will create significant watershed issues, causing a loss of migratory waters, which will significantly and negatively impact the native wild life in the area, including a number of species of migratory birds. Furthermore, it is my understanding that according to both Texas state and federal law it is illegal to harm native birds or to disturb, relocate, or destroy nests or eggs. The preferred route will cause substantially more disruption to migratory water fowl as it will interfere with multiple bodies of water. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. Thank you for your time in reading this.	Refer to LU-5.

All Care Veterinary Hospital	3/8/2018	Website	I am strongly opposed to the current preferred train route that would destroy the culturally, economically, historically significant, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easement would be less detrimental to the environment and save a unique irreplaceable property. The preserving the natural beauty of the Texas landscape should be a high priority for the Texas governing powers, and thus should be a huge consideration in this route. A move to north of the already existing power lines would have less impact on the visual pollution of the Texas landscape, as it would easily consolidate the man-made structures of the powerlines and the train for a portion of the train route. Please consider the preservation of Texas's natural beauty and landscape and move the train route north to proposed route 3Z along the existing powerlines.	Refer to LU-5.

I believe a move north of the power lines paralleling the existing lines in an established easement would be less detrimental to the environment and save a unique irreplaceable property. The preserving the natural beauty of the Texas landscape should be a high priority for the Texas governing powers, and thus should be a huge consideration in this route. A move to north of the already existing power lines would have less impact on the visual pollution of the Texas landscape, as it would easily consolidate the man-made structures of the powerlines and the train for a portion of the train route. Please consider the preservation of Texas's natural beauty and landscape and move the train route north to proposed route 3Z along the existing powerlines.	Refer to LU-5.
All Care Veterinary Hospital	3/9/2018	Website	I am strongly opposed to the current preferred train route that would destroy the culturally, economically, historically significant, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. Naomi A.	2/5/2018	Website	REFERENCE: IMPACT ON PUBLIC SAFETY NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY To me public safety is a big issue, a factor in our day to day operations, as we move from location to location within our community as it is, day to day!!! HIGH SPEED RAIL TRACKS would pass with approximately of 580 feet of a Natural Gas Pipeline Compressor Station. THIS HAZARD IS NOT ADDRESSED!!! No one has considered the lives of the residents that live in our community, or our safety of an explosion, from the speed of the train. Again, FRA FAILED TO COORDINATE WITH THE LOCAL WALLER COUNTY GOVERNMENT NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS	Refer to NR-5, NR-6, RF-2, WW-1 and WW-2.
Naomi A.	2/5/2018	Website	REFERENCE: IMPACT ON KATY PRAIRIE CONSERVANCY NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of Waller/Harris County, am worried about the impact of the High Speed Rail would have on the Katy Prairie Conservancy, which is a biologically diverse powerhouse with more than 300 species of birds, 110 species of mammals, amphibians and reptiles and more than 600 species of grasses, wildflowers, trees, vines and shrubs. A 200 MPH train barreling within one miles of this migratory bird sanctuary is going to cause bird collisions and accidents. This is also where important wetlands of the Waller County area exist, which will be directly or indirectly affected by a HSR corridor. As our community grows, with progress, why tear each mile stone down, with an un-needed, un-wanted high speed rail. How can Waller County grow with this no-nonsense HSR in our area! NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS	Refer to NR-2, RF-4 and WW-2. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . For information regarding vegetation please see Section 3.6.4.2, Natural Ecological Systems and Protected Species, Vegetation and mitigation measures NR-MM#2 and NR-MM#4 in Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .
Flandrey Abshire	2/6/2018	Handwritten	No build option. The Hewlett- Packard Data Center facility houses 1500 servers within 1000 feet of the HC-4 route. Hewlett- Packard has stated that it could have very serious negative impacts on their property and data center operations. This has failed to be addressed by the FRA. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to SC-11 and VA-4.
Flandrey Abshire	2/6/2018	Handwritten	Anyone who lived in Houston during Harvey knows the devastation of flooding. The elevated tracks for this train will create dams in the event of a rain event. The route will cross five creeks. The Spring Creek watershed will be deeply affected and cause massive flooding of homes. There will be no place for the water to go but on the property near the tracks. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to FP-1, SS-17, WW-2 and WW-8.
Flandrey Abshire	2/6/2018	Handwritten	The Katy Prairie Conservatory is an area that has been set aside for 300 species of birds, 110 species of mammals, reptiles and amphibians, and hundreds of species of grasses, trees, wildflowers, and shrubs. The train will be traveling 200 miles per hours within one mile of the migratory bird sanctuary. The birds will be chased from their habitat. The wetlands here will either be directly or indirectly affected. The train route also cuts through a major wetland where duck hunting is vital to the economy of the region. The hunting of water fowl will be destroyed by a high speed train. The geese and ducks will not stay in an area with the noise that a high speed train would make. It would also cause bad accidents with the train. The no build option should be chosen as the only viable option in the final Environmental Statement.	Refer to NR-1, NR-2, RF-2 and WW-1.
Flandrey Abshire	2/6/2018	Handwritten	No Build Option. Flandrey Abshire	2/6/2018	Handwritten	No Build Option The quality of life in Waller County now is peaceful, quiet, and the sound of birds is everywhere. The quality of life in Waller County after the train will be horribly loud with vibrations every 15 minutes all day well into the night. At a HSR meeting a representative for the train said that the train would be about as loud as a hair dryer as it passed. Who was he kidding? Our homes will get cracked foundations, the brick and stone will fall off our homes, and our wells will collapse. The landscape of this beautiful part of Texas will be destroyed forever with the sight of this proposed monstrosity. Many of us will be forced to leave our homes and move to homes we did not want. The no build option should be chosen as the only option in the final Environmental Impact Statement.	Refer to NV-1. Vibration levels will be well below the threshold for damage to structures.
Flandrey Abshire	2/6/2018	Handwritten	No build option. The proposed train will run through a large portion of the Waller I.S.D. district. Since the county has a large rural area, many of its students are picked up by bus. These bus routes could be negatively impacted by this route. It may cause the school district to purchase additional buses to transport the students. Delays may occur due to county and private roads being closed or impacted by this train. We cannot even be sure that our students will be safe with this construction going on. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to SC-5, SC-8 and TR-6.
Flandrey Abshire	2/6/2018	Handwritten	No Build Option. What makes the FRA think that they do not have to follow the law? They have failed to coordinate with the local county government on this HSR project. After Tx-Dot met twice with county officials, Tx-Dot was told by the FRA not to meet with the county	Refer to PI-1.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			anymore. The FRA said that they did not have to coordinate with Waller County officials. Numerous issues were brought to the attention of the FRA by Tx-Dot as a result of these issues in the draft EIS. These people are suppose to be looking out for the interest of the citizens and the environment. What would make them think that they are above the law. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	
Flandrey Abshire	2/6/2018	Handwritten	No Build Option The proposed route will run right through the planned Waller Lawn Center. It will deter industry moving to Waller and Waller County because they are also passing through th Delta Troy Interest. This 990 acre tract, where housing and commercial development, will not be developed because of this train. This HC-4 route also passes within 4000 feet of the huge Daiken/Goodman. Hundreds of people could be affected with lack of homes and closed roads causing traffic on our roads. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to BA-6 and LU-4.
Flandrey Abshire	2/6/2018	Handwritten	No Build Option The proposed train route will destroy the economic development of Waller County. It will affect future roads and thorough fares through the northern portions of the county. Dozens of roads have been planned but none will be completed if this train cuts through this county. This will stop all future development in this area. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to TR-8.
Flandrey Abshire	2/6/2018	Handwritten	No Build Option. The reason Foundation has stated that the HSR project would cause Texas taxpayers over \$500 million dollars a year. The report says that the project would never continue without significant public subsidies when the loan would default. The trip from Dallas to Houston is well served with great road, planes, and buses. The no build option should be chosen as the only viable option in the Environmental Impact Statement.	Refer to BA-12, GN-3, GN-4, NE-1 and PN-3.
Flandrey Abshire	2/6/2018	Handwritten	No Build Option. What will the train route do to the insurance policies in this area? The insurance companies will take in consideration the dangers of train derailments. Going 200 miles an hour it is not a matter of if, it's a matter of when it will go off the track. The insurance companies will not want to insure homes too near the tracks or the premiums will be outrageous. This will cause a real hardship to the citizens in the pathway of the train. The no build option should be chosen as the viable option in the fianl Environmental Impact Statement.	Refer to SS-1, SS-12 and SS-13.
Flandrey Abshire	2/6/2018	Handwritten	No Build Option. The HC-4 train route through Waller County is about three miles west of the original route. This route was changed without any public input from the affected areas. Why was the map changed? Was it because of wealthy landowners who did not want the train to negatively impact their land? That leaves the land owners on the westside of them to shoulder this burden. Using the energy corridor right of way easement would have affected a few peoples, but this plan will affect hundreds of people. The no build option should be chosen as the only viable option in the Final Impact Environmental Statement.	Refer to BA-8.
Flandrey Abshire	2/6/2018	Handwritten	No Build Option. Our home is at a deadend of a quiet road. The train is slated to run through our barn and a few feet from our house. The train will be very detrimental to the wildlife that live and travel in this area. The deer, bobcats, birds, hogs, owls, wood ducks, and coyotes would be driven from their habitats. We are an elderly couple who would be forced to relocate. This would be extremely difficult because I am handicapped-excessible home would be destroyed. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to ED-2. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures . Land acquisitions and/or relocations will be conducted by the Texas Central Railroad (TCRR). For more information regarding specific landowner needs or information requests, contact TCRR at email: info@texascentral.com or Phone: 1-844-TX-TRAIN. Each acquisition or relocation is specific to each landowner. If TCRR receives federal funding from US Department of Transportation for the Project, TCRR must comply with the Uniform Relocation Assistance and Real Property Acquisition Policies Act for all real property acquired as discussed in Section 3.13, Land Use of the Final EIS.
Flandrey Abshire	2/6/2018	Handwritten	No Build Option. A need for this train has never been shown. It will not alleviate any traffic conjestion. Just getting to the station in Houston or Dallas will be a traffic conjestion. Just getting to the station in Houston or Dallas will be a traffic conjestion itself. People will not pay \$199.00 for a single one way ticket when they can travel to Dallas for \$50. of gas and not requiring renting a car once you arrive. This train will never cash flow. Every Texan will pay for this train in the end. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to BA-6, GN-4, PN-3 and SC-3.

Flandrey Abshire	2/6/2018	Handwritten	No Build Option. Emergency services will be negatively impacted by the HSR line. It will impact our county and private roads. These roads are used for emergency vehicles that provide help and services to the citizens of Waller County. The response time is now approximately eight minutes but when some roads are closed, no one knows what the response time will be. We cannot allow one person to die because of lack of help due to this train. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to SS-23.
Flandrey Abshire	2/6/2018	Handwritten	No Build Option. The proposed HC-4 route travels right through many new developments and homes of citizens of Waller County. In my own neighborhood, which is a road about 1/3 of a mile long, it will affect 10 homes and a trailer park with about 32 trailers in it. All the people on my street will be displaced and have to relocate. It destroys the economic viability of this area, lowering the value of all property around here. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to BA-8 and VA-1.
Flandrey Abshire	2/6/2018	Website	No Build Option The proposed route will run right through the planned Waller Lawn [sic] Center. It will deter industry moving to Waller and Waller County because they are also passing through th Delta Troy Interest. This 990 acre tract, where housing and commercial development, will not be developed because of this train. This HC-4 route also passes within 4000 feet of the huge Daiken/Goodman . Hundreds of people could be affected with lack of homes and closed roads causing traffic on our roads. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to BA-6 and LU-4.
Rodney Abshire	1/30/2018	Email	A need for this train has never been shown. It will not alleviate any traffic congestion. Just getting to the station in Houston or Dallas will be a congestion itself. People will not pay \$199.00 for a single one way ticket when they can travel to Dallas for \$50.00 of gas and not requiring renting a car once you arrive. This train will never cash flow. Every Texan will pay for this train in the end.	Refer to GN-2, NE-1, PN-3, SC-3.
Rodney Abshire	1/30/2018	Email	Our home is at a dead end of a quiet road. The train is slated to run through our barn and a few feet from our house. The train will be. very detrimental to the wildlife that live and travel in this area. The deer, bobcats, birds, hogs, owls, wood ducks, and coyotes would be driven from their habitats. We are an elderly couple who would be forced to relocate. This would be extremely difficult bcause I am handicapped. Our handicapped accessible home would be destroyed. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to NR-2 and NR-6. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . 			would have affected a few people, but this plan would affect hundreds of people. The no build option should be chosen as the only viable option in the final Impact Environmental Impact Statement.	
Rodney Abshire	2/2/2018	Email	The Reason Foundation has stated that the HSR project would cause Texas taxpayers over \$500 million dollars a year. The report says that the project would never continue without signs public subsidies when the loan would default. The trip from Dallas to Houston is well served with great roads, planes, and buses. The no build option should be the only viable option in the final Environmental Impact Statement.	Refer to GN-3, PN-3, BA-4, BA-12, BA-6, GN-4 and NE-1.
Rodney Abshire	2/2/2018	Email	The Reason Foundation has stated that the HSR project would cause Texas taxpayers over \$500 million dollars a year. The report says that the project would never continue without signs public subsidies when the loan would default. The trip from Dallas to Houston is well served with great roads, planes, and buses. The no build option should be the only viable option in the final Environmental Impact Statement.	Refer to GN-3, PN-3, BA-4, BA-12, BA-6, GN-4 and NE-1.
Rodney Abshire	2/4/2018	Email	The proposed train route will negatively impact the property values in Waller county. The decreased valuation of property will cause lower tax revenues to be collected. The school districts, emergency services, cities, and other public entities will lose income. This will reduce the services that are provided to the citizens who pay these taxes. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to VA-1.
Rodney Abshire	2/4/2018	Website	The proposed train route will destroy the economic development of Waller county. It will affect future roads and thoroughfares through the northern portions of the county. Dozens of roads have been planned but none will be completed if this train cuts through the county. This will stop all future development in this area.	Refer to TR-1 and TR-8. No public roads in Waller County would be closed as a result of the Project.
Rodney Abshire	2/5/2018	Website	The Hewlett-Packard Data Center facility houses 1500 servers within 1000 feet of the HC-4 route. Hewlett-Packard has stated that it could have very serious negative impacts on their property and data center operations. This has failed to be addressed by the FRA. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to SC-11.
Rodney Abshire	2/5/2018	Website	The proposed route will run right through the planned Waller Town Center. It will deter industry moving to Waller and Waller county because the route passes through the Delta Troy Interests. This 990 acre tract, where housing and commercial development has been appropriated, will not be developed because of this train. This HC-4 route also passes within 4000 feet of the huge Daiken/Goodman facility. Hundreds of people could be affected with lack of homes and closed roads causing traffic on our roads. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to LU-4.
Rodney Abshire	2/6/2018	Website	What makes the FRA think that they do not have to follow the law? They have failed to coordinate with the local county government in this HSR project. After TX-Dot met twice with county officials, TX-Dot was told by the FRA not to meet with the county anymore. The FRA said that they did not have to coordinate with Waller county officials. Numerous issues were brought to the attention of the FRA by TX-Dot as a result of these coordination meetings but the FRA has failed to address any of these issues in the draft EIS. The job of the FRA is go look out for the citizens and the environment. What would make you think you are above the law? The no build option should be the only viable option in the final Environmental Impact Statement.	Refer to PI-1.
Rodney Abshire	2/6/2018	Handwritten	No Build Option. Emergency services will be negatively impacted by the HSR line. It will impact our county and private roads. Rodney Abshire	2/6/2018	Handwritten	No Build Option. The proposed route will run right through the planned Waller Lawn [sic] Center. It will deter industry moving to Waller and Waller County because they are also passing through the Delta-Troy Interest. This 990 acre tract, where housing and commercial development, will not be developed because of this train. This HC-4 route also passes within 4000 feet of the huge Daiken/Goodman facility. Hundreds of people could be affected with lack of homes and closed roads causing traffic on our roads. The no Build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to LU-4.
Rodney Abshire	2/6/2018	Handwritten	No Build Option. What makes the FRA think that they do not have to follow the law? They have failed to coordinate with the local county government on this HSR project. After TX-Dot met twice with county officials, TX-Dot was told by the FRA not to meet with the county anymore. The FRA said that they did not have to coordinate with Waller County officials. Numerous issues were brought to the attention of the FRA by Tx-Dot as a result of these coordination meetings but the FRA has failed to address any of these issues in the draft EIS. These people are suppose to be looking out for the interest of the citizens and the environment. What would make then think that they are above the law. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to BA-6, NE-1 and PI-1.
Rodney Abshire	2/6/2018	Handwritten	No build option. The proposed train will run through a large portion of the I.S.D. district. Since the county has a large rural area, many of its students are picked up by bus. These bus routes could be negatively impacted by this route. It may cause the school district to purchase additional buses to transport the students. Delays may occur due to county and private roads being closed or impacted by this train. We cannot even be sure that our students will be safe with this construction goin on. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to SC-5.
Rodney Abshire	2/6/2018	Handwritten	No build option. The quality of life in Waller County now is peaceful, quiet, and the sound of birds is everywhere. The quality of life in Waller County after the train will be horribly loud with vibrations every 15 minutes all day well into the night. At a HSR meeting a representative for the train said that the train would be about as loud as a hair dryer as it passes. Who was he kidding? Our homes will get cracked foundations, the brick and stone will fall off our homes, and our wells will collaps. The landscape of this beautiful part of Texas will be destroyed forever	Refer to AS-1, BA-6, ED-2, NV-1 and NV-5.

			with the sight of this proposed monstrosity. Many of us will be forced to leave our homes and move to homes we did not want. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	
Rodney Abshire	2/6/2018	Handwritten	No Build Option. The Katy Praire Conservatory is an area that has been set aside for 300 species of birds, 110 species of mammals, reptiles and amphibians, and hundreds of species of grasses, trees, wild flowers and shrubs. The train will be traveling 200 miles per hour within one mile of the migratory bird sanctuary. The birds will be chased from Their habitat. The wetlands here will either be directly or indirectly affected. The train route also cuts through a major wetland where duck hunting is vital to the economy of the region. The hunting of water [sic] will be destroyed by a high speed train. The geese and ducks will not stay in an area with the noise that a high speed train would make. It could also cause bird accidents with the train. The no build option should be chosen as the only viable option in the final Environmental Statement.	Refer to NR-1, NR-2, NR-3, RF-2, RF-4 and WW-2. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .
Rodney Abshire	2/6/2018	Handwritten	No Build Oprion Anyone who lived in Houston during Harvey knows the devastation of flooding. The elevated tracks for this train will create dams in the event of a rain event. The route will cross five creeks. The Spring Creek watershed will be deeply affected and cause massive flooding of homes. There will be no place for the water to go but on the property near the tracks. The no build option should be chosen as the only viable option in the final Envrinmental Impact Statement.	Refer to BA-6, SS-17 and WW-8.
Rodney Abshire	2/6/2018	Handwritten	No build option The Hewlett-Packard Data Center facility houses 1500 services within 1000 feet of the HC-4 route. Hewlett-Packard has stated that it could have very serious negative empacnts on their property and data center operations. This has failed to be addressed be the FRA. The no build option should be chosen as the only viable option in the final Environmental Impact Statement.	Refer to BA-6 and SC-11.
Rodney Abshire	2/6/2018	Handwritten	No Build Option The proposed HC-4 route travels right through many new developemnts and homes of citizens of Waller Count. In My own neighborhood, which is a road about 1/3 of a mile long, it will affect 10 homes and a trailer park with about 32 trailers in it. Ricardo Adame	2/5/2018	Website	I'm all for the bullet train but would be nice if could go to downtown and maybe Galveston island as well	Refer to GN-6, GN-7 and TR-4.
Frank Adamec	1/21/2018	Website	Transportation would be disrupted, for emergency vehicles mostly, regardless if the rail is on the ground or elevated. i propose the only route for this train is to derail it and be determined a NO BUILD.	Refer to PI-1 and SS-23.
Frank Adamec	1/25/2018	Website	I don't think public safety has been addressed as to the impact the rail would have on underground pipelines and the electric high wires that would be needed to run the train and electric transmission lines in case of an accident caused by the train. i propose the only route for this train is to derail it and be determined a NO BUILD.	Refer to EU-2 and SS-18.
Frank Adamec	1/25/2018	Website	The environmental impact would be detrimental to the red-headed woodpecker, blue heron and white cranes that thrive in and around the local ponds. i propose the only route for this train is to derail it and be determined a NO BUILD.	Refer to NR-2. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . For information regarding vegetation please see Section 3.6.4.2, Natural Ecological Systems and Protected Species, Vegetation and mitigation measures NR-MM#2 and NR-MM#4 in Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .
Frank Adamec	1/25/2018	Website	The environmental impact would be detrimental to the red-headed woodpecker, blue heron and white cranes that thrive in and around the local ponds. i propose the only route for this train is to derail it and be determined a NO BUILD.	Refer to NR-2. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . For information regarding vegetation please see Section 3.6.4.2, Natural Ecological Systems and Protected Species, Vegetation and mitigation measures NR-MM#2 and NR-MM#4 in Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .
Bob and Marjorie Adams	2/5/2018	Handwritten	Don't need it! Don't want it! A land qizab! Lots of track available put [sic] track on existing track. Add a fast train on existing track if need train travel. Who needs now have plans. To go root [sic]. Don't take people land for people that live in Houston, Dallas. Very much against-family and I.	Refer to BA-10 and PN-3.
Clint Adams	3/5/2018	Website	This rail will not only disrupt our peaceful way of life but it will cause impossible hardships for first responders. This project needs to be abolished and never mentioned again, as it will be of no benefit to those in rural areas.	Refer to SC-19 and SS-23.
Craig Adams	2/28/2018	Website	As a native Texan and Houstonian, I am HIGHLY OPPOSED to this system. This is a land grab for private use and will likely effect at least 2 of my properties I own. This is not the way we work in Texas, nor should it become the way we work. Please OPPOSE this land grab. It is immoral and unethical.	Comment noted.
Geoffrey Adams	2/17/2018	Website	Ever since I studied abroad in Italy, I have seen the impact of rail transportation, especially high speed rail transportation. I truly believe that the Dallas to Houston high speed rail is a huge benefit to commuters, tourists, and general riders. It provides an alternative choice from driving and flying. And the track record of the Japanese Shinkansen in terms of safety and reliability makes me a firm believer that this is the future of transportation in Texas and the United States.	Comment noted.
Greg Adams	3/9/2018	Website	I believe the High Speed Rail is LONG overdue. I am all for it and can't wait until the project begins. However, I hope there is talks in the coming future, where we will connect San Antonio and Austin as well.....make connections to all Texas Cities. That would be fantastic.	Refer to BA-2.

Lonnie Adams	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.	Refer to BA-6, CR-4, ED-1, LU-2, LU-11, NE-1 and NE-9.
Teena Adams	2/6/2018	Website	We do not want the high speed rail in Texas. You will destroy our beautiful state. From the flood plains of Houston to the tornados in Dallas - it will FAIL with a Capital "F".	Comment noted.
Teena Adams	3/5/2018	Website	I will never support the high speed rail from Houston to Dallas. It will destroy our community and our way of life.	Comment noted.
Patricia Adrion	2/6/2018	Website	Dallas to Houston High-Speed Rail Environmental Impact Statement The bottom line is, I am totally opposed to the Dallas/Houston HSR Project for many reasons, but I will be brief: The HSR will go directly through two declared Historic Sites: Union Baptist Church, over 130 years old; and the Ten Mile Cemetery. UBC is where I worship, and my husband is buried in the Cemetery! People whom I personally know will have their livelihood impacted by the intrusion of this folly -- people who cut, bale and sell hay; people who raise cattle; and people who have farmed their land for generations. Another source of concern is disruption of roadways for emergency assistance - taking extended time to arrive at fires and life threatening crisis situations. It is deplorable to think that we are even having this conversation in the great state of Texas. I SAY NO!!! Pat Adrion	Refer to CR-8 and SS-23.

Dan Agan	2/6/2018	Oral	Hello. My name is Dan Agan. I'm a landowner in Grimes County. First, could I ask a few people on each end to take out a couple of cameras? I'd like everyone who's opposed to the high-speed rail to please raise your hand. I'd like to see how many people in this audience are opposed. And keep them up for a minute so we can take a picture of this. Thank you. Thank you very much. One more time. You've got one more picture over here. Thank you. My greatest fear is that this meeting and this process is a sham. I fear that the request -- that the regulator and the regulated are in bed together. There is not -- it is not possible this project can ever be environmentally sound. I state this because of two reasons. There has been virtually no discussion on environmental impact of the construction. The environmental studies primarily focus on the train track itself. The far greater environmental damage will be done during the construction. Millions of yards of dirt, sand, clay, and gravel will have to be delivered. Millions of yards of concrete will have to be hauled in. And I'm sure many of you are not aware, but if granted the rail company can take the dirt, sand, gravel, and water they want from any landowner within two miles of the track. All of this will be hauled through hundreds of thousands of truck loads carrying materials over local and adjacent landowners, county roads, and state highways. How in the world is it possible the EPA can fine and halt the construction of a pond of a rancher in Wyoming for building a pond on his own property while a project with this level and magnitude gets approved? The damage caused by this construction, which will be hundreds of yards wide--not the hundreds of feet wide; don't think about the track; think about the construction--hundreds of yards wide,	Refer to NE-1, NE-9, LU-10, LU-14, SG-4 and PI-1.

			hundreds of miles long, will make General Sherman's march through Georgia look like it was a Thanksgiving Day parade. My second concern is that there has been no study to the environmental impact of this project failing. The likelihood of failure is very high. The probability of TCP filing bankruptcy is very high. Using the California rail line is a good example. Everyone in the FRA knows it's massively over budget by multiples and significantly far behind schedule, and may never be finished. To assume this project in Texas can be built on time and on budget is naive, if not foolish. What provisions have been made to clean up this mess, or does it just become another environmental disaster dumped on area citizens and taxpayers? Is the FRA truly -- if the FRA's truly concerned about the environmental impact, it would require TCP to have at least twice the amount of funds for the initial construction project in the bank--not just pledged--in the bank set aside to pay for the damage if the project's not completed and if it's halted before it's finished. To be environmentally sound, to allow TCR to begin construction without the funds on hand to clean up their mess is a grossly negligent environmental decision. Thank you.	
Dan Agan	2/24/2018	Letter	My name is Dan Agan. My address is 9165 County Road 214, Anderson, TX 77830. My house and the 720 acres my family and I own in Grimes County and the 53-acre tract we own in Grimes County will be dramatically impacted by the proposed High Speed Rail between Houston and Dallas. As an example of what we can expect, I submit the following newspaper article from the Los Angeles Times on February 4, 2018. The environmental impact of the California High Speed Rail and the Texas High Speed Rail will be significant and unrecoverable. please read the attached article, so you can see what will happen to Texas. Sincerely, Dan Agan	Comment noted.
Dan Agan	2/25/2018	Letter	There has been virtually no analysis of the environmental impact of the construction itself. The environmental studies focus on the completed track. Far greater damage will be done during the construction. My second concern is that there has been no environmental impact study on the project failing The likelihood of failure is very high. The HSR company has been unable to raise adequate private funds for the project, signaling its demise. The probability this project will end up in bankruptcy is very high. The California HSR project can be a good example. What provisions have been made to clean up this mess when it fails, or does it just become another environmental disaster dumped on area citizens and taxpayers? What is the environmental impact of a partially built rail line or a completed and then abandoned rail line? Who will pay to remove it? The only way to insure the taxpayers not get stuck with an abandoned rail line is to insure the HSR has sufficient funds up front, in the bank, before construction begins.	Refer to GN-4, NE-1, NE-9 and PN-3.
Carlos F Aguilar	3/9/2018	Website	Since the beginning of the environmental review process for the Texas High-Speed Train project in 2014, Texas Central has been actively engaged with stakeholders, regulating agencies, elected officials, landowners and others. This extensive coordination is ongoing and reflects the project's commitment to design, build and operate a landmark project of which the entire country will be proud. The Texas Bullet train is a paradigm shift in train travel for the United States given its safety-based design and systems, the method of finance and many other unique characteristics of this project. Thanks are due to you personally, your team and your technical expert's attention to detail in completing and publishing the DEIS. After our thorough review, we respectfully submit the attached comments which will further: * Underscore our concurrence with the FRA's identified preferred build alternative; * Describe the factors leading to the identification of Texas Central's preferred Houston Station location; * Identify refinements proposed to further mitigate environmental impacts, including those on private and historical properties; * Reaffirm our commitment to not close public roads or burden the public with cost associated with building or maintaining any new roads; * Clarify the purpose of "Joint Access Roads" to be built and maintained at Texas Central expense for the purpose of emergency, landowner and/or train system maintenance; * Examine the size and location of proposed facilities to ensure that they are constructed in a way that creates minimal disruption to surrounding communities while ensuring the safe operation of the train; and * Outline our concurrence with the FRA's assessment of the system's minimal noise and vibration impacts and our commitment to further evaluate additional methodologies or design changes to reduce those impacts even further. Demand for this project and the safe, efficient transportation it will provide is strong. In addition to the minimal environmental impacts that will result from the construction of build alternative A, the project characteristics identified below comprise many of the project's broader public benefits and explain its strong base of support. * Investor-owned: Equity provided by private investors, majority of capital from Texan families * Safe: Deploying the safest high-speed passenger train in the world, proven by over 53 years of operation without a single operational accident or fatality * Free-market driven: Market-led response to existing and pent-up travel demand * Congestion relief: Provides additional transportation capacity to relieve congestion roadways and busy airports * Industry creation: Creates more than 10,000 jobs during each year of construction and 1,000 direct employees of the country's first investor-	Comment noted.

			<p>owned high-speed passenger railroad</p> <ul style="list-style-type: none"> * Economic impact: Over \$36 billion of direct economic impact over the next 25 years * National connectivity: Provides direct passenger rail connection between Dallas and Houston and fills a void in the national and regional rail networks * Rural employment: As one of the largest single civil works project in US history, it will draw suppliers and labor from across rural Texas and generate local economies; Approximately 25% of suppliers and labor from across rural Texas and generate local economies; Approximately 25% of the permanent jobs will be in rural communities. * Local Revenues: The project will provide millions of dollars in new tax revenues to local counties, school districts and hospital districts * Regional efficiencies: Project will reduce travel time and increase travel efficiency and productively, further connecting and boosting the Greater Houston and Dallas/Fort Worth economies. * Draw private capital: Developing critical transportation infrastructure and increasing system capacity without federal asset ownership * Attract co-financing: Export banks and other international sources of finance, fully participating in the development of domestic assets <p>Texas Central applauds the FRA's commitment to the timely completion of the remaining phases of the environmental review. Likewise, Texas Central is committed to continuing its extensive stakeholder engagement and responding promptly to any request from the FRA for any additional information.</p> <p>Thank you again for your thorough attention to this project.</p>	
Kurt Ahkin	NA	Website	I do not support this project and believe it should be terminated. It will disrupt lives businesses and the environment. I live less than a quarter mile of the proposed track off 290.	Comment noted.
Saman Ahmadi	2/11/2018	Website	<p>I attended the Public Hearing held on 5 February 2018 at the Woodward Elementary School in Cypress, Texas. The following are my comments.</p> <ol style="list-style-type: none"> 1. I was surprised that the project was called "Dallas to Houston" for an event in Houston since the train will go back and forth. 2. The preferred route is myopic. We should look to Europe for their general strategy of bullet train routes - they connect centers of population. Therefore the plan from the early 90's - where the route went from Houston to College Station, to Waco, to I believe Waxahachie (the site of the now defunct SSC) and then Dallas - makes more sense. That plan intended to eventually have lines from Waco, to Austin, to San Antonio and from Austin to Houston. DASH was the acronym, a marketing name that made sense (see comment 1). That plan also connected most of the major academic institutions in Texas and it would have made College Station, for example, basically a suburb of Houston and vice versa. 3. I live in Houston and the main reason I went to the Public Hearing was to listen to the rural land owners. Most of their comments made sense: <ol style="list-style-type: none"> a. While connecting Houston to Dallas with basically a straight line may make sense graphically, it makes no sense given where the roads are and where people are. Why not use the existing ROWs in middle of existing highways? b. Why hasn't the private company taken a group of the folks against the train to an actual installation in Asia to prove that sound will not be an issue? Probably because it will be. 4. The proposed train is ugly. Especially when compared to Germany's ICE and France's TGV. 5. Whatever track/structure is built has to accommodate for new technologies like Hyperloop. 6. The two tracks could be stacked and need to start at IAH and run primarily in the middle/side/in the ROW of highways Sam Houston, 290, 6, and 35 to Hillsboro and then end at DFW. The cities of Houston, Dallas and Fort Worth would then have to have reasonable train lines from the airport to their respective downtowns. 7. The start to end of travel time has to be less than 4 hours - start point meaning someone's house, and endpoint being their final destination in the other city. Regardless of the current mode of travel, 4 hours is basically the time it takes. I commuted from Houston to Fort Worth every week for 8 months and decided to drive instead of fly because of the convenience of having my own car when I got to Fort Worth. 8. The cost of the round trip ticket must be less than the cost of driving a car if the intended passengers are those traveling for leisure and less than the cost of airplane uber/rental car for those traveling for business. 9. Unless item 7 and 8 happen, the notion that most of the current airplane traffic is going to switch to high speed rail is dubious. <p>The proposed plan does not make sense environmentally, technically or economically.</p> <p>Saman Ahmadi, PE, AIA</p>	Refer to BA-2, BA-7, BA-8, BA-9, BA-12, GN-7, LU-9, NE-1, NV-1, PN-3 and SC-3.
Mirza Ahmed	2/8/2018	Website	I support high speed rail and support any of the build alternatives that may be chosen for the project.	Comment noted.

Heidi Ahrendt	2/26/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5, WW-1 and WW-2.
Naomi Ahuar	2/5/2018	Letter	NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY Today in our community, we are very fortunate to be able to drive by, admire, and learn the history of this community of Waller County. An Army Corps Of Engineers Section 4 Permit report has revealed four archaeological sites, and two pre-historic sites considered at this time for inclusion in the National Register Of Historical Places. deprive our County of this Historical Event. Due to the fact that FRA FAILED TO COORDINATE WITH ME LOCAL WALLER COUNTY GOVERNMENT, stop this disaster from destroyed our "HISTORY". NO BUILD OPTION SHOULD BE CHOSEN AS ONLY VIABLE OPTION FOR TEXAS	Refer to CR-9.
Naomi Ahuar	2/5/2018	Handwritten	REFERENCE: FARM, AND SHOW ANIMALS. AND THE MAJOR IMPACT OF HIGH SPEED RAIL PLACE ON THEIR GROWTH PERFORMANCE, PRODUCTION AND SUPPLY OF LAND TO TABLE NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY Our Homestead in Waller/Harris County supplies numerous benefits as the pleasant viewing of the farm animals, as well as the High Dollar Show Lambs, my family enjoys on a day to day basis. Each one of these is a big source of our daily nourishment. As all know, all animals are sensitive to the vibration sounds, panic, that they would be subjected to these continued effects, even 90 minutes due to the High Speed Train. I feel our family has supplied generations to come with the lifestyle of animal life, which so many never benefit from. As we all know THE FEASIBILITY OF THE PROPOSED HIGH SPEED RAIL, The Reason Foundation, concludes that the proposed could lose over \$500 Million a year. stop this madness, let today's, tomorrows, and future generations enjoy this lifestyle of Farm Of Nature, Land and Animals, which so many miss in today's world. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS	Refer to GN-3, NE-1 and NR-1.
Naomi Ahuar	2/5/2018	Handwritten	Reference: ECONOMIC IMPACT ON PROPERTY VALUES AND TAX BASE OF WALLER COUNTY (A Historical Minority Population County) - DEVALUATION OF HOMES LAND HOMESTEAD PROPERTY NO HIGH SPEED RAIL WALLER/HARRIS COUNTY This project will create an Obsolescence that will negatively impact the property values in Waller/Harris County. The proposed route will cause people to lose value in their property, and decreased valuation of property will cause lower tax revenue collected and school districts, cities, emergency services and all public entities will lose income reducing the services that are provided to the citizens who pay the taxes. As a resident of the Waller/Harris County area, FRA, High Speed Rail, failed to coordinate with the local Waller County Government, and it is obvious it would *beneficial to our area. Looking at the proposed route, the HSR will run through a large number of pieces of private property owned by myself and many of neighbors and friends. The train will be felt by the surrounding residents up to 2 miles (either side of the rail), which would definitely cause future foundation issues to surrounding homes in the close proximity of the proposed route. This proposed route of HSR's goal is to service from only one city central to the next city central with a possible one stop in-between. This HSR will not benefit one Waller resident in anyway. In fact it will add many safety concerns. Why make our community pay the price of a future disaster to take place in our wonderful small community. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR HIGH SPEED RAIL IN TEXAS Sincerely From a Concerned Citizen of Waller/Harris County.	Refer to EJ-1, NV-5, PI-1, PN-3, PN-5, SC-19, SS-1 and VA-1.
Naomi Ahuar	2/5/2018	Handwritten	REFERENCE: IMPACT ON WALLER INDEPENDENT SCHOOL DISTRICT NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of the Waller/HARRIS County area, the proposed alignment of the High Speed Rail will run through a large portion of the Waller ISD's district. This would negatively impact bus routes, which may cause Waller ISD to purchase addition school buses to transport student, and accommodate delays to county and private roads being impacted and/or closed by the proposed High Speed Rail project. The safety of our children is the utmost concern for our Waller/Harris County residents, parents, and school factuality. Why add the risk? Why add the tax dollars, to withstand this unneeded debt to our community.	Refer to SC-5 and SC-8.

			Stop this future flooding issues from adding to our drainage issues, stop the HSR. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS. Sincerely From a Concerned Citizen of Waller/Harris County.	
Naomi Ahuar	2/5/2018	Website	REFERENCE: IMPACT ON WATERFOWL AND HUNTING NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of Waller/Harris County I moved to this area to have property, acreage to spread out on, acreage to watch nature, and for an area for hunting. The route of the HSR cuts through and will destroy the north end of one of the major wetlands in this region, where duck hunting is vital to the economy and where waterfowl and their hunting will be diminished, if not destroyed by a HIGH SPEED TRAIN.	Refer to NR-1, NR-2, RF-2 and WW-2.
Naomi Ahuar	2/5/2018	Website	REFERENCE: IMPACT ON WATER NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of Waller/Harris County, and after the research on the devastating affects the high speed rail would put on our community, my concern with the quality of local drinking water which would have a potential impact, with a High Speed Rail Track and Train operating within feet of this Water tower. Feasibility of Proposed High Speed Rail, by The Reason Foundation, concludes that proposed high speed rail project could lose over \$500 Million a year. Please don't subject Waller/Harris County to this devastating loss. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS	Refer to GN-3 and WW-6. The Project would not impact the water tower. The rail would be located approximately 320 feet from the water tower.
Naomi Ahuar	2/5/2018	Website	REFERENCE: IMPACT ON WALLER HARRIS DISTRICT NO. 200 EMERGENCY SERVICES NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of the Waller/Harris County Area, the "Need and Purpose" of this project has not been shown to date. A High Speed Train would not be beneficial to our land, our city, our community, our schools, our roads, our emergency services, and neighboring communities. HC-4 route through Waller County, is some three miles west of the original publicity noticed route, and changed without any opportunity for public input from those affected. EMERGENCY SERVICES could be negatively impacted by the HSR line, due to its potential impact on our county and private roads. Many of which are used for emergency vehicles that now service the District and provide an 8 — minute response time. This HSR goal is to service from only one city central to the next city central with a possible ONE stop in-between. This HSR will not benefit Waller residents in any way. Why make our community pay the price of a future disaster to take place in our wonderful small community. NO OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS	Refer to BA-8, LU-4, PI-1, PN-3, SC-5, SC-19 and SS-23.
Naomi Ahuar	2/5/2018	Website	REFERENCE: IMPACT ON HEWLETT PACKARD 97M CENTER NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY Waller County welcomes large growth for our community, Hewlett Packard Date Center Enterprise is currently not in a position to approve or disapprove the proposed route of HSR. This Data Center would bring jobs to the Waller/Harris County. However the proposed route would have very serious negative impact on our Waller/Harris County property of the critical outcome of the data center operations at the proposed property. FRA FAILED TO COORDINATE WITH LOCAL WALLER COUNTY GOVERNMENT. Our Waller/Harris County Community deserves to be abreast of our county government functions happening in our surrounding county area. Our Government cannot do their job property if FRA failed to coordinate with our local county government, for the High Speed Rail in our area. As a resident of Waller/Harris County, I do not feel the "Need and Purpose" of this project has "not" been shown. It does not benefit our Waller County Community in any way. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS	Refer to PI-1, PN-3 and SC-11.
Naomi Ahuar	2/5/2018	Handwritten	NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY I am a resident Of Waller/Harris County. Our community has dozens of roads planned, that will make transportation times more do- able, that will bring more residents to this area, as well of jobs, and businesses. But, none will be able to be completed If the High Speed Train cuts through, which will also be Stifling to All Future Economics Development in this area. HC-4 route through Waller/Harris County: This route is some three miles west Of the original publicly notice route, and changed without any public input from those affected: Waller/Harris County. FRA Failed TO Coordinate With The Local Waller County Government. No Build Option Should Be Chosen As The Only Viable Option FOR TEXAS	Refer to BA-3 and SC-13.
Naomi Ahuar	2/6/2018	Handwritten	REFERENCE: IMPACT OF PUBLIC SAFETY NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY To me public safety is a big issue, a factor in our day to day operations, as wemove from location to location within OUT community as it is, day to day!!! The HIGH SPEED RAIL TRACKS would pass with approximately of 580 feet of a Natural Gas Pipeline Compressor Station. THIS HAZARD IS NOT ADDRESSED!!! NO one has considered the lives of the residents that live in our community, or our safety of an explosion, from the speed of the train. Again FRA FAILED TO COORDINATE WITH THE LOCAL WALLER COUNTY GOVERNMENT!!!!!!!!!! NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS Sincerely From a Concerned Citizen of Waller/Harris County.	Refer to EU-2, EU-6, EU-7 and PI-1.
Naomi Ahuar	2/6/2018	Handwritten	REFERENCE: IMPACT ON WATERFOWL AND HUNTING NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY I moved to this area to have property, acreage to spread out on, acreage to watch nature, and for an area for hunting.	Refer to NR-1, NR-2, RF-2 and WW-1.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

			The route of the HSR cuts through and will destroy the north end of one of the major wetlands in this region, where duct hunting is vital to the economy and where waterfowl and their hunting will be diminished, if not destroyed by a HIGH SPEED TRAIN. Again, "The NEED AND PURPOSE" of this HSR project has not been shown, to date!!! NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS Sincerely From a Concerned Citizen of Waller/Harris County.	
Naomi Ahuar	2/6/2018	Handwritten	REFERENCE: IMPACT ON G&W WATER NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of Waller/Harris County, and after the research on the devastating affects the high speed rail would put on our community, my concern with the quality of local drinking water which would have a potential impact, with a High Speed Rail Track and Train operating within feet of this Water Tower. Feasibility of Proposed High Speed Rail, by The Reason Foundation, concludes that proposed high speed rail project could lose over \$500 Million a year. Please don't subject Waller/Harris County to this devastating loss. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS Sincerely From a Concerned Resident of Waller/Harris County.	Refer to GN-3 and WW-6. The Project would not impact the water tower. The rail would be located approximately 320 feet from the water tower.
Naomi Ahuar	2/6/2018	Handwritten	REFERENCE: IMPACT ON KATY PRAIRIE CONSERVANCY NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of Waller/Harris County, I am worried about the impact of the High Speed Rail would have on the Katy Prairie Conservancy, which is a biologically diverse powerhouse with more than 300 species of birds, 110 species of mammals, amphibians and reptiles and more than 600 species of grasses, wildflowers, trees, vines and shrubs. A 200 MPH train barreling within one miles of this migratory bird sanctuary is going to cause bird collisions and accidents. This Is also where important wetlands of the Waller County area exist, which will be directly or indirectly affected by a HSR corridor. As our community grows, with progress, why tear each mile Stone down, with an un-needed, un-wanted high speed rail. How can Waller County grown with this no-nonsense HSR in our area! NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS Sincerely From a Concerned Resident of Waller/Harris County.	Refer to NR-2, RF-4 and WW-2. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . For information regarding vegetation please see Section 3.6.4.2, Natural Ecological Systems and Protected Species, Vegetation and mitigation measures NR-MM#2 and NR-MM#4 in Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .
Naomi Ahuar	2/6/2018	Handwritten	REFERENCE: IMPACT ON WALLER HARRIS EMERGENCY SERVICES DISTRICT NO. 200 NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of the Waller/Harris County Area, the "Need and purpose" of this project has not been shown to date. A High Speed Train would not be beneficial to our land, our city, our community, our schools, our roads, our emergency services, and neighboring communities. HC-4 route through Waller County, is some three miles west of the original publicity noticed route, and changed without any opportunity for public input from those affected. EMERGENCY SERVICES could be negatively impacted by the HSR line, due to its potential impact on our county and private roads. Many of which are used for emergency vehicles that now service the District and provide an 8 — minute response time. This HSR goal is to service from only one city central to the next city central with a possible ONE stop in-between. This HSR will not benefit Waller residents in any way. Why make our community pay the price of a future disaster to take place in our wonderful small community. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS Sincerely from a Concerned Citizen of Waller/Harris County.	Refer to BA-3, PI-1, PI-8, PN-3, SC-7, SC-19 and SS-23.
Naomi Ahuar	2/6/2018	Handwritten	REFERENCE: IMPACT ON HEWLETT PACKARD DATA CENTER NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY Waller County welcomes large growth for our community, Hewlett Packard Date Center Enterprise is currently not in a position to approve or disapprove the proposed route of HSR. 			NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS Sincerely From a Concerned Citizen of Waller/Harris County.	
Naomi Ahuar	2/6/2018	Handwritten	REFERENCE: IMPACT ON HISTORICAL SITES NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY Today in our community we are very fortunate to be able to drive by, admire, and learn the history of this community of Waller County. An Army Corps of Engineers Section 4 Permit report has revealed four archeological sites, and two pre-historic sites considered at this time for inclusion in the National Register of Historical Places. Why deprive our County of this Historical Event. Due to the fact that FRA FAILED TO COORDINATE WITH THE LOCAL WALLER COUNTY GOVERNMENT, stop this disaster from destroyed our "HISTORY". NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS Sincerely From a Concerned Citizen of Waller/Harris County.	Refer to CR-9.
Naomi Ahuar	2/6/2018	Handwritten	REFERENCE: IMPACT ON WALLER INDEPENDENT SCHOOL DISTRICT NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of the Waller/HARRIS County area, the proposed alignment of the High Speed Rail will run through a large portion of the Waller ISD's district. This would negatively impact bus routes, which may cause Waller ISD to purchase addition school buses to transport student, and accommodate delays to county and private roads being impacted and/or closed by the proposed High Speed Rail project. The safety of our children is the utmost concern for our Waller/Harris County residents, parents, and school factuality. Why add the risk? Why add the tax dollars, to withstand this unneeded debt to our community. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY OPTION FOR TEXAS Sincerely From a Concerned Resident of Waller/Harris County.	Refer to SC-5 and SC-8.
Naomi Ahuar	2/6/2018	Handwritten	REFERENCE: IMPACT OF QUALITY OF LIFE NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY "Quality of Life", would be a huge devastating issue for the residents, and community Of Waller/Harris County. Our residents, and our community area would be living, working, functioning day to day within the noise and vibration within noticeable distance. The sight of the rail, as well as the 90 minute train, that will pass several times a day. These high speed rails are elevated, which would add to the distracting visible eye sight of Waller/Harris County. HSR's are known for derailing, and that would add devastating issues to the surround area of Waller/Harris County. This would add concerns of safety for our Waller/Harris County residents in that existing surrounding area, as well. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS Sincerely From a Concerned Resident of Waller/Harris County.	Refer to AS-1, NV-1, NV-5, SS-1 and TC-4.
Naomi Ahuar	2/6/2018	Handwritten	REFERENCE: IMPACT ON RESIDENTIAL COMMUNITIES IN NORTHERN WALLER COUNTY NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of Waller/Harris County, I feel that the Northern Portion of Waller/Harris County Communities: Saddle Creek Forest, Plantation Forest, Oak Hallow, Remington Forest, Six Pines and the Kickapoo Preserve, on these developments, the HC-4 route travels directly through these developments and destroys the economic viability of them and the value of everyone's property, which is devastating to each individual and or piece of property of each resident. Why! Why destroy this TEXAS sole with a HSR. Our community is made up of beautiful acreage, and residents that have paid high dollar for their Texas Soil. Stop the High Speed Rail in Waller/Harris County, say: No To High Speed Rail, save our Communities, save our Texas Heritage, Save Our Land. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS Sincerely From a Concerned Resident of Waller/Harris County.	Refer to LU-3, LU-4, RF-1 and VA-1.
Naomi Ahuar	2/6/2018	Handwritten	REFERENCE: IMPACT ON THE CITY OF WALLER NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of the Waller/Harris County Area, I take pride in my neighbors, and community. The IMPACT ON THE CITY OF WALLER, one of my main surrounding areas in my community I feel the HSR will affect. The HC-4 Route passes through the city's extraterritorial jurisdictions and through the planned Waller Town Center. HC-4 passes through the Delta Troy Interests, a 990 —a tract being held for housing and commercial development. HC-4 also passes within 4,000 feet of the Daikin/Goodman facility. FEASIBILITY OF PROPOSED HIGH SPEED RAIL, The Reason Foundation, concludes that the proposed high speed rail project could lose over \$500 Million a year. Why pass that future disaster and clean up debt on to the surrounding communities of the Waller/Harris County Area. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR HIGH SPEED RAIL FOR TEXAS Sincerely From a Concerned Citizen of Waller/Harris County.	Refer to AQ-7, GN-3, LU-4 and NE-1.

			High Speed rail route would create noise and disturbance, scare off animals, and make the ranch unsuitable for camping and other Cub Scout activities. We urge you to consider a route without these adverse impacts. Cub Scout Pack 425 Alcuin School Dallas	
madelyn alexander	2/6/2018	Website	I oppose the project. What I have read of other such projects tells me it will be a burden on taxpayers and do nothing to mitigate traffic in Houston or Dallas. I do not believe a project of this magnitude with such deleterious impact to taxpayers and businesses should be entrusted to private companies who have a clear profit motive. I request the project be put us for public vote by taxpayers. I also request additional time for comment and review.	Refer to PI-1 and PI-3.
Edward Allen	2/19/2018	Website	I am strongly in favor of the Texas High Speed Rail. We need this form of rapid transit to reduce congestion on I-45, increase commerce between the major regions of our state, and also reduce congestion in major airports. It is privately financed so will not be a burden on state budgets. It will employ 1000s of Texans in good jobs, and will create a tax basis that will help county budgets for strapped areas between here and Dallas.	Comment noted.
Gloria Allen	2/5/2018	Website	There is Red Deer herd that live in the location of the proposed train. What steps will be taken to protect them?	Red deer are not native to Texas; however, for information regarding impacts to wildlife please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife. Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.
Gloria Allen	2/5/2018	Website	I live less than 2 miles away from the proposed high speed rail. There are underground springs on our property. If the train derails, what action will be taken to keep the underground springs from being contaminated?	Refer to HZ-5, SS-12 and WW-2. Typically, contamination in the event of derailment is a result of petroleum spills or freight cargo contents; however, this passenger rail would not carry large quantities of potentially hazardous materials.
Gloria Allen	2/5/2018	Website	By implementing a high speed rail what studies have been done to ensure the safety of the environment?	Refer to NE-1 and SS-1.
Gloria Allen	2/5/2018	Website	By implementing a high speed rail what studies have been done to ensure the safety of the environment?	Refer to NE-1 and SS-1.
Kaye Allen	2/4/2018	Website	Have you done any feasibility studies regarding how this project will be paid for without Texas taxpayers paying for it? How can you predict such high ridership? Texans drive or fly Southwest.	Refer to BA-12, GN-2, GN-4, GN-5, NE-1 and PN-3.
Kaye Allen	2/5/2018	Website	The Texas Central website also mentions that there will be trains running every 30 minutes. How was this many trips decided per day and are there any studies to support that there is a demand for this amount of ridership given other forms of transportation to and from these cities?	Refer to GN-2.
Kaye Allen	2/11/2018	Website	This train will split my family cattle ranch in half, rendering the far side virtually unusable. We will have to reduce our heard because of this train. Please explain to me how you will help us and farmers/ranchers like us make up for our tremendous loss of revenue.	Refer to LU-11. The Preferred Alignment includes Segment 2A, which is approximately .81 miles west of this referenced property. The majority of the Project at this location is on viaduct, which would allow livestock and equipment to pass underneath.
Paige Allen	2/5/2018	Website	A few questions - where are investors at in terms of private funding? I know your website mentions this is the primary difference between the Texas and California project, however I see funding billions of dollars privately as close to impossible. The Texas Central website also mentions that there will be trains running every 30 minutes. How was this many trips decided per day and are there any studies to support that there is a demand for this amount of ridership given other forms of transportation to and from these cities? Are there any technology updates to the train? Your website essentially states that the technology is 53 years old. That is very concerning to me given the new world we live in compared to the mid-60's and the possible downfalls of such outdated technology, such as taking up a lot of electricity?	Refer to GN-2, GN-4, NE-1, TC-2 and TC-4.
Peyton's Allen	2/5/2018	Website	please explain how this will increase tax revenue "to all the counties along the route" when our land has been de-valued and there are no stops in those counties to generate revenue. Please explain how the train can be competitive with an airline who already makes many flights round trip daily from Dallas to Houston for a fraction of the anticipated cost of a one way train ticket. When this project can't support itself, please explain how the taxpayers won't be left holding the bag.	Refer to NE-1, NE-9, PN-3, SC-3, SS-5 and VA-1.
Ricky Allen	2/19/2018	Website	This high speed rail will be a waste of time and money. By the time its done Hyper loop will be going in other parts of the country and the world. Hyper loop is safer and 3 time faster. Even India will be light years head of us. http://in.pcmag.com/consumer-electronics/99460/news/the-hyperloop-could-be-a-reality-by-2018	Refer to BA-4 and GN-3.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Robert Allen	2/11/2018	Website	This train will pass across a creek, which is the main water source for my cattle. Explain to me all possible effects this train will have on this creek, downstream and upstream, and the effect it will have on my herd.	Refer to WW-1, WW-2 and WW-9.
Robin Allen	1/30/2018	Oral	My concern is the disinterest, disregard, and unstudied impact on your land values. If your just from an aesthetic point of view because you can't sell your land because no person will want to look out their front door and see this monstrosity. I have been tossed around to like three different stations and been told it--is in these documents. Some said you need to go over there, um, no I don't think anything has been studied. So that's my statement. It's a low priority. A lot of misinformation because is doesn't exist. there blowing smoke up my skirt about it. That is the very last of their worries. To bad so sad.	Refer to AS-1 and VA-1.
Rodney Allen	1/30/2018	Oral	My name is Rodney Allen and we are against it. It is going to go maybe a mile and a third from us. So our property value is going to go down. Nobody is going to want to buy our property. We didn't work our whole life, you know for something that is not going to benefit Ellis County. Not one single benefit for Ellis County. By the time I drive to Dallas and ride the train I can be in Houston. They are going to take land away from these people with immanent domain if we are not careful. Which I am against. If it worked, Amtrak would of already run a line down there. And I see no positives for a \$200 ticket ride down there and rent a car, get a taxi. All it is going to do is help Dallas, Conroe, Houston and nobody in between. I mean who can afford \$200 a day. That is \$1,000 a week. Not including the cost to park. Or having only two cars, two insurance policies. I think it is a waste of money. Being retired I can't afford any more taxes. I live on Social Security and I don't need anything taken out in the way of taxes for a railroad that I am not going to use. I and I do appreciate your time.	Refer to ED-1, ED-2, SC-19, SS-1, SS-12, SS-12, SS-13 and VA-1.
Wilma Allgood	2/19/2018	Website	So excited about this project! We are way behind the rest of the world and have a lot of catching up to do!!!! Trains can run when a planes and cars can't. Thanks	Comment noted.
Jennifer Allred	3/7/2018	Website	I am completely against this project. I live very close to the projected path in a quiet suburban neighborhood. I am very concerned about the noise level, effects of vibration, and the effects of an electrical wall on my home, my pets, and my children. I do not want to look out my window and see a train zooming by at 200 mph every 30 minutes from early in the morning until late in evening. I do not want to be woken up in the night with repair work on the train. 290 is currently under construction and this will just add to the construction nightmare, not to mention the effects on future flooding and on gas pipelines, hazardous waste sites, livestock and wildlife (including federally protected wildlife). My property values will plummet as this private company tries to take land using eminent domain with a low ball offer. Alternately, I will be stuck living with a train 35 feet in the air right on top of me since no one will want to buy a 2 story home designed for raising families- no parent will want their children raised near this monstrosity. It is also guaranteed this company (which has never built nor operated a train before) will need a government bailout and WE DO NOT HAVE FUNDS for this-no federal, state or taxpayer funds should be used for this project. I feel if any money is to be spent it needs to be spent on alleviating the major flooding issues Houston currently has. This project does absolutely nothing to remedy the major traffic issues in Houston. With only one station in Houston it doesn't make sense for the majority of people to spend an hour getting to the station in Houston just to get to Dallas and have to rent a car, spending more money. I am also concerned how the government would protect hundreds of miles of this train from terrorists. I am also concerned about the projected ridership-it will not be enough to sustain this project financially. Please do not allow this project to go forward. It will destroy thousands of people's lives and livelihoods as properties are destroyed, cut in half, and devalued. Thank you.	Refer to ED-1, ED-2, GN-2, GN-4, GN-6, LU-11, NE-1, NV-1, PN-3, SS-2, SS-6, SS-7, TR-2, TR-4, TR-5, TR-8 and VA-1.
Bradley Almond	2/16/2018	Website	Please approve the Texas Bullet train. The time is now for high speed rail in the US and specifically in Texas.	Comment noted.
Ramona Alms	3/3/2018	Website	I am a supportive of the Houston/Dallas Bullet train and the progress 'this brings to not only Texas but ultimately the USA. It is literally in my backyard and I implore you to move forward with this project.	Comment noted.
Ann Altoonian	2/7/2018	Website	I have visited Texas only once, but it would have been so helpful for me to be able to take the train from Houston to Dallas when I was there. When I learned of this project I was very enthusiastic about it, and can imagine that tourists like me would make frequent use of the proposed line.	Comment noted.
Oliiva Alvarado	2/6/2018	Oral	Howdy. My name is Olivia. I'm an urban and regional planning undergraduate student at Texas A&M. I came here tonight to voice my opinion as a student. This project will have a huge impact on the economy and pattern of growth of Texas. This project will also influence college students at Blinn, Texas A&M, and Sam Houston State University. Although we are a transient population, our voices are important on implementation of this project. Students will have more access to guest lecturers, professors, job recruiters, and internships. This will also connect us to more educational opportunities. We can travel to other schools for research, seminars, and conferences. Not only will we have access to the resources in Houston and Dallas, but other schools will have access to the ninth largest public research institution in the country- Texas A&M. We will have the ability to learn and help with technology that the high-speed trains bring to Texas. Students can be a part of the innovative solution to traffic congestion and growth in urban areas. This is a huge opportunity for students. It has a chance to we problem solve in the future. As an urban regional planning student, I understand the importance of developing environmentally friendly and economically practical solutions to urban problems. The cost to the taxpayers is zero dollars. MR. GLENN MANNINA: That's fine. We've got the numbers that can prove that wrong. MS. OLIVIA ALVARADO: The train will generate \$2.25 billion in taxes over the next 25 years. This is	Comment noted.

			income to rural counties that don't always see the economic investment like more populous areas do. This project invests in people along every mile of infrastructure, and will also create permanent jobs in every county it crosses, and is environmentally friendly. I will be honest when I thought that this project was too good to be true, but the DEIS has confirmed it. Construction operations impact will not violate our environment. I was able to listen tonight of engineers describe the disturbances can be no wider than 500 feet. I also listened to a Texas Central representative describe Texas State Bill 977 that states no government money will go to the construction, maintenance, or anything to do with the high-speed train. This will be completely privately funded. MS. Thank you. This project is exactly the solution Texas needs. We protect our environment and gain financial resources without government money. Of course, some federal agencies need to regulate any project like this. That's why we're here tonight. FRA has set up strict regulations so we know our environment and people are safe. Texas Central is building this train for the people. That's why they're taking all of our considerations seriously. And although all private railroads have eminent domain, they have not used it and are working hard not to. No one is coming and taking the dirt in your front yard. They're doing this the American way. Thank you for listening to me.	
Olivia Alvarado	3/5/2018	Oral	Howdy. My name is Olivia, and I'm an urban and regional planning undergraduate student at Texas A&M. I came here tonight to voice my opinion as a student. I believe this project will have a huge impact on the economy and pattern of growth for Texas. This project will also influence college students at Blinn, Texas A&M and Sam Houston State University. Not only our transit population, our voices are important on the implementation of this project. As an urban and regional planning student, I understand the importance of developing environmentally friendly and economically practical solutions to urban problems. This costs taxpayers zero dollars and will bust over \$2.5 billion in taxes over the next 25 years. 52 percent of Route A will follow existing right-of-way. There will be zero closures of public roads. The stations have located in places that are close to large populations of people, but also do not inhibit the city's current and future development. This shows that Texas Central is dedicated to building this train where it will have the least impact on people and land but also the largest impact on transporting people safely from one location to the next. There are three major arguments I hear against Texas Central. Taxpayers pay for the train, Texas Central is eminent domain and it's not safe. First, Texas Central is a privately funded company and no government money will go into it. Not only has the company been saying this since day one, but they supported Texas State Senate Bill 977 that states: The legislature may not appropriate money to pay for a cost of planning, facility construction or maintenance, or security for, promotion of, or operation of, high-speed rail operated by a private entity; and a state agency may not accept or use state money to pay for its cost. They supported this bill because they do not want government money. This is a completely privately funded project and no taxpayers' dollars will go into it. Second, Texas Central does have eminent domain under Texas Transportation Code. However, just because Texas Central has it does not mean they will use it. So far they have not used eminent domain and they are working hard with every individual landowner so they will not have to use it. Third, Texas Central is using the entire Shinkansen system, which has been operating in Japan for over 50 years without a single injury or fatality due to derailment or collisions. Texas Central is bringing a safe system to America. They are not taking the trains from Japan and the tracks from France, but taking the trains, tracks, coding, signaling, all of it, from the Japanese system and bringing it to Texas. This project is exactly the solution Texas needs. We protect our environment and gain financial resources without government money. This will ease traffic on I-45, as the populations in both Dallas and Houston double over the next 25 years. Texas Central is building this train for the people, and I am in strong support of it. Thank you.	Comment noted.
Ramon Alvarez	2/21/2018	Website	So many other less worthy projects are approved daily which generate a far more substantial carbon footprint. Furthermore the diligence that this project has demonstrated thus far, plus it's numerous quality of life benefits, make it a no-brainer to me as a life-long resident and taxpayer of Central Texas. Please help to make our great State even Greater!	Comment noted.
Marylou Amann	1/11/2018	Website	I think it is a mistake to have the high speed rail line end in Houston at the intersection of 290 and 610. That is one of the most congested intersections in Houston. It end of the line should be some place less congested, perhaps by the airport?	Refer to GN-6, GN-7, NE-1, TR-4 and TR-5.
Brian Andersen	2/4/2018	Website	I oppose this project! Public roads (highway and rural) are impacted. Who pays for changes? Who pays for maintenance? How does one quantify the inconvenience?	Refer to TR-7 and TR-8.
Brian Andersen	2/4/2018	Website	There is NO economic value added to the counties affected between Dallas and Houston!	Refer to SC-19.
Brian Andersen	2/4/2018	Website	Farmers will be limited in their ability to farm economically, i.e. acreage devoted to construction of this project and it's restrictive impact during and after construction.	Refer to LU-2 and LU-11.
Brian Andersen	2/4/2018	Website	Who pays for this project when it (and it WILL) fail???	Refer to NE-1, NE-9 and SS-5.
Brian Andersen	2/4/2018	Website	Safety? This has received limited response based on the proposed route(s) of this ill-advised, land-grabbing project!!	Refer to SS-1.
Brian Andersen	2/4/2018	Website	When this project fails (and it WILL), who pays for the demolition of this project and return of the land to it's original position?	Refer to NE-1, NE-9 and SS-5.
Brian Andersen	2/5/2018	Website	I am opposed to this project! The affect on wildlife cannot be based on the DEIS analysis, as there has never been a 200 MPH mode of transportation in Texas, nor in the U.S.A!	Refer to NE-1, NR-1 and NR-5. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species

				and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife. Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.
Brian Andersen	2/10/2018	Website	No mention in the DEIS as to who pays for the multiple disconnections, reroutes and reconnections of existing electricity lines. So, who pays??	Refer to EU-2.
Brian Andersen	2/10/2018	Website	Who pays for the multiple disruptions in water delivery via rural water provider lines that will be crossed?	Refer to EU-2.
Brian Andersen	2/10/2018	Website	The DEIS assumes (will all know what ASS-U-ME does!) the HSR effect on farm animals. Where's the compensation for the unknown factors that will occur to farmer's and rancher's livestock caused by a HSR?	Refer to LU-11 and NR-1.
Brian Andersen	2/10/2018	Website	The proposed HSR route bisects ("cut") our property allowing NO access from either portion! We operate an equine rescue (503C) operation and this will NOT allow us of our property as needed. What does the DEIS/TCR plan to do about this?	Refer to LU-11, NR-6 and TR-8.
Brian Andersen	2/10/2018	Website	Per About FRA "Overview," the mission statement reads: "FRA promotes safe, environmentally sound, successful railroad transportation ..." The FRA acceptance of the DEIS and TCR's HSR is contradictory to its mission statement!! SAFE?? ENVIRONMENTALLY SOUND?? SUCCESSFUL??	Refer to NE-1.
Brian Andersen	2/10/2018	Website	After the comment period deadline date, who/who's involved to make the final decision on the DEIS and DEIS comments?	Refer to NE-1, NE-2, PI-1 and PI-7.
Brian Andersen	2/16/2018	Website	I am opposed to this HSR project proposed by Texas Central Railway!!! TCR's projections of ridership are not confirmed by the DEIS nor the Texas Department of Transportation.	Refer to GN-2.
Brian Andersen	2/18/2018	Website	After this project is built, and it FAILS, who is responsible (Pays) for the demolition and return of the land/property to it's preexisting state??	Refer to NE-1 and SS-5.
Brian Andersen	2/18/2018	Website	The DEIS does not address the impact on farm animal reproduction, habitat and access to pastures that will be divided (or eliminated) with this ill-advised project. Who is responsible for these losses? How will these losses be determined? Who will be responsible for the reimbursements of the negative impacts?	Refer to LU-11 and NR-1.
Trish Andersen	1/30/2018	Handwritten	I am opposed to the HSR because I feel our land has been sold to too many foreigners for one thing: #2 Will affect our revenue by 'd [sic] # of people who travel through our cities needing services and products. #3 It will contaminate more country once again. [sic] sound, geography, virgin land for wildlife. #4 We own a horse, rescue and save many neglected/abused horses. This land has been groomed to accommodate those needed services. #5 Serves no economic service to Ellis county. It divides our communities and counties in half. #6 Infrastructure will be messed up and very inconvenient for many residents. This will take way too much land to do this project. Do the land owners have NO rights? Can't trust what we are told because HSR has an agenda to achieve. They want to get land owners out. We live in the country for a [sic]	Refer to ED-1, LU-11, NE-1, NR-5, SC-19, TR-1 and TR-8.
Carol Anderson	2/24/2018	Website	"I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and proved less damage to the county long term."	Refer to LU-5, WW-1 and WW-2.
Carol Anderson	3/3/2018	Website	I am very against the rail running through fm 709 and 3194 known as Morgan legacy ranch. This property is a piece of heaven and refuge for not only wildlife but for so many individuals and community groups that the the Morgan extended family allows to use the property free of charge to relax, play, work or simply regroup with others. When the option of moving the rail north to existing power line area is available I can not support your existing path which would destroy the Morgan ranch.	Refer to LU-5.
Dave Anderson	2/24/2018	Website	"I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. Eric Anderson	3/5/2018	Website	There is a tremendous value to providing reliable transportation within our State. The environmental impacts must be properly addressed through the NEPA process, and thus far have been completed in accordance with standard practices of NEPA. I would like to politely encourage FRA to review this on its technical merits while remembering that the NEPA process is not a popularity contest. The NEPA process is important to addressing technical concerns of the public but should not be swayed by the popularity (or lack thereof) of the project.	Comment noted.

Jacly Anderson	3/3/2018	Email	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5, WW-1 and WW-2.
Jerri Anderson	2/5/2018	Website	In favor of the high-speed rail in order to compete with other countries around the world and to make it easier to travel for business and pleasure between Houston and Dallas. Need innovative connectivity to central business district and other business centers in Houston.	Refer to GN-6 and TC-4.
Jim Anderson	2/20/2018	Website	It's high time the US invested in modern transportation. We are many many years behind countries like South Korea and Japan.	Comment noted.
Michael Anderson	2/8/2018	Website	As a transportation economist with strong Texas ties, I strongly endorse the Dallas to Houston HSR project. This privately funded project unlocks more local investment and generates tax revenue for Texas. It reduces carbon emissions by an order of magnitude - relative to flying or driving - and bypasses heavily congested freeways. It also complements long-distance air service and injects much-needed competition into the uncompetitive Houston air market, which is dominated by a single carrier at IAH. I fly from California to Houston on a regular basis, and, given that Dallas is a more competitive market with better fares and service, I would seriously consider flying to Dallas instead and taking the train if this project were completed. This project is literally all upside and no downside to Texas residents and visitors.	Comment noted.
Renee Anderson	2/27/2018	Website	Let's ignore oil and gas Lobbyist and progress to a more efficient mode of travel and ease the horrendous highways congestion of Dallas/Houston.	Comment noted.

Renee Anderson	3/1/2018	Email	Let's ignore oil and gas Lobbyist and progress to a more efficient mode of travel and ease the horrendous of Dallas/Houston.	Comment noted.
Richard Anderson	2/27/2018	Website	I like the idea of high speed rail especially in Texas, I would like it extended between San Antonio and Houston too but I have serious doubts about the projected ridership. With cost being close to the same as an airline ticket why would anyone take the train when a plane is faster? Are the flights at full capacity and if so add more flights. I think there will be a huge shortfall when the ridership on the train falls way short of expectations.	Refer to BA-2, BA-12, GN-2, PN-3 and SC-3.
Larry Anfin	3/9/2018	Website	Millions of passengers safely and securely ride high-speed trains every day across Europe and Asia. The Bullet Train has proved to be the safest and most reliable mass transportation option in the world today, which is why it is the perfect system to bring to Texas. This train will connect North Texas, the Brazos Valley and Houston in less than 90 minutes. I also feel a bullet train from Fort Worth to Dallas is needed.	Comment noted.
Anonymous Anonymous	1/29/2018	Handwritten	If we wanted to live in a big city environment we would move to Dallas and Houston - we love our country town environment. People drive to Dallas ever day to Dallas to work but they don't move there [sic] want to return and be away from it. It all about the rich [sic] can't get enough money. Money isn't everything to move us. All I see is higher taxes more crime and it's all at the tax payers expense.	Refer to SS-6 and VA-1.
Anonymous Anonymous	1/29/2018	Handwritten	Not an option - skip it - You have I45 - do that.	Refer to BA-9 and PN-3.
Anonymous Anonymous	1/29/2018	Handwritten	After Listening to the Comment at the Public Comments in Corsicana and the Vehemence of the Commenters I want to know what provisions Have Been made for sabotage during construction	Refer to LU-10, LU-13 and TR-6.
Anonymous Anonymous	1/29/2018	Oral	If they try to get our property, it will go through a pipe fence, and a barn. They are not going to give us enough for our place. Probably never get any settlement enough to make it okay for them to come through our home. It is not like we can just go out and replace what we have the pipe fence and barn. But you want something else to move in. We can't really in this case. We would never be able to sell it. Because no one wants a train stopping just 200 yards from our home.	Refer to ED-2, LU-7 and VA-1
Anonymous Anonymous	2/5/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas.	Refer to BA-6.

			<p>4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact.</p> <p>5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites.</p> <p>6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.</p>	
Anonymous Anonymous	2/5/2018	Handwritten	I can not believe that our government would let any one take people's land. I think this is not for we the people but for big business. Some of this land has been family for over a hundred.	Refer to ED-1.
Anonymous Anonymous	2/5/2018	Oral	Some of the questions that I'm concerned with is who decided that this was necessary? Also, the things -- What happens -- we go down in income every year because prices go up, but you don't get an increase. So, what happens to the elderly over 65? They're still going to pay same as somebody that is 35. And I'll never use it. So -- what's some of the other things I had. And are they saying this is going to make money? Just like they said and when it's going to be finished. Also, like the 290 that was supposed to be finished in '16, well, I'm still waiting. I don't know what '16 they're talking about, but it's not finished and they're saying it's going to be finished in two years or something like that. No, it just -- the noise of the railroad. The noise of the whistle. I think there's a lot of things going wrong here for somebody to make money. I think there's a couple of big people that's making money and that's what it's all about. Thank you.	Refer to ED-2, PN-3, SC-3 and TC-6.
Anonymous Anonymous	2/6/2018	Handwritten	During operation of the Build Alternatives, not all emission production would Occur in non-attainment areas. Power generated for the HSR System and station areas would be generated at distant power plants operating away from the Build Alternatives; therefore, emissions produced due to the consumption of electricity for operation would be indirect. Additionally, any number of regional power plants connected to the Electric Reliability Council of Texas (ERCOT) grid can satisfy operational demand for the HSR system and station areas. The Build Alternatives would provide another Option for intercity travel between Dallas and Houston that would emit air pollutants, including Mobile Source Air Toxics (MSATs), into the atmosphere. However, the Build Alternatives would decrease overall VMT from passenger vehicles compared to the No Build Alternative, thereby decreasing regional MSAT emissions generated by passenger vehicles, and consequently would have a beneficial impact on regional MSAT emissions.	Comment noted.
Anonymous Anonymous	1/29/2018	Oral	I come opposing this high-speed rail because it's good, I guess, for Dallas. It may be good for Harris county, but there's seven counties in between that it will do nothing but tear the counties up and lower the tax rates. They'll destroy the property. And one of the TCR people, I was talking them, and the lady had the audacity to tell me well that's just farm land. Well that farmland has been in my family for 125 years, we love that land. They come to me about two-and-a-half years ago wanting to survey my property and I told them well I don't think you're a railroad and they we kept arguing about that. Then in May, two years ago they sued me. You know they gave me two days to be in court. Two days to get a lawyer and all get in court. The judge wouldn't hear the case, okay. Then, they start telling me to come out with a feature story on me. Run colored pictures in their papers, and you know, I they kept coming out. When they was talking said we want about 80 feet of your land. All the way through that's 4,700 feet. When they sued me they wanted 28 acres that took 80 feet, that would be about six acres. And they were taking my farm and warehouse. After the Star Telegram deal come out, well here I go. They come up with next thing I see. They want about 40 acres and they're taking my new house that I had just built as well. They have been not genius {sic} in their dealings with the people at all. First they say 3,000 acres, now they want 8,000 acres. Telling me that -- I've got one question that nobody's answered for me yet: What gives a private for-profit company the right to come and take my private land. Thank you.	Refer to ED-1, ED-2, LU-14, PN-3 and SC-19.
Anonymous	12/26/2017	Letter	We are writing to you in reference to the Environmental Impact Statement Draft issued concerning the High-Speed Rail. Our property is right in the middle of the area for the HSR. It will Consume all our property with this project. The property that we own has been pasted down through the generations and has raised many kids. Our Grandparents told us that this place would always be our safe place to come HOME to. The way it sits right now, with the HSR and their plans, our Safe Place will no longer be. The representatives from the HSR have stated numerous times that they are working with the Land Owners. If they are, we have not seen it. We have not given them permission to go onto our property yet they have trespassed numerous times, even with the "No Trespassing" signs up all over our property. They have pushed their way into my business offices that are not for public access due to HIPPA protected information in them and tried to intimidate my employees, including my daughter. We have called the Sheriff's Department when we have caught them on our property, but it did no good as they were not on our property when they arrived. Our neighbors have caught them on our property and called us bust again by the time we got there, they are gone. We have also caught them ourselves and as soon as we head toward them, they take off and leave. When we sent them a no deal answer on their contract, they placed us on an Eminent Domain List" and we have been receiving solicitation since from people wanting to help us protect our property rights as the land owners. We were raised on this property as well as our mom and her siblings. We are currently raising our kids and grandkids on this property. We enjoy the solitude, peace and quiet, and the wildlife roaming freely around. We ride our horses thru the pastures and enjoy the country life. We have made this our home and our children and grandchildren's home. Our roots are here on this land. As kids we would leave out with a sack lunch and prowl in the woods and enjoy the freedom that the country life	Refer to ED-1, ED-2, NE-1, NE-8, NR-5 and NV-1.

			provides. A HSR would greatly affect that solitude and peace that the Country life has given us. We ask that you say no to this current route and stop the HSR from destroying our roots. We know no other life except what we have grown up in. These woods the folks call " God's Country". I invite you to come spend a few days with us and enjoy the life we have. We do not wish to have it uprooted by politicians, hungry money men, and foreign investors. Please stand behind the people of Texas and stop this nonsense now.	
Anonymous	1/8/2018	Letter	Wildlife that lives on the land include white tail deer, Texas mountain lion, bobcats, wild boar, coyotes, red fox, water fowl, ducks, geese, owls, dove, pigeon and other birds of many species, the State animal and endangered species armadillo, skunks, rabbits, squirrels, snakes, turtles, fish, frogs, and endangered species Texas horned toads. These are just the species of animals, fowl, and reptiles we have seen, others may exist. Also, many aquatic plants, including golden gladecrest and Navasota Foxglove have been spotted in the marshy lands to the back of the property. These are endangered species. This does not include a more comprehensive search for endangered species on the Federal and Texas governmental lists. We personally have race mixed family members so Texas Central Railway, LLC really do not know who we are to report this statistic. The neighboring three hundred acres is owned by people of Asian immigration, with an active church, all composed of minority immigrant Americans. The FRA published report has a low score for minority disruption. The true facts are missing, making this a flawed report. Please forward to us all financials, including paid receivables and payables, balance sheets, and payroll summaries for the previous three years, for our review before the TRA hearings scheduled this month and February so we have time to review all Texas Central Railway, LLC's books. Also, financials including receivables, payables, and payroll from the Regulatory Branch, Galveston District, U.S. Army Corps of Engineers must be included. This request for the above records should be delivered to us at the above address.	Refer to EJ-1, NE-1, NE-10 and NR-2. Golden gladecrest is known only from San Augustine and Sabine counties in Texas. Navasota False Foxglove is not state or federally listed. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .
Anonymous	2/1/2018	Email	NO high speed train in Navarro County Do not run this train thru our county,it will be of no benefit to any of us in this county.	Refer to SC-19.
Anonymous	2/6/2018	Website	I attended both the Dallas county and the Grimes county FRA open houses. I am submitting these comments not as opposed to the rail project but only to make you aware of past genealogical efforts from Dallas county genealogical society. In 1993, one of our biggest projects was the Coming Home and Honey Springs cemetery. These two adjacent Cemeteries were a land grant after Juneteenth, Independence Day or Freedom Day that commemorates the abolition of Slavery in the state of Texas. The clean up and identification effort was monumental. Hundreds of unmarked graves were found along with many that had little or no identification marker. Many of those unmarked graves being on the most eastern edge of the cemetery. I bring this up because while looking at the maps from FRA and the engineering group at the Open house, the proposed rail goes almost on the eastern boundary not to mention the proposed access road that could possibly encumber the cemetery and the possibility that the only entrance would be blocked. The station number is DS-760+00 and 750.00. Secondly, just south at station number 720+m, there is another small cemetery similar to the above that is in direct path of the rail. The small cemetery is approximately 70X70 and again has old and many unrecognizable markers. It is part of a lot that used to be some sort of technical school. My concern is that this cemetery could be larger and the likelihood of finding unmarked graves would be high. Personally, I am not opposed to progress, but I am passionate about the serenity and preserving the area where lives have been laid to rest.	Refer to CR-6 and CR-10.
Anonymous	2/6/2018	Website	COMMENT ISSUE A cursory review of the Draft EIS finds that it fails to address significant risks, both to public safety and the environment, that the operation of HSR's "electric" train will pose to the integrity of buried steel pipelines (many transporting hazardous liquids and gases) that it will encroach upon. However, the review of the Draft EIS did not find any discussions concerning possible damage caused to nearby buried metallic pipelines, resulting from induced voltages OR the flow of current in the ground around them, from HSR operations OR the mitigation of such risks to the public or the environment. COMMENT RECOMMENDATION It is recommended that the USDOT Pipeline and Hazardous Materials Safety Administration (PHMSA) be contacted and requested to provide guidance as to any required mitigation of such hazards by the HSR Project - in accordance with 49 CFR 192 and 49 CFR 195. (It should be understood that other, non-USDOT jurisdictional, pipelines may also be detrimentally affected by HSR's operations.)	Refer to EU-1, EU-2, EU-8, NE-1 and TR-11.

Anonymous Anonymous	2/5/2018	Website	Your organization, together with your friends at Texas Central Rail have had months, if not years to prepare the flawed, inaccurate, and extremely one-sided draft environmental impact study. Whereas we, the little people who are directly affected by this unwanted, unrealistic and unwarranted scheme, have only a matter of days to digest the report, research its findings and prepare our objections. We do not have the fat checkbooks of Texas Central Rail or, at least in my case, the experience and knowledge to prepare objections in such a tight time frame. Further, when I handed in some written objections I asked if I could have a receipt for them in order to provide a chain of evidence and was told that this was not possible. I may be cynical, but I do wonder if the objections will be consigned to the waste bin, never to see the	Refer to GN-1, PI-1, PI-3 and PI-7.

			light of day. In closing, I ask that in all fairness an extension to the deadline of at least a further ninety days be made in order that we may submit considered and justifiable comments. If this is not forthcoming the only acceptable outcome will be the no build alternative.	
Anonymous	2/5/2018	Oral	did they take into account displacement of people? Never mind the cost of the railroad. I'm talking about displacement of people and environment. Also, the elderly people and I'm one of them.	Refer to ED-2.
Anonymous Anonymous	2/6/2018	Handwritten	You will be hearing numerous objections as to how the proposed high speed rail will effect the citizens of Texas by stealing land by means of eminent domain, lowering property values, increasing property taxes and a host of equally important and relevant objections. If you take any notice of these objections remains to be seen. I would like to make the following observation. Your organization, together with your friends at Texas Central Rail have had months, if not years to prepare the flawed, inaccurate, and extremely one sided draft environmental impact study. Where as we, the little people who are directly effected by this unwanted, unrealistic and unwarranted scheme, have only a matter of days to digest the report, research it's findings and prepare our objections. We do not have the fat cheque books of Texas Central Rail or, at least in my case, the experience and knowledge to prepare objections in such a tight time frame. Further, when I handed in some written objections I asked if I could have a receipt for them in order to provide a chain of evidence and was told that this was not possible. I may be cynical, but I do wonder if the objections will be consigned to the waste bin, never to see the light of day. In closing, I ask that in all fairness an extension to the deadline of at least a further ninety days be made in order that we may submit considered and justifiable comments. If this is not forthcoming the only acceptable outcome will be the no build alternative.	Refer to ED-1, GN-1, PI-1, PI-3, PI-7 and VA-1.
Anonymous Anonymous	2/6/2018	Handwritten	We Do Not Want High-Speed Rail Project NO BILL	Comment noted.
Anonymous Anonymous	2/6/2018	Handwritten	I realize they want it so bad because its a dream of theirs... but at the end of the day when the smoke clears; what turmoil & destruction will lay in their wake?? Please wait for other alternatives to solve our mobility... Furthermore, focus on Urban centers to reto-fit development to build multi-modal transit in around cities...Mobilize our public transit create viable access centers that encourage redevelopment in blight areas...That's what we need first!! Once that is done the High Speed Rail will come as a Natural Fit. New Tactic for Projects: Try being Truthful in your intentions and you will mobilize the good in people; they're reasoning will be based on solid ground; lies are mobilizing stupidity, amongst the ignorant and hatred and malcontent amongst the group. Anonymous Anonymous	2/6/2018	Handwritten	COMMENT ISSUE A cursory review of the Draft EIS finds that it fails to address significant risks, both to public safety and the environment, that the operation of HSR's "electric" train will pose to the integrity of buried steel pipelines (many transporting hazardous liquids and gases) that it will encroach upon. COMMENT ISSUE BACKGROUND - FROM THE DRAFT EIS For some background information, the Draft EIS States: 1) 2) 3) 4) 5) 6) 7) "Current FRA regulations do not comprehensively address safety requirements for train operations above 150 mph, such as the Project's proposed operations." "All sources Of electricity produce both electric and magnetic fields. Electric fields result from the strength Of the electric charge, and magnetic fields are produced from the motion Of the charge. Together, the combination of electric and magnetic fields is referred to as ;electromagnetic fields" (EMFs)." "3.153, Regional and Local, EMF ordinances exist within Texas, including the City of Houston. The Cityof Houston Airport Land use Regulations, Article VI, Section 9-36014, prohibits the use or generation of EMI (electromagnetic interference) within either the airport land or the airport land use envelope that may adversely impact airport operations or safety." "3.15.4 Therefore, for the purposes of this analysis, the EMF Study Area is defined as 500 feet from the centerline of the HSR track. Beyond this distance, the EMF would be below background levels.- 03.15.4.2 A study Of high speed trains in 2013 found that EMI is present from electrical currents in the catenary, rails and the earth." "3.15.5.2.4 Induced Currents and Shock Hazards, The generation of EMF from the HSR system can result in induced currents in nearby metal structures. These currents can lead to shock hazards to humans and animals touched. These induced currents and shock hazards can be minimized by grounding all metallic structures. Therefore, all metal equipment surrounding the HSR system (i.e., metal fencing) would be grounded to minimize induces Currents and shock hazards and maintained to prevent corrosion." 03.15.6 Avoidance, Minimization and Mitigation EMF-CMNI: Fencing and Metal Grounding. As part of the general operation and maintenance of the HSR system, the external fencing and any other grounded metallic objects would be routinely inspected and replaced as necessary. This would avoid or minimize any corrosion. If, for example, the external metal fencing corrodes, it would no longer be effectively grounded and electric shock could become an issue of concern for people or animals." However, the review Of the Draft EIS did not find any discussions concerning possible damage caused to nearby buried metallic pipelines, resulting from induced voltages OR	Refer to EU-1, EU-2, SS-19 and TR-11.

Anonymous Anonymous	2/6/2018	Website	Stop the Japanese bullet train! Don't steal our land!	Comment noted.
Anonymous Anonymous	2/6/2018	Website	<p>The Bullet Train's real impact on farms and ranches</p> <p>The proposed route carves through family farms and ranches indiscriminately, responding to the needs of the Japanese engineers who have devised the route. A bullet train has a dire effect on the land, the surrounding areas and landowners way beyond the immediately affected rancher or farmer. We are talking about a major swath of land that will be cutoff permanently. It's not at all like the trains you know. The bullet train Will consist of two tracks, and a road alongside for access and maintenance. Set back from the train tracks will be high fences on each side of the track. For security reasons and to prevent livestock and animal accidents, the fences will either be eight feet tall with additional barbed Wire, or ten feet tall. There will also be no grade crossings Of the train tracks in order for the trains to reach high speed safely. Any crossings will have to be either tunneled under the tracks or bridged over the tracks. Therefore pastures on one side of the tracks will not be accessible from the other side of the track. Indeed there will be few opportunities to cross from one side of the tracks to the other. All will be on major roads to take advantage of the tunnel or bridge crossings. The inconvenience is almost impossible to imagine. And it will be permanent.</p> <p>Environmental Issues - Not Addressed</p> <p>The deep scar caused by the Bullet Train will divide the eastern side of this bullet train track from the western side. Livestock will not be able to move, except by road. Wildlife groups of deer, hogs, coyotes, and even raccoons will be permanently divided. There will be no migration for our wildlife and if you 100k into the future there will be isolation of habitats and a shrinking Of the gene pool. The barriers used by high speed rail are a much harsher challenge for our Texas wildlife than even the interstates. This effect is long term and real, but not addressed by any environmental reviews. The Japanese Bullet train sounds high tech, but iVs effect is very local for the people caught up between the fancy stations. perhaps the most important problem posed bythe high speed rail is the sound issue. If you live two miles from the east-west rail line that parallels Hwy 105 in Grimes County, you can hear every freight train that passes by. Those trains carry a maximum speed of about 45 miles per hour. When I was young, my grandparents had a house in Palmer Texas, in Ellis County, less than two blocks from the train tracks between Houston and Dallas. In those days, the trains would roll through town at about 55 miles per hour and everything in the house would shake because of the weight of the trains and the sound would stop conversations. The Japanese bullet train will operate at much higher speeds and when it screams by you its sound and vibrations will spread far beyond the neighboring farm or ranch. That environmental effect has not been addressed by the Japanese bullet train apologists because they won't have to live with it, like people in Grimes county and Ellis County and all the other affected parts of rural Texas.</p>	<p>Refer to ED-1, LU-11, NR-6 and TR-8.</p> <p>HSR trains are quieter than freight trains. The noise and vibration assessment was carried out in accordance with FRA guidance. The assessment methodology, criteria for impact, and locations of impacts are contained in Section 3.4.3, Noise and Vibration, Methodology, Section 3.4.2, Noise and Vibration, Regulatory Context and Section 3.4.5, Noise and Vibration, Environmental Consequences, respectively.</p>

Anonymous Anonymous	3/9/2018	Website	2015 AADT 28,380 2035 Estimated AADT 54,490 24 Hour Truck Percentage 32.4 Please see the link http://www.txdot.gov/apps/statewide_mapping/StatewidePlanningMap.html and highlight AADT and future traffic on the left hand side. Follow the data points along I-45 Using these figures of 54,490 of daily traffic and accounting for 32.4% of truck use and 35% of local traffic supported by TX Dot appendix, this leaves a total of 67.4% than would definitely not use the train. This figure leaves 32.6% that may travel this route to Houston and Dallas. This is estimated to be 17,763 cars per day.. 14% which is what they are using above of this figure puts the number at 2,486 vehicles a day removed. This greatly affects the emission and VMT estimation. We can also run the data with ridership as well to prove that their ridership numbers are absolutely unproven and flawed. Please let me know if you need to see the work regarding ridership as we have done a lot of work on this. We are working on a table now to show everything with citations.	Refer to AQ-2, AQ-6, GN-2 and NE-1.
Anonymous Anonymous	3/9/2018	Website	ES - Ellis, Navarro, Dallas, Limestone counties are in the migratory path for monarchs. Did they study effects on migration patterns and long-term effects on agribusiness, food chain, and food supply nationwide? We're applying with NRCS to be a sanctuary. Becky is filling out a Monarch sanctuary application currently. https://www.environment.fhwa.dot.gov/env_topics/ecosystems/pollinators.aspx	For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures . The Monarch Butterfly is currently "Under Review" for listing by FWS.
Anonymous Anonymous	3/9/2018	Website	1320/1500 ISL, does this count return trips in area? 1320 cars at station means 1320 or less cars leaving station from inbound pass or drop offs. Appendix E_Combined Tech Memos_Set 1 Of 2.Pdf Table E3.2-7	This does not include return trips. 1320 represents the low estimate for the number of ground transport vehicles that would arrive and depart the Dallas station per hour. These include vehicles like taxis, drop-offs, rental cars, etc. The 1500 number represents the low estimate for Houston stations.
Anonymous	1/29/2018	Letter	The purpose Of this letter is to request a ninety-day extension of the comment period for the pending Notice of Availability Dallas to Houston High Speed Rail draft EIS, Which was announced in the Federal Register on December 22,2017 at 82 FR 60723. This request to extend the comment period is made on behalf of Waller County and the Waller County Sub- Regional Planning Commission ("WCSRPC"), a sub-regional planning organization that is comprised of several governmental organizations, including Waller County, in addition to the cities of Hempstead, Pine Island, Prairie View, Waller, Katy, and two school districts -- Waller Independent School District and Hempstead School District. The Waller County Advocacy Group ("WCAG"), a local nonprofit organization, is also represented by a board member on the WCSRPC. Both WCSRPC and WCAG have been involved with Waller County in responding to this project since 2014. All of these entities together represent thousands of property owners, business owners, and several elected officials from the Waller County who share the belief that using eminent domain for a project that has questionable feasibility and presents a threat to taxpayers in the event that tax-subsidized loans are used to construct this project. I am making this request to allow adequate time for the public, including Waller County, WCSRPC, and WCAG, and Other local governments and Organizations, to properly review and provide useful and meaningful comments on the Federal Railroad Administration' s proposed Dallas to Houston High speed Rail draft EIS. the current Notice of Availability, which was on December 22, 2017, allows a minimal 60-day comment period, with a deadline of February 20, 2018. Meanwhile, the U.S. Army Corp of Engineers has published Public Notice. for two Wetland projects permit applications under Section 404 of the Clean Water Act for this same project, with	Refer to PI-3, PI-7 and PI-11.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			exactly the same truncated deadline for public comments of February 20, 2018. These simultaneous, short comment periods, which commenced during the holidays, allow insufficient time for meaningful public participation in the NEPA process. NEPA requires that an agency prepare an EIS for any "major Federal action significantly affecting the quality of the human environment" and "The EIS is a procedural obligation designed to assure that agencies give property consideration to the environmental consequences of their actions. The EIS also insures that the public is informed about the environmental impact of proposed agency actions." To accomplish this purpose, NEPA regulations require that the agency prepare and submit for public comment a draft EIS, and that the FRA take into account those public comments in preparing the final EIS. In addition to the inadequate time the FRA has allowed for public comment on the draft EIS, the process has been incredibly confusing and has changed so many times that full public participation has been nearly impossible. Notices that have been published by AECOM, the environmental contractor, listing locations, dates and times for the public hearings in each of the 10 impacted counties, have conflicted with changes to the venues for Madison and Grimes County as listed in the January issue of On Track, the Dallas to Houston HSR newsletter, and those changes have not been reflected on in the FRA's website as of January 19, 2018. In addition, several members of the public have reported to me that they received notice of delivery failure when they attempted to submit their comments via email to the address listed on the FRA's website for public comments, DallastoHoustonHSR@urs.com. These issues have arisen in addition to issues with the online form for submitting comments, which has also rejected comments. Many property owners own property in multiple impacted counties. The current public hearing schedule contains overlapping meetings for several counties and some will occur at the same time. This does not allow those landowners the opportunity to participate at the hearing for all of the counties that they own land in. Accordingly, on behalf of Waller County citizens, and particularly Waller County, WCSRPC and WCAG, we request a ninety-day extension of the Comment period to May 21, 2018 on this critically important EIS.	
Fawaz Anwar	2/27/2018	Website	I am writing to express my strong support for the Texas Bullet Train project and urge the Federal Railroad Administration to move forward with the timely review and approval of the project. It is a transformational transportation project that will connect the two economic hubs of Texas, Houston and North Texas, with one stop in the Brazos Valley, while respecting Texas lands and providing a safe, convenient and clean alternative to flying and driving. The recent release of the Draft Environmental Impact Statement (DEIS) confirms this conclusion with detailed data and projections. The Texas Bullet Train will utilize the world's safest mass transportation technology, the Shinkansen system, which has had zero crashes or fatalities in 53 years of operation. The project is expected to create more than 10,000 direct jobs per year during construction and more than 1,500 jobs permanently when operational -- at least 25% of them in rural counties along the route. It will be an economic driver for the state as well as all counties along the route. As an electric train, this system will also be the best environmental alternative as 4 of the counties served are already air quality non-attainment status. This innovative new industry reduces road congestion, improves local economies and creates new jobs for Texans. I welcome a faster, safer and cleaner transportation alternative to reduce congestion because it's good for Texas!	Comment noted.
Nabila Anwar	12/17/2017	Website	My name is Nabila Anwar and I am a resident of the City of Houston. I am strongly in favor and support of the proposed high speed rail from Houston to Dallas.	Comment noted.
Christie Anz	1/31/2018	Oral	I own 6.2 acres. I moved here from McLennan County to build my place by myself, as a single woman. It is 1400-foot from my back door to this train. Is it going to shake the pictures off my walls? Is it going to destroy my house, that me, as a Republican - voting, paying taxes ruin my house, and my place so somebody from Dallas can go to Houston when they can use 1-45 or Southwest. We don't live in Japan. This is Texas. Please, stop it. They can come take my dirt. Over my dead body.	Refer to BA-4, BA-12 and NV-5.
William Applegate	3/8/2018	Website	Sir/Ma'am, The High-Speed Rail Project (HSR) is not a need. It is a want. I am against this project for multiple reasons. First, the population of the proposed route does not support the cost and maintenance of the project. Texas Central estimates an annual ridership of 10 million. Well, the Amtrak route between New York City, Philadelphia, Baltimore, and Washington D.C. only see about five million riders annually. Much like many of the (HSR) projects around the world, it will eventually be subsidized by the government; whether that is federal, state, or both. Secondly, I am against any private company exercising eminent domain to seize lands necessary for the project. Again, the project is not a need; it is a novelty. While the government in the past has utilized eminent domain in the past for various projects for national security and infrastructure, the HSR does not meet that requirement because there is no need for it; particularly since it is destined for failure. Thirdly, I do not want to see Texan farmers' and family lands broken up, impacting their livelihoods. Again, this project, being a novelty, is not worth impacting 8,000 acres of land.	Refer to ED-1, GN-2, GN-4, LU-11 NE-1 and PN-3.
Srimanikandhan Appunni	1/26/2018	Website	I could live in Dallas and work in Houston. Lots of new jobs this train will bring for the people of Texas.	Comment noted.
Larissa Araiza	3/9/2018	Website	Would love the revenue and less gas emissions it would produce	Comment noted.

Rhonda Arcemont	2/20/2018	Website	This train will destroy the life and land of Texas and you will not have enough riders to pay for it so the tax payers will have to pay for it or have tracks in the middle of farms and ranch's just spitting there roteneing away after the lives of so many will be destroyed. Say no to the high speed train.	Refer to GN-2, GN-4 and NE-1.
Mark Archibald	1/29/2018	Oral	I have a question: Where is the stops so that someone that doesn't drive can get on this train in Navarro County so I can go see those places? I know you're not going to answer, but I want you to think about that. There is no proposed stop.	Refer to GN-6, GN-7, TR-3 and TR-4.
Mark Archibald	1/29/2018	Website	So my name is Mark Archibald, and I am speaking -- I don't know how I'm going to speak about this because I moved to Texas so I could be more independent and have some good weather so that my knees and my hips would feel better. And I want to see parts of Texas, like Houston and Dallas and all points in between. I have a question. Where is the stops so that someone that doesn't drive can get on this train in Navarro County so I can go see those places? I know you're not going to answer, but I want you to think about that. There is no proposed stop. So I guess I'm against this thing because it's a boondoggle. I grew up in Moline, Illinois, and there was people up there that says Amtrak, Amtrak will come in, we'll put a rail between Moline and Chicago, and people will come down from Chicago, Illinois and shop in Moline. Yeah. That doesn't happen. I don't know -- I know everybody doesn't like Chicago here, but the only good things that come out of Chicago is the Cubs. And let's see. I got a minute-24 left, and I don't really need it because I made up my mind. And I don't know if I just want to give my time up to somebody else, or sit here and say do you honestly think that people up here and in this room and at these meetings are that foolish to think that they're going to let you give up their land and their economy? Because Corsicana, we're trying to build a main street, we're trying to build a community, and you're going to run everything through it and then just say, We're going to take your tax dollars. I don't buy it. So I guess, 40 seconds, I yield the rest of my time.	Refer to GN-6, GN-7, TR-3 and TR-4.
Ward Arendt	3/9/2018	Website	Using their data, I used a wet bar napkin to calculate ridership etc. The project expects ridership within five years to exceed 5,000,000 per year and 10,000,000 within ten years. They are also planning on having rail cars with a capacity of 400 leaving every 30 minutes during peak travel times. That being said, and assuming that most travel would occur during the 240 business days a year: there would be 26 round trips per day, which is equivalent of an Airbus 380 leaving Dallas and Houston every 40 minutes. They would have demand pricing and assume that the business incentive would be the cost of operating a car between Houston and Dallas at \$0.55/mile for 240 miles or \$132 one way. Looking to the future with autonomous driving cars and much higher speed limits, the rail advantage using this model may diminish. They talk about the "Great Texas Families" that were investing in the project to make if a wholly private enterprise and cited Drayton McClain. McClain as you may recall was very successful in getting the City of Houston to pony-up monies to build "Enron Park" now MinuteMaid Park. It is unclear what their motives are in acquiring some public backstop in case the project goes south.	Refer to GN-2, GN-4 and SC-3.
Arlington Black Chamber of Commerce	2/21/2018	Website	Will the Minority Business Community ever receive an invitation to participate in this project whatsoever?	Refer to PI-1.
Jody Armstrong	1/29/2018	Website	My life and my kid's quality of life will drastically increase once Dallas/Houston High-Speed Railway is completed and commuter prices are CHEAP!!! (\$30 or less unrestricted roundtrip) Connect HSR with TRE allowing travel by train from downtown Fort Worth to Houston and back with only one transfer each way.	Comment noted.
Romeo Arrieta	1/29/2018	Website	As a Dallas resident, I support the Texas Central Plan to bring High speed rail to North Texas. I ask that the Federal Railroad Administration I've at a deliberate speed to allow this project to be constructed and operated.	Comment noted.
Kathy Arterburn	2/6/2018	Website	So what is the big deal about connecting dallas and houston??? And for \$15 billion!!! What a stupid and unnecessary project. All I see is someone commits murder in houston then 90 minutes later they are in dallas. This gives thugs and thieves more places to target. I would never ride the ridiculous rail car. And safety....and not being able to share the rail line. Who will conduct security? Going to hire new train police?? Why dont you put \$15 billion into safety of our ALREADY CONSTRUCTED HIGHWAYS??? PUT BORDERS UP KEEPING WILDLIFE AWAY FROM DANGEROUS DRIVERS ON OUR ROADS. AT LEAST DO SOMETHING THAT A DESERVED AUDIENCE COULD BENEFIT...NOT JUST FOR PEOPLE WITH NO WAY TO ESCAPE HOUSTON.	Refer to PN-3, SS-1, SS-6, SS-7 and SS-8.
Sandra Ashbrook	1/29/2018	Oral	My name is Sandra Ashbrook and I live about one mile south of the Dallas County border right on the north section of Ellis County and I just want to tell everybody that since I have become a property owner in Ellis County, I think that is the most wonderful thing that anybody can ever have to have their own land and now the land is gonna be impacted by a railroad. A 200 mile an hour train coming through our properties, through your neighbor's properties, and through your you know, who knows whose properties it's going through. It's gonna -- and they said that it's not gonna affect taxpayers 'cause it's all gonna be funded by private owners. Yeah, a private company from Japan. Now do you want your land and your property to be invested by foreign countries? The technology in Japan is over 57 years old, so there is so much better technology out there and why shouldn't Texans provide that technology. Why are we asking a company from Japan to come in here and put it. This company is not owned by Texas, it's not owned by Texans. We want someone -- we want if Texas is gonna have a railroad project like this then we want somebody we want Texas to profit from it, not a bunch of foreign investors. We also need to know that our	Refer to GN-4, NE-1, PN-3, SC-19, SC-22, SS-18, SS-26, TC-2 and VA-3.

			taxpayers will end up on this project because this is a money grab and a land grab and what they're gonna do is they're gonna come in here they're gonna start this project and they won't be able to finish it. It has gone from 4 billion to 8 billion to 12 billion and now we're up to \$18 billion and that is a drop in the bucket. It's just like the toll road around Austin, it was supposed to be funded by a private company, and guess what, they went bankrupt and now the taxpayers are holding that bill. They haven't been able to figure out what they're gonna do about it, and that's exactly what's gonna happen here. There is no way there's enough money to fund this project. I don't think that the technology is too old, but it's from another country and Texans are not gonna profit from this project. Another problem is that the taxpayers and the local communities are gonna have to build new fire departments, new water departments, new first responder departments because they're gonna have to get people within, like, two minutes or three minutes to emergencies and with that train going through all of the roads.	
linda Ashley	3/9/2018	Website	I will not be directly affected by this, but I have a lot of friends who will. I strongly object to this project, mostly because of the cost of it, and it is going to cause a lot of people to lost their property, and their way of living. It will be a sad day if it is the cause of what it will do to the people living in the middle of all this. Thank you for letting me voice my opinion.	Refer to ED-2, LU-11, NE-9, SC-22 and TR-8.
Huseyin Atay	2/7/2018	Website	Our family need hi speed rail road Houston to Dallas	Comment noted.
Douglas Athas	1/29/2018	Oral	I'm Mayor Douglas Athas of the City of Garland. I just want to say first off I'm not running for anything. The reason I'm here is because our city passed a resolution couple of years ago in support of the high-speed rail, I didn't want to report on that. I want people to understand that through our city through connections with DART we'll have access to this rail, we'll have access to Texas stadium, we'll have access to Houston. We have almost 500 manufacturers in the city and we're looking to get a more reliable transportation system to Houston. But I also want the put on my regional hat, I serve on the Regional Transportation Council, which is a part of our Texas NPO and vice chair of the Dallas Regional Building Council. It takes 90 minutes for us to drive across the metroplex. If you're on my side of the metroplex and you're trying to get to the other side of Fort Worth. In that same amount of time we could also be in Houston. We do feel like this will provide a very strong economic development. I really feel like if Amazon does choose North Texas, does choose Dallas as their destination, a large part of that decision may be based on the fact that we'll have high-speed rail. They'll get Houston, Texas A&M all for the same amount of time it takes them to drive across the metroplex. So we can link this up, but I think it's most important to understand this Dallas to Houston growth By 2040 the population of those two metro area will equal the current population of Texas. For people driving between Houston and Dallas, or vice versa, it's gonna be a nightmare and I can tell you, quite frankly, getting money right now for transportation projects is not easy. The mega projects it's not easy, so you're not gonna be able to spend so being able to connect up the two it's not gonna take more planes, 'cause basically right now there's just not that much room. Southwest isn't even interested in these routes anymore now that they can fly to Washington, D.C. or someplace and bring more money. So I really do feel like this is very important. It's gonna also benefit air quality, a lot of the cars and things that are on 45 are not moving as fast for the air quality for air movement. It would also be a major impact for air quality in North Texas. So thank you very much, I do appreciate this chance to speak today. It's gonna also benefit air quality, a lot of the cars and things that are on 45 are not moving as fast for the air quality for air movement. It would also be a major impact for air quality in North Texas.	Comment noted.
Sharon Atwood	3/5/2018	Website	I do not feel we need a high speed train between Houston and Dallas. The impact on surrounding neighborhoods and residents would be negative. Noise pollution, added traffic, and a private company having public domain to acquire private land does not sound like the right thing to do. I understand it will impact property values in a negative way. I know people who live close to the proposed route and they are very upset. I do not feel the benefits outweigh the detrimental effects this train would have.	Refer to ED-1, NV-1, PN-3, TR-8 and VA-1.
Mary Jo Autery	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual diruption and a high consumption of electricity. Kyle Baier	12/16/2017	Website	As a Texan, I think this project is great and should be given full clearance to start moving dirt. The faster the better!	Comment noted.
Brock Bailey	2/24/2018	Website	I am concerned about the high speed rail project's proposed location in Navarro County near the intersection of 709 and 3194 - splitting the Morgan Legacy Farm. I believe the proposed location will cause significant damage to the environment, wildlife and the water shed of the Morgan Legacy Farm. I understand that the proposed route will separate the farm's lodge from its rodeo arena, stables and guest houses and I believe that the damage the proposed route will cause to the farm's charitable mission to host and entertain groups like the Salesmanship Club, the staff of Children's Hospital, the Boy Scouts of America and others would be irreparable. I would ask that the 5-7 mile portion of the proposed route scheduled to parallel 3194 be moved north of the existing power lines to lessen the harmful environmental, economic, charitable and historic impact the proposed route will have on the Morgan Legacy Farm.	Refer to LU-5.
Cody Bailey	2/5/2018	Website	I would like to start off by saying I am against this project. This project does not effect me personally other than the potential financial impact of paying the bill, but that does not keep me from defending my friends and family who will lose property that's been in their families for over 4 generations. This potential land grab that does nothing but line the pockets of a few individuals is too far of reach for not enough reward. Before we decide to stretch a train across the open prairies of Texas, let's push for mass transportation in the inner metropolises that are in desperate need of traffic relief. This will ruin the lives of thousands of individuals that will be shadowed in the name of "progress". This is not progress. This as marketing ploy a private company has used to sway the government to use its imminent domain power for its benefit.	Refer to ED-1, ED-2 and GN-4.
James Baird	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. Barbara Baker	2/20/2018	Website	We as citizens don't need/want this monstrosity in our community something we will need to subsidize with our tax money no one is going to pay \$400 for a one way ticket to Dallas to ride a train an then the citizens of these small communities will be asked to give up our tax dollars to go to Japan let's use our tax dollars to make our communities better locally it's time politicians start listening to us an not their wallets WE THE PEOPLE PROTEST THE BULLET TRAIN	Refer to GN-4, NE-1 and SC-3.
Micah Baker	2/23/2018	Website	I am very in favor of the High Speed Rail project! As a resident of the Dallas area, I frequently travel down I- 45 to both the College Station and Houston areas. This project will provide such an enhancement to the public transportation systems in Texas. Currently, the options are very limited for this length of a trip outside of using your own personal vehicle. You can either take an airplane (which takes hours to board and is expensive) or something like greyhound which is not always a good experience. I hope that there will be lots of consideration into how this project can be incorporated into the existing transit/public transportation networks of these major cities. Especially in the Dallas area since there is already an expansive transit system operating there.	Comment noted.

Pam Baley	3/5/2018	Oral	<p>Hi. My name is Pam Baley. I am a UN delegate and I was called here on behalf of some landowners, as well as some material interested parties who cannot be here because they were not notified properly per some of the UN resolutions on duty to consult. So, therefore, they are not present. And that includes a significant number of indigenous populations, Alabama-Coushatta, native American, a lot of reservations and a lot of landowners that simply cannot be here. I live in Houston and I had a really hard time getting here. And I think it's -- it's very exciting that we're having this today, but I think sometimes these sort of meetings are strategically held in a manner just to check the box to make it look like you had the meeting and people are here giving their input and it looks great that you did it, but it's really not held in a manner that's conducive for anybody to really express anything. And who is here to listen anymore? It's getting late, we're all getting tired. I've got four kids at home. I mean, come on. So when you think about it, it really doesn't make a lot of sense and what I want to point out is, this system here is fundamentally flawed. And what I'm basing this on is how the UN deals and how I deal on a global basis on these kind of infrastructure. You know, we have to consult with indigenous groups and we have to consult with people and corporations and I have to try to figure out how to, you know, talk to people in New Zealand and people that don't speak English and we don't speak French and, you know, I speak French, I speak German, I speak Czech, I speak all these other languages, but I don't speak the indigenous mother tongue of Peru, you know, or the first Indian people or -- you know; so there's a lot of miscommunication. And what I want to point out is, there is a lack of information to the -- all of the affected groups. And what needs to be happening and there is a matrix and everybody should be able to go online and find it. Just look up Consultation Agreement and the matrix for that that's on providing notice to all affected groups and interested groups, so not just the landowners but anyone who might be affected by that, disclosing all relevant information and studies. So we talk about this EIS, right? Well, I'm going to tell you something. There is a lot more information out there. So to base an opinion on just this 6000-page document, there are about maybe 60 more 60,000-page documents all put together. So you put that together and this makes no sense. And what I want to point out is, Executive Order 12898 under NEPA, avoid disproportionate and adverse environmental impacts on low-income, minority populations, culturally important, religious, subsistence and social practices. So who does that impact? Not just the farmers, not just the ranchers, not just the younger -- like, Ms. White's side, who was talking about, you know, raising her goats. That's talking about a lot of people. And I think that before anyone can make a decision, I think you need to get all of the information and that's what I need to tell you. Get all the information. Don't say "Yes" or "No." Get the information.</p>	Refer to EJ-1, NE-1, PI-1, PI-6, and PI-8.
Michael Ball	1/29/2018	Oral	<p>My name is Michael Ball. I signed up to speak but it's running too long. Okay, I agree with all the comments that's been made so far; however, as a former Volunteer Fire Chief, I want to stress the impact on the emergency response by fire, police, ambulance, all of that. This is an environmental impact. What happens when this goes belly up because of lack of funding/ Who's going to maintain all of the property? You know because it's going to close a lot of roads. Who's going to maintain it? It certainly ain't going to be the government. We're being saddled with a lot of debt by a company that's private. We're not going to see any kind of benefit of these costs. Ridership, Amtrack used to come through here from Houston to Dallas, used to have a stop here. I don't even think Amtrack comes anywhere close to here because lack of ridership. If they couldn't get riders to ride Amtrack as cheap as it was, what makes you think it's going to ride for that? It's just a bad deal all the way around. I live approximately half a mile from where this is going to be. I don't own much property but I do have cattle. I raise my own garden. I hunt on my property, something I won't be allowed to do because I use firearm and you can't shoot a firearm. So it's going to impact me. They could even come there and dig dirt off my place. It's going to impact me. I'm just totally against it. And I thank you for your time and your patience. And I understand that's you're not responsible for all of this, but it does impact everything. And if you will, please let them know that I've already left my comments. Thank you, Ma'am.</p>	Refer to GN-2, GN-4, GN-5, GN-8, NE-1, PN-3, SC-3, SC-19, SC-22, TR-7 and TR-8.

Michael Ball	1/29/2018	Oral	I've already made my comments online. I yield to the next person.	Comment noted.
Wyona Ballard	3/9/2018	Website	My property has been in my family since 1864. It holds a private family cemetery which is unknown to TCR. Texas does not need a high speed rail that will bailed out on the back of taxpayers! We do not need roads closed and or rerouted as it will risk lives and property when emergency services takes longer to arrive. Our rural communities are not prepared for a high speed train derailment or incident. Our community counts on 9 Volunteer Fireman, who are not always available and certainly do not have training and equipment to come to the aid of a major catastrophe! Eminent domain should never be considered for a private venture. We do not want to destroy our peace, tranquility and wildlife! No train !	Refer to CR-6, ED-1, GN-4, NR-5, SS-12, SS-18 and SS-23. The intent of the methodology is to avoid impacting cemeteries and burials to the greatest extent possible. The PA addresses unanticipated effects to burials should they be encountered.
W.L. Bane	2/5/2018	Oral	My name is W.L. Bane. I live at [...]. I'm a neighbor of Calvin. Calvin's been up there for years. I don't know why they sued him and didn't sue me. Maybe they like the way I sounded when I talked to them. They've tried to come on my property and I told them I wouldn't allow it. We've been involved in the last probably 24 months with this great organization called Texans Against High-speed Rail. Every one of you-all in here -- I own land in Houston. I own rental properties. I moved -- I sold my company last year. I moved up at the farm in 2012. My dad bought the property 80 years ago. It's still farmed. We still have a farmer out of Hockley that farms it. So I planned to get up there and live the rest of my life on that wonderful property. Now, where they're coming through Calvin's and coming right across me, values -- everyone of you-all in here, if you own rent property or you own your own house, I don't care if it's a 100 by 50 lot or it's 200 acres, it's your property. And the values are going to just shoot down. You know, look at your houses. The thing I hate, everybody in Harris County, from our city to our county government, they're for this thing. Everybody in Dallas. And we elect these people. They don't they're going to make a lot of money off of it. We're not. We're going to be the losers. So I am highly against this thing. It's caused a lot of anguish. But I'll say this: That when Patrick spoke a while ago, you need to get on board with Texans High-Speed against high-speed. Not with them. Against high-speed rail. Spend what you can. Give what you can. We're fighting a \$60 million budget from the Japanese and we're doing it with our money. But they're great attorneys, they've done a lot of pro bono in this, but it costs a lot of money to get engineering experts and such. So I would ask everybody in here, tell everyone you know there's an old adage, Well, not in my backyard. Well, it's going to be taxes for the rest of our lives, for your children and grandchildren. So I would ask you-all to all get involved, and let's let these county people in Harris County know we're not for it. Thank you.	Refer to GN-4 and VA-1.
W. L. Bane, Jr.	2/5/2018	Website	The DEIS omitted quantifying the use of water for construction. There is no mention if TCR will be allowed to drill water wells for construction use or if they will be required to use surface water. If so, the sources of that water need to be identified. It is anticipates an enormous amount of water will be needed for concrete batch plants, construction sites, mitigating dust levels, watering erosional control plantings. The amount of water needs to be quantified.	Refer to HZ-5, WW-1 and WW-6.
W. L. Bane, Jr.	2/5/2018	Website	The DEIS does not address the environmental impact when fill material is removed from private property for the use of construction by TCR. It does not state in what environmentally sound condition TCR is required to leave the site.	Refer to LU-10 and LU-14.
W.L. Bane, Jr.	2/6/2018	Handwritten	The expectation of damage needs to be addressed based on increased traffic flow and transport weights versus normal traffic. It also needs to be addressed who will pay for the damage and what would be the wait period for repairs. If construction access requires the building of new roads, it needs to be clarified who will own those roads and be responsible for future maintenance.	Refer to TR-6 and TR-7.
Ashly Bankhead	1/25/2018	Website	I think it would be a good idea to have the bullet train	Comment noted.
Dana Murdock Banksb	2/16/2018	Website	Let's show America how to build a profitable world class Bullet Train System.	Comment noted.
Jeannan Barber	2/14/2018	Website	Native Houstonion, we need public transportation in texas, not more lanes on interstates. I35 I use is abominable and so unsafe. Children live in N Houston. Would like to visit more often safely. Getting older people on road is worst option for all.	Comment noted.
Jeannan Barber	2/27/2018	Website	Lived in houston 60 years, tired of car & car pollution and we want, need better way to travel to kids, as will not be able to drive much longer or safely driving my own car, along with all the elderly on road.	Comment noted.
Suzanne Bardwell	1/29/2018	Oral	Thank you very much for this opportunity. My name is Suzanne Bardwell, Suzanne. Brown-Bardwell, and my family's fifth generation ranch is in the path of the bullet train on two of the three proposed routes. You talk about historical preservation We've owned this land for well over a hundred years. To us that's historical preservation. Presently the 240-mile line is basically lining the pockets of land speculators and Japanese rail corporations at the expense of Texas landowners and agriculture. The Navarro County leg runs through a rich wildlife habitat that includes bald eagles. In fact, one of them flew over me when I was leaving the ranch to come here today. It also includes a dense population of wild hogs which will be a serious safety hazard, especially at 200 miles per hour. And if you think they can't tear up concrete, I've got proof to show you that they can. And we've had rail people tell us they don't get as big as we say. I've got a picture on my phone of a 417-pound one right now to show you. So don't doubt that we don't grow things big in Texas, because we do even when we don't want to. The proposed routes go straight through a flood plane that floods heavily and regularly. Don't listen to the statistics they're using about the	Refer to ED-2, FP-1, GN-4, LU-2, LU-11, NR-3, PN-3, SS-2, SS-12, SS-23, WW-1, WW-2 and WW-9. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species,

			100-year flood. We can live on that land, and it floods every time we get more than four inches of rain. Of course there are concerns about what this will do to our watersheds and how it will impact agriculture. With that said, the rail lines are going to split access to ground water by livestock and pastures for crops and grazing. One of my greatest fears, though, is the limitation of crossings and lack of speedy access to fire and ambulance service for rural citizens, especially those who are elderly, and we have many elderly rural citizens. Brown-outs? They're coming. Just that's it. They're already happening in some places in Texas. Let's put in high speed rail and add to it. This boondoggle is estimated to eventually cost us taxpayers \$21.5 billion. And I want to tell you, of all the rail lines in the world, only two are successful--Osaka to Tokyo and Paris to Lyon, and that's because of the population density and lack of cars. Guess what we got in Texas. Lots of cars, wide-open spaces, horses, and guns. Watershed estimates are grossly overestimated. One thing, though, I want to say real quickly, forgive me, is that some -- this is my personal Environmental Impact Statement that some foreign majority-owned company can take away Texans' homes and ranch land for the wealthy to sip cocktails at 200 miles per hour while our former land flashes by is a crying sin and, frankly, there is no fair market price for something that's not for sale.	Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.
Suzanne Bardwell	1/29/2018	Oral	Thank you very much for this opportunity. My name is Suzanne Bardwell, Suzanne Brown-Bardwell, and my family's fifth generation ranch is in the path of the bullet train on two of the three proposed routes. You talk about historical preservation? We've owned this land for well over a hundred years. To us that's historical preservation. Presently the 240-mile line is basically lining the pockets of land speculators and Japanese rail corporations at the expense of Texas landowners and agriculture. The Navarro County leg runs through a rich wildlife habitat that includes bald eagles. In fact, one of them flew over me when I was leaving the ranch to come here today. It also includes a dense population of wild hogs which will be a serious safety hazard, especially at 200 miles per hour. And if you think they can't tear up concrete, I've got proof to show you that they can. And we've had rail people tell us they don't get as big as we say. I've got a picture on my phone of a 417-pound one right now to show you. So don't doubt that we don't grow things big in Texas, because we do even when we don't want to. The proposed routes go straight through a flood plane that floods heavily and regularly. Don't listen to the statistics they're using about the 100-year flood. We can live on that land, and it floods every time we get more than four inches of rain. Of course there are concerns about what this will do to our watersheds and how it will impact agriculture. With that said, the rail lines are going to split access to ground water by livestock and pastures for crops and grazing. One of my greatest fears, though, is the limitation of crossings and lack of speedy access to fire and ambulance service for rural citizens, especially those who are elderly, and we have many elderly rural citizens. Brown-outs? They're coming. Just that's it. They're already happening in some places in Texas. Let's put in high speed rail and add to it. This boondoggle is estimated to eventually cost us taxpayers \$21.5 billion. And I want to tell you, of all the rail lines in the world, only two are successful--Osaka to Tokyo and Paris to Lyon, and that's because of the population density and lack of cars. Guess what we got in Texas. Lots of cars, wide-open spaces, horses, and guns. Watershed estimates are grossly overestimated. One thing, though, I want to say real quickly, forgive me, is that some -- this is my personal Environmental Impact Statement that some foreign majority-owned company can take away Texans' homes and ranch land for the wealthy to sip cocktails at 200 miles per hour while our former land flashes by is a crying sin and, frankly, there is no fair market price for something that's not for sale.	Refer to FP-1, GN-4, NR-3, NR-6, WW-1, WW-2 and WW-9. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures . Section 106 of the National Historic Preservation Act (NHPA) requires federal agencies to consider the effects of their actions on historic properties. One component of FRA's overall environmental analysis is dedicated to understanding how cultural resources may be affected. In accordance with Section 106 and pursuant to 36 C.F.R. Part 800.4(b)(2) and 5(a)(3), FRA, TCRR, Texas Historical Commission and other Signatories are developing and will execute a Programmatic Agreement (PA) that allows for the phased identification, evaluation and assessment of effects to historic and archeological resources as access to private land holdings becomes available and after publication of the Final EIS. Historic and archaeological resources can include structures, buildings, sites, districts, and objects such as farmsteads and ranches. The PA outlines a comprehensive methodology to identify historic properties eligible for or listed in the National Register of Historic Places, and to consider avoidance and minimization measures to, as well as ways to resolve adverse effects for, those properties that may be affected. This process is discussed in Section 3.19.6.2, Cultural Resources, Programmatic Agreement in the Final EIS.
Paul Barker	2/27/2018	Website	This project gives me great concern for the area impacted. I am a part time rancher and work in the energy industry. As a rancher I think my concerns are obvious. As large tracts that have historical and family value associated with them are cut into pieces by a rail project the land owners are the obvious loser. This project provides absolutely no benefit to the owners, operators and the people involved in agribusiness that will be left with smaller herds, infrastructure cost and increased operating expenses for the life of their assets. All that said I haven't even touched on the fact that this rail project will devalue land across the entire route. Now we are getting into the net worth of Texas families for years to come. Now I change hats. I have been employed by the energy for all of my adult life. Most of my career I have been responsible for maintaining the mechanical integrity of pipeline systems. I have reviewed the environmental impact statement and have seen language directed at lost energy production from the THOUSANDS of well bores that lay along the route but have yet to see anything addressing the threat to pipeline integrity. Electric railways have historically presented a huge threat to pipelines as the amount of electrical current required to move a	Refer to EU-1, EU-2, LU-5 and VA-1.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			locomotive generates an electrical current in the ground surrounding the rail corridor. This electrical current flow not only causes pipeline failures but actually interferes with systems put in place to prevent pipeline corrosion. Either of the scenarios I've described can easily cause massive pipeline failures. These failures will be self induced environmental issues CAUSED by the rail project!!! Again I've seen nothing in the study that addresses this issue not do I believe any pipeline operators have been made aware of the potential impact to the multi-billion dollar pipeline infrastructure that will be hugely affected. The remediation steps required by the pipeline industry will easily tally several tens of millions of dollars. I am stepping out of my area here but.... The potential damage I just described to pipelines can easily extend to ANY adjacent underground metallic structure including but not limited to home plumbing, civil infrastructure or even steel reinforcement within a concrete slab. I thank you for taking the time to review my comments and not so obvious concerns. I will make myself available via email for any follow up questions related to my concerns.	
Lindle B Barkley	2/6/2018	Handwritten	With Brady (210 863 3204) He said the train would be built on a viaduct through our land. I asked if that could be put in writing and he said no. Now I find out that through our land the train track will be built on a beam. That will divide our land with no access to the East side of our farm. You did mention we will have access for wildlife and livestock. There is no mention about trucks or tractors. There are no roads to access that portion of the farm, making it useless land. How will we be taxed on land we cannot use for agriculture purpose? We cannot use the land if we cannot access it, using trucks or tractors. This will also impact the amount of land we can lease for cattle. (continued)	Refer to LU-11.
Lindle B Barkley	2/6/2018	Handwritten	My Property is FRA Station Number WT 70 00 First let me say I am against this train being built anywhere in Texas. I do not believe this train will be of benefit to Texas or Grimes county. I believe it will eventually be a tax burden on the citizens of Texas for the benefit of a very small minority of people. My personal concerns on my family land are as follows: 1. This land has been in our family for about 100 years. The sentimental value of this land far exceeds any monetary value you place on any part of it. 2. This train will divide our family farm there will be a portion on the east side, that we will have no access to. When I was Dealing (continued)	Refer to GN-4, LU-11, SC-19 and TR-10.
Lindle B Barkley	2/6/2018	Handwritten	3) There is a pond on this piece of property you wish to acquire. It was placed where it is at the direction of the State of Texas, to stop soil erosion. Before we had a Ravine starting on the west side of the highline going east. Prior to the highline we had no problem, this was all woods. This ravine continued to grow and eventually became about 6 feet deep. Since the pond was dug, we have had no more problems. Removal of the pond will again start our erosion problems. 4) We do not wish to give up any mineral rights 5) If you do take our land, I want a guarantee in writing stating that Eminent Domain will not be used on any other part of our land for any purpose, to include extraltion of soil. (continued)	Refer to ED-4.
Lindle B Barkley	2/6/2018	Handwritten	6) You said in your letter, the project is not expelcted to change any hunting regulations, will the project have an affect on firearm use anywhere near the train. If so, what distance from the train?	Refer to RF-2.
Jay Barksdale	2/19/2018	Website	I support the high speed rail Dallas to Houston EIS. This project will transform Texas and make us more competitive in the decades to come. The impact to adjacent property owners is often overstated and the benefits of High Speed Rail service between these dynamic cities will far outweigh any negative impact.	Comment noted.
Connie D Barlow	2/16/2018	Website	I love this Train. I asumme all of Texas will be paying for this. Me & my friends want this Train to extend to the Valley. Ex: Houston->45->Galveston->Corpus Christi->McAllen->281->SanAntonio-> Austin->Waco->Dallas->45->Houston WOW We Love this..We will help this to be paid for. WE WANT THIS !!!	Comment noted.
Barbara Barnes	2/11/2018	Website	I am looking forward to the completion of the high speed rail between Houston and Dallas. I would rather travel by train than on I-45 which has become more and more crowded or by plane, since I don't really like to fly. I have been on a fast train in Europe and found it to be a great way to travel. This is a good project to show that fast trains will be good for Texas and America. We are behind in implementing innovative travel options.	Comment noted.
Bill Barnes	1/29/2018	Oral	An example -- just as an example of the contradictions, according to the executive summary under water quality, it says, "Operation of the (cough) alternative would have permanent impacts on surface water quality, including impaired stream segments.· Impacted water quality would be minimized through the use of soil erosion, preventative measures such as retention basins, measures to prevent selected settlements and contamination from entering the water and all watersheds." My question is, why should citizens along the route of the TCRR accept permanent impacts of surface water quality when, as demonstrated during this public comment, they will derive no benefit from this project? What provisions are being made by the TRCC to assume financial costs of the construction and maintenance of these prevention measures, retention basins, and so forth? What remedies are available to areas if these measures prove inadequate or inefficient? Thank you.	Refer to NE-1, PI-7, SC-19, WW-1 and WW-6.
Bill Barnes	1/29/2018	Oral	I'm Bill Barnes, and I live in Frost, Texas, which is miles away from the proposed rail, and I oppose it entirely. I'd like to say -- I had my notes all made here, but I'd like to say to you that I was told that this meeting was to comment on the Environmental Impact Statement. And the Texas railroad -- the Texas Central Railroad is a large corporation. They're interested in one thing; that's profit. The FRA is a government agency and it's a bureaucracy. And while I sympathize with all the people here that have lived here for years and years and have land, generation upon	Refer to NE-1, PI-7, SC-19, WW-1 and WW-6.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			generation, let me just say that the TCR and the FRA do not care. You need to get this in your head and take action. The best way to take action -- this was designed to be a comment on the draft environmental statement. One of the things that you can do is to get this handout, go to the website to make comments on it. The draft environmental statement is filled with contradictions and double-talk. Make comments. They'll have to comment on everything that you ask about. Make your comments how, when, and where; no yes or no questions. Make them comment, take the bureaucracy, and make them -- just overwhelm them with bureaucracy. Then contact your representatives, Governor Abbott, the lieutenant governor. All these people are opposed to this system. Hold their feet to the fire. Let them know that if this goes through that you'll elect someone who can get it opposed to. An example -- just as an example of the contradictions, according to the executive summary under water quality, it says, "Operation of the alternative would have permanent impacts on surface water quality, including impaired stream segments. Impacted water quality would be minimized through the use of soil erosion, preventative measures such as retention basins, measures to prevent selected settlements and contamination from entering the water and all watersheds." My question is, why should citizens along the route of the TCRR accept permanent impacts of surface water quality when, as demonstrated during this public comment, they will derive no benefit from this project? What provisions are being made by the TRCC to assume financial costs of the construction and maintenance of these prevention measures, retention basins, and so forth? What remedies are available to areas if these measures prove inadequate or inefficient? Thank you.	
DJ Barnes	3/9/2018	Website	What is your plan to fix the roads damaged during Construction? Are you posting bonds to restore the roads, in each county, damaged during construction?	Refer to TR-7.
DJ Barnes	3/9/2018	Website	I am concerned about a lake near your proposed track. How are you planning to prevent construction debris from entering the Birdwell lake in Ellis county? This lake is drinking water for Dallas and surrounding areas. This question should also address all waterways that are close to your track. in an environmental study the water MUST be protected for all Texans	Refer to WW-1 and WW-2. The route at Lake Bardwell would be constructed on viaduct (bridge type structure). Waters of the U.S. including wetlands would be avoided to the maximum extent practicable. Approximately 55 percent of the Build Alternatives would be constructed on viaduct (bridge type structure) as stated in the Section 2.2.1, Alternatives Considered, Technology which allows for free movement of water in those areas and would avoid and/or minimize impacts to all waters (streams, ponds, and special aquatic sites such as wetlands and springs) crossed by the route. In the areas along the route that will be on embankment, culverts will be constructed to allow for movement of water.
DJ Barnes	3/9/2018	Website	I SAW THE PICTURE OF YOUR PROPOSED TRACK, IT IS VERY CURVY. HOW ARE YOU GOING TO KEEP A TRAIN GOING 200 MILES AN HOUR ON THE TRACK? ESPECIALLY CLOSE TO THE HOUSTON STOP IS A BIG BEND. AS A SMART PERSON, I CAN'T IMAGINE A TRAIN STAYING ON THE TRACK IN AT LEAST EIGHT PLACES ON YOUR MAP.	Refer to TC-3.
DJ Barnes	3/9/2018	Website	IN TEXAS AND THRU AN AREA OF NAVARRO COUNTY THERE ARE FERAL HOGS THAT GROW TO 400-500 POUNDS. THEY CLIMB FENCES. THAT SHORT CHAINLINK FENCE I SAW IN YOUR PICTURES ARE NOTHING TO THEM. (EVEN CHILDREN WILL CLIMB THAT WITH NO TROUBLE) WHAT MEDICAL PLAN DO YOU HAVE WHEN THE TRAIN HITS A 500 POUND HOG ON THE TRACK? HOW WILL MEDICAL SERVICES GET TO THE TRAIN? WILL YOU BE BUILDING SMALL HOSPITALS ALONG THE ROUTE TO SERVICE THE DERAILMENTS?	Refer to SS-2, SS-3, SS-12 and SS-18. TCRR does not intend to build additional hospitals along the proposed route.
DJ Barnes	3/9/2018	Website	THE TEXAS ELECTRICAL GRID DOES NOT HAVE THE CAPACITY TO SUPPORT THE ADDED DEMAND OF YOUR TRAIN. WHAT IS YOUR COMPANY DOING TO INCREASE OR PRODUCE THE ELECTRICITY FOR YOUR PROJECT. HAVE YOU POSTED BONDS TO PAY THE TEXAS PEOPLE BACK FOR BROWNOUTS CAUSED BY YOUR TRAIN?	Refer to EU-3 and EU-4.
DJ Barnes	3/9/2018	Website	WHAT LAW IN THE TEXAS/US CONSTITUTION GIVES YOU THE RIGHT TO COME FROM ANOTHER COUNTY AND DESTROY OUR LAND, OUR LIVELY HOOD, OUR FOOD SUPPLY, OUR WAY OF LIFE WITH A TECHNOLOGY THAT IS OVER 50 YEARS OLD?	Refer to ED-1
Dorothea Barnes	1/29/2018	Oral	I'm Dottie Barnes, and I have here lists of endangered species from Navarro County, which there are 24; Ellis County has 25; and Freestone has 36. I know that the Japanese do not care about all you people and your sad stories, and I do, but maybe they will be forced, forced to care about -- because EPA comes down on us if we have little snail garter or chickadee, and so they are going to have to do studies on all these endangered species. My question is, first of all, one of them is bats, and I'm the bat lady, so there's a long-nosed myotis bat that --bats are a Texas mammal. Are your plans going to make these overpass bridges bat friendly, like all of our new Texas bridges are bat friendly? And what plans do you have for each one of these endangered species if they are put on the federal endangered species list before you start construction? And then I tried to make a line on a Navarro, Texas map using your books. And I went to the library and your supposed maps. The numbers on your maps for county roads do not match county roads. We have county roads that are 2,000, 1,000. You have county roads that are 5,000 and 4,000. And so then you take property tracts and you assign, I don't know, your mystical number to them so that we can't	Refer to GN-1 and SG-2. Mapbooks included an inset map to aide in locating general areas along the route, with road numbers, but will not include property addresses.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			figure out where our property is on your maps and draw a straight line. You are lying to us. Not you personally, but them. They are lying to us, and it's impossible to try and figure out where this line is. Get a damn map from the county and draw a line on it--what does it take?--so that we can figure out where this thing is. And on the next -- now, my point is, on the next draft, all maps must include correct addresses and road numbers that are actually road numbers and property numbers. And then you try and make a berm that you're going to collect black clay soil and put this berm up there, and when it rains it's going to shift here, and when it doesn't rain and have a drought it's going to shift there, and drive a train 200 miles an hour and tell me where is -- (applause.) -- taking care of these people along the road. Are you going to build those trauma centers, because this just does not work. Thank you.

Are you going to build those trauma centers, because this just does not work. Thank you.	Refer to NR-2, SG-1 and SG-2. The only bat species listed by TPWD or USFWS with potential to occur in the affected counties is the Rafinesque's Big-eared Bat (<i>Corynorhinus rafinesquii</i>). For information regarding impacts to bats please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures . Road labels were generated from the TxDOT road dataset, which is the most up-to-date source available with coverage across the entire study area. In some cases, these labels may vary from alternate names used on street signs.
Dottie Barnes	1/30/2018	Handwritten	The governor, Lt. Gov., most state officials, all county commissioners and most people living in the counties along the proposed line DO NOT WANT THIS BULLET TRAIN. My question is: Exactly WHAT LAW gives you the right to come from overseas to Texas and build a boondoggle that will steal our land, ruin our livelihoods and destroy our food chain? You need documentation of the loss of food produced in these counties and how their loss will affect Texas, the other states and the world.	Refer to ED-1, LU-2 and NE-7.
Dottie Barnes	1/30/2018	Handwritten	My friends have seen 400-500 pound feret hogs where you want to build this line. They can tear down your chain linked fence and they also climb fences over 6 feet high. When your train going 205 mph hits a hog weighing 4-500 pounds it is sure to derail the train. What financial and medical provisions are made in advance to pay for the lawsuits that will ensue from the accident? Have you posted a bond to pay for the project in full before using eminent domain to take the land from the first person?	Refer to ED-1, GN-4, SS-2, SS-12 and SS-21.
William Barnes	2/1/2018	Website	Ref: 3.10 Aesthetics and Scenic Resources "Moderately high refers to areas of visual resources combined in an aesthetically pleasing composition, expressing a sense of place and lacking prominent disruptive visual detractors. An example would be well maintained agricultural lands with open vistas." The majority of the land in Ellis and Navarro counties are considered part of the great Texas plain. Relatively flat, with open vistas. A north south rail line would disrupt the beauty of both the sunset (west view) and sunrise (east view) along a minimum of a 60 mile stretch of extending a mile or more from the actual right of way.	The description of land for Ellis and Navarro Counties has been revised for the FEIS. However, approximately 48% of the alignment is adjacent to existing infrastructure, such as utility lines, pipelines, freight rail, or roads.
William Barnes	2/1/2018	Website	ES.9.4 Water Quality "The rail would be designed to maintain existing drainage patterns. Water in the water quality Study Area generally drains to the southeast towards the Gulf of Mexico and the rail intersects nine watersheds. The rail would be designed to maintain existing drainage patterns." How, with a route primarily north to south can the TRCC maintain existing drainage without it being blocked with a raised berm trackbed extending over 200 miles?	Refer to WW-1 and WW-2.
William Barnes	2/1/2018	Website	ES.9.4 Water Quality "permanent physical impacts would occur to groundwater wells during construction, including public water system wells. Additionally, permanent physical impacts would occur to groundwater wells including public water system wells. When impacted and to avoid sediments and contamination from reaching wells and the groundwater supply, TCRR shall plug and abandon and/or relocate the wells." It has been demonstrated in other well relocations within the state that the water quantity and/or quality is not necessarily equivalent between wells. HOW does the TCRR intend to provide both adequate water quantity and quality for existing and possible future requirements.	Refer to WW-6.

Thomas Barnett	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.
Daniel Barnum	2/6/2018	Email	I am very much in favor of this High Speed Rail connection between Houston and Dallas. It is long overdue and absolutely necessary. It is bewildering to me that we do not have HSR in the US when it has been in Japan since the mid-1960s and Europe since soon after that. HSR is a fabulous way to move people over distances like that between Houston and Dallas or among the cities in the Texas Triangle, so let's get on with it.	Comment noted.

Daniel Barnum	3/8/2018	Website	I first became aware of High Speed Rail when in Japan in 1963, when the HSR link from Tokyo to Osaka was being built prior to the 1964 Olympics. I subsequently rode that line while on Navy Reserve duty in the 1970s. I have since ridden HSR in Europe several times. It is a wonderful way to travel, and it is high time we got it here in Texas. The Houston to Dallas is the perfect beginning line, and it is time to get it started. My only complaint is that I think the Houston station should be downtown rather than at the northwest mall.	Refer to GN-6, GN-7 and TR-4.
Candi Upchurch Barousse	3/5/2018	Oral	For well over 100 years, my family has owned property in Grimes County, Texas. We are cattle ranchers, operating under the name of Upchurch Land & Cattle, [...]. My ancestors started out with only a few acres and continued adding to it when they could afford to purchase more land. Paying the property taxes and inheritance taxes has often been challenging (the Great Depression, fluctuating cattle market, drought, recession, et cetera), but we have worked extremely hard to succeed because of our determination to hang onto the property for future generations of our family. The current proposed route of TCR through Grimes County will definitely destroy all that my family has worked for. The idea is laughable that Texas Central can, quote, "fairly compensate," quote, us for ruining our cattle ranching business; causing irreparable damage to the value of our land; rendering our property useless for any other type of business; and causing immeasurable negative effects on a multitude of environmental issues, including wildlife and watershed. The negative impact of TCR on Grimes County will be tremendous. Grimes County is rectangular in shape, and its width is relatively narrow east-west, but its length is extensive north-south. TCR will run through the length of the county, literally cutting it in half. The route of TCR on a map shows that it goes precisely down the middle of the entire county and its elevated track will be built on top of a virtually impassable barrier of fencing and berms. Grimes County is primarily rural, and the majority of its economy is based on farming, ranching, and other agricultural-related businesses. TCR will inevitably destroy much of that way of life, depreciate property values significantly, and in many cases have an undesirable effect on the health (example: Continual noise and pollution), safety (example: Delayed EMS response due to blocked roads), and welfare (decreased County funds caused by drop in property values) of Grimes County citizens.	Refer to LU-11, LU-12, LU-13, NR-5, NV-1, SS-1, SS-23, VA-1 and WW-9.
Kenneth Barr	3/9/2018	Website	The Texas Bullet Train Will Help My Business Grow! As a longtime business person in North Texas, I am excited about the opportunity offered by the Texas Bullet Train. I strongly urge the Federal Railroad Administration to move forward with its review and approval. As the former mayor of Fort Worth and current chairman of the North Texas Tollway Authority I understand the importance of mobility and transportation	Comment noted.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			options for Texas. The Texas Bullet Train will be a great asset to our state and Texas is the perfect place to plant the seed to grow this new high-tech industry in the United States I urge the FRA to expedite its review and approval -- because it's good for business, good for the economy and good for Texas.	
Jacob Barrett	2/5/2018	Website	I happily support having a private, high-speed rail line between Dallas and Houston. I regularly travel within the Texas triangle and believe that this rail line will provide a wonderful alternative to driving on I-45, and hopefully, will be the first link in a system that can connect all urban areas in Texas.	Comment noted.
Mary Barrett	2/19/2018	Website	This is a stupid idea and will adversely affect many landowners, homeowners, and destroy our peaceful, private communities and landscape, not to mention endangering our wildlife. The predicted use of this rail is so far off base it is pitiful, highly inflated! We don't want this high speed rail! We don't want a foreign country profiting at our expense!!!!	Refer to AS-1, GN-2, GN-4, LU-9 and NR-5.
Michael Barrett	2/17/2018	Website	It's a wonderful, long overdue project!	Comment noted.
Kenneth Barron	2/6/2018	Oral	It was my understanding that when this was proposed, there was EISs for all the routes that were supposed to come out before this route was selected. I have yet to see any other EISs on any of the other routes. I have a hard time understanding how you can allow a train in a utility corridor. We have a transportation corridor: It's called I-45 north.	Refer to BA-8 and BA-9.
Bert Barry	2/8/2018	Website	The Texas population is set to nearly double by 2050, so now is the time to be proactive and put in place infrastructure that can support the ballooning population along the Houston to Dallas corridor. Building more or wider highways is not the answer; sustainable, frequent, on-time mass transportation is, and will be embraced as the preferred mode of transportation in the future. I urge full approval of the Texas Central high speed rail project.	Comment noted.
Michael Bart	1/25/2018	Website	I believe HSR between Dallas and Houston is a good option for the following reasons: Time savings vs. driving 4-5 hours on a good day; No highway grade crossings to worry about train-vehicle collisions; Traffic on I-45 is increasing and we need choices to travel; Frequent schedules will mean I don't have to wait a long time for a train; It takes too long in total time to fly when you consider check-in, security, waiting and delays; It will create thousands of construction jobs for the Texas economy; It will create accessible transportation for mobility challenged Texans; It will create permanent, well-paying jobs in the railroad industry; It's a private company investing in Texas and is not asking for state or federal funding to build or operate the railroad; Roads don't pay property taxes but a private railroad will and it benefits towns and cities	Refer to GN-4.
Robert Bartley	2/16/2018	Website	For once let Texas be first. Support the Dallas to Houston high-speed rail and turn a continuing nightmare trip into a pleasant 90-minute journey with coffee, reclining seats, and clean bathrooms.	Comment noted.
Jason Barton	2/16/2018	Website	As a frequent traveler (twice a month (50% rad, 50% Ar) from Houston to Dallas, I support the option of taking HSR. I'm sure you can produce the number of annual fatalities on I-45 Texas	Comment noted.
Kevin Bassler	1/27/2018	Website	I strongly support the construction of the high-speed rail between Dallas and Houston. It will create badly needed accessible transportation for mobility challenged Texans. It will also stimulate the economy and bring many good jobs to Texas. It will improve the quality of life in Texas.	Comment noted.
David Bateson	2/19/2018	Website	I support Texas high-speed rail and believe it should be built. I will ride it and I travel from Houston to Dallas approximately 4 to 5 times per year.	Comment noted.
Aakash Batra	2/27/2018	Website	I am writing to express my strong support for the Texas Bullet Train project and urge the Federal Railroad Administration to move forward with the timely review and approval of the project. It is a transformational transportation project that will connect the two economic hubs of Texas, Houston and North Texas, with one stop in the Brazos Valley, while respecting Texas lands and providing a safe, convenient and clean alternative to flying and driving. The recent release of the Draft Environmental Impact Statement (DEIS) confirms this conclusion with detailed data and projections. The Texas Bullet Train will utilize the world's safest mass transportation technology, the Shinkansen system, which has had zero crashes or fatalities in 53 years of operation. The project is expected to create more than 10,000 direct jobs per year during construction and more than 1,500 jobs permanently when operational -- at least 25% of them in rural counties along the route. It will be an economic driver for the state as well as all counties along the route. As an electric train, this system will also be the best environmental alternative as 4 of the counties served are already air quality non-attainment status. This innovative new industry reduces road congestion, improves local economies and creates new jobs for Texans. I welcome a faster, safer and cleaner transportation alternative to reduce congestion because it's good for Texas!	Comment noted.
Nikhil Batra	2/12/2018	Website	Let's make this happen and show businesses around the country that we are adding valuable infrastructure to Texas!	Comment noted.
Nikhil Batra	2/16/2018	Website	No brainer given data below! The route is right The preferred route, known as the Utility Corridor, was chosen by the FRA because of its minimal environmental and community impacts. Creates jobs for Texans More than 10,000 direct jobs per year will be created during	Comment noted.

			construction and more than 1,500 jobs will be permanent when operational -- at least 25% o permanent jobs will be in rural counties along the route. Brings the safest mass transportation technology in the world to Texas Shinkansen trains boast a 53-year history with ZERO crashes or fatalities while in operation. Tracks will be built above or below all roads, so there will be no at-grade crossings, removing the risk of intersecting with vehicles and allowing for free movement of wildlife, pedestrians and cars. Cleaner, greener technology An electric alternative to flying and driving, the Texas Bullet Train will operate in an area where 4 of the counties served are already air quality non-attainment status. It will also lead to net reductions in volatile organic compounds, nitrous oxides and greenhouse gas emissions. Increases county tax rolls in ALL impacted counties Estimates in the DEIS show the project generating a net-positive tax impact in counties along the route of between \$6.5 and \$7 billion by 2040.	
Sumeet Batra	2/12/2018	Website	I support the Dallas to Houston HSR and believe that the environmental impact will be minimal and more than offset by the benefits to the region.	Comment noted.
Sumeet Batra	3/9/2018	Website	I strongly support high-speed rail between North Texas and Houston. This is a once in a lifetime opportunity, we cannot waste it.	Comment noted.
Rosalyn Battaglia	3/2/2018	Website	I believe that Morgan Creek ranch should be left untouched by this project. There are far too few philanthropic efforts for first responders and health care personnel, and destroying this property is unconscionable and unreasonable. Please re-route the high speed rail to leave this legacy for future generations of front line rescuers. Thank you	Refer to LU-5.
Rebecca Battles	3/1/2018	Email	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5, WW-1 and WW-2.

Steve Bauer	2/6/2018	Oral	One of the things that struck me about the railroad's statements is that they say this is going to be a form of green transportation. It's going to reduce traffic between the major cities of Dallas and Houston. Let's take a look at that. First of all, it's not going to take a single car off the	Refer to BA-6, GN-6, PN-3, TR-3 and TR-4.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

			streets of Dallas or the streets of Houston, because to get to the railroad station what do you have to do? You have to get in your car, you have to hire a taxi, you have to call Uber, or you have to take a bus, because the local rail transportation systems in both cities will not connect to the stations where they say they're going to build them. So not a single car removed from the streets of Houston or Dallas. Let's look at I-45. Okay. So a few cars will be taken off of I-45, but not one, not one single 18-wheeler will be taken off the roads because this train will carry not one ounce of freight. Okay? So how is this green transportation? How is it helping anything? And you have to remember that this train has a limited capacity to carry passengers. It has a ceiling for how many people it can move in a 24-hour period. And when the growth that's coming to Houston and to Dallas outpaces the ability of the train to carry passengers, what do we have then? The same thing we have now, which is a highway, an interstate highway that is overloaded and will continue to be overloaded. So where do we need to build our infrastructure? We need to improve our highways. We don't need a train that's going to run between two low population -- low density population areas and not make a darn bit of difference in the traffic in either one of them. Now, most of you that have already spoken have more eloquently than I expressed the local problems and how it will affect all of us that live here in Grimes County. All I know is that it will destroy my retirement home, my retirement land that I worked all my life for. Okay? Now, no build. It's the only option. No build. And we have a popular saying here in Texas about you can take my guns when you pry them from my cold, dead hands. That's the same way you'll have to get my land.	
Richard Bauman	3/8/2018	Website	We desperately need the high speed rail from Houston to Dallas and vice versa. Today I flew on a crowded jet to DFW getting to the Houston IAH airport at least an hour and a half before the flight left, then only 45 minutes in the air. This high speed rail built with private funds and employing lots of people to build, maintain and operate the Texas Central Rail line will be good for the economy and show the rest of the nation that high speed rail is a viable option. Please make sure that this project continues.	Comment noted.
Doug L. Bayne	2/6/2018	Oral	Hello. My name is Doug L. Bayne. I live off of House Road. I moved out there in 2012. The land is a farm. It's been a farm for 80 years. I was a business owner. I own commercial properties in northwest Houston. First I want to start off and say, it's a blessing. I'm in your school district, but I'm (inaudible) to be in Harris County, not only with the farm I live on but my commercial properties. One good thing you've got up here that we had our first meeting last night for Harris County, the Commissioners, Emmett, the county judge, everybody's in the tank for this thing. Same way in Dallas. They're telling everybody in Houston, "It's a done deal." We had our first and only meeting last night up on Cypress, north Houston, had a great turnout. And I talked to so many people who didn't even know. They thought this was done. So not only do we need these type meetings -- they've had one meeting, and it was in Cypress for the Houston area. That's crazy. They don't want this to get out. So y'all are very lucky to have the people you've got up here fighting this. Not only -- when I came up with Calvin House. I live right across the street from Calvin and Pam. We came up a couple of years ago just to see where this thing was going. I walked in here and looked. Well, there was my pond right there. So my whole retirement, my thoughts of staying on the farm was shot that night. So there's been anxiety ever since then. Texans Against High-Speed Rail is a great organization. We've spent money and time helping this cause, and I think everybody in here needs to get on board with this thing. It -- there's a saying, "Not in my backyard. It won't hurt me." It will hurt you because of the tax base. Everybody in here, if you've got an apartment or you've got one acre or a thousand, you worked for it. So I think we got to fight this thing till it's over. So I'm definitely a no vote on this thing, and I hope that everybody in here will join Texans Against High-Speed Rail. Thank you.	Refer to PI-10 and VA-3.
Bob Beakley	3/3/2018	Website	Building this High Speed Rail line from Dallas to Houston is a disaster for the agriculture community. The fields will be cut in two pieces, making it difficult to farm. The size and shape of the fields will be altered, making it almost impossible for large equipment to work economically. Roads that will be closed during construction of an overpass are needed all during the year to get to the other side. Farming has to be done timely, and if work is delayed, crops will suffer. It seems that everything was considered in the Environmental Impact Study except the damages that will occur to the farmers and ranchers. How can the study be completed without this input? This train will not be used by anyone in the eight counties where most of the damages occur. Why should we be punished? This is just a few of many reasons why this rail line should not be built. I hope that you will consider this in making your decision. Thank you, Bob Beakley	Refer to LU-11, PN-3 and SC-19.
Bob Beakley	3/3/2018	Website	In making your decision regarding High Speed Rail, please consider the following; 1. The anticipated number of riders has been over-inflated. 2. The cost of construction will be at least double what is projected by TCR. 3. Damage to the farm and ranch land has been terribly underestimated. 4. The government will end up financing the project. 5. High Speed Rail, if not already, will soon be out-dated. Thank you for considering these facts. Bob Beakley	Refer to GN-2, GN-4, LU-1, LU-14 and SC-22.

Bob Beakley	3/3/2018	Website	To Whom it May Concern: My name is Bob Beakley, from Ennis, Texas. I am a farmer whose land will be divided if the High Speed Rail is built. I live on a road that will be closed until the crossing over the track is completed. My land is on both sides of the crossing. How long will it take to build the crossing? It's anyone's guess. It is approximately 10 miles to the next crossing that will not be closed. During construction of the crossing on my road, I will have to travel the 10 miles to the open road, then 10 miles back, to the other side of the field. Farm equipment used nowadays is large, and does not travel well on county roads, plus it is dangerous as well. This road closing will make it all but impossible for me to economically farm the other side of the track until the crossing is finished. This scenario is playing out all up and down the line for many farmers and ranchers. The Environmental Impact Study did not include the damage that will be done to the farms concerned. It seems strange that the damages done to the farmers and ranchers were not considered. This proposed project is a disaster for the farmers! I hope you will address my concerns. Thank you, Bob Beakley	Refer to LU-11, TR-6, TR-8 and TR-10.
Steven Beakley	1/30/2018	Oral	I just would like to make a comment on what a disruption this will be to the environment as far as drainage of water. Wildlife that is just coming into the area. Such as whitetail deer, turkey. There is also a disruption of the commerce both agricultural and commodity. A loss of tax base due to property values. And I guess the loss of aesthetics to the land. Thank you.	Refer to AS-1, LU-2, LU-11, NR-2, SG-1, WW-1, WW-2 and WW-9. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .
Commissioner Justin Beckendorff	2/6/2018	Oral	Alright. I'm Justin Beckendorff. I'm the Waller County Commissioner of Precinct 4, which is the Brookshire, Pattison, Katy area. I just want to be here to support our fellow residents in the county in this fight, but also to maybe give a little bit different perspective. But before I do, I do want to -- I want to actually thank you guys for being here, because I know this is not an easy job. But you have to be here, and I know there's no part of tonight that's fun. But I do appreciate you guys being here and at least giving us a chance to tell you where we stand. But again, I'm on the south end of the county. I think it was two years ago, Waller County was named the fastest-growing county in the State of Texas. We were also named the -- I believe it was the eighth or ninth fastest-growing county in the country. And with our growth, my big concern on the rail is how is that going to affect our future growth. We have a major thoroughfare plan map that is -- it's open to the public and it shows places where potential roads will go as we grow as a county, as neighborhoods grow. Every time -- well, I don't think we have - I don't think Waller County has ever put in an overpass, but if you build an overpass, you're talking a couple million dollars, \$2 or \$3 million. We have four or five, maybe ten-plus roads that will potentially cross the proposed track of the railroad. We're a small rural county. If we have to build an overpass on every single one of those roads as we grow, it will be financially devastating to the county. Our budget's \$32 million. We can't go and spend \$2 or \$3 million on one overpass. So it's going to basically cripple us as we grow. It's going to cut that portion of the county from the rest of it. Again, we're not Harris County. We're not Fort Bend County where we can just, you know, sneeze, and that million comes out. That is huge. That's financially devastating to every single one of us. And again, at no point is this rail going to affect me or any of my constituents, but it will affect every one of my constituents because they're all taxpayers, just like you guys are. Every single one of my constituents pays taxes, and they expect services from the County. So I support you guys. Thank you guys so much for being here and standing up for what you believe, and don't give up. Don't ever give up. Thank you.	Refer to LU-4, SC-13 and TR-7.
Cathy Beckwith	3/8/2018	Website	While the EIS says the High Speed Rail will have no adverse impacts on overall food production I believe this to be an error. How much agricultural land within the effected counties will be impacted. In a county such as Freestone where agriculture is a major part of the counties income even a 10% impact within the county is too much. I understand that no public roadways will be permanently closed but how many private roads will be closed? And who will be responsible for the cost to rebuild or reroute those roads. How will it effect law enforcement and emergency services when they can not use those private roads any longer. Why have the emergency services personnel and law enforcement officials not be contacted about the safety of the citizens of the counties effected by the high speed rail. Why is the Historical significance of areas within Houston been taken into consideration but the impact on historical lands and homes in the rural counties been ignored. Some of the homes and lands impacted by the High Speed Rail have been in these families for generations back to the 1800s. Why is the Historic District Heights Boulevard Esplanade more important than a family who lives on land that has been in their family since 1848? I am strongly against the High Speed Rail project and believe it is not good for the State of Texas as a whole. Thank you.	Refer to CR-13, LU-2, LU-11, PI-1, SS-23, TR-7 and TR-8.
Harry Beckwith	3/8/2018	Website	The proposed high speed rail line will have numerous adverse effects across a swath of rural Texas counties. Land that has been in families for generations will be divided into smaller less productive parcels. Access to existing roads will be reduced, requiring many miles of detours - this is especially worrisome for local law enforcement and emergency response teams. Migration of native animals will be restricted further reducing genetic diversity and encouraging rapid transmission of disease. Accidents similar to the high speed derailment in France (2015)	Refer to GN-2, GN-7, LU-11, NE-1, NR-2, NR-6, SC-19, SS-12, SS-13, SS-18, SS-23, TR-8 and TR-10.

			which caused 11 deaths will be almost impossible to access - this may create additional loss of property and life. With only one intermediate station, the proposed high speed rail will provide no economic benefit to the affected counties. Further, with no potential market for its infrastructure the additional assessed valuation of the property will minimal at best. Basically, for most of its 240 mile route the proposed high speed rail project is all take and no give. I am strongly opposed to this project and recommend it be denied any permits or authorization to continue.	
Robert and Brenda Beeler	3/7/2018	Website	We were very glad to read that you do not support Texas Central Rail (TCR). However, we are totally offended and angry with your statement "The only acceptable option for the TCR high speed rail project is alongside the already developed I-45 route. The current route designated by TCR simply does not make sense for the majority of Texans who will be impacted." How can you state that you oppose the HSR for one group of your constituents yet recommend a new route that effects another group of your constituents? Sounds a lot like a double talking political move to me also known as talking out of both sides of your mouth. Yes, we own land both north of Centerville on I-45 and south of Centerville just off I-45 which will be affected by this new route you propose. North of town used to be one large place; then, the State took 88 acres right down the middle of the place for I-45. Now we have to drive almost an 8 mile round trip just to get from one place to the other across the Interstate. The state refused any crossing be made available to the landowners even though Lower Keechi Creek bridge is right there. Now you propose that our family loose more land and most probably be land-locked by the train. Our family knows what it is like to lose bought and paid for land that has been in the family a long time. That, is why we are members of Citizens Against High Speed Rail, have donated not only cash but also personal time for the purpose of stopping the "privately owned train" from being built. Only Japan will gain from this deal by providing and servicing the trains - all Texas Taxpayers will lose! There has never been a profitable high speed rail service in this country without taxpayer money paying for it. We are registered voters and have voted for you in the past. Please note the past tense used, we will think long and hard plus, do research on your next opponent prior to voting. TCR requires a minimum of 2 tracks and each track takes minimum of 40 feet each. Plus, land is affected for 2 miles each side of the train should they decide they want to take something off your land for their development. There is not enough land currently in the I-45 system with expansion plans that are currently ongoing to provide for the train without taking someone's land or business. Plus, your suggestion will really close or affect numerous main roads with this plan. However, just so that you know if you get your way and move the route instead of STOPPING the HSR so that NO ONE will be affected which is what we are trying to do. There will be a consequence which will affect the State of Texas and all the residents of Texas called "Fort Boggy State Park". You need to review the terms of Alene Sullivan's Last Will and Deed when she donated the land for a State Park. Alene was one smart lady as you will discover. She knew that we, the people, cannot entirely trust the political system or politicians so put a stipulation on the gift. I do not think the State really wants to lose that land on both sides of I-45, do you? Not only will your "new route" affect Fort Boggy State Park's survival but what about all the businesses and tax revenue generated by them that support this State and the Counties where located. I ask again are you going to choose to support ALL your constituents or only some?? We really prefer to support a US Congressman that is going to support everyone in his district and all Texas as a whole. We are giving you our opinion. But you should know, we have heard numerous Texans and neighbors stating this same belief, Robert & Brenda Beeler, Centerville, Texas (Email to US Congressman, Kevin Brady (TX08))	Refer to BA-7, BA-9, GN-4, LU-14, NE-1 and RF-4.
Allen Beene	2/16/2018	Website	I support the high-speed rail between Dallas and Houston. This will be another tool in the box in dealing with an already congested travel corridor. Air travel is limited by the number of gates at the respective airports. A new mode of travel is needed and the high-speed rail project will provide that needed alternative between two very large municipal areas.	Comment noted.
M M Beeson	2/6/2018	Handwritten	#260 of 313 copy Please (map Book)	All of the maps are available on the FRA website: https://railroads.fra.dot.gov/current-environmental-reviews/dallas-houston-high-speed-rail/dallas-houston-high-speed-rail . Physical copies of the Draft Environmental Impact Statement (Draft EIS) were provide to the main libraries in all ten affected counties. A copy of can be found at the Waller County Library at 2331 11th Street Hempstead, Texas 77445. When the Final EIS is released a copy will also be found at this library location.
Rita Beisert	2/5/2018	Website	I am not in favor of this High Speed Train. We have property that is located in the area that will be impacted by this Train (Grimes Co.) This Train will devalue all the beautiful property that it will impact. All the land, houses, businesses, and families that will be impacted on any route they choose will affect many people and their livelihoods for just a few people every day to take a train to Dallas. I'm sure if any of the politicians had a piece of property or a house on one of the chosen routes a different route would be chosen or there would be no Train at all. The Train is not necessary and I don't believe that enough data has been done to see if there is a need for a Train to Dallas/Houston. I think	Refer to PN-3 and VA-1.

			people need to know that it is not a US Company that will be building this Train. I will not vote or support any governmental official that votes in favor of this Train.	
Rita Beisert	3/8/2018	Email	Object to the high speed railway This is not necessary. It will ruin land and lots of neighborhoods. Vote against it. I'm voicing my objection. Thank you Rita Beisert	Comment noted.
Representative Cecil Bell	2/6/2018	Oral	First off, thank you for coming to Waller County and having this meeting. I think it's very important that the citizens of Texas and Waller County get to speak on behalf of this. Also, I want to point out some very important things: As you know from the letter I sent to the FRA saying that I don't believe the NEPA process has been 5 followed to date, all the folks in this room have information regarding everything from the environmental issues that are at hand to the economic issues, political subdivisions to archaeological, historical aspects, none of which have been talked about, but yet all the energy in this room comes because the FRA has assisted in drawing this down to one line on a piece of paper. So I want to be clear, first, in saying that the NEPA process is there for a purpose. You're not supposed to be setting aside, you're not supposed to be cutting properties half in two where you're taking away the economic viability of what is there. That is supposed to be protected under the NEPA process. I don't believe that process, too, has been vetted. And I also believe I'm -- I'm the first person to point out that the \$10 billion original estimate lacks trains, lacks other aspects, is economically not feasible. If you want to see it on a calculator, go to CecilBellJr.com, front slash, HRS. and playing. They say they're going to run it at the same rate as airfare. You can't get there from here. Hundreds and millions -- billions of dollars, and that's just the reality of it. In Austin, Texas, we did pass a bill that says you cannot use state dollars to construct or operate a high-speed -- private high-speed rail. So that was -- and I tried to carry a -- did carry a bill that did not pass that said you had to have bonds in place so that when this project fails, that you have to restore that property back to the condition it was in. Make no -- thank you. It was said that that was economically not viable; but yet as a contractor, I do that every day when I go on someone else's project or property. It's been said that there's some kind of great aspect of moving through Texas, cutting it half in two. It will cut Texas half in two north-south. East-west traffic will have high-traffic to a specific location. All the counties -- if you don't believe it affects you, wait until you have to pay for all those overpasses at a cost of about \$25 million apiece that haven't been accounted for in rural Texas. It goes on and on and on and on. And I want you to think about this: If, indeed, it was economically viable, if it was something that was something that capitalists would embrace, Disney would have done it in the '40s and the '50s and we'd have all been riding that amusement park ride from Dallas to Houston from the time we were little bitty kids. Thank you for being here. Thank you for hearing what we have to say. I remain committed to standing against use of taxpayers dollars, against the taking of private property in this endeavor. Thank you.	Refer to NE-1 and NE-9.
Tahj Bell	3/5/2018	Oral	Hello, everyone. Public speaking is not really my thing, but I'll try my best. And I promise you guys I'm not. I just have a really sarcastic voice, so if you'll just bear with me. I have prepared a few things for today. Good evening, everyone. My name is Tahj Bell, and I am a member of the Center for Diversity and Inclusion at U of H. I'm also the president of the HR society. That has nothing to do with what I'm about to say, but when else will I get to use that title? So when I first heard about the news of the bullet train, I was pretty exited. Having a new method of transportation to choose from in Houston is, I think, really beneficial to the city. What excites me the most about the train is the opportunities it will create for myself and my classmates at the University of Houston. The ability to travel from Houston to Dallas safely in 90 minutes is a pretty good idea. And like Mr. Chris Brown said, it will open up even more job opportunities for us. The FRA's mission is to enable the safe and reliable and efficient movement of people and goods for a strong America now and in the future. I believe that is what Texas Central is doing. The bullet train will be the safest way to travel between Houston and Dallas. The system that they are using has had zero operational accidents that resulted in a fatality or injury on the bullet train. Thank you for your time, and my name is Tahj Bell, and I'm in support of this project.	Comment noted.
Cecil Bell, Jr.	2/6/2018	Oral	I just -- there is something I would like to say. I'm State Representative Cecil Bell, Jr. There's a difference in this particular high-speed rail endeavor and all of the critical infrastructure that we normally talk about. My ranch in Freestone County was cut half in two by Highway 79. When I pull up to Highway 79, if I turn to the right, I go to Palestine, Texas; if I turn to the left, I go to Buffalo. I can sell cows there, buy feed there, or I can feed myself and my family, do whatever other kinds of things that I want to do. Actually have a high-speed -- a big power line that comes through. I have a substation. That substation takes away some of the access to the property. But at the end of the day, in recent months, I've had people contact me about using that area, a portion of that land, to put in a solar farm. That's not going to happen. I bought that land to raise deer, cows, kids and grandkids and great-grandkids. But there is an intrinsic value to having that there. If I wanted to do that, it has a value to it. I have a pipeline that comes through. Wasn't able to buy mineral rights, but the same conversation. If I did have mineral rights and did have a will, I'd have the opportunity to gain the intrinsic value of having that pipeline there. Now, on the east side of my ranch is a railroad. Several -- well, it's probably a half a mile or more of railroad. Also have river frontage, Trinity River frontage. If I wanted to put in a sand pit -- which, again, won't happen. Wasn't bought for that purpose -- a gravel pit, I could pay to have that railroad spur put in, and I'd have intrinsic value from having that traditional railroad. The people whose property is being compromised here and potentially taken from them, receive no intrinsic value. They only receive the challenges of the taking of their land. They won't ever be able to get on that train.	Comment noted.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

			They will be never be able to turn right or left and go to a destination unless they drive some distant point away from them and get on it at a station. They will never be able to use it for commerce or other -- they will only have the impact associated with having their property taken from them. And I think that's something that very much needs to be considered. This is not a traditional infrastructure project with the normal intrinsic value. You may not like it. It's that greater -- the reason the Constitution holds the provision for when the public's greater interest is served. But normally, those people who see that challenge imposed on them have an intrinsic value. The folks that you're talking about here will not and cannot have an intrinsic value. And I just wanted to make that point. Thank you for being here tonight and listening to everybody and appreciate all of you guys taking your time, certainly, for staying here. God bless you.	
Sylvere Belliot	1/25/2018	Website	I am in favor of a high speed train....save time... Save traffic and allowed to work, eat, sleep, walk on train ...later on a connection to Austin and San Antonio Would increase business and economy	Comment noted.
Alesa Belvedere	2/19/2018	Website	Sovexcited about the bullet train! It's long over due and very needed.	Comment noted.
Bryan Bennett	3/9/2018	Website	Two years ago my sons Cub Scout Den Leader abruptly resigned and suddenly we realized the boys were not on track to advance at the end of the year. Dr. Morgan offered the use of Morgan Creek Ranch and took the boys on a tour one morning. He took us all to the highest point on the ranch and showed us the boundaries and the surrounding land. I remember him talking about how they were building a high speed rail line and he said something to the effect of, it isn't ideal, but they will follow the power lines since it's already a gentle slope. Imagine my suprise that instead they opted to come across the highest point. Even the most basic knowledge of trains affords the realization that you don't want high points with long strands of bridge between them. With high speed rail I have to think it's even less of a good idea to place it at a great height.	Refer to LU-5.
Bryan Bennett	3/9/2018	Website	Attached is a picture I took when the high speed rail from London to Paris hit 297 km/h - that is over 184 mph. I'm pretty sure you can't hit 184 mph on an elevated trestle. That kind of speed requires tracks laid on the ground, not running through the highest point for miles around. It makes me wonder what the criteria was for selecting a site? Was it most use of bridges for a single rail line?	Refer to TC-3. As detailed within the TCRR Final Conceptual Engineering Design and Constructability Reports, Appendix F , TCRR proposed to construct the project on steel structures and ballasted rail tracks.
Bryan Bennett	3/9/2018	Website	Trains are cool, lets start there. While living in Sydney, Australia I got to ride The Ghan from Alice Springs, in the center of Australia to Adelaide on the southern coast. Even to the casual eye you could tell they had, like we did in the early days of building tracks across this great country, selected the path of least resistance. How come years ago we knew to build tracks on the smoothest possible slopes without resulting to massive projects trying to bend the land to our will? Where are the surveyors and engineers that picked those routes? Was this really the route the informed railroad guys picked out or did somebody just draw a line who'd never read a topographical map?	Refer to BA-8.
Judith F. Bennett	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual diruption and a high consumption of electricity.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.
Lindley Bennett	3/5/2018	Handwritten	I Stronlly Support The Houston To Dallas HIGH-SPEED RAIL PROJECT.with our current Population over 28 Million Residents and Houston and Dallas Two of The Largest and Fastest Growimng Metropolitan Areas in The United States We Must Build For Current and Future Needs To Assure We Have Safe and Environmentally Responsible Transportation options Between our States Two Largest Cities.	Comment noted.
Lindley Bennett	3/5/2018	Handwritten	I Strongly Support The Dallas To Houston High Speed Rail Project and the Northwest Mall Station Site in Houston.	Comment noted.
Mack Bennett	3/1/2018	Website	I believe that this rail going through the Morgan Heritage Farm is a bad idea because just north of the farm is an easement for power lines that could be leased and used for the rail line. Whereas Morgan Farm has inconsistent elevation, the land north is flat and would make it easier to build the rail.	Refer to LU-5.

Merietta Bennett	3/5/2018	Handwritten	I Am in Favor of This Project. Texas Desperately Needs Additional Transportation options for our Growing Population. The Dallas to Houston High Speed Rail Project will Be an environmentally Friendly option. I Support Approval of This Project.	Comment noted.
Tamara Bennett	2/28/2018	Website	The Morgan Creek Ranch, Morgan Legacy Farm, has provided invaluable support to my family for several years. When my son was first diagnosed with significant learning differences and was struggling with anxiety and depression, Morgan Creek Ranch was a refuge for him. It is a unique place where he could water trees, pet animals and enjoy the best of Texas. The proposed placement of the rail line will destroy all of that. It is wasteful of a wonderful resource when the rail could be moved north of the power lines and preserve the ranch. I sincerely hope the FRA will take the community into consideration in the ultimate placement of the rail line.	Refer to LU-5.
Tamara Bennett	2/28/2018	Website	Morgan Creek Ranch has hosted our Cub Scout pack for several years, free of charge! The ranch provides a safe environment with unique access to water, country, and TX wildlife. I can't think of anywhere else the boys could have gone FOR FREE and seen armadillos & long-horns or gotten a real, uncrowded outdoor experience. The proposed rail route will destroy all of that. Moving the line north can preserve a piece of what Texas is all about without reducing the value of the rail to its users. Please consider relocating north of the power lines.	Refer to LU-5.
Tamara Bennett	3/1/2018	Website	I am OPPOSED to the placement of the High speed rail line through Morgan Creek Ranch. The rail line will interfere with waterways and migratory birds and make the ranch inaccessible for its primary purposes. The rail line should be relocated north to the power lines where it will serve commuters equally well without destroying the habitat.	Refer to LU-5 and NR-2.
Tamara Bennett	3/1/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military well without destroying the habitat.	Refer to LU-5 and NR-2.
Tamara Bennett	3/1/2018	Website	I am opposed to the placement of the high speed rail line through Morgan Heritage Farm. The farm is often used for charitable purpose and is an asset to the community. My family has personally hosted those recovering from trauma and has never been asked to pay for any part of that expense. The farm's unique layout with both tame and wild animal populations, guest houses, and space for reflection makes it a valuable resource that will be destroyed by the proposed rail placement. This can, and should, be avoided by moving the line north.	Refer to LU-5.

Tamara Bennett	3/2/2018	Website	I am OPPOSED to the placement of the rail line through Morgan Heritage Farm. The property is regularly used for charitable gatherings at no cost to the scouts, veterans, police and care providers that benefit from its unique environment. The farm carries on a unique part of Texas culture that should be preserved. The rail line should be relocated north where it will provide equal transportation value without destroying a property valuable to the community.	Refer to LU-5.
Tamara Bennett	3/2/2018	Website	I am OPPOSED to the placement of the rail line through Morgan Heritage Farm. The property provides support to the community and individuals well beyond the Morgan family. When a colleague lost a job opportunity and had nowhere to go, I took her to the farm without hesitation. The unique environment of wildlife and nature with well-developed guest houses and access to acres of land was the perfect place to reflect and start the journey forward. All of this is always free of charge regardless of the guest. The rail should be moved north so this all too rare hospitality and service to community can be preserved.	Refer to LU-5.
Tamara Bennett	3/2/2018	Website	As a den leader for the cub scout pack, I am OPPOSED to the placement of the rail line through Morgan Heritage Farm. Our den used the farm to allow boys to camp, work on badges and enjoy access to the outdoors rarely allowed anywhere but a scout camp. The pack has always used the property free of charge and been able to accommodate boys of all backgrounds and income levels. The rail line should be moved north where it will not destroy a valuable community asset.	Refer to LU-5.
Tamara Bennett	3/9/2018	Website	I am OPPOSED to the placement of the high speed rail line through Morgan Heritage Farm. The rail will disrupt operation of a valuable community asset that is often used for charitable purpose. Additionally, it will create environmental harm by disrupting watersheds and wildlife habitat. The line should be moved north to prevent this damage and still provide value to commuters and consumers.	Refer to LU-5.

Tamara Bennett	3/9/2018	Website	I am OPPOSED to the location of the high speed rail line going through Morgan Heritage Farm/Morgan Creek Ranch. The rail will disrupt the watershed, create environmental damage and deprive the community of a much used resource for scouts, family, and mental health initiatives. Move the rail line north to avoid these negative impacts and still provide commuters a service.	Refer to LU-5.
Brooke Bentley	2/16/2018	Website	I am committed to a cleaner Texas and I believe that the Texas Bullet Train would greatly assist all Texans. The main corridor of the state I-35, is an absolute mess - even the parts that aren't under constant construction. I travel back and forth every week between Dallas and Houston and it's honestly so dangerous because there are no shoulders. Not only would a bullet train decrease congestion on increasingly busy Texas roads, thus making them SAFER for Texans, but the project as a whole would play a positive role in the Texas economy, providing jobs during the construction and operation of the Texas Bullet Train. For Texans, Brooke Bentley	Comment noted.
Norman Bergan	1/29/2018	Oral	Good evening, everyone. My name is Norman Bergan and I would start a conversation like this with a joke but this is not a joking matter. I am 100 percent against this because it is taking a small ranch, I say "mine" it's our my wife and I. It's our dream, it's on a hill, 90 acres worth and the railroad's cutting it essentially in half. And if it weren't cutting it in half, it is -- it's destroying our peace and quiet and that's what we have the ranch out there. It's a lovely place and it's not as known out there as it is in Dallas cows there for a couple years. I bought that ranch years ago. I just, I raised longhorn, and it was absolutely wonderful and now it's going to be destroyed. And not impacted, but destroyed, our dreams are gone. And now they're telling us it's going it be some years before they even start to break ground and they put together an offer to us and we have to maintain the ranch during that period of time which will only be a few years and, you know, that's just not fair. It's just not fair. I'm sorry. I wish I could say more, just don't know what to add to that. I was absolutely devastated when I found this out. Initially our first meeting they claimed to to be behind our ranch. That was bad enough, at least something that didn't destroy our land. Now because they changed to Lancaster it's cutting right through the ranch, it's -- it's totally -- and I'm having a hard time keeping my composure, I'm sorry. I certainly hope that it can be changed from where it is. And if it goes down into it that's fine. And I hope they are considering Elon Musk who is kind of building a new technology and this is gonna be fantastic I hope a couple of your investors -- because I think the thing about it is technology is gonna win. Thank you.	Refer to ED-2 and LU-11.
J Berger	2/13/2018	Website	I do NOT want the high speed rail in my area.	Comment noted.
Tim Berneking	3/8/2018	Website	In the view of the FRA, has the TCRR or TCR made any statements or claims that have proven to be incorrect or false: 1) to gain favor in the granting of necessary funding, loans or otherwise, or 2) to have any other hurdles they need to jump lowered in order to get this project pushed through. Bluntly, have they lied, been deceitful about anything and have been caught by the FRA or some other entity who cares about being true and honest. If so, to what extent are they held accountable and if so why continue on with this project?	Refer to GN-4 and NE-1.
Tim Berneking	3/8/2018	Website	How much money has been provided by TXDOT for this HSR train project since day one and to whom did they give that money?	Refer to GN-4.
Tim Berneking	3/8/2018	Website	How much money has been provided by each individual Texas county's COG (Council of Government)? How much was federal money? How were proceeds taken from Texas toll roads and which toll roads contributed to support the COG study and marketing activities	Refer to GN-4.
Tim Berneking	3/8/2018	Website	Ridership projections are huge, seemingly way overinflated. Did these projections come from TCR? If so, how did they arrive at these numbers? Where is it explained how they got their data? Did the FRA do their own study concerning ridership? If so, how did you arrive at your findings? If not, why not? If so, how did your study compare with that of the TCR? Is the FRA ready to state that the FRA believes the TCR's ridership numbers are true and correct? If not, why not.	Refer to GN-2.
Tim Berneking	3/8/2018	Website	What or who gave the TCR people the right to enter and survey people's private property, sometimes without asking, and sometimes "strong arming" landowners with threats in order to gain access? Does the FRA know about this happening? Has there been or will there be an investigation of these activities? Does the FRA care? Has the TCR group been notified they cannot do this or is it the opinion of the FRA that they can act in this manner? If TCR commits such heinous acts of intrusion and deceit. how will the FRA protect the citizens of Ellis and other counties from said activities? How can TCR be trusted to act, do and say what is true and appropriate while building their train?	Refer to NE-8.
Tim Berneking	3/8/2018	Website	Re-route roads? If the overall plan for this train is such a good thing, why hasn't the TCR gotten in touch with all the school districts affected by this and let them know the plans to re-route many of the roads around their districts and confirm how it will affect their school districts and their busses? This will put an additional financial burden on rural school districts adding additional time for bussing kids as well as additional miles drives for their busses. How is this being addressed? Has the FRA stepped up to force that communication? If not, why not? What are the plans of the FRA going forward to aide in this happening? More taxpayer burden coming?	Refer to SC-6.
Tim Berneking	3/8/2018	Website	It strikes me odd so many have been involved in preparing for their battles to push this project through, sometimes using smoke and mirrors, sometimes using the sheer greed of some in our own gov't to push this project along and get it done. Consider the FRA, NCTCOG, TCR, Japan (foreign company) and all their aides and some investors, and they have had a few years to put together a "case" for something they want to make "palatable" to a large group of people they know won't want it to happen. Those in their way who they're going to step on. They prepare for several years. Get to write a 5500 page document to try and prove their case. And the others? They are just allowed weeks to get the word out to the people affected. I meet people everyday who have no idea this has been going on. Is it fair there is no additional time to	Refer to PI-3.

			educate the public with te facts ad not just a soundbite on the news? Public comment should be through end of 2018, but even at minimum it should be through Sept '18. You see, this is not our full time job. But I guess if it were more fair TCR could not strike while the iron is hot.	
Tim Berneking	3/8/2018	Website	Let's talk about the roads. Re-routing will be bad enough, but add to that the overuse of our county roads and state highways with earthmoving equipment, gravel trucks and such, and the roads will be destroyed. Promises are cheap. What is the plan to return ALL our affected roads to good condition once construction is over and everyone leaves. What is the plan to be SURE roads will be repaired correctly and not cheaply. I've witnessed temporary sand and gravel sites being set up for months and roads torn up, only to see the company involved repair them in lousy fashion after they leave. How will you be sure this will not happen? Will TCR have to put up a performance bond to guarantee the roads that are devastated will be fixed and fixed correctly? Has this been covered? If not, why not?	Refer to TR-7.
Mike Bernelle	1/16/2018	Email	Message: The only people I have heard in favor of this project are those with Texas Central Railroad in some capacity and stand to directly benefit by a paycheck and/or investment or those that are not in the path or adjacent to this train's route. I don't want it. I don't need it. NO BUILD!	Comment noted.
Mike and Robin Bernelle	2/6/2018	Handwritten	NO BUILD! This project is not needed. It will have a negative environmental impact. It will have a negative economic impact. This organization (TCR) is dishonest. They cannot provide details on how this thing is supposed to pay for itself. If this fiasco is approved, it will fail and the taxpayers will wind up paying for this "private enterprise" project.	Refer to GN-4, NE-1, NE-9, PN-3 and SC-19.
Mike and Robin Bernelle	2/6/2018	Handwritten	The only people I have heard in favor of this project are those with Texas Central Railroad in some capacity and stand to directly benefit by a paycheck and/or investment or those that are not in the path Or adjacent to this train's route. I don't want it. I dont need it. NO BUILD!	Comment noted.
Jaime Beseda	2/6/2018	Website	I do not feel that this project benefits enough consumers to justify taking land from owners. I would think that the majority of those using the lines are commuters. The areas of the state being impacted are rural areas where substantial agricultural assets are located. By slowly reducing land available for agriculture, domestic products will become less available, forcing cost increases and limited availability. I feel that this rail line is appealing to an elite group who would use it. There are plenty of roadways and air travel that can accommodate this group. Average families are not going to use this mode of transportation, and I feel that it is unnecessary, and unwelcome. If you want to work in Dallas then buy a home with a reasonable commute. I do not make personal work and living decisions that would force others to accommodate my wishes. I make choices that work for me and do not impose my choice of travel on others.	Refer to BA-4, BA-12, LU-2 and PN-3.
Marilyn Bettes	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual diruption and a high consumption of electricity.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.
Lynn Betts	3/9/2018	Website	I support the NO-BUILD option for this train. The DEIS was extremely misleading about the numbers of Grimes County employees. It inferred that the employees would come from the rolls of unemployed in Grimes County. Far from it. The train maintenance workers will be brought in from outside, as they must be skilled in working on the trains. The track maintenance company may possibly hire some locals, and the ticket takers and station cleaning staff could possible come from the current unemployed. But, very few of the skilled workers will be living in Grimes County. They will live in Huntsville or Bryan/College Station, which gives them access to shopping, doctors, etc., and a 30 minute drive to work. Also, I do not see Roans Prairie growing into a thriving bedroom community. It may gain a few more convenience stores, but no real growth. No big subdivisions and shopping centers. That growth will go to Walker and Brazos Counties, to Huntsville and the BCS area. Again, not benefiting Grimes County. One factor that is also misleading in early descriptions of the train is the number of runs per day expected. Buried in the DEIS, the truth comes out that they want to start at every 30 minutes, but eventually want to run every 15 minutes during peak times. So, for 6-8 hours per day (4 hours am and 4 hours pm), a landowner along this route will have a train whizzing by every 15 minutes. Even at twice an hour, that is enough to devalue all neighboring properties, who get no compensation, and can't sell their property, either. Supposedly, 50% of the tracks are to be raised, which leaves 50% on-grade and obstructing existing water flow across lands, which is illegal. These berms will cut off flow to ponds and creeks, and divert water into channels under the raised portion, causing massive issues for the	Refer to BA-6, BA-9, FP-1, SC-4, SC-19, TC-4, VA-1, WW-1 and WW-2. Approximately 25 percent of the Build Alternatives in Grimes County would be constructed on viaduct (bridge type structure).

			landowners. I absolutely do not support this high-speed train coming through Grimes County. If they are intent on this boondoggle, have it go down the center ROW of I-45.	
Berl Bevel	2/5/2018	Oral	Good evening, my name is Berl Bevel. I'm actually a retired teacher from Rosenberg Texas. One thing I want to say this evening was, we are very opposed to this land rail. After review of much of the DEIS documents I am more convinced than ever that FRA is not acting in an independent capacity with TCRR. In fact, they are supporting this project and disregarding the safety of the public in doing so. What I heard in a previous public meeting about an FRA saving TCRR is a private company doing project without the use of federal funds. My antenna went up when they said that. And after a challenge the person correct the statement by adding no federal funds at this point. Clearly that 's a misleading and biased statement to the public, we all know that. And it's well documented. TCRR has told the public they will go after USRR tax payers supported federal loans. The FRA has artificially orchestrated a purpose and need that is the need is not valid, but biased by only supporting TCRR's focus on criteria, not the public's interest or safety, and is clearly designed to eliminate the no-build alternative. They also say the no-build will not meet the traffic congestion relief needs. What federal agency with any ethical backbone in the interest of public safety and a strong loving environment for our grandkids would approve placing a HSR two blocks from Leon High School and a couple acre construction site at the same location along the only travel corridor for the school, Highway 79? Young high school kids will be driving on the corridor during the five-years construction. Is the FRA looking out for their safety? The DEIS uses sloppy and unquantifiable rationalization without the date to back it up every time the FRA attempts to compare and convince us why the no build is not the best answer versus a build alternative. There is absolutely no credibility. Thank you.	Refer to BA-6, GN-4, NE-1, NE-9, PN-3, SC-2, SS-1, SS-4 and TR-6.
Berl Bevel	2/5/2018	Oral	Okay. My name is still Berl Bevel. I'm here to talk to you real quick about emergency response time. Texas Central is forcing onto others, to only you, a five-years HSR project but also a large road project. DEIS states in a no-build alternative, where there is no HRS, ER time will remain steady. Any increase due to population growth could be mitigated with more emergency equipment and workforce need as population increases. That impact is qualified without detailed and is categorized in low localized and high levels of negative impact. The focus was mostly high impact. The FRA says there will be mitigation steps that includes detailed modeling of ER times prior to construction after details, design and changes to construction plans would occur if there are delays over ten percent more than based. There will be huge influx of workers and equipment traveling on our roads that are not here today. Particularly those at the construction sites at every major highway corridor from I 45, like highway 79 and 7, and like highway 105. I see nothing in the FRA DEIS that mention the impact of the high-impact temporary work force and equipment trucking increasing traffic on the road with the road modifications. So the public is supposed to accept increases in ER time up to certain levels and they only above that level or Texas Central's construction plans. My summary statement is this; this project is not worth a single loss of precious live as the result of increases in emergency response time. Thank you.	Refer to SS-23 and TR-8.
Berl Bevel	2/6/2018	Handwritten	<p>My name is Dana Bevel. I am a recently retired teacher, the mother of 3 children and live in Roans Prairie. Texas Central-I will not even say railroad, because they're not- wants the house and property my husband I have lived in for almost 20 years and have just a few years left before it is paid off. I am adamantly opposed to this land grab disguised as High-Speed Rail or Bullet Train which cannot or will not even try to prove its viability.</p> <p>Rumor: "We are working closely with Landowners but if they do not want to talk, we will use the court system" , quoted from Holly Reed.</p> <p>Reality: "We're going to do what we want anyway." Helicopters flying low with dangling cameras, SAM survey truck parked directly in front of our house posted with "No Trespassing" SPECIFICALLY for anyone to do with TCP, survey permission request followed by a threat of legal action if we do not sign for permission.</p> <p>Does that sound like "working closely with landowners"? Is that how any of you were treated? How many of you got that nice letter, immediately after the July 4th holiday?</p> <p>On January 10, last year, we received a phone call from our neighbor informing us that a SAM survey truck was parked directly in front of our house. We live on a PRIVATE road and have signs from Texans Against High-Speed Rail prominently displayed, including "Stop the HSR" and "No Trespassing... including those from Texas Central Railway or affiliates and their contractors.. I called the Grimes Co. sheriff's office and explained the situation to the deputy who was sent. The deputy called me back and said there was public access and that he warned them not to cross any fence lines. Who knows if they did? I was disturbed to hear one of them describe what is behind our barn, in detail. He assured me the property owner behind us had given permission to survey. Did he cross our fence? Who knows? No one down our private road has given permission to survey. When I asked about the cameras dangling from helicopters flying over our properties, one of them "assured" me that yes, they could survey that way. Really? When I asked for proof of permission to be there, all that could be shown was a list of roads, including ours, they were assigned to go to. To survey?? Not with permission!! He did not want me</p> <p>My name is Berl Bevel. I am a recently retired ag teacher and my family and I are highly opposed to the high-speed rail.</p> <p>According to a Houston Chronicle article dated 2/7/17 almost a year ago, "Texas Central said they have reached option agreements with</p>	Refer to ED-2, GN-9 and PI-4.

			<p>owners of about 30 percent of the necessary PARCELS in 10 counties."</p> <p>Texas Central said 50 percent of the PARCELS needed in Waller and Grimes counties are covered by the option agreements." The term "parcels" has been thrown around so much and is so misleading to the public, which is just what TCP wants. Several times, ACREAGE has been asked to conveyed, but because the REALITY is that parcels and acreage are different and will "mess up" their image of progress. I also don't believe the general public knows what "options" means.</p> <p>There is so much misleading information being given to the public that is provided by TCRR. Misleading news stories coming across to those who don't know better causing them to think this must be a "done deal". Even last night a friend made the comment on FB that "they are saying it like it's a done deal when they told about the Northwest Mall being the site for the proposed Houston station. Faulty reporting, yes- they haven't fully investigated what they are reporting. But what information pops up when they search.</p> <p>Texas Central.com on Jan. 17th release "The Brazos Valley Station: A High-Speed Connection to Keep Texas Growing" showing its "conceptual design for the desired Roans Prairie station. It lists number of supposed "benefits" for Grimes County:</p> <p>"123 full-time jobs once in operation equivalent to 37% of the county's unemployment base." - Will those jobs even go to true Grimes Co. residents or thos who would move for the jobs?</p> <p>"80,000 estimated number of college students in the service area from A&M, Sam, and Blinn" - How many of those students will actually even be</p> <p>My name is Kamryn Bevel, and like my parents. I am very against this high-speed rail.</p> <p>Grimes County is my home. I have lived my entire life in our house. I do not know another home. My grandparents left where they lived for more than 30 years because of changes around them, but they CHOSE to leave to get away from The Woodlands engulfing them. We will not have a choice. We will lose Our home and all 10 acres Of our land if this high-speed rail goes through.</p> <p>I, like my older brothers, have raised and shown livestock pretty much since I could walk. My parents have helped me to get our barn and wash rack where we want it to be over the last several years. I don't know of many places that have a hot water heater connected to the wash rack like I do, so that that when I wash my pigs and lamb in the winter, it is not so uncomfortable for me or for them. My parents have supported my brothers and me by investing in livestock and livestock shows. These experiences helped them and will help me get scholarships for my college education. Since my parents are retired teachers, they don't have any "extra money" to help find us a new place to live, and we don't want to leave.</p> <p>I wonder how big the classes would get in Anderson-Shiro school when the people that move there to work come. The classrooms are already full, and I don't know of any extra space. It sounds like there would be a whole lot of new kids move into the district. How will we get new teachers and new classrooms? I don't think people who would move here would have time to wait for new classrooms and teachers for their kids.</p> <p>I think high-speed rail is not a smart idea. It sounds like it will just cost a lot of money to build and then only rich people will be able to ride it. I know we could not afford to ride it. And the only reason we would even consider it is to take my pig to the State Fair. I don't think they will allow that.</p> <p>To this high-speed rail, I say NO BUILD.</p>	
Berl Bevel	2/6/2018	Oral	<p>Okay. I am Berl Bevel. I am actually a retired ag teacher. I'm not an engineer. My family and I are highly opposed to this high-speed rail.</p> <p>According to the Houston Chronicle article dated 2/7/17, almost a year ago, Texas Central said they agreed to option agreements with owners of about 30 percent of the necessary parcels in ten counties. Texas Central said 50 percent of the parcels needed in Waller and Grimes Counties are covered by the option agreements. The term parcels has been thrown around so much and is so misleading to the public, which is just what TCP wants. Several times acreage has been asked to be conveyed, but because the reality is the parcels and acreage are different and will mess up their image of progress. I also don't believe the general public knows what options means. There is so much misleading information being given to the public that is provided by TCRR, misleading news stories coming across to those who don't know better, causing them to think this must be a done deal. Even last night a friend made the comment on Facebook and they are saying it like it's a done deal when they told about the Northwest Mall being the site for the proposed Houston station. Faulty reporting, yes, but they haven't fully investigated what they're reporting. But what information pops up when they search? Texascentral.com on January the 17th released the Brazos Valley Station, a high-speed connection to keep Texas growing, showing its conceptual design for the desired Roans Prairie station. It lists numbers of supposed benefits for Grimes County--124 full time jobs once in operation, equivalent to 37 percent of the county's unemployment base. Will those jobs even go to true Grimes County residents, or those who move for the jobs? 80,000 estimated numbers of college students in the service area from A&M, Sam, and Blinn. How many of those students will actually even be able to make use of such a thing at \$199 for a full trip. And how many rich college kids are there really? So more than 1 million total amount invested in Grimes County</p>	Refer to ED-2, GN-2, GN-4, GN-9, NE-1, PI-4, SC-3, SC-4 and SC-8.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

			alone during the project construction, how much will be taken away? Where will it all be? When the project is not viable, any businesses that might spring up around the proposed station will be bankrupt as well because who is going to come to Roans Prairie then. Up to 530,000 expected to increase in property value within a half mile of the station as a result of this construction. Just over half a million dollars isn't really that much money in comparison to the land that will be lost, lives, livelihoods, and destroyed for that much land. As an educator and parent, I am extremely disturbed by the efforts to our children. The DEIS does not have the proper ISD noted for the proposed Roans Prairie station. It is in Anderson-Shiro Consolidated ISD, not Navasota. Anderson, Richards, and Iola are very small and at capacity now. Where will the sudden student population go. Expansion takes time for more teachers and more classrooms. A sudden boom in population is vastly waiting to happen. The effects of the sound of the passing trains on the children and elderly has been shown in studies to cause a myriad of hearing and learning problems and negatively effect students with issues, such as ADD, AHD, autism, and dyslexia. Thank you. The only viable option is no build.	
Berl and Dana Bevel	2/6/2018	Handwritten	<p>As public educators and lifetime residents of Texas, my husband and I purchased our home and 10 acres in Roans prairie, TX in April of 1998. We purchased our home in Roans Prairie although my husband was employed as an Ag teacher in Magnolia, 40 miles away, because of the country atmosphere that is now lacking in Magnolia and being able to get more land to suit our agricultural lifestyle. All three of our children have been active showman for the FFA and our youngest is still showing: pigs, goats, and now turkeys. Through the years we have updated our facilities to accommodate their FFA projects and with our youngest, finally have it set up the way we want it. We have both just retired from education and look forward to paying Off our mortgage in a few years only to be unsure of whether we will even have a home any rmore should this HSR be allowed to go through. The "offer" we were sent for our house and acreage would not allow us to purchase a replacement Of current home facilities even if we desired to leave. Having the HSR outside our window would make our house unlivable. Because we have just retired, there is no way we can "start over"; we have only a few years left to pay on our mortgage. Our home and property are all we have to leave to our children.</p> <p>In 2015, just before We knew we were in the HSR pathway, we had our home renovated with a new roof, siding, windows, and doors and looked forward to starting renovations on the inside. Only upon finishing did we receive our first letter from CLS wanting us to give permission to survey our property for TCR. Only a few days later, my husband was met at the house while getting ready to go out of town by a woman from CLS wanting him to sign a "Permission to Survey" form. Several weeks later, a man with CLS came to our door. We shooed him away, pointing to our "No Trespassing" TAHSR sign on our porch, and he left. Last summer, we were inundated helicopters flying low with dangling equipment over and around Ours and our neighbors' properties. We then received a second "Request to Survef letter from CLS including a threat to be sued should we not give them permission. On February 10\u8226, we were called alerting us to a SAM truck being parked in front of our house with survey equipment. called the sheriffs office, and a deputy was sent. The deputy said they showed him a paper with our private road's name, High Star Lane, and although it isa private road, he stated there is "public access". No criminal activity was taking place but he warned them not to cross onto any property, so no written report was made. The paper he was shown was not permission but a list of places they were instructed to go. A second paper I was shown when asked for proof Of permission was a list of Grimes County roads. It is our profound desire and prayer that you do not allow this destruction of our way of life and the lives Of others and our communities across the State come to be.</p>	Refer to ED-2 and NE-8.
Dana Bevel	1/25/2018	Email	I am lodging an objection to the proposed high-speed rail line between Houston and Dallas for the following reason: Small school in the HSR areas, specifically Grimes County, CANNOT accommodate a massive influx of students expected to occur during the construction phase of the proposed project. This is especially true of the mid-station location in Anderson-Shiro CISD. I have seen nothing to address this issue in anything put out by the FRA or in any entity involved with the HSR project. As an educator and parent, this is an extremely important aspect that will negatively affect not only students in our districts, but those what would potentially be enrolled. Who would provide the money needed to fund bringing in new buildings and teachers for 2-5k new students? The money is not there. Time is not there. I propose the only viable option would be to choose the NO BUILD OPTION in the final Environmental Impact Statement.	Refer to SC-4 and SC-6.
Dana Bevel	1/25/2018	Email	I am lodging an objection to the proposed high-speed rail line between Houston and Dallas for the following reason: RE: 10 Dallas to Houston High-Speed Rail DEIS Appendix D Project Footprint Set 4 of 5, pg. 107/108 Maps released on TCR websites and in this DEIS are very misleading. I know 5 homes in my immediate vicinity in addition to my own that will be taken/demolished due to this proposed project. Maps do not indicate any visual of the homes that are directly under it or what land that will be taken, including our home and 10 acres labeled #4674. using the legend scale, it would be 400' away, however TCP wants our house and all property. The "generous offer" sent to us as they refer to all offers, would not allow for us to purchase what we have now. As retired teachers and the house and property almost paid off, we cannot start over.	Refer to BA-8 and LU-7. Refer to the Land Use map book in Appendix G for identification of specific structures. The Final EIS document does not address specific property/structure acquisitions.
Dana Bevel	1/27/2018	Email	I am lodging an objection to the proposed high-speed rail line between Houston and Dallas for the following reason: The DEIS maps have covered homes, specifically in my area, that would be destroyed by the HSR. The general public is improperly informed	Refer to ED-1 and ED-2.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			and therefor misled about the about the impact of the placing of the proposed HSR. Two of those are owned by women whose husbands have passed away. This is what they were left and all they have. It was their husband's wish that their homes and property be there for them in their absence, something they worked together to acquire and settle for the rest of their lives. They cannot start over. Pretentious "offers" are not what they can live on and acquire what they presently have. The same is true for my family. We cannot start over. This is all we have. I propose the only viable option would be to choose the NO BUILD OPTION in the final Environmental Impact Statement.	
Dana Bevel	1/27/2018	Email	I am lodging an objection to the proposed high-speed rail line between Houston and Dallas for the following reason: The proposed mid-station for the proposed HSR is to be located in the 4-way stop area of Roans Prairie on Hwy 30, a 2-lane road with a few passing lanes. RP is 30 miles from TAMU and SHSU. Increased traffic will be a definite danger in this area and will essentially cancel out the supposed help of increased travel safety between Dallas and Houston. The traffic is IN these cities, not between them! Getting to the stations will make it even worse and increase overall travel time. Traffic to come to the mid-station in RP will make even more traffic struggles, again increasing travel time. The 90 minutes advertised is a blatant advertising scheme to make people think it will lessen travel times when using airlines will be the same or less time overall.	Refer to GN-7, TC-4 and TR-2.
Dana Bevel	1/27/2018	Email	I am lodging an objection to the proposed high-speed rail line between Houston and Dallas for the following reason: The HSR is being touted as if anyone can use this mode of transportation. With released ticket prices of \$199 one-way, the ONLY people able to make use of this will be the "rich" and companies who choose to spend this ridiculous amount of money rather than pay travel with a less expensive means. Public use means any ordinary person will be able to make use of it like electricity and public roads and highways. Eminent Domain should NOT be used for this proposed project. It will only SERVE a very SELECT FEW. College students will not have the means unless they are from wealthy families to make use of the mid-stations, which is 30 MILES from both TAMU and SHSU. The mid-station is NOT in the Brazos Valley like is being portrayed to the uninformed public. I propose the only viable option would be to choose the NO BUILD OPTION in the final Environmental Impact Statement.	Refer to ED-1, GN-7, NE-1, PN-3 and SC-3.
Dana Bevel	1/27/2018	Email	I am lodging an objection to the proposed high-speed rail line between Houston and Dallas for the following reason: Small rural schools in the HSR areas, specifically Grimes County, CANNOT accommodate a massive influx of students expected to occur during the construction phase of the proposed project. This is especially true of the mid-station location in Anderson-Shiro CISD. I have seen nothing to address this issue in anything put out by the FRA or in any entity involved with the HSR project. As an educator and parent, this is an extremely important aspect that will negatively affect not only students in our districts, but those what would potentially be enrolled. Who would provide the money needed to fund bringing in new buildings and teachers for 2-5k new students? The money is not there. Time is not there.	Refer to SC-4 and SC-6.
Dana Bevel	1/27/2018	Email	I am lodging an objection to the proposed high-speed rail line between Houston and Dallas for the following reason: Small rural schools in the HSR areas, specifically Grimes County, CANNOT accommodate a massive influx of students expected to occur during the construction phase of the proposed project. This is especially true of the mid-station location in Anderson-Shiro CISD. I have seen nothing to address this issue in anything put out by the FRA or in any entity involved with the HSR project. As an educator and parent, this is an extremely important aspect that will negatively affect not only students in our districts, but those what would potentially be enrolled. Who would provide the money needed to fund bringing in new buildings and teachers for 2-5k new students? The money is not there. Time is not there.	Refer to SC-4 and SC-6.
Dana Bevel	1/29/2018	Email	I am lodging an objection to the proposed HSR between Houston and Dallas for the following reason: No consideration for properties with historical ties that would be destroyed show that TCP's claim, "It's a landmark project that respects Texas values...it's going to impact the economic well-being of the state," is FALSE advertising. Destroying land granted to families from the State of Texas in the 1800s and destroying cemeteries and burial plots of a Civil War soldier does NOT respect Texas values. The only value being respected is that of the pocketbooks of the TCP and the rich, selfish, bully mentality to get what we want just because we want it. Reason Foundation studies have proven the lack Of Viability Of this project. Families acquisition Of equitable land that was granted cannot be replaced.	Refer to CR-3, CR-4, CR-7, ED-2, GN-3 and SC-19.
Dana Bevel	1/29/2018	Email	I am lodging an objection to the proposed HSR between Houston and Dallas for the following reason: The public has been misled with being told ONLY 3,000 acres will be needed for this proposed Dallas-Houston HSR. According to the FRA report, the Dallas-Houston HSR will buy/condemn 8,000 acres of land. TCR has stated on many occasions they will be/are 'transparent' with all aspects of the proposed project. Months have gone by with no answers to questions. This is not a transparent way of dealing with legitimate questions such as how many ACRES are under contract to clarify the misleading term "parcels" being used to make it look like they have access to more than they do. I propose the only viable option would be to choose the NO BUILD OPTION in the final Environmental Impact Statement.	Refer to LU-9 and LU-14. In this analysis, a parcel represented individual pieces of taxable property. The parcel data was collected from the ten county appraisal districts.
Dana Bevel	2/5/2018	Oral	My name is Dana Bevel and my husband and just recently retired from teaching and we have lived for almost 20 years, almost have it paid off. And now TCR wants our house and we have nowhere to go and we can't start over. This is a lot of information and the more I look at this project and FRA DEIS, the more I am convinced this is nothing more than a land grab profit and a U.S. taxpayer money grab scheme. Many expressed sadness over the FRA releasing this very poorly prepared document for a private company that can't even prove they are a railroad in court. It's unethical and fraudulent. I'm convinced Texas Central knows it's fraudulent and will go bankrupt because they are just a shell	Refer to BA-6, ED-1, GN-2, GN-4, NE-1, PN-3 and PN-4.

Submitted By	Date Submitted	Submission Type	Comment	Response
			company working as a conduit with the Japanese to get the proprietary technology a foothold in the U.S. Also on an issue on the FRA is not a why did you remove from the purpose and need criteria that is stated in the Stage 1 screening for requirement that to prove economic viability; that is the ability to work successfully. Do you think it was fair to force life-changing impact of this project that will forever scar the Texas landscape without require Texas Central to prove economical viability? If Texas Central was so sure about the solvency of this project then why are they not willing to share all of their economic liability numbers, particularly ridership? The public is sacrificing huge amounts so let the public take their numbers apart. What do they have to hide? Texas Central also knows they will be stealing U.S. taxpayer money without reimbursing after bankruptcy, since the Japanese will be the largest controlling creditor and they will get the assets first. The same kind of model was used for 30 percent or more of the ownership, but they will receive it for tens of years of years as the other larger creditors were first in line. This U.S. government total investments up to 49 percent exceptions. The private investors totaling only one percent of the investment will make out like bandits as a result of the station properties that is sold to TCRR. Here's the definition of fraud; fraud is an intentional perversion of truth to induce another to part with some valuable thing belonging to him or to surrender a legal right. Does that sound familiar? Folks this is what FRA is supporting by allowing the non-railroad to utilize the FRA system. It's a clear road map to the destruction of Texas land, land owner families and private property rights, For all of you in opposition, is not an option. FRA and Texas Central we will not stop fighting and we will not give up our land, or taxpayer money to finance your fraudulent deeds. The only option is no build.	
Dana Bevel	2/5/2018	Oral	Still opposed. Talk to you about the road. Texas Central is forcing the public, not only a huge five-year construction project but also a large road construction project resulting in an Increase in county maintenance costs and loss of more private property to a right-of-way. the result will be closed, rerouted or rebuilding existing roads: including now: over the HSR_ We will see a huge increase in congestion: longer travel times: new roads for the county to maintain: icy weather conditions and new congestion around construction sites in non-existent today. More private property will be taken by TxDOT for new roads required for the road changes. Many places will become a public road alongside the HSR_ Either side will be a magnet for workers: raw materials, concrete trucks, equipment: large heavy trucking, vendors and staging areas all along the road in the vicinity of the HSR Yet most of Montgomery County will not receive a penny from any HSR tax money but will see the devastation The FRA must cease any fin-ther premature DEIS progression and show the public a third party view: a quantified impact on traffic: quality of life: community issues and damage to all infrastructure FRA: we cannot allow this quality of life and cost impacts to be a big surprise once you have given Texas Central decision. Other concerns not quantified: impact on housing: where are people going to live? Medical facilities: emergency response time: and a negative impact on small rural schools, ISD's. That's a big one. Small towns: like Richardson: Anderson and lola, they're fill. Where is it going to come from? The FRA must reconsider with hard facts: not qualified comments, the no build alternative. The benefits are for a very few select business people. I call them rich selfish bullies that significantly outweigh by the public at large: loss of life: quality of life: loss of property values: potential loss of life due to longer ER times and the additional costs on the counties and tax payers. Thank you.	Refer to BA-6, GN-1, GN-4, NE-1, NE-9, SC-19, SC-6, SC-7, SC-4, SC-10, PI-1, SS-23, SS-26, SS-1, SS-12, TR-7, TR-8, TR-6 and VA-1.
Dana Bevel	2/5/2018	Oral	My name is Dana Bevel and I am definitely against high speed rail. All of this noise and we asked FRA to (inaudible) the maximum noise level you use in all of their noise analysis. The FRA DEIS incorrectly bases all of its noise using only one noise level in a set of decibels for one train passing by. That's not the maximum. The DEIS failed to use a larger voice legal of two trains passing each other in opposite directions, which is reality. Additional FRA/DEIS failed to disclose a scientific fact of a sound of honking noises as a result of the airflows that are pushed by each train colliding and bouncing between the sides of the trains. This was found after HSR going through tunnels creating the loud popping sound. In children in persistent noise such as that from an HSR train causes impaired reading comprehension and long term memory problems. Noises from elevated trains led to reading to difficult and in academic performance. Noise damage occurs in children from upwards of 80 decibels (inaudible) from HSR is 85. The more often kids are exposed the greater the effect. Even the Japanese recognize the impact of an HSR and is heavily regulated in a residential area. It is not permitted above 70 decibels. Not only children are affected but also the elderly. Children under 13 years of age and has a pre-existing challenges, including ADD, ADHD, autism or dyslexia will be affected. Where is the FRA study on the effect on children's hearing? It's unacceptable not to address this in the DEIS. Thank you	Refer to NV-1, NV-6, NV-7, NV-10 and SC-8.
Dana Bevel	2/6/2018	Oral	And my Tim is Dana Bevel. I'm a recently retired teacher, mother, three children, and living in Roans Prairie. Texas Central, I will not even say railroad because you're not, wants to have the property my husband and I have lived in for almost 20 years and have just a few years left before it is paid off. I am adamantly opposed to this land grab for the high-speed rail or bullet train which cannot alone prove its viability. How can we build our family history? "We are working closely with landowners," quoted from Holly Reed. Helicopters flying low with dangling cameras, a SAM survey truck parked directly in front of our house posted with no trespassing specifically for anyone to do TCP, survey permission requests followed by a threat of legal action if we do not sign for permission--this is not working closely with the landowners. On January 10th last year we received a phone call from our neighbor informing us that a SAM survey truck was parked directly in front of our house. We live on a private road and have signs from Texans Against High-Speed Rail prominently displayed, including "Stop the HSR" and no trespassing with the wording included about those from Texas Central Railway. I called the Grimes County Sheriff's Office and explained the	Refer to GN-1 and NE-8.

			situation to the deputy who was sent. The deputy called me back and said that there was public access and that he warned them not to cross the fence lines, but who knows if they did. I was disturbed to hear one of them describe what is behind our barn in detail. He assured me the property owner behind there had given permission to survey. But didn't cross our fence? Who knows. No one down our private road has given permission to survey. When I asked about the cameras dangling from helicopters flying over our property, one of them assured me that, yes, they could survey that way. Really? When I asked for proof of permission to be there, all they could be shown was a list of roads, including ours, that they were assigned to go to. So survey? Not with permission. He did not want me to take a picture of it because he would get in trouble. Does that sound legit? FRA, I ask, how much of the survey information did you use from illegally-acquired surveys. How much was actually boots-on-the-ground legally-acquired information? Did you even check? If you did, where's the proof? I want to thank Connie Clements for the article she wrote that was published in The Examiner a few weeks comparing the fiasco to the trojan horse, entitled "Trojans, Don't Trust This Horse." FRA, we do not trust this horse. Texas Central, FRA, you have poked the bear. The only viable option is no build.	
Dana Bevel	2/18/2018	Email	I am lodging an objection to the proposed HSR between Houston and Dallas for the following reason: Every meeting held with the FRA was filled with nothing but those opposing HSR. One obviously uninformed college student full of nothing but spouted "propaganda" that has been disproven was the only one to speak in favor at one meeting of two we attended. If this is such a wonderful idea to be ridden by the supposed "ridership" touted by TCR, why wasn't there anyone there to tell their side of the story? Having an additional way to go between two cities with ridiculously expensive prices, the same "issues" of needing a ride on each end of the trip, then taking more than a cheaper flight which is faster and already an option is nothing but irresponsible "toying" with governmental money and agencies and the emotions of thousands of families in the path of destruction when there are much more serious issues to be addressed.	Refer to GN-2, PN-3 and SC-3.
Dana Bevel	2/18/2018	Email	I am lodging an objection to the proposed HSR between Houston and Dallas for the following reason: There should be an immediate halt of the D-H HSR FRA DEIS process due to loss of credibility of what was supposed to be an independent FRA Process but now looks like a "Political Process" with Houston Mayor Turner's interference with the FRA process by when he placed his finger on the scales by choosing the site of the Houston Mall based on politics, prior to the FRA actually making the decision for the Houston Station. He announced it live on local news the site for the proposed Houston location while FRA representatives told us at the Madisonville meeting a site had not yet been decided upon!! It was announced live at 10:30AM and all over the noon, 4:00, 5:00, and 6:00 news! The FRA is being influenced in this process by the Politics of it as proven by Mayor Turner's actions ahead of that by the FRA.	Refer to GN-9.
Dana Bevel	2/18/2018	Email	I am lodging an objection to the proposed HSR between Houston and Dallas for the following reason: Lack of Involvement and Communication by TCR and the FRA with local officials, in particular with law enforcement is unacceptable. Both the Leon County and the Grimes County sheriffs voicing concerns about lack of contact by the HSR folks, this is an important issue of Public Safety and Law Enforcement combined. The Waller County Regional Planning Committee issue has had issues with TXDOT and then we hear of the FRA's instruction to them not to work with local entities. Why? The only viable option is NO BUILD in the final EIS.	Refer to PI-1.
Dana Bevel	2/18/2018	Email	I am lodging an objection to the proposed Dallas-Houston HSR for the following reason: During the time of the proposed construction, emergency response time will be severely impacted. Moments count during every emergency, many with the loss of life with minutes to spare. Dangers due to heavy construction materials and equipment along with detours and lack of availability of roads will severely impede traffic not only for emergency workers but everyday drivers including young drivers. Construction right next to Leon High School in Leon County, full of young is nothing short of irresponsible responsibility on the part of any entity involved in the construction of the proposed HSR including the FRA. Your studies have NOT addressed this situation.	Refer to SC-2, SS-23 and TR-6.
Dana Bevel	2/18/2018	Email	I am lodging an objection to the proposed hsr line between Houston and Dallas for the following reason: Estimated ridership numbers from TCP have not been quantified. Numbers suggested by the TCP are unrealistic and will only result in the failure of an hsr line succeeding between Dallas and Houston. This failure will result in the failure of this proposed line and hanging the burden on taxpayers. The failure will result in a foreign entity owning 8,000 acres of prime farm and ranch land in Texas which will be rendered useless by the destruction made by this preposterous "experiment"	Refer to GN-2 and NE-1.
Dana Bevel	2/18/2018	Email	I am lodging an objection to the proposed hsr line between Houston and Dallas for the following reason: Estimated ridership numbers from TCP have not been quantified. Dana Bevel	2/18/2018	Website	I am lodging an objection to the proposed HSR between Houston and Dallas for the following reason: Pipeline experts say they are very concerned about the mitigation of vibration damages to pipelines running near the proposed tracks. Stress waves created by the vibration results in dynamic stress (fatigue) on pipelines, causing misalignment, and damage such as crack propagation, which can result in the failure of the pipeline. Since you, the FRA, completely left FERC and PHMSA off the 2 1/2 year planning process this is a grave concern for public safety. The only viable option is to choose NO BUILD in final EIS.	Refer to NV-5.
Dana Bevel	2/18/2018	Website	I am lodging an objection to the proposed HSR between Houston and Dallas for the following reason: Compare the two maps from 2012 and 2032 from TXDOT. The route in between Houston and Dallas on I-45 is pretty much the same during peak travel times. The congestion is IN and AROUND the cities. The bullet train will do NOTHING to relieve this. I am a teacher and even I know this will not solve the problems within the cities. Traveling along I-45 is not an issue. The only viable option is to choose NO BUILD in the final EIS.	Refer to PN-3.
Dana Bevel	2/18/2018	Website	Pipeline experts say they are very concerned about the mitigation of vibration damages to pipelines running near the proposed tracks. Stress waves created by the vibration results in dynamic stress (fatigue) on pipelines, causing misalignment, and damage such as crack propagation, which can result in the failure of the pipeline. Since you, the FRA, completely left FERC and PHMSA off the 2 1/2 year planning process this is a grave concern for public safety	Refer to EU-1, EU-2 and NV-5.
Dana Bevel	3/8/2018	Website	I am lodging an objection to the proposed HSR line between Houston & Dallas for the following reason: Local entities were NOT involved in ANY part of the planning process regarding the line by ANYONE associated with HSR including TCR, TXDOT, or the FRA prior to 2/13/18. Only AFTER a coalition was formed to address public safety, emergency response input/planning to address these issues of which planners must have immediate knowledge to make it work. Even one minute of delayed response time during an emergency can have DIRE negative consequences, and the present plans are endangering the lives of every resident of every county. The only viable option is NO BUILD.	Refer to PI-1, SS-18 and SS-23.
Dana Bevel	3/8/2018	Website	I am lodging an objection to the proposed HSR line between Houston & Dallas for the following reason: A parcel is a false measurement. TCR has been advertising to the public it has 30% of PARCELS under contract FOR OVER A YEAR yet continues to lie to the public that it is making headway causing a FALSE belief that this is a "done deal". Miles of Land Under Track is the only way to accurately measure TCR's "desired	Refer to BA-6, ED-2 and NE-1.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
			goal. A parcel can be a single 60' wide lot in a subdivision or 5280' across somebody's Property. They have NO More than 20% of the land that is required to build this HSR, the owners of the rest won't even let TCR on the property to Survey. The only viable option is NO BUILD.	
Dana Bevel	3/8/2018	Website	I am lodging an objection to the proposed HSR line between Houston & Dallas for the following reason: There are MANY errors and omissions in the FRA DEIS. But a HUGE one IS THE SUBJECT OF FALSE CLAIMS BY TEXAS CENTRAL, EVEN IN THE DEIS, regarding STATE SALES TAX Revenue from ticket sales. Texas Central has claimed and has falsely communicated to the FRA that the State will be collecting from \$15B-\$39B of sales tax from TICKET SALES. The State of Texas DOES NOT COLLECT SALES TAX ON TRANSPORTATION entities such as RRs. So there is NO SALES TAX MONEY GOING BACK TO THE STATE OF TEXAS OR COUNTIES. There will exist Property Tax for the Sliver of land Texas Central will have purchased, but that is it. THEIR FALSE SALES TAX CLAIM TO THE PUBLIC AND TO THE FRA IN A US GOVT DEIS DOCUMENT IS FALSE. The only viable option is NO BUILD.	Refer to SC-3.
Dana Bevel	3/8/2018	Website	I am lodging an objection to the proposed HSR line between Houston & Dallas for the following reason: Drayton McLane's, chairman of TC, quote of \$16B Project is FALSE. The FRA DEIS states the cost is \$18B in today's dollars. TXDOT has estimated \$18B. The Reason Foundation, a third party think tank, estimates a cost of over \$20B. Did you approve the CA boondoggle? "The California High-Speed Rail project is arguably state's most controversial big public-infrastructure project. The fact that the train's projected cost has mushroomed from approximately \$40 billion when voters first approved the project in 2008 to about \$64 billion in 2016." And will Texas even have an option to vote? The only viable option is NO BUILD.	Refer to BA-6, GN-3, GN-4, NE-1, PI-1 and SC-22.
Dana Bevel	3/8/2018	Website	I am lodging an objection to the proposed HSR line between Houston & Dallas for the following reason: Minimal Impact on Landowners is FALSE. There is a huge negative impact on Emergency Response as explained in the DEIS, particularly during Construction of the HSR which goes on for at least 5 Years. The only VIABLE option is NO BUILD.	Refer to SS-23. Although the total construction phase for the project is expected to last several years, construction on any individual roadway would be much shorter in duration allowing for a phased approach to road modifications within a particular jurisdiction.
Dana Bevel	3/8/2018	Website	I am lodging an objection to the proposed HSR line between Houston & Dallas for the following reason: Minimal Impact on Landowners is FALSE. Due to all of the road modifications, there will exist 126 mile of access road alongside the HSR that will later be turned over to the COUNTIES for MAINTENANCE FOREVER and it will become a public road. Livestock will NOT be allowed to simply wander All Over a public road, so those roads will have to be FENCED Off. The Landowner will NOT be able to "Freely" run cattle nor move equipment as has been FALSELY ADVERTISED by Texas Central. The only VIABLE option is NO BUILD.	Refer to LU-11, TR-7 and TR-8.
Dana Bevel	3/8/2018	Website	Minimal Impact on Landowners is FALSE. Due to all of the road modifications, there will exist 126 mile of access road alongside the HSR that will later be turned over to the COUNTIES for MAINTENANCE FOREVER and it will become a public road. Livestock will NOT be allowed to simply wander All Over a public road, so those roads will have to be FENCED Off. The Landowner will NOT be able to "Freely" run cattle nor move equipment as has been FALSELY ADVERTISED by Texas Central.	Refer to LU-11 and TR-7.
Dana Bevel	3/8/2018	Website	I am lodging an objection to the proposed HSR line between Houston & Dallas for the following reason: Landowners, including myself, have repeatedly been threatened by Texas Central with Lawsuits and application of Eminent Domain (ED) Condemnation while NOT EVER being able to prove they have ED. Their claim on ED is FALSE as they never fulfilled the Texas State Statutes on this subject but simply advocates they have it based only on the fact that TRUE RR are considered a common carrier. Where are their tracks? Rolling equipment? Stations? etc. TODAY? Texas Central LOST the House Estate Court Case in Harris County where the issue of a RR and the authority of the right to survey was Fully Vetted. The COURT RULED Texas Central was NOT an "Operating RR", therefore did NOT possess the Right To Survey the House Estate. If Texas Central is not an Operating RR, then they certainly DO NOT POSSESS ED. Texas Central is using this "hammer" over the heads of ALL Landowners across the 240 mile Route. The ONLY VIABLE option is NO BUILD.	Refer to BA-6, ED-1, ED-2 and NE-8.
Dana Bevel	3/8/2018	Website	I am lodging an objection to the proposed HSR line between Houston & Dallas for the following reason: NO NOISE is FALSE. The DEIS Noise Calculations are Fatally Flawed. Texas Central & the FRA inaccurately calculated NOISE from the HSR in 3 independent INCORRECT component calculation. They never used 205 mph speed-only 125-175 mp-in their noise measurements. They ONLY assumed ONE train passing where there are TWO ADJACENT tracks with trains running in opposite directions every 15 minutes. They omitted the Scientifically Prove "Slapping Sound" when two trains are running on adjacent tracks in opposite directions. Japanese Trains are restricted to 70 dba in all residential areas; this HSR is estimated for one train to produce 87 dba. It has been proven that repeated sound of HSR causes learning difficulties in children and the DEIS shows the HSR going by many schools including within 2 blocks of a high school in Leon County along with a 150 acre Construction site also at that location. Due to the train being elevated on both berms and viaduct for much of the route, the sound will also travel much further than ANY of Texas Central's noise figure claims. The huge electric motors driving the train will produce a very loud whining high-pitched sound. Motor-to-rail is similar to steel-on-steel like any train that takes the electric motor energy down to the rail through the wheels. The ONLY VIABLE option is NO BUILD.	Refer to NV-1, NV-6, NV-7 and NV-10.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Dana Bevel	3/8/2018	Website	I am lodging an objection to the proposed HSR line between Houston & Dallas for the following reason: Here is a bid lie that Texas Central has been telling the public."For the first time ever in the United States, we're proposing to build this high-speed rail privately. No government money is to be invested in this," McLane said. "This is to show what can be done by the private sector." TC has announced ALL ALONG they WILL seek ALL potential funding available. To DATE, Texas Central has only raised only 1% of the required investment through private investors. TC plans to get 50-65% from Japanese Entities. TC stated they will ask for US TAXPAYER FUNDED GOVERNMENT RAILROAD LOANS. This will be in the amount of at least ONE THIRD of the funding required AND it could be increased to up to 49% with approved exceptions by the US government. THAT IS US TAXPAYER FUNDING, NOT PRIVATE FUNDING. Yet another lie touted by Texas Central. The ONLY VIABLE option is NO BUILD.	Refer to BA-6, GN-4 and NE-1.
Dana Bevel	3/8/2018	Website	I am lodging an objection to the proposed HSR line between Houston & Dallas for the following reason: Another example of misleading and incorrect information being spread by Texas Central itself: "The concept is that, starting at 6:30 a.m. until 9 p.m., a train will leave Dallas every 30 minutes," McLane said. "It will take 70 minutes to go from downtown Dallas to downtown Houston." Texas Central is on the written record saying the trip itself would take 90 minutes. A very quick 10 minutes from the NW MALL to downtown would make for a 60 minute train trip. There is no way Texas Central would be advertising a 90-minute trip if it were ONLY ONE HOUR. The ONLY VIABLE option is NO BUILD.	Refer to BA-6 and TC-4. Additionally, the Final EIS notes that the trip from terminal station to terminal station will take 90 minutes. This trip duration would hold true for express service (does not stop at the Brazos Valley Station) and for service that does stop at the Brazos Valley Station. Additionally, there are no terminal stations in downtown Houston, so a rider needing to reach downtown Houston would need to take another form of transportation to reach their destination. Any additional form of transportation is not included in the 90-minute travel time discussed in the Final EIS.
Dana Bevel	3/8/2018	Website	I am lodging an objection to the proposed HSR line between Houston & Dallas for the following reason: "A student can live in Dallas and, in 30 minutes, be in College Station," McLane (TC Chairman) said. Roans Prairie, the mid-stop, is 30 minutes from College Station AND Huntsville from Dallas to the mid-stop is around 180 miles. His numbers are WRONG. The public is being told a student from TAMU/SHSU can be in Houston or Dallas in 30 min. It will take 30 min. to get to Roans Prairie from either location. Students are being led to believe they can just jump on the train and go take care of aspects of their studies in a much shorter time that will actually be able to happen. Not to mention, how much will it cost? How many college students will even be able to afford it? There are buses being advertised from college campuses to Houston and Dallas for much less not to mention the luxury bus services available between Houston and Dallas. And flying is cheaper and faster. The ONLY VIABLE option is NO BUILD.	Refer to BA-4, BA-12, PN-3, SC-3 and TR-2.
Dana Bevel	3/9/2018	Website	I am lodging an objection to the proposed HSR line between Houston & Dallas for the following reason: THE FRA SHOULD START OVER WITH THE PUBLIC COMMENTS HEARINGS WITH AN EXTENDED DEIS COMMENTS PERIOD. HARRIS COUNTY WAS GIVE 2 MEETINGS INCLUDING ONE THAT WAS GIVEN ON A SINGLE NIGHT. THERE WAS BLATANT DISCRIMINATION SCHEDULING 2 MEETINGS A NIGHT AND ADVERTISING 10 MEETINGS WHEN IN FACT THERE WERE ONLY 5 MEETINGS THAT WERE SPLIT PREVENTING THOSE OPPOSED OR EVEN FOR THIS PROPOSED. NEGLECTING TO BOOK THE ORIGINALLY ADVERTISED MUCH LARGER VENUE FOR THE MADISON CO. MTG WAS ANOTHER ISSUE ON YOUR PART, ASSUMING ONLY A FEW WOULD SHOW UP. THIS MAKES THE FRA JUST AS MISLEADING AND UNETHICAL AS TEXAS CENTRAL HAS BEEN WITH THE KIND OF BLATANTLY INACCURATE INFO THEY HAVE CHOSEN TO SHARE WITH THE MEDIA AND PUBLIC. 1. MORE MEETINGS 2. EXTENDED 5,000 PP OF DEIS REVIEW/COMMENT TIME 3. ADMIT NOW THIS PROPOSED PROJECT IS NOT VIABLE The ONLY VIABLE option is NO BUILD.	Refer to GN-4, NE-1, PI-3, PI-8, PI-10 and PI-11.
Kamryn Bevel	2/6/2018	Oral	My name is Kamryn Bevel and, like my parents, I am very against this high-speed rail. Roans Prairie is my home. I have lived my entire life in our house. I do not know another home. My grandparents left where they lived for more than 30 years because of changes around them, but they chose to leave to get away from The Woodlands engulfing them. We will not have a choice. I will lose our home and all 10 acres of our land if this high-speed rail goes through. I, like my older brothers, have raised and shown livestock pretty much since I could walk. My parents have helped me to get our barn and wash rack where we want it to be over the last several years. I don't know of many places that have a hot water heater connected to the wash rack like I do, so that when I wash my pigs and lamb in the winter it is not so uncomfortable for me or them. My parents have supported my brothers and me by investing in livestock and livestock shows. These experiences helped them and will help me get scholarships for my college education. Since my parents are retired teachers, they don't have any extra money to help find us a new place to live, and we don't want to leave. I wonder how big the classes would get in Anderson-Shiro school when the people that move there to work come. The classrooms are already full, and I don't know of any extra space. It sounds like there would be a whole lot of new kids moving into the district. How will we get new teachers and new classrooms? I don't think people who would move here would have time to wait for new classrooms and teachers for their kids. I think high-speed rail is not a smart idea. It sounds like it will just cost a lot of money to build and then only rich people will be able to ride it. I know we could not afford to ride it. And the only reason we would even consider it is to take my pig to the State Fair. I don't think they will allow that. To this high-speed rail, I say no build.	Refer to ED-2, GN-4, LU-7, LU-11, SC-3, SC-4, SC-6 and SC-8.

Mary Bevel	1/30/2018	Email	I am a Dallasite, and I am very excited about this rail! I have many friends and family in Houston and I would love to visit them without having to drive for 4 hours down 45. This is going to cut down on time and be great for the environment and congestive highways. I look forward to using the train often!	Comment noted.
Mary Bevel	3/9/2018	Website	I am supportive of this project as it provides an alternative to using the congested highways. As a person who drives to Houston from Dallas frequently, I would love the option of using the rail. In addition, it helps the North Texas region reach the Federally mandated air attainment goals. Further, the economic benefit for the State of Texas is great. Please approve the environmental study and allow the project to proceed.	Comment noted.
Berl Bevel	2/6/2018	Handwritten	<p>My name is Berl Bevel. I am a recently retired ag teacher and my family and I are highly opposed to the high-speed rail.</p> <p>According to a Houston Chronicle article dated 2/7 /17 almost a year ago, "Texas Central said they have reached option agreements with owners of about 30 percent of the necessary PARCELS in 10 counties."</p> <p>Texas Central said 50 percent of the PARCELS needed in Waller and Grimes counties are covered by the option agreements."</p> <p>The term "parcels" has been thrown around so much and is so misleading to the public, which is just what TCP wants. Several times, ACREAGE has been asked to conveyed, but because the REALITY is that parcels and acreage are different and will "mess up" their image of progress. I also don't believe the general public knows what "options" means.</p> <p>There is so much misleading information being given to the public that is provided by TCRR. Misleading news stories coming across to those who don't know better causing them to think this must be a "done deal". Even last night a friend made the comment on FB that "they are saying it like it's a done deal when they told about the Northwest Mall being the site for the proposed Houston station. Faulty reporting, yes- they haven't fully investigated what they are reporting. But what information pops up when they search.</p> <p>Texas Central.com on Jan. 17th released "The Brazos Valley Station: A High-Speed Connection to Keep Texas Growing" showing its "conceptual" design for the desired Roans Prairie station. It lists number of supposed "benefits" for Grimes County:</p> <p>"124 full-time jobs once in operation equivalent to 37% of the county's unemployment base."-Will those jobs even go to true Grimes Co. residents or those who would move for the jobs?</p> <p>"80,000 estimated number of college students in the service area from A&M, Sam, and Blinn"-How many of those students will actually even be able to afford it?</p>	<p>Refer to GN-9.</p> <p>The Dallas to Houston HSR Project is a privately financed project. FRA's evaluation of the Project is based off of making a safety determination on its operation. Claims made in marketing or promotional materials of a private company are not the purview of NEPA analysis. Section 3.14.5.2.3, Socioeconomic and Community Facilities, Economic Impacts includes an estimation of permanent employment and earnings impacts. The project would create direct employment in the intermediate counties at Maintenance of Way Facilities and the Brazos Valley Station. Some indirect growth in supporting industries is also expected (See Table 3.14-20: Direct Employment and Earnings Impacts and Table 3.14-21: Permanent Employment Impacts in the Final EIS). While some of the station area employment may require specialized training, much of the anticipated job growth would not. Ticketing agents, security personnel, grounds keeping and maintenance positions as well as employment growth in supporting industries or adjacent hospitality services could largely be filled from the existing unemployed labor pool. TCRR's ticket prices are expected to use dynamic pricing, such that lower fares may be available for travelers who can purchase in advance or who have the flexibility to travel during lower demand times.</p>
Dana Bevel	2/6/2018	Handwritten	<p>My name is Dana Bevel. I am a recently retired teacher, the mother of 3 children and live in Roans Prairie. Texas Central-I will not even say railroad, because they're not--- wants the house and property my husband I have lived in for almost 20 years and have just a few years left before it is paid off. I am adamantly opposed to this land grab disguised as High-Speed Rail or Bullet Train which cannot or will not even try to prove its viability.</p> <p>Rumor: "We are working closely with Landowners but if they do not want to talk, we will use the court system", quoted from Holly Reed.</p> <p>Reality: "We're going to do what we want anyway." Helicopters flying low with dangling cameras, SAM survey truck parked directly in front of our house posted with "No Trespassing" SPECIFICALLY for anyone to do with TCP, survey permission request followed by a threat of legal action if we do not sign for permission.</p> <p>Does that sound like "working closely with landowners"? Is that how any of you were treated? How many of you got that nice letter, immediately after the July 4th holiday?</p> <p>On January 10, last year, we received a phone call from our neighbor informing us that a SAM survey truck was parked directly in front of our house. We live on a PRIVATE road and have signs from Texans Against High-Speed Rail prominently displayed, including "Stop the HSR" and "No Trespassing ... including those from Texas Central Railway or affiliates and their contractors ... " I called the Grimes Co. sheriff's office and explained the situation to the deputy who was sent. The deputy called me back and said there was public access and that he warned them not to cross any fence lines. Who knows if they did? I was disturbed to hear one of them describe what is behind our barn, in detail. He assured me the property owner behind us had given permission to survey. Did he cross our fence? Who knows? No one down our private road has given permission to survey. When I asked about the cameras dangling from helicopters flying over our properties, one of them "assured" me that yes, they could survey that way. Really? When I asked for proof of permission to be there, all that could be shown was a list of roads, including ours, they were assigned to go to. To survey?? Not with permission!! He did not want me</p>	Refer to ED-2, GN-9 and PI-4
Sal Bhakta	1/11/2018	Website	I would like for the Houston to Dallas speed rail to be built.	Comment noted.
Gloria Bice	1/25/2018	Email	Will there be one to and from Austin to Houston?	Refer to BA-2.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
Robert Biehl	3/9/2018	Website	I think this is a great project. It will advance the economic environment in Texas. It will also reduce emissions along the Dallas to Houston corridor. Build it!	Comment noted.
James Bierd	2/7/2018	Website	Time is right for Texas to step up to the 21 Century and start a transportation system. No matter which route is selected, someone will not like it. We need to think more globally instead of concerning ourselves with a small piece of land that has very little value and no improvements on it. The highways between Dallas and Houston are not capable of handling future population needs. Please approve this construction.	Comment noted.
James Bierd	3/8/2018	Website	I have lived in Texas for the past twenty years and the public transportation has a lot to be desired. After living in the Chicago area, Texas is still in the 19th Century. Cars are used for all personal transportation needs and with the highways still at the 1980's size, we are at a standstill night and day. Progress is slow on highway expansion with toll roads the only capacity improvement we see. Please approve this project which will benefit all Texans!	Comment noted.
Joash Bijusam	3/9/2018	Website	I would love for the bullet train to come to Texas. It will transform the economy of not only Dallas and Houston, but the state of Texas as a whole. It will allow both cities to continue to grow and also for highways and roads to be less congested as people are given an alternative to travel. This is a key infrastructure project that must take place if the United States wants to continue to lead the world in the best infrastructure. While the rest of the civilized world has high speed trains connecting one city to another the United States lacks this. Through this privately funded high speed train, the United States will help create countless jobs and also lead the way into the future.	Comment noted.
Morgan F Bilbo	1/30/2018	Email	My only comment is simple: When people complain about where the track will be laid, can't you figure a way to get around it? i.e. Use an old vehicle road where possible or such. I'm oversimplifying this. But it seems that a lot of people are "against" the train. But I assure you that after it's built, those people will be using it. And personally, I am for the train. Just that I hate to antagonize people. And you should make sure you satisfy the complaints. Assuming the complaint is legitimate. The weird people should keep their mouths shut. "Keep your wheels on the rails"!	Refer to BA-8 and TC-3. TCRR has attempted to minimize the footprint and impacts associated with the Project by using viaduct and locating their alignments adjacent to existing roadways, freight lines and other infrastructure. Unfortunately, it is not possible to avoid all of the impacts along a 240-mile corridor.
Keith Bilbrey	2/16/2018	Website	I am very pro the High-Speed Rail between Dallas and Houston. This is a transportation option that is important to the state and to our region.	Comment noted.
Paul Bilyeu	2/6/2018	Website	To whom it may concern, If this high speed rail project now, or at any point in the future, uses any of the following to start, build or complete this project: 1. Taxpayer monies 2. Taxpayer funded loans 3. Public right of ways without Texas Central legally purchasing this land at auction 4. Eminent domain to seize private land Then Texas Central Rail should be placed in a no build status. You cannot have a "Private" company using public funds or government backed land seizures and call it "Private". As a candidate for Texas State House of Representatives District 135, through which this train is routed, if elected, I will oppose this with everything I have at the state level. Additionally, we own a home that sits right next to the proposed track along 290 (Lot 7894-Project Footprint Segment 5 Sheet 510). We have seen no proposal to either purchase this lot by Texas Central or compensate us for lost value which will 100% occur. The viaduct and its associated electrical lines will be an eyesore immediately outside our backyard and above any sound barrier walls that can be built. The noise, vibration, degraded visual aesthetic and high speed trains traveling past, above any wall, every 15-30 minutes from 5:30AM to 11:30PM will absolutely ruin our property value with no plans to compensate us for it. I would challenge any employee of Texas Central Rail and the Federal Railroad Administration to look at this proposed alignment, review the position of my particular home (and all others in my neighborhood and all homes impacted along the proposed corridor) and ask yourselves how you would feel if something similar happened to you. If a single one of you says or implies you would welcome it, you are simply liars.	Refer to ED-1, ED-2, GN-4 and VA-1. The parcel referenced in this comment is located outside of the limits of disturbance of the project, and south of the existing Union Pacific rail line, and therefore would not be directly impacted by the project. Additionally, as detailed in Section 3.13.3, Land Use, Methodology , as this property, or access to this property would not be directly impacted by the project, it is anticipated that it would not be acquired by TCRR. As detailed within Section 2.2.5, Alternatives Considered, Proposed HSR Operations , it is assumed that trains would run every 30 minutes during peak hours and every hour during off-peak times, with 6 hours reserved each night for maintenance and inspection of the system.
Joe Bingham	1/11/2018	Email	Stop wasting time, build it Now. It should have been done years ago.	Comment noted.
Joe Bingham	2/26/2018	Website	To who it may concern, As a life long Texas resident since birth of 70 years ago I have wandered on number of occasions why nothing had done in regards to building a multi-city hi-speed rail system with the State of Texas. It is my belief that such a people moving system would benefit the areas served greatly and should have been done 20 / 25 plus years ago. The Dallas / Houston routing should be just the beginning. I would like to see all Texas metropolitans connected within my life time. Regards, Joe Bingham 832-904-3002	Comment noted.
Brad Birdwell	2/8/2018	Website	I strongly oppose the construction of a high speed rail line from Houston to Dallas. I believe that using the power of eminent domain for private use is illegal. I strongly disagree with using public funds to support a private endeavor that will compete with private air travel is WRONG. If the private company can get it done using their own money then i would have no disagreement with allowing them to proceed with construction.	Refer to ED-1, GN-4 and PN-3.

Jerold Birkinshaw	2/16/2018	Website	To whom it may concern: I'll be brief and to the point. For every positive reason cited by its developers Texas needs this high-speed rail system between Houston and Dallas. Additionally, Texas needs a high-speed rail system of this proposed design between Houston and San Antonio, and between San Antonio and Dallas. Furthermore our nation needs multiple high-speed rail systems of this design, or a near equivalent, between all major cities in the USA. The time has come for people to get out of their cars when commuting between metro areas. We need this train. Please approve it. Respectfully, Jerold Birkinshaw Spring, TX 77388	Comment noted.
Sara Bissig	1/25/2018	Website	More public transportation in Texas!! Fewer cars = less pollution and traffic.	Comment noted.
Bistone Municipal Water District	2/27/2018	Letter	Mr. Wright, Please find, enclosed, the Resolution opposing the Texas Central Railroad's High-Speed Rail project that was considered and approved by the Bistone Municipal Water Supply District Board of Directors at the last scheduled meeting on RESOLUTION STATE OF TEXAS COUNTY OF LIMESTONE WHEREAS, the Texas Central Railroad's High-Speed Rail project has proposed a route between Dallas and Houston which would directly affect Limestone County property holders, WHEREAS, private property interests would be drastically and negatively affected by the exercise of eminent domain authority, and WHEREAS, farm and ranchland would be divided, and the value of land substantially decreased, and WHEREAS, the proposed high-speed rail would result in substantial detriment to Limestone County citizens and property owners, and WHEREAS, the proposed high-speed rail would be a private venture potentially subsidized by funds from taxpayers, and WHEREAS, serious questions have been raised about the cost estimates and the ridership estimates for the proposed railway, WHEREAS, the District has concerns that were not addressed in the Environmental Impact Statement published in the Federal Register on December 22, 2017. WHEREAS, the High-Speed Rail project will compromise our stated mission to provide a source of water supply for municipal, domestic, and industrial uses and processing and transporting the same. What will be the effects of the vibrations of the trains passing at 200 mph in close proximity to our water wells? What will the vibrations of the trains going by at 200 mph do to the District's water mains? What will the costs be if the District has to do additional construction in the area? If relocation is necessary for some of the District's water well locations, what will the land owners attitude be about working with the District. NOW, THEREFORE, BE IT RESOLVED, that the Bistone Municipal Water Supply District Board of Directors opposes the high-speed railway process and urges the State of Texas and the federal government to halt support for and approval of the project unless and until it can be proved that there would be no negative impact on the Bistone Municipal Water Supply District, and that no public funds would be at risk to subsidize the project. What will be the effects of the vibrations of the trains passing at 200 mph in close proximity to our water wells? What will the vibrations of the trains going by at 200 mph do to the District's water mains? What will the costs be if the District has to do additional construction in the area? If relocation is necessary for some of the District's water well locations, what will the land owners attitude be about working with the District.	Refer to ED-1, EU-2, GN-2, GN-4, LU-3, LU-11, NV-5, PI-1, VA-1 and WW-6.
Jim Blackburn	3/2/2018	Email	Our quality of life will be adversely impacted from the noise and vibration impacts to our persons and our property. There have been no objective studies conducted or released to the public that determine/document the adverse impact of the train's vibration on our water well and septic systems or on the structural integrity Of our home and shop.	Refer to NV-1. Train vibration levels will be well below the threshold for damage to structures, including underground utilities. For construction in close proximity to utilities, mitigation measures (e.g. encasing pipelines) will be implemented as needed to avoid damage.
Jim Blackburn	3/2/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. Our quality of life will be adversely impacted from the inconvenience of the disruption from the construction (road closures: Emergency response time) and from road deterioration that will result from the heavy equipment traveling on our roads. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to SS-23, TR-6 and TR-7.
Jim Blackburn	3/2/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. The Texas Central Partners (TCP) preferred route will adversely impact the ability for emergency services to get to us in a timely manner, as these vehicles must travel through Waller County to get to our property. A slower response time for EMS and law enforcement will put us and our property at risk. I propose that the only reasonable choice in the final environmental Impact Statement would be the NO BUILD option.	Refer to SS-23.
Jim Blackburn	3/2/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. The Texas Central Partners (TCP) preferred route will adversely impact the ability for emergency services to get to us in a timely manner, as the route bisects Grimes County. A slower response time for EMS and law enforcement will put us and our property at risk. I propose that the only reasonable choice in the final Environmental Impact Statement would be the NO BUILD option.	Refer to SS-23.
Jim Blackburn	3/2/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. Waller County transportation and traffic problems will be worsened, whether the track is at grade or is elevated. There are already dangerous traffic incidents and tax payer inconvenience from existing traffic issues and road conditions. The HS Rail project will only make these situations worse, would further increase response times for emergency services, and would adversely impact school bus routes and travel times for students: closure of FM 1774 between	Refer to SC-7 and SS-23.

			Plantersville and Anderson (Grimes County): FM 1488 (Waller): Riley Road (Waller and Grimes): and many more. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	
Jim Blackburn	3/2/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. Grimes County transportation and traffic problems will be worsened, whether the track is at grade or is elevated. There are already dangerous traffic incidents and tax payer inconvenience from existing traffic issues and road conditions. The HS Rail project will only make these situations worse, would further increase response times for emergency services, and would adversely impact school bus routes and travel times for students: closure of FM 1774 between Plantersville and Anderson (Grimes County): FM 1488 (Waller): Riley Road (Waller and Grimes): and many more. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to SC-7 and TR-8.
Jim Blackburn	3/2/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. This area experienced flooding in April 2016, May 2016 and August 2017 (Hurricane Harvey). A construction project of this magnitude will harm Grimes County's ability to adequately provide remediation and protection from floods and the resultant destruction to roads and property. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD	Refer to FP-1, SS-17, WW-1 and WW-2.
Jim Blackburn	3/2/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. This area experienced flooding in April 2016, May 2016 and August 2017 (Hurricane Harvey). A construction project of this magnitude will harm Waller County's ability to adequately provide remediation and protection from floods and the resultant destruction to roads and property. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to FP-1, SS-17, WW-1 and WW-2.
Jim Blackburn	3/2/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. There will be a Public Safety risk from the increased traffic and movement of construction materials: from interference with Natural Gas and other pipelines. These and other hazards have not been addressed, thereby putting public safety in Jeopardy. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to EU-2 and TR-6.
Jim Blackburn	3/2/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. The Need and Purpose for this HS Rail project has not been addressed or demonstrated. Objective financial reviews, Such as by the Reason Foundation, conclude that the project is not economically viable: that ridership will not match the number of people who currently fly between Houston and Dallas; that the project would lose hundreds of millions of dollars PER YEAR: and that tax payer dollars would be required. Amtrac does not generate positive cash flow and there is no proof that this boondoggle would either. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to BA-6, BA-12, GN-2, GN-3, GN-4, NE-1 and PN-3.
Jim Blackburn	3/2/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. Passenger rail is not a forward thinking method to reduce traffic. The traffic congestion is within the Houston area, not between Dallas and Houston. Furthermore, the population density does not support passenger rail. It would be completely illogical to base a multi-billion dollar transportation project on the belief that Texans, with the high number Of vehicles per capita (because of insufficient population density), would give up our vehicles in droves, Just to ride an expensive, inconvenient passenger rail. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to GN-4 and PN-3.
Jim Blackburn	3/2/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. The DEIS is supposed to be an objective review of 20+ points of "environmental/social impact." Yet, it is our understanding is that FRA used data from Texas Central Partners (TCP) that was obtained from illegal surveys. Illegal surveys taint the entire DEIS, and no conclusions should be drawn from illegal surveys. Furthermore, the DEIS merely affirms TCPs preferred route, rather than provide an objective review of other routes: ie: along the I-45 transportation corridor. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to BA-8, BA-9, GN-1, NE-1 and NE-8.
Jim Blackburn	3/2/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. There is strong evidence to suggest that Texas Central Partners (TCP) and/or the Federal Railroad Administration (FRA) did not coordinate the DEIS effort with the local Grimes and Waller County governments, which is a violation of federal/state law and/or Statute. As a result, the DEIS should be considered invalid, until and unless there is coordination with the local governments. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to PI-1.
Jim Blackburn	3/2/2018	Website	I object to the proposed High Speed (HS) rail line between Houston and Dallas. There will be an adverse impact to the Environment and to the Ecosystem. On our property, there are; red-headed woodpecker; blue heron (photo attached); white crane; red hawk (photo attached), just to name a few species that will be harmed if the HS rail is allowed to proceed. The migration route of many other bird species would also be affected, as would the habitats of all the animals that live in this area. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to NR-2. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . For information regarding vegetation please see Section 3.6.4.2, Natural Ecological Systems and Protected Species, Vegetation and mitigation measures NR-MM#2 and NR-MM#4 in Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .

Mary Blackburn	2/25/2018	Website	I object to the proposed High Speed (HS) rail line between Houston and Dallas. This area experienced flooding in April 2016, May 2016 and August 2017 (Hurricane Harvey). A construction project of this magnitude will harm Grimes County's ability to adequately provide remediation and protection from floods and the resultant destruction to roads and property. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to FP-1, SS-17 and WW-2.
Mary Blackburn	2/25/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. Passenger rail is not a forward thinking method to reduce traffic. The traffic congestion is within the Houston area, not between Dallas and Houston. Furthermore, the population density does not support passenger rail. It would be completely illogical to base a multi-billion dollar transportation project on the belief that Texans, with the high number of vehicles per capita (because of insufficient population density), would give up our vehicles in droves, Just to ride an expensive, inconvenient passenger rail. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to GN-2.
Mary Blackburn	2/25/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. The Need and Purpose for this HS Rail project has not been addressed or demonstrated. Objective financial reviews, Such as by the Reason Foundation, conclude that the project is not economically viable: that ridership will not match the number of people who currently fly between Houston and Dallas; that the project would lose hundreds of millions of dollars PER YEAR: and that tax payer dollars would be required. Amtrac does not generate positive cash flow and there is no proof that this boondoggle would either. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to BA-6, GN-2, GN-3, NE-1 and PN-3.
Mary Blackburn	2/25/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. Grimes County transportation and traffic problems will be worsened, whether the track is at grade or is elevated. There are already dangerous traffic incidents and tax payer inconvenience from existing traffic issues and road conditions. The HS Rail project will only make these situations worse, would further increase response times for emergency services, and would adversely impact school bus routes and travel times for students: closure of FM 1774 between Plantersville and Anderson (Grimes County): FM 1488 (Waller): Riley Road (Waller and Grimes): and many more. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to SC-5, SC-6, SC-7 and SS-23. As shown in Table 3.11-29: Roadway Crossings in Waller County (in Section 3.11 Transportation), three roads would be crossed by the Project: Riley Road, Murphy Road, and FM 1488. As shown in Table 3.11-50: Waller County Roadway Modifications , four public roads would be rerouted around the Project. Lengths or modifications are included in the above referenced table.
Mary Blackburn	2/25/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. Our quality of life will be adversely impacted from the noise and vibration impacts to our persons and our property. There have been no objective Studies conducted or released to the public that determine/document the adverse impact of the train'S vibration on our water well and septic systems or on the structural integrity of our home and shop. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to NV-5.
Mary Blackburn	2/25/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. The Texas Central Partners (TCP) preferred route will adversely impact the ability for emergency Services to get to us in a timely manner, as these vehicles must travel through Waller County to get to our property. A slower response time for EMS and law enforcement will put us and our property at risk. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to SS-23.
Mary Blackburn	2/25/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. The Texas Central Partners (TCP) preferred route will adversely impact the ability for emergency services to get to us in a timely manner, as the route bisects grimes County. A slower response time for EMS and law enforcement will put us and our property at risk. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to SS-23.
Mary Blackburn	2/25/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. My husband's and my home is in Grimes County, and our community straddles Grimes and Waller Counties. Texas Central Partners' (TCP) preferred route for the proposed HS Rail line will destroy property and property values in our community. The proposed route will be approximately 0.5 miles from our home, well within the 2 miles on either side of the rail like that are at risk. The HS Rail will destroy the appraised value of our home and property. The reduction in property values would necessitate an increase in the tax rates, in order for the taxing entities to have sufficient revenues to sustain typical levels Of service, thereby placing a further financial burden on my husband and me. This is money that we cannot replace, because we are retired. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to LU-14 and VA-1.
Mary Blackburn	2/25/2018	Website	I object to the proposed High Speed (HS) rail line between Houston and Dallas. This area experienced flooding in April 2016, May 2016 and August 2017 (Hurricane Harvey). Mary Blackburn	2/25/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. There is strong evidence to suggest that Texas Central Partners (TCP) and/or the Federal Railroad Administration (FRA) did not coordinate the DEIS effort with the local Grimes and Waller County governments, which is a violation of federal/state law and/or Statute. As a result, the DEIS should be considered invalid, until and unless there is coordination with the local governments. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to PI-1 and PI-5.

Submitted By	Date Submitted	Submission Type	Comment	Response
Mary Blackburn	2/25/2018	Email	I object to the proposed High Speed (HS) rail line between Houston and Dallas. The DEIS is supposed to be an objective review of 20+ points of "environmental/social impact." Yet, it is our understanding is that FRA used data from Texas Central Partners (TCP) that was obtained from illegal surveys. Illegal surveys taint the entire DEIS, and no conclusions should be drawn from illegal surveys. Furthermore, the DEIS merely affirms TCPs preferred route, rather than provide an objective review of other routes: ie: along the I-45 transportation corridor. The only reasonable choice in the final Environmental Impact Statement is the NO BUILD option.	Refer to BA-8, BA-9, GN-1, NE-1 and NE-8.
Paul Blacklock	2/16/2018	Website	Build it!	Comment noted.
Ralph Blackman	3/2/2018	Website	What s taking so long. Get this started now.	Comment noted.
Christopher Blackmon	3/2/2018	Website	This is in regards to Morgan Creek Legacy Farm in Navarro County adjacent to hwy 709. The Dallas to Houston High-Speed Rail will directly impact this ranch. By moving the route north of the power lines, it will have less negative effect on this property. This venue has been used for wild life preservation and to provide a venue for international guests. Please consider an alternative route in order to preserve this property.	Refer to LU-5.
Jim Blackwell	2/20/2018	Email	A project this immense, with tax payers on the hook in case of failure, should only be undertaken when the need is critical. Studies indicate a probability of failure with limited benefit to Houston or Texas. The need here is not critical and therefore not worth the risk. Please do not move forward with this endeavor.	Refer to GN-3, NE-1 and PN-3.
Dennis Blagrove	2/6/2018	Email	NO Train I am a landowner near the proposed route of this train. The impact on our property will be devistating to our environment and way of life. Just to list a few comments. Noise W ater Wildlife Safety You cannot tell me that this will not effect our community adversely. I will do everything in my power to stop this boondoggle. You will not shove this down our throats. Dennis Blagrove [...]	Refer to NE-9, NR-5, NV-1, SS-1 and WW-1. This property would be located approximately 1.3 miles west of the proposed limits of disturbance.
Karolina Blaha-Black	3/2/2018	Website	Please consider an alternate route that does NOT lead through the ranch. It is home of several wildlife species and a beautiful piece of land that is a true Texas treasure. It would be a shame to have it destroyed by trains and noise that cut down on the serenity of the land and the sensitive fauna.	Refer to LU-5.
Bill Blair	1/31/2018	Handwritten	Please add me to the project mailing list.	Comment noted.
Gayle Blair	2/16/2018	Website	This project is essential to the economic development and support of the state of Texas. Transport and its logistics are important to our state and its people and its economy. This high speed rail adds another innovative option for travel within a state that needs a variety of transport options . This is a BIG step in the right direction for TEXAS!!	Comment noted.
Larry Blankenship	3/2/2018	Email	I'm writing to notify you that I'm not in agreement with the FRA plan for the high speed rail to go through the Morgan Creek Ranch property. This is a beautiful property that helps bring joy to many people that otherwise would never be able to enjoy the outdoors. Please reconsider the path of this rail line to save this beautiful ranch property.	Refer to LU-5.

Kristi Boldt	3/1/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military. As a pediatric nurse, I spent a much needed weekend here with many of my fellow nurses thanks to a generous Dr. Morgan, where we participated in team building for our pediatric perioperative unit.	Refer to LU-5.
George Bollinger	2/20/2018	Website	Since the demise of the "Lone Star" in 1979 , these two major cities have been deprived of passenger rail service. It must be restored and Texas Central is the answer . Please give prompt approval , as you did for Brightline here in Florida.	Comment noted.
Andrew Bonnot	2/5/2018	Website	I fully support building a high speed rail line between Dallas and Houston. An alternative to commercial airline transportation is very important and I-45 between Dallas and Houston continues to be more crowded and more dangerous to drive. Rather than spending more tax funding on continued expansion of I-45 so that individuals can spend 4 hours getting between the two cities, a privately funded high speed rail solution makes a lot of sense. Since it is funded by investors, there appears to be little downside to taxpayers and citizens.	Refer to GN-4.
Tom Bonow	2/28/2018	Website	We've waited long enough - let get going!	Comment noted.
Lenroy Bookman	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.
Nancy Boone	2/1/2018	Email	My answer to the Bullet Train going through Navarro County, where I live, is a definite NO!! This whole project will only benefit a few people while you are going to have many more people funding it. This train is not going to benefit those of us in Navarro County. It is only going to be a hindrance. Let them take a plane if they want to get from Dallas to Houston or vice versa. We like our small town quiet and peaceful. We want it to stay that way. The only people this is going to benefit is the investors. Again...NO NO NO NO!!!	Refer to GN-4, PN-3 and SC-19.
Patricia Boone	2/21/2018	Website	I am excited about the enhanced transportation and ability to improve mobility in Texas.It should improve traffic on the north bound highways as well as create jobs.The addition of the train will make life easier for those who commute for employment,educational or recreational purposes.I can't wait!	Comment noted.
Karyn Booth	1/30/2018	Letter	The Draft Environmental Impact Statement ("Draft EIS") for the proposed Dallas to Houston High Speed Rail project sponsored by Texas Central Railroad (the "TCR Project") was released by the Federal Railroad Administration ("FRA") in mid-December 2017. The FRA has established a 60-day comment period, which is scheduled to close on February 20,2018. See 82 Fed. Reg. 60723 (Dec.22,2017). Delta Troy Interest, Ltd. ("Delta Troy") hereby respectfully request that FRA extend the current due date for comments from February 20,2018 to August 20,2018 (240 days total) in order to allow parties impacted by the TCR Project and the public sufficient time to review and analyze the Draft EIS which is 5,647 pages in length. A 60-day comment period is wholly inadequate given the character of the proposed TCR Project, the scope and complexity of the project, and the volume of material in the Draft EIS. This request is submitted pursuant to 49 C.F.R. 1506.10(d) and the FRA's authority under the National Environmental Policy Act ("NEPA"). Support for this request is provided below. The TCR Project is privately-sponsored and would travel through farms, natural areas, and residential areas in a 240-mile corridor between downtown Dallas and suburban Houston. In its private sponsorship, the TCR Project is similar to the 200-mile DesertXpress high-speed rail proposal between Victorville, CA and Las Vegas, NV, for which the FRA conducted an environmental review under NEPA a few years ago. In the DesertXpress case, the FRA allowed 56 days of comment on the Draft EIS, and an additional 46 days of comment on the Supplemental Draft EIS. Given that the FRA allowed 56 days of comment for the DesertXpress Draft EIS, a much longer time period is warranted for comment on the TCR	Refer to NE-1, PI-1 and PI-3.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>Project's Draft EIS for two important reasons. First, the DesertXpress rail construction and operation was planned to occur nearly exclusively within the right-of-way of Interstate 15, thereby limiting impact on landowners and existing land uses. The FRA considered two "action alternatives" for the proposed DesertXpress project: alternative A consisted primarily a rail segments "within the median" of Interstate 15, while alternative B consisted primarily of rail segments "within the fenced area" of Interstate 15. In contrast, the TCR Project would cross farms, natural areas, and residential areas, and it would require the crossing or blocking of numerous existing roads. Consequently, the TCR Project would have a dramatically greater effect on landowners and the use of their property in the immediate vicinity of the proposed rail line. Second, the DesertXpress Draft EIS consisted of a 976-page Volume I, 26 separate PDF appendices, and a total of 2,474 pages in all of Volume I, and Volume II. In isolation, this seems to be an extensive amount of material, yet the TCR Project DEIS is noticeably larger - it includes 1218 pages in Volume I, an additional 50 separate PDF appendices, and a total of 5,647 pages. In other word, the TCR Draft EIS is well over twice the size of the DesertXpress Draft EIS. It would be unreasonable to expect interested parties to read, analyze, and develop meaningful responses to such a massive amount of information in the brief 60-day time period that currently applies, especially when the less disruptive DesertXpress project featured a 56-day comment period for a much smaller Draft EIS. The private sponsorship of the TCR Project also differs substantially from the ongoing California High Speed Rail project, which is being developed by a state agency, the California High-Speed Rail Authority ("CAHSRA"). As a state agency, CAHSRA has engaged in extensive outreach to the public and is subject to various legal requirements regarding transparency, document availability, and similar issues. Moreover, the California project was approved in a statewide referendum several years ago. Despite these characteristics (which inherently enable public participation and engage, the Draft EIS for the California High Speed Rail project was subject to a 180-day comment period at the programmatic stage. In addition, individual, project-level segments of the California HSR project have subject to a further comment period (often 60 days). In aggregate, this two-tiered comment structure permitted a public commenting period of at least 240 days despite the fact that interested members of the public already benefit from the transparency inherent in the state-sponsorship of the California project. In contrast, the TCR Project is sponsored by a private entity that has not been forthcoming in providing information to the public. Under these circumstances, a significant increase to the 60-day comment period for the Draft EIS for the proposed TCR Project is more than warranted. For all the all above-mentioned reasons, Delta Troy respectfully requested that the deadline for comments on the TCR Draft EIS be extended from February 2,2018 to August 20, 2018. Given the relatively brief period of time before the February 20th due date, Delta Troy also requested that the FRA issue a decision on this request as expeditiously as possible.</p>	
Scott Born	1/29/2018	Oral	<p>My name is Scott Born, I'm the -- my wife and I own Scott Born Farms. We farm about 4,200 acres in Ellis and Dallas counties. We're a small business and we're not unlike a lot of other farming operations that this proposed rail line's gonna impact. And what it's gonna do to us is it's gonna raise our costs and farming is a narrow margin business, so you raise our costs you're just taking money right out of my family's budget and it will do it to a lot of people and here's how -- here's ways that I see it's gonna do it. When you reroute roads and we have to move this large farm equipment, I always tell people that's the most dangerous part of our job is moving from place to place. When you put us out on the road longer, it puts more hours on the machinery, it costs more fuel, it costs more labor, it increases our exposure for liability. And so if we could even get to these places through rerouted roads, it's gonna increase our cost, which lowers the amount of money that we're gonna have. So you're increasing my cost with no compensation for that. I would also say that the land that's gonna be divided in two there's gonna be no access for large equipment to the other side, due to the terrain, easements through somebody's property. Even if there is access to the other side, you're increasing -- when you divide a field into two pieces you're gonna increase the amount every time you start and stop a piece of equipment, it increases your cost. When we spray, when you start out at the end it over sprays when we apply the fertilizer. So the environmental impacts of that is we're gonna be dividing fields into smaller and smaller fields we end up over applying chemicals, fertilizer, seed. And so it's gonna it's gonna impact not just mine but a lot of agriculture people's bottom line. So I don't see that it's fair to increase my cost in a number of ways just for the just for the benefit of somebody else. And if you need more traffic to off the highway, build another airport. Let them fly over it, it doesn't affect anybody along the way. There's also the impacts of decreased land value and the taxes. It's gonna impact everybody's costs that are along the route.</p>	Refer to ED-2, LU-2, LU-11, PN-3, TR-8 and WW-9.
Glen Boudreaux	2/19/2018	Website	<p>We are so glad that the bullet train will finally come to Dallas and Houston. We will now be able to travel there, do business and travel back in the same day. What a boost to business it will be to be able to now work on projects in Houston and the surrounding area. We hope that the Department of Transportation will help in making the project a reality to help increase the economic growth in Texas for many of us as small businesses. Thanks for any help that you can give to make this a reality for all of us.</p>	Comment noted.
Sandy Bouldin	2/26/2018	Email	<p>Dear Congressman Brady, It was such a pleasure to read in our newspaper how you are fighting against this proposed High Speed Rail. So I wanted to share my views with you hoping it will help. I have been a school bus driver and school paraprofessional since 2006 and have seen how normal family job changes and other personal changes can cause people to move, thus changing school enrollment and our bus routes slightly. But the</p>	Refer to SC-6. Section 3.14.4.3, Socioeconomics and Community Facilities, Community Facilities includes a listing of all schools within a quarter mile of the LOD by county (see Table 3.14-8 through Table 3.14-17).

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>proposed Texas High Speed Rail will have an enormous impact on our school districts by blocking and re-routing many roads along its path. This impact has not been addressed, as I can see, and needs to be.</p> <p>Many school districts will be divided by the THSR and associated road closures, changing their enrollment affecting both their bus routes and teacher/student ratios in the classrooms. Schools may need to hire more teachers, bus drivers and even purchase more busses. This will have a significant effect on school budgets which are funded by our taxes. It is hard to pinpoint exactly what districts it would affect and how, because the THSR has not made available a detailed map outlining their exact route; their current map is missing about 8 miles of proposed route.</p> <p>I have not been able to find the necessary maps to research this, so I am asking that you and your team research this and use it to add to your fight against this Texas country lifestyle atrocity, the THSR. If it goes through, so many lives will be changes for the worse making hard working citizens have to work longer days because of their extended commutes. Please protect us from these bullies.</p>	Maps depicting the locations of schools in relation to the Project are included in Appendix D, Community and Cultural Resources Map book.
Kenneth & Joanne Bound	NA	Website	Keep Out	Comment noted.
Alan Bounds	2/5/2018	Email	<p>I am writing to you as a rural land owner and strong opponent of the Bullet Train. My wife, Mother and I attended the hearing in Fairfield last Wednesday night and I wanted to add my comments in writing. Our family ranch is on FM 246 and is on the preferred route of the bullet train through the Power Transmission corridor. The path of the train will diagonally split our land in half. My mother currently resides on the ranch and runs cattle. She has lived on the land since 1985 and it has been a working ranch in the family since the late 1800's. She has outlived 3 husbands including my father who have all lived and died on the ranch. I am a 4th generation land owner and am currently building my retirement home on our property. We have already lost land to a rail spur, the transmission power lines and now we find that the preferred route for the bullet train will cut across our 250 acres diagonally and be at the front door of our home. This train does nothing but glorify the private investors and urban politicians while destroying the integrity, privacy, hopes and dreams of rural Texas. It provides no utility to rural Texas but takes otherwise productive land. Adding further insult, a large section of land including our home has been designated as a Temporary Construction Zone. After talking to the engineering team at the meeting we are still unclear as to exactly what that means and would appreciate your clarification on the following questions: 1. What exactly is a Temporary Construction Zone and why has such a large section of our land been designated as such. A. How will the land be used? B. How long will this land be required? B. What restoration provisions will be included? 2. Our land has significant elevation changes, as much as 50 feet in approximately 580 feet. How will a high speed train accommodate that steep of a grade and why wouldn't more level terrain such as the I-45 corridor be better suited. Power Lines can cross a lot of terrain that is not suited for a road or track. 3. Our land shows both viaduct and embankment sections for the preferred track route. A. How will embanked track sections provide for movement of people and livestock from one side to the other? B. Will Viaducts be open for free movement underneath or they the right of way be fenced off? C. If open will Viaducts be tall enough to allow movement of livestock and machinery such as tractors and trucks? 4. What is the anticipated groundbreaking date in Freestone county. As I mentioned you have designated a very large section of our land and surveyors have been on site multiple times, but we have not received any information regarding our specific land. 5. Also, please explain other designations on our land for; A. Systems B. Hydro/Drainage I would appreciate any light you can shed on these questions. Alan Bounds</p>	Refer to LU-10 and LU-11. Segment 4 (part of the Preferred Alternative) is on viaduct on both sides of FM 246.

How will embanked track sections provide for movement of people and livestock from one side to the other?</p> <p>B. Will Viaducts be open for free movement underneath or will the right of way be fenced off?</p> <p>C. If open, will Viaducts be tall enough to allow movement of livestock and machinery such as tractors and trucks?</p> <p>4. What is the anticipated groundbreaking date in Freestone county. As I mentioned you have designated a very large section of our land and surveyors have been on site multiple times, but we have not received any information regarding our specific land.</p> <p>5. Also, please explain other designations on our land for;</p> <p>A. Systems</p> <p>B. Hydro/Drainage</p> <p>I would appreciate any light you can shed on these questions.</p>	
Michelle Bounds	1/21/2018	Email	<p>Our ranch in Freestone county is impacted by the proposed route for the train. We have the following questions.</p> <p>The map identifies part of our land as a "temporary construction area" adjacent to the actual permanent train track. Specifically, what disruption can we expect in this "temporary" area? What is the plan for restoration of these areas after construction is complete? What is the estimated time frame for the train construction work? The path of the train on our property covers land with significant changes in elevation. How will the track accommodate those changes?</p>	<p>Refer to LU-10.</p> <p>To operate the train at high speed, the grade of the system must be relatively flat. Refer to TCRR Final Conceptual Engineering Design and Constructability Reports, Appendix F, Section 3.3, Track and Alignment Design for a description of the key design characteristics and considerations for the Project.</p>
Jaimi Boutemy De Guislain	2/19/2018	Website	<p>I support the train because it will increase business for Texans and provide more jobs. As a former Houston resident, and where all my family still lives, I am already driving, flying, or taking a bus between the cities. The time savings will significantly improve our efficiencies. When this is complete, I will use this as my main mode of transportation. As a teacher I have spoken to many who said that they will traveling for pleasure by using this train, such as eating in a different city for a lunch meeting and returning in the evening. Any business considering to move to Texas would greatly take into consideration any public or private transportation methods. I agreed to this as long as it does not use taxpayer funds, which a bill was passed to protect that. Thank you for the consideration.</p>	<p>Comment noted.</p>
Eric Bowman	1/11/2018	Email	<p>Please build it Interstate 45 is way to crowded and it will save time and fuel.As may people travel between the two cities its a no brainer.</p>	<p>Comment noted.</p>
Ross Bowman	2/19/2018	Website	<p>I support the project and the investment in transportation infrastructure that will improve mobility. It will be good for Texas and the US. The environmental footprint is small considering the transportation benefits. Smaller footprint than highways but with greater transportation benefits.</p>	<p>Comment noted.</p>
Marilyn Boyd	2/6/2018	Oral	<p>I'm going to be really short. Hi, y'all. My name is Marilyn Boyd. I'm in Montgomery County, and I'm not good with this, but I'm doing it because those young kids did it. UNIDENTIFIED SPEAKER: Put the mic up. MS. BOYD: Thank you. I'm married to my husband, who is a sixth-generation Texan. His great, great, great, great-granddad is one of the original Hayes County -- Hayes, Texas, ranchers. Okay. I wasn't going to do all my notes, but I, too, want to talk to you two young men. Why would you work for the people who spend all this money when most Texans don't want this rail? Listening to all of what's happening with you, it breaks me heart, and I'm here to fight with you and stand with you, as is my husband and all my friends and family. It's nothing but a land grab. You know that. So you need to go back to Washington, D.C. You need to get out of Texas. And you really need -- because you're not nice young men, you need to stop working for these Japanese foreign billionaires, cowards, because they don't show up at our meetings. Think about your kids, like the gentleman said. Think about your kids. Truly think about your own family, their future. If you won't think of others, think about your kids. You've already ruined California. It's just a job, and you guys are very talented and can find another decent, moral job. You're probably not Texans. I'm not a Texan, but I've gotten here as fast as I could twenty-five years ago. God knows what y'all are doing. That's why all the reasons you heard tonight in this room, that's why Texas is what it is. Okay? That's who Texas is. It's different from the states of this United States. It's why the other states can't take it down. This, I believe -- and I'm going to be really opinionated on this -- but this, I believe, is the beginning of the takeover of our Texas by the liberal (inaudible) literally, splitting Texas in half. It's not right. Not only are the all of these unreasonable things happening to you people who own all this land and has been in your family for all these years, but nobody tonight has mentioned this one thing: And I have read quite a bit on it, but I'm not going to take a lot of time because it's all available information; and that is, not only are you dealing with all these problems from these people, but even if your friends say that they're not going to be affected because it's not going through their land, they're going to be affected. The reason? All that electricity coming over the top, do you know what it does? Cancer, yes. Cancer, the big fat C. And not only because -- it doesn't have to hit your body, all the food's growing around it, the hay, the cattle that man will be eating all this. All that high-powered -- electricity, okay? Well, that's a sore subject because it is the truth. And thank y'all for listening. Good night.</p>	<p>Refer to NE-1.</p> <p>"The literature and Internet contain myriad reports of adverse health effects of electromagnetic field (EMF) exposure. Anyone can find reports claiming that EMF exposure can cause anything from rashes to cancer, and everything in between. For the purposes of this work effort, the following guidelines were used when determining whether to include published materials in the Draft Environmental Impact Statement (Draft EIS).</p> <ol style="list-style-type: none"> 1. Evaluate the source. Anyone can publish anything on the Internet. This makes Internet sources suspect, unless the source is a reputable authority on the subject, such as the World Health Organization (WHO) or the International Commission on Non-Ionizing Radiation Protection (ICNIRP). Likewise, not all scientific journals are of the same caliber. Some journals, such as the Journal of Physical Chemistry, have stringent requirements for publication as well as a rigorous peer-review system to ensure the validity and quality of the articles published. Other journals have different standards. 2. All research should be based on sound scientific principles, control for all variables, and have an experimental design that includes a study and control group. 3. The research should be repeatable. If a study reports findings that

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
				<p>cannot be verified by an independent group, the results and conclusions are suspect.</p> <p>4. The research should have a relatively large sample size. A large sample size helps to ensure the applicability of the results. In other words, a small sample size (20 people or less, for example) makes the results and conclusions of the study difficult to generalize to the entire human population. Similarly, anecdotal evidence from one person may be relevant to that one person only, and not to the entire human population. On the other hand, the larger the sample size (300 or more people, for example), the more applicable the results may be to a similar population. That said, the Draft EIS did discuss the research related to health and EMF from reputable sources, including studies that evaluated long-term exposure. Please see the following sections: 1. Section 3.15.2, Electromagnetic Fields, Heath Effects of EMF: "Reputable authorities on the subject of EMFs include the WHO and the ICNIRP. The ICNIRP determined that humans can perceive EMFs in some situations and that perception can be annoying, although not physically harmful. To prevent those acute health effects and annoyance, the ICNIRP developed guidelines for human exposure to low-frequency EMF. The ICNIRP states that ""adherence to these restrictions protects workers and members of the public from adverse health effects from exposure to low-frequency EMF." As part of this effort, the ICNIRP also reviewed "epidemiological and biological data concerning chronic conditions" (i.e., effects on the neuroendocrine system, neurodegenerative disorders, cardiovascular effects, reproduction and development effects and cancer) and "concluded that there is no compelling evidence that they are causally related to low-frequency EMF exposure." Additionally, the ICNIRP concluded that insufficient reliable research exists to determine if a link is possible between the adverse health effects and long-term, elevated EMF exposure. The ICNIRP stated that more research is necessary in these areas." "The U.S. National Institutes of Health tasked the National Institute of Environmental Health Sciences (NIEHS) with studying and making recommendations on EMF and human health. The NIEHS published reports outlining their interpretations and recommendations. The NIEHS concluded that for most health outcomes, no evidence is present that EMF exposure has adverse health effects." 2. Section 3.15.4.1.1, Electromagnetic Fields, National/International: "The ICNIRP has adopted EMF exposure guidelines and standards in the extremely low frequency and radiofrequency bands of the EM spectrum. The ICNIRP standards address EMF exposure by the general public and workers in an occupational setting and are widely used within the U.S. and abroad. The ICNIRP recommendations are based on the epidemiological data available from verifiable research studies. Based on the ICNIRP's work, the European Union has adopted these same standards for EMF exposure." 3. Section 3.15.4.2, Electromagnetic Fields, Literature Review: "HSR is used in many other countries, where studies have been performed on the</p>

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
				amount of EMFs that human beings are subjected to. For example, in Australia, Halgamuge et al. conducted a study to determine the long-term effects of EMF exposure from HSR systems on the passengers and workers. The study also summarizes other research on EMF exposure due to high speed trains from around the world, including the United Kingdom, China, Japan, Switzerland, Germany and Russia. The study concluded that all values measured as a part of the study were "far lower" than the ICNIRP recommended levels..."Also, as stated in the Draft EIS, Section 3.15.4, Electromagnetic Fields, Methodology , EMFs fall off markedly with distance from the source. EMFs are expected to be at ambient levels within 500 feet of the alignment. ""The inverse square law applies to EMF. The inverse-square law means that EMF levels would substantially decrease with increased distance from the source. Therefore, for the purposes of this analysis, the EMF Study Area is defined as 500 feet from the centerline of the HSR track. Beyond this distance, the EMF would be below background levels."
Mark Boyd	1/29/2018	Oral	I'm Mark Boyd. First I want to say I admire all you folks that speak so eloquently off the cuff. I want to read a statement here. My name is Mark Boyd. I'm a Texas licensed professional environmental engineer. I'm a resident of Dallas County and I'm here as a representative of LCA Environmental. I'm evaluating a particular area in it's sort of on the northern and southern part of Navarro County. They told me to mention the identifiers NW 560 plus 00580, that's an area around the vicinity of FM 709 and FM 3194, again, in Navarro county. Now I've reviewed -- I'm evaluating the Draft Environmental Impact Statement which describes possible environmental impact to waters of the U.S., whether it's a migratory bird like the bald eagle habitats, which by the way I saw a beautiful picture of a bald eagle flying over this area just the other day. And in addition to those impacts it puts their core of engineers publicly available information and on the FRA website. I'm also evaluating permanent watershed drainage and runoff patterns that might be affected which aren't directly considered as impacts by, you know, by -- in these documents and I'll include the specific core of engineers four documentation or otherwise. So a route change affected routes would avoid the small area of any reduce the overall impact the species such as bald eagles and migratory birds, but this oral statement will be followed up by an online statement with specifics on this but in my evaluation presented in writing to request from blending of routes that were already vetted and proposed in the specific area of Navarro County in order to actually reduce the environmental impact, as well as impact to the Dallas community. I'll be very much more specific in my written comments. I want to thank you for the time that you've provided to me to make this statement.	Refer to LU-5, NR-2, NR-3, WW-1 and WW-2.
Mark K Boyd	3/6/2018	Website	In addition to prior oral comments of 29 January 2018 at the Dallas County DEIS open comment meeting at Wilmer Hutchins High School, LCA Environmental, Inc. (LCA) respectfully presents this written comment presenting a project review in support of value-added wetlands impact reduction and environmental benefits through a feasible re-routing of the proposed high speed rail segment in Navarro County along alternative alignments already vetted and considered for the project (as presented on attached supporting exhibits).	Refer to LU-5 and WW-2. TCRR considered the alignment presented by LCA while evaluating avoidance options of impacts to Morgan Legacy Farms and local county roads.
Marilyn Boyer	1/29/2018	Oral	Hello. Thank you for this opportunity to speak. My name is Marilyn Gowen-Boyer. I am a fifth generation Navarro County resident. I have raised two children here. Both of them have gone off to college, and if this train goes through I am positive they will not be moving back here to raise their families. Okay. I had a note card prepared, but I get really emotional when I get angry, so I'm not crying out of fear; it's just emotion. If this train is built, it will be taken over within five years failed and broken. The infrastructure at each end is not in place. There are two trains in the world that actually turn a profit and pay for themselves, and they are in places where mega populations bigger than Dallas and Houston put together. The infrastructure at each end. Yesterday I drove through Houston. It took an hour and 15 minutes to get from one side to the other. So they can take their high speed rail to get from Dallas to Houston, and then they're still going to have to drive another hour to get around Houston. It's not a benefit to anybody, and they're fooling themselves if they think they're going to get the ridership. In Florida, the rail, as of December 2017 they have not even set their prices yet. They are so far over budget and so far behind schedule, they can't tell you what a ticket will cost. They have a couple of trains they've seen run up and down the rail in Florida, but they funded them with bond money and forced people to buy it because nobody even wanted to buy the bonds. It's \$1.15 billion over budget. The California, rail 171 percent over budget. Costs more than they thought. And let this number sink in--\$3.2 million a day being lost on this project in California; not even close to finished, seven years behind, and totally screwed up so many millions of people's lives there already. The last 30 seconds I want to give you two facts about the Japanese railway company that we're backing here. Okay? In October of 2017 they got slapped on the hand	Refer to GN-2, GN-4, GN-6, NE-1, SC-19, TC-2, TC-6, TR-3 and TR-4. FRA's Office of Safety will evaluate the technology to determine if can safely operate within the U.S. The determination from the Office of Safety will inform FRA's Rule of Particular Applicability, which TCRR must receive in order to operate the Shinkansen technology. TCRR must maintain compliance with FRA's Rule of Particular Applicability and any conditions is places on the operation or maintenance of the technology. If they fail to comply, FRA has the ability to revoke their approval, which would prohibit TCRR's operation.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
			by the Japan government for failed quality controls, faulty parts, fake data reports, substandard construction. In December of 2017 Central Japan Railway has withheld prices on contracts on all 19 works under construction in their own company, in their own country. They have rigged bids, used 3 trillion yen a day of public money, and they think they're going to come here on the other side of the world and do it cheaper, better, wrong.	
Marilyn Boyer	1/29/2018	Oral	Hello. Thank you for this opportunity to speak. My name is Marilyn Gowen-Boyer. I am a fifth generation Navarro County resident. I have raised two children here. Both of them have gone off to college, and if this train goes through I am positive they will not be moving back here to raise their families. Okay. I had a note card prepared, but I get really emotional when I get angry, so I'm not crying out of fear; it's just emotion. If this train is built, it will be taken over within five years failed and broken. The infrastructure at each end is not in place. There are two trains in the world that actually turn a profit and pay for themselves, and they are in places where mega populations bigger than Dallas and Houston put together. The infrastructure at each end. Yesterday I drove through Houston. It took an hour and 15 minutes to get from one side to the other. So they can take their high speed rail to get from Dallas to Houston, and then they're still going to have to drive another hour to get around Houston. It's not a benefit to anybody, and they're fooling themselves if they think they're going to get the ridership. In Florida, the rail, as of December 2017 they have not even set their prices yet. They have a couple of trains they've seen run up and down the rail in Florida, but they funded them with bond money and forced people to buy it because nobody even wanted to buy the bonds. It's \$1.15 billion over budget. The California, rail 171 percent over budget. Costs more than they thought. And let this number sink in--\$3.2 million a day being lost on this project in California; not even close to finished, seven years behind, and totally screwed up so many millions of people's lives there already. The last 30 seconds I want to give you two facts about the Japanese railway company that we're backing here. Okay? In October of 2017 they got slapped on the hand by the Japan government for failed quality controls, faulty parts, fake data reports, substandard construction. In December of 2017 Central Japan Railway has withheld prices on contracts on all 19 works under construction in their own company, in their own country. They have rigged bids, used 3 trillion yen a day of public money, and they think they're going to come here on the other side of the world and do it cheaper, better, wrong.	Refer to GN-2, GN-4, GN-6 and NE-1.
Patricia Boyles	3/5/2018	Email	Concerned with the negative effect on the birds, migratory birds, and/or protected birds. White Ibis, Chuck Will's Widow (yes that's a bird), blue heron, cranes, etc. Will their migratory patterns be in the path of the train? Will birds cause accidents? The path would impact the wetlands and the areas they exist in or migrate to. What will the effect of the constant vibration be on our septic systems and water wells? Most Of these communities are out in the country where there is no water services and/or sewer services. I vote NO BUILD!!	Refer to NR-5, NV-5 and WW-2.
Patricia Boyles	3/5/2018	Email	Response time to HSR accidents in rural areas I concerned with the response time in rural areas for HSR accidents, terrorists incidents, etc. Rural counties are not equipped for this.	Refer to SS-23.
Patricia Boyles	3/5/2018	Email	I concerned with the fact many curves and accidents that occur. Just 100k at the numerous accidents With Amtrak on routes and curves. I vote NO BUILD!! Respectfully	Refer to SS-12 and SS-13.
Patricia Boyles	3/5/2018	Email	I concerned with the fact that out of the 12 HSR in the world, only one is breaking even. The others have had to go back to the taxpayers to bail them out. I vote NO BUILD!!	Refer to GN-2, GN-4 and NE-1.
Patricia Boyles	3/5/2018	Email	I concerned with the implications if TCR doesn't complete the project for whatever reason, since it is a privately funded endeavor. property values decimated and lifestyle Will have been fractured! and With no recourse. We Will be stuck With property that has little or no value.	Refer to VA-1.
Patricia Boyles	3/5/2018	Email	What about the emergency services? Because many roads will have to be closed, counties will have to build new emergency services facilities to accommodate the closing of roads. This will put an added burden on tax pavers and will negatively affect the response time of the emergency responders.	Refer to TR-8, SS-18, SS-23 and SS-26.
Patricia Boyles	3/5/2018	Email	Impact to school districts because of the proposed alignment would cause a negative impact to bus routes, causing them to have to purchase additional buses to transport students to accommodate delays and the private roads that Will be impacted and/or closed by the proposed High Speed Rail system. I vote NO BUILD!!	Refer to SC-6.
Patricia Boyles	3/05/18	Email	The economic impact to our County and community would cause loss of property values and in turn decrease the valuation of property causing lower tax revenues for county, and school districts. Grimes County is already a poor county and this would be an extra burden. I vote NO BUILD!!	Refer to VA-1.
Patricia Boyles	3/5/2018	Website	I concerned with impact of the whole construction process and how it will negatively affect our roads, traffic, emergency response time, etc. This Will be an added expense to taxpayers due to damage from these heavy trucks constantly running the roads. Will cause an added economic burden to the communities and counties, ultimately the tax payers!! I vote NO BUILD!!	Refer to SS-23, TR-6 and TR-7.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
Patricia Boyles	3/5/2018	Website	What about the effect the current roads? Many roads Will have to be closed causing major traffic issues. Also roads being planned won't be able to be completed and Will stifle future economic development. I vote NO BUILD!! Respectfully Patricia Boyles	Refer to TR-7 and TR-8.
Pattie Boyles	3/5/2018	Email	What will the effect of the constant vibration be on our septic systems and water wells? Has anybody bothered to check that out? Whose going to pay for the damages this may cause?? Will it force our neighborhoods/subdivisions to have to get water services elsewhere? Most of these communities are out in the country where there is no water services and/or sewer services. If we can't get it, then our property is worthless to anyone!!! I vote NO BUILD!!	Refer to NV-5 and WW-6.
Pattie Boyles	3/5/2018	Email	What the report of archeological sites and two pre-historic/historic sites that are being considered for the National Register Of Historical places. I vote NO BUILD!!	Refer to CR-9.
Pattie Boyles	3/5/2018	Email	What will the effect of the constant vibration be on our septic systems and water wells? Has anybody bothered to check that out? Whose going to pay for the damages this may cause?? Will it force our neighborhoods/subdivisions to have to get water services elsewhere? Most of these communitites are out in the country where there is no water services and/or sewer services. If we can't get it, then our property is worthless to anyone!!! I vote NO BUILD!!	Refer to NV-5 and WW-6.
Pattie Boyles	3/5/2018	Email	What about the effect the HSR will have on flooding and drainage. We already deal with flooding and drainage issues Without this HSR. There are numerous creeks, drainage ditches, and bayous that the HSR Will cross. There has been no mention of how this will effect flooding issue and drainage and what HSR will do to address it. I vote NO BUILD!!	Refer to FP-1 and WW-2.
Pattie Boyles	3/5/2018	Email	This will greatly impact our subdivision as the rail we be our western boundary and will destroy the economic viability of it and the value Of everyone's property. I vote NO BUILD!!	Refer to VA-1.
Pattie Boyles	3/5/2018	Email	What impact Will the sound, vibration, etc have on the wildlife in our area -- the constant noise, vibration and elevation of train. The route cuts thru major wetlands where hunting is vital to the economy. This will greatly diminish it if not totally destroy it!!! The sound, vibration etc. Which would be very 15 to 20 minutes, 48 times a day. This can't be good repeated over and over again 16 hrs a day into perpetuality. I vote NO BUILD!!	Refer to NR-1, NV-1, RF-2 and WW-9.
Pattie Boyles	3/5/2018	Email	I'm concerned about the economic impact on our property values and the tax base Of Grimes County. The proposed route is within % mile of our property and would cause us to lose the value and equity we have built up in our home. We are relying as most people do on the value and equity for retirement purposes and this proposed route would ruin this. It would cause us to have to work beyond our retirement age in order to compensate for the loss. And this would take years beyond what we have to replenish the loss. I vote NO BUILD!!	Refer to VA-1.
Pattie Boyles	3/5/2018	Website	Many roads Will have to be closed causing major traffic issues. Also roads being planned won't be able to be completed and Will stifle future economic development. I vote NO BUILD!!	Refer to TR-8.
Bradley Boyte	1/29/2018	Oral	Hello. I'm Bradley Boyte. I'm currently the president of Mildred Independent School District. I'm also a candidate for commissioner of Precinct 2 Navarro County. A hundred percent opposed to this project. Without repeating some of things that have already been said, I just want to bring up one thing I noticed in the question and answer section. On item 14 it says, "no public roads will be closed." And I thought, Well, okay. But as I asked the questions, they're going to be rerouted. That means it's going to be a dead end, and you still got to drive ten miles out of the way. To me, that's closed. And if we're going to split hairs with terminology, I don't really trust anything else on here if I can't trust that. Another things that disturbs me a little bit is they say it's only going to affect three percent of the farmers and ranchers and farmland. Well, if there were a preventable plague coming, I wouldn't take any comfort in knowing it's only going to kill three percent of us. And that three percent's in the room tonight. That's these here. You're the three percent. You're the ones living on these county roads that are going to get shut down. It's going to affect your life and everything about it. And I'll tell you about Navarro County. This is a God-fearing community. These are people that pray when there's a problem. And don't underestimate the power of prayer. And I'll tell you -- I like to quote an old country gospel preacher named Dr. J. Vernon McGee. And Doctor McGee said, "You know, the Lord will bless a farmer's crops when he prays over them, but when he says amen, he expects them to be leaning on a shovel." Well, I will tell you, we are going to pray about it, and these are the people that lean on the shovels. We're not going to just sit back and watch this happen. I like the don't mess Texas comment but don't mess with Navarro County and you picked the wrong place to build the first one. Thank you. God bless you.	Refer to LU-2, LU-11 and TR-8. See Appendix C: Mapbooks and the Project Footprint for more details about roadway modifications.
Juanelle Bradford	3/5/2018	Handwritten	5 Questions of Concern: How does this thorough way affect the animals *and communities surrounding it? * any cost consideration of how much it will cost individuals to ride on this high speed rail?	Refer to SC-3 and TC-3.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			* Fuel Efficientness What does it cost the Texas Resident? *Would disable veterans ride for free? *Comparing times to other bullet trains is this the fastest this train can go?	
Jerry D. Bradshaw	1/30/2018	Handwritten	This will not be any benefit to any of the citizens of Ellis Co. The best method of moving forward is to totally trash this proposed train, and come up with a better idea.	Refer to SC-19.
Sanjia Bradshaw	2/14/2018	Email	Shut down this God-forsaken project!!! This is a complete waste of Texas tax-dollars. I oppose this colossal wreck of a project. It's a pathetic mismanagement of resources (both \$\$\$ & land). End it NOW. Shut this down!!!	Refer to GN-4.
Kyle Brady	3/9/2018	Website	Significant environmental impact to areas and persons in the proposed path. With the endpoints, proposed path, and ticket cost, I cannot see that this rail will be highly utilized. This project does not justify the proposed confiscation and significant devaluation of private individual's property.	Refer to BA-7, GN-2, NE-9, PN-3, SC-3 and VA-1.
John Braly	3/4/2018	Website	Federal Railroad Administration, I am writing today in regard to the Dallas to Houston High-Speed Rail Project. I am adamantly opposed to this project. It will have a detrimental impact to my livestock operation. I see no positive impact that it will have on Navarro County as a whole. I am concerned about the sound of the train for my livestock as well as my family. I am concerned about the loss of grazing land for cattle and sheep as well as the loss of water access for my animals. This project would basically shut down my ranching operation. We enjoy many other forms of wildlife such as monarch butterfly and geese migration and these would also be disrupted. This project would lower the value of my house and property to a point that it would be impossible for my family to relocate even if necessary. But as I have worked this land all my life as well as four generations before me, I do not have the desire to do that. I plan to pass my land on to my family completely intact. I have given no permission for a survey of our property, yet I was told at a meeting that the environmental impact study is complete. How can this be unless there was trespassing on my property? If my land has not been properly surveyed, this study would be null and void and the project should not be able to proceed. If there was trespassing and they were thus dishonest with me, how can this company be trusted? This project is not welcome, wanted, or needed. You cannot allow hardworking American citizens to be displaced to cater to a small upper echelon that would actually ride the train. I hope you will see the folly in this project and take your project elsewhere. Sincerely, John Braly	Refer to ED-2, GN-1, LU-2, LU-6, LU-7, LU-11, NE-8, NR-1, NR-2, NR-5, SC-19 and VA-1.
Kristi Braly	3/4/2018	Website	I am writing today in regard to the Dallas to Houston High-Speed Rail Project. I am adamantly opposed to this project. But as I have worked this land all my life as well as four generations before me, I do not have the desire to do that. I plan to pass my land on to my family completely intact. I have given no permission for a survey of our property, yet I was told at a meeting that the environmental impact study is complete. How can this be unless there was trespassing on my property? If my land has not been properly surveyed, this study would be null and void and the project should not be able to proceed. If there was trespassing and they were thus dishonest with me, how can this company be trusted? This project is not welcome, wanted, or needed. You cannot allow hardworking American citizens to be displaced to cater to a small upper echelon that would actually ride the train. I hope you will see the folly in this project and take your project elsewhere. Sincerely, Kristi Braly	Refer to ED-2, FP-1, LU-2, LU-6, LU-7, LU-11, NE-8, NR-1, NR-2, NR-5, SC-19, VA-1 and WW-2.
Marcia Braly	3/4/2018	Website	Federal Railroad Administration, I am writing today in regard to the Dallas to Houston High-Speed Rail Project. I am adamantly opposed to this project. It will have a detrimental impact to my livestock operation. I see no positive impact that it will have on Navarro County as a whole. I am concerned about the sound of the train for my livestock as well as my family. I am concerned about the loss of grazing land for cattle and sheep as well as the loss of water access for my animals. This project would basically shut down my ranching operation. We enjoy many other forms of wildlife such as monarch butterfly and geese migration and these would also be disrupted.	Refer to ED-2, GN-1, LU-2, LU-6, LU-7, LU-11, NE-1, NE-8, NR-1, NR-2, NR-5, NV-1, SC-19 and VA-1.

Steven P Brandt	3/5/2018	Handwritten	I would like to say I am for the building of the bullet Train. I have been in the air conditioning business for 28 yrs, and have worked/Lived in both major cities. They would both benefit from a business stand point, especially for Companies w/offices in both Dallas & Houston. I also am a Texas A&M graduate with a B.A. in Construction Science. This would reduce my business travel between both cities envaluable from a time stand point. While it might effect some land owners. Texas is in need of this innovation as a \$15 Trillion Dollar Economy & the 24 largest [sic] economy in the world.	Comment noted.
Matt Brannen	3/8/2018	Website	I support the Dallas to Houston high-speed rail project. The Federal Railroad Administration should move forward as quickly as possible with the approval of the EIS for the project.	Comment noted.
Ralph Breaux	3/8/2018	Website	We need this railway. I45 between Houston and Dallas needs an alternative to constant rebuilding/ widening improvements. The ability to get containerized shipping in and out of the port of Houston area, alone, would be worth the project	Comment noted.
John Brede	2/27/2018	Website	I think it's a great idea and it is an important part of long term growth for the city. I would like to see cargo being shipped on the bottom of the train and passengers on the top portion of the train. I would like to see the train eventually go to San Antonio, Austin as well, and back to Houston.	Comment noted.
John Bredin	2/7/2018	Website	Dallas-Houston high-speed rail is a project of vital national importance. This privately-funded project will create construction and operational jobs and will pay federal and local taxes. It will provide modern transportation for a growing Texas population, much faster than driving, and faster than flying when traveling between downtown Dallas to downtown Houston. It will be environmentally-friendly, emitting 1/12th the CO2 as a jet would between Houston and Dallas. While I do not live in Texas, I would definitely choose this train over driving or flying if had occasion to travel between Dallas and Houston.	Comment noted.
Jim Breithaupt	1/29/2018	Oral	I'm Jim Breithaupt, and I'm one of these families that's been here for over a hundred years; probably since Moses came down from the mountain. But I've asked some questions of some of the people here. I asked a lady back in the back, is it all going to be elevated or is some of it on ground grade or what. I don't know was her answer. Well, if it's elevated, how high is it going to be? Well, I don't know was the answer. I asked how much it was going to cost; where the money was going to come from. Well, I don't know was the answer. You cannot determine the impact of something unless you know the answers to those questions. It will be a lot less impact if it is all elevated than it will if it is on the ground, but how do we know if some of it's this way and some of it's that way, where is what where? You're not prepared for an Environmental Impact Statement. A few years -- several years ago there was another boondoggle project like this in Texas, multimillion dollar project. The power of eminent domain was used, much like this, where it would be transferred to foreign investment, private individual investors. It was called the Super Collider. You-all remember the Super Collider? Biggest boondoggle in Texas. The money never came forth, the project was never completed, it was a miscarriage of justice to take those people's property, and then have it laid out and the project killed because they didn't have the money. If it's going to be done--and it shouldn't be done because it's really not legal to take private property for private purpose--but if it's going to be done, at least somebody should make them post a bond or a holding account to make sure the damn money's going to be there when it's needed to build the project to completion, and nobody seems to care about that. And those are really all the things I have to say. I agree with everybody that this is going to be hard on the county. And the county has lost thousands and thousands of acres between Richland Chambers Reservoir and the new highway. And by the way, the new highway they're building, the 31 bypass, why don't they have an Environmental Impact Statement in here? They haven't. It takes an Environmental Impact Statement to build a railroad but not a highway. How is that? That's all I've got to say. Thank you.	Refer to ED-1, GN-4, NE-1, SC-22, LU-11 and TR-8. The SH 31 Relief Route project is being conducted by TXDOT and is not part of the scope of this project. Any questions regarding the environmental analysis for that project should be directed to TXDOT. A discussion regarding the SH 31 project is included in Table 4-8: Additional Projects Considered for Cumulative Impact Analysis in Chapter 4, Indirect Effects and Cumulative Impacts of the Final EIS, Indirect and Cumulative Impacts.
Betty Breithaupt	1/29/2018	Letter	To whom it may concern: I would like to approach the High Speed Rail Project from a different prospective. 1. Should the intended project fall through before it is finished, but after property has been acquired either by condemnation or willing sale, how will the property be handled? Will the farmers and landowners be offered the property back? 2. Should the HSR fall into bankruptcy after a number of years in business how will the project be maintained? Will the state maintain the property, or the counties, or perhaps the cities that have the rail in their jurisdictions?	Refer to NE-1, NE-2 and GN-4.
Betty Breithaupt	1/30/2018	Email	What will happen to the land that is taken for the project if the H.S.R. project is abandoned?	Refer to NE-1.
Gary Brian	2/6/2018	Oral	I'm going to move up front as well. My name's Gary Brian. I'm a resident here in Waller. I'm going to focus on one specific issue that was very lightly alluded to in the Draft EIS. I'll give you some background. I'm in excess of 30 years of law enforcement, 14 of which I was the Chief of Police. Judge, you're in here. In the Draft EIS, it states, "First responders, there shouldn't be any significant increase" -- They're not anticipating any significant increase in major response times. Judge, would that be an acceptable answer to you if your sheriff came in, and	Refer to SS-23.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
			there was a project going on, and they said, "No significant increase"? I think, based on what I've seen, there's no risk assessment, there's no mitigation even looked at to deal with what's going to transpire not only during construction if this thing ever moves forward but afterwards. Everybody should have gotten one of these FAQ sheets. If you look on number 14 and number 15 -- I think's what it is. It says, "Will any roads be permanently closed?" They say, "No." Okay? Number 16, it alludes to possibly having to reroute roads. So what we're talking about is not just where this track is supposed to be going based on what they said here, but you're talking about all types of issues related to how your first responders are going to get to you when you need help. If I would have walked in and talked to my police board of commissioners or any of the city councils that I reported to and said, "There's not going to be a significant increase in response time," the first thing they would have done is said, "What in the world are you talking about? I want to know what your definition of 'significant' is." Okay. There's nothing in this document that addresses anything concerning the degree of problems that may arise as it does and as it affects health and safety. Based on that alone, my background, I sure don't want my wife to die because we can't get an ambulance to our house. I sure don't want anybody here to have the same problem. I say this is a no-build. No-build for go. They should be doing something that increases the ability for our first responders to get to us, not making it more difficult -- or at least trying to address how they're going to mitigate all these rerouting, all these road closures and everything else. Thank you.	
Christi Bridwell	2/8/2018	Website	STOP THE RIDICULOUS RAIL STOP the high speed rail. I live in Hockley, Texas. There is NO NEED to disrupt our area for this nonsense. We already have enough construction via 290! We do not need any other construction delays and hazards. We have dealt with 6 years of freeway closings, lane changes and narrow stretches on 290. NO MORE CONSTRUCTION! Leave our acres alone! It won't even benefit anyone in our area, the construction will take forever, the cost to ride the stupid rail will be expensive and it is faster & cheaper to fly!	Refer to PN-3 and TR-6.
B Briers	2/6/2018	Handwritten	What Happens to our land when the train fails like most of the other? Will taxpayers have to pay for it? Lease or purchase land? If it crosses our Land that's Been in our family for appx. 80 years. get Ready for a Fight!! Very disappointed in Texas officials to allow this to ruin the integrity of rural Texas.	Refer to NE-1.
Randy Briers	2/6/2018	Oral	My name is Randy Briers. This is more on -- I guess a little bit more of on a personal note than some of the other information that's been given here tonight, but I just wanted to explain a little bit. I moved here in the late '60s, went to the good school over west of here, graduated. Went to Montgomery County for 37 years. Came back to Grimes County. We have some land over on 1774. We have lost our home and a rent house we had here on the place already to CenterPoint; were forced to move by CenterPoint. Our land is very narrow but very deep, and the train is going to come right through the middle of our property that goes -- it's back in my wife's family in the 1930s. So it's not on any historical register or anything, but it's got a little history behind it, I think. It's been in her family since the 1930s. We've got one little cabin left on there, and if this train comes through like it's proposed, we're going to lose our cabin. So we're basically almost 68 years old and we're virtually starting over. Came back to Grimes County to retire. Did retire. Lived in our house there for two years. CenterPoint took that. Now we're dealing with the train. So you talk about somebody that's been under some stress for the last couple of years. It's been a lot of stress. And I will say, I will say, CenterPoint said I was very difficult to deal with. These land acquisition people, if this does come through, they better get ready because I can be a grouchy old son of a gun. That's really all I've got to say. And I'm very, very, very much against this train, bullet train.	Refer to ED-1 and ED-2.
B Briers	2/6/2018	Handwritten	How many need to ride it to pay for it? This is Texas not China. Will the train run if it has 20 people on board?	Comment noted.
William Brigance	1/25/2018	Website	Hurry up and build it.	Comment noted.
Ethan Brisby	2/23/2018	Website	I am so encouraged by this project. I trust the leadership will continue to keep the "greater good" in mind. I live in the Brazos Valley, and despite the backlash some of the more vocal citizens are making, I fully support this project and all it will mean for mobility and accessibility. Please do not hesitate to contact me to become an ambassador.	Comment noted.
Mary Brisco	3/9/2018	Website	I'm excited by the plan and believe this is long overdue in the state of Texas.	Comment noted.
Angel Briseno	1/29/2018	Website	I'm for high-speed rail. It will improve traffic congestion around interstate highways and will save tax payers money.	Comment noted.
Kerin Brissette	2/8/2018	Website	I fully support the High-Speed rail project. I see it as providing a significant improvement to the state of Texas as a whole. It shows important and needed progress. Rail such as the proposed rail have been working quite well in Europe and Asia for many decades. It is 2018 not 1950. It is wise to embrace progress. The reduction of automobile and air traffic in this corridor should reduce pollution in our state. This should be a important point for the "green" people to embrace. I am looking forward to the rail project moving forward.	Comment noted.
Rafael Brito	2/24/2018	Website	I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement."	Comment noted.
Scott Brittain	2/16/2018	Website	Texas is NOT of high enough population density to financially support a High-Speed train.	Refer to GN-2, GN-4 and NE-1.

Terry Brooks	1/29/2018	Oral	Good evening, everybody, and thank you for inviting me. And, like I say, there's been a lot of good comments made tonight. My name is Terry Brooks. I'm also a candidate for commissioner, Precinct 4. I've lived in Pursley all my life--1969. You know what? I love going outside and looking up in the stars. And you know what I hear? Nothing? That's the way I like to keep it. I'd just like to say, don't let this deceit and disaster in California come to our county, our countryside. It's going to be a 200-mile train coming through. You don't think that's not going to make any noise? It's going to make noise. It's going to change the routes of all of those country folks and everybody traversing east and west. You know, I'm in law enforcement. The last thing I want to know is if somebody, any neighbor, my family is in trouble and law enforcement's got to drive 10 miles around to get there. Well, you know, that's not acceptable. If someone's having a heart attack or their house is on fire, we don't want them to have to drive 10, 12 miles and have our people, our neighbors and families dying from this. What about the big land grab that they're doing coming through here? What if it goes belly up? Who owns the land then? What about the Super Collider that went belly up? Who owns that land? It's still out there. So what I'd like to do is just for everyone to come out and go, like they said, to this website	Refer to ED-12, LU-14, NE-1, NV-1, PI-7, PN-3 and SS-23.

Sharon Brow	1/29/2018	Handwritten	<ol style="list-style-type: none"> 1. Concern about Texas counties, Dallas, Ellis, Navarro, Freestone, Leon, Madison, Grimes, Harris and Wheeler. Endangered species-bald eagles, monarch butterfly, wood pecker, passenger pigeons, red wolf, gray wolf, migratory game birds, wood stork, Texas horn lizard, Brazos water snake, Houston toad, white face ibis, interior least tern, Cagle's map turtle, Ouachita, rock pocket mussel, including wildflowers of large fruited sand verbena, Navasota Indie tresses. 2. Concerns about water shed impact of flow and drainage of water in flood event. 3. Concerns about soil erosion. 4. concerns about livestock reproduction due to vibration and noise. 5. Noise pollution. 6. Re-routing roads and closing roads that are easier access for emergency situation. 7. Electromagnetic currents that "High Speed Rail" radiates. 8. Re-routing school districts 	Refer to NR-1, NR-2, NR-3, NR-4, NR-5, NV-1, SC-6, SC-8, SG-1, SS-16, SS-23, TR-8, WW-1 and WW-2. The Project does not radiate electromagnetic currents. Rather, the electric current used to power the Project does generate electromagnetic fields (EMFs), as discussed in Section 3.14.1, Socioeconomics and Community Facilities, Introduction . As discussed in Section 3.15.4, Electromagnetic Fields, Methodology : "The inverse square law applies to EMF. The inverse-square law means that EMF levels would substantially decrease with increased distance from the source. Therefore, for the purposes of this analysis, the EMF Study Area is defined as 500 feet from the centerline of the HSR track. Beyond this distance, the EMF would be below background levels."
Chris Brown	3/5/2018	Oral	Okay. Well, good evening, everyone. My name is Chris Brown. I'm the Houston City Controller, just here tonight to speak on behalf of the Texas High-Speed Rail. Really want to just put it in the framework from the economic perspective, because I'm the City Controller and charged with managing city tax payments, among other things. This project will generate 10,000 jobs in -- in Texas and in and around the Houston region and have over 1,500 permanent jobs after completion. Additionally, estimates are that that could translate to upwards of \$2.5 billion in increased property tax revenue. So you know, all of y'all know we've been hit with a natural disaster recently, Harvey. We've had a downturn in the economy because of that. This project can really help to lift up not only City of Houston, but all of Texas, and a lot of the areas that were going to be affected. I'll also say on a personal note -- and I was mentioning this to someone before -- my wife and I took a trip, actually, to Japan, and we rode on this exact train, the Shinkansen N 700 train. The experience from a transit experience is completely different than anything you're used to. There is no security PUBLIC HEARING - 3/5/2018 14 HANNA & HANNA, INC. [...] checkpoint lines, there are no long lines to get in. You literally get onto the train and you ride, and it's smooth, safe, on time. So it's something that you can actually get to where you're trying to go in a much faster frame of mind. So this is something I think that will revolutionize travel. It's something that I support personally; and I think from the City of Houston, absolutely, it's going to be something from an economic perspective that will help bring jobs and bring more efficiency for transportation throughout Texas. So, again, Chris Brown. Thank you very much and happy to be supporting this project.	Comment noted.
Connie Brown	2/6/2018	Handwritten	Has there been a study on ridership? How many people will ride? Is it truly feasible? How safe is it at the site & for the rider? How much is it to ride? The California train has had many problems & the tax payers had to bail it out Will that happen here? Are you applying for grants for funding? That is our tax money. We are paying for that. You have a habit modeling assessment. Why not have a real one Where will you get funding? How much land will you take? What price will you pay for animal you affect? How will you pay for electricity? Where will you get it? How will people get to their jobs or engagements from the stations as they don't go to downtown. Are you a public railroad? Crashes are being seen throughout the nation What kind of guarantee can you give. Why the changes in the documents? How greedy can you be? Road closures or reroutes, Why? NO BUILD OPTION.	Refer to BA-3, BA-6, GN-2, GN-4, GN-6, ED-1, EU-3, EU-4, LU-7, LU-14, NE-1, NR-5, PN-3, SC-3, SS-1, SS-12, TR-3, TR-4 and TR-8.
Divya Brown	2/16/2018	Website	Excellent news! Finally getting more transportation options in Texas. This is much needed and is the future for Texas.	Comment noted.

Dorothy Brown	3/1/2018	Website	Just interested	Comment noted.
Edna Brown	2/5/2018	Handwritten	Dear Sir, I am writing in response to the high speed railroad train. I do not want this train to come through here on my property. My husband and I bought this 4.9 acres in 73' and worked hard in the hay fields, grass fields and anything else we could to pay for it so we could hand it down to our children and grandchildren. It doesn't seem right for it to be destroyed by a train. It would come close to my house and also go through the water well up on the hill where I have gotten water from since I've been here. Now my husband passed away in 2005 and I am 78 soon to be 79 and I live by myself. I don't want a train coming through here. Why not go to Interstate 45 and go that way. At least that wouldn't be going through everyone's land. So no, I do not want this train. Thank you for my have to say what I think about the train coming through here. I pray God will see to it that they go some other route. Have you ever seen a grown man cry? Well I did, this young man is my neighbor and he cried at the thought of that train coming through will [sic]. There is a lot of people that it will hurt and destroy.	Refer to BA-9, LU-7 and WW-6. The property in question would not be directly impacted by the Project, but the Project would be constructed on viaduct approximately 700 feet east of the current residential structure.
Gary Brown	1/22/2018	Website	This is a much need project for Texas. I drive several times a month between Dallas and Houston and would be much safer to take the High Speed Rail. Too many delays with airlines, especially during the spring thunderstorms. Please push this forward for the benefit of many Texans in this area. Federal Railroad Administration	Comment noted.
Greg Brown	3/9/2018	Website	LETS DO THIS MOTHER FUCKING THING!!!!	Comment noted.
Jacob Brown	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.
Jan Brown	2/17/2018	Website	With Interstate 45 ranked as the second-deadliest highway in the U.S., averaging 56.5 fatal accidents per 100 miles of roadway, compared to 50 years of Japanese rail and not a single passenger killed or injured in an accident - not even, during the destructive March 11, 2011 earthquake, why would Texas not support this public-private partnership opportunity?	Comment noted.
Jan Brown	2/27/2018	Website	That jaunt from Dallas to Houston is one of the deadliest trips drivers can take, according to recent road safety data. Interstate 45 is now ranked as the second-most dangerous road in the U.S. This statistic alone should lend support to the proposed Japanese bullet train. The first Japanese bullet train, linking Tokyo and Osaka, had its maiden run on Oct 1, 1964, nine days before the opening of the Tokyo Olympics. In the 53 years since, not a single passenger has been killed or injured in an accident - not even, remarkably, during the monstrosly destructive March 11, 2011 Great East Japan Earthquake. For public safety and ease of travel, please support this worthwhile endeavor.	Comment noted.
Reese Brown	1/29/2018	Oral	My name is Reese Brown, and I have property in Richland where the proposed rail is coming through. I have primarily imminent domain questions. How can a corporation be a railroad when they don't own one rail car, they don't have any passengers, they don't have any cars, and yet they've incorporated and call themselves a railroad? I incorporated not very long ago, and I don't have any rail cars and I don't have a railroad, and I don't think anybody thinks I'm a railroad. But suppose the -- I have some questions also about the imminent domain. Who -- how are they going to acquire the dirt and the water to build the elevated berms? Are they going to take that by imminent domain also, or are they going to pay market prices for it? And if so, if they pay market prices, that's fine; they can get it wherever they can sell it. But if they condemn it, how far away can they condemn the property that has nothing to do with the railroad? The other question is that -- I can't think of any other questions right now, so I'll yield the rest of my time. Thank you very much.	Refer to ED-1, ED-2 and LU-14.
Reese & Sara Brown	3/2/2018	Email	This is Reese Brown. I would like to know how the high speed rail could do an environmental impact study on my land without ever stepping on my land . TARKA Pipeline just purchased an easement across my property and their environmental study required them to be on the property at lease 3 separate times over a period Of six months. I have property in Navarro county that numerous Native Indians relics have been discovered and I have no idea what might be in the path of the proposed track. The HSR certainly will have a much larger impact environmentally than a pipeline.	Refer to GN-1 and NE-8.

Reese and Sara Brown	1/31/2018	Email	How can a private company, like Texas Central Partners, which is financially backed by a Japanese bank claim eminent domain?	Refer to ED-1.
Sherry Brown	2/16/2018	Website	Build the train	Comment noted.
William Brown	2/16/2018	Website	The real question that needs to be asked is. Why would you not want to have another way for cheap fuel consumption. This can be and should be linked to all major cities in the USA. The thousands of jobs it will produce over the years is just one reason for a YES vote. I can hear people now say "but the cost of this train will be enormis". Just see how much it will coat you 20 years from now when you will have to have this train. Sometimes cost needs to be looked at in futor not right at this time. I hope one day after it is all done that I will be able to take this train from Houston to Dallas. I vote a thousand times YES!!!	Comment noted.
William Brown	2/16/2018	Website	This type train is what I believe to be the first one of it kind in the United States of America. This could revolutionize the long distance travel, all over the U.S.	Comment noted.
Edward Browne	3/5/2018	Website	The high-speed rail line should also be considered as an escape route when there's eminent threat from a hurricane or extreme rain event. The route is entirely elevated so is less likely to suffer flooding and can move prodigious amounts of people quickly. Recall the fiasco of Rita when much of Houston was trapped on Interstates doubling as parking lots. It's important that the FRA grant rights of eminent domain or the route will not succeed. Concerns about noise and vibration seem to be overstated. Vibration at 220 mph would literally tear the train apart. There are no pistons or any internal combustion that would would create significant vibration. Multi-phase electric motors would no create vibration. There is some noise when two trains pass, but it's of quite short duration. There is also some noise from the electrical pickup shoe, but again that's higher frequency so doesn't travel far. When inside the city limits the train reduces speed and is quite a bit quieter. With no crossings there's not the incessant train horn. Using rail on the Houston to Dallas route is about 6 times more efficient than air and produces much less CO2. Obviously greenhouse gases are linked to the source of power, but Texas seems to be increasing its mix of green energy. For most of the route, the train is elevated on a viaduct, so the actual footprint on properties and in floodplains is minimized. Most of the complaints from ranchers and farmers that I've heard seem to be a result of intrusive and obnoxious land attorneys. Our daughter will be attending Texas A&M and the prospect of being able to quickly join her should there be any issue is quite appealing. Similarly, we have family in the DFW area and would enjoy quick and comfortable visits. For a year and a half, I commuted to Dallas on an engineering project. After the first few trips, it became incredibly boring and, hence, unsafe. Since I had to carry equipment with me, airline travel wasn't an option and it wasn't much of a time-saver anyway. There's significant economic viability with this route. The Houston area where the train will terminate is blighted and in need of revitalization. It's clear that there are large economic incentives for this rail line to be successful. Retail space inside the train station will have constant traffic and will be a welcome respite for travelers. The Galleria is nearby and will be connected by METRO BRT. The Northwest Transit Center could have a light rail loop between it and the station to deliver travelers to buses departing for all parts of the city. Consider, too, possible plans to connect METRO LRT to the downtown Amtrak and LRT system by utilizing space down the center of I-10. That path could be extended west in the median of I-10 to service West Houston. Currently I-10 is gridlocked, despite being one of the largest highways in the World. (Lower emissions, increased safety, improved productivity.) Although state highway 290 will soon be finished, it will also become congested within 5-10 years. Plans to build a commuter rail line down Hempstead Highway could alleviate some of this congestion and could also terminate at the NW Transit Center or the TCR terminal. I strongly urge you to look towards the future and the positive impacts of a successful high-speed rail project. Thank you, Ed Browne	Comment noted.
Jacob Browning	1/29/2018	Oral	Jacob Browning from Downtown Dallas Inc. On behalf of Downtown Dallas Inc., we voice our support for the approval of the Draft EIS that will allow Texas Central to construct the high-speed railway and this planned station in the downtown area. Envisioned as a catalytic development area of downtown Dallas's newly adopted strategic plan, a rail station will be a substantial economic force bringing additional housing, retail, and office space to a prime location in Dallas, all the while reconnecting downtown to the southern neighborhoods. The railway's connection to Houston is also recognized as a game changer, connecting the state's largest metro centers creating a synergistic economy in which people, and ultimately their ideas, can more easily be transmitted with the implementation of this railway. We look forward to our continued partnership with Texas Central to bring about the most successful and well integrated high-speed rail station in downtown Dallas. Thank you.	Comment noted.
Shelley Broyles	3/9/2018	Website	I am looking forward to a fast, cost-effective way to get from Dallas to Houston and hope this is it. I do wish the Houston station was more centrally located.	Refer to GN-9 and TR-4.
Billy Bruce	2/17/2018	Website	HSR is not needed between Dallas and Houston. The impact on the environment will be devastating and the tax payers will be expected to pay for cleaning up the mess!!!!!!	Refer to GN-4, NE-9, and PN-3.
Billy Edd Bruce	2/9/2018	Letter	Reference: High Speed Rail/Dallas-Houston, Texas The high speed rail project proposed for the Dallas/Houston corridor is a complete waste of time and money. As a property owner in Navarro County, Texas, I am not directly affected. As a payer, this will be a huge boondoggle. It is supposed to be financed with private money but when the project gets in financial trouble and it will, the tax payers will asked to assume the burden. The rider ship, the environmental impact and the impact on state of Texas is all based on flawed information. Items pmjected as fact	Refer to GN-1, GN-2, GN-4, NE-1, NE-9 and PN-3.

Pat Bruegger	2/6/2018	Oral	Back in the '85, '87, sometime, we had a rail that went from Houston to Galveston so we could go to the beach. Even that couldn't be financially viable. It didn't even last a summer.	Refer to GN-4 and NE-1.
Pat Bruger	2/6/2018	Oral	My name is Pat Bruger: and this is going to be a disconnected statement You spend a lot of money presenting all of your boards. I would like to see that same effort put forth that shows me the financials: that shows me the money trail that makes this viable. This has been available since 2002 or 2009 _ In that kind of time, you should be able to prove to me that you have the funding in place that makes this cost efficient for you and no cost to me. Somebody touched on this a little bit ago about terrorism: but anything, any kind of tram accident it'll be horrific. That's never been addressed and it is again, until it happens: we don't concern ourselves with it. Big mistake. We have one of the largest veterans' community in the entire state located here. They can't even easily live through July 4th. Think about what this is going to do to all of those people that live here and what's going to happen to them. You talked about that you've gone and surveyed people's land where you've been allowed to. rm curious as to who these surveyors are, because rm really sorry. There is a very big difference between city people and country people. Is it city people who have no clue about land and the value: and the meaning to families? None whatsoever. Good or bad. That's just the reality of it. Dirt people are very different than city people. They don't even begin to understand. The last thing that I'd like to talk about is there's a real difference between learning something in a book and learning it in real life. And that appears to be what you're trying to sell us is the reality of what you're telling us and the reality of what we know to be true. Since this has been talked about for about 15 years: there is no reason that we have this little short period of time: 20, 30, 45, 100 days to respond to your environmental study. It didn't take you 15 days: 60 days: 100 days to create it. We should as much time as to respond as it did to create that document of 52000-some-odd pages Thank you.	Refer to GN-2, GN-4, NE-1, NE-8, NV-1, PI-1, PI-3, SS-6 and SS-7. For potential increased annoyance due to the startle effect of noise from passing HSR trains, this effect would only occur within about 45 feet of the HSR tracks. This distance is within the fenced ROW; therefore, increased noise annoyance due to startle would not occur as access to this area would not be permitted.
Dan Brumbaugh	2/22/2018	Email	I support the Texas Bullet Train and the mall station location! Our current situation is unsustainable. I'm absolutely certain these trains are a big part of the solution. Look at mass transit in the Northeastern USA!	Comment noted.
William K. Brune	2/5/2018	Handwritten	I support the high speed rail project. I did not read anything in the environmental impact statement which would disqualify the project. I urge its approval to proceed to construction as soon as possible.	Comment noted.

Jill Brunkenhoefer	2/26/2018	Website	The Morgan Legacy Farms is an invaluable and beautiful place to decompress, relax and spend time with my family and friends. It was created to serve as an oasis to family and friends of Brenda and Bob Morgan, as well as contribute to the local community, economy, and environment through development and improvement of the land and of multiple free standing buildings on the property, each with its unique purpose. It's location close to the DFW metroplex allows easy and frequent visits; I fear that if the high speed rail goes through the property there will not be a comparable location. I am a veterinarian in the DFW metroplex, a job that has makes for high stress levels daily. The Morgan Creek Ranch provides a safe location, free of charge to me, that can give me a chance to clear my head, relax and forget about the stress of the every day job. It is key to maintaining a healthy mentality. A move north towards the existing powerlines would keep the ranch intact.	Refer to LU-5.
Jill Brunkenhoefer	2/26/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5.

I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5.
Jill Brunkenhoefer	2/26/2018	Website	The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory water fowl of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals	Refer to LU-5, NR-2, WW-1 and WW-2. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species

			including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. Furthermore, I am concerned about the environmental detriment to animals living in the area.	and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .
Jill Brunkenhoefer	2/27/2018	Website	I want the rail to move north to the power lines and avoid Morgan legacy farms.	Refer to LU-5.
Jill Brunkenhoefer	2/27/2018	Website	I recommend to move the proposed route north towards the existing power lines to avoid environmental changes near morgan legacy farms.	Refer to LU-5.
Jill Brunkenhoefer	2/27/2018	Website	I vote for a move north, towards the power lines, to avoid morgan legacy farms as there is substantial chArity contribution of that farm.	Refer to LU-5.
Jill Brunkenhoefer	2/27/2018	Email	I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property and will potentially cause serious watershed issues. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement.	Refer to LU-5.

Jill Brunkenhoefer	2/28/2018	Website	Morgan Legacy Farms is an invaluable and beautiful place to decompress, relax and spend time with my family and friends. The farm was created to serve as an oasis to family and friends of Brenda and Bob Morgan, as well as contribute to the local community, economy, and environment through development and improvement of the land and of multiple free standing buildings on the property, each with its unique purpose. It's location close to the DFW metroplex allows easy and frequent visits; I fear that if the high speed rail goes through the property there will not be a comparable location. I am a veterinarian in the DFW metroplex, a job that has makes for high stress levels daily. Morgan Legacy Farms provides a safe location, free of charge to me, that can give me a chance to clear my head, relax and forget about the stress of the every day job. It is key to maintaining a healthy mentality. After educating myself in the current potential location through the Morgan Legacy Farms I firmly believe the other proposed option, north of the ranch near the power lines, would have less detrimental effects on the environment but also help my family and friends maintain healthy, reduced stress life styles.	Refer to LU-5.

			Stables the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared. Our office staff has had over 100 employees and family members visit this ranch, ride horses, take hay rides and enjoy the unique experience not offered by any similar property....all at no cost. I would ask that this 5-7 mile portion scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic on the county that would occur if Morgan Legacy Farm is traversed.

Jill Brunkenhoefer	2/28/2018	Email	The Morgan Legacy Farms is an irreplaceable oasis for so many people. Over 900 people have visited this ranch which include church groups, Girl and Boy Scouts, Military Personnel, Police and Fire, students, and various political and professional persons, each has gotten to reap the benefits of the ranch. There is no comparable property near DFW that provides so many positive aspects, while remaining free to so many people. I strongly encourage you to consider changing the proposed route of the high speed rail to that location north of the ranch, near the power lines, as the benefit strongly outweighs the cost to those associated with Morgan Legacy Farms.	Refer to LU-5.

			the ranch. There is no comparable property near DFW that provides so many positive aspects, while remaining free to so many people. I strongly encourage you to consider changing the proposed route of the high speed rail to that location north of the ranch, near the power lines, as the benefit strongly outweighs the cost to those associated with Morgan Legacy Farms.	
Jill Brunkenhoefer	3/7/2018	Website	The current preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory water fowl of the US. It will also cause the loss of multiple lakes on the Morgan Legacy Farms. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. The Morgan Legacy Farms is an irreplaceable oasis for so many people. Over 900 people have visited this ranch which include church groups, Girl and Boy Scouts, Military Personnel, Police and Fire, students, and various political and professional persons, each has gotten to reap the benefits of the ranch. There is no comparable property near DFW that provides so many positive aspects, while remaining free to so many people. I strongly encourage you to consider changing the proposed route of the high speed rail to that location north of the ranch, near the power lines, as the benefit strongly outweighs the cost to those associated with Morgan Legacy Farms.	Refer to LU-5.

A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. The Morgan Legacy Farms is an irreplaceable oasis for so many people. Over 900 people have visited this ranch which include church groups, Girl and Boy Scouts, Military Personnel, Police and Fire, students, and various political and professional persons, each has gotten to reap the benefits of the ranch. There is no comparable property near DFW that provides so many positive aspects, while remaining free to so many people. I strongly encourage you to consider changing the proposed route of the high speed rail to that location north of the ranch, near the power lines, as the benefit strongly outweighs the cost to those associated with Morgan Legacy Farms.	Refer to LU-5.
Jill Brunkenhoefer	3/7/2018	Website	The current preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory water fowl of the US. It will also cause the loss of multiple lakes on the Morgan Legacy Farms. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. Over 900 people have visited this ranch which include church groups, Girl and Boy Scouts, Military Personnel, Police and Fire, students, and various political and professional persons, each has gotten to reap the benefits of the ranch. There is no comparable property near DFW that provides so many positive aspects, while remaining free to so many people. I strongly encourage you to consider changing the proposed route of the high speed rail to that location north of the ranch, near the power lines, as the benefit strongly outweighs the cost to those associated with Morgan Legacy Farms.	Refer to LU-5.
Jill Brunkenhoefer	3/7/2018	Website	There are multiple reasons why the rail route should change, if possible. The current preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory water fowl of the US. It will also cause the loss of multiple lakes on the Morgan Legacy Farms. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. The Morgan Legacy Farms is an irreplaceable oasis for so many people. Over 900 people have visited this ranch which include church groups, Girl and Boy Scouts, Military Personnel, Police and Fire, students, and various political and professional persons, each has gotten to reap the benefits of the ranch. There is no comparable property near DFW that provides so many positive aspects, while remaining free to so many people. Over 900 people have visited this ranch which include church groups, Girl and Boy Scouts, Military Personnel, Police and Fire, students, and various political and professional persons, each has gotten to reap the benefits of the ranch. There is no comparable property near DFW that provides so many positive aspects, while remaining free to so many people. I strongly encourage you to consider changing the proposed route of the high speed rail to that location north of the ranch, near the power lines, as the benefit strongly outweighs the cost to those associated with Morgan Legacy Farms.	Refer to LU-5.

			of the high speed rail to that location north of the ranch, near the power lines, as the benefit strongly outweighs the cost to those associated with Morgan Legacy Farms.	
Jill Brunkenhoefer	3/7/2018	Website	There are multiple reasons why the rail route should change, if possible. The current preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory water fowl of the US. It will also cause the loss of multiple lakes on the Morgan Legacy Farms. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. The Morgan Legacy Farms is an irreplaceable oasis for so many people. Over 900 people have visited this ranch which include church groups, Girl and Boy Scouts, Military Personnel, Police and Fire, students, and various political and professional persons, each has gotten to reap the benefits of the ranch. There is no comparable property near DFW that provides so many positive aspects, while remaining free to so many people. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. The Morgan Legacy Farms is an irreplaceable oasis for so many people. Over 900 people have visited this ranch which include church groups, Girl and Boy Scouts, Military Personnel, Police and Fire, students, and various political and professional persons, each has gotten to reap the benefits of the ranch. There is no comparable property near DFW that provides so many positive aspects, while remaining free to so many people. I strongly encourage you to consider changing the proposed route of the high speed rail to that location north of the ranch, near the power lines, as the benefit strongly outweighs the cost to those associated with Morgan Legacy Farms.	Refer to LU-5.
Jill Brunkenhoefer	3/7/2018	Website	There are multiple reasons why the rail route should change, if possible. The current preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory water fowl of the US. It will also cause the loss of multiple lakes on the Morgan Legacy Farms. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. The Morgan Legacy Farms is an irreplaceable oasis for so many people. Over 900 people have visited this ranch which include church groups, Girl and Boy Scouts, Military Personnel, Police and Fire, students, and various political and professional persons, each has gotten to reap the benefits of the ranch. There is no comparable property near DFW that provides so many positive aspects, while remaining free to so many people. Refer to LU-5.
Jill Brunkenhoefer	3/7/2018	Website	I am and veterinarian and use Morgan Legacy Farms as a place for personal rejuvenation, the current proposed route would destroy this land. The daily stress of work piles up and the ranch allows me and my family much needed emotional support. My husband is an engineer and he has explained that there are other many reasons the proposed route could benefit from moving north, towards the powerlines, including water drainage problems due to the elevation of the train's location, likely drying up of existing ponds (which support lots of wild life), blocking multiple private homes from access to main roads, and destroying multiple existing buildings. Please strongly consider moving the route north, towards the existing power lines as this will allow Morgan Legacy Farms to stay intact - an environmental, personal health, and engineering benefit.	Refer to LU-5.

Jill Brunkenhoefer	3/8/2018	Website	I am and veterinarian and use Morgan Legacy Farms as a place for personal rejuvenation, the current proposed route would destroy this land. The daily stress of work piles up and the ranch allows me and my family much needed emotional support. My husband is an engineer and he has explained that there are other many reasons the proposed route could benefit from moving north, towards the powerlines, including water drainage problems due to the elevation of the train's location, likely drying up of existing ponds (which support lots of wild life), blocking multiple private homes from access to main roads, and destroying multiple existing buildings. Please strongly consider moving the route north, towards the existing power lines as this will allow Morgan Legacy Farms to stay intact - an environmental, personal health, and engineering benefit. Refer to LU-5.
Jill Brunkenhoefer	3/8/2018	Website	I have been informed that the FRA would like to build a high speed rail through the Morgan Creek Ranch and I have concerns about the proposed location. The Morgan Creek Ranch (listed on tax roles as Morgan Legacy Farms) is an invaluable and beautiful place to decompress, relax and spend time with my family and friends. The Morgan Creek Ranch was created to serve as an oasis to family and friends of Brenda and Bob Morgan, as well as contribute to the local community, economy, and environment through development and improvement of the land and of multiple free standing buildings on the property, each with its unique purpose. It's location close to the DFW metroplex allows easy and frequent visits; I fear that if fre high speed rail goes through the property there will not be a comparable location. I am a veterinarian in the DEW metroplex, a job that has makes for high stress levels daily. The Morgan Creek Ranch provides a safe location, free of charge to me, that can give me a chance to dear my head, relax and forget atm't the stress of the every day job. It is key to maintaining a healthy mentality. The Morgan Creek Ranch has also opened its doors to many, many of my friends and coworkers (again, at no charge) so they are able to enjoy the mental and physical benefits of being outside in such a beautiful location. The ranch allows us to build relationships through time well spent together, partaking in activities including fishing in multiple ponds, raising local quail, deer, and farm animals from birth, and even horse back riding. The ranch provides culture and education to those learning about farm life. My goddaughter touched her first horse at Morgan Creek Ranch and watching her face light up with excitement, her brain working in over drive to learn something new, and then be able to teach her about animals and their importance is indescribable, for both of us. The ranch has provided me with hundreds more stories just like that precious time with my goddaughter. If Morgan Creek Ranch is destroyed with the current proposed rail route, occurrences like that will be obsolete. It's my understanding that the current proposed location of the rail would run through essentially the middle of the ranch and devastate the wildlife populations, creating a complete change and even loss in the environmental fortitude of Navarro County. The ranch is home to many species of birds, fish, and Other wildlife. With the expansion Of the DFW metroplex, we cannot allow sustainable areas like this to be destroyed.	Refer to LU-5.
Jill Brunkenhoefer	3/9/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5.

Jill Brunkenhoefer	3/9/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5.
Texas AirSystems	2/23/2018	Website	I have serious concerns about the proposed route in portions of Navarro County. Area of concern is at intersection of CR3194 and CR709. The proposed route intersects a three-way intersection requiring significant engineering and rerouting of county roads and the access roads to surrounding properties. The proposed route parallels a county road which would require a large berm blocking access to property south of 3194. This would also create water shed, expansion concerns, and emergency vehicle problems. The proposed route could also block expansion of CR3194 and future development along CR3194. An Alternate Route North of the existing power line grid would provide better option and solution to issues noted. I strongly encourage you moving the rail North of existing power line grid away from intersection of CR3194/CR709	Refer to LU-5.
Texas AirSystems	2/28/2018	Website	I have serious concerns about the proposed route in portions of Navarro County. Area of concern is at intersection of CR3194 and CR709. The proposed route intersects a three-way intersection requiring significant engineering and rerouting of county roads and the access roads to surrounding properties. The proposed route parallels a county road which would require a large berm blocking access to property south of 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5.
Travis Brunkenhoefer	2/23/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easment would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment, prove less damaging to the county in the long term, and provide better construction access.	Refer to LU-5, WW-1 and WW-2.
Travis Brunkenhoefer	2/23/2018	Website	I have been informed that the FRA would like to build a high speed rail through the Morgan Creek Ranch and I have concerns about the proposed location. It's my understanding that the current proposed location of the rail would run through essentially the middle of the ranch and devastate the wildlife populations, and even loss in the environmental fortitude of Navarro County. The ranch is home to many species of birds, fish, and other wildlife. With the expansion of the DFW metroplex, we cannot allow sustainable areas like this to be destroyed. The proposed route could also block expansion of 3194 and future development along 3194. A relocation of the rail North of the existing power line grid would provide a better route for rail. A move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .
Travis Brunkenhoefer	2/23/2018	Website	I have serious concerns about the proposed route in portions of Navarro County. Area of concern is at intersection of CR3194 and CR709. The proposed route intersects a three-way intersection requiring significant engineering and rerouting of county roads and the access roads to surrounding properties. An Alternate Route North of the existing power line grid would provide better option and solution to issues noted. I strongly encourage you moving the rail North of existing power line grid away from intersection of CR3194/CR709	Refer to LU-5.
Travis Brunkenhoefer	2/23/2018	Website	Reviewing over topographical maps for this area shows that the highest elevation is located on Morgan Creek Ranch property. The elevation changes from high point located on Morgan Creek Ranch and the area surrounding intersection of CR 709 and 3194 shows that the train would both be significantly below grade and then rapidly elevated creating watershed issues, access issues, and cosmetically detractive issues. Alternate routes need to be reviewed in this section 3 of the rail at location of CR709 / CR3194. A small change to the rail would provide an alternate route that would parallel already existing power line grid. If the proposed route was blended with a small change in this	Refer to LU-5.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
			small area, both the rail and existing high-tension power lines would run parallel thus creating less environmental and esthetic impact. It seems much more appropriate to run the train next to a high voltage power grid already existing rather than run more high towers through the middle of elevation changes. If this small move is made the train would cross 709 at an already existing utility easement and would not adversely affect the three way intersection and would not limit CR 3194. Ongoing road maintenance would be simplified as would water shed. I strongly encourage you to consider changing the proposed route of the rail to the location north of the ranch, near the existing power line grid, as the benefit strongly outweighs the current proposed route.	
Travis Brunkenhoefer	2/24/2018	Website	I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property and will potentially cause serious watershed issues. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement.	Refer to LU-5. Properties that front FM 3194 are no longer impacted and access would not be impacted by the Project. The Project would, however, still impact some landowners in the area, specifically the rear of parcels.
Travis Brunkenhoefer	2/24/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easment would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment, prove less damaging to the county in the long term, and provide better construction access.	Refer to LU-5.
Travis Brunkenhoefer	2/24/2018	Website	I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property and will potentially cause serious watershed issues. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement.	Refer to LU-5 and TR-10.
Texas AirSystems	2/25/2018	Website	I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property and will potentially cause serious watershed issues. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement.	Refer to LU-5. Travis Brunkenhoefer	2/26/2018	Website	will potentially cause serious watershed issues.	Comment noted.
Travis Brunkenhoefer	2/28/2018	Website	I have been informed that the FRA would like to build a high speed rail through the Morgan Creek Ranch and I have concerns about the proposed location. It's my understanding that the current proposed location of the rail would run through essentially the middle of the ranch and devastate the wildlife populations, and even loss in the environmental fortitude of Navarro County. The ranch is home to many species of birds, fish, and other wildlife. With the expansion of the DFW metroplex, we cannot allow sustainable areas like this to be destroyed. The proposed route could also block expansion of 3194 and future development along 3194. A relocation of the rail North of the existing power line grid would provide a better route for rail. A move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5.
Travis Brunkenhoefer	2/28/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. Refer to LU-5.
Travis Brunkenhoefer	2/28/2018	Website	Reviewing over topographical maps for this area shows that the highest elevation is located on Morgan Creek Ranch property. The elevation changes from high point located on Morgan Creek Ranch and the area surrounding intersection of CR 709 and 3194 shows that the train would both be significantly below grade and then rapidly elevated creating watershed issues, access issues, and cosmetically detractive issues. Alternate routes need to be reviewed in this section 3 of the rail at location of CR709 / CR3194. A small change to the rail would provide an alternate route that would parallel already existing power line grid. If the proposed route was blended with a small change in this small area, both the rail and existing high-tension power lines would run parallel thus creating less environmental and esthetic impact. It seems much more appropriate to run the train next to a high voltage power grid already existing rather than run more high towers through the middle of elevation changes. If this small move is made the train would cross 709 at an already existing utility easement and would not adversely affect the three way intersection and would not limit CR 3194. Ongoing road maintenance would be simplified as would water shed. I strongly encourage you to consider changing the proposed route of the rail to the location north of the ranch, near the existing power line grid, as the benefit strongly outweighs the current proposed route.	Refer to LU-5.
Travis Brunkenhoefer	2/28/2018	Email	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. Travis Brunkenhoefer	2/28/2018	Email	I have serious concerns about the proposed route in portions of Navarro County. Area of concern is at intersection of CR3194 and CR709. The proposed route intersects a three-way intersection requiring significant engineering and rerouting of county roads and the access roads to surrounding properties. The proposed route parallels a county road which would require a large berm blocking access to property south of 3194. This would also create water shed, expansion concerns, and emergency vehicle problems. The proposed route could also block expansion of CR3194 and future development along CR3194. An Alternate Route North of the existing power line grid would provide better option and solution to issues noted. I strongly encourage you moving the rail North of existing power line grid away from intersection of CR3194/CR709	Refer to LU-5.

Travis Brunkenhoefer	3/8/2018	Website	Reviewing over topographical maps for this area shows that the highest elevation is located on Morgan Creek Ranch property. The elevation changes from high point located on Morgan Creek Ranch and the area surrounding intersection of CR 709 and 3194 shows that the train would both be significantly below grade and then rapidly elevated creating watershed issues, access issues, and cosmetically detractive issues. Alternate routes need to be reviewed in this section 3 of the rail at location of CR709 / CR3194. A small change to the rail would provide an alternate route that would parallel already existing power line grid. If the proposed route was blended with a small change in this small area, both the rail and existing high-tension power lines would run parallel thus creating less environmental and esthetic impact. It seems much more appropriate to run the train next to a high voltage power grid already existing rather than run more high towers through the middle of elevation changes. If this small move is made the train would cross 709 at an already existing utility easement and would not adversely affect the three way intersection and would not limit CR 3194. Ongoing road maintenance would be simplified as would water shed. I strongly encourage you to consider changing the proposed route of the rail to the location north of the ranch, near the existing power line grid, as the benefit strongly outweighs the current proposed route.	Refer to LU-5.

Craig Bryant	1/31/2018	Email	Please give at least a 90 day extension to the public comment time. This is a very short timeframe to go over the entire report. This will completely ruin my property value along with my peace and quiet of living in the country so I require a little more time to look over the report.	Refer to PI-3.
Jo Bryant	1/24/2018	Email	The bullet train is another idea that should be put to bed. It's a money pit, will be under construction so long it will be out of date if it is ever finished. It will cost billions more than estimated and will uproot people from their homes supposedly for the public good. There is a fast way between Dallas and Houston. It's called an airplane!	Refer to BA-12, NE-1, PN-3 and TC-2.
Sam Bryant	1/29/2018	Oral	Good evening. Thank you for the opportunity. I'm Sam Bryant. I'm a veteran. I did 14 years in the service in the Army. I was Airborne. I spent my time in the Airborne infantry. I was deployed two times in Iraq and one in Afghanistan. My dream was to get out and buy me some land, build a ranch. And I never think back. I'll never forget the fact that I look back and the longest ambush I was ever in was 49 minutes and 26 seconds on a combat search and rescue mission for two Navy guys. I come home. I bought my place. It was a dream. I settled down got married to my wife, which she is in the Military, too. We met back in 2006. So here we are; a new baby girl, healthy as can be, now by a miracle, and we're going to build a life. It turns out where I bought my land where my ranch sits today, my PawPaw, Roy Louis Bryant, used to pick cotton on my place as a boy. I never knew that until he came out and told Blooming Grove was on my PawPaw's family [sic]. So I was kind of reunited back with this side of the family after all these years having been away from home. And to hear about this imminent domain, how could the very government that I swore to defend the Constitution against foreign enemies, foreign and domestic, to find out that they're going to attempt to try to use a scare tactic of imminent domain to scare these people out of their land? What kind of dream is that? I mean, I'd be nuts to be on that. I mean, I need raise a family here, though. Some of these people have raised their kids. You can't put a price tag on the memories that you're going to take away by running this rail right through their land. I tell you what, I mean, when they say don't mess with Texas, I tell you what, you might as well take all them fancy boots you bought before you came out here to put on a good show like you was some country, take them boots back. Get a refund on those boots.	Refer to ED-1.
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re: TCR HSR EIS: There is the potential that some of the land and environmental survey data that is included in the draft EIS was obtained without the approval of the landowner. The majority of the landowners chose not to allow access to their property on the permission form issued by the survey company (acting under the authority of TCR). Until it can be proven that any such data was obtained lawfully and without coercion, by and through an affidavit or other legally binding document from each affected property owner, the FRA should abstain from utilizing any such information until it can be validated and shown to be lawfully obtained. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved The NO BUILD option should be chosen as the only viable option in the final EIS.	Refer to GN-1, NE-1 and NE-8.
Gary Brye	2/6/2018	Handwritten	The TCR HSR is required to obtain County building permits for construction. In order to obtain such permits, TCR is required to show proof of Eminent Domain powers/authority. Although representatives from TCR have implied they have Eminent Domain rights and powers, TCR has been unwilling or unable to prove they have such authority. No further work should be taken on the draft EIS until this issue is resolved. As a	Refer to ED-1, ED-3, NE-1 and NE-8.

			result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS.	
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re: TCR HSR EIS: The draft EIS apparently is utilizing a large amount of regional non- specific data versus specific studies and field inspections "boots-on-the- ground" evaluations. The information contained in the draft EIS is fatally flawed is that it is not using project specific data such as the identification of endangered species. The draft EIS does not contain information concerning the inspection, evaluation, and analysis of areas where the endangered Houston Toad and the Navasota Ladies Tresses live. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS.	Refer to NR-4.
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re: TCR HSR EIS: The draft EIS does include information about expected property values at and around the proposed HSR stations, but does NOT include specific information on proposed property value "decreases" away from the stations and along the proposed route. These areas, such as my own, must be evaluated to credibly and fully understand the effect the HSR will have on property values. The proposed HSR will cause property values to decrease, thus leading to a severe loss oftax revenues. The proposed HSR can and will have an affect on the sales prices of property not only in close proximity to the actual proposed HSR track site, but within h to 1 mile from the proposed site. With this project on the drawing board, the HSR should be disclosed to potential buyers. Why would someone want to purchase property in a rural setting close to this proposed HSR, just to listen to a loud train two to three times per hour (this is how often TCR has stipulated the train will pass by)? The simple answer is, they will not. They will purchase elsewhere. The draft EIS shows no correlation to the property values near the proposed track route. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS.	Refer to NE-1 and VA-1.
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re. TCR HSR EIS: The draft EIS fails to adequately address and mitigate the damage the HSR can cause to the current sources of water utilized by residents in the rural areas. Surface springs or spring fed creeks potentially would be destroyed by soil disturbance and the movement/run-offof fill materials and excavation materials from the proposed construction project. Although not as detrimental in the urban areas, these creeks an springs are very important for the farmers and ranchers in the rural areas at they pertain to the growing of crops and feeding of livestock. No mitigation plan or evaluation/analysis of how this project can affect the sources Of water we rely on. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS.	Refer to WW-2.
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re. TCR HSR EIS: The draft EIS is significantly lacking in the evaluation and analysis of the expected harm that the noise, vibration, and electrical current would have on the public's health and wellbeing, as well as the integrity of buildings in close proximity to the proposed rail site. The discussion in the draft EIS needs to be much more detailed in that the subdivision I live in with within 1500 feet ofthe proposed rail line. Table 3.4-12 indicates that in Waller County, the train noise would be over the mid and severe limits/levels for FRA at locations up to 1000 feet away from the tracks. The draft EIS only reports levels for one train, but it is expected that two trains will pass each other at frequent intervals. The draft EID should be much more specific in the analysis and evaluation of noised factors contributed by the proposed HSR. The draft EIS must address under what parameters noise mitigation must be installed, just as is the case with roadway and freeway planning. Why should TCR be exempted from this requirement? As to the vibration table 3.4-14, there is no base line for current measurements. The draft EIS states vibration levels for Waller County will be 54. To what percent increase does this figure equate to in comparison to current environmental factors? Woefully lacking in analysis and of noise and vibration impacts. As a result of the aforementioned information, The FRA must cease andfurther work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS.	Refer to NV-1.
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re: TCR HSR EIS: The draft EIS does not adequately address the issue of water run-off, pooling, retainage, or flooding. There is no specific information contained in the document that directly speaks to the potential impacts residents and communities can and will face as this construction project relates to water run-off, pooling, retainage, or flooding. I reside in the Spring Creek watershed area where five creeks are going to be affected by the proposed rail route. What residual problems are going to be created by the displacement of water in these creeks and watershed? The EIS has not taken this into consideration. My property has been covered with water during the last two storm events. With the HSR's displacement of water, this flooding can only get worse. With new construction, building requirements stipulate retention ponds are to be "designed" in order to mitigate this dilemma. I found nothing in the EIS that addresses this concern. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS.	Refer to FP-1, NE-1, WW-1, WW-2 and WW-8.
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re: TCR HSR EIS: The draft EIS does not address the environmental requirements or expectations regarding temporary construction sites. The EIS is silent on what condition these sites must be maintained after construction is completed. Can the sites	Refer to BA-6 and LU-10.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
			be left as is? He EIS should stipulate that these temporary construction sites should left at their original or better condition. No stipulation as to after-the-fact environmental conditions have been included in the EIS. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS.	
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re: TCR HSR EIS: The draft EIS does not specifically address or evaluate the environmental impact to property on or near where fill material is removed from private or public property for use during the TCR construction project. The draft EIS does not identify or stipulate to what condition the land must left or maintained. No stipulation as to environmentally friendliness. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved The NO BUILD option should be chosen as the only viable option in the final EIS.	Refer to LU-10 and LU-14.
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re: TCR HSR EIS: The construction of the rail line will cause, potentially irreparable harm, to existing private, City, County, State, and Federal road and highway infrastructures. The expectation of these damages has not been satisfactorily address in the draft EIS, as they relate to the increased traffic flow and transport weights vs. normal traffic. Furthermore, the draft EIS should contain language on who is responsible for the costs associated with any such maintenance/repairs as a result of these damages. It is only fair to the public that they are made aware of any and all financial obligations that may arise out Of this construction project. Not only should the draft EIS contain information on who is responsible for the costs associated with the above instances, but furthermore, the time line for any such repairs. Lastly, if the construction access requires the building of new roadways, etc., upon completion, who will own such roadways and who will be responsible for the maintenance and upkeep of such roadways, Lack of presentation and documentation on who is ultimately responsible for the maintenance and repairs Of such roadways. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS.	Refer to NE-1, TR-6 and TR-7. The traffic control plan would require safe and efficient travel during construction, which would require that roads be repaired so that travel can be completed safely. Coordination would occur between TCRR and local agencies as permits are released.
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re: TCR HSR EIS: The construction of the rail system will have increased traffic flow disruptions. The draft EIS does not adequately evaluate and address issues that will result because of the increase in traffic, permitted loads, and re-routing of existing traffic during the construction phases. More importantly, the draft EIS contains language that stipulates there will be no "significant" impact to First Responder response times. This is a significant failure on the part of the draft EIS in addressing such a life-safety consideration. I retired from active law enforcement with over 30 years of experience, with the last fourteen years as a Chief of Police. I can guarantee, based on personal experience, that if I used the terminology of "not significantly affecting response time" I would be hard pressed to convince any group of citizens or elected officials that the terminology of "not significantly.. was nothing to worry about. There is no risk assessment on the ability of emergency response vehicles to reach any more "rural" area along the proposed 240 mile route. Any delay in First Responder times is unacceptable to the public. More detailed and quantifiable measures must be incorporated into the final EIS to ensure the public understands the ramifications of increasing response times. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS.	Refer to SS-23 and TR-6.
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re: TCR HSR EIS: The construction of the TCR rail system will reportedly require an enormous amount of aggregate. The draft EIS does not address in specifics the full impact to the supply chain and how TRC's need for aggregate can impact current and/or proposed TXDOT roadway projects as it relates to construction delays or cancellations due to lack of available materials. No analysis of the availability of aggregate and conflicts with current and/or proposed TXDOT projects. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS	Refer to SG-4.
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re: TCR HSR EIS: The proposed route near my house will be located dangerously close to an active gas pipeline (actually right next to a gas pipeline), yet both the Federal Regulatory Commission and the Pipeline and Hazardous Materials Safety Administration were omitted from the draft EIS. In the proposed route (pictorials), several pipelines have been omitted. What is the effect of the vibration issues on these pipelines? Furthermore, with the proposed route traveling within about 600 feet o fa natural gas compressor station, there was no mention or evaluation in the draft EIS of considering what hazard this may create by this close proximity to the compressor station. Lack of awareness or consideration of hazards as they relate to existing gas pipelines and compressor station. As a result of the aforementioned information, The FR4 must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS.	Refer to EU-1, EU-2, EU-6, EU-7, GN-1 and NV-5.
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re: TCR HSR EIS: Throughout all the meetings I have attended, hearing from both representatives from TCR and from others who are against the establishment of a rail line from Houston to Dallas, there has been no disagreement on the fact that the	Refer to BA-4, BA-6 and TC-2.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
			technology being proposed by TCR is proprietary in that it utilizes a Japanese system that does not integrate with any other available system. Not only is this system proprietary, it is most probably outdated technology, and if not now, will be in the future if and when this project is completed. Proprietary technology - outdated technology at best. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS .	
Gary Brye	2/6/2018	Handwritten	Public Comments for FRA re: TCR HSR EIS: Over the past three years I have seen and/or heard about different proposed routes that the TCR has explored for the purposes of providing rail service between Houston and Dallas. One such route was designated as HC-4 that placed the rail traveling through Waller County and Northwest Harris County on an existing electrical easement. However, due to some unforeseen reasoning, that route was abruptly dropped from consideration and moved approximately 3 miles to the West and aligned with a small gas pipeline easement. This action was taken without any public notice or ability for public comment. Another route initially considered had the rail line following the IH-45 corridor. This was a direct route from Houston to Dallas, however; it has been described as cost prohibitive because of the additional costs associated with the acquisition of property and barriers for the separation of autos/trains. Consequently, a more direct route has been dismissed solely on economic factors. But the route should be reconsidered if this project is even to be considered at all because using the existing IH-45 corridor decreases the potential negative impact to the environment as it related to the current proposed rail route. Current proposed route along small gas pipeline easement is environmentally unfriendly and other proposed routes were more environmentally friendly. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS.	Refer to BA-6 and BA-9.
Gary Brye	2/6/2018	Website	REFERENCE: FARM, AND SHOW ANIMALS, AND THE MAJOR IMPACT OF HIGH SPEED RAIL WILL PLACE ON THEIR GROWTH, PERFORMANCE, PRODUCTION AND SUPPLY OF LAND TO TABLE NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY Our Homestead in Waller/Harris County supplies numerous benefits as the pleasant viewing of the farm animals, as well as the High Dollar Show Lambs, my family enjoys on a day to day basis. Each one of these is a big source of our daily nourishment. As we all know, all animals are sensitive to the vibration sounds, panic, that they would be subjected to these continued effects, every 90 minutes due to the High Speed Train. I feel our family has supplied generations to come with the lifestyle of animal life, which so many never benefit from. As we all know THE FEASIBILITY OF THE PROPOSED HIGH SPEED RAIL, The Reason Foundation, concludes that the proposed high Speed rail protect could lose over \$500 Million a year. Stop this madness, let today's, tomorrow's, and future generations enjoy this lifestyle of Farm Of Nature, Land and Animals, which so many miss in today's world. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY OPTION FOR TEXAS	Refer to GN-3, NE-1 and NR-1.
Gary Brye	3/9/2018	Website	Throughout the draft EIS report, in advertisements, and during meetings, the TCR, nor anyone else, has adequately shown that there is a definite need for a high speed rail system between Houston and Dallas, Texas. The implementation of a rail system does not provide a greater means of travel between Houston and Dallas. The existing means of travel (car, bus, plane, etc.) provide ample means of commuting between the two cities. In my personal case, being a resident of Far Northwest Harris County/Waller County area resident, I commuted to Dallas three months ago on business. It took me 3 hours to get from my home to my destination in south Dallas via automobile. For me to take the train (commuting from my house to the Houston terminal, then train to Dallas, then renting a car or acquiring another mode of transportation in order to reach my final destination) would not only take longer than the three hours I spent on the road, but would cost me significantly more than the twelve gallons of gas I used to make the trip up there. I had my own transportation while there and did not have to rely on anyone else to get to where I needed to go. It is ridiculous that I would want to buy a ticket on the train, at the outrageous costs predicted, in lieu of purchasing twelve gallons of gas. No need or purpose for a high speed rail. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS. Gary Brye, Far Northwest Harris County/Waller County area resident	Refer to NE-1, PN-3 and SC-3.
Gary Brye	3/9/2018	Website	The projected costs for this "private rail system" have been all over the board. I have attended different meetings where I have heard different expected build-out costs. In the recent cost estimates contained in the Reason Foundation Policy Brief, it projected cost estimates are actually more than the \$26,000,000,000 (\$26 BILLION) figure with a \$537,000,000 (\$537 MILLION) revenue shortfall. In California, recent cost estimates for 110 mile of track are in the neighborhood of \$10.6 BILLION. Where does that put the TCR's plan for future costs expenditures? The FRA has a duty to be responsible and provide the public (its taxpayers) with a review and evaluation of not only the cost estimates provided by TCR, but also include in the draft EIS benchmark comparisons with other like or similar projects. This comparison should also include a true fiscal impact analysis of realistic revenues as a result of realistic ridership projections against the true projected build-out costs and operational costs of the project. This information should be included in the EIS. Lastly, nowhere was I able to locate any information on covering the costs associated with the project's failure and abandonment of any infrastructure. Who is responsible for those costs? As expected, I'm sure that will rest with the taxpayers. No substantial or quantifiable justification for making this a fiscally sound and	Refer to GN-2, GN-3, NE-1 and SC-22.

Gary Brye	3/9/2018	Website	The construction of the rail line will cause, potentially irreparable harm, to existing private, City, County, State, and Federal road and highway infrastructures. The expectation of these damages has not been satisfactorily address in the draft EIS, as they relate to the increased traffic flow and transport weights vs. normal traffic. Furthermore, the draft EIS should contain language on who is responsible for the costs associated with any such maintenance/repairs as a result of these damages. It is only fair to the public that they are made aware of any and all financial obligations that may arise out of this construction project. Not only should the draft EIS contain information on who is responsible for the costs associated with the above instances, but furthermore, the time line for any such repairs. Lastly, if the construction access requires the building of new roadways, etc., upon completion, who will own such roadways and who will be responsible for the maintenance and upkeep of such roadways, Lack of presentation and documentation on who is ultimately responsible for the maintenance and repairs of such roadways. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS. Gary Brye, Far Northwest Harris County/Waller County area resident	Refer to NE-1, TR-6 and TR-7. The traffic control plan would require safe and efficient travel during construction, which would require that roads be repaired so that travel can be completed safely. Coordination would occur between TCRR and local agencies as permits are released.
Gary Brye	3/9/2018	Website	The draft EIS does not specifically address or evaluate the environmental impact to property on or near where fill material is removed from private or public property for use during the TCR construction project. The draft EIS does not identify or stipulate to what condition the land must left or maintained. No stipulation as to environmentally friendliness. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS. Gary Brye, Far Northwest Harris County/Waller County area resident	Refer to LU-10, LU-14 and NE-1.
Gary Brye	3/9/2018	Website	The draft EIS does not quantify the amount of water needed for the construction of this project, nor the means in which water will be made available. I believe the draft EIS is silent on where any such water will be obtained. Will the TCR be allowed to drill water wells for the acquisition of needed water or will they be obtaining water from surface water providers? It is anticipated that an enormous amount of water will be needed not only for concrete plants, but for use at construction sites, mitigating dust levels, watering erosional control plantings, etc. The amount and supplier(s) of water should be identified in the draft EIS. Furthermore, the draft EIS should contain safeguards, both environmentally and publically, ensuring the existing water usage methods of the public are not damaged or contaminated, as well as ensuring there are no adverse environmental factors fromthis water usage AND runoff. No quantifiable measurement or evaluation of environmental impact to water usage or runoff. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS. Gary Brye, Far Northwest Harris County/Waller County area resident	Refer to HZ-5, WW-1 and WW-6.
Gary Brye	3/9/2018	Website	The draft EIS does not address the environmental requirements or expectations regarding temporary construction sites. The EIS is silent on what condition these sites must be maintained after construction is completed. Can the sites be left as is? He EIS should stipulate that these temporary construction sites should left at their original or better condition. No stipulation as to after-the-fact environmental conditions have been included in the EIS. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS.	Refer to LU-10.
Gary Brye	3/9/2018	Website	The draft EIS does not adequately address the issue of water run-off, pooling, retainage, or flooding. There is no specific information contained in the document that directly speaks to the potential impacts residents and communities can and will face as this construction project relates to water run-off, pooling, retainage, or flooding. I reside in the Spring Creek watershed area where five creeks are going to be affected by the proposed rail route. What residual problems are going to be created by the displacement of water in these creeks and watershed? The EIS has not taken this into consideration. My property has been covered with water during the last two storm events. With the HSR's displacement of water, this flooding can only get worse. With new construction, building requirements stipulate retention ponds are to be "designed" in order to mitigate this dilemma. I found nothing in the EIS that addresses this concern. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS. Gary Brye, Far Northwest Harris County/Waller County area resident	Refer to FP-1, NE-1, WW-1, WW-2 and WW-8.
Gary Brye	3/9/2018	Website	The draft EIS is significantly lacking in the evaluation and analysis of the expected harm that the noise, vibration, and electrical current would have on the public's health and wellbeing, as well as the integrity of buildings in close proximity to the proposed rail site. The discussion in the draft EIS needs to be much more detailed in that the subdivision I live in with within 1500 feet of the proposed rail line. Table 3.4-12 indicates that in Waller County, the train noise would be over the mid and severe limits/levels for FRA at locations up to 1000 feet away from the tracks. The draft EIS only reports levels for one train, but it is expected that two trains will pass each other at frequent intervals. The draft EID should be much more specific in the analysis and evaluation of noised factors contributed by the proposed HSR. The draft EIS must address under what parameters noise mitigation must be installed, just as is the case with roadway and freeway planning. Why should TCR be exempted from this requirement? As to the vibration table 3.4-14, there is no base line for current measurements. The draft EIS states	Refer to NV-1. The vibration assessment is not based on existing vibration levels, only on the project vibration levels. At that distance, the project vibration levels will be well below the threshold for human perception or damage to structures.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			vibration levels for Waller County will be 54. To what percent increase does this figure equate to in comparison to current environmental factors? Woefully lacking in analysis and of noise and vibration impacts. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS. Gary Brye, Far Northwest Harris County/Waller County area resident	
Gary Brye	3/9/2018	Website	The draft EIS fails to adequately address and mitigate the damage the HSR can cause to the current sources of water utilized by residents in the rural areas. Surface springs or spring fed creeks potentially would be destroyed by soil disturbance and the movement/run-off of fill materials and excavation materials from the proposed construction project. Although not as detrimental in the urban areas, these creeks and springs are very important for the farmers and ranchers in the rural areas as they pertain to the growing of crops and feeding of livestock. No mitigation plan or evaluation/analysis of how this project can affect the sources of water we rely on. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS. Gary Brye, Far Northwest Harris County/Waller County area resident	Refer to LU-11, NE-1, WW-2 and WW-9.
Gary Brye	3/9/2018	Website	The draft EIS does include information about expected property values at and around the proposed HSR stations, but does NOT include specific information on proposed property value "decreases" away from the stations and along the proposed route. These areas, such as my own, must be evaluated to credibly and fully understand the effect the HSR will have on property values. The proposed HSR will cause property values to decrease, thus leading to a severe loss of tax revenues. The proposed HSR can and will have an affect on the sales prices of property not only in close proximity to the actual proposed HSR track site, but within ½ to 1 mile from the proposed site. With this project on the drawing board, the HSR should be disclosed to potential buyers. Why would someone want to purchase property in a rural setting close to this proposed HSR, just to listen to a loud train two to three times per hour (this is how often TCR has stipulated the train will pass by)? The simple answer is, they will not. They will purchase elsewhere. The draft EIS shows no correlation to the property values near the proposed track route. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS. Gary Brye, Far Northwest Harris County/Waller County area resident	Refer to NE-1 and VA-1.
Gary Brye	3/9/2018	Website	The draft EIS apparently is utilizing a large amount of regional non-specific data versus specific studies and field inspections "boots-on-the-ground" evaluations. The information contained in the draft EIS is fatally flawed is that it is not using project specific data such as the identification of endangered species. The draft EIS does not contain information concerning the inspection, evaluation, and analysis of areas where the endangered Houston Toad and the Navasota Ladies Tresses live. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS. Gary Brye, Far Northwest Harris County/Waller County area resident	Refer to NR-4. NEPA does not require 100 percent of the Project to have field surveys conducted.
Gary Brye	3/9/2018	Website	The draft EIS does not include a comprehensive risk management system. There is no mention in the draft EIS of specific risk assessments as they relate to the identification of disaster scenarios, the potential likelihood of any such occurrence, as well as any "mitigation" steps to be put into action to reduce or eliminate the risk(s). There needs to be a risk assessment for not only the utility corridor crossings, but for any other potentially dangerous crossings in order that there is a credible understanding of what safety risks are probable and/or imminent. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS. Gary Brye, Far Northwest Harris County/Waller County area resident	Refer to EU-2, SS-18 and SS-19.
Gary Brye	3/9/2018	Website	The TCR HSR is required to obtain County building permits for construction. In order to obtain such permits, TCR is required to show proof of Eminent Domain powers/authority. Although representatives from TCR have implied they have Eminent Domain rights and powers, TCR has been unwilling or unable to prove they have such authority. No further work should be taken on the draft EIS until this issue is resolved. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS. Gary Brye, Far Northwest Harris County/Waller County area resident	Refer to ED-1, ED-3, NE-1 and NE-8.
Gary Brye	3/9/2018	Website	There is the potential that some of the land and environmental survey data that is included in the draft EIS was obtained without the approval of the landowner. The majority of the landowners chose not to allow access to their property on the permission form issued by the survey company (acting under the authority of TCR). Until it can be proven that any such data was obtained lawfully and without coercion, by and through an affidavit or other legally binding document from each affected property owner, the FRA should abstain from utilizing any such information until it can be validated and shown to be lawfully obtained. As a result of the aforementioned information, The FRA must cease and further work on the TCR HSR EIS until this issue is appropriately addressed and resolved. The NO BUILD option should be chosen as the only viable option in the final EIS. Gary Brye, Far Northwest Harris County/Waller County area resident	Refer to GN-1, NE-1 and NE-8.

Johnnie Sue Bucek	2/1/2018	Website	Active pipelines error on Sheet 188 Of 257 Of Segment 4 - Mineral and Uti ity Resources - Dallas to Houston High Speed Rail & also issue with Sheet 388 of 536 - of Segment 4 Project Footpntt (1) My name is Johnnie Sue Bucek " ". I have an interest in property located at "12711 County Road 408, Leon County, TX" (I call the Vaughn Place) and sheet 188 referenced above appears to reflect two active oil/gas pipelines in the wrong location. Such pipelines are east of an Oncor Electric Transmission Line and not west as this plan shows. For certain, one of the pipelines is within the "dog leg" clearing to the right of the electric transmission line as such line crosses County Road 408. This parcel may be known by Texas Central as "9257". Please provide me a drawing or plan that shows the pipelines correctly located. (2) Also, the portion of parcel "9257" east of the proposed rail line (that consists of approximately 100 acres) appears to be landlocked with no access to County Road 408. If it has access to a public road would you please provide me a drawing or a plan that reflects how this acreage can reach a public roadway. The approximate 100 acres west Of the proposed rail line appears to have access to County Road 408. (3) Additionally, I have an interest in property located at "11573 County Road 408, Leon County, TX" (I call the Randall Place) and sheet 388 referenced above appears to reflect that such road existing east of my property is being closed by the bullet train. Our livestock tenant (who resides off FM 977) currently reaches our property by traveling west on FM 977 and turning south on County Road 408 and it appears now that he will have to reach our property by traveling east on FM 977 to Interstate 45 then west on State Hwy "OSR" and then turning north to travel down County Road 407 which when it turns to the east becomes County Road 408 that appears to deadend into our parcel. This parcel may be known by Texas Central as "9277". Such route would increase our tenants travel time from about 2 miles to 15 miles. If my livestock tenant can still reach our parcel from FM 977 please provide me a drawing or plan that reflects how this is accomplished.	Refer to EU-2, LU-11 and TR-10. The rear of parcel 9257 is blocked by the Project. Approximately 61% of the parcel would lose access to County Road 408. The rear northeastern corner of the parcel would be impacted by the Project. This accounts for approximately 5.4% (5.5 acres) of the 101-acre parcel would be affected.
Michael Bucek	1/29/2018	Oral	That is just for you to look along. Thank you. I want to just first start to say that the state of Texas spent a lot of money in 2010 to say where they wanted the corridors, and there was the BNSF Corridor Line, the UPRR Corridor Line, and the I-45 Greenfield Corridor. I can't believe we just threw those lines away, those positions away with something called the Utility Corridor, which is where our property is. Our problem is we have two tracks, each one about a mile long -- a mile apart, and the train hits both tracks. And the train splits one of our properties that my father-in-law bought I want to say in 1948. He had fought in New Guinea in World War II, and with his veteran benefits he and his brother-in-law, who fought in the European corridor, bought this tract. This property -- this train goes right down the center of it. When it's over with, we have a hundred acres on each side. There's no viaduct. It looks like there's an embankment or a cut all the way through; nothing about a viaduct. On that picture is the tank. We have one tank to feed the cattle on that place. The tank is going to be on the landlocked part, because you're also closing the county road. You're putting the embankment right on the county road that goes next to that property. On the second property there's also a county road -- the same county road fronts on it. Right now I have a mile of frontage on that county road, and it appears when this is over I'll have maybe 600 feet. The tenant on that property, who leases it for cattle for us, right now he can drive two miles from his house to be there on that property to feed our cattle. When that entrenchment or that embankment is there, it will be a 15-mile drive from where he is to get to our property. Closing county roads cannot be done. If it has to come, we have to protect our county roads, not only for police and fire; just for all the kind of things that farming and ranching requires. So I ask you to keep those items in mind. And I think how ironic that my father-in-law fought for freedom for this country against the Japanese. There are very fine Japanese people out there. But isn't it ironic that the property he bought as a veteran now is going to be split in half and his ancestors, his heirs, will lose it, because what they'll just say is the right-of-way, Well, that hundred acres that's landlocked, we'll just buy it from you. Thank you.	Refer to BA-5, B-8, ED-1, ED-2, LU-11, LU-14, TR-8, TR-10 and SS-23. Unable to verify address of property based on comment. The majority of Project is on viaduct. TCRR shall negotiate with the landowner to provide adequate crossings or compensation for land that is severed.
Michael A Bucek	1/24/2018	Letter	JBJQ RANCH'S RESPONSE TO FEDERAL RAILROAD ADMINISTRATION (FRA) DRAFT ENVIRONMENTAL IMPACT STATEMENT (Draft EIS) FOR DALLAS TO HOUSTON HIGH-SPEED RAIL PROJECT (HSR) PROPOSED BY TEXAS CENTRAL RAILWAY (Texas Central) INTRODUCTION The undersigned submits this response on behalf of the heirs of Maggie Zula Dawkins James, who are collectively known as "JBJQ Ranch". JBJQ Ranch is comprised of three parcels but the Draft EIS identifies two parcels ofland totaling 450 acres (12711 CR 408 and 11573 CR 408, Normangee, TX 77871) that are within the corridor identified as the "Utility Corridor" in the Draft EIS for the HSR proposed to be built by Texas Central. ARGUMENT AGAINST "UTILITY CORRIDOR" JBJQ Ranch reminds the FRA that the citizens of the State of Texas never envisioned that HSR would be constructed along the Utility Corridor alignment. From 2010 to 2014 the Texas Rail Plan prepared by TxDOT identified three general corridors for HSR. These corridors were: (a) BNSF Corridor (b) UPRR Corridor (near College Station) (c) 1-45 Greenfield Corridor Many landowners along the Utility Corridor were not prepared to offer alternatives to the Utility Corridor at the earlier public hearings on the HSR because we were sucker punched into believing comments publicly made in 2015, by the then CEO of Texas Central, Timothy B. Keith, who told the media that the HSR would include a stop in College Station, TX. Mr. Keith went on to say that Texas Central will try to stick to existing rail lines. Mr. Keith's comments lead us to believe that the HSR alignment would be adjacent to the Union Pacific Railroad (UPRR) alignment that runs through the College Station/Bryan area. The Utility Corridor alignment proposed by Texas Central to the FRA is not about protecting the citizens of this State it's about buying the cheapest land available and building the cheapest infrastructure available. If building near existing rail lines is dangerous because of a possible catastrophic accident then why is Texas Central attempting to connect with existing regional and local rail facilities when the lines reach Dallas and Houston. If Texas Central is all about safety then why would it suggest the	Refer to BA-5, BA-7, BA-8, BA-9, BA-10, BA-11, ED-1, ED-2, EU-2, GN-3, LU-9, LU-11, NE-1, NR-1, SS-1, SS-23 and TR-8. In regards to the cited article by Chester and Horvath, the occupancy rate range of 90 percent and 10 percent were extremes used to frame uncertainty around emissions impact benefits of mass transit caused by occupancy variations, and the median of that range was 50 percent, and the median of another range in a companion study by one of the authors was 67 percent. The TCR ridership represent average occupancy of 44 percent and 62 percent for 2024 and 2040 respectively. The source of electricity used to power the HSR was considered in the emissions estimate as described in the Power Consumption in Section 3.2, Air Quality , and is detailed in Appendix E, Technical Memorandum . This includes the mix of coal, natural gas, nuclear, wind, and other generation types in the ERCOT power region that the project would draw from. Because of the

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>Utility Corridor for the HSR that is basically parallel to two petroleum pipelines in Madison and Leon Counties and crosses one natural gas pipeline on JBJQ Ranch. We ask the FRA not to approve an alignment because it's the cheapest route for HSR. The motivation of Texas Central is all about the cost- not about protecting property rights, safety or protecting the environment. In Texas Central's pleadings and affidavits filed with the Surface Transportation Board (STB) then CEO Keith was consumed with meeting deadlines and states in paragraph 4 of his verified statement that "Project delays add costs and will threaten the financial integrity of this project". Mr. Keith's attitude against using due diligence in proceeding with the first bullet train in Texas infected his attorneys as well since at page 10 of Texas Central's Petition to the STB it stated "Such delays would have a cascading effect on Texas Central's overall schedule, adding costs and potentially threatening the viability of this important project". These two statements confirm, to those who seek the best environmentally beneficial and safe route for the bullet train, that Texas Central was not about performing due diligence in the construction of the first bullet train in Texas but was all about shoring up a project that doesn't have sufficient funding. We would hope the FRA would not abandon the thought of putting the HSR as close to College Station and Texas A & M University as possible rather than following the Utility Corridor alignment and placing the stop near the current town of Roan's Prairie, TX. An article in The Eagle on March 8, 2015 stated "The state demographer's latest predictions show 419,114 people in Brazos County by 2050 -twice the 2015 population of 203,056." With such population growth in the College Station-Bryan area shouldn't the HSR be as close to such area as possible? We understand that following the UPRR corridor alignment might be undesirable to the FRA because it would require the bullet train to cross the Navasota River. Recently, the Texas Parks and Wildlife Department (TPWD) recommended to the Public Utility Commission of Texas (PUC) a corridor for an Electric Transmission Line that was very close to the College Station/Bryan area that did not cross the Navasota River and was identified by the PUC as Route 18. Detailed information on this alignment can be obtained by accessing PUC Docket No. 44649 relating to the application of Cross Texas Transmission, LLC (Cross Texas) for a proposed 345 kV Transmission Line. Attached hereto as Exhibit A is a 4-pages map we downloaded off the website for Cross Texas that reflects Route 18. The Texas Central Utility Corridor alignment as it crosses through Madison and Leon Counties was called route "WW" by Cross Texas. Both Route 18 (BEC 69kV and BEC 138kV) and "WW" (Centerpoint/Oncor 345kV) were parallel to existing electric transmission lines but the TPWD recommended Route 18 to the PUC in order to protect the large amount of upland forests (that form much needed habitats for wildlife) that would have to be removed for a 100 feet wide transmission line right-of-way if it went along route "WW". Also, only two property owners objected to the Route 18 alignment where over 30 property owners objected to the transmission line going along route "WW". It is difficult for the owners of JBJQ Ranch to understand how property we own should be protected from an electric transmission line but not from a bullet train when other alignments closer to the College Station/Bryan area (that have a lesser negative impact on wildlife) were never proposed by Texas Central for consideration by FRA. One would surmise that Texas Central's due diligence in providing the FRA alternative routes to consider for the health and safety of the public pales in comparison to the due diligence provided by Cross Texas to protect the public. ARGUMENTS AGAINST COMMENTS THAT HSR WILL IMPROVE THE ENVIRONMENT In a 2016 article in Metro Magazine (business oriented publication) an agent for Texas Central is quoted for saying: "The bullet train that will be deployed on the track is environmentally friendly - the electrified trains will have little impact on air and water quality along its route. With significantly lower emissions per passenger mile it will preserve clean air." Such statement is a canard. Texas Central takes comments that might be correct in one route in one area of the United States and applies it specifically to the corridors that FRA is evaluating in Texas. Many factors must be considered in determining if air quality will be better or worse by reason of a project. In an article from Access Magazine (academic based publication) in 2010 Professors Mikhail Chester and Arpad Horvath opine: "For example, a light rail with 90% occupancy would compare favorably with just about any other mode if we consider only the energy expended and emissions created in operating the system. But building the infrastructure and producing the fuel essentially double the energy intensity of light rail. And if we change our assumptions further and assume the light rail system will be only 10 10% full, as opposed to 90%, then light rail starts to look much worse, and is less environmentally beneficial than a gasoline sedan with a solo driver." The authors say that the cleanliness of the electricity used by cars, trains, etc. is a key factor in determining if high speed rail will be environmentally beneficial. The article states "High Speed Rail proponents have recently acknowledged the need to augment any new train infrastructure with investments in wind and solar electricity generation in order to reduce emissions." With coal and natural gas plants being in the vicinity of the HSR one would assume if these plants are the source of energy for the HSR then this source would have a negative environmental impact on the project. The article says that "Greenhouse gas emissions increase by about 15% in HSR projects primarily because of the concrete used in construction - half a kilogram of CO2 is emitted for every kilogram of cement produced". The depth of the hoax that Texas Central is performing on the public is even more noticeable when you consider that the Utility Corridor crosses more Texas Forest than the corridors referenced in the Texas Rail Plan at the beginning of this submittal. In sworn testimony before the STB then CEO for Texas Central Tim Keith stated building the HSR in the Utility Corridor will have a positive impact on the environment and reduce carbon emissions. To quote a March 10, 2012 article by Professors William Brock Most and Steven Weissman in Berkeley Law: "Global climate change is caused by high levels of carbon dioxide and other greenhouse gasses in the atmosphere trapping heat from the sun. As trees grow,</p>	<p>interconnectedness of the power grid in ERCOT, power demand for the train would not be solely from the nearest power plant. As explained in those sections, wind power has become a significant portion of the total ERCOT generation mix and continues to grow. These emissions produced by power consumption was compared to emissions reduced which is relevant to assessing the net impact of the project. It is not appropriate to only state that the project is environmentally detrimental solely because power consumption produces emissions. With regards to citing greenhouse gases increase of 15 percent due to concrete production used in HSR construction, this is solely citing that emissions associated with an HSR increases by that much, not a net impact when considering reduction of other more polluting modes of travel. This also does not account for the life cycle emissions of manufacturing an automobile, which the cited paper acknowledges exist. Besides concrete used in the plants to manufacture cars, there would be concrete and asphalt associated emissions associated with road construction and repair, not to mention materials mining, processing and manufacturing of both trains and cars. Accounting for a full life cycle analysis for trains and cars (and planes and buses that would also not be used) in the emissions estimate for this EIS would be beyond the intent and scope of NEPA decision making for FRA. There are many other factors that go into selecting the best alignments for the HSR with respect to the project proponent's purpose besides avoiding forest. There are considerations such as minimizing residential structure impacts, avoiding difficult-to-relocate infrastructure, minimizing road impacts, and proximity to power sources. The largest forested impact of HSR alternatives was 2,540 acres of woodland/shrubland habitat. Sequestration rates vary greatly according to tree species, climate, age etc. and trees provide more sequestration than shrubs. Given annual tree sequestration rates from forest extension service sources (U. of Minnesota, Southern Regional Extension Forestry) ranging from 0.7 to 9 tons/year per acre, the associated removal would range from 2 percent to 32 percent of the net reduction of the HSR operation. This is without accounting for the lower rate that the shrubland portion would contribute, and without accounting for replanting that TCRR would implement in the impact corridor. The net reduction of GHG from the HSR would still be significantly greater than sequestration eliminated by impacts to forested areas. The Project at this location is on embankment (non-elevated). TCRR would coordinate with landowners regarding those areas that would be temporarily and permanently disturbed regarding crop and/or livestock production. TCRR's negotiations could result in fragmented fields/pastures (i.e., remnant parcels) being absorbed by adjacent landowners. TCRR shall negotiate with the landowner to provide adequate crossings or compensation for land that is severed.</p>

			<p>they absorb carbon dioxide (CO2) and release Oxygen (O2) ... By this process, the growth of trees in an urban forest can reduce atmospheric levels of carbon dioxide and slow the process of global heating". The best tool that nature has given Texas for eliminating CO2 and creating Oxygen is the mass amounts of Forestry in this state. It is difficult to understand how eliminating forested lands will benefit the environment when the other corridors considered by the Texas Rail Plan were mainly deforested. ARGUMENTS THAT HSR SHOULD PROVIDE VIADUCTS FOR PROPERTIES THAT ARE SPLIT BY THEIR TRAINS AND VIADUCTS FOR EVERY COUNTY ROAD CROSSED BY THE HSR Should the HSR be allowed to be constructed through the Utility Corridor, it crosses JBJQ Ranch properties we refer to as the Vaughn Place ([...] Normangee, TX) [250 acres] and the Randall Place ([...] Normangee, TX) [200 acres]. This alignment would allow the HSR to be constructed over a tenant's manufactured home site as well as result in the removal of a like "new" adjoining barn on the Vaughn Place. [Attached as Exhibit B is a photograph taken in 2016 that shows the rear of the manufactured home site and attached as Exhibit C is a photograph that shows the like "new" barn and the side of the manufactured home site]. Texas Central's original drawings appeared to reflect that the HSR would be an embankment as it crosses the Vaughn Place. If this has not changed it would result in probably 80 to 100 acres of land on the Vaughn Place east of the HSR being landlocked. Also attached as Exhibit D is a photograph of the tank/fishing pond on the Vaughn Place where cattle drink water while grazing on the Vaughn Place. If the HSR is built this tank will be on the landlocked portion of the Vaughn Place. There is no tank for cattle grazing on the 130 to 150 acres of land of the Vaughn Place on the west side of the HSR (that will continue to have access to CR 408 after the HSR is built) which will result in a loss of pasture lease revenue. However, the Environmental Impact Statement (EIS) (See "Project Footprint" Segment 4 - Sheet 389 of 536 and Parcel 9257) shows a partial "cut" but not a "viaduct" in this area and we don't know if a "cut" allows cattle and deer to travel to each side of the HSR. Texas Central's original drawings appeared to reflect that County Road 408 would be closed by an embankment near the Randall Place because of the HSR. The Environmental Impact Statement (EIS) maps appear to reflect that County Road 408 in Leon County in the vicinity of the Randall Place will have a "cut" adjacent to the Randall Place and not a "viaduct" (See "Project Footprint" Segment 4 -Sheet 388 of 536 and Parcel 9277). The original Texas Central drawing indicated that the one mile of frontage the Randall Place currently has adjacent to County Road 408 would reduce to approximately 200 yards [Attached as Exhibit E is County Road 408 east of the Randall Place]. Currently the cattle grazing lessee on the Randall Place drives about 2 miles east on FM 977 to get from his home to feed his cattle on the Randall Place. If a "cut" in CR 408 doesn't allow for vehicular traffic to cross under or over the HSR, the cattle grazing lessee will have to drive about 15 miles to get to the Randall Place. Closing County Roads will impair the ability of Police, Fire, and EMS personnel getting to our property when an emergency arises. We were originally lead to believe in newspaper accounts that no County Roads would be closed by the HSR. We would request that the final EIS require that no County Roads be closed by HSR building an embankment across such roads. We would also request that the final EIS provide that properties that are crossed by the HSR, leaving 50 or more acres on each side of the HSR be provided a Viaduct or opening that allows livestock, wildlife and farming equipment to move freely between such separated tracts.</p> <p>IDENTIFICATION OF UTILITIES THAT EXIST ON JBJQ RANCH There is an existing Oncor maintained Electric Transmission line west of the manufactured home referenced above on the Vaughn Place. Adjacent and east of the existing Transmission line are rights-of-way for one pipeline installed around 1975 and a new pipeline installed in 2014 (we believe these pipelines convey petroleum products). The photograph attached identified as Exhibit F shows the 2014 pipeline right-of-way and in the distance you can see one of the electric transmission line towers. County Road 408 runs east to west to the north of the Vaughn Place and there is an existing Atmos Natural Gas Pipeline that crosses under the existing electric transmission line and the two petroleum lines approximately 2553 feet south of such County Road 408.</p> <p>IDENTIFICATION OF OWNERSHIP INTERESTS IN JBJQ RANCH JBJQ Ranch ownership is as follows: Walter P. and Margaret Faye Jett, Michael A. and Johnnie Sue Bucek, Carrie Jett Quinn and James M. Bucek, own undivided interest equaling 100% in 250 acres of land in Leon County commonly known as [...] Normangee, TX 77871 and referred to by such individuals as the "Vaughn Place". Michael A. and Johnnie Sue Bucek, own 200 acres of land in Leon County commonly known as [...] Normangee, TX 77871 and referred to by such individuals as the "Randall Place". CONCLUSION More importantly, we ask you to remember who Texas Central says it is (as reflected in the Petition for Exemption it filed in its STB case): Petitioners TCRI and TCRR are wholly-owned subsidiaries of Texas Central Rail Holdings, LLC. which, in turn, is a subsidiary of Texas Central Partners, LLC ("TCP") a Delaware limited liability company (hereinafter TCP. TCRI, TCRR and other affiliates, including Texas Central High-Speed Railway, LLC, are referred to as "Texas Central"). Texas Central clearly isn't an entity like a municipality, county or state that has councilmembers, commissioners or legislators who are elected by the voters to look out for the public interest. If a landowner's adjoining property is damaged by a true public project administered by a governmental unit then a landowner has a claim for inverse condemnation to make them whole. The entities forming Texas Central are all about limiting their liability and based on Mr. Keith comments referenced above, if Texas Central goes bankrupt, landowners that have been damaged by them will probably be looking for recourse from an entity buying Texas Central's interests out from a bankruptcy court that will void unsecured claims. Our only protection is for the FRA to require due diligence of Texas Central in providing a viable route for the bullet train and that appropriate safeguards be placed in the final EIS that require Texas Central to protect our remainder properties. The FRA is the only real protection we landowners have against the laissez</p>

R. Chris Buckner	2/19/2018	Website	This project could well be a boon to Teas travelers going between Hou and Dal. I certainly would use it and enjoy it. No more airport hassles!!!!YK4C	Comment noted.
Shirley Buckner	2/7/2018	Email	<p>Please see attached form and respond asap. I am not against the rail, however I am against giving my property away, especially a private company.</p> <p>My business is located near station HNI 210+00. 14507 Sommermeyer 77041 (along the RR track). Can you please explain procedures as to</p> <p>1) whether or not our property/business be impacted with a) construction, b) congestion to our business, c) effects of working directly under a 450 high - high speed rail and safety issues to consider.</p> <p>2) Do you make a payment offer OR do you plan to just take by "eminent domain." Since this is a PRIVATE COMPANY operation I did not think eminent domain was possible since they are NOT government.</p>	<p>Refer to ED-1 and ED-2.</p> <p>The property at 14507 Sommermeyer is not located within LOD. The Project is located within the existing right-of-way of Hempstead Road. During construction, TCRR would be required to follow compliance and mitigation measures to minimize travel impacts to the property. See Section 3.11.6.1, Transportation, Compliance Measures and Section 3.11.6.2, Transportation, Mitigation Measures for more information.</p>
Mark Bucol	2/12/2018	Website	I support the Texas Central Railways effort to build this new high speed rail line. But, it should connect seamlessly to public transportation and current rail passenger routes. Putting the Dallas station two to three blocks from DART will hinder ridership and not serve riders that use public transportation. The same is true for the planned Houston station not being near the downtown and not served by the light rail system. In order to attract the auto traveler and decrease congestion, the potential high speed rail line must be accessible by the light rail lines in both cities. Current planned station location in Dallas should be next to Dallas Union Station, perhaps where the Reunion Arena now sits (largely unused). Likewise, in Houston the Texas Central station could be at the site of the now unused Postal Center (next to current Amtrak station), allowing direct transfer to intercity trains and being near the light rail route. The Houston Texas Central station site is 7 miles from the nearest light rail line and intercity rail passenger station. These planned endpoint stations will not serve the transit riding public very well and that will hinder the train's ridership.	Refer to GN-7, GN-8, TR-3, TR-4 and TR-12.
Mark Buie	1/29/2018	Website	I fully support high-speed rail in Texas and look forward to this long overdue project.	Comment noted.
Edwin Burger	1/29/2018	Email	This high speed rail project is yet another government boondoggle that has absolutely no purpose other than to waste a lot of money. This is a joke, someone stands to make a lot of money from this and has a big enough influence to make it happen. It has no other purpose but to line the pockets of a few people. The airlines serve this route very effectively.	Refer to BA-4, BA-12, PN-3.
Casey Burgess	1/29/2018	Oral	Good evening, I'm Casey Burgess, Mayor of the City of Elmer, but I'm here tonight strictly in my individual capacity. I've been working with Texas Central probably for about the last three, three-and-a-half years on the Dallas County alignment, and I'm here to say that I'm fully in support of the alignment through Dallas County They've been pretty accommodating with the city. They've worked with us. We had a couple of public work projects that were in the original alignment and some large economic developed projects, they worked with us to move their alignment to avoid those. And I can also say that I've gotten some pretty significant interests from companies wanting to locate in the	Comment noted.

			area that had interest in being close to the Cedars station, but they want enough land they can expand out and do investor-type stuff.· So, I'm in full support of the project and thank you.	
Justin Burgess	2/17/2018	Website	To whom it may concern: I fully support the Dallas-Houston bullet train as planned and approved. Let's get this magnificent project built as soon as absolutely possible! Why you may ask? 1) The route is right The preferred route, known as the Utility Corridor, was chosen by the FRA because of its minimal environmental and community impacts. 2) Creates jobs for Texans More than 10,000 direct jobs per year will be created during construction and more than 1,500 jobs will be permanent when operational -- at least 25% permanent jobs will be in rural counties along the route. 3) Brings the safest mass transportation technology in the world to Texas Shinkansen trains boast a 53-year history with ZERO crashes or fatalities while in operation. Tracks will be built above or below all roads, so there will be no at-grade crossings, removing the risk of intersecting with vehicles and allowing for free movement of wildlife, pedestrians and cars. 4) Cleaner, greener technology An electric alternative to flying and driving, the Texas Bullet Train will operate in an area where 4 of the counties served are already air quality non-attainment status. It will also lead to net reductions in volatile organic compounds, nitrous oxides and greenhouse gas emissions. 5) Increases county tax rolls in ALL impacted counties Estimates in the DEIS show the project generating a net-positive tax impact in counties along the route of between \$6.5 and \$7 billion by 2040. Let the dirt start flying as soon as possible and move this major initiative from planning and approval stages to actual construction! Sincerely, Justin Burgess	Comment noted.
Tracy Burgess	2/18/2018	Website	I am so excited for the job opportunities this rail system will open for those not wanting to relocate North or South yet allow them to commute to jobs in their career field in other areas. This will be the future gateway for many generations to come and open so many doors for the children in college as well.	Comment noted.
Christa Burk	NA	Website	I support the comments listed below and offer them as evidence supporting the No Build Alternative 1. I support the No Build Alternative on the Texas Central Railway High Speed Rail Project from Dallas To Houston. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration. US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use Of existing infrastructure to its fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance. such as cemeteries, farms and buildings that may qualify as historical Sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation Of HSR results in land take. noise and air pollution, visual disruption and a high consumption of electricity.	Refer to BA-6, ED-1, NE-1 and NE-9.
Craig Burk	NA	Website	I support the comments listed below and offer them as evidence supporting the No Build Alternative 1. I support the No Build Alternative on the Texas Central Railway High Speed Rail Project from Dallas To Houston. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration. US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use Of existing infrastructure to its fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation Of HSR results in land take. noise and air pollution, visual disruption and a high consumption of electricity.	Refer to BA-6, ED-1, NE-1 and NE-9.
Nell Hope Burke	NA	Website	I am very opposed to High Speed Rail. It got to be dangerous.	Refer to SS-4 and SS-12.
Daniel Burken, Limestone County Judge	12/21/2017	Email	Would like to receive updates.	Refer to PI-1.
Desi Burns Porter	1/29/2018	Email	The public comment period needs to be extended by at least 90 days. Texas Central's information can not be trusted so everything needs to be independently verified. 60 days plus an extra two weeks is nowhere near enough time for a proper vetting of this project. If it took FRA over 2.5 years to put it together, I'm sure an extra 90 days won't cause any bananas to rot on a dock.	Refer to PI-3.
Glenda Burres	2/11/2018	Website	As a resident of Navarro County, the Dallas-Houston High Speed rail will disrupt farmland and ranchland. With a right-of-way through Navarro County, the wildlife will be disrupted, in particular eagles and owl nests, and all ground nesting birds. Our ranch land and farm lands are very important to the well being and survival of Navarro County. Please do not go forward with this detrimental blight on our countryside.	Refer to LU-11, NR-2, NR-3 and NR-5. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
				and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .
Guy Burroughs	1/30/2018	Oral	Hello. A lot of you know me. I am fifth generation, sixth generation in Leon County but just bought in this county last week. We have braved 8,000-acre forest fires together. We got through the 2011 drought together and sold off our cows. We have been through a lot together as a community and we are going to get through these yahoos too. With that being said I'd like to bring your attention to number 16 on this paperwork they passed out. The timeline process for property acquisition is not part of the environmental project if TCRR obtains federal, national assistance for the project. Such as a federal loan. I wonder who is going to provide that money for that federal loan is they decide they need it. You're dadgum right. You know as previous speakers have noted over and over on all this paperwork, it is nothing but lie after lie after lie filled with a lack of transparency of these TCR people. And I would like to see if they can make it available to us where the money is going. Because if you follow the money you usually find out who's behind it and what's moving the wheel that turns on this thing because somebody is obviously getting paid to keep pushing this thing on. In 1980 is when we made it the last time. Obviously, somebody is trying to get their pockets lined on this thing for it to be back in our face again right now. So I am curious. I would like to know who is getting paid or who is hoping to go get paid by this big push on this? Regardless of what they say they do not have eminent domain authority to come on your land and do anything. They can't force you off your land. They can't bully their way on your land and tell you they have a legal right to be here. They ain't got no right. That's just the bottom line to all of it. So thank you.	Refer to NE-1, GN-4, ED-1 and ED-2.
Ralph Burton	3/8/2018	Email	Count me as another of the many people who are opposed to the Texas High Speed Rail Project. Newer innovations in Technologies will render the proposed train obsolete not long after construction of the rail system has been completed, if not before. The hyperloop system would have trains that reach speeds of over 700 mph, more than twice the speed of proposed Texas High Speed Rail Project, and it won't be long before the first trains are operational: "The study is five- to six-month study and will do some really detailed engineering work," Bam Brogan told Forbes. "We think we could be shovels in the ground in 2019, and get into certification and testing in 2020, which is ordinarily a 400-day process, and then be operational in 2021." https://www.forbes.com/sites/alanohnsman/2017/11/14/hyperloop-Station-arrival-has-plans-for-high-speed-colorado-tube-train-network/47793261e44d8 Self-driving automobiles will be commercially viable within the next few years. A similar project in California has turned out to be a massive boondoggle, with cost overruns in the billions. The same is likely to happen with the Texas Project if it should move forward. Taking property from citizens, uprooting their lives, and ruining a way of life for anyone living anywhere near the train tracks, for this boondoggle, is insane. I will be writing my state representatives soon to urge them to support any form of legislation that will shut down this project.	Refer to BA-4 and TC-2.
Jason Burts	2/16/2018	Website	I am all for safe affordable travel between Dallas and Houston, which means I am all for the bullet train.	Comment noted.
Marvin Burzynski	2/6/2018	Handwritten	No one is for the high speed rail. No one wants to see Texas divided and land lost to high speed rail. It won't benefit most people, just a select few. It is the worst thing to ever happen to Texas. People in Texas own and drive cars not ride trains. It will never pay for itself. Put it 20 ft in the air and people might accept rail in Texas, but not taking up land.	Refer to SC-19 and NE-1.
Sara Buses	2/6/2018	Website	The high speed rail is a for profit endeavor. It is in no way altruistic and serves no benefit to the community that it wants to take a piece of. If there are projected demands for more transportation routes in the future, there are other ways to address them. This is only one solution that does not benefit those it seeks to use for gain. This community adamantly rejects the building of this structure at our expense for the profit of outsiders with no foreseeable net gain to ourselves. A go ahead on the project is to simply ignore the overwhelming opposition for personal gain.	Refer to SC-19.
Carol Bush	3/1/2018	Letter	Several areas of the proposed route are shown to be located in the floodplain, how will floodplain permitting be handled and will the same process be used in all counties? Will there be Base Flood Elevations determined for all floodplain crossings? Will detailed flood studies be performed? Appendices G and H have footnotes indicating that all peak flows are approximate, base flood elevations are estimated, and that several Stream crossing were not hydraulically modeled and assumed to be sufficient. What level of detail was used to develop this information? Will a higher level of detail be used to determine more accurate hydrology and hydraulics at a later phase of the project? Will the proposed access roads along the tracks be maintained by the railroad or are they proposed to be county maintained roads? If the	Refer to ED-4, EU-1, EU-2, EU-3, EU-4, FP-1, NR-6, NV-1, NV-5, SG-1, SG-2, SS-6, SS-18, SS-27, TR-7 and TR-8. Floodplain permitting will occur through coordination with each county floodplain administrator. Additional information regarding hydrology, hydraulics, and drainage for the Project are located in

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>access roads alongside the proposed route are to be county maintained, where will the additional funding for maintenance of the roads come from? Where a "road Over rail" crossing for a county road is proposed, who will maintain the overpass? If the county is responsible for maintaining "road over rail" overpasses, where will the additional funds for maintenance come from? Who is responsible for the maintenance of the fencing/railings on overpasses? Who is responsible for the maintenance Of the multiple detention basins along the project? To what extent will county road right of way be affected by the need for new and/or relocated utility crossings? The information in Appendix C: Roadway Grade Separation Database does not show the same "treatment" (road over rail, road under rail, reroute, etc.) as Table 3.16-16. For example, Appendix C shows Old Boyce Road to be a "road under rail" crossing and Table 3.16-16 shows that Old Boyce Road will be rerouted. It appears that this is related to different build alternatives, but it is not clear. Which set of information is correct? Who will maintain the land between the rail right-of-way and access roads, if they are not parallel to each other? What are the thoroughfare plan implications on the affected roads? What methodology was used to come up with six (6) wildlife crossings? What are the specifications for the fencing, retaining walls, gates, etc., and have the wildlife fences been field tested/proven?</p> <p>Who will pay for the utility adjustments? TO whose specifications will the utility crossings be constructed? Will there be a permit and/or fee system for future utility work at utility crossings? Will repair of existing utilities (those in place prior to construction of the tracks) be treated differently from new utility work? What will the time frame be for approval to repair utilities? Future repairs at utility crossings will be more costly, how will the utility providers pay for these increases without passing the costs on to their customers? What is the protocol if there is a problem at a utility or road crossing that is severe enough to necessitate shutting down the train? If a utility or road issue causes a shutdown of the train, will there be a financial liability of the owner of the utility or road. In Ellis County, the train is proposed to cross a 90" waterline and a 72" waterline. How will these crossings be protected? Where is the power source for this train and how will it be affected by brownouts/blackouts? If there are any gas wells present or in the future, whose rights supersede?</p> <p>How will firefighting personnel and equipment access property on both sides in the event of grass, brush fires? What security plans are proposed along the corridor? The documents show law enforcement agencies that are not within the proposed segment (exaggerating the public safety presence). Not enough emergency medical personnel within the section should the need arise.</p> <p>Are there plans to install a noise mitigation wall similar to Ones placed along toll roads?</p> <p>What are the plans to remove any septic systems?</p> <p>Will there be soils analyses performed?</p>	<p>TCRR Final Conceptual Engineering Design and Constructability Reports, Appendix F, Section 13.</p> <p>In both Segment 2A (part of the Preferred Alignment) and Segment 3B, Old Boyce Road is crossed by the Project (road under rail). Refer to Table 3.11-30: Roadway Crossings in Ellis County for references to Appendix D: Project Footprint Mapbook pages.</p>
Rick Bush	2/17/2018	Website	This project is totally unnecessary it will cause unnecessary hardships on both people and wildlife. This is a boondoggle from start to finish and there are safety concerns as well. This will completely destroy many people's lives and businesses. I know it will destroy my business and ruin my property value.	Refer to ED-2, LU-7, NE-9, NR-5, PN-3, SS-1, SS-4 and VA-1.
Rick Bush	2/24/2018	Email	this project is a boondoggle and will leave taxpayers straddle with huge debt when the private is he claims they need more money to complete the railway. In addition to that it will upset wildlife and take away habitat for wildlife. it will also destroy the lives of people and families who have been on their land for over 100 years. There is no benefit to high speed rail Texas there is no benefit too high speed Raelynn Texas there are plenty of ways to get from Dallas to Houston already in existence. I should know I travel from Houston to Dallas several times a week.	Refer to BA-4, GN-4, NE-1, NR-5, PN-3 and SC-19.
Tim Bush	2/5/2018	Website	I took a picture of a American bald eagle perched in a dead tree off of CR407 off 977 right where the proposed path for the HSR would go. Just wondering what the habitat range is for American Bald Eagles because aren't they considered endangered. Normangee, Leon county area.	Refer to NR-3. Bald Eagles were delisted by USFWS but are protected under the Bald and Golden Eagle Act and are state listed as threatened by Texas Parks and Wildlife. Their range spans across East Texas and along major water resources.
Tim Bush	3/8/2018	Email	I took a picture of a American bald eagle perched in a dead tree off of CR407 off 977 right where the proposed path for the HSR would go. Just wondering what the habitat range is for American Bald Eagles because aren't they considered endangered. Normangee, Leon County area	Refer to NR-3. Bald Eagles were delisted by USFWS but are protected under the Bald and Golden Eagle Act and are state listed as threatened by Texas Parks and Wildlife. Their range spans across East Texas and along major water resources.
Vivian Bush	2/5/2018	Website	<p>I am pleased that the Texas Bullet Train is nearer to becoming a reality. I have the following comments/ questions:</p> <ol style="list-style-type: none"> 1. How will the Northwest Mall location be linked to the existing Northwest Transit Center? The two are close, but too far to walk from one to the other. There has been talk of Houston's existing light rail system being extended to the NW Transit Center... could it be carried on up past that to the Bullet Train station? 2. What is the plan for parking cars at the Houston terminal? How much parking will be available? Will it be in a garage, or surface lot? Will there be a charge for short-term parking? Long-term parking? Can the parking also serve as a local park-and-ride for the light rail system, if 	Refer to GN-9, TC-5 and TR-4.

			the system is extended to this site? Thanks for working through these issues to bring us affordable, feasible long-distance transportation options.	
Sara Bushell	3/9/2018	Website	Please make this project a reality. This would greatly help me as I make trips from Houston to Dallas for both business and personal reasons. The rail would be a safer, faster, and more environmentally friendly option compared to driving.	Comment noted.
Darrell Bushman	2/6/2018	Handwritten	1. I have a water well as shown on attached map that I want included in the water well table (3.3-4, pg 3.3-16). This well was the only water on my land in 2011 for my cattle and I want it recorded in DEIS in case the train vibrations cause it to collapse and fail to produce water. 2. There is a new house [sic] just on the north side of hwy 30 as shown on the map. 3. Table on pages 3.13-42 & 43 show Grimes county "produces chickens." It should show "livestock" and "forage." 4. Is it true about a 2 mile limit and the "right" HSR to access property for construction materials?	Refer to LU-14, NV-5 and SG-4. Agricultural statistics for Grimes County were collected using the most up to date data from the USDA, including: 1. USDA "2012 Census of Agriculture, Texas State and County Data," Volume 1 Geographic Area Series Part 43A. Table 1 County Summary Highlights and Table 8 Farms, Land in Farms, Value of Land and Buildings and Land Use: 2012 and 2007. May 2014. 2. USDA "2012 Census of Agriculture County Profile Sheets" for Dallas, Ellis, Navarro, Freestone, Limestone, Leon, Madison, Grimes, Waller and Harris counties.
James Busler	2/9/2018	Website	As a 73 yr old with know heart issues I find the rerouting necessary not only during but after completion impacting EMS response times.	Refer to SS-23.
James Busler	2/9/2018	Website	I make frequent trips to Dallas every year and the proposed routes will all impact my travel time to visit friends in that city.	Comment noted.
James Busler	2/9/2018	Website	Considering the bogus ridership projections being cited by this project in deference to the unbiased independent studies available, I see no guarantee that this project will end up any better off than the 60 billion dollar bondongle in California and becoming a tax payer burden for all of Texas	Refer to GN-2 and NE-1.
Harry Butaud	1/26/2018	Letter	Navarro County is a rural and agricultural county. The land I purchased is in Navarro County. Routing the Dallas to Houston High-Speed Rail Project through Navarro County would be detrimental to my ranching operation. My property adjoins the proposed route and running my cattle ranch under these conditions would be difficult and costly for me. Many factors play into this project and none of them is good. Therefore I OPPOSE this project. Please consider this opinion in your data regarding this project.	Refer to LU-11.
Brad Butler	1/31/2018	Oral	You're the court reporter; right? I'm talking to you. And I'm just going to bullet point this so I can get through it. I'm not sure that the economic assessment accounts for the net impact of the sales tax revenue. It looks like it talks about what it takes to Houston: and Grimes, and Dallas: but does it subtract for all the people it takes off the road on 1-45 that don't stop at Buc-ee's: and don't stop at the Texas Burger? All of that needs to be considered. You're taking money out of the rural counties: taking it to the cities. Our representatives and elected officials need to get on that: too. Aesthetically and visual impact is — I think you listed it as moderate. I believe it's adverse in rural areas because of the way people see their property: their quality of lives, and I've heard they want to look at. Just because ifs less than what it is in Dallas: doesn't mean it's not adverse to these people. That needs to be reconsidered. I know ifs going to be elevated: but — if you fence some parts of it: but if you have a chain link fence and it doesn't allow for movement of game: that's going to be a problem. Like the previous guy says, we will be divided along those places. And so: deer and things like that will go — to move cross game. That's going to impact and owners on opposite sides of the tracks. How does electric power figure into this? I know it's: like: .26 percent of the state usage: but when there's a brownout, do they get priority over the homeowners: or do the homeowners get lights: and the train slows down? Because we have plenty of people coming here to use electricity already. There's going to be a liability risk on hunters up to a mile away that will have to monitor exactly where they are shooting because there's a train coming through. That needs to be considered. The rain runoff on the streams that are supplying ponds: not big streams: little streams: but all the contours of the land needs to be taken into account, because if the water is running downhill and hits the train berm and can't get to the other guy's tank, then he doesn't have water _ Now: when you put in culverts to redirect that water: you create erosion issues where you concentrate the water on the downhill side. Are the train owners going to maintain clear culverts: and replace the erosion that they create for the life of the project? They should. Also, I'm not convinced of the vibration studies. I live three miles from the railroad: and I can feel it. And this one may not be carrying coal: but I'm just not convinced that your study is perfect. And the economic impact on landowners will go far beyond the rail: up to a mile in some cases, because we'll no longer be able to sell pieces of our property for the people that are moving to the state because that railroad is there, and they want to move to the country where ifs quiet. So, please take that into consideration.	Refer to EU-3, EU-4, NR-5, NR-6, NV-5, SC-15, SG-1, SS-10, WW-1 and WW-2. In response to public comments, the analysis has been updated in the Final EIS to provide more detail on potential impacts, based on the types of engineering construction: viaduct, embankment, cut. Please refer to Section 3.10.5, Aesthetics and Scenic Resources, Environmental Consequences for the impact assessment. At that distance, the project vibration levels will be well below the threshold for human perception or damage to structures.
Brad Butler	1/31/2018	Website	In the rural areas, any water passing through a chain link fence will collect debris from the pastures abutting the right-of-way. This will be a constant maintenance issue and is necessary to avoid water back up on the up-grade side of the right-of-way. The landowners need a quick and easy mechanism, that includes leverage, to force immediate compliance with needed attention. FRA should require rules prescribed to protect neighbors including fines significant enough to get immediate response. Railroads create fires. How will this be addressed. Rules with	Refer to ED-2, FP-1, GN-5, NE-1 and SS-27.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			compensation for damage should be implemented. Currently, residents of a county with a burn ban are prevented from starting a fire except under prescribed conditions. This should be addressed.	
Darrell Butler	3/9/2018	Website	I have reviewed the route, maps, impact statements, and alternates. The route should start at the BNSF Roe St. location. It is a larger area, will require less bridge/underpass construction, and will have a small eminent domain footprint. The line should follow the utility easement route from Hutchins all the way to Houston, especially since the electricity you need is right there. That will reduce construction costs by not having to bury underground cable for miles to reach the BNSF line. The green route around Teague is better for the reasons listed above. I am very glad you announced the station will be at 290 and 610. It would be a huge waste of EVERYTHING if you brought it to where your maps indicate directly atop Buffalo Bayou (the dumbest choice anyone could make, flood zones and electricity do not mix). I am very excited about the new train, and I can't wait to ride just for the heck of it.	Refer to BA-5, BA-7, BA-8 and GN-9.
KARL BUTLER	2/16/2018	Website	I lived in Europe for 2 years. The trains are a part of every day life to move around the country side. The first high speed train I travel on was from London to Paris under the English Channel. It was safe and very fast. I believe this High Speed train will be super positive for economic growth in Texas. It will help the environment. We must have this train in Texas and I am 100% i support of it	Comment noted.
Julienne Byers	3/9/2018	Website	Please don't build this. We are Texas! Let's keep our land wide open, clean, safe. Besides what are people going to do when they get to Dallas, walk? Not enough rental cars as it is. We love our cars, small towns along I-45 depend on Our business to thrive. There are cars, buses and planes. That seems like enough options. I say NO.	Refer to BA-4, BA-12, GN-6, PN-3, SC-15 and TR-3.
Biova L. Byrd	NA	Website	I am against the High Speed Rail...	Comment noted.
Chris Byrne	2/7/2018	Website	This project is important for many reasons. 100% pivately funded infrastructure unlocks more local investment. It Creates 10,000 construction jobs each year and 1,000 permanent jobs. Texas Central will be a tax-payer, not a tax-taker, paying an estimated \$2.5 Billion in taxes in 25 years. It is estimated to inject \$36 Billion into the Texas economy over the next 25 years. The project is an investment in a better balanced transportation system. It creates a vital piece of a 21st century transportation system and becomes a model for similar projects all over the country. The N700 Bullet Train emits 1/12th the CO2 as a jet would between Houston and Dallas. The current 4-hour, 240 mile mile trek up I-45 is expected to increase to 6.5 hours by 2035, making alternatives all the more important. I-45 is the nation's 2nd deadliest interstate in the U.S.; rail keeps more cars off roads and saves lives. With a 90-minute travel time, end to end travel time even beats air travel when time at airports is included. Our country needs more rail lines, not less. Rail is environmentally;y friendly, relaxing and sociable for the passengers, safer than airlines and hi ways, both with regard to accidents and terror attacks.	Comment noted.

Miles Cagney	2/5/2018	Website	I am strongly in favor of this high speed rail project. I would like to take a rail to Austin and Dallas and would use the train to go to sporting events, concerts and weekends away. Everyone at the hearing seems to be against anything new. The environmental benefit of taking cars off the road is also a plus. Please ignore the naysayers.	Comment noted.
Edith Caiame	1/31/2018	Handwritten	No job creation, only during construction. Not respect private property. You do not understand Texans and our land. Ours is 4th generation. Many others are more than that. Where all dirt coming from for elevated line? Not reduce traffic as only two! People will use train. No email, no computer, [sic] no phone. Boondoggle.	Refer to GN-2, LU-14, PN-3, SC-21 and SG-4.
Casey Caldwell	2/13/2018	Website	ELLIS COUNTY LOSS: This proposed rail will cut our county, Ellis County, in half. TCR states no roads will be closed but they fail to state they will propose rerouting some. This is a severe detriment to Farmers, Ranchers, First Responders and School Districts. If our County needs additional roads in the future we would be tied to existing roads that TCR would initially have. Installing any over passes would be at a huge cost to our county.	Refer to LU-11, SC-6, SS-23, TR-7 and TR-8.
Casey Caldwell	2/13/2018	Website	Emergency services, fire, ambulance, and police will require longer access times traversing the few underpasses available, thereby jeopardizing the health, safety and well being of all county residence. Minutes and seconds can make the difference between life and death.	Refer to SS-23.
George Caldwell	2/10/2018	Website	The rail if not totally elevated will have a negative impact on our First Responders and School District along with farming and livestock ranching. It should be totally elevated. This must be a top priority.	Refer to LU-11, SC-7, SC-8, SS-23 and TR-8.
Jimmy Caldwell	2/5/2018	Oral	Hello there, I am Jimmy Caldwell and I am the president of the 10-mile Cemetery Association of Madison County. Madison County has three cemeteries on the route proposed by the high-speed rail. The 10-mile cemetery was established in 1887 and was designated as a Texas historical cemetery 2015. The 10-mouth cemetery is less than 300 feet from the power line that they want to put the bullet train next to. In fact, when I say it's 300 feet, their survey team measured 254 feet. I don't know how they could put a berm over a cemetery. It's just that I don't understand that. Only the state of Texas has the power to move a grave. And if the state agrees to move these bodies, where would you put these bodies. The pioneers of Madison County deserve a great deal of respect. Imagine holding a funeral, or for that matter a church service, with four trains, to running in each direction passing over the cemetery at over 200 miles per hour. There would be extreme vibration as well as disruption when you are trying to pray. In their own words, they say that the extreme vibration would be over 275 feet. Additionally, between the high line in the cemetery is the church, as Kerry just spoke, and there are also two 30-inch oil pipelines that run in	Refer to CR-8. If it is determined that burials cannot be avoided or are effected in an unexpected manner, they will be handled according to the requirements of the Texas Health and Safety Code Chapter 711, Title 13 Part 2 Chapter 22, Rule 22.4(b) of the TAC - Unknown and Abandoned Cemeteries, and Rule 22.5 of the TAC - Removal of Remains from an Abandoned or Unknown Cemetery.

			that vicinity. And that you know that the pipeline companies now have a dedicated right of way and will never allow a train track to be built on top of a pipeline. I think the environmental impact survey is flawed and did not take this information into account. They were obviously misconstrued or did not know what they were looking at. We have buried over 300 people in the cemetery and we told them to rest in peace and that's exactly what we would expect from the train people at this time.	
Jimmy Caldwell	2/5/2018	Website	Our ranch and home will be effected. Do not allow this train to ruin our land.	Comment noted.
Mary Ann Caldwell	NA	Website	Our home and ranch are within the 2 mile zone. Please don't allow this to happen.	Refer to LU-14.
Monica Caldwell	NA	Website	Twin Daughters are 9th generation Texans! Please don't let the land grab take their ranch!!	Comment noted.
Rodney Caldwell	2/13/2018	Website	This proposed project is detrimental to all seven counties it crosses, especially the Counties between Dallas and Houston. It cuts counties into two segments. It will limit growth. It takes away homeowner rights, county tax base is lowered. All neutral observers cannot be financially viable without a future tax payer subsidy. It lowers the efficiency of Ranchers and Farmers. This has no positive impact to the majority of Texas. All facts lead me to believe the developers are the only ones, if approved, will have an overall gain. The landowners, Counties and Tax Payers of Texas will suffer if the project is allowed to proceed. The negative Environmental Economic impact is huge.	Refer to LU-11, SC-13, SC-19, TR-8, VA-1 and VA-3.
Rodney Caldwell	2/13/2018	Website	: It would not be good for us to lose our land, but it would be terrible to lose our land and then later have to subsidize the Company that was allowed to take our land. If you will please take a little time and read Barach Feigenbaum's report at http://reason.org/files/texas_high_speed_rail.pdf	Refer to GN-3 and NE-1.
Rodney Caldwell	2/13/2018	Website	There will be few crossings available to farmers and ranchers. they will be forced to drive farm equipment many miles to have access to their property on the other side. This will raise cost further and reduce farming and agricultural production which produces over \$160 million annually.	Refer to LU-11.
Rodney Caldwell	2/13/2018	Website	Public funding: Considering the private Toll Roads here in Texas were supposed to be revenue neutral yet we see where the taxpayers and commuters are forced to pay the difference in perpetuity. This will require state funding and/or county property taxes required from counties that already do not benefit economically from HSR thus creating a double economic hardship on counties affected	Refer to NE-1, SC-19, SC-22 and VA-1.
Ronny Caldwell	1/29/2018	Oral	My name is Ronny, I'm against the high-speed rail. I'll tell you why. The financial situation is all studies showed it cannot be profitable, will not be profitable without building subsidies. They came two years ago and said there's gonna be private funding but then they turn right around and apparently couldn't get cost. There's something wrong with that. They say there's gonna be zero roads closed, but they failed to say rerouting roads. We can still reroute roads. You look out here and see the roads being rerouted. In our counties in between Dallas and Houston, those counties will be split down the middle like a bowling ball. You hit future growth there's gonna be you know on both sides of the rail and in order to if they're installed at ground level you have to put overpasses. Check with TXDOT, what does it cost to put an overpass and a new road. 15 years from now, 10 years from now we need another road in one of these counties, who's gonna pony up and build an overpass. It can cost up to over a million dollars per lane and it takes a mile and by the time you get the ramp to come up over the rail, 'cause right now it would cost so you've got a cost factor there. So then you know, I'll get into it. You know, we have a ranch, we have a farm. We're gonna be personally impacted if they say they have eminent domain, they do not have eminent domain. They sued us to come onto our property, then they backed out 'cause they knew that they couldn't wing it. How would you like someone to come in your living room, you know, unannounced, just come in. Government party. What's the difference between your living room and my pasture, you know, what is what difference does it make? What difference is it from your living room and my pasture, so it's unfair. I say come and take it. No matter what you ask for and what you're willing to pay through the funds you pay for us pay to us. I'm sorry, I'm stuttering but there's no money in the world that's gonna be able to take our land. They may take it through court and, potentially, if our legislature changes their mind and gives them eminent domain in the future, you know, they may be able to take it, but it'll be a fight. It's wrong. It's unprofitable. And all you taxpayers you wait and see they're gonna come back. They're gonna come back to you when it fails. It cannot be profitable. I've been on the bullet in Japan, I know it's timely, but yet it cannot be profitable. We're gonna pay through the nose for it. We're gonna pay later.	Refer to ED-1, ED-2, ED-3, GN-3, GN-4, NE-1, TR-1, TR-7, TR-8 and TR-10.
Ronny Caldwell	1/29/2018	Oral	RONNY Caldwell Ellis County. My concern is that Ebenezer Road is not mentioned in the environmental impact study. That's one. Two-- the TCR states that no funding is required from county, state or federal. But yet they are asking for the Federal guaranteed funds. Three-- consideration should be given to future roads that may be necessary for growth in Ellis County and all counties. And the cost impact to these counties which TxDot states could be up to 1 million per lane. Which limits growth in the future. Major impact to our land personally. Church activities such as A-rides, four wheeling, etc. I guess the last one would be there are no studies that state this project would be profitable. The recent report states it twice. But my opinion is it will be a tax burden for all of us in the future.	Refer to GN-4, NE-1, TR-1 and TR-8. Ebenezer Road is shown on Mapbook pages 35 and 67. It is a local road that is would be crossed by the Project in the preferred alternative. See Table 3.11-10: Roadway Crossings in Ellis County for more information about Ebenezer Road.

Ronny Caldwell	2/13/2018	Website	They state they will not close roads but now they show to re-route roads.	Refer to TR-8.
Ronny Caldwell	2/13/2018	Website	() Any portion of the train that is not elevated will have a great negative impact on future roads, present farming access and present livestock operations. If it goes at all, every foot should be elevated so the large farm implements can travel under it and livestock could go from one side to the other. TXDOT states a overpass costs more than a million dollars per lane. A two lane road will cost well over \$2 million in today's dollar. Only the State can afford that, a County cannot. It will impact future growth.	Refer to LU-11, TR-7 and TR-8.
Ronny Caldwell	2/13/2018	Website	() It will impact the county tax base. TCR states it will have a positive impact on taxes for the County. Taxes are based on value and for Rails the value is set by the State. All the rail systems that cross the county pay only around \$80,000 (combined) in taxes. There is no tax on rolling stock which a engine and cars are. The only major property tax benefit will be at the rail stations.	State and local assessors have sometimes assessed government-owned property or public railroads at below-market rates. However, there is no reason to believe they would do so for a privately owned and operated company like TCRR. The economic assessment presented in Section 3.14.5.2.3, Socioeconomics and Community Facilities, Economic Impacts presumes TCRR's property and improvements would be fairly assessed and subject to all applicable local property tax rates. This analysis finds a net positive tax revenue impact for each economic analysis area, including for the subset of counties and local jurisdictions between Dallas and Harris County. A number of negative tax impacts were assessed, including property tax losses associated with the displacement of built improvements. However, tax revenue increases associated with property assessments on the Project's built infrastructure, the conversion of currently tax-exempt land uses to TCRR ownership, and the sales tax associated with induced spending as a result of TCRR's capital investment were large enough to produce a net positive impact to taxes. Tax impacts were calculated following the methodology described in Section 3.14.3, Socioeconomics and Community Facilities, Methodology .
Ronny Caldwell	2/13/2018	Website	() Federal Corporate taxes are on profits. This project cannot be profitable without government subsidizing it, therefore not Corp. tax benefit	Refer to GN-4.
Ronny Caldwell	2/13/2018	Website	() Their maps show new connector roads along with public service roads with some existing roads having overpasses. If built these new roads, which are only needed for the convenience of the train, would be dedicated to the counties. Then the counties will take over the ongoing maintenance expense.	Refer to TR-7.
Ronny Caldwell	2/13/2018	Website	() Rerouting roads will have a negative impact on School districts and First Responders.	Refer to SC-6, SC-7, SS-23 and TR-8.
Ronny Caldwell	2/13/2018	Website	Not having the proposed rail TOTALLY ELEVATED will have a very negative long term impact for all the Counties it crosses. The construction cost for any future public road, if it has to go over the ground level rail, will be a huge cost to the counties. This will have a negative impact to growth and in most cases kill growth in certain areas. The cost of building an overpass is huge.	Refer to TR-7 and TR-8.
Ronny Caldwell	2/13/2018	Website	There is a maintenance cost impact to the Counties for overpasses. Overpasses will also cost more to maintain as time goes by. Overpasses require more land area than a ground level road and are dramatically more costly. NOT HAVING THE RAIL FULLY ELEVATED WILL HAVE A MAJOR ENVIRONMENTAL IMPACT TO ALL COUNTIES BOTH NOW AND ESPECIALLY IN THE FUTURE.	Refer to TR-7 and TR-8.
Ronny Caldwell	2/13/2018	Website	TCR advises that the cost to the taxpayer will be zero. They state this will be a private funded project with no cost to the taxpayer. At the same time they are applying for Federal Government Guaranteed Funds. They state one thing and do another.	Refer to GN-4.
Ronny Caldwell	2/13/2018	Website	3). LAND OWNER RIGHTS . My wife and I personally oppose the rail cutting through our Ranch and Farm Land. We could find in more acceptable it we did not feel that this proposed rail could be beneficial to Texans as a whole. The ridership will be very low per all independent studies benefiting only the Houston and Dallas metroplexes. Giving up our land for the benefit of our fellow Texans is one thing but to give it up to a Corporation financed by foreign investors using foreign equipment with no chance of being financially fit is not right, it is not Texan.	Refer to GN-2, NE-1 and SC-19.
Ronny Caldwell	2/16/2018	Website	() Any portion of the train that is not elevated will have a great negative impact on future roads, present farming access and present livestock operations. Every rail foot should be elevated so that large farm implements can travel under it and livestock could go from one side to the other. 			the State can afford that, a County cannot. A developer sure could not. It will impact future growth. The FRA should require TCR to calculate the cost for each county.	
Ronny Caldwell	2/16/2018	Website	() It will have a negative impact on the county tax base. TCR states it will have a positive impact on taxes for the County. Taxes are based on value. For Railroads, the value is set by the State. All the rail systems that cross Ellis county pay only around \$80,000 (combined) in taxes annually. There is no tax on rolling stock which a engine, passengers and cars are. The only major property tax benefit will be at the rail stations. TCR should be required to calculated what the tax impact is for each county. TCR should be required to calculate the over all cost and the benefit for each individual county.	State and local assessors have sometimes assessed government-owned property or public railroads at below-market rates. However, there is no reason to believe they would do so for a privately owned and operated company like TCRR. The economic assessment presented in Section 3.14.5.2.3, Socioeconomics and Community Facilities, Environmental Consequences, Build Alternatives, Economic Impacts presumes TCRR's property and improvements would be fairly assessed and subject to all applicable local property tax rates. This analysis finds a net positive tax revenue impact for each economic analysis area, including for the subset of counties and local jurisdictions between Dallas and Harris County. A number of negative tax impacts were assessed, including property tax losses associated with the displacement of built improvements. However, tax revenue increases associated with property assessments on the Project's built infrastructure, the conversion of currently tax exempt land uses to TCRR ownership, and the sales tax associated with induced spending as a result of TCRR's capital investment were large enough to produce a net positive impact to taxes. Tax impacts were calculated following the methodology described in Section 3.14.3, Socioeconomics and Community Facilities, Methodology .
Ronny and Tommie Caldwell	1/29/2018	Letter	A TOTAL ELEVATED RAIL IS A MUST Not having the proposed rail TOTALLY ELEVATED will have a very negative long term impact for all the Counties it crosses. The construction cost for any future public road, if it has to go over the ground level rail, will be a huge cost to the counties. This will have a negative impact to growth and in most cases kill growth in certain areas. The cost of building an overpass is huge. Also there is a maintenance cost impact to the Counties for overpasses. Overpasses will also cost more to maintain as time goes by. Overpasses require more land area than a ground level road and are dramatically more costly. NOT HAVING THE RAIL FULLY ELEVATED WILL HAVE A MAJOR ENVIRONMENTAL IMPACT TO ALL COUNTIES BOTH NOW AND ESPECIALLY IN THE FUTURE. COST IMPACT TO THE TAX PAYERS TCR advises that the cost to the taxpayer will be zero. They state this will be a private funded project with no cost to the taxpayer. At the same time they are applying for Federal Government Guaranteed Funds. They state one thing and do another. There are only two High Speed Rails in the world that operate in the black that are not government subsidized. These two are in highly dense populated areas. Dallas to Houston is not very dense. The area cannot financially support this project. DESTINED TO FAIL WITHOUT GOVERNMENT SUBSIDY. The Reason Foundation Policy Brief 139 dated February 2017 reports in detail why TCR cannot be financially stable in the long term without a government subsidy. HOW OUR HOME AND PROPERTY WILL BE IMPACTED (Please see location Dallas-Ellis County line 1 Segment 2A) The proposed route crosses approximately two and one-half miles of our property. It appears it will take out one seven acre and two half acre ponds. It will cut our property into two sections. We presently farm and ranch approximately 800 acres that the rail would have a negative impact on. It will cross three roads. It will limit future development of which we already have utilities run to. Out property has already been devalued due to this ongoing looming threat to our property. The home lots are not saleable. This in turn affects not only our income but also the future local community tax base. It will remove trees in both Bone Branch and Grove Creek. It will be very detrimental to both our family and the citizens of Ellis County. It will impact future growth of our County in a major way. HOW OUR FAMILY, COMMUNITY AND CULTURE WILL BE IMPACTED. We use our property for both income and recreational purposes. We actively Farm and Ranch our property. We share our property with both our Church and School. Palmer Texas ISD annually brings Head Start and Pre-K students out on field trips. This has been done for the last 14 years. The School facilities are 2 to 4 miles away. On Church has Holiday Events here on our property every year. Our family uses the property for fishing, four wheeling, camping etc. The proposed route comes within a few hundred feet of our home. SUMMARY This proposed project is detrimental to all seven counties it crosses, especially the Counties between Dallas and Houston. It cuts counties into two segments. It will limit growth. It takes away homeowner rights, County tax base is lowered and per all neutral observers cannot be financially viable without a future tax payer subsidy. It lowers the efficiency of Ranchers and Farmers. This has no positive impact to the majority of Texas. All facts lead me to believe the developers are the only ones, if approved, will have an overall gain. The landowners, Counties and Tax Payers of Texas will suffer if the project is allowed to proceed. The negative Environmental Economic impact is huge.	Refer to BA-7, ED-2, GN-3, GN-4, LU-11, NE-1, NE-9, SC-19, TR-1, TR-6, TR-7, TR-8 and VA-1.

Susan Caldwell	NA	Website	Please No!!	Comment noted.
Tommie Caldwell	2/13/2018	Website	My main objection to TCR's proposal is that all independent projections show this rail cannot be profitable, for it to exist in the long run is it must be financially subsidized. TCR state it is privately funded and yet they are asking for Federal Government back funds. (Texas Central is planning to apply for Railroad Rehabilitation and Investment Financing (RRIF) loans). Baruch Feigenbaum's Reason Report gives details showing that this project is destined for tax payer bailout. You can review this brief at http://reason.org/files/texas_high_speed_rail.pdf	Refer to GN-3, GN-4 and NE-1.
Tommie Caldwell	2/13/2018	Website	School Districts will have to realign school boundaries affecting student allocations and school property tax revenues. Connectivity between neighborhoods, communities and student's access to school, between businesses and customers, between family and friends, and emergency services all are of great concern.	Refer to SC-6, SC-19 and SS-23.
Tommie Caldwell	2/13/2018	Website	Condemnation of private property, Texas statutes allow a railroad a 4 mile wide path (2miles on either side of the railroad) to gather dirt, sand, gravel, water, etc, to build a railroad. Real HSR width measurements of the confiscate property will be anywhere from 119 to 218 feet. The rail is 46 ft. wide, then sloping earth berm, then a drainage, then an access road then drainage again comes to 218 feet wide according to the EIS. Again where does Ellis County and the other counties between Dallas and Houston benefit?	Refer to LU-14, PN-3 and SC-19.
Tommie Caldwell	2/16/2018	Website	() The proposal shows both installed elevated track areas and a lot of ground level track areas. The grade or ground level areas will have a large negative effect on the present land value, its use and the future development of the County. A 100% elevated track would be less damaging than an at grade installation. It would lessen the impact on farming, livestock production and take away the need for future overpasses. TCR should be required to compare the cost impact to each county with a grade level installed rail compared to an elevated rail.	Refer to LU-11, TC-7, TR-8 and VA-1.
Tommie Caldwell	2/13/2018	Website	HOW OUR FAMILY, COMMUNITY AND CULTURE WILL BE IMPACTED. We use our property for both income and recreational purposes. We actively farm and ranch our property. We share our property with both our Church and School. Palmer Texas ISD annually brings Head Start and Pre-K students out on field trips. This has been done for the last 14 years. The School facilities are 2 to 4 miles away. Our Church has holiday events on our property every year. Our family uses the property for fishing, four wheeling, camping etc. The proposed route comes within a few hundred feet of our home.	Refer to LU-2, LU-12 and RF-2. No changes to agricultural practices or recreational activities would be required as a result of a property's proximity to the Project.
Ronny Caldwell	2/13/2018	Website	The proposed route crosses approximately two and one-half miles of our property. It appears it will take out one seven acre and two half acre ponds. It will cut our property into two sections. We presently farm and ranch approximately 800 acres that the rail would have a negative impact on. It will cross three roads. It will limit future development of which we already have utilities run to. This in turn affects not only our income but also the future local community tax base. It will remove trees in both Bone Branch and Grove Creek which is partially on our property. It will be very detrimental to both our family and the citizens of Ellis County. It will impact future growth of our County in a major way.	Refer to ED-2 and VA-1.
Charlie Calhoun	1/29/2018	Email	The public comment period for the proposed high speed train between Dallas and Houston should be extended to 90 days. The public needs enough time to review the lengthy document. TCR delayed the publication of this document for years, to have enough time to create it. We, the public, the people whose homes and lands are threatened also need sufficient time to review the document.	Refer to PI-3.

Randa Calhoun	2/5/2018	Oral	Years ago when my husband and I were married, we were thinking about where we were going to raise our children. I wanted to enter the public education system, we could have lived anywhere in the state of Texas. However, we always knew that Texas was where we would call home and establish our family. Our family has since started including 4 1/2 twin boys. They are tough, rowdy and sweet cowboys. It is important for my husband and I to involve our children in the livestock show industry to help raise and mold us into hard-working citizens we are today. More importantly than the livestock show, we wanted to emerge in the life of agriculture. We wanted them to learn firsthand about this state that makes it as great as it is. We want our children to experience and appreciate the cycle of life that God created and to know the hard that farmers and ranchers invest in daily to provide food for all. We wanted them to be able to explore God's country and creation daily and give thanks for the simple things in life. Our family has been able to experience these things in the last four and a half years. Our boys love to help in our show operation that raises FHA students across the nation. They love to ride the Kubota and love to ride in the buddy seat in their grandfather's John Deere. They love to drive their dump trucks across the pasture and dig their shovels into the dirt. They love to go fishing in our ponds. Our beautiful property saw so many more things to offer and more so as they grow older, things that will create memories and they become law-abiding citizens. Unfortunately these things are starting to become uncertain as the high speed rail	Refer to AS-1, GN-2, NR-5, PI-1 and SS-1.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
			coming is being proposed. The high speed rail coming at 205 miles an hour and 68 times a day would come straight through our property dividing it in half. It would destroy the production in not only the wildlife on our land but also the for our children and for our future grandchildren. You have numerous other families fighting to save their land and the train is not the answer for transportation for Texas. The impact it would have on Texans 20· far outweighs any benefits that TCR may try to sell. Please help us to preserve the quality of life that we want to provide for our family and so far have been able to provide. The bright light that would shine from the train would shine all night would not only cause a nuisance of our sleep, but would prevent us from admiring the natural light and stars. The thought of this train for the safety of our family. to ensure that no animal or terrorist is imposing danger to the track, with very few passengers on the train, for my family. I could go on and on about the devastation this train would cause but three minutes is not enough time. I simply ask you to help me to preserve God's beautiful land that we are fortunate enough to call our home and raise our boys on.	
Randa Calhoun	2/6/2018	Handwritten	<p>During one of the presentations by TCR, I heard a TCR employee talk about how it only seemed right for Texas to be the state to lead the way with this type of transportation. All I could think about was how wrong he was. Let me tell you a little about this great state. Texas has the most farms and land in farms in the United States. Texas has over 130 million acres of land in farms. Texas has more acres of farmland than 48 states have acres. Texas has more than 248,000 farms. Texas is the largest producer of hay and cotton in the United States. Texas ranks first in the nation in total number of cattle and calves with 13 percent of the total United States inventory. Texas has more cattle than 43 states have people. These are only a few of the statistics that document the ways Texas leads the way. Texas does not need a high speed rail. Production of this high speed rail would destroy what makes Texas the great state that it is.</p> <p>My family is one of the many families that are in the direct path of this proposed train. We are prideful of being able to be a small part of the statics that Texas is known for. Our land allows for our cow-calf operation, show pig business, hay production, recreation, and homestead. In addition, the land provides daily, spontaneous lessons to our 4.5 year old twin boys about nature, the circle of life, and God's creations. My family has worked hard to do improvements to our place. We have built a large equipment barn, a hay barn, a covered working pen, two hog barns and numerous fencing projects which should add value to our property, but with this high-speed rail system, we will be faced with decreasing property values. In addition, the fenced pastures may no longer be accessible or useful in the way that they were originally designed.</p> <p>There are several other concerns with having this high-speed rail through our property. We are worried about the negative effects of the vibration, lights and noise levels. What factors will these obstacles play on the stress level of the reproduction and health of the livestock and the beautiful wildlife that shares our property with us. Will the wildlife be forced to move on and find a more peaceful living environment? Leaving behind the livestock to deal with less land to graze and less hay for the winter months since the hay fields will have diminished due to the obstruction of cattle movement and access to property created by the Dallas Houston High-Speed Rail.</p> <p>Our family bought this property to be able to experience its beauty, produce agriculture on it, and to be able create memories as a family. It is not right that a private company can come in and destroy this for their benefit.</p> <p>These 600+ acres have served as acres of joy for our entire family as well as friends and in-laws. It is our little Utopia! Every weekend is a family reunion for us. Friends and family are always calling asking if they can come for the weekend and bring their family and animals. Our gate is always open to share the beauty and Glory of our lives. We have been blessed. We enjoy working with our friends and family and then sitting back and admiring together what God has bestowed upon us. Our property was never meant for a high-speed rail system. It was meant for mankind and animals to respect the nature God has created. Glory be to God!</p>	Refer to AS-1, ED-1, LU-2, LU-11, NR-1, NR-5, NR-6, NV-1, NV-5, TR-10 and VA-1.
Carol Calix	1/29/2018	Website	I think the bullet train is a great idea. It is a way to connect our some of our big cities in Texas. Which will make it easier for communiting for work and fun.	Comment noted.
Keli Call	2/6/2018	Handwritten	<p>I support the comments listed below and offer them as evidence supporting the "No Build Alternative"</p> <ol style="list-style-type: none"> 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual diruption and a high consumption of electricity. Corinne Cammarata	1/25/2018	Website	Yes yes yes!! Please build the train! Texas NEEDS more mass transit to move into the 21st century. Bring it down to Brazoria County, instead of more stupid lanes on the hwy. I would LOVE to be able to get a train to Pearland and Houston.	Comment noted.
Augustus Campbell	3/8/2018	Website	We are writing to express concerns regarding Texas Central Partners' (TCP) Highspeed Rail Project (HSR Project). The West Houston Association has advocated for better infrastructure and better quality of life in Greater West Houston since 1979. The HSR Project has the potential to provide an exciting transportation alternative for our region; we request that the Federal Railroad Administration's Final Order include key provisions to ensure that the HSR Project comply with state and local requirements to benefit the region. Background. Representatives of the West Houston Association have met on several occasions privately with TCP and attended various stakeholder events at which TCP has provided information. Based on our review of the Draft Environmental Impact Statement (DEIS): we are concerned that the preferred route and design are likely to significantly harm local transportation and development. Our foremost concern is that segments of the proposed design in Waller County and Northwest Harris County rely on berms instead of viaducts (as previously discussed with TCP). These berms appear to divide communities that would otherwise be connected: reducing regional mobility options and impeding development of the major thoroughfare plan. The cost of future mobility projects within the major thoroughfare plan will likely increase by tens of millions of dollars per project (in 2018 dollars) since these projects will require extensive grade separations. Land Use. The investment-backed expectations of numerous landowners within the area should cause concerns to any permit-granting agency. The commercial value and number of compatible uses for land near the HSR Project route appear significantly and demonstrably lower if a berm (versus a viaduct) is permitted. Landowners near the route have told us that their land values have already diminished and land deals have been interrupted by the change in conceptual design. Flood Control. Additionally, the berm concept may cause significant and undesirable flood risks to areas near the route and across the Katy Prairie. To avoid preemption concerns: the Final Order should require the HSR Project to meet state and local drainage requirements. Our Request. The HSR Project could greatly benefit our region but: as proposed in the DEIS, appears to impose costs and risks on our region that warrant further consideration and mitigation. We request that the Final Order require the HSR Project to maintain the integrity of the City of Houston's Major Thoroughfare and Freeway Plan for existing and proposed thoroughfares and meet state and local drainage requirements.	Refer to FP-1, TR-1, TR-6, TR-8, WW-1 and WW-2. In Harris County, approximately 94% of the Project would be built on viaduct, which would allow travel underneath the Project. For a complete list of roads would be crossed by the Project, see Table 3.11-31: Roadway Crossings in Harris County . For a complete list of roadway modifications for roads in Harris County, see Table 3.11-51: Harris County Roadway Modifications .
Drew Campbell	1/29/2018	Oral	Good evening, my name's Drew Campbell. I'm the executive director of the Dallas Regional Building Coalition and on behalf of that coalition, which represents five of the counties here in the Dallas region and over 30 cities, I'm here to say that we fully support this privately funded project, look forward to the project coming to Texas and connecting obviously two of the most dynamic economies in the world, that would be the Houston region and the Dallas economy. It also is gonna provide quick and reliable transportation to one of the largest universities in the United States, that being Texas A&M University. And so without being redundant and repeating what I think Mayor Athas said very succinctly and eloquently, we're here to support the project and we look forward to we see it as a project that's private funded and we look forward to it. And I know I heard something about Japan and I noticed a lot of Toyotas out in the parking lot too. That technology serves us all very well. But, again, thank you for the opportunity and we looking forward to this project moving forward.	Comment noted.
Robert Campbell	3/5/2018	Website	I am against the HSR. Who will have to pay for it when it goes broke. I will not pay to ride this white elephant and don't think many will pay 300 dollars to ride this thing.	Refer to GN-2 and SC-3.
Steve Campise	3/4/2018	Email	To whom it may concern, My name is Steve Campise and I live with my wife Angela at [...]. We have lived here for 10 years and we never would have expected the nightmare that was to come with this THSR proposal. We will be living 176 feet from this Bullet Train. This was to be our retirement home in the country. I am one of many rural residence that have had to endure the wrath of big city politics and investors whom start these "Money Pit" projects and leave the tax payer to pick up the bill. This train will be roaring through my neighborhood every 90 min. at near deafening levels.	Refer to GN-4 and NV-1.
Ariana Campos	3/5/2018	Oral	Good morning. I'm going to read this way because I'm holding the letter from Representative Ferrar. My name is Ariana Campos. I'm here to represent the Office of State Representative Jessica Ferrar. Thank you for the opportunity to submit a comment on the proposal for the Texas Bullet Train project. I also appreciate the Federal Railroad Administration and Texas Central Railway for their willingness to hold a public meeting in Houston to hear the opinions and gather feedback from the community. The Texas Bullet Train project within the City of Houston will empower the City's economy, communities, and neighborhoods. Residents of northwest Harris County can quickly be connected to the Central Business District, the Texas Medical Center, and the Energy Corridor through partnerships with the City, Harris County, and the Metropolitan Transit Authority of Harris County, Metro. Implementing the transit-oriented development with its creation of compact, walkable pedestrian-oriented mixed-use communities centered on high-quality train systems in the areas surrounding TCR's preferred location will benefit area businesses and residents. Incorporating these characteristics into the development of the area surrounding the Northwest Mall will supplement the cost of urban sprawl and create more jobs, since the development of urban sprawl requires the expansion of public infrastructure and utilities. The Environmental Impact Statement states, "TCR's proposed line will operate on a dedicated right-of-way and would not share track or infrastructure, existing trains, or rail lines because this system is required to be a closed system."	Comment noted.

Submitted By	Date Submitted	Submission Type	Comment	Response
			Although this will cause difficulty in the already ongoing construction projects in Houston, the result will bring much needed development to the areas as the proposed project will expand into communities with limited access to mass transit. Currently, the option for travel between Houston and Dallas are either via automobile or airline. Without the addition of another travel option, the travel times between both regions will continue to increase with the addition of more vehicles on this heavily-traveled route. The dedicated tracks for the high-speed rail will improve the efficiency of traveling to Dallas from Houston. For those still choosing to travel via automobile, the high-speed rail will still maintain the speed and timing of travel time. Again, thank you for the opportunity to provide comment on this project, as well as the efforts from both the FRA and TCR to consider input from stakeholders and residents. My office appreciates the (inaudible) of this project by representatives from the national, state, county, and city levels. Please feel free to contact my office if you have any questions. Thank you.	
Cee Cee Candler	2/12/2018	Email	<p>Comment #1: Waters of the US - Surfaces Water Resources The proposed DHHSR route crosses 1.25 miles of my 380-acre tract, essentially splitting it lengthwise into two tracts. The land is currently used for livestock and hay production. Man-made ponds supplement and enhance the natural flow and ponding of water, thereby providing water to all pastures for cattle. Based on the FRA DEIS issued in December 2017, about a half of the track configuration bisecting my property will be an embankment as shown on Sheets 433-435, Segment 5, Project Footprint DHHSR DEIS (see Attachments 1-3). Drawings in the DEIS also indicate that water collected on the up-dip side of the embankment will be routed to detention ponds within the train property. Currently, all ponds on the east side of the proposed train route are fed by surface run-off from the west side of the route. The embankment will essentially cut off water supplies for ponds on the east side of my property and the DHHSR project will capture all runoff on the west side leaving no water for my livestock operation or surface flow across my hayfield. FRA Procedures for Considering Environmental Impacts as published in the May 26, 1999 Federal Register Pages 28545-28556, require the FRA to evaluate water quality, ecological systems, and use of natural resources such as water, as well as existing and planned land use. These water bodies are valuable and crucial to existing cattle and hay operations and will continue to be needed by the landowner for ongoing operations. The landowner's use of his surface water will be negatively impacted by the alteration, restriction, obstruction or capture of the natural flow and impoundment of his surface water. Capture of surface water by the DHHSR project implies an intended on-going use of this natural resource by the DHHSR owners. The DEIS fails to address the gross adverse impacts DHHSR will have on the property, natural resources, availability of water, and thus production on the Candler Ranch and other landowners, and fails to propose any mitigation for such impacts.</p>	<p>Refer to BA-10, CR-12, FP-1, FP-3, GN-1, GN-4, LU-2, LU-11, LU-14, NR-5, SC-19, SS-18, SS-26, TR-6, TR-8, VA-3, WW-1, WW-2 and WW-6.</p> <p>Engineering refinements made between the publication of the Draft EIS and Final EIS resulting in a roadway modification change for County Road 176. County Road 176 would no longer be built over the Project. The Project would be on viaduct at this location, which would no longer require the construction of an overpass. The Project would be viaduct at this location from approximately half a mile north of County Road 39 to approximately 1.6 miles south of County Road 176.</p>
Jim Candler	2/12/2018	Letter	<p>As stated in the Federal Rail Administration (FRA) December 19, 2017 Notice regarding the release of the Draft Environmental Impact Statement (DEIS) for the Dallas to Houston High Speed Rail (DHHSR) Project, the FRA is accepting comments from the public and other interested parties in order to consider and evaluate the impacts of the proposed project. As a land owner directly impacted by this project, I offer the following comments. My property is located at 2816 CR 176, Singleton, Texas in close proximity to FRA Station Number HN2 1510+00.</p> <p>Comment #1: Waters of the US - Surfaces Water Resources The proposed DHHSR route crosses 1.25 miles of my 380-acre tract, essentially splitting it lengthwise into two tracts. The land is currently used for livestock and hay production. Man-made ponds supplement and enhance the natural flow and ponding of water, thereby providing water to all pastures for cattle. Based on the FRA DEIS issued in December 2017, about a half of the track configuration bisecting my property will be an embankment as shown on Sheets 433-435, Segment 5, Project Footprint DHHSR DEIS (see Attachments 1-3). Drawings in the DEIS also indicate that water collected on the up-dip side of the embankment will be routed to detention ponds within the train property. Currently, all ponds on the east side of the proposed train route are fed by surface run-off from the west side of the route. The embankment will essentially cut off water supplies for ponds on the east side of my property and the DHHSR project will capture all runoff on the west side leaving no water for my livestock operation or surface flow across my hayfield. FRA Procedures for Considering Environmental Impacts as published in the May 26, 1999 Federal Register Pages 28545-28556, require the FRA to evaluate water quality, ecological systems, and use of natural resources such as water, as well as existing and planned land use. These water bodies are valuable and crucial to existing cattle and hay operations and will continue to be needed by the landowner for ongoing operations. The landowner's use of his surface water will be negatively impacted by the alteration, restriction, obstruction or capture of the natural flow and impoundment of his surface water. Capture of surface water by the DHHSR project implies an intended on-going use of this natural resource by the DHHSR owners. The DEIS fails to address the gross adverse impacts DHHSR will have on the property, natural resources, availability of water, and thus production on the Candler Ranch and other landowners, and fails to propose any mitigation for such impacts.</p> <p>Comment #2: County Road 176 Grimes County The elevation of Grimes County CR 176 over the DHHSR track, as proposed on Sheet 433, Segment 5, Project Footprint DHHSR DEIS (see Attachment 1), completely eliminates access to Candler Ranch and neighboring landowners. FRA Procedures for Considering Environmental Impacts as published in the May 26, 1999 Federal Register Pages 28545-28556, require the FRA to evaluate impacts on transportation, including local travel perspectives. As currently designed, the DHSSR will cross County Road 176 at</p>	<p>Refer to BA-5, BA-10, CR-3, CR-12, FP-1, FP-3, GN-1, GN-4, GN-5, LU-2, LU-7, LU-11, LU-14, NE-1, NE-7, SS-1, SS-18, SS-19, SS-23, TC-7, TR-6, TR-7, TR-8, WW-1, WW-2, WW-6 and WW-9.</p> <p>Engineering refinements made between the publication of the Draft EIS and Final EIS resulting in a roadway modification change for County Road 176. County Road 176 is no longer being built over the Project. The Project would be on viaduct at this location, which would no longer require the construction of an overpass. The Project would be on viaduct at this location from approximately half a mile north of County Road 39 to approximately 1.6 miles south of County Road 176.</p>

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>grade and County Road 176 is to be rebuilt as an overpass. The construction of an overpass at this location will cause orders of magnitude more damage to the environment than building a viaduct and will unnecessarily burden landowners along County Road 176. The proposed footprint as shown on Attachment #1, shows total disregard for landowner impacts. Building the DHHSR track on a viaduct north and south of CR 176 imposes fewer adverse impacts than the re-building of CR 176 as an overpass, which then becomes the taxpayer and county's responsibility to maintain. A viaduct for this portion of the route preserves access for multiple landowners on CR 176, greatly reduces the permanent land disturbance footprint, creates less obstruction to natural drainage patterns, reduces the number of borrow pits for construction material and eliminates the need for detention ponds. The least impactful design where the DHSSR crosses County Road 176 in Grimes County is to leave the road at grade and have the DHSSR cross the road on a viaduct. Comment #6: Impacts to Transportation FRA Procedures for Considering Environmental Impacts as published in the May 26, 1999 Federal Register Pages 28545-28556, require the FRA to evaluate impacts on transportation, including local and regional perspectives and traffic congestion. Although the DEIS tabulates road closures, reroutes and rebuilds within the DHHSR route, and proposes to build overpasses and new access roads, the DEIS does not evaluate impacts to the structural integrity of county roads outside the DHHSR route. County roads in Grimes County are designed for rural and residential traffic and will be in constant need of repair during the construction phase of the DHHSR project. The DEIS does not speak to the adequacies of county roads to handle the increased traffic in terms of volume or weight. Impacts to county maintenance crews and equipment is not addressed in the DEIS. Likewise, the impacts to local taxpayers to upkeep county roads for use by DHHSR contractors is not addressed.</p> <p>Comment #3: Floodplain Management According to FEMA Floodplain Maps (and personal experience), the floodplain associated with Sulphur Creek is wide and floods often. Sulphur Creek is highlighted on Sheet 209, Segment 5, Natural Resources, DHHSR DEIS (see Attachment 4). In addition to rain fall, Sulphur Creek accepts industrial discharges from the Tenaska Frontier Generating Station (TPDES Permit No. WQ0003996000). Sulphur Creek flows to the Gibbons Creek Reservoir, then to Gibbons Creek, and finally to the Navasota River which is part of the Brazos River Basin. FEMA maps indicate that a base of flood elevation has not been determined for Sulphur Creek. During times of industrial discharge and/or heavy rainfall, Sulphur Creek floods, making it impossible for people or livestock to cross. Since I own property on both sides of Sulphur Creek, any minor reduction of floodplain capacity will negatively impact current use of my land. FRA Procedures for Considering Environmental Impacts as published in the May 26, 1999 Federal Register Pages 28545-28556, require the FRA to evaluate flood hazards and floodplain management. The DEIS acknowledges that all Build Alternatives will impact regulatory floodplains and tabulates the impacts on a county-wide basis. The DEIS further states that adverse effects on floodplains will be minimized during construction but does not quantify these temporary impacts nor describe how the floodplain will be restored after the multi-year construction period. What assurances do landowners have that floodplains on their property will remain unchanged?</p> <p>Comment #4: Historic Properties The majority of the alignment for the proposed DHHSR project has not been investigated for the presence of Historic Properties or other cultural resources. Several old buildings on property at 2816 CR 176, Singleton, Texas as shown on Sheet 209, Segment 5, Land Use, DHHSR DEIS (see Attachment 5) are remnants of a bygone era and should be preserved. Two of the buildings are pump houses used for gathering oil in the 1930s and were relocated to the present location in the mid-1950s. There is a hen house and old barn in addition to the pump houses, as well as an old hand dug well adjacent to the 1930 structures and a functioning 60' deep water supply well for human consumption and livestock. Latitude and longitude coordinates for the center of the group of historic structures are 30' 38' 48.77" N and 95' 97" 49.50" W. FRA Procedures for Considering Environmental Impacts as published in the May 26, 1999 Federal Register Pages 28545-28556, require the FRA to evaluate locations of historic, archeological, architectural, or cultural significance. The DEIS dedicates little discussion to the preservation of historic and cultural resources other than to include a brief literature review and explain that many cultural resources are not protected by law. Achieving a place on the National Register of Historic Places or being recognized by the Texas Historical Commission as worthy of preservation can be a lengthy and expensive endeavor. Although there is mention of a Programmatic Agreement to establish a process for evaluating cultural resources, the DEIS does not recognize that the route alignment has not been investigated for the presence of Historic Properties or other cultural resources and does not require DHSSR to address the issue. As the current owner of these pump houses, I request that they (and other similar situations) be protected and preserved under the proposed Programmatic Agreement for phased identification and treatment of Historic Properties as discussed in the DEIS, or by other binding means.</p> <p>Comment #5: Impacts to Socioeconomic Environment FRA Procedures for Considering Environmental Impacts as published in the May 26, 1999 Federal Register Pages 28545-28556, require the FRA to evaluate impacts to the socioeconomic environment, including impacts to commerce and existing businesses. Ranching is a primary occupation in Grimes County. These self-employed businessmen and businesswomen are taxpayers and are the backbone of Grimes County commerce. Although the DEIS distinguishes between agricultural land and non-agricultural land, the DEIS does not assess the overall impacts to the business side of ranching and does not recognize the huge role ranching plays in providing a livelihood and food supply for residents in Grimes and surrounding counties. Clearly the DEIS does not evaluate</p>	

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>impacts to commerce and existing businesses along the DHHSR route through Grimes County.</p> <p>Comment #6: Impacts to Transportation FRA Procedures for Considering Environmental Impacts as published in the May 26, 1999 Federal Register Pages 28545-28556, require the FRA to evaluate impacts on transportation, including local and regional perspectives and traffic congestion. Although the DEIS tabulates road closures, reroutes and rebuilds within the DHHSR route, and proposes to build overpasses and new access roads, the DEIS does not evaluate impacts of the structural integrity of county roads outside the DHHSR route. County Roads in Grimes County are designed for rural and residential traffic and will be in constant need of repair during the construction phases of the DHHSR project. The DEIS does not speak to the adequacies of county roads to handle the increased traffic in terms of volume or weight. Impacts to county maintenance crews and equipment is not addressed in the DEIS. Likewise, the impacts to local taxpayers to upkeep county roads for use by DHHSR contractors is not addressed.</p> <p>Comment #7: Impacts to Local Government Services and Revenues FRA Procedures for Considering Environmental Impacts as published in the May 26, 1999 Federal Register Pages 28545-28556, require the FRA to evaluate impacts to local government services and revenues. In Grimes County, some emergency services are provided by local communities. The DEIS acknowledges that road closures, detours and localized automobile congestion will increase response time for law enforcement, fire and emergency services personnel. Although the DEIS discusses emergency response time, the DEIS does not discuss the impact of increased demand on these services, which are provided often on a volunteer basis with limited resources and personnel. Although these services are well prepared to respond to emergencies in their current rural setting, the DEIS does not evaluate the capabilities of these services to respond to construction and operational emergencies associated with the high-speed train project nor does the DEIS discuss the extra demand on these services due to increased traffic accidents. These impacts affect every taxpayer in the county, not just the landowners along the route.</p> <p>Comment #8: Current Land Use FRA Procedures for Considering Environmental Impacts as published in the May 26, 1999 Federal Register Pages 28545-28556, require the FRA to evaluate impacts to existing and planned land use. The DEIS states that land use conversion will be primarily agricultural land with minimal conversion planned for industrial and other land types. The DEIS estimates that more agricultural land will be converted in Grimes County than in any other county. Specifically, 1,378 acres of agricultural land will be converted permanently and 391 acres of agricultural land will be converted temporarily in Grimes County as a result of the DHHSR project. These estimates only include land use conversions along the route and do not include associated adverse impacts or land use conversions such as disturbance of nearby land due to excavation of material to build berms, creation of borrow pits, restrictions on movement of livestock and wildlife where berms are constructed, limitations to the movement of agricultural equipment to manage agricultural operations, mitigation of wetlands, loss of water wells, and disruption of water runoff to surface impoundments. The FRA has eliminated certain resources, including land use, from further review due to the undeveloped nature of the area. Agricultural land is not undeveloped land nor is it idle land. The DEIS does not recognize the significance of this agricultural land and the severe adverse impact these disturbances will have on livestock and crop production both during the construction phase and ongoing operational and maintenance phase. Perhaps the greatest failure of the DEIS is the lack of understanding of the agriculture community and the adverse impacts the DHHSR will impose on the water quality, ecological systems, wetlands areas, wildlife, and use of natural resources such as water and soil that agricultural operations depend on for survival. These adverse impacts not only have a direct local impact, they have an adverse impact on county-wide commerce, revenue and taxes as well as a state-wide impact on food supply.</p> <p>Comment #9: Build Alternatives As part of the corridor screening process, the FRA eliminated the BNSF (Burlington Northern Santa Fe) and UPRR (Union Pacific Railroad) corridors predominantly because BNSF and UPRR declined consent to share their right-of-way. For the record, please note that Candler Ranch and many other landowners decline consent to share our land with the DHHSR.</p> <p>Comment #10: Federal Funding The public has been led to believe that the DHHSR project is a privately funded enterprise. The DEIS clearly states that one or more companies affiliated with the Texas Central Rail may apply for federal funding assistance. This statement is confusing and disconcerting to the general public. Will the DHHSR project be a privately funded venture or not?</p> <p>Summary: I appreciate the opportunity to offer these comments regarding the DHHSR project for your serious consideration. I respectfully ask the FRA to withdraw the current Draft Environment Impact Statement (DEIS) issued on December 15, 2017 and re-issued a revised DEIS once these deficiencies have been addressed. Based on the incomplete information contained in the current DEIS, the only defensible option is the No Build Alternative.</p>	
Jim Candler	2/12/2018	Email	<p>As stated in the US Army Corps of Engineers (USACE) December 22, 2017 Public Notice for the Dallas to Houston High Speed Rail (DHHSR) Project, the USACE is soliciting comments from the public and other interested parties in order to consider and evaluate the impacts of the proposed project. As a land owner directly impacted by this project, I offer the following comments and requests.</p> <p>Historic Properties</p>	Refer to CR-12, FP-1, FP-3, WW-1, WW-2 and WW-9.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>As recognized by the USACE, the majority of the alignment for the proposed DHHSR project has not been investigated for the presence of Historic Properties or other cultural resources. Several old buildings on property at 2816 CR 176, Singleton, Texas as shown on Attachments 1 and 2 are remnants of a bygone era and should be preserved. Two of the buildings are pump houses used for gathering oil in the 1930s and were relocated to the present location in the mid-1950s. There is a hen house and old barn in addition to the pump houses, as well as an old hand dug well adjacent to the 1930 structures and a functioning 60’ deep water supply well now used for human consumption and livestock. Latitude and longitude coordinates for the center of the group of historic structures are 300 38’ 48.77” N and 950 97’ 49.50” W. Some of the structures are identified on Sheet 209, Segment 5, Land Use, Dallas to Houston High-Speed Rail Project Draft Environmental Impact Statement prepared by the Federal Railroad Administration (Attachment 3).</p> <p>As the current owner of these pump houses, I request that they be protected and preserved under the proposed Programmatic Agreement for phased identification and treatment of Historic Properties between the applicant (Texas Central Railroad, LLC) and the USACE, or by other binding means. The buildings can be moved to a secure location agreed to by the landowner.</p> <p>Floodplain Management According to FEMA Floodplain Maps (and personal experience), the floodplain associated with Sulphur Creek is wide and floods often. Sulphur Creek is located on the southern part of USACE Sheet 404-HN02045 (Attachment 4) and highlighted on Sheet 209, Segment 5, Natural Resources, Dallas to Houston High-Speed Rail Project Draft Environmental Impact Statement prepared by the Federal Railroad Administration (Attachment 5). In addition to rain fall, Sulphur Creek accepts industrial discharges from the Tenaska Frontier Generating Station (TPDES Permit No. WQ0003996000). Sulphur Creek flows to the Gibbons Creek Reservoir, then to Gibbons Creek, and finally to the Navasota River which is part of the Brazos River Basin.</p> <p>FEMA maps indicate that a base of flood elevation has not been determined for Sulphur Creek. During times of industrial discharge and/or heavy rainfall, Sulphur Creek floods, making it impossible for people or livestock to cross. Since I own property on both sides of Sulphur Creek, any minor reduction of floodplain capacity will negatively impact current use of my land. I request the applicant be prohibited from modifying floodplain capacity without providing a means to cross Sulphur Creek.</p> <p>Waters of the US – Surfaces Water Resources The proposed DHHSR route crosses 1.25 miles of my 380-acre tract, essentially splitting it lengthwise into two tracts. The land is currently used for livestock and hay production. Man-made ponds supplement and enhance the natural flow and ponding of water, thereby providing water to all pastures for cattle.</p> <p>Based on the Federal Railroad Administration Draft Environmental Impact Statement (DEIS) issued in December 2017, about a half of the track configuration bisecting my property will be an embankment as shown on Attachment 6. Drawings in the DEIS also indicate that water on both sides of the embankment will be routed to detention ponds within the train property. Currently, all ponds on the east side of the proposed train route are fed by surface run-off from the west side of the route. The embankment will essentially cut off water supplies for ponds on the east side of my property and the applicant will capture all runoff on the west side leaving no water for my livestock operation.</p> <p>Current drainage is shown on USACE Sheet 404-HN-02045 (see Attachment 7). Although some of the water bodies are labeled as potentially non-jurisdictional waters, they are valuable and crucial to cattle operations and should not be altered or restricted by a long linear man-made obstruction impacting approximately 3,500 – 4,000 feet of drainage on my property.</p> <p>I request that the USACE not allow the applicant to completely or partially remove ponds and essentially take control of all surface water on my property by capturing or obstructing the natural flow of water that has been used historically by the landowner.</p> <p>I appreciate the opportunity to offer these comments regarding the DHHSR project for your serious consideration. Again, I respectfully ask the USACE to 1) protect and preserve historic buildings located at [...]; 2) ensure that floodplain capacity is not reduced along Sulphur Creek just west of US Highway 90 and 3) prohibit the applicant from capturing or obstructing the natural flow of water across my 380-acre tract located at [...], Singleton, Texas.</p>	
Candler Ranch, LLC	2/12/2018	Letter	<p>Comment #8: Current Land Use FRA Procedures for Considering Environmental Impacts as published in the May 26, 1999 Federal Register Pages 28545-28556, require the FRA to evaluate impacts to existing and planned land use.</p> <p>The DEIS states that land use conversion will be primarily agricultural land with minimal conversion planned for industrial and other land types. The DEIS estimates that more agricultural land will be converted in Grimes County than in any other county. Specifically, 1,378 acres of agricultural land will be converted permanently and 391 acres of agricultural land will be converted temporarily in Grimes County as a result of the DHHSR project.</p> <p>These estimates only include land use conversions along the route and do not include associated adverse impacts or land use conversions</p>	Refer to LU-2, LU-11, LU-14, NR-5, SC-19, VA-3, WW-1, WW-2 and WW-6.

The DEIS does not recognize the significance of this agricultural land and the severe adverse impact these disturbances will have on livestock and crop production both during the construction phase and ongoing operational and maintenance phase.</p> <p>Perhaps the greatest failure of the DEIS is the lack of understanding of the agriculture community and the adverse impacts the DHHSR will impose on the water quality, ecological systems, wetlands areas, wildlife, and use of natural resources such as water and soil that agricultural operations depend on for survival. These adverse impacts not only have a direct local impact, they have an adverse impact on county-wide commerce, revenue and taxes as well as a state-wide impact on food supply.</p>	
Stella Cannefax	3/3/2018	Website	We need trains instead of continuing to build highways, please	Comment noted.
John Cannizzaro	2/7/2018	Website	High Speed Rail funded by any source is important to the transportation development of the entire nation. Texas , and every other state, should be supported when they endeavor to build high speed rail infrastructure or improve existing rail transit facilities. Rail transit needs to be greatly expanded in the U.S. if we are to meet present and future transportation demands. One just has to look at the ever increasing delays, congestion and choked traffic on our roads to see the dangerous future ahead on our roads and interstates . I recently journeyed to Florida to escape the harsh NJ winter . I was shocked at the volume of traffic on I-95 north & south . I also experienced major delays on other roads in Florida at many different times of the day .The situation has worsened considerably in just a few short years. If we do not start building more rail capacity soon , this country will suffer major economic setbacks .	Comment noted.
Carl Cannon	2/5/2018	Oral	I'm Carl Cannon. I'm a commission in Precinct 3, 12 years representative in Madison County. Looking at this from a tax situation to us, as far as the county goes; for the last three years, I've voted not to raise taxes for Madison County. I didn't like this thing, it's going to cost the county a lot of money regardless of what they're saying and if it does, we're going to be forced to raise taxes. And I feel like they need to pay for every bit of damage that they do. And I know that it's not possible they can pay for it. You can't put a price on the damage they're going to do to people's property and lives. But from the County's standpoint and the commissioner's standpoint, I wanted to say we're been working every since this thing started. I've been interested the whole time, I'm still interested and if there is anything that anybody could think, a silver bullet to stop this bullet train, as commissioner's, I'll be glad to put it on the commissioner's court agenda and we'll pass whatever we need to, to try to pass it, to stop this train. Thank you all.	Refer to GN-4, GN-5 and VA-1.
Laura Ann Cannon	2/5/2018	Oral	Laura Ann Cannon I am Laura Ann Cannon and I have been here a long time. I am totally against this project. All of you know I am. First thing is the mention of safety, that's why a lot of us live here. But they don't know how they're going to plan for safety because nothing has ever been done like this in the United States. They doesn't make sense. Don't tell us it's safe unless you know how you're going to do it One of the other terms that's said here tonight: eminent domain: and I think that's what has lots of us here. Ugliest word in our language. Take something away that we hale. It's ours? No: if it's not yours. And if we were talking about eminent domain taking your 401k or your retirement fund, some of you would be griping up here behind me, but no, you're going to take our land, which is ours. This is Texas: our land means something to us. The ridership numbers don't add up. They hadn't been adding up from the beginning and you and I been coming to these meetings for five or six years now or more. The predictions of money, they don't add up either. And we are going to lose something that means something to us are foreign investors: my land and they're not plan on taking mine but they're taking my neighbors'. And that's just - - I love my neighbors. The same thing about the roads. If rm on the other side of the train: when they start putting in the overpasses and stuff because of the ambulances: I don't think they'll find you very fast. Not fast enough to save you and lots of you. Or the fire departments: you know the overpasses are going to be slow going up. We don't have it to lose people because of that stuff Let me see. I think that's about it. Kyle Workman said plenty. We don't want the train. I think I had another thought: it flew out. Thank you.	Refer to ED-1, ED-2, GN-2, GN-4, NE-1, SS-12, SS-13, SS-23 and TR-8.
Vickie Canon	1/19/2018	Email	3.16.5.2.2 Impacts as a Result of the HSR System"Emergency Response Service Levels "With implementation of mitigation measures described in Section 3.16.6.2 and approval by the local jurisdictions and service providers, impacts to emergency response times would not be anticipated to be significant." How can the EIS state the impacts to emergency response times would not be significant? What are the factors used to determine level of significance? Any delay has the impact to medical care and/or potential for loss of life. Is this not significant?	Refer to SS-23.
Vickie Canon	1/19/2018	Email	3.16.5.2.2 Impacts as a Result of the HSR System"Emergency Response Service Levels. During Construction Temporary and permanent road closures and modified traffic routing would occur. Lane closures and detours could potentially create a distraction to automobile drivers, pedestrians, and cyclists. In addition, road closures, detours and localized automobile congestion could increase the response time for law enforcement, fire and emergency services personnel, public transportation and school buses." A designation is used to represent areas where	Refer to SS-23.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			there would be no through roads, or areas that would otherwise meet the criteria for high potential but would not affect a substantial portion of the service area."No one should be subjected negatively to modifications to emergency services. The fact that you live in an area that isn't considered a substantial portion of the service area, makes you no less vulnerable to an emergency. Another example of the EIS bias to rural areas	
Vickie Canon	1/19/2018	Email	3.16.5.2.1 Impacts on the HSR System "Adequate drainage along the Build Alternatives and at facilities is the key to preventing safety hazards related to flooding and flash flooding. There are several strategies to reduce the impacts to floodplains, including retaining existing elevations, constructing stormwater mitigation measures, constructing retention/detention ponds and minimizing fill in sensitive areas, as described in Section 3.8.6.2, Floodplains. As a result of implementing these strategies, any flooding-related safety impacts would not be significant. Additionally, the HSR system's detection system, embedded throughout the HSR rail corridor, would detect flooded track, which would subsequently be inspected and, if needed, repaired, prior to reinitiating operations. ". It already floods in this area. With one way into our property when it floods, which will be blocked by HSR track how will I have access to my home? Has the EIS factored that into their plan?	Refer to FP-1, WW-1 and WW-2.
Vickie Canon	1/19/2018	Email	3.16.5.2.1 Impacts on the HSR System "The Build Alternatives would include elements, such as station facilities, passenger vehicles, maintenance facilities and the traction power stations that are at risk from extreme weather or seismic events that would create a need for the safe evacuation of passengers and employees."This section addresses suspending train services during severe weather or seismic events. Can they now predict weather and earthquakes? There is very little warning for tornadoes and earthquakes so what happens to passengers in route? Are they stopping the train on the tracks and waiting it out? A lot can happen in 90 minutes. What happens when a tornado flings a train and passenger across the countryside? What is the contingency plan for repairs for property owners due to these types of events?	Refer to SS-15, SS-18 and SS-19.
Vickie Canon	1/19/2018	Email	3.18.5.4.3 Noise and Vibration "Two severe noise impacts would occur at residences on Segment 1 in Ellis County, one severe noise impact would occur on Segment 4 in Leon County, and one severe noise impact would occur on Segment 5 in Grimes County. All residences would be located more than 50 feet from the Build Alternatives, and portions of the properties would be acquired. Residences located more than 50 feet from the LOD would require mitigation if property owners choose to remain. During final design and upon completion of the parcel acquisition process, if homeowners are located where a severe noise impact would occur and choose to remain, TCRR would need to complete additional noise assessments prior to operation to refine the noise impact and determine appropriate mitigation strategies in coordination with the property owner. " What is the mitigation strategy? Who is responsible for the installation, cost and maintenance? What rights do homeowners impacted have?	Refer to NV-1.
Vickie Canon	1/19/2018	Email	6.2.2 Land Use "The Build Alternatives would require the conversion of land, including agricultural or undeveloped land, to accommodate the HSR system. Use of these lands is considered an irreversible commitment during the time period that the land is used for permanent operation and would preclude the use of this corridor from other uses such as additional transportation options or other linear infrastructure uses. Construction activities would require temporary use of land for lay down and work areas, which represent a temporary, yet reversible, use of the land. As previously described, TCRR employed design features to avoid and minimize the irreversible commitments of land use." Does this mean they can use your land temporarily for construction? Do the property owners have any say in this? Are property owners compensated for this? Does this fall under rights of eminent domain? If so this is totally disregarding rights of property owners.	Refer to ED-2 and LU-14.
Vickie Canon	1/19/2018	Email	6.2.4 Wildlife Habitat "Build Alternatives would involve the loss in value of protected wildlife habitat that supports threatened and endangered species. Resource specific surveys would be completed prior to the start of construction. If it is determined that protected species are present and likely to be adversely, FRA will develop avoidance and mitigation measures. What does this mean? Are they exempt from impacts to endangered species? What is an example of mitigation measures? Whether or not there are endangered species on the property all wildlife and native grasses and trees will be negatively impacted just by the disruption to their native habitat. This is not acceptable. As a side note, feral hogs inhabit the area in Ellis county. There is not a fence, electrified or not, that will prevent them from going through or burrowing under. What happens when a train going 200 mph hits a herd of hogs on the track? It would be devastating to the passengers.	Refer to NR-4, SS-2 and SS-12. The project is not exempt from studying the impacts to endangered species and USFWS is a cooperating agency on the project.
Vickie Canon	1/19/2018	Email	3.16.3.2.3 Emergency Services "For fire and EMS service areas bisected Build Alternatives, an inventory of roads providing connections between both sides was conducted to determine the number of roads that would be modified and the potential for those modifications to affect response times. " Where are the specifics regarding the modifications that could affect response time? Any delay in services has the potential for loss of life and is not acceptable. I can get to Baylor Scott White hospital in Waxahachie's emergency room in about 15 minutes. How will that be impacted? Ability to get medical services, especially in an emergency situation is critical. What about law enforcement assistance? Ellis county officers already have a large area to cover; having to maneuver around HSR crossings will impact their time to service. The same goes for fire services.	Refer to SS-23.
Vickie Canon	1/19/2018	Email	3.16 Safety and Security" Federal Security Directives RAILPAX-04-01/ RAILPAX-04-02 TSA issued Security Directives which require passenger rail systems to implement certain security measures to address potential terrorist threats and establish a consistent baseline of protective	Refer to SS-6 and SS-9.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			measures. Specifically, RAILPAX-04-01 requires rail transportation operators to report potential threats and security concerns to law enforcement and the TSA, to designate a primary and alternate security coordinator, and to provide vulnerability assessments to the TSA, among other requirements." EIS states they have to report potential threats to the TSA but does it require TSA screenings of passengers? What measures will be in place to prevent terrorist's acts? The potential for a bomb being on the train and exploding in a station or anywhere along the route is a big threat to loss of lives. I was told at a meeting in 2017 by a TCR rep that TSA screening would not be part of the boarding process for the HSR.	
Vickie Canon	1/19/2018	Email	3.15.5.2.4 Induced Currents and Shock Hazards "The generation of EMF from the HSR system can result in induced currents in nearby metal structures. These currents can lead to shock hazards to humans and animals if touched. These induced currents and shock hazards can be minimized by grounding all metallic structures. Therefore, all metal equipment surrounding the HSR system (i.e., metal fencing) would be grounded to minimize induced currents and shock hazards and maintained to prevent corrosion." Who will put in and maintain necessary grounding? Will there be a barrier fence in front of the electric fence? Who will remove bodies of animals killed by electric fence? What are provisions for human injury and death?	You have raised 4 questions, which are individually discussed below: 1. The grounding rods would be installed as part of the construction process. Grounding of metal fences is standard procedure for such projects. 2. Maintenance is the responsibility of the Project. 3. There is no need for a barrier fence. The fence itself is not electrified. The metal fence may occasionally have a small electric current induced as a train passes. Grounding the fence makes sure that any of these small, induced currents are directed to ground and not to a person or animal. 4. A person or animal touching the fence would not be adversely affected, since the fence is grounded, not electrified.
Vickie Canon	1/19/2018	Email	RE: Tax impact and Property Value There is plenty in the EIS regarding positive tax impact due to the building of the HSR. There is nothing I could find regarding the loss of value on property that is in the area of the HSR. Over the years our property value has continued to rise but now we can't even sell it if we wanted to. We are being held hostage by this project. Our property, if not taken, will be totally devalued by the HSR as it will be entirely visible at the top of the hill behind our currently very scenic and peaceful property. We won't be able to sell it except for pennies on the dollar if we wanted to leave the area. This property is part of our long term retirement plan; either as a value against long term care or to be left to my daughter to raise her future family. It will be worth virtually nothing due to the HSR and thus impacting our and our daughter's financial future. Everyone in the path of the HSR faces the same issue with property value	Refer to VA-1.
Vickie Canon	1/19/2018	Email	3.14.5.2.2 Impacts to Community Character and Cohesion Community cohesion is a function of density and can be a concern, particularly in urban and suburban areas where a transportation infrastructure can create a localized barrier between a residential community and social or commercial resources. In rural areas, which are less dense, there would be more flexibility to maintain connectivity, especially to community facilities." Please explain how in rural areas, which are less dense, there would be more flexibility to maintain connectivity? What is the methodology in determining this? Bisecting our county will only service to divide the communities and even neighborhoods. School districts may be to be reworked, and if not the routes will be longer, which may require additional buses and drivers-additional expense to the school districts. There is a decided bias throughout the EIS against the rural areas. This is only one example.	Refer to SC-6. Through the development of the Project, FRA and TCRR have taken steps to avoid, minimize and mitigate any impacts to communities through changes to track configuration, and to mitigate or minimize the number of roadway modifications. The Final EIS has been updated to clarify and more fully describe scenarios and definitions for identifying communities and describing community cohesion. Methodology can be found in Section 3.14.3, Socioeconomic and Community Facilities, Methodology . The effects of the project on communities are further described in Section 3.14.5.2.2, Socioeconomics and Community Facilities, Impacts to Community Character and Cohesion .
Vickie Canon	1/19/2018	Email	3.14.3.2.4 Business and Agricultural Displacements "Some economically productive properties may be lost as a result of the acquisition of agricultural land or the displacement of a business. Since the crop types can vary year-to-year, the potential loss of income was calculated on price per acre, as derived from Table 3.13-6 (Section 3.13, Land Use). Loss of crops due to the permanent conversion of agricultural lands was estimated at \$317 per acre, based on the average market value of crops sold within the Land Use Study Area. "Where are the calculations regarding losses due to farmers not being able to efficiently farm their property when it is bisected by the train track? Who pays for the cost of new fencing? Who pays for the cost of additional fuel, and maintenance of equipment? Where are studies on impact to livestock? How many farmers and ranchers will be put out of business?	Refer to LU-11 and LU-12.
Vickie Canon	1/19/2018	Email	3.13.3.3.4 Structure Displacement and Land Acquisition "The identification of parcels for potential acquisition was based on a number of factors including the displacement of structures in or within proximity of the LOD, percentage of the overall parcel impacted by the LOD, lack of or permanent disruption to access, and the creation of remnant parcels. " "Permanent acquisition would occur for parcels within the HSR ROW, while parcels within temporary construction areas would be leased or temporarily acquired."Is this based on the assumption the project obtains rights of eminent domain? Where are they in this process? And if they do get rights to take property, do they have the same rights regarding temporary rights for construction?	Refer to ED-1 and ED-2.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
Vickie Canon	1/19/2018	Website	3.18.5.4.6 Transportation "Transportation impacts would primarily be caused by permanent modifications to the existing public and private roadway network. During construction, detours would be provided for roadways needing to be rerouted, relocated or closed in accordance with emergency service requirements. Temporary road closures and detours could cause some delay for users; however, impacts would be temporary in nature." What is the definition of "temporary in nature?" Is this the duration of the construction? Four years of construction is not a temporary delay. How much of a delay are they planning on? Will the delay be only in the construction area or will the rest of the community be impacted? Any delay of more than a month is a huge impact of everyone's lives from time to drive to work, medical services, church, community events, postal and delivery services, school routes, etc.	Refer to LU-10, TR-6 and TR-10.
Vickie Canon	1/19/2018	Website	3.11.5.2.2 Ellis County Roadway Network Table 3.11-41 identifies 27 roads (public and private) in Ellis County that would be permanently impacted by the Build Alternatives. Epps Road is slated for a reroute of 1900 feet. The entire road is probably not more than 2 miles but is a connector road between Palmyra and McKeever Roads. It runs parallel to Almand Road which is also impacted. This has major potential to impact our ability to gain access and leave our property; especially during times of flooding. Currently the best and sometimes only way to get to our property when it floods is from the west end of Epps Rd. which will be rerouted. We would be on the opposite of the tracks. We need access to our property at all times. This also has impact to emergency services, postal/ deliveries services, school buses and ease of access to medical services in Waxahachie. Many of the family that live on Epps Rd. are of an age that access to quick emergency services is a must.	Epps Road would be rerouted in Build Alternatives D, E and F, which are not part of the Preferred Alternative. The Preferred Alternative includes a rail over road configuration for Epps Road, where there will be no reroute.
Vickie Canon	1/19/2018	Website	3.10.5.2.6 Landscape Unit #4 Suburban to Rural Transition, IH 20 to Palmer (Dallas and Ellis Counties)"The existing view of KVP #11 is facing west on Almand Road in the Town of Palmer, and represents a typical view of the landscape ...There would be few viewers represented by this KVP, comprised mostly of residents and agricultural workers"... viewers would only notice the HSR system when the train quickly passes through. Therefore, the viewer sensitivity would be moderate." I live in this area and the picture of is not totally indicative of our area. My view of the HSR would be directly behind my house, a tree lined creek and hill covered in trees. It will totally impact the aesthetics of the area. As stated in the EIS "comprised mostly of residents and agricultural workers..." appears that there is no regard for that population/our view point of the aesthetics of where we live and work. This is another example in the EIS of bias against the rural communities that will be impacted	Refer to AS-1.
Vickie Canon	1/19/2018	Email	Segments 2A, 2B, 3A, 3B, 3C and 4 FRA did not identify any adverse impacts to community character and cohesion along Segments 2A, 2B, 3A, 3B, 3C and 4 of the Build Alternatives. "There are many adverse impacts to the communities - bisecting the county; splitting up school districts, postal and delivery routes, emergency services, community functions, and even the ability to get to your church of choice. A change in accessibility to your route to work may cause changes to where people work. There are trail riders and cycling groups that will no longer come to our area as the routes would be impacted. There is adverse impact to those that live here, just not those that want to ride the HSR.	Refer to SC-6 and SC-7. No access would be removed from community facilities, school districts, postal and delivery routes, or emergency services. Potential impacts to recreational facilities can be found in Section 3.17.5, Recreational Facilities, Environmental Consequences.
Vickie Canon	1/30/2018	Oral	My name is Vickie Canon and I live in Ellis County. The proposed high speed rail will go within a stones through of my back fence. I have submitted over 20 comments to the FRA regarding my opposition and I am not finished. It is my belief the environmental impact survey has a bias against rural Texans that is full of misstatements. There is no benefit to those property owners and citizens of counties between the stations, none. Our counties will be bisected by something we can't even use. It will take land from families, impede their ability to farm and increase time to go anywhere. Rural county roads, the county must foot the bill for repairs. It will split communities. You won't even be able to visit your friends, family or your church without going miles out of your way. It will impact schools and emergency service districts and adding additional cost for staffing and equipment which won't be paid by TRC. There will be a delay in services. They are going to close and modify roads, increasing travel time. It will put endangered species at risk. We as tax payers will end up paying for it when it fails. The ridership numbers don't make sense and those estimates have continued to go up. i have examples. It clearly states there will be road closures and modifications to roads causing a delay in response time but not be significant. Any delay in response time could potentially be lethal. How is this not significant. Please explain this to me. Another example. The survey touts that families will receive income from taxes paid from TCR but does not address the loss of property value to owners. The property values will decrease but they will be held hostage to those not able to sell their property for what it is worth before the high speed rail. Another example. the survey shows a photo of an example of someones's property which is not indicative of the surrounding area and it states the population is mostly residents and agricultural worker. Since the train passes quickly there is only moderate impact to the views. I guess because it is only residents and agricultural workers we don't count. That is very biased. I would say the impact is more than moderate especially along a speeding bullet every 30 minutes. I could give many more examples but I ask that you stop this project from going forward. We don't need another supercollider.	Refer to AS-1, ED-2, LU-11, NR-5, SC-6, SC-19, SS-23, SS-26, TR-7, TR-8 and VA-1.
Vickie Canon	3/5/2018	Website	The impact on agriculture is seriously understated in the EIS. Where did they get their numbers from? Farmers/ranchers' ability to efficiently work their property and stock will be negatively impacted. What happens to the general economy when the price of produce/meat goes up? Even Sid Miller, Texas Commissioner of Agriculture is opposed to this project. He is in a position to have a much better understanding than the normal person regarding the negative impact. Did anyone involved in this survey talk to him or anyone on his staff regarding the impact? I bet not.	Refer to LU-1, LU-2, LU-11, NE-7 and PI-1.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
Vickie Canon	3/5/2018	Website	The Noise Analysis in the EIS is flawed. Nowhere that I can see did they measure the sound of 2 trains passing at the same time. The speed used in the study was lower than the projected 200 plus mph. Nowhere did they report the impact of the "slapping sound" made by the train. This study needs to be redone to report accurate and true measurements of ALL scenarios that could occur. FRA does not need to make a determination based on flawed information.	Refer to NV-1, NV-6 and NV-10.
Vickie Canon	3/5/2018	Website	The EIS doesn't not reflect what will happen to individual property owner's property taxes. The HSR will devalue their property meaning the revenue from their property will be lower. Counties already struggle with staying in budgets. How will this impact their budgets? And forget about being able to actually sell their property at what is was worth prior to the HSR. This is all an effort to take from the average property owner for the good of a corporation. Is TCR going to pay for the loss of value on your land because it is near by and impacted by the HSR?	Refer to VA-1.
Vickie Canon	3/5/2018	Website	TCR has misstated their interaction with county law enforcement and stated there will be minimal disruption to emergency services. TCR didn't even bother to talk to sheriffs until the county sheriffs formed the County Sheriffs Coalition and held a press conference. Where did TCR get their information on the LACK of significant impact to emergency services??? If any one person is negatively impacted and a life is lost that is SIGNIFICANT. With road closures and reroutes there will be delays. I don't need a study to figure that out. Get us facts on how they came up with their NO SIGNIFICANT IMPACT to emergency services data. Law enforcement in all impacted counties are against the HSR. FRA needs to listen to what they are saying.	Refer to PI-1, SS-23 and TR-8.
Vickie Canon	3/5/2018	Website	We need full disclosure on how TCR came up with their ridership numbers. They appear to be severely over inflated in an effort to get buy in from the FRA. If they used cell phone data to calculate numbers that is erroneous in itself. Example, they could have tracked my cell phone and the 4 teenagers in the car to come up with 5 riders. Let me tell you those 4 teenagers couldn't afford to pay for tickets so that is erroneous data. When TXDOT estimates ridership of .7-2.7 million, a transportation expert estimates 1.4 million and TCT/FRA estimates 7.2 million something is wrong with the calculations. Please provide how ridership was calculated with full transparency.	Refer to AQ-7, GN-2 and NE-1.
Vickie Canon	3/5/2018	Website	I may have missed it in the EIS, but who is responsible for maintaining (and the cost of) the private HSR access roads and the same for the multiple road overpasses for the HSR? Will TCR pay the counties for the repair and maintenance on the roads while construction is going on? The counties can not afford to add this to their budgets. This may cause an increase in county taxes at the same time property values will be decreasing. The property owners/taxpayers will get a double whammy on their tax impact. Where was this considered in the EIS? Was it even considered?	Refer to TR-7, TR-8 and VA-1.
Vickie Canon	1/19/2018	Email	5.0 RELATIONSHIP BETWEEN LOCAL SHORT TERM USES OF THE HUMAN ENVIRONMENT Temporary disruption of normal traffic patterns, increased traffic delays/detours; disruption/change in how properties accessed; loss of income to businesses; increases in noise, vibration, dust, light, glare from construction activities, increases in waste and hazardous materials disposal, adverse changes due to the presence of construction equipment, structures, reduced visibility, dust creation, soil erosion, respiratory hazards." NOT acceptable to property owners. Detrimental to those that will be exposed. Impacts to ability to get to work, not having adequate emergency services. Negative impact to property values. Loss of business/negative impact to farmers and ranchers making a living is not acceptable. Dust, vibration, glare, etc. will have health risks, especially to those with respiratory problems with a potential outcome of long term health issues or death and potential for additional medical bills.	Comment noted.
Kippy Caraway	2/21/2018	Website	This a very much needed project in Texas. With rain, wind, ice and hurricanes this will be the only form of useable transportation. The time alone will be reason alone for people to use,	Comment noted.
Paul Carden	2/27/2018	Website	My name is Paul Carden. I fully support this project and would like to see it built as soon as possible. I would encourage the government to move quickly in their reviews in order to allow this private enterprise to build a public good.	Comment noted.
CareNow	3/3/2018	Website	I am opposed to the train destroying a culturally, economically, historically and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique and irreplaceable property.	Refer to LU-5.

Robert Carl	1/23/2018	Email	My biggest concerns with this project in the effects of the rail on the Lake Bardwell area. 1. Lake Bardwell is the sole water source for the eastern half of Ellis County. There is little information regarding the effects of the construction or use and maintenance of the trail on the watershed for the Lake Bardwell. One maintenance facility is on Waxahachie creek directly upstream from the lake. 2. Lake Bardwell is one of the few recreational sites available in the area. It has already been a focal point of the City of Ennis for development of a loop around the lake with hiking and biking trails. The existing horse trails and bird watching areas will be greatly affected by a high speed rail that sounds like a "jack hammer" every 15 minutes. This will ruin the natural beauty and the lake area.	Refer to RF-1 and WW-2. The route at Lake Bardwell would be constructed on viaduct (bridge type structure) that allows for free movement of water.
Deborah Carlson	1/23/2018	Email	The no build option should be chosen as the only viable option in the final EIS. My property at 29219 Hay Meadow Ct will be potentially condemned by this unwanted, unneeded train. Need and Purpose has not been met for this project. I worked my whole life for this property. I plan to retire on it. It should not be legal for a company to come in and take what you have worked your whole life to accomplish.	Refer to BA-6, ED-1, ED-2 and PN-3
Glenn Carlson	2/11/2018	Website	I am opposed to the project because of the disruption and damage to farms and ranches in Montgomery Texas. I am also skeptical of passenger usage projections as well as economical viability. I will not be using the proposed facility AND do not wish to PAY for it.	Refer to GN-2, GN-4, LU-2, LU-11 and NE-1.
Jennifer Carlson	1/31/2018	Email	I am completely against the High Speed Rail coming through Navarro County. I don't agree with Homeowner's losing land that has been in their families for Decades. As a Real Estate Professional this will also cause property values to decrease all around the proposed High Speed Rail. Housing is already limited and people should not be displaced from their homes they have owned for years. The High Speed Rail is not good for our County. Keep the High Speed Rail out of Navarro County.	Refer to VA-1.

Nancy Carmichael	2/14/2018	Website	At the Waller High School Public Hearing on February 6, 2018, I discussed the plans and design with several Texas Central representatives and their contractors. As a result of these discussions, I believe that building this railroad could have significant negative impact to the existing drainage and potential to increase flooding. As I understand it, the team doing the impact assessment identified all streams and took them into account for planning engineering swales, detention, and culverts. Engineering then used this data to design according to the Army Corp of Engineers standard, which manages to the 100-Year Floodplain. I believe this is not adequate in view of the flooding events of the last few years in the greater Houston area. As an example, the Grand Parkway (designated as loop 99) which is the outer loop around Houston, flooded a few months after completion. Also, areas just north of 99 in the Tomball area that had never flooded are beginning to flood. I assume that the Grand Parkway was constructed to the Army Corp of Engineers'100-year floodplain rules. This design standard may be valid in other areas with more slope or lower water table, but they have proven inadequate in this area. Following Hurricane Harvey, FEMA and greater Houston area Emergency Management have discussed the rating system of 100 and 500 year floodplain and its use in building design. I support the 'No Build' option.	Refer to FP-1, FP-4, SS-17, WW-1 and WW-2. Updated floodplain designations and regulations have been incorporated into the Final EIS.
Michael Carnahan	2/7/2018	Website	I strongly support the Dallas to Houston High-Speed Rail Project. Building new rail infrastructure using the latest technology will help to generate more interest in the western United States so that rail can grow. Texas can lead the way.	Comment noted.
Eileen Carney	3/1/2018	Website	To Whom It May Concern I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194 I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge a fully operational rodeo arena, horse barn, colt barn all within walking distance of each other. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military. Thank you. Paul Carney	Refer to LU-5.
Kevin Carney	2/22/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term.	Refer to LU-5.
Kevin Carney	2/22/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easement would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term.	Refer to LU-5.
Kevin Carney	2/22/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. Kevin Carney	2/22/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easement would be less detrimental to the environment and cause less loss of critical migratory waters.	Refer to LU-5 and WW-2.
Kevin Carney	2/22/2018	Website	I am opposed to the train destroying Morgan Legacy Farm located near FM 709 and 3194. I think moving the line north, parallel to land already cordoned off for power lines makes far more sense than cutting this property in half. The proposed route cuts off critical access points and will the entire farm non-functional and economically inviable, inevitably causing it and other surrounding properties to fall in disrepair.	Refer to LU-5.
Kevin Carney	2/22/2018	Website	I am opposed to the train destroying Morgan Legacy Farm located near FM 709 and 3194. I think moving the line north, parallel to the power lines is a simple solution. It causes less impact to the surrounding land and avoids the higher elevations which will undoubtedly cause tremendous watershed issues and loss of critical migratory waters.	Refer to FP-1, LU-5, WW-1 and WW-2.
Kevin Carney	2/22/2018	Website	I am opposed to the train destroying Morgan Legacy Farm located near FM 709 and 3194. I think moving the line north, parallel to the power lines makes far more sense than chopping up this unique charitable property.	Refer to LU-5.

Kevin Carney	2/27/2018	Website	I have concerns about the high speed rail in Navarro County. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared. Our office staff has had over 100 employees and family members visit this ranch, ride horses, take hay rides and enjoy the unique experience not offered by any similar property....all at no cost. I would ask that this 5-7 mile portion scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic on the county that would occur if Morgan Legacy Farm is traversed.	Refer to LU-5.

Kevin Carney	2/27/2018	Website	I have very serious concerns about the high speed rail from Dallas to Houston. I do not believe we should be subsidizing a for-profit company with taxpayer dollars, much less destroying those same taxpayers' land, homes, and livelihoods to do so.	Refer to GN-4.
Kevin Carney	2/27/2018	Website	I have very serious concerns that Texas Central Rail is not acting in the interest of Texan taxpayers and landowners whose homes, businesses, and culture will be sacrificed to cut costs and drive profits. Near 709 and 1394 in Navarro county there is an already existing utility corridor for high voltage power lines, but TCR has opted to run the rail through the front yard of my family's farm. Contrary to what they've stated, the truth appears to be that this multinational company cares far more about getting paid for its Japanese trains and railway construction than what happens to the rural communities it impacts the most. Texans to me are tough, resilient, hard-working, and independent. We don't look for the easy way out, the get-rich-quick scheme, or profit at the expense of our neighbors. We resolve differences with a frank, honest dialogue, and end it with a firm handshake and a smile. We act in our communities best interest first and our own second. We speak with our actions, not our words. While Texas Central Rail may have Texas in their name, judging them by their actions they don't appear to be Texans at heart.	Refer to BA-5.

Kevin Carney	2/27/2018	Website	I have concerns about the high speed rail in Navarro County travelling through the intersection of 709 and 1394 cleaving Morgan Legacy Farm. At this highest portion in the county I believe significant damage will occur to the environment and water shed adversely impacting the migratory waters of the US. Further by separating access of the Morgan Legacy Farm Lodge from the Rodeo Arena and Guest Houses and Stables the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared. Our office staff has had over 100 employees and family members visit this ranch, ride horses, take hay rides and enjoy the unique experience not offered by any similar property....all at no cost. I would ask that this 5-7 mile portion scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic on the county that would occur if Morgan Legacy Farm is traversed.	Refer to LU-5.
Kevin Carney	2/27/2018	Website	I have concerns about the high speed rail in Navarro County travelling through the intersection of 709 and 1394 cleaving Morgan Legacy Farm. At this highest portion in the county I believe significant damage will occur to the environment and water shed adversely impacting the migratory waters of the US. Further by separating access of the Morgan Legacy Farm Lodge from the Rodeo Arena and Guest Houses and Stables the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared. Our office staff has had over 100 employees and family members visit this ranch, ride horses, take hay rides and enjoy the unique experience not offered by any similar property....all at no cost. I would ask that this 5-7 mile portion scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic on the county that would occur if Morgan Legacy Farm is traversed.	Refer to LU-5.
Kevin Carney	2/27/2018	Website	I have very serious concerns about the high speed rail from Dallas to Houston. I do not believe we should be subsidizing a for-profit company with taxpayer dollars, much less destroying those same taxpayers' land, homes, and livelihoods to do so.	Refer to LU-5.

Kevin Carney	2/27/2018	Website	The proposed high speed rail from Dallas to Houston is abuse of political power. I do not believe we should be sacrificing thousands upon thousands of rural Texan taxpayers' homes and businesses to make a billion dollar, for-profit Japanese train company and their owners that much richer.	Comment noted.

Kevin Carney	2/27/2018	Email	I have very serious concerns that Texas Central Rail is deliberately misleading Texan taxpayers and landowners whose homes, businesses, and culture will be sacrificed to cut costs and drive profits. The President of TCR in his own words (see below) says they'll avoid destroying homes and property if at all possible, but the current proposed route says otherwise. Near 709 and 1394 in Navarro county there is an already existing utility corridor for high voltage power lines, but TCR has opted to run the rail through the front yard of my family's farm. Contrary to what they've stated, the truth appears to be that this multinational company cares far more about getting paid for its Japanese trains and railway construction than what happens to the rural communities it impacts the most. Texans to me are tough, resilient, hard-working, and independent. We don't look for the easy way out, the get-rich-quick scheme, or profit at the expense of our neighbors. We resolve differences with a frank, honest dialogue, and end it with a firm handshake and a smile. We act in our communities best interest first and our own second. We speak with our actions, not our words. While Texas Central Rail may have Texas in their name, judging them by their actions they don't appear to be Texans at heart. "Texas Central has gone to great lengths to identify corridors that will have the least impact on local communities and meet our purpose and need," says Robert Eckels, president of Texas Central. "By informing the Federal Railroad Administration that we believe all ongoing studies and analysis should focus on identifying potential alignments within and associated with the Utility Corridor, we are staying true to our commitment to follow existing rights of way as much as possible," he says. http://keranews.org/post/bullet-train-backers-narrow-down-route-houston-dallas	Refer to LU-5.

Kevin Carney	2/27/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to FP-1, LU-5, NR-2, WW-1 and WW-2.

Contrary to what they've stated, the truth appears to be that this multinational company cares far more about getting paid for its Japanese trains and railway construction than what happens to the rural communities it impacts the most. Texans to me are tough, resilient, hard-working, and independent. We don't look for the easy way out, the get-rich-quick scheme, or profit at the expense of our neighbors. We resolve differences with a frank, honest dialogue, and end it with a firm handshake and a smile. We act in our communities best interest first and our own second. We speak with our actions, not our words. While Texas Central Rail may have Texas in their name, judging them by their actions they don't appear to be Texans at heart.	Refer to LU-5.
Kevin Carney	3/4/2018	Email	I have very serious concerns that Texas Central Rail is not acting in the interest of Texan taxpayers and landowners whose homes, businesses, and culture will be sacrificed to cut costs and drive a foreign company's profits. Near 709 and 1394 in Navarro county there is an already existing utility corridor for high voltage power lines, but TCR has opted to run the rail through the front yard of my family's farm. Contrary to what they've stated, the truth appears to be that this multinational company cares far more about getting paid for its Japanese trains and railway construction than what happens to the rural communities it impacts the most. Texans to me are tough, resilient, hard-working, and independent. We don't look for the easy way out, the get-rich-quick scheme, or profit at the expense of our neighbors. We resolve differences with a frank, honest dialogue, and end it with a firm handshake and a smile. We act in our communities best interest first and our own second. We speak with our actions, not our words. While Texas Central Rail may have Texas in their name, judging them by their actions they don't appear to be Texans at heart.	Refer to LU-5.
Kevin Carney	3/6/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be far less detrimental to the environment and save an irreplaceable property. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.

Kevin Carney	3/6/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save an irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.

This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.
Kevin Carney	3/6/2018	Website	I am opposed to the train destroying a culturally, economically, historically significant, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save an irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Kevin Carney	3/6/2018	Website	I have very serious concerns that Texas Central Rail is not acting in the interest of Texan taxpayers and landowners whose homes, businesses, and culture will be sacrificed to cut costs and drive profits. Near 709 and 1394 in Navarro county there is an already existing utility corridor for high voltage power lines, but TCR has opted to run the rail through the front yard of my family's farm. Contrary to what they've stated, the truth appears to be that this multinational company cares far more about getting paid for its Japanese trains and railway construction than what happens to the rural communities it impacts the most. Texans to me are tough, resilient, hard-working, and independent. We don't look for the easy way out, the get-rich-quick scheme, or profit at the expense of our neighbors. We resolve differences with a frank, honest dialogue, and end it with a firm handshake and a smile. We act in our communities best interest first and our own second. We speak with our actions, not our words. While Texas Central Rail may have Texas in their name, judging them by their actions they don't appear to be Texans at heart.	Refer to LU-5.

			differences with a frank, honest dialogue, and end it with a firm handshake and a smile. We act in our communities best interest first and our own second. We speak with our actions, not our words. While Texas Central Rail may have Texas in their name, judging them by their actions they don't appear to be Texans at heart.	
Kevin Carney	3/6/2018	Website	I have very serious concerns that Texas Central Rail is not acting in the interest of Texan taxpayers and landowners whose homes, businesses, and culture will be sacrificed to cut costs and drive a foreign company's profits. Near 709 and 1394 in Navarro county there is an already existing utility corridor for high voltage power lines, but TCR has opted to run the rail through the front yard of my family's farm. Contrary to what they've stated, the truth appears to be that this multinational company cares far more about getting paid for its Japanese trains and railway construction than what happens to the rural communities it impacts the most. Texans to me are tough, resilient, hard-working, and independent. We don't look for the easy way out, the get-rich-quick scheme, or profit at the expense of our neighbors. We resolve differences with a frank, honest dialogue, and end it with a firm handshake and a smile. We act in our communities best interest first and our own second. We speak with our actions, not our words. While Texas Central Rail may have Texas in their name, judging them by their actions they don't appear to be Texans at heart.	Refer to LU-5.

Kevin Carney	3/6/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save an irreplaceable property. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.

Kevin Carney	3/7/2018	Website	I am opposed to the train destroying a culturally, economically, historically significant, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save an irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.

This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.
Kevin Carney	3/7/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a small move north paralleling the existing power lines would be less detrimental to the environment and save an irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	
Kevin Carney	3/7/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a small move north paralleling the existing power lines would be less detrimental to the environment and save an irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.

I believe a small move north paralleling the existing power lines would be less detrimental to the environment and save an irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.
Kevin Carney	3/7/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a small move north paralleling the existing power lines would be less detrimental to the environment and save an irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. Kevin Carney	3/7/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a small move north paralleling the existing power lines would be less detrimental to the environment and save an irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.

I believe a small move north paralleling the existing power lines would be less detrimental to the environment and save an irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.
Kevin Carney	3/7/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a small move north paralleling the existing power lines would be less detrimental to the environment and save an irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.
Kevin Carney	3/8/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be far less detrimental to the environment, save critical migratory waters for waterfowl, cause fewer watershed issues to the surrounding land, and save an irreplaceable property. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.

			military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	
Kevin Carney	3/8/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be far less detrimental to the environment, save critical migratory waters for waterfowl, cause fewer watershed problems for the surrounding wildlife, their habitat, and save an irreplaceable property. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.

It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.
Kevin Carney	3/8/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be far less detrimental to the environment, save critical migratory waters for waterfowl, cause fewer watershed problems for the surrounding wildlife, their habitat, and save an irreplaceable property. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.

It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.
Kevin Carney	3/8/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be far less detrimental to the environment, save critical migratory waters for waterfowl, cause fewer watershed problems for the surrounding wildlife, their habitat, and save an irreplaceable property. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.

It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.
Kevin Carney	3/8/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be far less detrimental to the environment, save critical migratory waters for waterfowl, cause fewer watershed problems for the surrounding wildlife, their habitat, and save an irreplaceable property. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.

It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.
Kevin Carney	3/9/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be far less detrimental to the environment, save critical migratory waters for waterfowl, cause fewer watershed problems for the surrounding wildlife, their habitat, and save an irreplaceable property. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.

It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.
Kevin Carney	3/9/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe shifting the route north of the power lines paralleling the existing lines in an established easement would be far less detrimental to the environment, save critical migratory waters, the surrounding/supporting ecosystem, cause fewer watershed problems for the surrounding wildlife, their habitat, and save an irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities, the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to Navarro county in the long term.	Refer to LU-5.

Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities, the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to Navarro county in the long term.	Refer to LU-5.
Kevin Carney	3/9/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe shifting the route north of the power lines paralleling the existing lines in an established easement would be far less detrimental to the environment, save critical migratory waters, the surrounding/supporting ecosystem, cause fewer watershed problems for the surrounding wildlife, their habitat, and save an irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities, the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to Navarro county in the long term.	Refer to LU-5.

Kevin Carney	3/9/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be far less detrimental to the environment, save critical migratory waters for waterfowl, cause fewer watershed problems for the surrounding wildlife, their habitat, and save an irreplaceable property. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5 and NR-2. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .
Lauren Carney	2/21/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property. Please don't destroy the Morgan Ranch!!!	Refer to LU-5.
Lauren Carney	2/22/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easment would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Lauren Carney	2/23/2018	Website	It seems to make the most sense to put the rail next to anything already present unnatural- like power lines. Rather than cut thru new virgin land disrupting wildlife and natural resources. Also what do you think will happen to the land between the power lines and the proposed new rail line? It's effectively useless. Therefor you're destroying even more land. Please reconsider moving the rail line north along the existing powerlines.	Refer to LU-5.
Lauren Carney	2/27/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easment would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Lauren Carney	3/4/2018	Email	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be far less detrimental to the environment and save an unique, irreplaceable property.	Refer to LU-5.
Lauren Carney	3/4/2018	Email	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be far less detrimental to the environment and save an unique, irreplaceable property.	Refer to LU-5.
Lauren Carney	3/6/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5.

Lauren Carney	3/9/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe shifting the route north of the power lines paralleling the existing lines in an established easement would be far less detrimental to the environment, save critical migratory waters, the surrounding/supporting ecosystem, cause fewer watershed problems for the surrounding wildlife, their habitat, and save an irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities, the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to Navarro county in the long term.	Refer to LU-5.

I believe shifting the route north of the power lines paralleling the existing lines in an established easement would be far less detrimental to the environment, save critical migratory waters, the surrounding/supporting ecosystem, cause fewer watershed problems for the surrounding wildlife, their habitat, and save an irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities, the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to Navarro county in the long term.	Refer to LU-5.
Lauren Carney	3/9/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe shifting the route north of the power lines paralleling the existing lines in an established easement would be far less detrimental to the environment, save critical migratory waters, the surrounding/supporting ecosystem, cause fewer watershed problems for the surrounding wildlife, their habitat, and save an irreplaceable property. Lauren Carney	3/9/2018	Website	I am highly opposed to the train destroying a culturally, economically, historically significant and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe shifting the route north of the power lines paralleling the existing lines in an established easement would be far less detrimental to the environment, save critical migratory waters, the surrounding/supporting ecosystem, cause fewer watershed problems for the surrounding wildlife, their habitat, and save an irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities, the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to Navarro county in the long term.	Refer to LU-5.

Nicholas Carney	2/11/2018	Website	As a resident of Michigan, I want to emphasize the essential importance of this project for the nation as a whole, not just Texans. The development of high speed rail in any part of the country makes the nation as a whole stronger, safer, more equitable, wealthier, and more connected. This 100% privately funded infrastructure unlocks more local investment that will drive the Texan and national economies through long-term, sustainable growth, and will yield 10,000 construction jobs each year and 1,000 permanent jobs. The rail line will be a tax-payer, not a tax-taker, paying \$2.5 Billion in taxes in 25 years, and it is projected that the line will result in a \$36 billion boost over next 25 years for the Texas economy. Beyond the economic benefits, the high-speed line will drive the further development of a balanced transportation system, and emits 1/12th the CO2 as a jet would between Houston and Dallas. Without this rail line, the current 4-hour, 240 mile trek up I-45 is expected to increase to 6.5 hours by 2035; with high-speed rail, the trip will only take 90 minutes, and reduce the number of cars on the road. In sum, the Dallas-to-Houston high-speed rail line is a must not only for the state, but for the country as a whole.	Comment noted.
Paul Carney	3/1/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military. Thank you. Paul Carney	Refer to LU-5.
Paul Carney	3/1/2018	Website	To Whom It May Concern I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194 I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. Mark Carpenter	2/5/2018	Website	The comment period should be extended by at least 90 days. Private property owners should be allowed to negotiate their own terms to sell or not. TCR should not receive any tax payer money to build HSR in Texas or benefit from eminent domain forcing unwilling property owners to lose any of their land. The definition for eminent domain is "the right of a government or its agent to expropriate private property for public use, with payment of compensation." TCR is neither a government or its agent and the private property TCR is trying to expropriate is not for public use.	Refer to ED-1, ED-2, GN-4 and PI-3.
Tonya Carr	2/20/2018	Website	STOP THIS TRAIN. IT IS A FINANCIAL NIGHTMARE AND NOT GOOD FOR TEXAS. IT IS NOT NEEDED NOR WANTED.	Comment noted.
James Carrigan	1/30/2018	Oral	Hello. Jimmy Carrigan, James Carrigan. I work for the office of emergency management and I work with the commissioners and you the people. I am going to be real blunt here with you. The operation that is going through this county if it is going to happen it's going to be a mass fatality. It is not if it is when. When an accident like this happens it is going to be one of your properties that are going to be effected and who is going to foot the bill for that? The county is going to pick up the bill. And you as the taxpayers will pick up the bill for the cleanup, the search and rescue, the scattered bodies across the land. It is going to happen on your property and it is going to be tied up and lawsuits. You will never be able to use it again. There is nothing good. I am not for this train at all. I am not for this coming through this land. There is no supplemental support from the high-speed rail to the county as far as financially. Like I said the taxpayers are going to end up fitting the bill if something like this happens. Support your organization to stop this train. Thank you.	Refer to SC-19, SS-12 and SS-18.
Ismael Carrizales	1/25/2018	Email	I'm in the right of way of the train. And will be directly affected by the development and would like to know the progress the development has made. Thanks.	Refer to PI-1.
Bob Carroll	1/29/2018	Oral	I'm Bob Carroll from the eastern side of Navarro County, but I'm a resident of this entire county and I'm against the high speed rail. On the issue of property rights is what I want to address. I just retired after 37 years with the largest natural gas pipeline utility distribution company after 37 years, and for 19 years I was the right-of-way manager. Now, don't throw rocks at me, because I dealt with 6500 miles of high pressure pipeline. I dealt with landowners. I dealt with eminent domain. And as Thomas said, every one of us have to deal with the fact that we need water and electricity and gas to live, but the issue of eminent domain and the condemnation that results from that imminent	Refer to ED-1, ED-2 and PN-3.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			domain is a property right that is so valuable that even when it was practiced by kings, they had to compensate those whose property they took; but then as well, especially in the United States and in Texas, there's two parts of that process of eminent domain, and that is fair market value for your property, for that easement right, or for that right-of-way, but secondly, public necessity, public purpose. And we have to prove that. We do that with electric and gas and roads that we need. My problem here is I've been studying the website and reading the website and I talked to individuals back here, and none of them can give me a straight answer of whether they've been given the authority of eminent domain or condemnation. And I personally, particularly, in my 19 years, I condemned. I know, don't throw rocks at me. A lot of people didn't tell me to go to the Dairy Queen; they told me to go somewhere else. I built hundreds of miles of high pressure pipeline and, thank God, I only condemned probably 10 people in those 19 years, because I negotiated with them on the route, on the value, and we tried to avoid them. But there's some things you have to do what? You have to build in a straight line sometimes, and you have to cross their property. And yet we didn't take a fee and we didn't detriment and destroy the value that the high speed rail can make. But as Thomas said, you know, Thomas Locke wrote, "We're granted by inalienable rights of life, liberty"--and Thomas Jefferson changed it to the pursuit of happiness, but it's property rights. And I'm a landowner over in Kerens, I am a Texan in Kerens by the grace of God, but we ought to really consider if an entity like this should have the right of eminent domain. And I pray that our Texas legislatures and our federal legislatures, that they will rule that the public necessary rule is not met by this private venture of those who want to do business from Dallas to Houston. I thought that's why we had planes and cars and trucks. And now we want something that people can't get access. That's why personally, in my experience of 19 years -- I'm gone, or did my time never run? I'm gone. God bless Texas.	
Melissa Carroll	3/9/2018	Website	Please do not do this to us. This train has no real value other than to the contractors that want to build it and it will ruin my property value and destroy the quality of life in Cypress. I cannot believe its gotten this far. The plan is ridiculous and will have an untold NEGATIVE impact on this community. Melissa Carroll	Refer to SC-19 and VA-1.
Bill Carson	1/29/2018	Oral	All right. I am not running for Congress and I'm not running for commissioner. I am unopposed as the precinct chairman of Navarro County 308. I want to start off by saying this is a boondoggle. Trains are an example, a very good example of 19th century technology. This is the 21st century. Revenue from this boondoggle for Navarro County will be non-existent. Jobs will also be non-existent. The Super Collider -- I spent 30 years in Ellis County. Ellis County had a great, super, fantastic, big-government science project. Dozens if not hundreds of people were put off their property by eminent domain. Hundred year farms and ranches were destroyed. I know people that have moved into town. They got moved into town. They got moved off their hundred-year farms and moved into comparative housing. The comparative housing in town was a box and the taxes were twice as high. I read a thing back there called socioeconomic resources, the acquisition--the acquisition--of 330 businesses or homes. Who's the winner? Who's the loser? All the trains that I've heard about, all the trains that are not making any money. The definition of insanity is doing the same thing over and over again and expecting a different result. I just wrote several checks in three different counties that are affected by this boondoggle to the pay my property tax, and this is going to be negatively affected by this. What's the word? Boondoggle. All right. I got 45 seconds. Repeat after me. Boondoggle! Boondoggle! Boondoggle!	Refer to ED-1, ED-2, SC-19, SC-21, TC-2 and VA-1.

Melantha Carson	2/13/2018	Website	It is stated that no roads will be closed, now we are being told the roads will be re-routed, which will negatively impact access by first responders to the existing home owners. It will also negatively impact local traffic and school districts. How do you expect to compensate for that?	Refer to PI-1, SC-6, SC-7, SS-23, TR-6 and TR-8.
Melantha Carson	2/13/2018	Website	How do you expect the taxes for the county to be positively impacted when taxes are based on value of railroad tracks. Since this is not a rail with tracks, there will not be any taxes paid to the counties that it travels through and therefore the only benefits will be from the taxes on the property where the stations are, which will not benefit most of the effected counties	The economic assessment presented in Section 3.14.5.2.3, Socioeconomics and Community Facilities, Economic Impacts presumes TCRR's property and built improvements, including stations, maintenance facilities, viaduct, and operational corridor would be fairly assessed and subject to all applicable local property

				tax rates. This analysis finds a net positive tax revenue impact for each economic analysis area, including for the subset of counties and local jurisdictions between Dallas and Harris County. A number of negative tax impacts were assessed, including property tax losses associated with the displacement of built improvements. However, tax revenue increases associated with property assessments on the Project's built infrastructure, the conversion of currently tax exempt land uses to TCRR ownership, and the sales tax associated with induced spending as a result of TCRR's capital investment were large enough to produce a net positive impact to taxes. Tax impacts were calculated following the methodology described in Section 3.14.3, Socioeconomics and Community Facilities, Methodology.
Melantha Carson	2/13/2018	Website	If you have not illegally trespassed and surveyed ours and others private properties, how can you judge the impact this will have on the environment when you don't even know what we have on our land our what we can bring back to the area, as we go through the wildlife preservation programs with the agriculture department	Refer to NE-8. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife. Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures. Methods used to evaluate impacts can be found in Section 3.6.3, Natural Ecological Systems and Protected Species, Methodology. The methodology section explains how habitat suitability models were performed and what publicly available data was used to assess the presence of natural resources.
Melantha Carson	2/13/2018	Website	This project is slated to cut through thousands of acres of farm land, how do you think this will NOT negatively impact the economy when the rural counties economy is largely based on agriculture? And what about the business along the I-45 corridor that relay on automobile traffic for their business? If the rail is going to be as successful as proposed and take away a large portion of vehicular traffic what happens to those frontage road businesses?	Refer to LU-11 and SC-15.
Melantha Carson	2/13/2018	Website	Because this project will cut through farmland and ranches, how do you propose that businessmen and businesswomen (the farmers-yes, that is their business) will be able to move livestock, move the heavy equipment associated with harvesting. To build overpasses and re-route roads will be a multi-million dollar expense with no guaranteed profit and then the county will be left with the maintenance of these new overpasses and roads.	Refer to LU-11, TR-7 and TR-8.
Melantha Carson	2/13/2018	Website	If as a country, we promote "Buy American" and "American made", why would we want to spend billions of dollars in another country and boost the economy of another country? There are no US manufacturing or supply companies to support a claim that the cars would be manufactured right here in the US so that means not only would the money be leaving the US to get supplies, it would also employ thousands in another country to build. How is that a boost to the American or Texan economy?	Refer to BA-4, BA-12, GN-3, GN-4, GN-6, NE-1 and PN-3.
Melantha Carson	2/13/2018	Website	Where are you getting the ridership statistics to support such high claims of almost 6 million riders per year when your own commissioned study implied that only 5% o drivers would switch to using a train? To reach your claims, over 60% o drivers would have to switch to the train.	Refer to GN-2 and NE-1.
Melantha Carson	2/13/2018	Website	How do you think the project will sustain itself when rail service in the US is not a widely used method of transportation? We love our cars and having the freedom to come and go as we choose. If Amtrak only takes about 3 million passengers a year in the whole Northeast area spanning from the metro DC area up to Boston, how do you figure the simple trip from Dallas to the northern suburbs of Houston, not even downtown, will support such a grossly disproportionate ridership number?	Refer to GN-2 and NE-1.
Don Carter	3/9/2018	Website	While the bullet train project is well-intentioned, experience elsewhere in the country (see California bullet train project for a perfect example) shows that these project *always* run massively over budget and dramatically behind schedule. Not only that, but this train will not ever be able to financially pay for itself. Pair the above concerns with the clear problems with eminent domain that will be encountered as land is taken from those who currently own that land and don't want to sell, and this project is a massive waste of money that should be	Refer to ED-1, ED-2, GN-4 and NE-1.

			summarily killed prior to it costing the taxpayers of Texas (and likely the rest of the US as well) uncounted billions of dollars in money that cannot every be economically recovered.	
Jennifer Carter	1/23/2018	Email	Please send update	Comment noted.
Laura Carter	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.
Kerry Cartier	1/29/2018	Email	The premise is flawed that many of the estimated 2.6 million people who travel between Dallas and Houston yearly would use high-speed rail instead. What prevents us from using AMTRAK is not fts speed, but the unavailability of private ground transportation at the far end. DART is supposed to be the Dallas answer, but I've never seen more than 5 people in a DART bus/railcar. May I suggest that the \$15 billion estimated for this project be used to add additional traffic lanes to the existing freeway between Dallas and Houston? Thank you.	Refer to BA-6, GN-4, GN-6, PN-2 and TR-3.
Sally and Henry Carwile	2/7/2018	Website	We are not on favor of the high speed rail anywhere near our property. It will not be that advantageous for us.	Comment noted.
Carly Cassady	1/19/2018	Website	This seems like it would be cool. As long as I have a spot for my dalmatian.	Comment noted.
Alejandra Castellanos	3/9/2018	Website	This is a great idea, it would minimize a portion of vehicles on the road and it will help the environment in a lot of way. I'm one of may people that commute from Houston to Dallas on a frequent and this will be ideal. Not to mention we would have less wrecks and of course I would get to Dallas fast. Thank you	Comment noted.
Brandon Castillo	1/30/2018	Email	I am a big advocate of bringing the bullet train to Dallas, but the conceptual design of the station took me aback with its terrible design. Please allow the station to open up to the city and endeavor to make the most out of its proximity to Downtown. Please do not surround the station with parking garages. While that corner of Downtown needs a lot to join the vibrancy of other parts of the Central Business District, please do not take it for granted that this station could forever alter the experience of Downtown not just for travellers but also for residents of the area. You should explore the opportunity to be more than a terminal for the train. You can be a destination as well. As someone who has studied many Texas Downtowns, I am happy to share ideas With you.	Refer to GN-6, GN-7, NE-1 and TR-3.
Jose Castillo	3/9/2018	Email	1.- Concern about Texas Counties, Dallas, Ellis, Navarro, Freestone, Leon, Madison, Grimes, Harris and wheeler endangered species- Bald Eagles, Monarch Butterfly, Wood Pecker, Passenger Pigeons, Red Wolf, Gray Wolf, Migratory Game Birds, Wood Stork, Texas Horn Lizard, Brazos Water Snake, Houston Toad, White Face Ibis, Interior Least Turn, Cagle's Map Turtle, Ouachita, Rock-Pocket Mussel, Including Wildflowers of large fruited sand verbena, Navasota Indie tresses. 2. Concerns about watershed impact of flow and drainage of water in flood event. 3. Concerns about soil erosion 4. Concerns about livestock reproduction due to vibration and noise 5. Noise Pollution 6. Rerouting roads and closing roads that are easier access for emergency situation 7.- Electro- Magnetic Currents that "High Speed Rail" Radiates.	Refer to NR-1, NR-2, NR-3, NR-4, NR-5, PI-1, SG-1, SS-23, TR-6, TR-8, WW-1 and WW-2. Passenger Pigeons are extinct. The Red Wolf and Gray Wolf are extirpated from Texas. The Monarch Butterfly is currently "Under Review" for listing by FWS and is not currently a protected species. Other species mentioned were assessed in Table 3.6-8: LFSV Habitat by Segment except for those not listed by TPWD or FWS such as the Brazos water snake, Cagle's Map Turtle, Ouachita, and Rock-Pocket Mussel. There is no evidence to suggest that ground-borne vibration would affect livestock reproduction. The Project does not radiate electromagnetic currents. Rather, the electric current used to power the Project does generate electromagnetic fields (EMFs), as discussed in Section 3.14.1, Socioeconomic and Community Facilities, Introduction . As discussed in Section 3.15.4, Electromagnetic Fields , Methodology: "The inverse square law applies to EMF. The inverse-square law means that EMF levels would

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
				substantially decrease with increased distance from the source. Therefore, for the purposes of this analysis, the EMF Study Area is defined as 500 feet from the centerline of the HSR track. Beyond this distance, the EMF would be below background levels."
Rolando Castillo	3/9/2018	Website	Please bring the train and help relieve some of this traffic that both cities suffer from. It will only get worse. Money has been spent on way worse at least this helps!	Comment noted.
Jason Cates	1/29/2018	Email	Please extend the public comment period to 90 days. Everyone's voice needs to be heard.	Refer to PI-3.
Patrick Cates	3/8/2018	Website	I strongly urge the Commission to fully support the construction of the Dallas - Houston high speed railway. My wife and son and I have traveled extensively in Europe and know the benefits that a strong, viable system of trains can add to the business and personal lives of its citizens. I believe it is the right time for Texas to take the bold step of creating the high-speed train. Though we live in Dallas, we have journeyed to Houston to visit friends and to hear the magnificent Houston Symphony Orchestra, which involved a half-day of travel whether we flew on Southwest Airlines or drove my own car. The high-speed train from Dallas would allow my family to enjoy a much quicker trip to visit Houston. This project has my full support. Thank you for your leadership on this most important issue to improve the lives we lead in Texas.	Comment noted.

Dave Cato	2/21/2018	Website	REFERENCE: IMPACT ON KATY PRAIRIE CONSERVANCY NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident Of Waller/Harris County, am worried about the impact of the High Speed Rail would have on the Katy Prairie Conservancy. which is a biologically diverse powerhouse with more than 300 species of birds, 110 species of mammals, amphibians and reptiles and more than 600 species of grasses, wildflowers, trees, vines and shrubs. A 200 MPH train barreling within one miles of this migratory bird sanctuary is going to cause bird collisions and accidents. This is also where important wetlands of the Waller County area exist, which will be directly or indirectly affected by a HSR corridor. As our community grows, with progress, why tear each mile stone down, with an un-needed, un-wanted high speed rail. How can Waller County grow with this no-nonsense HSR in our area! NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS	Refer to NR-2, RF-4 and WW-2. For information regarding impacts to wildlife and vegetation please see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . For information regarding vegetation please see Section 3.6.4.2, Natural Ecological Systems and Protected Species, Vegetation and mitigation measures NR-MM#2 and NR-MM#4 in Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .
Dave Cato	3/9/2018	Email	The people and communities where the train has the most negative impacts will never benefit from this project. The only people who will benefit will be the initial investors and the 2 large cities who host the terminals. This route, "The Utility Corridor" was picked because it was cheap and simple. If it is to be built at all, it should be located along the 1-45 highway corridor - this route would be part of the transportation corridor. If this route is not viable, then the "No Build" option is the only choice.	Refer to BA-5, BA-9 and SC-19.
Dave Cato	3/9/2018	Email	The HSR will lower property values within at least 2-5 miles of the train by its mere existence. These property owners will never be compensated for this. Not only will there be an immediate value loss, there will be a future impact on any other construction projects, lowering the land use, causing further devaluation of property.	Refer to VA-1.
Dave Cato	3/9/2018	Email	There has been talk about taking the land needed from the rightful landowners by eminent domain misuse - the taking of private property for the use of another private entity. The people in Texas have the right to enjoy their land, and the taking their land in this manner is nothing short of criminal.	Refer to ED-1.
Dave Cato	3/9/2018	Email	Coordination with local officials has been nonexistent with regards to the project impact on the various communities. There has been no respect for the people and the communities. The rail line dissecting communities will greatly hamper any emergency, fire and police response time putting local residents at greater risk. There needs to be coordination for the good of the communities. The informational meetings held were required, and if there was an option, they would not have even happened. Those meetings do not take the place of community coordination. The "No Build" option is the only choice.	Refer to PI-1 and SS-23.
Dave Cato	3/9/2018	Email	The quantity of riders to support the train has not been proven. As with the California high speed train, it is inevitable that it will fall on the taxpayers. This project will never be profitable who would pay 2 thirds the price of a plane ticket and then still need to rent a car to continue to their destination. After the first ride for the novelty of it, the impracticality of the train will hit home. The "No Build" option is the only choice.	Refer to BA-6, GN-2, GN-4, NE-1 and SC-3.

			2004. I have sued for landowners, so we are agnostic as to what position we take on projects. We regularly wade through DEISes to come up with a conclusion, either no build or build with modification, or we support one of the alternatives that the government supports. I have a couple of comments about this DEIS, which I thought was the purpose of the hearing tonight. The DEIS sits on top of the National Environmental Policy Act, and it is supposed to not only analyze in a scientific manner environmental impacts, but it is also supposed to address significant public controversy, which we certainly have here, and it is supposed to analyze economic impacts. I don't think the DEIS in its present format does either of those, and I call on the FRA to issue, after appropriate study and response to these comments that they're hearing tonight, to address a couple of issues. The significant controversy stems from this concept of high-speed rail corridor. Now, you may think that you guys are the only ones facing this concept, but since a federal funding, a major omnibus funding program called ISTEA, we have had Congress passing these high-speed rail corridors. We have a whole lot of them right now. One of the things that the FRA does not do is it does not define railroad in terms of a high-speed rail, and it does not define whether there is a right of eminent domain. Consequently, we have a whole lot of controversy about this, so I'm calling on the FRA to say that it's up to Congress to address this issue, or the FRA can, as an administrative agency, promulgate a guidance to that effect to cut down some of the lawsuits that we have about this issue. Otherwise, all of these projects will fail, all high-speed rail corridor projects will fail, including the one in California.	nonhighway ground transportation that run on rails or electromagnetic guideways providing transportation service which is – (A) reasonably expected to reach sustained speeds of more than 125 miles per hour; and (B) made available to members of the general public as passengers, but does not include rapid transit operations within an urban area that are not connected to the general rail system of transportation" 49 U.S.C. 26015(2)
Carol Caul	2/16/2018	Email	Dear Mr. Wright: The Citizens Transportation Coalition (CTC) through its Chairman, Dexter R Handy, Lt Col USAF (Ret) respectfully requests the FRA to hold an additional DEIS hearing and meeting for the DEIS for the referenced project in the Houston central area. CTC asks that the hearing and meeting be scheduled as soon as possible at a location reasonably proximate to the two alternatives for a Houston terminus in the US290/IH-610/IH-10 interchange area. Such a venue might be the extensive HISD facilities or such near Houston facility as the FRA deems optimal for public access and Public Involvement. We state our reasons for the request for the additional hearing in the attached letter. Briefly, they are access by centrally located Houstonians to a DEIS hearing that will be captured in the project's administrative record; and the need for the FRA to address the fundamental issue of what constitutes a "railroad" in terms of high speed rail projects and corridors. CTC will also be submitting extensive comments to the project's DEIS in which we shall be requesting a Revised or Supplemental DEIS prior to the agency's proceeding to an Final EIS. We greatly appreciate your and FRA's efforts and hope you will conduct the additional hearing	Refer to PI-10.
Carol Caul	3/5/2018	Oral	We have to put this down to the mini location. Now, don't start that clock on me while I'm telling jokes. Hey, give me a break. I'm Carol Caul, and I'm the advocacy chair of the Citizens' Transportation Coalition of volunteer grassroots 501(c)(3), which analyzes and advocates for transportation and transportation-related projects. One of our core principles is to support freight and passenger rail. We thank the FRA for holding this hearing so that near-in Houstonians can have their voices reflected in the administrative record for the project. The bullet train is a unique and major project. It represents an attempt to revive passenger rail in the U.S. with high-speed capability powered by clean fifth generation electric technology. We are honored at the possibility of having major Japanese funding for the project and know that as investors they need predictability regarding their investment and they do not have it yet. Because of its uniqueness, careful scrutiny must be used in the DEIS to explain the fundamental issues leading to the choice by FRA of its preferred alternative value for such a unique project. First, is the high-speed rail a railroad for safety, loans and eminent domain? Does the project qualify for eminent domain? FRA has to address this issue, we assert. There are many references to the word "rail" in the DEIS, but FRA never directly comes out and calls the project a railroad. We did a text search on it, several of us did. It's important that it be a railroad so that it qualifies under state law for eminent domain purposes. If FRA cannot explicitly state that the project is a railroad and that there is eminent domain, it should evaluate whether the project is feasible without eminent domain. We doubt it. TCRR's choices would then be to go back to the Surface Transportation Board, explain a new connectivity with Amtrak through Metro's light rail or bus rapid transit system. However, if there is eminent domain, the DEIS must address more clearly the due process rights of the landowners. CTC strongly supports this project, but we are, quite frankly, very, very upset with the way the landowners are being treated. There is a meaning to the word "due process of law." Even if you have eminent domain, you can stop takings. A second issue is that of the embankments versus pier viaducts. We support the concept of viaducts throughout all the world and foreign land on the basis that there will be less impact on the farming operations. Third is financial viability, which several people have addressed: and we will address extensively in our written comments. Thank you	Refer to ED-1.
Shawn Cavahaugh	2/1/2018	Email	I believe that this Dallas to Houston "Highspeed Rail" project is a boondoggle and money grab for those who are building and investing in this project. It will be just like Amtrak and a money loser. This will be a loser for those land owners who will have their land taken via eminent domain, and a loser for the state.	Comment noted.
Kevin Cecil	2/19/2018	Website	Completely in support of high speed rail. It's been a long needed transit alternative.	Comment noted.
Stephanie Cervantes	2/9/2018	Website	There is NO need for this rail since it will be going through my front yard and taking out my home that I purchased to retire in i don't want to have to start over at this stage of my life.	Comment noted.
Shikha Chakravarty	2/8/2018	Website	Slight deviation of route. As much as we would like the Dallas Houston train, we don't want any land fragmentation, sound disturbances, electromagnetic radiation from powerful transmission lines, paving roads or constructions to negatively jeopardize the quietness of the Katy	Refer to NR-1, NR-2, NR-5 and RF-4. 			Prairie and the pristine lands. We want the rail route to be constructed outside the buffer zone of the Katy Prairie without claiming any of the rural areas that can add to the prairie. The Katy Prairie is like a oasis in anurban sprawl and its importance to the migratory birds and resident wildlife should not be undermined.	see Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures .
Vishal Chander	2/19/2018	Website	High speed rail between Dallas and Houston is a project which is 30 years too late. New technologies make the project obsolete and a waste of tax payer resources. Funding should be put into newer technologies which are only 5 - 10 years from development, like the hyperloop. Investment should be made in expansion and modernization of highways with sensor technology to allow for safe self driving electric cars. Charge stations should be installed. Redundant geolocation microsattellites should be placed in orbit so that electric flying vehicles can operate without a driver. These solutions are all more efficient as they are more cost effective implement, can be implemented more quickly, and infringe less on property rights. They also incentivize the private sector to perfect and put into the market driverless electric cards and electric selfdriving flying taxi services. Any expansion of transportation system must be done in coordination with expansion and modernization of the electrical grid with pollution free renewable energy from wind, solar, and ocean turbines. This will offset the expected increased demand in energy from transportation while ameliorating the detrimental and costly effects of pollution from obsolete fossil fuels on health care. High speed rail was a great idea in the 1980s and would have transformed the Texas economy decades ago. But Texas legislators were shortsighted. High speed rail is a lost opportunity. We now need to move forward, look to the future, and implement the technology of the future to address transportation needs in this state.	Refer to BA-4, GN-4, NE-1 and PN-3.
John Chaney	2/18/2018	Website	I disagree with the project. I do not feel there is enough demand for travel between Houston and Dallas, to support both the rail industry and the air travel industry. While the claim is the project will be all private funds. I do not see how it will be completed without use of tax payer funds. Weather it be for parking lots at he hubs or crossing safety and traffic control. Nor do I see how they can use the imminent domain to take peoples land from them for a totally private industry.	Refer to BA-12, ED-1, GN-2, GN-4, TC-5 and TC-7.
