Lisa Trammell	3/8/2018	Website	I have concerns about the high speed rail in Navarro County travelling through the intersection of 709 and 1394 cleaving Morgan Legacy Farm. At this highest portion in the county I believe significant damage will occur to the environment and water shed adversely impacting the migratory waters of the US. Further by separating access of the Morgan Legacy Farm Lodge from the Rodeo Arena, Guest Houses and Stables the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared. I would ask that this 5-7 mile portion scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic impact on the county that would occur if Morgan Legacy Farm is traversed.	Refer to LU-5.

Scott Trammell	2/26/2018	Website	Hello, To whom it may concern, I am very concerned about the proposed high speed rail that will be running through, and destroying, the Morgan Legacy Farm near FM 709 and 3194. I am a military officer and I worked at the ranch in question for many years from high school until after college. This ranch provided many skills and a work ethic that is still carry with me even today. This ranch literally made me who I am today and it very much troubles me that there is a possibility that others may not have the same opportunity that I had to work at this amazing property. This ranch has hosted many events (and all free of charge) for everyone from first responders, members of the medical field, students, and more. And those events are only those that I was personally involved in, and I know that there have been many more since. I am very concerned for the future of Morgan Legacy Farm. This is a ranch that has made a real difference to many people and I would be very concerned to see such an incredible place be destroyed for this railway. It will absolutely be a loss for many in the military, state, and medical services along with many others who have enjoyed this unique property. I sincerely plead that a new route be considered to save this ranch that has held such a special place in mine, and so many others, hearts. Respectfully, 2dLt Scott Trammell, USAF	Refer to LU-5.
Scott Trammell	2/26/2018	Website	Hello, My name is Scott Trammell and I am a military officer. I have heard the news that the Morgan Legacy Farm near FM 709 and 3194 May be destroyed by the new high speed rail. This concerns me greatly because of so much that the ranch has done for me. Due to a long series of events, I was being sent to a training course with just weeks notice. The training happened to be when my wife and I had our wedding planned and that was not going to be possible. But Morgan Legacy Farm offered their facility for our wedding completely free of charge. If it had not been for this ranch, my wife and I would not have been able to have the kind of wedding that we were able to have at such short notice. For that, I will always be indebted to Morgan Legacy Farm. I am very concerned for the future of this property and for the many people that will not have the opportunity to be so positively affected by this Farm as my wife and I have. I would ask that any other route be considered for this train that does not destroy this amazing facility. Sincerely, 2dLt Scott Trammell, USAF	Refer to LU-5.
Scott Trammell	2/26/2018	Website	To whom it may concern, I am a military officer, and I am very concerned about what I have been hearing about the Morgan Legacy Farm around FM 709 and 3194. It has been such a positive influence in my life and it very much disturbs me that it may be bisected and destroyed. This ranch has hosted many events for members of the military, police, medical, and first response services as well as many others. I have personally worked at this ranch before I joined the military and there have not been many other places so concerned with serving others that I have ever seen. This ranch has always thrown it's doors open for anyone that it possibly can and has always existed to help others as much as possible. I have seen this first-hand both during my time working there as a ranch hand, and as a customer when my wife and I were married there. I cannot over-emphasize how much of a tragedy it would be if this remarkable ranch was destroyed. And I would respectfully ask that any other route be considered that would not bisect this ranch that has meant so much to myself and so many others. Sincerely, 2dLt Scott Trammell, USAF	Refer to LU-5.

			ask that any other route be considered that would not bisect this ranch that has meant so much to myself and so many others. Sincerely, 2dLt Scott Trammell, USAF	
Scott Trammell	3/7/2018	Website	Hello, To whom it may concern, I am very concerned about the proposed high speed rail that will be running through, and destroying, the Morgan Legacy Farm near FM 709 and 3194. I am a military officer and I worked at the ranch in question for many years from high school until after college. This ranch provided many skills and a work ethic that is still carry with me even today. This ranch literally made me who I am today and it very much troubles me that there is a possibility that others may not have the same opportunity that I had to work at this amazing property. This ranch has hosted many events (and all free of charge) for everyone from first responders, members of the medical field, students, and more. And those events are only those that I was personally involved in, and I know that there have been many more since. I am very concerned for the future of Morgan Legacy Farm. This is a ranch that has made a real difference to many people and I would be very concerned to see such an incredible place be destroyed for this railway. It will absolutely be a loss for many in the military, state, and medical services along with many others who have enjoyed this unique property. I sincerely plead that a new route be considered to save this ranch that has held such a special place in mine, and so many others, hearts. Respectfully, 2dLt Scott Trammell, USAF	Refer to LU-5.
Scott Trammell	3/7/2018	Website	Hello, My name is Scott Trammell and I am a military officer. I have heard the news that the Morgan Legacy Farm near FM 709 and 3194 May be destroyed by the new high speed rail. This concerns me greatly because of so much that the ranch has done for me. Due to a long series of events, I was being sent to a training course with just weeks notice. The training happened to be when my wife and I had our wedding planned and that was not going to be possible. But Morgan Legacy Farm offered their facility for our wedding completely free of charge. If it had not been for this ranch, my wife and I would not have been able to have the kind of wedding that we were able to have at such short notice. For that, I will always be endebted to Morgan Legacy Farm. I am very concerned for the future of this property and for the many people that will not have the opportunity to be so positively affected by this Farm as my wife and I have. I would ask that any other route be considered for this train that does not destroy this amazing facility. Sincerely, 2dLt Scott Trammell, USAF	Refer to LU-5.
Scott Trammell	3/7/2018	Website	To whom it may concern, I am a military officer, and I am very concerned about what I have been hearing about the Morgan Legacy Farm around FM 709 and 3194. It has been such a positive influence in my life and it very much disturbs me that it may be bisected and destroyed. This ranch has hosted many events for members of the military, police, medical, and first response services as well as many others. I have personally worked at this ranch before I joined the military and there have not been many other places so concerned with serving others that I have ever seen. This ranch has always thrown it's doors open for anyone that it possibly can and has always existed to help others as much as possible. I have seen this first-hand both during my time working there as a ranch hand, and as a customer when my wife and I were married there. I cannot over-emphasize how much of a tragedy it would be if this remarkable ranch was destroyed. And I would respectfully ask that any other route be considered that would not bisect this ranch that has meant so much to myself and so many others. Sincerely, 2dLt Scott Trammell, USAF	Refer to LU-5.

Timothy Trammell	2/22/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This ranch has hosted many charitable events such as when victims of the Japanese tsunami were invited to spend the day enjoying all of the activities provided by the ranch (horseback riding, 4-wheeling, fishing, rodeo demonstration, Texas chili, etc.).	Refer to LU-5.
Timothy Trammell	2/22/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. This ranch has been the location of many weddings, at no charge from the Morgans. It would be horrible to destroy such a facility by running a train line through the middle of it, especially when non-damaging alternatives exist.	Refer to LU-5.
Timothy Trammell	2/23/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property. This has been a place where 100s of people have been allowed to retreat to enjoy nature and get away from the city. The current plan would destroy that. Please choose an alternate plan.	Refer to LU-5.
Timothy Trammell	2/23/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. This property has been enjoyed by thousands of people to see nature, hunt/fish, learn firearm safety, an many other	Refer to LU-5.

			Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property.	
Timothy Trammell	2/25/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easment would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. Furthermore, I am concerned about the benefit to the first responders not available at any other venue.	Refer to LU-5.
Timothy Trammell	3/9/2018	Website	Morgan Legacy Farm is a wonderful habitat for waterfoul. I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. Transit Coalition of North Texas	3/9/2018	Website	I am writing on behalf of the entire membership and Board of Directors of the Transit Coalition of North Texas to express our support for the Texas Bullet Train project and urge the Federal Railroad Administration to move forward with the timely review and approval of the project. The Transit Coalition of North Texas (TCNT) is a non-profit, focused on advocacy, education and communication, to accelerate transit projects in North Texas. Our members and Board of Directors include major employers, developers, transit users and transportation advocates. This project will transform North Texas and the entire state, with a transportation system that connects our two economic hubs of North Texas and Houston, with a travel time that will change the way people live, work, and play in Texas. This is a 100 year project that will forever change the future of Texas. With the population of Texas exceeding 28 million and growing bthe day, public transportation options are critical to provide mobility for an ever-growing population. The Texas Bullet Train will utilize the world's safest mass transportation technology and the project is expected to create more than 10,000 direct jobs per year during construction and more than 1,500 jobs permanently when operational. It will also be an economic driver for the State as well as all counties along the route. As an electric train, this System will also be the best environmental alternative as 4 Of the counties served are already in air quality non-attainment status. I welcome a faster, safer and cleaner transportation alternative to reduce congestion because it's good for Texas!	Comment noted.
Transportation Advocacy Group (TAG)	3/9/2018	Website	On behalf of the Transportation Advocacy Group (TAG), we ask that the Federal Railroad Administration swiftly move forward with the approval of your environmental review and approval of the Texas Bullet Train that will connect Houston to North Texas in 90 minutes. The Texas Bullet Train will be an economic driver for the region, the state and our country. Not only does it plant the seed of a new industry in Texas and the United States, but it is projected to generate a \$36 billion economic impact over its first 25 years. The recent release of the Draft Environmental Impact Statement (DEIS) confirms this with detailed data and projections. We support this project because in part it will: Create jobs for Texans - more than 10,000 direct jobs per year during construction and up to 1,000 jobs permanently when operational -- at least 25% of them in rural counties along the route; Increase tax rolls in ALL impacted counties - \$6.5-\$7 billion net positive tax impact by 2040; Bring the safest mass transportation technology in the world to Texas - Shinkansen trains boast a 53-year history with ZERO crashes or	Comment noted.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

			fatalities while in operation; Be a cleaner way to travel - an environmentally-friendly alternative to flying or driving in an area where 4 of the counties served are already air quality non-attainment status; Preserve land access for property owners - a majority of the 240-mile route will be built on elevated viaducts, allowing easy access from one side of the tracks to the other; Give travelers with disabilities a safe, comfortable alternative to driving or flying - system meets or exceeds the requirements of the Americans with Disabilities Act (ADA). The need for this project is clear. According to the Texas Transportation Institute, I-45 will see an increase in vehicular traffic of more than 200% between Dallas and Houston by 2035 - and current state and local transportation plans cannot adequately address these growing population concerns. We are excited to support the first true high-speed passenger train system in the United States - a transportation infrastructure project of national importance that will provide a safe, reliable and convenient travel alternative between Houston and North Texas and we ask that you expeditiously process the remaining steps in the review.	
Transportation Advocacy Group - Houston Region	3/9/2018	Website	<p>Dear Secretary Chao,</p> <p>On behalf of the Transportation Advocacy Group (TAG), we ask that the Federal Railroad Administration swiftly move forward with the approval of your environmental review and approval of the Texas Bullet Train that will connect Houston to North Texas in 90 minutes. 			unnecessary. It should be built on the existing right-of-way of I-45 to utilize the land between the North and South bound lanes between Dallas and Houston. We need to slow people down to enjoy the small things in life like smelling the green grass and country air. For the sake of our country I oppose this project. Texas taxpayers do not have the extra funds to foot this bill. PLEASE DO NOT DESTROY GRIMES COUNTY!	
Scott Treet	1/30/2018	Oral	Found out tonight this thing is going to come across my property in three different areas. 500 feet from the property line on the east side. The south side and the west side is where the proposed new road is going to go. If this goes through as proposed it will put me out of business. I got 17 employees. I can not relocate in Ellis County because of the existing fire codes. The --will also-- when they put the road on the west side of the property it is a flood plain so what property I do have left is going be flooded. So Texas Central has never contacted me to talk to me about anything. So how do we know what the environmental impact is going to be on me? It's going to be devastating. At 55 years of age, a 30-year business will go down the drain along with the 17 people that I support. Thank you.	Refer to FP-1, WW-1 and WW-2.
Becky Trigg	2/13/2018	Website	Please do not allow the Proposed High Speed Rail from Houston to Dallas to be subsidized by the public or use the power of the government to eminent domain people's private property on behalf of a high speed rail company. This is a subsidy and is wrong. These property owners have constitutional private property rights and we must stop abuses of our constitutional private property rights like this. If this company wants to build a train then they should buy the property the old fashioned way by buying it from a willing seller. The tax payers do not want to pay for a train that will not be used as proposed by this private company. If you want to build trains look at mass transit in and around the major cities of Texas.	Refer to ED-1.
Whitt Trimble	2/6/2018	Oral	A cursory review of the Draft EIS finds that it fails to address significant risks, both of public safety and the environment, that the operation of HSR's "electric" train will pose to the integrity of buried steel pipelines (many transporting hazardous liquids and gases) that it will encroach upon. For some background information, the draft EIS states: One, "Current FRA regulations do not comprehensively address safety requirements for train operations above 150 miles per hour, such as the Project's proposed operations." Two, "All sources of electricity produce both electric and magnetic fields. Electric fields result from the strength of the electric charge, and magnetic fields are produced from the motion of the charge. Together, the combination of electric and magnetic fields is referred to as "electromagnetic fields "(EMFs). Three, "3.15.3, Regional and Local, EMF ordinances exist within Texas, including the City of Houston. The City of Houston Airport Land Use Regulations, Article VI, Section 9-36014, prohibits the use of generation of EMI (electromagnetic interference) within either the airport land or the airport land use envelope that may adversely impact airport operations or safety." Four, "3.15.4, Therefore, for the purposes of this analysis, the EMF Study Area is defined as 500 feet from the centerline of the HSR track. Beyond this distance, the EMF would be below background levels." Five, "3.15.4.2, a study of high-speed trains in 2013 found that EMI is present from electrical currents in the catenary, rails and the earth." Six, "3.15.5.2.4, Induced Currents and Shock Hazards, The generation of EMF from the HSR system can result in induced currents in nearby metal structures. These currents can lead to shock hazards to humans and animals if touched. These induced currents and shock hazards can be minimized by grounding all metallic structures. Therefore, all metal equipment surrounding the HSR system (i.e., metal fencing) would be grounded to minimize induced currents and shock hazards and maintained to prevent corrosion." Seven, "3.15.6, Avoidance, Minimization and Mitigation...EMF-CM # 1: Fencing and Metal Grounding. As part of the general operation and maintenance of the HSR system, the external fencing and any other grounded metallic objects would be routinely inspected and replaced as necessary. This would avoid or minimize any corrosion. If, for example, the external metal fencing corrodes, it would no longer be effectively grounded and electric shock could become an issue of concern for people or animals." However, the review of the Draft EIS did not find any discussion concerning possible damage caused to nearby buried metallic pipelines, resulting from induced voltages OR the flow of current in the ground around them, from HSR operations OR the mitigation of such risks to the public or the environment. Comment Recommendation. It is recommended that the USDOT Pipeline and Hazardous Materials Safety Administration (PHMSA) be contacted and requested to provide guidance as to any required mitigation of such hazards by the HSR Project - in accordance with 49 CFR 192 and 49 CFR 195. (It should be understood that other, non-USDOT jurisdictional, pipelines may also be detrimentally affected by HSR's operations.)	<ol style="list-style-type: none"> <li>1. The Project will not induce any voltages. The Project may induce small currents in nearby metallic equipment, which, as stated in the Draft Environmental Impact Statement (Draft EIS), should be grounded. This allows the stray currents to safely dissipate. No risks or hazards are associated with this approach.</li> <li>2. Current for the Project will flow through conductors, such as metallic wires and rails. Current from the Project is not expected to flow in the ground. Rather, current will flow through insulated conductors. Soil has a relatively high resistance, and is considered an insulator. "Grounding" is used to dissipate excess charge to earth.</li> <li>3. Any buried piping would be identified as part of the standard construction process.</li> <li>4. 49 CFR 192.467 already requires the electrical isolation of underground piping. Therefore, underground piping is protected from potential induced currents.</li> </ol>
Do Toyet Trinh	2/5/2018	Handwritten	Concerned about noise and lowering property values.	Refer to NV-1 and VA-1.
Shannon Trochesst	2/28/2018	Website	As a person who has lived in Texas my whole life, I do not see where this rail line will have enough ridership to make it a fiscally viable project. We Texans are accustomed to driving. If someone takes the rail, a car rental will still be required when you reach your destination. Most people have a "5 hour" drive mentality. If it takes 5 hours or less, they would rather be in their own vehicle. I see a ton of money being spent and no profit in the long run. It will cost too much tax money for a project that will have an eventual end. Sooner rather than later.	Refer to GN-2, GN-4, NE-1 and PN-3.
James Trotter	3/9/2018	Website	I am opposed to this project and particularly the proposed route through Grimes County	Comment noted.
Walter K. Truett	2/20/2018	Letter	I am opposed to the proposed Dallas to Houston High-Speed Rail Project and request that a NO BUILD recommendation be submitted. In my opinion there is no need for this type of transportation. While the purpose may be well intended, the infrastructures in both Houston and Dallas are not designed to or is there, to my knowledge, a plan in place to transport passengers from the terminals to their destination. I can't	Refer to BA-3, ED-1, ED-2, ED-4, GN-2, GN-4, GN-6, LU-7, LU-11, NR-5, NR-6, NE-1, NE-9, PI-1, PN-3, SC-19 and SS-7.

			<p>imagine the cost of doing that. My brother and I own 80 acres of property in Grimes County. Texas Central is proposing to 'take' 7.447 acres of this land for the HSR. The proposed route would cut our property in half. That would greatly diminish property values, restrict or possibly eliminate usage as grazing ranchland, and ruin a place for undisturbed family activities. While not a large amount of acreage this property has been in our family for over sixty years and we hope to keep for many more. It was home to my parents and I and later our grandparents' retirement home. It has been and is a place for family gatherings, work days and play days. This project will destroy many of its current and future usages. A large portion of the property has already been scarred. As part of the utility corridor there are already three large utility lines crossing the property. Ten acres of timber were replaced with three very unsightly high voltage power line towers. This project would continue the destruction of wildlife habitat, grassland and timber. The project would filrther diminish the value Of the property by reducing or probably eliminating the ability to produce income through the leases of mineral rights. We might receive and up front 'reward' for selling our land, but 20-years from now we would have nothing to show but an ugly rail line like the power lines now. As third generation owners Of the property we reap no benefits from the existing utility lines except for having to hassle with the utility companies for maintenance and upkeep. I fear there will be no future benefit from the HSR project for my family. I fear that the TCR will eventually fail and the maintenance and upkeep of the HSR will fall on the to supper! Taxpayer support is unacceptable. We don't need another boondoggle as is the current California high speed rail project. The surrounding community of Singleton has been and is a small rural ranching community for many years. The high-speed rail would negatively impact those families' livelihood's and way of life. In my opinion, the estimated number of riders seems to be a 'pie in the sky' guess and combined with the price of a ticket makes this project unsustainable without taxpayer support within a few years. Taxpayer is unacceptable. The project would create unforeseen of damage to existing infrastructure, businesses and individual rights forever. The threat of eminent domain by a private company against a private citizen is completely unacceptable. Texas Central is not a railroad. Texans Against High Speed Rail has identified a multitude of other reasons for opposing this project, among them are:</p> <ol style="list-style-type: none"> <li>The project details have lacked transparency and many of the details shared have later been changed, leaving citizens to doubt every decision made by TCR.</li> <li>Despite TCR's claims that the project would be entirely privately funded, TxDOT has reported it is not feasible to construct and operate HSR in Texas without utilizing taxpayer subsidies. TOOT is continuing to pursue this project on behalf of TCR by using federal grants, which are clearly taxpayer dollars.</li> <li>The use of eminent domain for private corporation(s).</li> <li>The project will not have any positive benefits for the counties that do not have a Station.</li> <li>TCR has not addressed how they propose to secure 250 miles of HSR tracks from terrorist attacks.</li> </ol> <p>The DEIS and Texas Central has left too many unanswered questions to be a viable project. Please recommend a NO BUILD.</p>	
Sid Truitt	3/8/2018	Website	A long time there was a uproar about how the ny to dc would ruin the quality of life around the smaller communities along the route of the Metroliner. Seems like everyone survived and it has prospered well enough for even a Vice President to use it. Change scares people until they realize it really is not a threat but a step forward.	Comment noted.

Sharon Tryon Please email me the responses	Refer to GN-1 and TR-8. FRA did not conduct a helicopter survey of each proposed roadway crossing. A helicopter survey is not required in order to identify potential impacts of the Project.
Sharon Tryon	2/10/2018	Email	The executive summary states that the no-billed alternative does not meet the criteria of the purpose of the study.This means this option is not a possible outcome of this EIS. Why has the FRA already ruled out an alternative that rural Texas favors?	Refer to BA-6.
Sharon Tryon	2/10/2018	Email	How will Fri remedy over/ underpass design characteristics 14 that do not meet the needs of the farm and ranch and Equipment requirements of the local residents?	Refer to LU-11 and TR-8.
Sharon Tryon	2/10/2018	Email	Why are reroutes not considered closures? Fra road closures and reroutes appear to be significantly understated when compared to actual physical characteristics. Why is this? Sharon Tryon 254-230-2010 Please send email response	Refer to TR-8. A public road could not receive a "closure" designation, but could receive a "reroute" designation. In some instances public roads would be realigned to go either over or under the Project. A reroute is not considered a closure because travel could still be made in the general direction that was made previously. The Final EIS does note that there would modifications that either lengthen or shorten the current travel distance. See the roadway modification tables that are presented by county in 3.11.5, Environmental Consequences.
Sharon Tryon	2/12/2018	Email	Question for Federal Railroad Administration Dallas to Houston high speed rail What are the financial Arrangements of insurance and warranties the TCR will be required to maintain and protect the citizens of Texas from the risk of failures?	Refer to NE-1, NE-10 and SS-21.
Wesley Tryon	2/3/2018	Email	Since Japan has no feral hogs to have a study of the consequences, how do you determine what would happen if a 700+ average feral hog was on the tracks when the bullet train at 210 miles an hour impacts it?	Refer to SS-2 and SS-12.
Wesley Tryon	2/3/2018	Email	Can the TCR still obtain federal eminent domain author-ty? If so, how? Who would have to approve federal eminent domain? Please let me know Thank you	Refer to ED-1.
Wesley Tryon	2/5/2018	Email	I would like to know: What are the political action committees organized by the Japanese, TCR, TCRR? Who have these organizations made contributions to, when and how much? The FRA energy assessment indicates that ERCOT has a 13% reserve capacity that can be used by TCR. If ERCOT has a 13% reserve, then how is it the Texas is experiencing so many "Brown Outs" during both Winter and Summer months? The EIS states that additional energy resources will be required, and on-line, by 2029. Who will pay and how much will the added capacity requirements cost? How much of the added capacity will be dedicated to this project? Texas uses coal fired plants, so how much greenhouse gases will be generated by these plants in	Refer to AQ-1, EU-3, EU-4, GN-4, NE-1 and NE-10.

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>order to support this project? If nuclear power plants are the source of future energy, when will new plants be available and at what cost? How will FRA/TCR bridge the energy requirement gap between first operations and the FRA projected on-line date of 2029? Where will the TCR be placed in the priority for energy during brown out periods and why?</p> <p>The TCR has publicly stated that it will not need government funds. The FRA EIS says that federal grants will be pursued by TCR. Which is it? If federal funds are being pursued, how much funds are being requested and why? What is the true level of financial investment from the Japanese? How much of the Japanese investing pool is from the Japanese government?</p>	
Wesley Tryon	2/6/2018	Email	<p>Please answer the following questions for me.</p> <p>How does the TCR structure shield the Japanese from product liability claims?</p> <p>Catastrophic claims? How are Texans being protected from the Japanese washing their hands of financial losses and insurance claims?</p> <p>Why hasn't the FRA incorporated independent economic analysis that reflect a negative 20%+ impact to all the counties between Dallas and Harris? What negative economic impacts has the FRA incorporated into their analysis? If any, what are they and how was these values determined? Who did the FRA coordinate with at the county levels to obtain the financial impacts in the local communities?</p> <p>How did FRA validate the road closures, by county? How did the FRA validate TXDOT data to aerial overviews of the proposed routes? Why did the FRA not conduct 100% helicopter surveys and impact analysis of each proposed route? If the FRA did, where are the results of these inspections?</p>	Refer to NE-1, PI-1, SC-20, SS-5 and SS-21.
Wesley Tryon	2/6/2018	Email	<p>How did FRA validate the road closures, by county? How did the FRA validate TXDOT data to aerial overviews of the proposed routes? Why did the FRA not conduct 100% helicopter surveys and impact analysis of each proposed route? If the FRA did, where are the results of these inspections? Thanks,</p>	Refer to GN-1 and TR-8.
Wesley Tryon	2/12/2018	Email	<p>If a person is licensed to carry concealed handgun will they be able to ride with their weapon from Houston to Dallas?</p>	Refer to SS-9.
Cathy Tucker	3/4/2018	Website	<p>I am the person you would expect to take the bullet train. I live in Houston and my family (parents, brothers and sisters) are in the Dallas area. I make 4 to 6 trips per year, and I could afford the tickets. But it does not make economical sense for me to take the train, and I never see myself doing it. Where on earth did this company come up with their projections of the number of people to take this trip every year. Their primary competition is the airlines, and they project 5x as many people as fly??? It is way too expensive, vs the cost of driving. Make it 2 or more people and the cost is prohibitive. I need a car once I get there. While it may take only 90 minutes to get to Dallas, there is the time to drive to the train, waiting because I don't want to be late, getting on with my luggage, (me and my hundreds of expected fellow passengers), then getting off and proceeding to my destination. I've barely saved any time door to door. And that is assuming no extra security, which is a bad assumption. Meanwhile, you have destroyed the peace and quiet throughout the countryside for those who chose to live there. To sum up, it is too expensive, and will save little time, so I won't be taking the train, and I believe many of my fellow Texans feel the same. It is a bad idea, the company will soon be bankrupt, and we the taxpayers will be left to pick up the debris. It doesn't matter that a private company says they will do it. We must also be sure that they can cover the costs to dismantle their boondoggle if it does not meet the projections.</p>	Refer to GN-2, GN-4, NE-1 and PN-3.
JOE TUCKER	2/28/2018	Website	<p>I AM SUPER EXCITED TO GET ANOTHER WAY TO GET TO HOUSTON OTHER THAN COMMERCIAL AIRLINES OR DRIVING MYSELF IN A CAR. FIRST, COMMERCIAL AIRLINE TRAVEL IS A NIGHTMARE IN TODAY'S WORLD. SECOND, TRAVELING BY VEHICLE IS NOT NEAR AS SAFE OR AS RELAXING AS THIS SUPER TRAIN WILL BE. I DO BUSINESS WITH PARTNERS IN HOUSTON AND MY MOM LIVES THERE SO THIS PROJECT COULDN'T GET TO CHOO CHOO ING SOON ENOUGH. THEREFORE, ALL ABOARD!!!!</p>	Comment noted.
Tommy Tucker	2/7/2018	Email	<p>Me and my wife are 100 % opposed to this project! We want to go on record that we strongly install this project! NO BUILD! NO BUILD! NO BUILD! NO BUILD! NO BUILD! Donna and Tommy Tucker Sent from my iPad Have a blessed day!</p>	Comment noted.
David Tullos	2/6/2018	Handwritten	<p>I support the comments listed below and offer them as evidence supporting the "No Build Alternative"</p> <ol style="list-style-type: none"> <li>1. David Tullos	2/6/2018	Oral	Wow. What a tough act to follow right there. Grimes County, can you hear me? My name is David Tullos. I'm a resident of Plantersville, Grimes County, Texas, coordinator for the Grimes County Citizen Advisory Group, and administrator for Stop Texas High-Speed Rail. We support the no build alternative. For those of you-all that aren't aware of it, this project will run right through the city of Plantersville, which just happens to be the newest municipality in the state of Texas, so where our birth is going to end up being our death if this project goes forward. So I'm only given 180 seconds to address the more than 180 shortcomings that can be found in the DEIS. So that being the case, I'm going to sum it up in three words--flawed, irresponsible, incomplete. Flawed survey data. Flawed alignment options. Flawed projected ridership figures. Flawed construction cost assumptions. Flawed economic impact projections. Irresponsible environmental impact analysis. Irresponsible build alternative methodology. Irresponsible noise and vibration studies. Irresponsible traffic countdown. Incomplete socio economic and community impact information. Incomplete public safety and security information. Incomplete coordination efforts with the local governments, as required by NEPA, the National Environmental Policy Act, and the Texas local government code, Chapter 391. Flawed. Irresponsible. Incomplete. Thank you.	Refer to BA-8, GN-1, GN-2, NE-1, NE-8, NE-9 and PI-1.
Rosario Turgeau	3/9/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5, WW-1 and WW-2.
Amanda Turner	2/9/2018	Website	This is most ridiculous and unfair proposal for the residents and property owners. I stand firmly against the high speed rail in Waller co or in Texas no bennifitt to the citizens of our state only loss in use and property values and a failure of the whole purpose . only to leave our residents property owners to pay the bill for this failure . no one will use it cost to much and Texas land owners will loose on property values they earned as investments.no to high speed rail Amanda Turner	Refer to GN-2, GN-4, PN-3, SC-19, SC-3 and VA-1.
Linda Turner	2/26/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easment would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. Furthermore, I am concerned about historic impact.	Refer to LU-5.

Linda Turner	2/26/2018	Website	I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property and will potentially cause serious watershed issues. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement	Refer to LU-5.
Linda Turner	2/26/2018	Website	Dallas to Houston High-Speed Rail Environmental Impact Statement I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property and will potentially cause serious water shed issues. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement.	Refer to LU-5.
Linda Turner	2/26/2018	Website	I would like to make comments regarding the proposed route for the High Speed Rail as proposed by the FRA. Although I'm sure there has been much research that went into this southernmost proposed route, the chosen route seems to defy logic. The route crosses several local roads and divides several properties. The work on the roads that would be needed to follow this route would obviously add considerable cost to the construction of the rail line. Dividing properties that have been in families for many years (or even generations) also seems to not make much sense. One such property is the Morgan Legacy Farm. The proposed route would require the destruction of the majority of the structures on this property, both residential and ranch related. Over the years, the Morgan Legacy Farm has hosted literally hundreds of groups of children and adults as an opportunity to experience Texas farm and ranch life. Not one of these groups has been asked to pay for anything! Running the train right through the middle of this property would literally make these events no longer possible. Alternatively, there is a nearby high-tension power line that seems to be a logical route for the rail to follow. It seems much more appropriate to run the train next to a high voltage power grid already existing. The environmental impact issues seem to make this a more logical route.**	Refer to LU-5.
Linda Turner	2/26/2018	Website	I have grave concerns about the high speed rail in Navarro County traveling through the Morgan Legacy Farm located near FM 709 and 3194. The proposed route will devalue and disassemble its ability to be a charitable ranch. The route will require the removal of all the main structures and infrastructure. Vacations at the ranch have been auctioned off to raise money for schools. It has served as a retreat for many businesses and organizations. The Daughters of the Republic and Medical Residents from Children's Medical Center to name a few. A move to north of the already existing high power lines would have less impact on benefits of the ranch and prove less damaging to the county in the long term.	Refer to LU-5.
Tim Turner	2/21/2018	Website	My name is Tim Turner and I am writing to make comments about a proposed portion of the High Speed rail to be located near the intersection of FM 709 and 3194. As contract administrator with Rheinlander Architects I believe I have unique insight about a facility's infrastructure and potential damage to a community by loss of a specialized facility. I would like to point out that the facility located near the above intersection is like no other located in Navarro County and quite frankly anywhere in nearby counties. To summarize Morgan Legacy Farm is composed of a multitude of highly integrated structures and infrastructure able to accommodate a multitude of visitors. Its primary impact on Navarro is the charitable visits allowed to first responders, military, students and many others. Additionally, the size of the facility it provides a significant economic benefit to the community. The uniqueness of the property is related to a multitude of homes and guest houses providing sleeping arrangements for guests in close proximity to the rodeo arena, pavilion, Lodge, stables and other activates. Service utilities for water, electric and communication support is buried entirely unground. The mission of the charitable and support for first responders and other is made possible by the proximity of the improvements and the ability to walk easily to the various venues. If the proposed route is utilized the property will be dissected and there will no ability for the property to function given the damage to the facility by isolation of the various aspects and structures. I would suggest that a move to the north onto an existing utility corridor already covered with high voltage transmission powers lines would be less detrimental to existing lands and more appropriate for a transportation corridor. Further from a construction and access perspective it would be more appropriate to be in close proximity to the existing power lines and infrastructure easing development.	Refer to LU-5.

Glen Tyler	2/11/2018	Website	Do you realize by the time you drive to the station.(290 and 610) park in high price parking lots then go through security lines and check in then ride 90 minutes. you could already be in Dallas and have a car when you get there and cost a lot less money. And blocked school routes and emergency vehicles from quick access to my parents and others	Refer to PN-3 and SC-7.
Edwin Tyrrell	2/11/2018	Website	This high Speed rail project is a step toward putting the US a little closer to the world leaders in Europe and Asia, and will contribute to improving the environment.	Comment noted.
Joe Tyus	1/31/2018	Website	What the people organizing this travesty needs to know is that we are not talking about a property or eminent domain. We are talking about threatening the cessation of 100 plus years of family heritage and history. There is no dollar amount that can compensate a family for the removal of the history continuation. If you try to take the homestead through eminent domain there will lengthy legal continuations to attempt to stop this. If you go through the property, you have already destroyed it. What else does a property owner have but to fight through the court system to stop this. It may take years, but what else is the only other option. I have heard people say, they would rather fight it legally and lose than willingly allow this to occur. Either way they lose. At least they can say they tried to maintain the family heritage and homestead. My family has owned property in limestone county for five generations. How dare you threaten to take that away from us or our friends. Joe Tyus	Refer to ED-1 and ED-2.

Keith Underriener	3/2/2018	Website	Please reconsider the current route for the hsr, as it currently runs through the beautiful Morgan Creek Legacy Farm. The owners provide their hospitality at no charge to their guests, and exemplify the friendly attitude that we Texans are so proud of. The wildlife and scenery are nothing short of breathtaking, and it would be a shame to impact this ranch that is a shining example of true Texas living. Please help keep this hidden gem alive and well in our state, thank you.	Refer to LU-5.
Reggie Underwood	1/5/2018	Email	This path cuts across One of my farms and I am definitely against this project. Will do all in my power to stop or at least reroute. I do not believe the financial sustainability of this rail.	Refer to NE-1.
Valerie Underwood	3/1/2018	Email	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5, WW-1 and WW-2.
Valerie Underwood	3/8/2018	Website	For years, Dr. Robert Morgan has opened up his heart and his property, the Morgan Creek Ranch located at 7750 FM 709 S, Purdon, Texas 75110 to the staff at the Children's Health Children's Medical Center Plano campus. Dr. Morgan invites different groups of us throughout the year to attend for a weekend of fun and relaxation at this unique, historical property. He does this at no expense to us as he is not only one of our physician leaders and/or colleague, he possesses a clear understanding of what it truly means to work in a children's hospital where we face disease and death every day to our most precious population, Dr. Morgan is in the trenches with us and knows we need -- and in some cases must have -- the respite these ranch visits provide so that we can continue doing the work we do and making a difference in the lives of children we care for daily. write you today as it has come to my attention that the Dallas to Houston High Speed Rail and the current Federal Railroad Administration approved route would destroy the Morgan Creek Ranch, The current proposed route will divide the ranch blocking access to the main house and destroying the two guest houses. Additionally, it will block access to the rodeo arena as well as the horse and colt barns. It also appears the route would block watershed needed to fill the lake and several Other bodies of water on the ranch. The train would run in an open trench approximately 30 feet deep travelling underneath FM 709, and then underground in an open trench adjacent to the house until traveling west where it would travel behind a berm in the middle destroying the rifle ranch, several bodies of water, and then travel on an elevated track at the bottom of the ranch. NO. Absolutely NOT. This cannot happen. Ripping apart the Morgan Creek Ranch in this way to accommodate the High Speed Rail system would have such a far-reaching negative impact on not just our hospital community but a huge array of fire and police first responders, and others, that have dedicated their lives to serving people it is just not fathomable especially as is totally unnecessary in that there is a viable rail placement alternative. Due to the topography in this area, construction for the rail would be much better suited north of the ranch along the existing power lines. Perhaps you should visit Morgan Creek Ranch yourself -- maybe even bring a few of your colleagues along; I'm confident Dr. Morgan would oblige. Spend some time in the open Texas air watch sunrise or sunset. Try your hand at bottle-feeding the goats or a newborn calf. Go fishing. Watch a real Texas rodeo. Once you've done all this then ask yourself how the experience changed you -- helped you go back to your life with a different perspective refreshed, centered and at peace. But before you go back to Washington, stop by our hospital and visit our most sick children. Ask their parents about all they've been through. Inquire about the quality of care they've received -- from our most humble of employees to our Chiefs -- each and every one of us are responsible for the hospital experience these kids and families receive, and often for their lives. Then ask yourself you could have made that hospital visit without first having been restored by all Morgan Creek Ranch offered you. I'd bet not. Nothing brings a person to his knees quicker than a dying child. Are you so willing to destroy that ranch now taking with it the comfort it brings so very many of us, many of whom could in no way afford to pay for a such an outing? I'm hoping not.	Refer to LU-5.
Union Pacific Railroad	3/9/2018	Email	Could you please confirm receipt of the note below and the attached letter? I am concerned the letter may exceed the size limitations of your email system. Thank you! Madeline Madeline E. Roebke-Curns Senior General Attorney Union Pacific Railroad [...] Office: [...] [...] Subject: UPRR Comments to the Texas High Speed Rail Draft EIS To the attention of Mr. Kevin Wright: Attached please find Union Pacific Railroad Company's comments to the Draft Environmental Impact Statement for the Dallas to Houston High-Speed Rail Project. The hard copy original letter will be sent to your attention via US mail. Please let me know if you have any trouble opening the attachment. [attachment "UPRR HSR	Comment has been received. Response to the letter is included in this table.

			DEIS Comment Letter.pdf" deleted by Madeline E. Roebke/UPC] Thank you. Madeline E. Roebke-Curns Senior General Attorney Union Pacific Railroad 1400 Douglas Street STOP [...] Office: [...] [...]	
Union Pacific Railroad	3/9/2018	Letter	<p>Dear Mr. Wright: Union Pacific Railroad Company ("UPRR") appreciates this opportunity to comment on the December 2017 Draft Environmental Impact Statement C 'Draft EIS' or "DEIS") for the Dallas to Houston High-Speed Rail project ("HSR Project" or "Project"), prepared by the Federal Railroad Administration ("FRA") Although UPRR fully understands and appreciates the HSR Project's stated goal of providing reliable and safe high speed passenger rail transportation between Dallas and Houston, the Draft EIS: (1) incorrectly concludes that project impacts to freight rail facilities will fully mitigatable and/or (2) does not fully address the true extent of such impacts beyond grade separation issues. Further, after closely examining the Draft EIS, UPRR believes FRA's environmental review Of the HSR project is flawed and legally deficient. For instance, the Draft EIS does not fully consider the environmental impacts of the HSR Project on freight rail infrastructure and operations, nor does it contain sufficient detail to enable parties to fully understand the HSR Project's potential relevant environmental consequences. In particular, the Draft EIS does not fully analyze the potential disruption to railroad infrastructure and the consequential economic impact to multiple sectors of the national economy. Also, the Draft EIS is silent on construction efforts that are underway for the proposed Brazos Railyard in Robertson County, Texas. This project will promote environmental justice by creating jobs and other economic opportunities for low-income and other disadvantaged individuals in the community. It is conceivable that the proposed action will disrupt or otherwise conflict with these efforts. For these and Other reasons discussed more fully below, UPRR Opposes the HSR Proiect to the extent that it impacts or potentially impacts UPRR rail infrastructure and Operations. Given the Draft EIS's inadequacies and deficiencies, absent obtaining Texas Central Railroad's (TCRR) commitment to comply with UPRR's High Speed Rail Principles. and a timely and satisfactory resolution of the issues identified in this letter. FRA must prepare a Supplemental EIS to take into account the proposed Project' s impacts to existing freight rail lines, rail operations, future infrastructure development projects and upgrades and improvements. I. Project Overview and Freight Rail Considerations The 240-mile long HSR Project would implement a high-speed passenger rail system between Dallas and Houston, with speeds capable Of exceeding 200 miles per hour. The Project includes three stations: two terminal stations (Dallas and Houston) and one intermediate Brazos Valley Station in Grimes County. According to the Draft EIS, minimum right-of-way (ROW) would be 100 feet and would include the track, overhead catenary system, access road and security fencing. (See DEIS, p. 2-2, emphasis added). In addition, the track would utilize a Combination of at-grade, retained fill/embankment, and (for at least sixty percent of the HSR line) viaduct structures. (See id). The "Utility Corridor" has been chosen as the preferred corridor for the Project, though three other corridors have been retained for further consideration in the event that route alternatives were required. (See, DEIS, p. 2-29). The Draft EIS acknowledges that the "Burlington Northern Santa Fe (BNSF) Corridor" and the "UPRR Corridor" were each eliminated from consideration predominantly because BNSF and UPRR declined consent to share ROW for the majority of distance between Dallas and Houston. (See DEIS, p. 2-20). The corridors were also deemed not suitable for high-speed rail operations due to the existing freight rail line design. (See id.). The IH-45 Corridor was rejected due to insufficient ROW and anticipated impacts to neighboring properties. (See id). It is telling that although these corridors were eliminated from future evaluation by TCRR and FRA, the Draft EIS nonetheless states that "Opportunities may exist for TCRR to negotiate with BNSF and UPRR to locate the HSR track adjacent to or within the ROW of the host railroad for short distances in order to minimize potential adverse impacts in certain areas along the route." (DEIS, p. 2-21 , emphasis added). The Draft EIS evaluates a No Build Alternative and six Build Alternatives, with Build Alternative A identified as the preferred Alternative. The Draft EIS does not identify a preferred alternative for the Houston Terminal Station, although TCRR recently announced its preference to build the Houston station at the site of Northwest Mall.'</p>	<p>Refer to BA-3, BA-10, GN-1, GN-7, GN-9, NE-1, NE-9, PI-1. Details of the Project (including design, construction and operational specifications) have been considered in this EIS as proposed by TCRR. Changes to the Project, as presented in the Draft EIS, have occurred as the conceptual engineering design progressed. TCRR has continually refined the design of the Project to reduce the Project footprint, or LOD, in this EIS and avoid or minimize impacts to the socioeconomic, natural, cultural and physical environment. These engineering refinements were based on environmental and engineering surveys, stakeholder engagement, public and agency input, design development, and the findings of FRA's environmental analyses and resulted in modifications to the Project, as well as the overall Project LOD and are detailed in <b>Chapter 2.5.4, Alternatives Considered, Engineering Refinements</b>. Therefore, the Build Alternatives depicted in the Final EIS have evolved from the alignment alternatives originally developed in the Draft EIS. Additional details are located in <b>Appendix F, TCRR Final Conceptual Engineering Design Report</b> and <b>Appendix G, TCRR Final Conceptual Engineering Plans and Details</b>. All Build Alternatives would cross existing freight railroads and light rail transit lines on viaduct. Impacts to these modes of transportation would be limited to temporary disruption of service during construction. As a result of <b>TR-CM #1</b>, described below, no long-term or permanent operational impact to existing freight rail or transit infrastructure would occur. Where the HSR System would run parallel to freight railroads, crash barriers would be constructed to protect the viaduct support columns. <b>TR-CM#1: Freight and Transit Crossing Easements</b>. Prior to construction, TCRR shall coordinate directly with freight railroad operators (BNSF, UPRR, TUEX and TEXU) and the transit agencies (DART) to obtain crossing easements, determine safety requirements during construction, and manage construction schedules to correspond with freight and transit operations. FRA coordinated with UPRR in a meeting on June 29, 2019 to develop the appropriate responses to mitigation measures regarding freight operations. FRA understands TCRR has also had continued coordination with UPRR since the publication of the Draft EIS.</p>
Union Pacific Railroad	3/9/2018	Website	<p>Union Pacific High and Higher Speed Passenger Rail Access Principles                      Union offers the following information to guide passenger rail planners and agencies working with Union Pacific to develop new High Speed Rail passenger service. Union Pacific defines 'Higher Speed' passenger trains that operate in excess of 90mph but less than or equal to 110mph. 'High Speed' are passenger trains that operate in excess of 110mph.                      Intercity Rail service provide substantial benefits to the public, including reducing and avoiding expensive highway construction. At the same tine, Union Pacific has a responsibility to the nation and to its customers to protect the public benefits of freight transportation - energy efficiency, lower emissions, cost-effective cargo transportation for shippers and consumers, and private investment in the nation's infrastructure.                      Union Pacific will consider reasonable proposals for High and Higher Speed passenger rail service that appear to be viable and adequately funded. Future agreements must balance the nation's desire for services With Union Pacific's ongoing, critical role in carrying freight that</p>	<p>Comment noted.</p>

			<p>would otherwise compete for space on the crowded and underfunded highway network.</p> <p>Separate Freight and Passenger Corridors are Required</p> <ul style="list-style-type: none"> <li>* Many critical freight corridors are already full and will require capacity improvements soon. UP Will not consider proposals that share tracks with freight trains in such corridors sell property that would compromise our ability to add capacity in the future. Passenger rail planners should develop a separate right of way for services in these corridors.</li> <li>*Passenger safety is best protected by separating freight and passenger tracks by 50 feet or more. Despite UP's enormous progress in preventing freight train derailments, derailments will occur and could strike or be struck by passenger trains. Research demonstrates that most train derailments will remain within a 100-foot corridor.</li> <li>*One way to achieve separation is to move the majority of freight trains out of urban corridors entirely. UP will consider publicly funded relocations of freight operations that preserve UP's service, competitive position, and access to current and future customers. Where separation or relocation is not feasible, and freight densities are light, UP will consider proposals to share tracks with Higher Speed Passenger trains. We intend to apply the following principles in evaluating proposals by passenger agencies:</li> </ul> <p>Safety</p> <ul style="list-style-type: none"> <li>* As in all our activities, safety must come first.</li> <li>*Under federal law, all trains and tracks must in future be with interoperable Positive Train Control (PTC) systems if passenger trains are present. The passenger operator must fund PTC if UP not otherwise install it on the track, or contribute the operator's share of equipment and wayside costs if UP would install PTC the track.</li> <li>*Passenger operators should fund all incremental safety requirements attributable to its service including grade crossing warning signal improvements, new grade separations, and fencing.</li> <li>* Passenger stations must meet Union Pacific and FRA design requirements to protect passengers from nearby freight operations.</li> <li>*UP will require existing track to be rebuilt, and new track to be built at the high track construction standards where passenger trains run at higher speeds. This includes concrete ties.</li> <li>* Passenger vehicles must, at a minimum, meet FRA crash standards.</li> <li>* On UP tracks and/or right-of-way passenger trains must utilize conventional locomotive equipment.</li> <li>* UP will not permit the installation of any electrical lines or equipment for the purposes of providing power to non-diesel powered locomotives on, over or beneath UP tracks or right-of-way.</li> </ul> <p>Service</p> <ul style="list-style-type: none"> <li>* Service to Union Pacific's freight customers must also be reliable and protected and should not be compromised by a new passenger service. UP cannot agree to curfews or other restrictions that would impact the quality or reliability of our freight service.</li> <li>* New infrastructure construction must preserve both the ability to operate freight trains on demand and the opportunity to expand freight capacity.</li> <li>* New Infrastructure design must protect UP's ability to serve existing customers and locate new freight customers on our lines.</li> <li>* In order to preserve service quality for all types of UP customers, UP will preserve dispatching and maintenance control over its lines. The parties must agree on standards for reliability.</li> <li>* Passenger operations must provide the flexibility to accommodate track maintenance. This includes a requirement that any new track must be constructed at 20 foot track centers.</li> </ul> <p>Liability</p> <ul style="list-style-type: none"> <li>* UP cannot accept exposure to any additional liability associated with allowing High or Higher Speed passenger service near our freight tracks that would not exist "but for" these operations.</li> <li>* Passenger operations should be prepared to carry and provide evidence of insurance covering liability exposure up to \$200 million, the limit of liability under federal law. Union Pacific expects to be indemnify for or protected against any and all liability resulting from the presence of passenger service.</li> </ul> <p>Capacity</p> <ul style="list-style-type: none"> <li>* All projections call for rail growth to exceed rail capacity in the future. Passenger agencies should understand that existing capacity that UP funded -whether or not now used- is reserved for potential freight growth.</li> <li>* Passenger Agencies therefore must fund all incremental capacity to accommodate Higher Speed passenger operations, as reflected in a study of capacity requirements and a resulting capacity plan.</li> <li>* Because new capacity consumes the least expensive capacity opportunities and usually makes the next increment of capacity more expensive, the capacity plan may include additional agency investment at the outset that Will leave UP cost-neutral when it needs to invest in</li> </ul>

			<p>additional freight capacity.                      * Infrastructure requirements be determined by UP or a UP-designated and qualified third party.                      * UP will not agree to host any type of train preemption technology into grade crossing designs, even if it applies to passenger trains only NO trains can be delayed by vehicle detection technology.                      Maintenance                      * Passenger agencies must to agree to maintain the incremental improvements necessary for higher speed operations on UP tracks. This includes expenses related to maintenance of safety appliances such as PTC and 4 Quad gates. UP will limit its contribution to maintenance to what would be necessary for its existing freight operations, generally at FRA Class III or IV.                      * Prior to the new service start-up, UP will require execution of a maintenance agreement to allow the public agencies to fund incremental maintenance for the duration of its commitment to operate higher speed passenger service.                      Compensation                      * The passenger operator should be prepared to pay all costs associated with providing information and studies necessary to develop any Higher Speed Rail proposal, including UP's time and resources.                      * To the extent passenger operations use UP assets and property, they must provide UP with a reasonable return on Union Pacific's investment.                      * UP will seek fair market rates for access. Traditional "incremental cost formulas" are no longer acceptable.                      *If UP's tax liabilities (income, franchise, sales and use, property, or any other tax) increase as a result of UP'S participation in a passenger project, UP expects to be made whole. This will likely require tax indemnification from the public agency or changes to state law.                      Additional Requirements for High Speed Passenger Trains Operating at Greater than 110 MPH                      * The following requirements are in addition to those listed above:                      * UP will not allow High Speed trains on its tracks under any circumstances.                      * NO High Speed Rail (HSR) facilities located on UP's property.                      * Minimum 102 feet of clearance between centerline nearest HSR track and adjacent UP ROW - Almost all freight train derailments can be contained within 100 feet of track centerline and High Speed passenger train derailments have a greater dispersion distance to compensate for.                      * If HSR utilizes electrified equipment, must be designed, constructed, and maintained to prevent any interference with any UP owned or operated facilities or equipment                      * At locations where HSR and UP parallel each other, any at-grade road crossings that are closed or grade separated by HSR must be modified accordingly on UP, at expense of other than UP.</p>	
University of Oklahoma Health Sciences Center	3/2/2018	Website	<p>I have concerns about the high speed rail in Navarro County travelling through the intersection of 709 and 1394 cleaving Morgan Legacy Farm. At this highest portion in the county I believe significant damage will occur to the environment and water shed adversely impacting the migratory waters of the US. Further by separating access of the Morgan Legacy Farm Lodge from the Rodeo Arena and Guest Houses and Stables the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared. Our office staff has had over 100 employees and family members visit this ranch, ride horses, take hay rides and enjoy the unique experience not offered by any similar property....all at no cost. I would ask that this 5-7 mile portion scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic on the county that would occur if Morgan Legacy Farm is traversed.</p>	Refer to LU-5.

Robert Upchurch	2/6/2018	Email	The Upchurch Family owns various contiguous rural tracts Of land that compose approximately 6000 acres in Grimes County, Texas, south and west Of Bedia. Portions of the property have been in the Upchurch Family for over 100 years. Most of the Upchurch property that Will be affected by the proposed rail route supports a large stand Of native upland woodlands. In fact, it is one of the last heavily forested areas in Grimes County, Texas. The property is under a Wildlife management plan With the Texas Parks and Wildlife Department. Incursion into this hardwood area Will destroy natural habitat and promote soil erosion. The proposed rail route Will run across the water shed whet-e water flows east to the Trinity River basin and west to the Navasota River basin. Construction on or around the water shed will cause potential damage to the natural flow of water utilized by others and municipalities downstream. A high-level survey for archaeological resources in the LOD would include identification of such resources; however, resource specific surveys and monitoring for tektites would not be performed.
Candi Upchurch Barousse	2/6/2018	Handwritten	I typed my comments at home so I don't have to spend a lot of time writing tonight like I did at Madison C meeting. For well over 100 years, my family has owned property in Grimes County. We are cattle ranchers, operating under the name of Upchurch Land and Cattle. My ancestors started out with just a few acres and continue adding to it as they could afford to purchase more land. Paying the property taxes and inheritance taxes has often been challenging (the Great Depression, fluctuating cattle market, drought, recession, etc.) but we worked extremely hard to succeed because of our determination to hang on to the property for future generations of our family. The current proposed route of HSR through Grimes County will definitely destroy all that my family has worked for. The idea is laughable that Texas Central can "fairly compensate" us for ruining our cattle ranching business; causing irreparable damage to the value of our land; rendering our property useless for any other type of business in addition to immeasurable negative effects on a multitude of environmental issues, including wildlife and watershed. The negative impact of HSR on Grimes County will be tremendous. Grimes County is rectangular in shape, and its width is relatively narrow east-west, but its length is extensive north-south. HSR will run through the length of the county, and its elevated track will be built on top of a virtually impassable barrier of fencing and other agricultural-related business. HSR will inevitably destroy much of that way of life, depreciate property values significantly, and in many cases have an undesirable effect on the health (ex:noise and pollution), safety (ex: delayed EMS response due to blocked roads), and welfare (ex: decrease County funds caused by drop in property values) of Grimes County citizens.	Refer to LU-11, LU-12, LU-13, NV-1, SS-1, SS-23, VA-1 and WW-2.
Candi Upchurch Barousse	3/5/2018	Website	CANDI UPCHURCH BAROUSSE: For well over 100 years, my family has owned property in Grimes County, Texas. 			environmental issues, including wildlife and watershed. The negative impact of TCR on Grimes County will be tremendous. Grimes County is rectangular in shape, and its width is relatively narrow east-west, but its length is extensive north-south. TCR will run through the length of the county, literally cutting it in half. The route of TCR on a map shows that it goes precisely down the middle of the entire county, and its elevated track will be built on top of a virtually impassable barrier of fencing and berms. Grimes County is primarily rural, and the majority of its economy is based on farming, ranching, and other agricultural-related businesses. TCR will inevitably destroy much of that way of life, depreciate property values significantly, and in many cases have an undesirable effect on the health (example: Continual noise and pollution), safety (example: Delayed EMS response due to blocked roads), and welfare (decreased County funds caused by drop in property values) of Grimes County citizens.	
Robert Upchurch III	2/6/2018	Handwritten	The Upchurch Family owns various contiguous rural tracts of land that compose approximately 6000 acres in Grimes County, Texas, south and west of Bedias. Travis Updegraff	2/7/2018	Website	Put it along the interstate. They have already Destroyed that area. Stop trying to tear up precious farmland because its more economical.	Refer to BA-9, LU-2 and NE-1.
Bernard Urbanik	1/28/2018	Website	I support the building of a high speed rail line linking Dallas and Houston. We should have done this in 1991. We have to face facts that all modes of transportation will be necessary in the future. I-45 is a parking lot now. How many airplanes will it take in the future? Both Dallas and Houston stand to gain much commerce by such a link. I would take it tomorrow if it was there	Comment noted.
Ursuline Academy of Dallas	3/8/2018	Website	I am writing to request that the portion of the proposed path of the Dallas to Houston High Speed Rail Project through Morgan Creek Ranch be modified to spare destruction Of this much valued facility. We understand that, over the past five years, use Of the ranch has been made available at no cost for approximately 900 first responders, members of the military, and other individuals working in medical services to provide a needed respite from the stresses that accompany their vital and often difficult selTice conditions. In addition, we are keenly aware of another charitable impact of Morgan Creek Ranch, which has been used to help raise over \$50,000 for various non-profit organizations in the Dallas area. Clearly, to lose the benefits of such a facility would have a significant negative impact on our community. Therefore, we ask that you will please consider a modification of the proposed rail pathway at Morgan Creek Ranch located near FM 709 and 3194. As currently planned, the path would destroy many of the existing ranch structures as it cleaves the property, rendering the ranch useless for fulfilling its primary purpose. It also appears that the rail path as currently planned could also create watershed issues that would reduce migratory waters. Moving the rail path north to parallel exiting power lines would be less detrimental to the environment and save a unique, irreplaceable property to continue its operations. Thank you for your attention to this appeal.	Refer to LU-5 and NR-2.
Andrew Utz	1/31/2018	Email	This train would take you from Downtown Dallas to Downtown Houston (or vie versa) and not to an airport far from the central business district. The train would be a convenient option for business and leisure travel since it would allow you to take public transportation in either city once there. Since the railroad would be privately owned, they would pay property taxes, unlike roadways and IH-45. We need this train, thank you.	Comment noted.
Andrew Utz	2/5/2018	Email	Texas needs the high speed rail because the train is more environmentally friendly than cars, buses, or planes. The safety record of the Tokaido Shinkansen is also advantageous, because the more cars/trucks off IH 45 lessens the chances of auto accidents.	Comment noted.

<b>Submitted By</b>	<b>Date Submitted</b>	<b>Submission Type</b>	<b>Comment</b>	<b>Response</b>
Andrew Utz	2/6/2018	Email	Air travel has cut down significantly on their trips from Dallas to Houston. People either have to wake up at the crack of dawn and get home well after nightfall to get flights from Dallas to Houston for work. The bullet train would provide consistent service from Dallas to Houston/Houston to Dallas and allow business people to be home in time for family at reasonable hours.	Comment noted.
Andrew Utz	2/15/2018	Website	This train is more environmentally friendly than other modes of transportation. With the potential for frequent trips to/from Dallas/Houston, the Texas economy will be boosted while also minimizing the damage to the environment.	Comment noted.
Andrew Utz	2/20/2018	Website	The high speed rail project will revive economically depressed areas of Dallas and Houston. Not only with this project boost economic development of both metropolitan areas, but it will also serve as a landmark project to be replicated in other areas of the country once complete.	Comment noted.
Andrew Utz	2/21/2018	Website	The high speed rail is being built by a private company. The private company is investing in Texas and is not asking for state or federal funding to build or operate the railroad. This will boost the economy of the entire state, at no cost to taxpayers.	Refer to GN-4.
Andrew Utz	2/22/2018	Website	In addition to relieving the ever increasing traffic on I-45, the station in Brazos Valley will give access to Bryan-College Station. This area is land-locked without an interstate highway connection. This will make trips to the area much easier and safer for fans in Dallas, Houston, and surrounding areas.	Comment noted.
Andrew Utz	2/26/2018	Website	In addition to the time savings and service options, this private project will create permanent, well-paying jobs in the railroad industry.	Comment noted.
Andrew Utz	3/6/2018	Website	The High-Speed Rail will be environmentally preferred to the dozens of cars that travel along the IH 45 corridor right now. The electric system is more environmentally friendly than buses and planes as well.	Comment noted.
Andrew Utz	3/7/2018	Website	The train will take people from downtown to downtown, not a distant airport that forces additional costs to get to the central business district. This will help revive economically depressed areas of both Dallas and Houston.	Comment noted.
Andrew Utz	3/8/2018	Website	The High Speed Rail will use proven technology that is safe and efficient. The technology has proven itself over the past 50 years to be reliable and safe.	Comment noted.

Sonya Vaden	3/9/2018	Website	My husband and I moved to Houston in 1992. Since that time , we have literally made hundreds of nit a thousand trips seeing relatives and executing business. A high speed train is needed for convenience, tome and safety , I would be willing to speak on behalf of this project if asked.	Comment noted.
Toni Valnn	2/6/2018	Oral	Why don't they have two bullet trains? One that takes off from Magnolia and the other one from downtown Houston because Magnolia is growing in 2,000 divisions, over a thousand homes in one subdivision and probably 5,000 homes off another division off of 1488. They have the train stop and board in Magnolia itself because the traffic is really heavy in the morning and people coming out of the woodworks to get to Tomball downtown or wherever they're going. It starts off at 5:30, 4:00 in the morning. It's heavy, heavy traffic. And if they had a train that they could board in Magnolia, old Magnolia, you would have a gold mine.	Refer to PN-3.
Mike Van Dusen	3/5/2018	Oral	Hello, my name is Mike Van Dusen, and I'm a Houston resident who supports Texas Central Railway's selection of the Northwest Mall as its preferred terminal site. In reading through the Environmental Impact Statement, I notice that the initial service will be two 8-car train sets arriving and departing every 30 minutes during peak period. This means up to 800 passengers arriving and 800 departing every hour. Furthermore, the reports states that peak service could increase to the point where the same train set arrives and departs every 10 minutes. This means 2,400 passenger arrivals and 2,400 departures every hour at its maximum. This level of service begs the questions: Where do the arriving passengers want to go and how will they get there; and how will the departing passengers get to the terminal? For passengers using public transportation, the Northwest Transit Center seems be a logical choice as a passenger's first stop, since it affords access to downtown, Medical Center and Galleria. To support this service, I've heard some suggest that expanding bus service along North Post Oak as a transitway between the mall terminal site and the transit center. I'm not in favor of this routing for the following reasons: One, high-density residential development along Post Oak has occurred and will continue occurring during the terminal construction. Two, recent expansion of Awty School to the east side of Post Oak and the ensuing student traffic between the two campuses that cross Post Oak; and three, the on-grade crossing of freight rail tracks along Hempstead. As an alternative, I encourage TCR to support a possible option of linking the two sites within the 610 transit corridor. The State owns most of the property along the west side of the 610 right-of-way which allows it to implement this 290 design enhancements now being completed. A southbound rapid transit link between the mall terminal site and transit center may already be a reality within the 610 transitways. Finally, for the high-speed rail service to succeed, good secondary transportation is needed so the passengers can get to and from their final desired destination. Thank you.	Refer to TR-4 and TR-5.
Wanda Van Hook	3/9/2018	Website	Ruining homes and properties that have been owed by families for numerous generations is completely RIDICULOUS and asinine. And you should have to pay people what their property was worth before this "scheme" came to fruition instead of making their properties unsellable and depleting their worth. I will bet money this is yet another project for the powers that be to put money in their pockets and another "scheme" which will go bankrupt. I cannot believe there are that many people that will actually use it. It should have gone through the original route. #GOAWAY	Refer to ED-2, GN-2, GN-4 and LU-11.
George Van Houten	2/21/2018	Website	Can we just build the train system now? I will die of old age before this will get completed. There really no good reason why ground breaking cannot get started before this summer. Other countries can get a project like completed in only 2 years after getting started from the drawing board.	Comment noted.
George Vande Werken	2/4/2018	Website	My comments are in support of the proposed Dallas to Houston High Speed Rail Line. Here is a short bullet point list of my comments and observations: 1. The Benefit of Alternatives. The country needs to build alternatives to vehicular travel infrastructure to reduce our dependence on and vulnerability to disruptions of current systems. Our current transportation system is heavily weighted to passenger vehicles and airplanes to move people efficiently. But congestion on our highways and particularly in our urban areas and around airports, as well as potential service disruptions, is placing increasing pressure on us to plan for alternative ways to move people (and materiel). 2. Reduced Dependency on Legacy Systems. Effectively designed high speed rail infrastructure reduces the need for interurban roadway expansion and those related environmental impacts. Opponents of high speed rail often point to actual and potential negative environmental impacts of proposed high speed rail. Although the negative impacts of a particular project can be determined with some precision, the incremental negative environmental impact of expanded use of alternatives is not always appreciated. In our thinking we need to focus not only on what impacts a project may cause, but what benefits in overall impact a new infrastructure might have. Our goal is to reduce the environmental impact of the "whole" transportation system (roads, airplanes, trains, ships, etc.) by making judicious choices when we assemble the "parts." Shifting more weight to new or different infrastructures may have a more beneficial overall effect. 3. New Possibilities. Enhanced collaboration between high speed rail and the airlines should be explored. High Speed Rail that included connections between airports in Dallas and Houston could significantly leverage the benefits of high speed rail. To maximize these benefits the following concepts may need to be explored: a. Post TSA Access. High Speed Rail access at airports behind the TSA security system. b. Airport to airport secure	Comment noted.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>trains. Trains would depart from behind security at one airport and arrive at gates behind security at another – thus maintaining the security of the system. c. Airline Train Car Operation. Full integration of ticketing, baggage handling, and staffing with other airline service for the high speed rail "cars." Airlines would "fly" on rails as well as in the air. For example, in a particular train departure from the Dallas airport to the Houston airport, United could operate two cars, American the next two, Southwest the next two, and Delta the last two. d. Power Unit Operator/Train Car Operator Collaboration. The power unit operator (Texas Central, Amtrak, or any other entity) would provide power units to pull train cars, deal with all right of way issues, and receive additional revenue from the airlines for hauling cars. (This is akin to the gate lease arrangements with municipal airport operations.) e. Potential Benefits: (1) provides airlines a way to increase passenger traffic without diverting passengers to competitors, (2) allows airline industry to win more passengers as high speed rail is expanded, particularly on shorter haul routes, (3) leverages existing airport infrastructure (parking, mass transit access, location, etc., (4) increases demand for and benefits of enhanced airport light rail, bus and related commuter services, (5) encourages multi modal corridor planning and land use considerations between urban areas, (6) allows introduction and integration of "rail gates" on different concourse levels or adjacent to existing gate structures to fully integrate rail and fee up airplane gates, existing gate structures to fully integrate rail and fee up airplane gates, (7) frees up existing airplane gate slots for more profitable airplane departures and increases overall passenger turnover capacity (airport gates typically get two turns per hour with perhaps 250 passengers whereas rail gates could turnover 4 times per hour with perhaps 1,000 passengers), (8) brings airline industry into advocacy for expanded interurban rail infrastructure, (9) increases rail power unit operator revenue by leveraging airline passenger revenue sharing growth and (10) provides another option for air freight and parcel movement. Thank you for taking my comments.</p>	
Mike VanDusen	1/23/2018	Email	<p>I want to bring to your attention a change in property ownership and usage of a tract within the Northwest Transit Center proposed terminal LOO. The property address is 1110 North Post Oak Road. The DEIS shows this property being commercial in usage. The 5.24 acre tract has been purchased by the Awty International School, and is currently being used as the Awty International School Early Learning Center. Please find supporting reference material indicating the change in usage attached to this email.</p>	<p>The Awty International School is discussed in <b>Section 3.13.4, Affected Environment, Land Use</b> and is within the Study Area near the Northwest Transit Center Terminal Option Site.</p>
Mike VanDusen	3/8/2018	Website	<p>While the proposed selection of the NW Mall as a terminal site may be optimal, it will place a burden on secondary transportation infrastructure, as success of the rail service is realized. The same can be said for either of the other two proposed sites. Passengers departing the terminal in rental vehicles or taxis will likely attempt to use North Post Oak Road to access the Uptown area and 110 to reach their ultimate destination of downtown or the energy corridor. Discussions amongst planners have occurred about enhancing North Post Oak to support rapid transit bus service or light rail that is either on grade or elevated. The Overview map on the last page of this comment shows why this is not a good transit solution, for the following reasons: 1. 2. High density residential development started along North Post Oak about 10 years ago. Most has happened over the last 3 years, and is continuing now. The aging commercial properties continue to give way to residential development, since the City of Houston is actively promoting this development in an effort to increase the urban tax base. The administration also sees the proposed terminal location as a linchpin to revitalization of the surrounding area. The seven residential developments identified on the map (SF1-SF7) represents several thousand homes. Some of the homeowners selected the North Post Oak location because of its proximity to the Awty School. Furthermore, Westview is a thoroughfare that terminates at North Post Oak, and provides access to Hempstead and 110/Transit Center for the thousands of residential property owners in the Spring Branch neighborhood. The AWW School has an enrollment of over 1,600 students, and in 2017 expanded their campus by opening an Early Learning Center on the east side of the intersection of Awty School Road and North Post Oak. While this facility targets pre-K to 1st grade students, a gymnasium at the center is used by middle and high school grade students from the main campus, and is accessed by walking along Awty School Road and crossing North Post Oak. Parking at the Early Learning Center is limited, causing teachers and parents attending school functions to park at the main campus garage, and walk to the Center. There are older students who bus to the NW Transit Center, then walk along North Post Oak and Awty School Road to arrive at the main campus. The school currently contracts three Harris County Constables, during drop-off and pickup times at the signal controlled intersection of North Post Oak and Awty School Road, to help facilitate traffic and insure the safety of students on foot. 4. Beth Yeshurun Cemetery is a 17.5 acre Conservative Jewish cemetery founded in the 1920s, with its main entrance at 1017 North Post Oak. The cemetery has been designated a Historic Texas Cemetery by the Harris County Historical Commission (marker id: HR-C096). Traffic wanting to turn south onto North Post Oak, routinely impedes eastbound traffic on Hempstead because of the grade crossing of the freight tracks at the Hempstead/North Post Oak intersection. Any on grade transit connection on North Post Oak between NW Mall and the NW Transit Center would be impeded in a similar manner. North Post Oak seems to be a logical roadway to link the NW Mall with the NW Transit Center, but its long-term use would negatively impact existing and possible future property owners on the street. A wholly elevated transit way in the North Post Oak right-of-way could mitigate some of the impact, but at much greater cost. A better long-term link between the Mall and Transit Center can be found in the 1610 transit corridor shown in the included map. All transit ways in the corridor are elevated above Hempstead and Old Katy Roads so as to avoid the freight tracks and major thoroughfare intersections. One of these transit</p>	<p>Refer to GN-7, SC-8, TR-4 and TR-5. The Beth Yeshurun-Post Oak Cemetery was designated as a Historic Texas Cemetery in 2006. The cemetery is located adjacent to the Segment 5 limits of disturbance at the Houston Northwest Transit Center Terminal Option. Historic cemeteries in Texas are protected under provisions of the Texas Health and Safety Code in Chapters 711-715, Title 13, Part 2, Chapter 22 of the Texas Administrative Code; and in Section 28.03(f) of the Penal Code of Texas which prohibits the use of cemetery property for non-cemetery purposes. Therefore, the cemetery will be avoided and steps will be taken so that no unmarked burials are impacted. In order to confirm that no unmarked burials would be impacted, additional investigations such as archival research, oral interviews, and ground scraping to locate unmarked burial grave shafts, may be undertaken to verify that the modern cemetery boundary is accurate, relative to the area of ground disturbing activities.</p>

			ways is the HOV elevated lanes linking US290 with the NW Transit Center. The 1610 service road and HOV lanes may provide a southbound connection between the Mall and Transit Center when construction is complete. This assumes that TOOT adhered to their preliminary design maps for the US290 expansion. The State Of Texas ownership Of the properties along the west side Of the 1610 corridor makes this a preferred option for linking the two locations. Even if new elevated transit lanes need to be built, the ability to COOP a portion Of the elevated HOV lanes means a shorter new elevated transit way would need to be built. This should be a lower-cost option for an elevated link than a wholly new elevated transit way down North Post Oak that might require right-of-way condemnation.	
Eric Varnado	2/16/2018	Website	I am fully in support of this project in Texas for high-speed rail. I have traveled all over Europe on their high-speed rail systems and it's about time this came to the United States and we're better to start and then Texas! While I do enjoy the Amtrak passenger rail system it is not efficient nor is it speedy it is also very rough and it's ride.	Comment noted.
Sheryl Vasek	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.
Ronald Vaughn	1/29/2018	Email	I would like to receive updates	Refer to PI-1.
Andrew Verity	2/12/2018	Website	I am all in favor of this project. Having lived in Europe most of my life, I am a keen user of public transport for so many reasons. To name a few, it is environmentally friendly, it will get people (including me) from Dallas to Houston safely and reliably on time. Since I live downtown, I could get to Houston efficiently (working on the train), without delays or stress. And once this train is up and running, I hope it will pave the way for many other lines throughout the US. For a country that was built on rail, and compared now to the rest of the world, it is embarrassing that we do not already have any such trains!! Please get this moving forward. Thanks,	Comment noted.
Linnaea Vesny	1/24/2018	Website	This is long overdue. We all can benefit from this train. This bullet train will even help the environment as well. Bring it on! Don't wait!	Comment noted.
James Vick	2/6/2018	Website	This critical link is an essential part of our 21st century infrastructure for Texas. Texan's will continue in increasing numbers to depend on the free flow of people, goods and information that are only available in our major cities. Our state economy will be driven by our expanding urban centers. This high-speed rail connection will help optimize and nurture our cities. This is no "no build" option for Texan's to consider.	Comment noted.
John Vick	3/9/2018	Letter	Dear Sirs: Walton Texas, LP ("Walton") owns and/or acts for all other owners of over 1,200 acres of property in Ellis County, Texas that will be significantly impacted by the construction of the proposed Dallas to Houston High Speed Rail line This letter is submitted in response to requests for comments to the Draft Environmental Impact Statement ("DEIS") for the Project. Walton believes the DEIS fails to adequately consider the Project's substantial negative impacts, including those discussed in this letter. Accordingly, Walton requests that the Final Environmental Impact Statement ("Final EIS") for the Project properly reflect all of the Project's impacts, including impacts on planned land uses. Further, Walton requests that upon analysis Of these additional impacts and comments received from others, that you either revise the preferred route to avoid or minimize these impacts, or you select the "NO Build" alternative. Walton owns an interest in and administers large tracts of land in Ellis County planned for development as master-planned communities. The first property n) is a total Of approximately 894 acres generally located south Of FM 664, north of FM 983, and south and east of Bluff Springs Road. The Bluff Springs North property is planned for single-family homes, multi-family residential units, commercial uses, parkland, open space, and schools. The second property ("Bluff-Springs-South N) is a total Of approximately 313 acres generally located south Of Wester Road, east Of Palmyra Road, and west of Trumbull Road. The Bluff Springs South property is planned for single-family residential, parkland, and open space uses. Despite the assertion in the DEIS (page 3.13-1) that the DEIS considered "existing and planned land uses" and evaluated the compatibility Of the Project with "applicable land use plans," that is not the case with respect to the Bluff Springs properties, and presumably other properties benefited by vested development rights under Texas law pursuant to land use plans. For the same reasons, Table 3.13-17 is inaccurate when	Refer to BA-6, BA-8, LU-9, NE-1, NE-9, PN-3, SC-19 and TC-4. The Draft EIS reviewed specific land use information within a half-mile wide area (a quarter-mile on either side of the HSR track centerline) to establish the context of site-specific impacts. Land use information was collected from existing and approved plans, review of aerial photography and windshield surveys. Additionally, the intensity or density of land use in and along the track area was evaluated and the overall character or harmony of the land use was reviewed throughout <b>Section 3.13, Land Use</b> . Data collection and analysis was completed using the most accurate data available at the time of analysis and in compliance with industry standards and best practices. Bluff Springs has not been platted.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>it reports there is "no conflict" with local land use plans under any of the "Build" alternatives.</p> <p>The Bluff Springs properties acquiral and significant development entitlements obtained before, to Walton's understanding, there was any generally available public inforrnation that a private company would propose to run a privately and operated high speed rail project through the communities planned for those properties.</p> <p>Bluff Springs North is located in the extra-territorial jurisdiction Of the City Of Ferris, and that property is benefitted by a 2013 Development Agreement with the City entered into pursuant to Chapter 212 Of the Texas Local Government Code. The Development Agreement, which is a public document that can be found in the City and County records, provides for the uses included in the master plan for the property, grants other important development rights, and gives rise to vested rights under Chapter 245 of the Texas Local Government Code with respect to the planned community. Bluff Springs South is not subject to the jurisdiction of any city, which provides exceptional development flexibility. In addition, both properties are contained (collectively) within Municipal Utility Districts (MUDs), governmental entities with all the powers and duties provided by the general law of the state of Texas applicable to municipal utility districts created under Section 59, Article XVI Of the Texas Constitution. MUDs substantially enhance both the ability to develop the properties and the ability to realize the full value potential Of the propaties.</p> <p>As it relates to the Bluff Springs properties, to Walton's understanding, the proposed route for the Project does not follow any existing infrastructure right-of-way; accordingly, the route fails to meet one of the three firnctional criteria for the Project. DEIS at ES-2 (environmental criteria of minimal impacts to the natural and built alvironments by maximizing adjacency to existing infrastructure right-of-way). Without limitation, as Walton understands it, the proposed route of the Project the Bluff Springs properties does not follow the existing BNSF rail line or the existing high-voltage transmission line easements (i.e., the so called "Utility Corridor"). DEIS at ES-4.</p> <p>Instead, the proposed route for the Project the Bluff Springs properties runs through areas planned for residential subdivisions, peen space, a park, and a school site. In addition, it appears the Bluff Springs North property would be further burdened by a permanent maintenance access road in addition to the typical minimum 100 foot wide "sealed corridor. It seems that the Project will materially and negatively affect the human, social and natural environment, including the use, enjoyment, and value of the Bluff Springs properties and the properties of othas, by, for example: subjecting future residents to between 68 and 80 train trips a day, 365 days a year; creating a massive physical, aesthaie, and community divide through planned interrupting planned roads and traffic flows; generating unacceptable levels of light, noise, and vibration inconsistent with planned homes, schools, and parks (salsitive land for these types of impacts); raising safety, security and health concerns that will impact the ability to ftlly develop the properties; requiring substantial buffer areas on both sides ofthe planned route; obstructing natural drainage patterns; requiring unusual, and likely extraordinary, adjustments of utility plans; subjecting future residents and other individuals to the noise, light, and other disturbances Of maintenance activities; causing diminished air quality due to a projected increase, for example, in NOx and VOC emissions in Ellis County during estimated construction activities spanning at least four preventing the efficient development of the properties as master planned communities; diminishing the value of the properties.</p> <p>Accordingly, Walton believes the Project fails to satisfy a Federal Railroad Administration key objective to "[a]void, minimize and mitigate impacts to the human and natural environment," DEIS at ES-3, and fails to "avoid or minimize impacts to the socioeconomic, natural, cultural and physical environment." DEIS at ES-7. To the contrary, as to the Bluff Springs properties, the Project will destroy the very fabric of the planned human and natural environments and cause major impacts to the planned socioeconomic, natural, and physical environment of these master planned communities.</p> <p>Further, it seems that the Project will not provide any direct benefit to the future residents of the Bluff Springs properties as there is no station planned for Ellis County where residents can board the high speed rail. Consequently, a future Bluff Springs resident would need to drive over 25 miles to downtown Dallas, navigate the congested downtown area, and find and pay for parking just to have the opportunity to pay an estimated several hundred dollars to travel to a point outside of the downtown Houston area and then find connecting transportation into Houston with the cost and delay associated with these logistics. When considering the time and costs associated with using the proposed high speed rail, it seems unlikely future Bluff Springs residents traveling to Houston will chose the proposed high speed rail option over the approximately 3 hour drive.</p> <p>For all of the foregoing reasons, Walton respectfully requests that the Final EIS be revised to either select a preferred route to avoid or minimize the impacts discussed above, or to select the "No Build" alternative as the preferred alternative.</p> <p>Thank you for your consideration Of these concerns, many Of which Walton believes are common to other property owners that will be impacted by the Project.</p> <p>Sincerely, Walton Texas, LP, a Texas limited partnership, as owner and for and on behalf of all other owners in its capacity as operator, manager or agent, as applicable.</p>

Robert Vickers	2/16/2018	Website	I believe the "bullet train" is highly needed. This is a great alternative to airline travel and should have been considered years ago. I strongly support the development of the "bullet train" and encourage all approvals necessary.	Comment noted.
Christine Vidrick	2/20/2018	Website	I am in favor the high-speed rail, it would be an asset not only for business for leisure as well.	Comment noted.
Mary Viehoefer	3/9/2018	Website	My concerns are many, but mostly I don't understand how a rail line that snakes through the Hill Country is going to directly benefit those in both the Houston and Dallas metro areas. Convenience for the actual ridership is questionable. Price is exorbitant! Do the developers really believe that the average consumer will pay the proposed fare when a flight on Southwest Airlines can be had for far less money? And, not traveling anywhere near IAH is absolutely ludicrous. For those people that are distanced from a major airport hub (both Dallas and Houston), this provides absolutely no benefit for them. In the meantime, you're eating up and extorting land from the true Texans that made our state great. For what? Progress? I, personally, don't call marring our countryside progress. I am absolutely opposed to this venture. I've followed this project from its inception and it progressively gets more and more intrusive. Don't eat up private land for your so-called public benefit. Eminent domain was not intended for that purpose, and the majority of riders that you seem to be courting are the ones who have an abundant amount of cash and seek to crave the thrill of riding on a bullet train. Go to Europe or to Japan if that is their desire. It DOES NOT need to be in our back yard, especially since it will benefit such a minuscule percentage of the population that travels between Houston and Dallas. FYI - I am one of those people that does travel (by car) that interstate route. Daughter that went to UNT and family that lives in Dallas, so I know there is a need - but this is NOT it. Absolutely, this IS NOT the solution. What a mess, and I rue the day if this actually does get built. We will all be sorry. All of us, including the investors - but most especially the landowners who had their property seized and raped for a purported public benefit.	Refer to BA-12, ED-1, GN-2, GN-4, NE-1, PN-3, SC-3 and SC-19.
Larry Villa	1/25/2018	Email	I support the Bullet train 100 percent. What I find lacking at the final Houston destination is a Central Station in Downtown. The train station being planned is in an area bounded by the Katy Freeway, 290 and the West Loop. Three if the state's and nation's most congested freeways. The Northwest Mall station, as with the other two planned location sites are in an area that is far away from Downtown, MidTown and the Texas Medical Center. These means that it will take extra time and money to catch a taxi, bus or uber to these destinations. Why not make the Northwest Mall train station connect with the Southern Pacific tracks in front of the mall to Downtown Houston. The line goes straight into Downtown with an existing train station now being used by Amtrak behind the now abandoned US Post Office. The air or right if way rights could be purchased or leased to construct an elevated bullet train tracks into Downtown.	Refer to GN-6, GN-7 and TC-4.
Larry Villa	1/29/2018	Email	Dallas is putting it's train station South of it's Downtown. Houston is putting it's train station in a rundown area surrounded by three of the state's most congested freeways and intersections. The Katy Freeway, The West Loop and 290 area next to an abandoned mall. While this location might be great for people going to the Energy Corridor or Uptown, it's not so great for those going to Downtown, Midtown and the Texas Mex Center. In addition to this location a Downtown station is mesmerizing existing Southern Pacific right of way above the tracks into Downtown. The track station is already there, by buying or leading the air rights for an elevated track into Downtown, both entities can build a new, bigger train station right behind the Old post office. This Downtown location connects to all light rail lines, bus routes, park and ride, uber and taxis and Downtown troll system.	Refer to GN-6, GN-7, NE-1, TR-4 and TR-5.
Larry Villa	2/6/2018	Website	While the Northwest Mall station is good for commuters in the Energy Corridor and Uptown area. It is not a viable location for commuters going Downtown, Midtown, The Texas Medical Center or destinies beyond. The infrastructure is already in place to extend the Texas Bullet into Downtown Houston. They are already going to use the air rights of Southern Pacific to build the viaducts from Waller County to the Northwest station. Houston really needs two stations, the main one Downtown. The now abandoned US Post Office parcel of land would be a perfect location for hotel, condos, high-rise apartments, retail and entertainment venues. The Amtrak station is there already and a new station could be built that would benefit the Texas Bullet train investors and Amtrak. A downtown station already has connecting light rail lines, all the bus routes, the trolley system plus taxi and uber central locations. The connecting viaducts would be built over the existing Southern Pacific rail tracks going into Downtown. I hope the Texas Bullet Train investors look into building a second Central location for Houston.	Refer to GN-6, GN-7, NE-1 and TC-4.
Larry Villa	2/27/2018	Website	The NW Mall location would be good for passengers going to Uptown or Energy Corridor, the preferred location for the majority of passengers would be a Central Downtown location. The developers want to make money developing the area. Downtown already has a prime location behind the old abandoned U. S. Post Office. The tracks the Bullet Train will use from Waller to NWMall already exist going into Downtown as well. Why can't Houston have two stations like most European and World cities. Amtrak has a small outdated train station already behind the abandoned U.S. Post Office already. The whole parcel of land is perfect for development of apartments, condos, hotels, retail and entertainment venues. Bullet Train Developers will have a better chance in developing that tract of land where all light rail lines meet, all the bus lines and heavy presence of taxis and uber. Not to mention all the major hotels, restaurants, clubs and entertainment venues. The preferred location for most passengers around the world is a Central Downtown location. Downtown would be great for passengers going to	Refer to GN-6, GN-7, TC-4 and TR-4.

Julie Villaescusa	1/16/2018	Email	Third comment test	Comment noted.
Julie Villaescusa	1/16/2018	Email	Where did the ridership numbers of 5 million and 7.2 million come from? What is the FRAS basis for these numbers?	Refer to GN-2 and NE-1.
Julie Villaescusa	1/17/2018	Email	I did not get a response email so I'm repeating my question: Will Texas Sales Tax be charged on Tickets for the HSR?	As of 2020, there are no Texas state laws providing a mechanism for charging a sales tax on TCRR ticket revenue. Ticket revenue may inform the level of corporate taxes assessed; however, corporate tax revenues are subject to fluctuate with tax rates, TCRR revenue, as well as state corporate tax law structures. As such, it is not included in the estimated tax impact reported in the Final EIS <b>Section 3.14.5.2.3, Socioeconomics and Community Facilities, Economic Impacts</b> . The Final EIS has been updated to remove revenue calculations based on ridership and ticket price. The tax revenue estimate provided in Section 3.16.5.2.3 of the Final EIS conservatively reflects only those impacts associated with capital investment, employment, and property tax impacts. More information about tax revenue calculation methodology is available in <b>Section 3.14.3, Socioeconomics and Community Facilities, Methodology</b> .
Julie Villaescusa	1/17/2018	Email	The DEIS states Texas Sales Tax will be paid on Tickets. Is this true? Julie Villaescusa	1/19/2018	Email	Good afternoon Kevin, I'm trying to find the "TCRR ridership and revenue report" which is quoted in the DEIS as source for many important data items, such as ridership. Here is a sample quote from Appendix F: According to the TCRR ridership and revenue report: "The majority of Dallas ridership starts/ends in the Downtown area, which is where many businesses are located, and Tarrant [County], which is one of the largest residential zones." Dallas County is shown in dark grey below. The detailed distribution of trips is presented below. The TCRR ridership and revenue report also notes that this opening day distribution "stays reasonably constant through time." I really question the accuracy of the ridership numbers in this report and would like to view this source document. I appreciate you pointing me to this document.	Refer to GN-2.
Julie Villaescusa	1/29/2018	Email	Page 3.14-26 bad link in footnote 15 Texas Central Railway, www.TexasCentralRail.com/Facts (accessed June, 2016) \$2.46 B	The Final EIS has been updated to reflect TCRR's 2019 tax revenue projection of \$2.5 million, and source link: <a href="http://www.texascentral.com/facts">www.texascentral.com/facts</a> .
Julie Villaescusa	2/5/2018	Oral	Hello. My name is Julie Villaescusa, I'm from Houston, and I'm against the proposed high-speed rail. Texas Central has cast doubt on the numbers in the DEIS. How can we, the public, evaluate this document if the numbers are not correct. The DEIS says that the average airfare between Houston and Dallas is \$199. The DEIS also uses this as the average ticket price on the proposed high-speed rail. However, Texas Central claims on their website that the average \$199 high-speed rail ticket price published in the DEIS is a rumor and that the reality is, well, who knows. From their website--rumor: Ticket prices are prohibitively expensive. I read in the DEIS that Texas Central is going to charge \$199 for a one-way ticket. This is going to be a train for rich people. Under reality Texas Central states that the fares used for the purposes of the DEIS were not developed by Texas Central. Texas Central goes on to say that average air fair is \$147. They never actually give an average ticket price for the proposed high-speed rail. Why does the DEIS state that the average one-way airfare between Houston and Dallas is \$199 and Texas Central claim it's \$147? That's a difference of \$52. That's over \$100 round trip. It's worth noting that the DEIS does provide a link to a website that shows average one-way airfare between Houston and Dallas is \$199 while Texas Central has no back-up for their number. The \$199 average ticket price is not inconsequential, as it is used to calculate expected sales tax impacts in the DEIS. The table annual ticket revenue impacts for all build alternative shows an annual local sales tax collection of approximately \$20 million. The DEIS explains this should be split between Houston and Dallas at \$10 million each. This is so important that on Texas Central's website they posted under the heading, "The DEIS findings on the North Texas bullet train stations' many economic benefits", they say \$10 million estimated local sales tax produced from the train's ticket sales in Dallas County is one of only three bullet points. Texas Central is simultaneously saying that Dallas County will receive \$10 million in sales tax calculated at an average of \$199 a ticket, and saying that \$199 a ticket is a rumor and not reality. If the average ticket price is less than \$199, then the sales tax also falls. Texas Central can't have it both ways. If the \$199 train ticket price is a rumor, then the \$10 million in sales tax for Dallas County is an even bigger rumor. An ethical company would not promote data they say is false. An ethical company would provide corrections for all the errors in the DEIS. I have no confidence in either the DEIS or Texas Central. The only option is no build.	Refer to GN-2 and SC-3.
Julie Villaescusa	2/13/2018	Email	Texas Central also disputes the \$199 average airfare the DEIS uses, and says the average airfare is \$147. However, while the DEIS provides a source for the \$199, Texas Central provides no source for their number. At the press conference announcing the preferred Houston Station location, a Texas Central official said that the proposed HRS's ticket price would be sort of an average of 2/3 of airfare. At 2/3 of \$147, the average HSR ticket price would be \$98, or less than half of \$199. Plugging \$98 into Table 3.14-22 will reduce the calculated sales tax revenue by more than half. Texas Central touts the sales tax revenue computed in Table 3.14-22 on their website. Under the heading "The DEIS findings on the North Texas Bullet Train Station's many economic benefits:" they state: "\$10 million – Estimated local sales tax produced from the train's ticket sales in Dallas County." Directly under that they urge people to contact FRA about the DEIS. The \$10 million is calculated using \$199 HSR average ticket price. Patch.com says "[Mayor] Turner said the privately-funded project will nit [sic] cost the taxpayers, but rather the city will benefit from the sales tax — projected at \$12 million a year." Is this number also calculated using an average \$199 HSR ticket price? This is not insignificant. Elected officials and the public both may be influenced by the projected sales tax revenues. It is unethical for Texas Central to simultaneously tout the results of a calculation that uses the \$199 average ticket price and say that the \$199 ticket price is a "rumor". FRA should immediately issue a result of NO BUILD due to Texas Central's lack of ethics. Barring that, FRA should require that Texas Central not only fix the numbers in Table 3.14-22 but all items in the DEIS that they say are incorrect - an errata sheet should be provided - only then should the 60 day period re-start and public meetings should be re-held.	Refer to GN-1, PI-1, SC-3 and SC-17.
Julie Villaescusa	2/14/2018	Email	Texas Central displayed a video with this graphic at the Harris County public meeting (most likely all public meetings) on the proposed HSR: --- --- This video is also on their Facebook page and has, as of now, 29,000 views. This information comes from the DEIS, page 3.14-29: "As shown in Table 3.14-22, HSR ticket sales could generate between \$15 billion and \$39 billion in sales tax for the state plus \$5 billion to \$12 billion in local tax revenue." As flawed as Table 3.14-22 is, it does not show that "HSR ticket sales could generate between \$15 billion and \$39 billion in	Refer to AQ-3 and SC-3.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>sales tax for the state plus \$5 billion to \$12 billion in local tax revenue". According to Table 3.14-22, it would take 694 years to reach \$39 billion in sales tax for the state. This is absurd. This is a simple math issue. If the people creating the DEIS can't do math, then every number in the DEIS is called into question. This is not a minor error. If it were insignificant, it would not be in Texas Central's video. Members of the public and public officials both could very well be influenced by the state of Texas getting \$39 billion in sales tax revenue. The DEIS and the DEIS comment period are fatally flawed. FRA should immediately issue a decision of NO BUILD.</p>	
Julie Villaescusa	2/14/2018	Email	<p>The "Dallas to Houston HighSpeed Rail Draft Environmental Impact Statement" dated December 2017 uses Texas Central's proprietary documents as a basis for ridership. Texas Central refuses to release these proprietary documents. These documents are described in the DEIS as the "proprietary market demand study undertaken by TCRR" and the "TCRR ridership and revenue report". This is not open government. The FRA could have chosen several different public documents, such as the Reason Foundation's February 2017 report "Texas High Speed Rail: Caution Ahead", or TxDOT's December 2013 "Statewide Ridership Analysis Report: Statewide Analysis Model—Version 2.5" for ridership numbers. Why did they choose a proprietary report instead? The proprietary report is an extreme outlier, with 7.2 million riders per year, compared to Reason's 1.4 million and TxDOT's 700,000 to 2.7 million. The ridership numbers are not unimportant as they inform such things as reduction of vehicle miles traveled (VMT) which informs emissions calculations.</p> <p>Using Texas Central's proprietary documents, the DEIS says 14,630 cars per day will be taken off the road. Using Reason's numbers only 816 cars per day would be taken off the road. The proprietary report's ridership numbers give 18 times the number of cars per day taken off the road as using publicly available numbers. The emissions removed and reduction in traffic could inform many people's opinion of the HSR, both members of the public and public officials.</p> <p>Another instance the DEIS uses ridership from the proprietary report is calculating sales tax revenue. The DEIS states \$20 million a year for Houston and Dallas combined. Based on the DEIS table 3.1422, this number could be overstated by 2.5 to 10 times, compared to publicly available sources. This could easily influence both the public and public officials. Additionally, Texas Central is saying the \$199 average fare is a "rumor" (implying it will be lower but not saying what the average train fare will be) used to calculate the sales tax revenue while simultaneously promoting the sales tax revenue of \$10 million for Dallas. This is unethical.</p> <p>Another private project, All Aboard Florida, does include a ridership and revenue study in its DEIS Appendix 3.3 F Ridership and Revenue Study Summary. FRA cannot use a secret, proprietary report as its basis for ridership in the DEIS. This is not open government. If Texas Central wants to keep its ridership and revenue report secret, that's fine, but the DEIS must use another source for ridership and revenue. As a result, the DEIS is fatally flawed and must be rescinded. FRA should immediately issue a decision of NO BUILD.</p>	<p>Refer to GN-2 and GN-3.</p> <p>The analyzed incorporated data derived from a project specific travel market-based survey that TCRR commissioned to be independently done. The TCRR forecasted annual ridership of 4.4 million and 7.2 million for 2024 and 2040, respectively, represent averages of occupancy of 44 percent and 62 percent given the planned service levels of 68 and 80 trains per day with trainsets of a 400-passenger capacity. Insofar as calculating associated vehicle emissions reductions, the ridership was physically plausible with the planned level of service and car capacity. With respect to concerns of unrealistically high train occupancy leading to overestimating the vehicle removal emissions benefits, other high speed rail planning literature did not indicate these projections to be either extremely optimistic or pessimistic. Studies of the environmental impact of different travel modes by University of California at Berkeley considered high/low occupancy rates to be 90/10 percent for high speed rail, and 110/25 percent for rail in general for averages of 50 percent and 67 percent, respectively. High speed rail price studies in Spain, which had been experiencing low HSR occupancy rates compared with other European Union countries, used 60 percent as an average planning basis, or cited 66 percent as actual average occupancies targeted for increase through pricing. The TCRR occupancy rates appear to be neither overly optimistic nor pessimistic.</p>
Julie Villaescusa	2/17/2018	Email	<p>Texas Central displayed a video with this graphic at the Harris County public meeting (most likely all public meetings) on the proposed HSR: ---                      --- This video is also on their Facebook page and has, as of now, 29,000 views. FRA should immediately issue a decision of NO BUILD.</p>	<p>Refer to AQ-3 and SC-3.</p>
Julie Villaescusa	2/18/2018	Email	<p>Texas Central is still spreading the manure from the DEIS that the HSR will generate \$15-\$39 Billion in sales tax revenue from ticket sales on its website AND telling people to comment on the DEIS Even if every number in the DEIS's Table 3.14-22 were correct (big hint: they are not), it would take over 600 years to reach \$39 billion in sales tax revenue. This process irretrievably broken. The DEIS must be scrapped and FRA must immediately issue a decision of NO BUILD.</p>	<p>Refer to SC-3.</p>
Julie Villaescusa	2/19/2018	Email	<p>From the DEIS: "For the air quality emissions estimation at the full-service level (2040) scenario, the annual ridership of 7.2 million passengers, existing 89 percent share of people using passenger cars to travel between Dallas and Houston and average passenger occupancy of 1.2 passengers per car were then used to calculate the number of annual car trips of 5,340,000 cars per year. It should be noted that this number of vehicles that would no longer travel IH-45 between Houston and Dallas would equate to 14,630 vehicles per day, or about 14 percent of the 2035 annual average daily traffic of 106,475 vehicles per day projected in transportation planning documents for this corridor."</p> <p>The DEIS reverse engineers the number of cars taken off the road due to car drivers and passengers taking the train using a 1.2 passenger per car average occupancy. Where does this number come from? It seems the DEIS pulled this number out of the air. While Appendix F does use a</p>	<p>Refer to AQ-3, AQ-4, GN-2 and GN-3.</p>

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>1.2 passenger per car average occupancy, that is for traffic going to train stations, not traffic between Houston and Dallas.</p> <p>Using a 1.8 average occupancy (as the Reason Foundation report "Texas High Speed Rail: Caution Ahead" from February, 2017 does), and keeping all the other numbers the same, the number of cars taken off the road would be 9,753 a year, or 33% fewer cars taken off the road. This it itself would cause all of the emissions calculations to be flawed.</p> <p>None of the calculations based on the 7.2 million riders can be verified, as the 7.2 million ridership number itself can't be verified.</p> <p>There is no way to know what average passenger occupancy went into the 7.2 million ridership number, as the FRA is using a proprietary, secret document to get the ridership number. Was it 1.2? Was it 1.8? Is the 7.2 million riders even based on cars on the road? This is not open government. The DEIS and the public comment process is fatally flawed and the DEIS should be scrapped and a decision of NO BUILD should be issued immediately.</p>	
Julie Villaescusa	2/21/2018	Website	<p>Texas Central is quoting the DEIS in stating that 14,630 vehicles per day will be taken off the road. This not only unbelievable, it is calculated using Texas Central's proprietary (secret) data of 7.2 million passengers per year. Texas Central is promoting this incredible number while asking people to comment on the DEIS. Based on TxDOT's projected traffic on I45 in 2035, 14,630 vehicles per day would mean a 61% diversion rate from cars to HSR. This is simply absurd. The diversion rate predicted for the HSR is 5%, not 61%. This is not open government. The DEIS must be based on publicly available data, not secret and false Texas Central ridership reports.</p>	Refer to GN-2, GN-4 and PN-3.
Julie Villaescusa	2/21/2018	Email	<p>The DEIS does not mention whether or not guns will be allowed on the HSR. Texas is an open-carry state. Will sidearms be allowed? What about transporting hunting rifles or other long guns? Will that be allowed on the train? Passengers will always have access to their luggage, will people be able to pack guns in their luggage? If guns will not be allowed, how will that be prevented?</p>	Refer to SS-9. Specific screening procedures regarding firearms will be developed through the System Security Plan.
Julie Villaescusa	2/22/2018	Email	<p>"As shown in Table 3.14-22, HSR ticket sales could generate between \$15 billion and \$39 billion in sales tax for the state plus \$5 billion to \$12 billion in local tax revenue." DEIS p 3.14-29 This is complete and utter nonsense.</p> <p>As you can see from Table 3.14-22, the Annual State Tax Impact calculated is \$56,166,750. While this seem like a lot, \$39,000,000,000 / \$56,166,750 = 694.36 years. This would be almost almost SEVEN CENTURIES of tax revenue. Tax revenues measured over CENTURIES? No, this is not how things are done. This misinformation has been widely shared by Texas Central, including on a loop video at the 10 public open houses held by the FRA. This misinformation has been shared by Texas Central on their Facebook page where it has been viewed at least 29,000 times. This misinformation has been shared by Texas Central on their website, on the same page where they ask people to contact the FRA in favor of the HSR project. The fact that Texas Central hasn't caught this error is telling, especially since in other places they state the tax revenue will be \$2.5 billion. <a href="https://www.texascentral.com/rumors-vs-reality/taxes/">https://www.texascentral.com/rumors-vs-reality/taxes/</a></p> <p>Although Texas Central has been promoting the \$2.5 billion figure for years, the fact is, neither the \$39 billion nor the \$2.5 billion figure is correct. A smart company would have caught the error. An ethical company would have exposed the error. Texas Central is neither, which is why they are widely promoting the error. As a result, the DEIS public comment process is fatally flawed. The DEIS itself is fatally flawed. I don't understand why the FRA has not rescinded the DEIS. The only option is NO BUILD!</p>	Refer to SC-3.
Julie Villaescusa	2/25/2018	Email	<p>As shown in an email I sent dated 2/25/2018 and with a Subject of "Texas Central HSR DEIS - VMT Removed Doubled - NEPA Clean Air Act Issue", AECOM has doubled the VMT removed in the DEIS. This has an effect of doubling the Total Fuel Saved (000s) [gallons] shown in Table 3.9-19: Annual Operation Energy Savings Estimate. The 2,553 VMT (Million) shown in the table was calculated using Round Trip Distance (miles) based on the number of cars going one-way, which doubled the VMT. The formula used was "Round trip distance X cars/year = VMT" when it should have been "One way distance X cars/year = VMT". According to the other data in the chart, using the VMT (Million) (based on other data in the DEIS) of 1,276 VMT (Millions) would result in 40,775 (000s) [gallons], or 40.8 million gallons, which is half of 81.5 million gallons. This is so important that Texas Central used the doubled figure in the video that they have shown at all 10 public meetings, that has been viewed at least 29K times on their Facebook page and that they have on their website on the same page where they urge people to contact the FRA about this project:</p>	Refer to AQ-14.
Julie Villaescusa	2/25/2018	Email	<p>The DEIS has doubled the Vehicle Miles Traveled (VMT) removed that they use for the emissions calculations. AECOM uses their calculation of cars per year taken off the road and then inexplicably multiplies that by the number of miles in a ROUNDTRIP between Houston and Dallas. This is a major mistake, as VMT affects emissions calculations. Notwithstanding the fact that the 7.2 million riders is wrong, and the 1.2 passengers per vehicle is probably wrong; here is what they do:</p> <p>They take the 7.2 million riders (which includes all the riders, if I go to Dallas and come back 2 days later, I am 2 of the 7.2 million - THIS IS IMPORTANT!)</p> <p>Then multiply by .89 because they say car passengers make up 89% of the existing market to get the number car passengers diverting to the train</p> <p>Then they divide by 1.2 passengers by car to get the number of cars taken off the road per year like so:</p>	Refer to AQ-3.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>7,200,000 * .89 = 6,408,000 passengers diverted from cars per year  6,408,000 / 1.2 = 5,340,000 cars removed from road per year  So we get 5,340,000 cars per year taken off the road. This is the total, a single roundtrip would make up 2 of the 5,340,000 cars (You can divide the 5,340,000 by 365 to get the 14,630 cars per day taken off but we don't need that for this - just showing what the number is.) SO to get VMT removed, you would multiply 5,340,000 cars per year by the 239 miles between Dallas and Houston, like so:  5,340,000 * 239 = 1,276,260,000 VMT removed.  BUT then they do this: "Because IH-45 is the principle and practical route used for Dallas-Houston travel, a city center-to-city center distance of 239 miles was assumed for the trip distance. Consistent with the average length of stay assumption of two days (see Appendix F, TCRR Conceptual Engineering Design Report), temporary stays with round trips back to the origin was assumed. The round trip distance and calculated cars/year were used to calculate the VMT that would have been traveled in the absence of the Build Alternatives, as shown in Table 3.2-4.  Round trip distance X cars/year = VMT" And they come up with a total of 2,552,520,000 VMT. Or double. Because the 7.2 million riders already counts a roundtrip as 2.  pages 3.2-13 to 3.2.14 in the DEIS</p>	
Julie Villaescusa	2/25/2018	Email	<p>Did AECOM even have access to Texas Central's secret ridership report? The hoops they jump through to come up with their incorrect calculations make me think that AECOM didn't review the secret report at all, and were only told there would be 7.2 million riders per year. This is awful. What a waste of everyone's time and resources to produce the horrible DEIS. What a shame that so many Texans have had this awful project hanging over their heads for years and years. How much development has been suppressed in path of this monstrosity? How much stress has been forced on families?  The FRA needs to immediately issue a decision of NO BUILD and tell AECOM and Texas Central to go away and never bother Texans again.</p>	Refer to GN-2 and NE-1.
Julie Villaescusa	3/1/2018	Email	<p>Texas Central is giving away 2 toy trains in a kind of raffle to people who comment on the HSR from their website. This is bribery. Please discount any comments from their website to you. Thanks,</p>	Refer to PI-4.
Julie Villaescusa	3/2/2018	Email	<p>Hi Kevin, Texas Central has this form letter that people can send from their website. It ends:  "As an electric train, this system will also be the best environmental alternative as 4 of the counties served are already air quality non-attainment status.  This innovative new industry reduces road congestion, improves local economies and creates new jobs for Texans. I welcome a faster, safer and cleaner transportation alternative to reduce congestion because it's good for Texas!" However, this is all in great doubt, and emissions may actually increase in the non-attainment counties. The DEIS uses this to obtain the 5,340,000 cars trips per year removed:  "For the air quality emissions estimation at the full-service level (2040) scenario, the annual ridership of 7.2 million passengers, existing 89 percent share of people using passenger cars to travel between Dallas and Houston and average passenger occupancy of 1.2 passengers per car were then used to calculate the number of annual car trips of 5,340,000 cars per year. It should be noted that this number of vehicles that would no longer travel IH-45 between Houston and Dallas would equate to 14,630 vehicles per day, or about 14 percent of the 2035 annual average daily traffic of 106,475 vehicles per day projected in transportation planning documents for this corridor." DEIS p 3.2-13 Why would AECOM be reverse engineering these numbers anyway? Did they not have access to the secret ridership report? The 7.2 million riders per year is in huge doubt. Reason states 1.4 million; TxDOT between 700,000 and 2.7 million. 7.2 million is way out of line.  Why use the 89% existing share in the calculation? Surely millions of the 7.2 million riders are induced. How else would the number be so high?  Why use 1.2 passengers per car? 1.2 passengers per car is used in Appendix F, but that is people going to the station, not between Dallas and Houston. Surely to get to 7.2 million riders, the cars would have to be crammed full. For example, Reason uses 1.8 riders per car. Just changing this variable, the cars per year is taken down to 3,560,000. No one knows what the secret ridership report used - one of the many reasons the ridership report should not be secret. All Aboard Florida had a ridership and revenue study as an appendix to its DEIS.  THEN the DEIS uses roundtrip miles on every emissions calculation. This is wrong, as the 7.2 million riders contains all the trips - a roundtrip would count as 2. The VMT (vehicle miles traveled) is doubled on every calculation, rendering every calculation wrong and useless. The only thing the DEIS "confirms" is that AECOM should be fired and the DEIS trashed.</p>	<p>Refer to GN-2 and GN-3.  The cars removed figures were calculated based on TCRR ridership numbers, trip assumptions, and vehicle occupancy for the Final EIS. The average passenger occupancy of 1.2 passengers/car was a separately used figure employed for planning the station capacity for parking and accommodating riders arriving by various modes of passenger vehicle (i.e. car, taxi etc.) travel to the station and was commensurate with average occupancy used in State transportation planning at the time the Draft EIS was developed. Conceptually this would reflect the numbers of passengers dropped off that would otherwise be using cars, for the share of travel mode that would be using cars without the HSR (89%). Because this was project-specific it was adopted. This is consistent with what was used in state transportation planning (1.25) [Texas A&amp;M Transportation Institute Report PRC 15-40 F, Methodologies Used to Estimate and Forecast Vehicle Miles Traveled (VMT), July 2016 ]. Actual surveyed vehicle occupancy in the state had been falling below 1.2, including in the Dallas-Fort Worth area, as indicated in the sources with state vehicle occupancy rates. A state-specific vehicle occupancy rate was updated only in late 2017 after issuance of the Draft EIS was initiated. This information, used for estimating roadway user delay costs, recommended a revision of the previous rate of 1.2 to 1.5 based on newer national survey data.</p>
Julie Villaescusa	3/3/2018	Email	<p>Frankly, AECOM needs to prove their errors aren't fraud. Funny how all these errors we've uncovered makes the emissions or tax benefits look good.</p>	Refer to NE-1.
Julie Villaescusa	3/7/2018	Website	<p>The DEIS states: "Additional sales tax revenue would result from the sale of tickets for travel on the new HSR system on an annual basis while it is in operation. As shown in Table 3.14-22, HSR ticket sales could generate between \$15 billion and \$39 billion in sales tax for the state plus</p>	Refer to GN-2 and SC-3.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			\$5 billion to \$12 billion in local tax revenue. Local sales tax is assumed to be collected at the point of sale, roughly split between Dallas and Houston jurisdictions.17 Tax revenue for ticket sales would be identical for all Build Alternatives." Notwithstanding that it would take almost SEVEN CENTURIES based on Table 3.14-22 to reach \$39 billion in sales tax for the state, that 7.2 million riders is way overstated, and the Texas Central says that the \$199 is a "rumor" and not a "reality", Texas does not levy sales tax on transportation. There is no sales tax on airfare, so those numbers in Table 3.14-22 are also wrong. Since Texas does not levy sales tax on transportation, and the proposed HSR is transportation, there is no reason to believe that there would be sales tax on HSR tickets. Therefore, HSR ticket sales could generate \$0 for the state in sales tax, and \$0 in local taxes. Texas Central has touted the \$15 to \$39 billion in state sales taxes on ticket sales in a video that was shown at the FRA's public meetings on the HSR, on Facebook and their website where they asked people to comment to the FRA. Both the DEIS and the DEIS public comment period are fatally flawed. The DEIS should be scrapped and a decision of NO BUILD issued.	
Julie Villaescusa	3/7/2018	Email	The section "Permanent Impacts: Property Premiums" that starts on page 3.14-30 appears to be just a bunch of nonsense. They say property values very near the proposed station locations will increase in value. The DEIS states: "Studies have shown a positive effect between residential and commercial property values and rapid rail/commuter transit in Washington D.C., Atlanta, New York City, San Francisco, Boston, Los Angeles, Philadelphia, Santa Clara County, Portland and San Diego. Rapid/commuter rail systems had a wider sphere of influence for positive land premiums around stations than light rail transit. This is attributed to higher speeds and greater regional access.18 The HSR system would operate at even higher speeds and provide a connection between the two most populous cities in Texas, so it is assumed that property values around station areas would have a similar positive impact." DEIS p 3.14-30 This is based on the report "THE EFFECT OF RAIL TRANSIT ON PROPERTY VALUES: A SUMMARY OF STUDIES". <a href="http://www3.drcog.org/documents/archive/The_effect_of_Rail_Transit_on_Property_Values_Summary_of_Studies1.pdf">http://www3.drcog.org/documents/archive/The_effect_of_Rail_Transit_on_Property_Values_Summary_of_Studies1.pdf</a> This report is about TRANSIT - or rail you would take to work, not rail you would take to a city 240 miles away. While there may be nothing wrong with this report, the report has zero to do with the proposed High-Speed Rail. This report contains statements like "Average home prices decline by about \$2,300 for every 100 feet further from the station areas." when talking about Rapid rail: New York City MTA or "1990 single family home prices decline by \$1.00 to \$2.00 per meter of distance from a BART station in Alameda and Contra Costa Counties" when talking about Rapid rail: BART in San Francisco. They are measuring in meters and feet because they are talking about people walking to a transit stop and going to work. This is just pathetic.	As noted in <b>Section 3.14.3, Socioeconomics and Community Facilities, Methodology</b> , the analysis of property premiums around stations relies on literature documenting the effects of traditional mass transit, as there are currently no studies documenting the effects of high-speed mass transit. Although not an exact replication of the technology proposed for the Project, the primary factors which can influence property values, such as presence or lack of hazardous freight cargo, noise and vibration effects, and the activity generated at a station area, would be of a similar nature. It is correct that traffic volumes would likely be higher around high speed rail stations as compared to traditional rail transit projects. However traffic volumes are positively correlated with property premiums, as more activity would be generated for businesses near the station area. Refer to TR-5 and TR-12 for more regarding traffic congestion and access to stations. The analysis of property value impacts around station areas only includes a growth rate based on current land uses, and does not speculate regarding potential conversion of property to higher productivity uses. Positive property tax impacts are likely to exceed Final EIS estimates as a result of additional build-up around stations.
Julie Villaescusa	3/8/2018	Email	Here is more information on the doubling of the VMT which affects all of the emissions calculations in the DEIS. The following chart from the DEIS at first glance might seem to correct the doubling of the VMT as they divide the 5,340,000 cars between Dallas and Houston (the numbers circled in red): (See attached PDF) BUT then they count the miles 4 times: 1) Dallas vehicle travel miles leaving for Houston 2) Dallas vehicle travels miles returning from Houston 3) Houston vehicle miles arriving 4) Houston vehicle miles departing To end up doubling the VMT for the DFW NAA. The same thing happens for the HGB NAA: (See attached PDF) The HGB NAA has another issue, the Harris County miles aren't to the city center, but are more than to the city center. The DEIS is fatally flawed. These calculations are directly tied to the Air Quality calculations, which is a component of NEPA. The DEIS should be scrapped and the FRA should immediately issue a decision of NO BUILD.	Refer to AQ-2, AQ-3, AQ-12 and AQ-13.
Julie Villaescusa	3/8/2018	Email	The DEIS is fatally flawed. The GHG Calculations are wrong due to doubled VMT (vehicle miles traveled) removed. "The net GHG emissions were then determined by adding the train operation emissions and vehicle emissions reduction. Table 3.21-6 provides the result. As shown, the net impact would be a reduction of 0.417 million metric tons annually. Compared to the most current (2013) state-level GHG annual emissions estimate of 641 million metric tons, the reduction would be a small percentage. However, this would be a long-term reduction. Therefore, the Build Alternatives would have a small, but long-term positive effect on GHG emissions. Though the impact is small compared to state annual emissions, the net reduction of 0.417 million metric tons per year is greater than the maximum annual construction emissions of 0.136 million metric tons. Therefore, the total construction emissions over 4 years at a maximum of 0.136 million metric tons per year would be offset by operational net reductions of 0.417 million metric tons per year within less than 2 years at full operation."	The passenger trip assumption associated with the ridership used was clarified with TCRR to mean one-way travel, and VMT and greenhouse gas (GHG) emissions recalculated with this correction. This change halved the VMT, and associated CO2eq reduced by HSR use, but there was still a net reduction. The overall operational CO2eq emissions with the revised assumption show a net reduction of 64,350 metric tons annually that in several years of operation, would still offset those produced during construction.
Julie Villaescusa	3/8/2018	Email	NO BUILD IS THE ONLY OPTION Earlier in the process, Economic Viability was used to remove entire corridors from consideration. The FRA allowed economic viability to trump all NEPA requirements such as the Clean Air Act, Historic Preservation, Economic Justice - which includes protections for minority communities, and Noise and Vibration. Then the FRA removed Economic Viability from the DEIS, even though no proof of Economic Viability	Refer to BA-6, GN-3, NE-1, NE-9 and PN-4.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>was ever provided. In fact, the Reason Foundation report " Texas High Speed Rail: Caution Ahead" from February of 2017 states that the project, regardless of alignment chosen, will lose over \$500 million a year. The DEIS says that "The No Build Alternative would not meet the specified Purpose and Need for this Project".</p> <p>The DEIS says that "The purpose of the privately proposed Project is to provide the public with reliable and safe high speed passenger rail transportation between Dallas and Houston."</p> <p>The DEIS lists THREE functional criteria to support the Purpose and Need:</p> <ul style="list-style-type: none"> <li>• Technological: bullet train vehicle and operating procedures based on the N-700I Tokaido Shinkansen system</li> <li>• Operational: approximate 90-minute travel time between Dallas and Houston, with achievable speeds exceeding 200 mph in a fully sealed corridor</li> <li>• Environmental: minimal impacts to the natural and built environments by maximizing adjacency to existing infrastructure ROW"</li> </ul> <p>So basically use a particular brand of train that should take a certain amount of time and the route selected should have minimal impacts compared to other routes studied.</p> <p>You could make up a Purpose and Need statement for any project anywhere and declare that NO BUILD doesn't meet the Purpose and Need statement because the Purpose and Need is to build the project.</p> <p>However, The Step 1 Screening of Corridor Alternative Report which was created before the DEIS and used to select the Utility Corridor, says that "The purpose of the privately proposed Project is to provide reliable, safe, and economically viable passenger rail transportation using proven high-speed rail technology between Houston and Dallas."</p> <p>The difference between the two statements is that the Step 1 Report includes "economically viable".</p> <p>In the Step 1 Report, there is a FOURTH item listed to "support the Project Purpose and Need of the Project":</p> <p>Economic: Achieve a favorable return on investment when weighing expected ridership and revenue against estimated project capital investments, real estate requirements, project delivery schedule, and long-term operations and maintenance expenses.</p> <p>Tim Keith, the CEO of Texas Central prepared a list of Frequently Asked Questions attached to the Step 1 report. In this he says "Additionally, the FRA must carry forward potential corridor alternatives that meet the Project's purpose and need, which includes the requirement that the project be "economically viable." As such, the various elements of the project's construction, including those directly impacting overall cost and the Project's impact on the human and natural environment must be considered at this and future stages of the EIS. "</p> <p>This criterion was used in the Step 1 Report to eliminate at least one proposed corridor from further study because it was "financially unviable".</p> <p>The Reason Foundation Report "Texas High Speed Rail: Caution Ahead" concludes that the project will lose over \$500 million dollars a year. There is nothing in the DEIS to show that the project will be economically viable. It's telling that Texas Central and the FRA dropped the economic viability criterion for this project.</p> <p>Not only is NO BUILD an option, it is the only option. NO BUILD!</p>	
Julie Villaescusa	3/8/2018	Website	Why were "officials" allowed to cut in front of members of the public at the additional meeting on March 5, 2018? And then the "officials" all left. Terrible.	Refer to PI-6.
Julie Villaescusa	3/8/2018	Website	Texas Central had a toy train give a way if you made comments through their website. This is bribery and everyone who comments should get a toy train.	Refer to PI-4.
Julie Villaescusa	3/8/2018	Website	Does I get a reply email if I have a capital letter in my email address?	Refer to PI-3. Comments were accepted via email, including from those including capital letters in the address, to the Project email address (DallasHoustonHSR@urs.com), email directly to FRA, online using the link provided on FRA's webpage for the Project, or by mail to FRA. Each of the comments received during the comment period, in any form has been responded to in Appendix C of the Final EIS.
Julie Villaescusa	3/9/2018	Email	The I-45 corridor was eliminated by the FRA before the DEIS partly due to to travel time (this appears to be a violation of NEPA also as it places travel time over all other NEPA considerations, including the Clean Air Act, Historic Preservation, Environmental Justice, and Noise and Vibration): "To roughly parallel I-45 would require slower speeds around curves and would not achieve the TCR's technical requirement of a 90-minute travel time." Dallas to Houston High-Speed Rail Project Corridor Alternatives Analysis Technical Report - August 10, 2015 - p 14 The DEIS contains speed charts for the proposed HSR system:	Refer to BA-8, BA-9 and PN-3.
Julie Villaescusa	3/9/2018	Website	Hi, here are my first 5 comments attached. Good afternoon Kevin, I'm trying to find the "TCRR ridership and revenue report" which is quoted in the DEIS as source for many important	Refer AQ-3, AQ-12, GN-1, GN-2, PI-1, SC-3 and SC-17.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>data items, such as ridership. Here is a sample quote from Appendix F: According to the TCRR ridership and revenue report: “The majority of Dallas ridership starts/ends in the Downtown area, which is where many businesses are located, and Tarrant [County], which is one of the largest residential zones.” Dallas County is shown in dark grey below. The detailed distribution of trips is presented below. The TCRR ridership and revenue report also notes that this opening day distribution “stays reasonably constant through time.”</p> <p>I really question the accuracy of the ridership numbers in this report and would like to view this source document.</p> <p>I appreciate you pointing me to this document.</p> <p>Texas Central also disputes the \$199 average airfare the DEIS uses, and says the average airfare is \$147. However, while the DEIS provides a source for the \$199, Texas Central provides no source for their number.</p> <p>At the press conference announcing the preferred Houston Station location, a Texas Central official said that the proposed HRS's ticket price would be sort of an average of 2/3 of airfare. At 2/3 of \$147, the average HSR ticket price would be \$98, or less than half of \$199. Plugging \$98 into Table 3.14-22 will reduce the calculated sales tax revenue by more than half. Texas Central touts the sales tax revenue computed in Table 3.14-22 on their website. Under the heading "The DEIS findings on the North Texas Bullet Train Station's many economic benefits:" they state: "\$10 million – Estimated local sales tax produced from the train's ticket sales in Dallas County." Directly under that they urge people to contact FRA about the DEIS. The \$10 million is calculated using \$199 HSR average ticket price.</p> <p>Patch.com says "[Mayor] Turner said the privately-funded project will nit [sic] cost the taxpayers, but rather the city will benefit from the sales tax — projected at \$12 million a year." Is this number also calculated using an average \$199 HSR ticket price? This is not insignificant. Elected officials and the public both may be influenced by the projected sales tax revenues.</p> <p>It is unethical for Texas Central to simultaneously tout the results of a calculation that uses the \$199 average ticket price and say that the \$199 ticket price is a "rumor".</p> <p>FRA should immediately issue a result of NO BUILD due to Texas Central's lack of ethics. Barring that, FRA should require that Texas Central not only fix the numbers in Table 3.14-22 but all items in the DEIS that they say are incorrect - an errata sheet should be provided - only then should the 60 day period re-start and public meetings should be re-held.</p> <p>Texas Central displayed a video with this graphic at the Harris County public meeting (most likely all public meetings) on the proposed HSR: ---                      --- This video is also on their Facebook page and has, as of now, 29,000 views. This information comes from the DEIS, page 3.14-29: "As shown in Table 3.14-22, HSR ticket sales could generate between \$15 billion and \$39 billion in sales tax for the state plus \$5 billion to \$12 billion in local tax revenue." As flawed as Table 3.14-22 is, it does not show that "HSR ticket sales could generate between \$15 billion and \$39 billion in sales tax for the state plus \$5 billion to \$12 billion in local tax revenue". According to Table 3.14-22, it would take 694 years to reach \$39 billion in sales tax for the state. This is absurd. This is a simple math issue. If the people creating the DEIS can't do math, then every number in the DEIS is called into question. This is not a minor error. If it were insignificant, it would not be in Texas Central's video. Members of the public and public officials both could very well be influenced by the state of Texas getting \$39 billion in sales tax revenue. The DEIS and the DEIS comment period are fatally flawed. FRA should immediately issue a decision of NO BUILD.</p> <p>Are the Harris County Miles supposed to be from the Montgomery County line to the City Center? If so, they are way overstated. And then all the miles are doubled. Question: would it be easier to list the numbers in this document that are correct? As always, the DEIS is fatally flawed and should be scrapped. AECOM has made too many significant errors to work on this project any longer. NO BUILD is the only option.</p> <p>Hi Kevin, I submitted 3 comments via the FRA comment page for the DEIS yesterday and only got 2 replies back saying my comments were received.</p> <p>Are you having more issues with the comments page?</p>	
Julie Villaescusa	3/9/2018	Website	<p>Hi, here are my second set of 5 comments, attached.</p> <p>Hi Kevin,</p> <p>Here is more information on the doubling of the VMT which affects all of the emissions calculations in the DEIS.</p> <p>The following chart from the DEIS at first glance might seem to correct the doubling of the VMT as they divide the 5,340,000 cars between Dallas and Houston (the numbers circled in red): BUT then they count the miles 4 times: 1) Dallas vehicle travel miles leaving for Houston                      2) Dallas vehicle travels miles returning from Houston                      3) Houston vehicle miles arriving                      4) Houston vehicle miles departing</p> <p>To end up doubling the VMT for the DFW NAA. The same thing happens for the HGB NAA:</p> <p>The HGB NAA has another issue, the Harris County miles aren't to the city center, but are more than to the city center.</p> <p>The DEIS is fatally flawed. These calculations are directly tied to the Air Quality calculations, which is a component of NEPA. The DEIS should</p>	<p>Refer to AQ-3, AQ-6, AQ-7, GN-2, SC-3, TC-7 and TR-8.</p> <p>The original emissions were estimated under the assumption that passenger numbers from the ridership constituted round trips. Therefore, this was reflected in NAA Conformity calculations for car departure, arrivals and returns from each city at their respective ends. The passenger trip assumption associated with the ridership used was clarified with TCR to mean one-way travel, and a GIS error in the Harris County road length was corrected, and VMT recalculated with these corrections, with results summarized in tons per year below for the largest emission alternative (A). This change halved the vehicle miles traveled (VMT) and vehicle emissions</p>

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>be scrapped and the FRA should immediately issue a decision of NO BUILD.</p> <p>The "Dallas to Houston High-Speed Rail Draft Environmental Impact Statement" dated December 2017 uses Texas Central's proprietary documents as a basis for ridership. Texas Central refuses to release these proprietary documents. These documents are described in the DEIS as the "proprietary market demand study undertaken by TCRR" and the "TCRR ridership and revenue report". This is not open government. The FRA could have chosen several different public documents, such as the Reason Foundation's February 2017 report "Texas High Speed Rail: Caution Ahead", or TxDOT's December 2013 "Statewide Ridership Analysis Report: Statewide Analysis Model-Version 2.5" for ridership numbers. Why did they choose a proprietary report instead? The proprietary report is an extreme outlier, with 7.2 million riders per year, compared to Reason's 1.4 million and TxDOT's 700,000 to 2.7 million.</p> <p>The ridership numbers are not unimportant as they inform such things as reduction of vehicle miles traveled (VMT) which informs emissions calculations.</p> <p>Using Texas Central's proprietary documents, the DEIS says 14,630 cars per day will be taken off the road. Using Reason's numbers only 816 cars per day would be taken off the road. The proprietary report's ridership numbers give 18 times the number of cars per day taken off the road as using publicly available numbers. The emissions removed and reduction in traffic could inform many people's opinion of the HSR, both members of the public and public officials.</p> <p>Another instance the DEIS uses ridership from the proprietary report is calculating sales tax revenue. The DEIS states \$20 million a year for Houston and Dallas combined. Based on the DEIS table 3.14-22, this number could be overstated by 2.5 to 10 times, compared to publicly available sources. This could easily influence both the public and public officials.</p> <p>Hi Kevin,</p> <p>The section "Permanent Impacts: Property Premiums" that starts on page 3.14-30 appears to be just a bunch of nonsense. They say property values very near the proposed station locations will increase in value.</p> <p>The DEIS states: "Studies have shown a positive effect between residential and commercial property values and rapid rail/commuter transit in Washington D.C., Atlanta, New York City, San Francisco, Boston, Los Angeles, Philadelphia, Santa Clara County, Portland and San Diego. Rapid/commuter rail systems had a wider sphere of influence for positive land premiums around stations than light rail transit. This is attributed to higher speeds and greater regional access.18 The HSR system would operate at even higher speeds and provide a connection between the two most populous cities in Texas, so it is assumed that property values around station areas would have a similar positive impact."</p> <p>DEIS p 3.14-30</p> <p>This is based on the report "THE EFFECT OF RAIL TRANSIT ON PROPERTY VALUES: A SUMMARY OF STUDIES".  <a href="http://www3.drcog.org/documents/arch_ive/The_effect_of_Rail_Transit_on_Property_Values_Summary_of_Studies_1.pdf">http://www3.drcog.org/documents/arch_ive/The_effect_of_Rail_Transit_on_Property_Values_Summary_of_Studies_1.pdf</a></p> <p>This report is about TRANSIT - or rail you would take to work, not rail you would take to a city 240 miles away. While there may be nothing wrong with this report, the report has zero to do with the proposed High-Speed Rail.</p> <p>This report contains statements like "Average home prices decline by about \$2,300 for every 100 feet further from the station areas." when talking about Rapid rail: New York City MTA or "1990 single family home prices decline by \$1.00 to \$2.00 per meter of distance from a BART station in Alameda and Contra Costa Counties" when talking about Rapid rail: BART in San Francisco.</p> <p>They are measuring in meters and feet because they are talking about people walking to a transit stop and going to work.</p> <p>This is just pathetic.</p> <p>DEIS p 3.14-31</p> <p>This would be more like living next to an airport. Traffic will increase next to the stations. Residential property values will DECREASE being near the stations. The "Property Premium" numbers in Table 3.14-23 should all be negative.</p> <p>The DEIS continues to be fatally flawed. NO BUILD is the only option.</p> <p>Additionally, Texas Central is saying the \$199 average fare is a "rumor" (implying it will be lower but not saying what the average train fare will be) used to calculate the sales tax revenue while simultaneously promoting the sales tax revenue of \$10 million for Dallas. This is unethical.</p> <p>Another private project, All Aboard Florida, does include a ridership and revenue study in its DEIS - Appendix 3.3 F Ridership and Revenue Study Summary.</p> <p>FRA cannot use a secret, proprietary report as its basis for ridership in the DEIS. This is not open government. If Texas Central wants to keep its ridership and revenue report secret, that's fine, but the DEIS must use another source for ridership and revenue.</p> <p>As a result, the DEIS is fatally flawed and must be rescinded. FRA should immediately issue a decision of NO BUILD.</p> <p><a href="http://www.kcentv.com/article/news/local/verify-would-the-proposed-texas-bullet-train-delay-first-responders/500-525193528">http://www.kcentv.com/article/news/local/verify-would-the-proposed-texas-bullet-train-delay-first-responders/500-525193528</a></p>	<p>removed by HSR use, but there was still a net reduction of operational emissions for all pollutants, except sulfur dioxide, which was positive before the revision. NOx and VOC net emissions in the HGB NAA in 2024 and 2040 are respectively, -11.7 and -3.8 tons per year (TPY) for NOx, and -19.9 to -17.8 TPY for VOC. Only DFW NAA NOx in 2040, is barely a net positive, at 0.1 tons per year, which is 0.1% of the de minimis threshold to determine if general conformity applies, while other years for NOx and VOC show reduction.</p> <p>Therefore, the conclusion of no adverse long-term impacts to air quality from operational air emissions would not change. This revised assumption was included in the Final EIS. With an update to the train power consumption using more up-to-date data from the Energy Information Administration (EIA), the 2040 DFW NAA NOx emissions is expected to show net reduction because the percent of wind power has increased more than was previously forecasted in the Draft EIS.</p> <p>As noted in Section 3.14.3, Socioeconomics and Community Facilities, Methodology, the analysis of property premiums around stations relies on literature documenting the effects of traditional mass transit, as there are currently no studies documenting the effects of high-speed mass transit. Although not an exact replication of the technology proposed for the Project, the primary factors which can influence property values, such as presence or lack of hazardous freight cargo, noise and vibration effects, and the activity generated at a station area, would be of a similar nature. It is correct that traffic volumes would likely be higher around high speed rail stations as compared to traditional rail transit projects. However, traffic volumes are positively correlated with property premiums, as more activity would be generated for businesses near the station area.</p> <p>Refer to TR-5 and TR-12 for more regarding traffic congestion and access to stations. The analysis of property value impacts around station areas only includes a growth rate based on current land uses and does not speculate regarding potential conversion of property to higher productivity uses. Positive property tax impacts are likely to exceed Final EIS estimates as a result of additional build-up around stations.</p> <p>The term "grade-separated" refers to the fact that the HSR would never interact directly with a roadway surface. The HSR would either travel over a road (rail over road) or the road would be above built above the rail (road over rail).</p> <p>No public roads would be closed. Public roads would be crossed by the Project, rebuilt over the HSR (an overpass), or would be rerouted.</p>

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>"Channel 6 then asked Texas Central Partners Regional Vice President David Hagy about the roads issue and got a very different response. "This train is grade separated all the way, It will never cross a road or interact with traffic," Hagy said. "We go over all public roads, we are not allowed to close any public road.""</p> <p>Why is David Hagy saying that "We go over all public roads" when the DEIS shows many "road over rail" in Table 16: Roadways Impacted In EJ Communities, in Appendix C: Roadway Grade Separation Database, and Tables 3.11-43 through 3.11-47?</p> <p>Is this another huge error in the DEIS or is Hagy an uninformed spokesperson? I don't trust either one of them.</p> <p>The only option for this misinformed DEIS or misinformed company is NO BUILD. The DEIS should be scrapped.</p> <p>Texas Central is quoting the DEIS in stating that 14,630 vehicles per day will be taken off the road. This not only unbelievable, it is calculated using Texas Central's proprietary (secret) data of 7 .2 million passengers per year. Texas Central is promoting this incredible number while asking people to comment on the DEIS. Based on TxDOT's projected traffic on 145 in 2035, 14,630 vehicles per day would mean a 61 % diversion rate from cars to HSR. This is simply absurd. The diversion rate predicted for the HSR is 5%, not 61 %.</p> <p>This is not open government. The DEIS must be based on publicly available data, not secret and false Texas Central ridership reports. This process is irretrievably broken. The DEIS must be scrapped and FRA must immediately issue a decision of NO BUILD.</p>	
Julie Villaescusa	3/9/2018	Website	<p>Hi, here is my third set of 5 documents.</p> <p>I was at the Sheraton Monday night and heard many government officials or their spokespeople speak about Texas Central's proposed High-Speed Rail. As the speaker's list was front-loaded with government officials and their spokespeople, members of the public, like myself, had to wait hours to speak. By the time it was my turn, the crowd had thinned quite a bit.</p> <p>Since you may not have been present for my speech, here it is:</p> <p>Hi, my name is Julie Villaescusa. The DEIS is fatally flawed. The DEIS process is fatally flawed.</p> <p>Earlier in the process, Economic Viability was used to remove entire corridors from consideration. The FRA allowed Economic Viability to trump all NEPA requirements such as the Clean Air Act, Historic Preservation, Economic Justice – which includes protections for minority communities, and Noise and Vibration. Then the FRA removed Economic Viability from the DEIS, even though no proof of Economic Viability was ever provided.</p> <p>Ridership is grossly exaggerated and not backed up by any data. The ridership number – 7.2 million riders per year in 2040 - is from Texas Central's own proprietary report. The 7.2 million is an extreme outlier. There are other, publicly available reports that the DEIS could have used – Reason Foundation estimates 1.4 million riders per year and TxDOT estimates 700,000 to 2.7 million riders per year. Using a secret ridership report for the DEIS not open government.</p> <p>Looking at some of the hoops they jumped through to do calculations in the DEIS, I don't think the people who wrote the DEIS got to see the secret ridership report either.</p> <p>The DEIS uses round trip miles instead of one-way trip miles to calculate the VMT, or vehicle miles traveled. Therefore, the VMT removed is doubled and all of the air quality calculations are incorrect. The DEIS says that 81.5 million gallons of gas would be saved each year. That, like the VMT, has been doubled.</p> <p>The DEIS says that the State of Texas will receive \$15 to \$39 billion in sales tax from ticket sales.</p> <p>Texas won't collect \$15 to \$39 billion in sales tax from HSR ticket sales. The state of Texas will collect ZERO DOLLARS in sales tax from HSR ticket sales. Texas does not levy sales tax on transportation. A Texas transportation company would know that. Texas Central is not a Texas transportation company.</p> <p>How can AECOM, who made a \$39 billion-dollar error, be allowed to continue on this project? How can AECOM, who miscalculated all of the emissions calculations be allowed to continue on this project? Air quality is directly related to NEPA.</p> <p>They had 100,000 hours by hundreds of experts to create this flawed document. And we had 75 days to review. All the significant errors in the DEIS have not been caught.</p> <p>The DEIS states that no build is not an option, this, like the ridership, air quality calculations and sales tax is not true. The DEIS is fatally flawed. No build is the only option.</p> <p>I eliminated this line from my speech, but since Controller Brown used the 2.5 billion dollars in tax benefit in his remarks, I am including it here:</p> <p>Texas Central released a summary of a report in October of 2015 that shows a table saying the direct state and local tax impact will be 2.5 billion dollars. It says that the tax forecast includes retail sales tax on ticket sales. (Note: Texas does not levy sales tax on transportation).</p> <p>I would hope that my elected officials and others would join me in requesting that all of the data in the DEIS be reviewed by an outside company. In addition, the DEIS must be based on publicly available data - the public must be able to review how the 7.2 million riders per</p>	Refer to AQ-2, AQ-3, AQ-7, AQ-12, AQ-14, BA-6, GN-2, GN-3, GN-4, NE-1, PN-3, PN-4 and SC-3.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>year was obtained.                      Today is the last day to comment on the DEIS. I hope that my elected officials comment in favor of open government.                      Texas Central displayed a video with this graphic at the Harris County public meeting (most likely all public meetings) on the proposed HSR:                      This video is also on their Facebook page and has, as of now, 29,000 views.                      This information comes from the DEIS, page 1-10:                      "According to the Texas Transportation Institute’s 2010 report, even taking into account forecasted improvements, vehicular traffic on IH-45 between Dallas and Houston will increase more than 200 percent by 2035, resulting in average speeds decreasing from 59 to 39 mph."                      However, when I look at the source data in the footnote,  <a href="https://static.tti.tamu.edu/tti.tamu.edu/documents/0-5930-2.pdf">https://static.tti.tamu.edu/tti.tamu.edu/documents/0-5930-2.pdf</a>                      Table 3. Corridor Traffic Data &amp; Projections 2002 and 2035 – FHWA Freight Analysis Framework 2.2. shows a 126% increase in traffic, which is not greater than 200%(it is less than 200%).                      Every number in the DEIS is called into question.                      This is not a minor error. If it were insignificant, it would not be in Texas Central's video. Members of the public and public officials both could very well be influenced by a greater than 200% increase in traffic.                      The DEIS and the DEIS comment period are fatally flawed. FRA should immediately issue a decision of NO BUILD.                      Texas Central is still spreading the manure from the DEIS that the HSR will generate \$15 - \$39 Billion in sales tax revenue from ticket sales on its website AND telling people to comment on the DEIS:  <a href="https://www.texascentral.com/itstime/">https://www.texascentral.com/itstime/</a>                      Even if every number in the DEIS's Table 3.14-22 were correct (big hint: they are not), it would take over 600 years to reach \$39 billion in sales tax revenue. This process is irretrievably broken. The DEIS must be scrapped and FRA must immediately issue a decision of NO BUILD.                      Did AECOM even have access to Texas Central's secret ridership report? The hoops they jump through to come up with their incorrect calculations make me think that AECOM didn't review the secret report at all, and were only told there would be 7.2 million riders per year. This is awful.                      What a waste of everyone's time and resources to produce the horrible DEIS. What a shame that so many Texans have had this awful project hanging over their heads for years and years. How much development has been suppressed in path of this monstrosity? How much stress has been forced on families?                      The FRA needs to immediately issue a decision of NO BUILD and tell AECOM and Texas Central to go away and never bother Texans again. As shown in an email I sent dated 2/25/2018 and with a Subject of "Texas Central HSR DEIS - VMT Removed Doubled - NEPA Clean Air Act Issue", AECOM has doubled the VMT removed in the DEIS. This has an effect of doubling the Total Fuel Saved (000s) [gallons] shown in Table 3.9-19: Annual Operation Energy Savings Estimate. The 2,553 VMT (Million) shown in the table was calculated using Round Trip Distance (miles) based on the number of cars going one-way, which doubled the VMT.                      The formula used was "Round trip distance X cars/year = VMT" when it should have been "One way distance X cars/year = VMT".                      According to the other data in the chart, using the VMT (Million) (based on other data in the DEIS) of 1,276 VMT (Millions) would result in 40,775 (000s) [gallons], or 40.8 million gallons, which is half of 81.5 million gallons.                      This is so important that Texas Central used the doubled figure in the video that they have shown at all 10 public meetings, that has been viewed at least 29K times on their Facebook page and that they have on their website on the same page where they urge people to contact the FRA about this project:                      The public process for the DEIS has been fatally compromised. The DEIS itself is worthless, as none of the numbers have any integrity or value. The DEIS should be scrapped. The FRA should immediately issue a decision of NO BUILD. Barring that, AECOM should be fired and competent professionals hired to create a new DEIS.</p>	
Julie Villaescusa	3/9/2018	Website	<p>Did AECOM even have access to Texas Central's secret ridership report? The hoops they jump through to come up with their incorrect calculations make me think that AECOM didn't review the secret report at all. and were only told there would be 7.2 million riders per year. This is awful. What a waste Of everyone's tirne and resources to produce the horrible DEIS. a shame that so many Texans have had this awful project hanging over their heads for years and years. How much development has been suppressed in path Of this monstrosity? How much stress has been forced on families? The FRA needs to immediately issue a decision of NO BUILD and tell AECOM and Texas Central to go away and never bother Texans again. Earlier in the process, Economic Viability was used to remove entire corridors from consideration. The FRA allowed economic viability to trump all NEPA requirements such as the Clean Air Act, Historic Preservation, Economic Justice \u8226 which includes protections for minority communities, and Noise and Vibration. Then the FRA removed Economic Viabilitv from the DEIS, even though no Droof of Economic Viabilitv was ever ovided. In fact. the Reason Foundation reort Texas High Speed Rail: Caution Ahead" from</p>	<p>Refer to AQ-7, BA-5, BA-6, BA-8, BA-10, GN-2, GN-3, NE-1, NE-9, PN-3, PN-4 SC-3, SC-22 and SS-9.                      Addressing the first point, the ridership is not grossly exaggerated. The TCRR forecasted annual ridership of 4.4 million and 7.2 million for 2024 and 2040, respectively, represent averages of occupancy of 44% and 62% given the planned service levels of 68 and 80 trains per day with trainsets of a 400-passenger capacity. Insofar as calculating associated vehicle emissions reductions, the ridership was physically plausible with the planned level of service and car capacity. With</p>

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>February of 2017 states that the project, regardless of alignment chosen, will lose over \$500 million a year. The DEIS says that "The No Build Alternative would not meet the specified Purpose and Need for this Project". The DEIS says that "The purpose of the privately proposed Project is to provide the public with reliable and safe high speed passenger rail transportation between Dallas and Houston." Crunching the final cost numbers, capital costs total \$17.8 billion and interests payments total \$900 million operating and maintenance costs are expected to be \$8.8 billion over 40 years or \$219 million per year. Based on our numbers, building, operating and maintaining Texas Central's train line would cost \$27.5 billion. Thus the gap between revenue and expenses would be \$21.5 billion, or \$537.27 million each year. Thus Texas Central needs to find at least an additional \$20 billion just to break even on the project, depending on the interest rate." Texas High Speed Rail: Caution Ahead p 49 The DEIS states: "Additional sales tax revenue would result from the sale Of tickets for travel on the new HSR system on an annual basis While it is in operation. As shown in Table 3, 14-22, HSR ticket sales could generate between \$15 billion and \$39 billion in sales tax for the state plus \$5 billion to \$12 billion in local tax revenue, Local sales tax is assumed to be collected at the point Of sale. roughly split between Dallas and Houston jurisdictions. 1 7 Tax revenue for ticket sales would be identical for all Build Alternatives." Table 3.14-22: Annual Ticket u all Build Alternatives DEISp 3.14-29 Notwithstanding that it would take almost SEVEN CENTURIES based on Table 3.14-22 to reach \$39 billion in sales tax for the state, that 7.2 million riders is way overstated, and the Texas Central says that the \$199 is a "rumor and not a 'reality', Texas does not levy sales tax on transportation. There is no sales tax on airfare, so those numbers in Table 3.14-22 are also wrong. Since Texas does not levy sales tax on transpodation. and the proposed HSR is transportation. there is no reason to believe that there would be sales tax on HSR tickets. Therefore, HSR ticket sales could generate SO for the state in sales tax. and SO in local taxes. Texas Central has touted the \$15 to \$39 billion in state sales taxes on ticket sales in a video that was shown at the FRA's public meetings on the HSR, on Facebook and their website where they asked people to comment to the FRA.</p> <p>"The net GHG emissions were then determined by adding the train operation emissions and vehicle emissions reduction. Table 3.21-6 provides the result. As shown, the net impact would be a reduction Of 0.417 million metric tons annually. Compared to the most current (2013) state-level GHG annual emissions estimate Of 641 million metric tons. the reduction would be a small percentage, However, this would be a long-term reduction. Therefore, the Build Alternatives would have a srnall. but long-term positive effect on GHG emissions. Though the impact is small compared to state annual emissions, the net reduction of 0.417 million metric tons per year is greater than the maximum annual construction emissions of 0.136 million metric tons. Therefore. the total construction emissions over 4 years at a maximum of O. 136 million metric tons per year would be offset by operational net reductions of 0.417 million metric tons per year within less than 2 years at full operationFor the air quality emissions estimation at the full-service level (2040) scenario. the annual ridership of 7.2 million passengers. existing 89 percent share of people using passenger cars to travel between Dallas and Houston and average passenger occupancy of 1.2 passengers per car were then used to calculate the number of annual car trips of 5,340,000 cars per year." DEIS p 32-13 Metro share of VMI DEIS p 3.2-14 trip X = VMT Table 3.2-4: Calculated VMT 82 "028 2040 VMT These calculations, like all calculations that use VMT, are wrong since the VMT calculation is incorrect for 4 reasons: 1) The ridership number Of 7.2 million passengers per year is grossly exaggerated and unsupported by any data 3/9/201 a Gmail - Texas Central HSR DEIS - CHG Calculations VWong Due to doubled VMT Removed 2) the 89% current car market share used to multiply by the 7.2 million passengers is not correct - what about induced passengers, which must number in the millions to get to 7.2 million passengers 3) the 1.2 passengers used to divide the result of 2) above is most likely incorrect - this is just a bad guess on AECOM's part and not taken from the ridership study that produced the 7.2 million passengers in 1) above 4) the VMT is then calculated by using ROUNDTRIP miles of ONE-WAY miles, which is incorrect as the 7.2 million ridership numbers contains all trips, and a roundtrip is already counted as 2 of the 7.2 million riders.</p> <p>The DEIS lists THREE functional criteria to support the Purpose and Need: Technological: bullet train vehicle and operating procedures based on the N-7001 Tokaido Shinkansen system &amp;#8226; Operational: approximate 90-minute travel time between Dallas and Houston, with achievable speeds exceed' ng 200 mph in a fully sealed corridor; Environmental: minimal impacts to the natural and built environments by maximizing adjacency to existing infrastructure ROW" So basically use a particular brand of train that should take a certain amount of time and the route selected should have minimal impacts compared to other routes studied. You could make up a Purpose and Need statement for any project anywhere and declare that NO BUILD doesn't meet the Purpose and Need statement because the Purpose and Need is to build the project. However, The Step 1 Screening of Corridor Alternative Report which was created before the DEIS and used to select the utility Corridor, says that "The purpose Of the privately proposed project is to provide reliable, safe, and economically viable passenger rail transportation using proven high-speed rail technology between Houston and Dallas." The difference between the two statements is that the Step 1 Report includes "economically viable". In the Step 1 Report, there is a FOURTH item listed to "support the Project Purpose and Need of the project": 3/9/201 a Achieve a favorable return on investment when weighing expected ridership and revenue against estimated project capital investments, real estate requirements, project delivery schedule, and long-term operations and maintenance expenses. Tim Keith, the CEO of Texas Central prepared a list of Frequently Asked Questions attached to the Step 1 report. In this he says "Additionally, the FRA must</p>	<p>respect to concerns of unrealistically high train occupancy leading to overestimating the vehicle removal emissions benefits, other high speed rail planning literature did not indicate these projections to be either extremely optimistic or pessimistic. Studies of the environmental impact of different travel modes by University of California at Berkeley considered high/low occupancy rates to be 90%/10% for high speed rail, and 110%/25% for rail in general for averages of 50% and 67%, respectively. High speed rail price studies in Spain, which had been experiencing low HSR occupancy rates compared with other European Union countries, used 60% as an average planning basis, or cited 66% as actual average occupancies targeted for increase through pricing. The TCRR occupancy rates appear to be neither overly optimistic nor pessimistic. Also, the ridership study was reviewed by transportation planners from the EIS consultant team in 2018, and was found to employ reasonable travel market forecast methods. Addressing the second point, the comment appears to misstate and misinterpret what 89% constitutes. The 89% was not 89% of the "car market share" which appears to refer to the total share of cars traveling on I-45. The figure of 89% used in the EIS was the travel mode share of people making a Dallas-Houston (or vice versa) trip that use cars to make the trip. This is very different from the share of total cars traveling on I-45. This travel mode share came from an early TCRR station planning memo that had traveler profiles from a preliminary traveler market and ridership study that was referenced in the EIS. That the mode share was 89% car is wholly consistent with literature that documents national travel mode of various distances. In the US, one source cites that for trips in the 240 Km-400 Km range (150-250 miles), car constituted 90 percent. It is unclear what the comment insinuates regarding induced passengers, since it is self-evident that total passengers traveling Dallas-Houston have to umber in the millions if the ridership projected numbers 7.2 million. Addressing the third point, the 1.2 passengers per car occupancy rate was not any bad guess as it was sourced from the TCR station planning memo as cited in the EIS. It was a project-specific occupancy assumed for all passenger vehicle station arrivals (drive and park, rental car, taxi etc.) used by TCRR in planning station traffic and facilities. This number reflects the average number of train passengers expected to arrive by these modes of travel to the station. For the EIS analysis, conceptually this would reflect the numbers of passengers dropped off that would otherwise be using cars, for the share of travel mode that would be using cars without the HSR (89%). Because this was project-specific it was adopted. Also, at the time of the preparation of the Draft EIS, it was consistent with what was used in state transportation planning (1.25). Actual surveyed vehicle occupancy in the state had been falling below 1.2, including in the Dallas-Fort Worth area, as indicated in the sources with state vehicle occupancy rates. A state-specific vehicle occupancy rate was updated only in late 2017 after issuance of the Draft EIS was initiated. This</p>

			<p>carry forward potential corridor alternatives that meet the Project's purpose and need, which includes the requirement that the project be "economically viable." As such, the various elements of the project's construction, including those directly impacting overall cost and the Project's impact on the human and natural environment must be considered at this and future stages of the EIS. This criterion was used in the Step 1 Report to eliminate at least one proposed corridor from further study because it was "financially unviable. The Reason Foundation Report "Texas High Speed Rail: Caution Ahead" concludes that the project will lose over \$500 million dollars a year. There is nothing in the DEIS to show that the project will be economical. The No Build Alternative would not meet the specified Purpose and Need for this Project, but is retained in the EIS as a basis for comparison. The No Build Alternative would not provide congestion relief, improve safety on IH-45, meet current and future transportation needs between Dallas and Houston and would not Offer an alternative transportation mode that would connect to existing modes." DEIS Executive Summary ES-8 "The purpose of the privately proposed Project is to provide the public with reliable and safe high speed passenger rail transportation between Dallas and Houston.. DEIS 1-5 "TCRR identified the Dallas to Houston corridor as an ideal distance to implement high-speed intercity passenger rail that is financially sustainable, constructible and connects two of the largest urban centers 3/9/201 a in the country. ly viable. It's telling that Texas Central and the FRA dropped the economic viability criterion for this project. To achieve TCRR's financial and ridership objectives, TCRR has identified the following functional criteria for the Project:</p> <p>Technological: bullet train vehicle and operating procedures based on the N-7001 Tokaido Shinkansen system. Operational: approximate 90 minute travel time between Dallas and Houston, with achievable speeds exceed'ng 200 mph in a fully sealed corridor; Environmental: minimal impacts to the natural and built environments by maximizing adjacency to existing infrastructure ROW" DEIS 1-6 "The No Build Alternative would not meet the specified Purpose and Need for this Project, but is retained in the EIS as a basis for comparison. The NO Build Alternative would not provide congestion relief, improve safety on IH4S, meet current and future transportation needs between Dallas and Houston and would not offer an alternative transportation mode that would connect to existing modes." 2-42 "Consistent with the Purpose and Need of this Project, alternative HSR alignments were developed to minimize impacts to the environment and to existing development. Alignment objectives that every potential route alternative must meet in order to be financially feasible and constructible would include: Configure alignments as a dedicated, fully grade-separated interchanges, two-track alignment to meet safety, service planning, and travel time goals, without shared use of track. Alignments must support operating speeds that would achieve a 90 minute or less travel time to generate ridership and be competitive with air travel. \u8226 Maximize adjacency opportunities with transportation and utility conidors. Minimize relocation of any existing roadways or freight railroad tracks. Optimize the alignment to allow for the desired maximum operating speed, operational efficiency, and design best practices. \u8226 Minimize crossings of existing freight tracks, major roadways, and transmission line corridors. Minimize expected impacts of construction to tramc and freight operations. Minimize expected environmental impacts and constructability concerns. \u8226 Minimize expected right-of-way (ROW) and construction costs associated with heavy infrastructure requirements." The following are the key goals and objectives of the Project that underpinned the development of the DCE and the BOD, and that support the Project Purpose and Need of the Project: Economic: Achieve a favorable return on investment when weighing expected ridership and revenue against estimated project capital investments, real estate requirements, project delivery schedule, and long-term operations and maintenance expenses. Technological: Deploy a state-of-the-art HSR system for service based upon the Tokaido Shinkansen. TCRR would adapt the rolling stock, systems, and operating and maintenance procedures as required to comply with applicable regulatory, environmental, and operational conditions of the Project corridor. Operational: Achieve a travel time of 90 minutes or less between Dallas and Houston. Environmental: Minimize impacts to the natural and built environment along the corridor and at stations through context-sensitive design, adjacency to existing infrastructure ROW, and stakeholder coordination as appropriateCrunching the final cost numbers, capital costs total \$17.8 billion and interests payments total \$900 million operating and maintenance costs are expected to be \$8.8 billion over 40 years or \$219 million per year. Based on our numbers, building, operating and maintaining Texas Central's train line would cost \$27.5 billion. Thus the gap between revenue and expenses would be \$21.5 billion, or \$537.27 million each year. Thus Texas Central needs to find at least an additional \$20 billion just to break even on the project, depending on the interest rate." Texas High Speed Rail: Caution Ahead p 49</p> <p>"Per the FRAs Report, the "FRA is obligated to avoid and minimize impacts to the human and natural environment." Additionally, the FRA must carry forward potential corridor alternatives that meet the Project's purpose and need, which includes the requirement that the project be "economically viable." As such, the various elements of the project's construction, including those directly impacting overall cost and the Project's impact on the human and natural environment must be considered at this and future stages of the EIS." Step 1 Screening of Corridor Alternatives Report: Frequently Asked Questions p 3 "The purpose of the privately proposed Project is to provide reliable, safe, and economically viable passenger rail transportation using proven high-speed rail technology between Houston and Dallas. The proposed action will provide a convenient alternative to automobile travel on 11-1-45 or air travel between the two major metropolitan areas and introduces rail capacity in the corridor. Furthermore, to achieve TCR's economic viability and safety requirements, the Project must meet the following</p>	<p>information, used for estimating roadway user delay costs, recommended a revision of the previous rate of 1.2 to 1.5 based on newer national survey data. Addressing the 4th point, TCRR was consulted to verify what passenger ridership numbers meant in terms of a one-way or round trip. They indicated the numbers mean the number of trips in one direction. Therefore, the emissions for the Final EIS were revised with this assumption to calculate the numbers of cars removed from the road due to HSR use. The assumption of one-way trips was checked for its impact on the conclusion of HSR net project emissions impacts for the Draft EIS emission estimate, and is summarized in tons per year below for the largest emission alternative (A). This change halved the vehicle miles traveled (VMT) and vehicle emissions removed by HSR use, but there was still a net reduction of operational emissions for all pollutants, except for same as before, sulfur dioxide. Therefore the conclusion of no adverse long term impacts to air quality from operational air emissions would not change. This revised assumption was included in the Final EIS.</p> <p>Previous assumption: Trip distance = 478 miles; VMT avoided = 2,552,520,000 miles Revised assumption: Trip distance = 239 miles; VMT avoided = 1,276,260,000 miles For 2024: HSR Operation Emissions: NOx = 43.6, VOC = 5.3, PM10 = 6.0, SO2=113.6, CO = 38.9, CO2eq = 132,316 CO2eq Metric Tons 120,035; Vehicle Emissions: NOx=81.55, VOC=73.46, PM10=23.98, SO2=1.36, CO=1,401.09, CO2eq=203,250, CO2eq Metric Tons=184,385 Net Emissions: NOx = -38.0, VOC = -68.1, PM10=-17.9, SO2=112.2, CO = -1,362, CO2eq = 70,934, CO2eq Metric Tons = -64,350 For 2040: HSR Operation Emissions: NOx = 16.86, VOC = 4.42, PM10 = 3.04, SO2 = 34.03, CO = 29.97, CO2 equivalent = 96,747, CO2eq Metric Tons = 87,767 Vehicle Emissions: NOx = 35.33, VOC = 82.91, PM10 = 46.39, SO2 = 1.88, CO = 1045.2, CO2eq = 278,074, CO2eq Metric Tons = 252,264 Net Emissions: NOx = -18.5, VOC = -78.5, PM10 = -43.3, SO2 = 32.2, CO = -1015, CO2 equivalent = -181,327, CO2eq Metric Tons = -164,497 ". Specific screening procedures regarding firearms will be developed through the System Security Plan.</p>

			<p>criteria: Economic: achieve a favorable return on investment when weighing expected c ridership and revenue against estimated project capital investments, project delivery schedule, and long-term operations and maintenance expenses. Technological: bullet train vehicle and operating procedures based on the N700-I, the international version of the Tokaido Shinkansen. Operational: approximate 90 minute travel time between Dallas and Houston, with achievable speeds exceeding 200 mph in a fully sealed corridor.</p> <p>Environmental: minimal impacts to the natural and built environments through context sensitive design and adjacency to existing infrastructure rightof- way (ROW) as appropriate." Step 1 p 5 "While the BNSF Option 1 alignment was initially found to be the early leader in the evaluation with respect to these issues, risk mitigation and indemnification requirements identified by the freight railroads later indicated that an alignment that closely follows the existing BNSF freight line over a significant length would prove unreasonable and financially unviable." "FRA eliminated a potential corridor alternative or other potential transportation alternative if it failed to meet Project purpose and need. FRA carried forward into the fine screening analysis only those potential corridor alternatives or other potential transportation alternatives that meet Project purpose and need, as defined below. C Purpose and Need: supports the purpose to provide economically viable high-speed (200 mph) safe and compliant passenger rail service competitive with air travel (90 minute travel time from terminal to terminal) using the N700-I Tokaido Shinkansen in a fully sealed and grade-separated corridor" "The cost of an approximately 240-mile barrier wall exceeds TCR's purpose in that the Project would not be economically viable. " p 13 "Because it was deemed economically infeasible by the Proponent, FRA eliminated the 145 Greenfield Corridor from further consideration. FRA also determined that the 145 Greenfield Corridor fails under the Physical Characteristics, Operational Feasibility, and Environmental Constraints screening criteria."</p> <p>The DEIS does not mention whether or not guns will be allowed on the HSR. Texas is an open-carry state. Will sidearms be allowed? ivWhat about transporting hunting rifles or other long guns? Will that be allowed on the train? passengers Will always have access to their luggage, Will people be able to pack guns in their luggage? If guns will not be allowed, how will that be prevented?</p>	
Julie Villaescusa	3/9/2018	Website	<p>Julie Villaescusa Here are 2 more comments. Hi Kevin, Texas Central has this form letter that people can send from their website. It ends: "As an electric train, this system will also be the best environmental alternative as 4 of the counties served are already air quality non-attainment status. This innovative new industry reduces road congestion, improves local economies and creates new jobs for Texans. I welcome a faster, safer and cleaner transportation alternative to reduce congestion because it's good for Texas!" However, this is all in great doubt, and emissions may actually increase in the non-attainment counties. The DEIS uses this to obtain the 5,340,000 cars trips per year removed: "For the air quality emissions estimation at the full-service level (2040) scenario, the annual ridership of 7.2 million passengers, existing 89 percent share of people using passenger cars to travel between Dallas and Houston and average passenger occupancy of 1.2 passengers per car were then used to calculate the number of annual car trips of 5,340,000 cars per year. It should be noted that this number of vehicles that would no longer travel IH-45 between Houston and Dallas would equate to 14,630 vehicles per day, or about 14 percent of the 2035 annual average daily traffic of 106,475 vehicles per day projected in transportation planning documents for this corridor." DEIS p 3.2-13 Why would AECOM be reverse engineering these numbers anyway? Did they not have access to the secret ridership report? The 7.2 million riders per year is in huge doubt. Reason states 1.4 million; TxDOT between 700,000 and 2.7 million. 7.2 million is way out of line. Why use the 89% existing share in the calculation? Surely millions of the 7 .2 million riders are induced. How else would the number be so high? Why use 1.2 passengers per car? 1.2 passengers per car is used in Appendix F, but that is people going to the station, not between Dallas and Houston. Surely to get to 7.2 million riders, the cars would have to be crammed full. For example, Reason uses 1.8 riders per car. Just changing this variable, the cars per year is taken down to 3,560,000. No one knows what the secret ridership report used - one of the many reasons the ridership report should not be secret. All Aboard Florida had a ridership and revenue study as an appendix to its DEIS. THEN the DEIS uses roundtrip miles on every emissions calculation. This is wrong, as the 7 .2 million riders contains all the trips - a roundtrip would count as 2. The VMT (vehicle miles traveled) is doubled on every calculation, rendering every calculation wrong and useless. The only thing the DEIS "confirms" is that AECOM should be fired and the DEIS trashed. Thanks, Julie Villaescusa</p>	<p>Refer to AQ-4.</p> <p>The annual car trips removed were not reverse engineered, because the TCRR ridership report does not calculate these numbers. It only forecasts numbers of passengers expected to ride the HSR. The cars removed was calculated based on TCRR ridership numbers, trip assumptions, and vehicle occupancy for the Draft EIS.</p>
Julie Villaescusa	3/9/2018	Website	<p>Texas Central is giving away 2 toy trains in a kind of raffle to people who comment on the HSR from their website. This is bribery. Please discount any comments from their website to you. Thanks Julie Villaescusa</p>	<p>Refer to PI-4.</p>
Julie Villaescusa	3/9/2018	Website	<p>Julie Villaescusa another comment.</p> <p>From the DEIS: "For the air quality emissions estimation at the full-service level (2040) scenario, the annual ridership of 7.2 million passengers, existing 89 percent share of people using passenger cars to travel between Dallas and Houston and average passenger occupancy of 1.2 passengers per car were then used to calculate the number of annual car trips of 5,340,000 cars per year. 			<p>car average occupancy. Where does this number come from? It seems the DEIS pulled this number out of the air. While Appendix F does use a 1.2 passenger per car average occupancy, that is for traffic going to train stations, not traffic between Houston and Dallas.</p> <p>Using a 1.8 average occupancy (as the Reason Foundation report "Texas High Speed Rail: Caution Ahead" from February, 2017 does), and keeping all the other numbers the same, the number of cars taken off the road would be 9,753 a year, or 33% fewer cars taken off the road. This it itself would cause all of the emissions calculations to be flawed.</p> <p>None of the calculations based on the 7.2 million riders can be verified, as the 7.2 million ridership number itself can't be verified.</p> <p>There is no way to know what average passenger occupancy went into the 7.2 million ridership number, as the FRA is using a proprietary, secret document to get the ridership number. Was it 1.2? Was it 1.8? Is the 7.2 million riders even based on cars on the road? This is not open government.</p> <p>The DEIS and the public comment process is fatally flawed and the DEIS should be scrapped and a decision of NO BUILD should be issued immediately.</p> <p>Thanks, Julie Villaescusa</p>	
Julie Villaescusa	3/9/2018	Website	<p>Julie Villaescusa another one</p> <p>Gmail - Texas Central HSR DEIS - VMT Removed Doubled - NEPA Clean Air Act Issue Texas Central HSR DEIS - VMT Removed Doubled - NEPA Clean Air Act Issue The DEIS has doubled the Vehicle Miles Traveled (VMT) removed that they use for the emissions calculations. AECOM uses their calculation of cars per year taken off the road and then inexplicably multiplies that by the number of miles in a ROUNDTRIP between Houston and Dallas. This is a major mistake, as VMT affects emissions calculations. Notwithstanding the fact that the 7.2 million riders is wrong, and the 1.2 passengers per vehicle is probably wrong; here is what they do: They take the 7.2 million riders (which includes all the riders, if I go to Dallas and come back 2 days later, I am 2 of the 7.2 million - THIS IS IMPORTANT!) Then multiply by .89 because they say car passengers make up 89% of the existing market to get the number car passengers diverting to the train Then they divide by 1.2 passengers by car to get the number of cars taken off the road per year like so: <math>7,200,000 * .89 = 6,408,000</math> passengers diverted from cars per year <math>6,408,000 / 1.2 = 5,340,000</math> cars removed from road per year So we get 5,340,000 cars per year taken off the road. This is the total, a single roundtrip would make up 2 of the 5,340,000 cars. (You can divide the 5,340,000 by 365 to get the 14,630 cars per day taken off but we don't need that for this - just showing what the number is.) SO to get VMT removed, you would multiply 5,340,000 cars per year by the 239 miles between Dallas and Houston, like so: <math>5,340,000 * 239 = 1,276,260,000</math> VMT removed. BUT then they do this: "Because IH-45 is the principle and practical route used for Dallas-Houston travel, a city center-to-city center distance of 239 miles was assumed for the trip distance. Consistent with the average length of stay assumption of two days (see Appendix F, TCRR Conceptual Engineering Design Report), temporary stays with round trips back to the origin was assumed. The round trip distance and calculated cars/year were used to calculate the VMT that would have been traveled in the absence of the Build Alternatives, as shown in Table 3.2-4. Round trip distance X cars/year = VMT" And they come up with a total of 2,552,520,000 VMT. Or double. Because the 7.2 million riders already counts a roundtrip as 2. pages 3.2-13 to 3.2.14 in the DEIS This is BIG because it is NEPA - Clean Air Act is number one in the list on the FRA website. VMT removed directly affects all the emissions calculations. This isn't minor, this is a MAJOR mistake. It's unclear if the division between Houston and Dallas is some sort of smoke-screen to hide the doubling of the VMT. There is no obvious reason to divide travelers as to originating in Dallas or Houston as both would be counted towards VMT in both Dallas and Houston. The DEIS should immediately be rescinded. FRA should immediately issue a decision of NO BUILD. Barring that, AECOM has proven that they are not qualified to create a DEIS for the FRA. AECOM should be fired from the project - the DEIS must be reviewed by competent professionals or thrown out. Thanks, Julie Villaescusa</p>	Refer to BA-9, ED-1, NE-1, NV-9, PN-3, TC-3, TR-6 and TR-7.
Julie Villaescusa	3/9/2018	Website	<p>The I-45 corridor was eliminated by the FRA before the DEIS partly due to to travel time (this appears to be a violation of NEPA also as it places travel time over all other NEPA considerations, including the Clean Air Act, Historic Preservation, Environmental Justice, and Noise and Vibration): "To roughly parallel I-45 would require slower speeds around curves and would not achieve the TCR's technical requirement of a 90-minute travel time." Dallas to Houston High-Speed Rail Project Corridor Alternatives Analysis Technical Report -August 10, 2015 - p 14 The DEIS contains speed charts for the proposed HSR system: However, these times are based on "The train operates between Houston and Dallas without encountering any speed restrictions other than those imposed at the stations" DEIS 234180-AFN-REP-Conceptual Engineering Report.Docx Page 26 of 199</p> <p>Noise and Vibration is a NEPA issue. One way to control the noise of the HSR is to lower the speed of the trains. Do any of the routes meet the purpose and need of 90 minutes travel time if speed has to be decreased to combat noise issues? Also, it appears that the rural counties may reject Texas Central re-routing roads over rail, or re-routing roads at all. Will this change the inclines and curves and slow the HSR down? The Travel Times must be recalculated allowing for 1) slower speeds in residential areas and 2) any changes in incline or curve due to not being able to re-route roads. If any alignment then fails the 90-minute travel time, it must be rejected as the I-45 corridor was.</p>	Refer to ED-1, NV-9, TC-3, TR-6 and TR-7. The first step in the alternatives screening process is to determine if an alternative does not meet the purpose and need. If it doesn't then it is not carried forward for detailed study. That is in line with NEPA.

Julie Villaescusa	3/9/2018	Oral	<p>Hi, my name is Julie Villaescusa. The DEIS is fatally flawed. The DEIS process is fatally flawed. Earlier in the process, Economic Viability was used to remove entire corridors from consideration. The FRA allowed Economic Viability to trump all NEPA requirements such as the Clean Air Act, Historic Preservation, Economic Justice - which includes protections for minority communities, and Noise and Vibration. Then the FRA removed Economic Viability from the DEIS, even though no proof of Economic Viability was ever provided. Ridership is grossly exaggerated and not backed up by any data. The ridership number - 7.2 million riders per year in 2040 - is from Texas Central's own proprietary report. The 7.2 million is an extreme outlier. There are other, publicly available reports that the DEIS could have used - Reason Foundation estimates 1.4 million riders per year and TxDOT estimates 700,000 to 2.7 million riders per year. Using a secret ridership report for the DEIS not open government. Looking at some of the hoops they jumped through to do calculations in the DEIS, I don't think the people who wrote the DEIS got to see the secret ridership report either. The DEIS uses round trip miles instead of one-way trip miles to calculate the VMT, or vehicle miles traveled. Therefore, the VMT removed is doubled and all of the air quality calculations are incorrect. The DEIS says that 81.5 million gallons of gas would be saved each year. That, like the VMT, has been doubled. The DEIS says that the State of Texas will receive \$15 to \$39 billion in sales tax from ticket sales. Texas won't collect \$15 to \$39 billion in sales tax from HSR ticket sales. The state of Texas will collect ZERO DOLLARS in sales tax from HSR ticket sales. Texas does not levy sales tax on transportation. A Texas transportation company would know that. Texas Central is not a Texas transportation company. How can AECOM, who made a \$39 billion-dollar error, be allowed to continue on this project? How can AECOM, who miscalculated all of the emissions calculations be allowed to continue on this project? Air quality is directly related to NEPA. They had 100,000 hours by hundreds of experts to create this flawed document. And we had 75 days to review. All the significant errors in the DEIS have not been caught. The DEIS states that no build is not an option, this, like the ridership, air quality calculations and sales tax is not true. The DEIS is fatally flawed. No build is the only option. ---- I eliminated this line from my speech, but since Controller Brown used the 2.5 billion dollars in tax benefit in his remarks, I am including it here: Texas Central released a summary of a report in October of 2015 that shows a table saying the direct state and local tax impact will be 2.5 billion dollars. It says that the tax forecast includes retail sales tax on ticket sales. (Note: Texas does not levy sales tax on transportation). ---- I would hope that my elected officials and others would join me in requesting that all of the data in the DEIS be reviewed by an outside company. In addition, the DEIS must be based on publicly available data - the public must be able to review how the 7.2 million riders per year was obtained. Today is the last day to comment on the DEIS. I hope that my elected officials comment in favor of open government.</p>	<p>Refer to AQ-2, AQ-3, AQ-7, AQ-8, BA-6, BA-8, GN-2, GN-3, NE-1, PI-3, SC-3 and SC-17.</p>
Julie Villaescusa	3/5/2018	Email	<p><a href="http://www.kcentv.com/article/news/local/verify-would-the-proposed-texas-bullet-train-delay-firstresponders/500-525193528">http://www.kcentv.com/article/news/local/verify-would-the-proposed-texas-bullet-train-delay-firstresponders/500-525193528</a>                      "Channel 6 then asked Texas Central Partners Regional Vice President David Hagy about the roads issue and got a very different response. "This train is grade separated all the way, It will never cross a road or interact with traffic," Hagy said. "We go over all public roads, we are not allowed to close any public road." Why is David Hagy saying that "We go over all public roads" when the DEIS shows many "road over rail" in Table 16: Roadways Impacted In EJ Communities, in Appendix C: Roadway Grade Separation Database, and Tables 3.11-43 through 3.11-47?                      Is this another huge error in the DEIS or is Hagy an uninformed spokesperson? I don't trust either one of them. The only option for this misinformed DEIS or misinformed company is NO BUILD. The DEIS should be scrapped.</p>	<p>Refer to BA-6, TC-7 and TR-8.</p>
Julie Villaescusa	3/2/2018	Email	<p>Hi Kevin, Texas Central has this form letter that people can send from their website. It ends: "As an electric train, this system will also be the best environmental alternative as 4 of the counties served are already air quality non-attainment status. This innovative new industry reduces road congestion, improves local economies and creates new jobs for Texans. I welcome a faster, safer and cleaner transportation alternative to reduce congestion because it's good for Texas!"                      However, this is all in great doubt, and emissions may actually increase in the non-attainment counties. The DEIS uses this to obtain the 5,340,000 cars trips per year removed:                      "For the air quality emissions estimation at the full-service level (2040) scenario, the annual ridership of 7.2 million passengers, existing 89 percent share of people using passenger cars to travel between Dallas and Houston and average passenger occupancy of 1.2 passengers per car were then used to calculate the number of annual car trips of 5,340,000 cars per year. It should be noted that this number of vehicles that would no longer travel IH-45 between Houston and Dallas would equate to 14,630 vehicles per day, or about 14 percent of the 2035 annual average daily traffic of 106,475 vehicles per day projected in transportation planning documents for this corridor." DEIS p 3.2-13                      Why would AECOM be reverse engineering these numbers anyway? Did they not have access to the secret ridership report? The 7.2 million riders per year is in huge doubt. Reason states 1.4 million; TxDOT between 700,000 and 2.7 million. 7.2 million is way out of line.                      Why use the 89% existing share in the calculation? Surely millions of the 7.2 million riders are induced. How else would the number be so high? Why use 1.2 passengers per car? 1.2 passengers per car is used in Appendix F, but that is people going to the station, not between Dallas and Houston. Surely to get to 7.2 million riders, the cars would have to be crammed full. For example, Reason uses 1.8 riders per car.</p>	<p>Refer to GN-2 and GN-3.                      The cars removed figures were calculated based on TCRR ridership numbers, trip assumptions, and vehicle occupancy for the Final EIS. The average passenger occupancy of 1.2 passengers/car was a separately used figure employed for planning the station capacity for parking and accommodating riders arriving by various modes of passenger vehicle (i.e. car, taxi etc.) travel to the station and was commensurate with average occupancy used in State transportation planning at the time the Draft EIS was developed. Conceptually this would reflect the numbers of passengers dropped off that would otherwise be using cars, for the share of travel mode that would be using cars without the HSR (89%). Because this was project-specific it was adopted. This is consistent with what was used in state transportation planning (1.25) [Texas A&amp;M Transportation Institute Report PRC 15-40 F, Methodologies Used to Estimate and Forecast Vehicle Miles Traveled (VMT), July 2016 ]. Actual surveyed vehicle</p>

			Just changing this variable, the cars per year is taken down to 3,560,000. No one knows what the secret ridership report used - one of the many reasons the ridership report should not be secret. All Aboard Florida had a ridership and revenue study as an appendix to its DEIS. THEN the DEIS uses roundtrip miles on every emissions calculation. This is wrong, as the 7.2 million riders contains all the trips - a roundtrip would count as 2. The VMT (vehicle miles traveled) is doubled on every calculation, rendering every calculation wrong and useless. The only thing the DEIS "confirms" is that AECOM should be fired and the DEIS trashed. Thanks,	occupancy in the state had been falling below 1.2, including in the Dallas-Fort Worth area, as indicated in the sources with state vehicle occupancy rates. A state-specific vehicle occupancy rate was updated only in late 2017 after issuance of the Draft EIS was initiated. This information, used for estimating roadway user delay costs, recommended a revision of the previous rate of 1.2 to 1.5 based on newer national survey data.
Julie Villaescusa	3/5/2018	Email	Are the Harris County Miles supposed to be from the Montgomery County line to the City Center? If so, they are way overstated. And then all the miles are doubled. Question: would it be easier to list the numbers in this document that are correct? As always, the DEIS is fatally flawed and should be scrapped. AECOM has made too many significant errors to work on this project any longer. NO BUILD is the only option.	Refer to AQ-3, AQ-12 and SC-3.
Roberto Villalobos	1/17/2018	Email	This is a waste of money and backward thinking. Trains are old technology. Why bother with taking a train when planes are far more efficient and aren't tied down to specific stops. I would rather drive from Dallas to Houston so I don't have to rent a car. This train is no advantage over flying. Not to mention all of the eminent domain needed to steal peoples land.	Refer to ED-1, PN-3 and TC-2.
Jose Villanueva	2/20/2018	Website	I am a Texas resident and a US Army soldier currently stationed in South Korea. I've been stationed in Japan and I am a huge advocate for high speed trains. I've had many opportunities to ride the Shinkansen and can say firsthand that there are a serious amount of benefits to having this train. The ride is very smooth, safe, and environmentally friendly. I never saw or read any incidents of accidents. The train never impeded on anyone's land or public roads and in Japan, those are at a premium. As an American, I've always wanted to be proud of our country and have always wished that we could live in more efficient healthy city, just as many developed Asian cities such as Tokyo and Seoul. Why not us? In these cities, walking and public transportation is the norm. It leads to a healthier and more active society and culture. Please, I implore you, let's build this train and lead the way for the rest of America. I still believe that Texas is the leader and best state in America!	Comment noted.
Edmund Von Nordeck	3/8/2018	Website	In both Dallas and Houston, the importance of connectivity must be keep in mind for the user. The hi-speed project must not become an "island" system without proper connections to other public transportation. Otherwise it losses its value as a true option of the user. In the built up city centers its difficult and expensive, but without taking into account the needs of the transportation user, it looses its value to reduce the congestion and environmental issues plagued by our metropolitan cities. The often referenced to, how convenient public transit is in Europe, Japan and China, is only available by providing each form of transit a common connecting point.	Refer to GN-8, TR-3 and TR-4.
Karen Vosdoganes	2/16/2018	Website	Please help move Texas into the 21st century by moving forward on construction of the Dallas to Houston high speed train. The 4 1/2 hour drive by car becomes more congested and dangerous each month to say nothing of the inconvenience and time wasted. Business people, senior citizens, families, and multiple other stakeholders need affordable, modern, rapid transportation between these two cities.	Comment noted.
Leon J. Vosek	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity. Kim Wade	2/24/2018	Website	I am writing this comment to oppose the location of the High Speed Rail. Currently the route cuts through Morgan Legacy Farm located on FM 709 and 3194. This ranch serves as a retreat (free of charge) to many medical service providers. The location of the route goes directly in front of the main lodge separating the rodeo arena, cabins and pastures (that are used for cattle). There will be no way to access these areas with the needed equipment to provide care for the cattle. Also this takes away from the ones using the ranch for retreat purposes. If the route was moved north of the existing power lines it would be saving Morgan Legacy Farm so it can continue to serve the community.	Refer to LU-5.
Kim Wade	2/28/2018	Website	I would like to make comments regarding the proposed route for the High Speed Rail as proposed by the FRA. Although I'm sure there has been much research that went into this southernmost proposed route, the chosen route seems to defy logic. The route crosses several local roads and divides several properties. The work on the roads that would be needed to follow this route would obviously add considerable cost to the construction of the rail line. Dividing properties that have been in families for many years (or even generations) also seems to not make much sense. One such property is the Morgan Legacy Farm. The proposed route would require the destruction of the majority of the structures on this property, both residential and ranch related. Over the years, the Morgan Legacy Farm has hosted literally hundreds of	Refer to LU-5.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

			groups of children and adults as an opportunity to experience Texas farm and ranch life. Not one of these groups has been asked to pay for anything! Running the train right through the middle of this property would literally make these events no longer possible. Alternatively, there is a nearby high-tension power line that seems to be a logical route for the rail to follow. It seems much more appropriate to run the train next to a high voltage power grid already existing. The environmental impact issues seem to make this a more logical route.	
Kim Wade	2/28/2018	Website	I have concerns about the high speed rail in Navarro County travelling through the intersection of 709 and 1394 cleaving Morgan Legacy Farm. At this highest portion in the county I believe significant damage will occur to the environment and water shed adversely impacting migratory waters of the US. Further by separating access of the Morgan Legacy Farm Lodge from the Rodeo Arena and Guest Houses and Stables the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared. My father in law has a staff with over 100 employees and family members visit this ranch, ride horses, take hay rides and enjoy the unique experience not offered by any similar property....all at no cost. I would ask that this 5-7 mile portion scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic on the county that would occur if Morgan Legacy Farm is traversed.	Refer to LU-5.
Kim Wade	2/28/2018	Email	I am writing this comment to oppose the location of the High Speed Rail. Currently the route cuts through Morgan Legacy Farm located on FM 709 and 3194. This ranch serves as a retreat (free of charge) to many medical service providers. Kim Wade	2/28/2018	Email	The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory water fowl of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. Furthermore, I am concerned about The impact on limited areas for special charitable giving events.	Refer to BA-3 and WW-2.
Kim Wade	2/28/2018	Email	The current high-speed rail routing will be detrimental to Morgan legacy Farm on 709. Dividing this Property and running a rail through it will make it next to impossible to keep a relaxed atmosphere that this Ranch has always provided. I can't even count the number of times that I've sat down there just listening to nature. I have always looked forward to my children been able to go to the ranch and play in the outdoors and learn about nature there. Rerouting the train further north with the powerlines or down I 45 would be a better option.	Refer to LU-5.
Michael Wade	1/31/2018	Email	I am lodging an objection to the proposed high speed rail line between Houston and Who would choose to use this rail system? Unless you live within walking distance of the downtown areas of Houston or Dallas, you would have to take some form of transportation to the stations, undergo security screening in the same way as using the airports, limit what baggage you could manage and absorb transportation costs at your destination The airlines now perform this same function without taking private lands. I can make the same trip in an automobile for \$25 and not undergo security screening and carry 1000 pounds of baggage. Added transportation is not needed. I think the typical passenger would not be the average person. Any estimate on ridership must be carefully examined. It would not be just to have the landowning Texan to pay for the few train riders that would benefit. Is there a public need????	Refer to GN-2, NE-1 and PN-3.
Mike Wade	1/31/2018	Email	I am lodging an objection to the proposed high speed rail line between Houston and Dallas for the following reason: The rail corridor will divide communities, Cut roads, and divide emergency response centers. The local county officials would be required to reinvent the local road systems, build additional county health and emergency fire facilities. These affected communities will be burdened for years with infrastructure redesign. It is highly unlikely the cities of Dallas and Houston will help with these costs. While the TCRR hopes to make a profit, the terrible cost to mitigate the speed rail's environmental damage will be left to the small communities.	Refer to SS-23.
Renee Wade	2/6/2018	Website	I am looking forward to the bullet train. This will help those here in Houston that need to travel to Dallas for medical, job, educational, and entertainment reasons.	Comment noted.
Suzanne Wade	2/24/2018	Website	I would like to make comments regarding the proposed route for the High Speed Rail as proposed by the FRA. This property listed as Morgan Legacy Farm located near FM 709 and 3194 is irreplaceable. Other than the obvious ecological damage if this route is used the charitable, economic and cultural benefits of this property would be forever lost. It appears to me that if this 6-7 mile line is moved north of the existing power line easement less damage to the county would occur.	Refer to LU-5.
Suzanne Wade	2/28/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and proved less damage to the county long term	Refer to LU-5.
Suzanne Wade	2/28/2018	Email	The current high-speed rail routing will be detrimental to Morgan legacy Farm on 709. Dividing this Property and running a rail through it will make it next to impossible to keep a relaxed atmosphere that this Ranch has always provided. Rerouting the train further north with the power lines or down I 45 would be a better option.	Refer to LU-5.
Suzanne Wade	2/28/2018	Email	I have concerns about the high speed rail in Navarro County travelling through the intersection of 709 and 1394 cleaving Morgan Legacy Farm. At this highest portion in the county I believe significant damage will occur to the environment and water shed adversely impacting migratory waters of the US. Further by separating access of the Morgan Legacy Farm Lodge from the Rodeo Arena and Guest Houses and Stables the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared. I would ask that this 5-7 mile portion scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic on the county that would occur if Morgan Legacy Farm is traversed.	Refer to LU-5.
Suzanne Wade	2/28/2018	Email	I would like to make comments regarding the proposed route for the High Speed Rail as proposed by the FRA. Although I'm sure there has been much research that went into this southernmost proposed route, the chosen route seems to defy logic. The route crosses several local roads and divides several properties. The work on the roads that would be needed to follow this route would obviously add considerable cost to the construction of the rail line. Dividing properties that have been in families for many years (or even generations) also seems to not make much sense. One such property is the Morgan Legacy Farm. The proposed route would require the destruction of the majority of the structures on this property, both residential and ranch related. Over the years, the Morgan Legacy Farm has hosted literally hundreds of groups of children and adults as an opportunity to experience Texas farm and ranch life. Not one of these groups has been asked to pay for anything! Running the train right through the middle of this property would literally make these events no longer possible. Alternatively, there	Refer to LU-5.

			is a nearby high-tension power line that seems to be a logical route for the rail to follow. It seems much more appropriate to run the train next to a high voltage power grid already existing. The environmental impact issues seem to make this a more logical route.	
Suzanne Wade	2/28/2018	Email	The current high-speed rail routing will be detrimental to Morgan legacy Farm on 709. Dividing this Property and running a rail through it will make it next to impossible to keep a relaxed atmosphere that this Ranch has always provided. Rerouting the train further north with the power lines or down I 45 would be a better option.	Refer to LU-5.
Suzanne Wade	2/28/2018	Email	I recently became aware of the possible loss of a property due to the proposed route of the HSR. This property listed as Morgan Legacy Farm located near FM 709 and 3194 is irreplaceable. Other than the obvious ecological damage if this route is used the charitable, economic and cultural benefits of this property would be forever lost. It appears to me that if this 6-7 mile line is moved north of the existing power line easement less damage to the county would occur.	Refer to LU-5.
Suzanne Wade	3/1/2018	Website	I am writing to ask you to please save the Morgan Legacy Farm and have the proposed route for the high-speed rail moved off the ranch. Almost 1,000 people have visited the ranch at no charge over the last five years, including many families, physicians, nurses and other health care providers, police, military, firemen and members of the YMCA, Y-GUIDES and Boy Scouts. Not only have these groups and children benefited from the opportunity to experience Texas farm and ranch life, but some of them have also used it as a place of respite for emotional and physical healing. The Morgan family has raised significant amounts of money for local charities by offering the use of the ranch in numerous charity auctions, including Catholic Charities, Ursuline Academy of Dallas and Our Lady of Perpetual Help School. So many individuals and charities have benefited and will continue to benefit from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults can continue to be enjoyed now and by future generations	Refer to LU-5.

Not only have these groups and children benefited from the opportunity to experience Texas farm and ranch life, but some of them have also used it as a place of respite for emotional and physical healing. The Morgan family has raised significant amounts of money for local charities by offering the use of the ranch in numerous charity auctions, including Catholic Charities, Ursuline Academy of Dallas and Our Lady of Perpetual Help School. So many individuals and charities have benefited and will continue to benefit from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults can continue to be enjoyed now and by future generations.	Refer to LU-5.

Suzanne Wade	3/3/2018	Email	I have concerns about the high speed rail in Navarro County travelling through the intersection of 709 and 1394 cleaving Morgan Legacy Farm. At this highest portion in the county I believe significant damage will occur to the environment and water shed adversely impacting migratory waters of the US. Further by separating access of the Morgan Legacy Farm Lodge from the Rodeo Arena and Guest Houses and Stables the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared. I would ask that this 5-7 mile portion scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic on the county that would occur if Morgan Legacy Farm is traversed.	Refer to LU-5.
Suzanne Wade	3/3/2018	Email	I would like to make comments regarding the proposed route for the High Speed Rail as proposed by the FRA. Although I'm sure there has been much research that went into this southernmost proposed route, the chosen route seems to defy logic. The route crosses several local roads and divides several properties. The work on the roads that would be needed to follow this route would obviously add considerable cost to the construction of the rail line. Dividing properties that have been in families for many years (or even generations) also seems to not make much sense. One such property is the Morgan Legacy Farm. The proposed route would require the destruction of the majority of the structures on this property, both residential and ranch related. Over the years, the Morgan Legacy Farm has hosted literally hundreds of groups of children and adults as an opportunity to experience Texas farm and ranch life. Not one of these groups has been asked to pay for anything! Running the train right through the middle of this property would literally make these events no longer possible. Alternatively, there is a nearby high-tension power line that seems to be a logical route for the rail to follow. It seems much more appropriate to run the train next to a high voltage power grid already existing. The environmental impact issues seem to make this a more logical route.	Refer to LU-5.
Suzanne Wade	3/3/2018	Email	The current high-speed rail routing will be detrimental to Morgan Legacy Farm on 709. Dividing this Property and running a rail through it will make it next to impossible to keep a relaxed atmosphere that this Ranch has always provided. Rerouting the train further north with the power lines or down I 45 would be a better option.	Refer to LU-5.
Suzanne Wade	3/3/2018	Email	I recently became aware of the possible loss of a property due to the proposed route of the HSR. This property listed as Morgan Legacy Farm located near FM 709 and 3194 is irreplaceable. Other than the obvious ecological damage if this route is used the charitable, economic and cultural benefits of this property would be forever lost. It appears to me that if this 6-7 mile line is moved north of the existing power line easement less damage to the county would occur.	Refer to LU-5.

This property listed as Morgan Legacy Farm located near FM 709 and 3194 is irreplaceable. Other than the obvious ecological damage if this route is used the charitable, economic and cultural benefits of this property would be forever lost. It appears to me that if this 6-7 mile line is moved north of the existing power line easement less damage to the county would occur.	Refer to LU-5.
Suzanne Wade	3/6/2018	Website	I am writing to ask you to please save the Morgan Legacy Farm and have the proposed route for the high-speed rail moved off the ranch. Almost 1,000 people have visited the ranch at no charge over the last five years, including many families, physicians, nurses and other health care providers, police, military, firemen and members of the YMCA, Y-GUIDES and Boy Scouts. Not only have these groups and children benefited from the opportunity to experience Texas farm and ranch life, but some of them have also used it as a place of respite for emotional and physical healing. The Morgan family has raised significant amounts of money for local charities by offering the use of the ranch in numerous charity auctions, including Catholic Charities, Ursuline Academy of Dallas and Our Lady of Perpetual Help School. So many individuals and charities have benefited and will continue to benefit from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults can continue to be enjoyed now and by future generations.	Refer to LU-5.
Suzanne Wade	3/6/2018	Website	I have concerns about the high speed rail in Navarro County travelling through the intersection of 709 and 1394 cleaving Morgan Legacy Farm. At this highest portion in the county I believe significant damage will occur to the environment and water shed adversely impacting migratory waters of the US. Further by separating access of the Morgan Legacy Farm Lodge from the Rodeo Arena and Guest Houses and Stables the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared. I would ask that this 5-7 mile portion scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic on the county that would occur if Morgan Legacy Farm is traversed.	Refer to LU-5.
Suzanne Wade	3/6/2018	Website	I would like to make comments regarding the proposed route for the High Speed Rail as proposed by the FRA. Although I'm sure there has been much research that went into this southernmost proposed route, the chosen route seems to defy logic. The route crosses several local roads and divides several properties. The work on the roads that would be needed to follow this route would obviously add considerable cost to the construction of the rail line. Dividing properties that have been in families for many years (or even generations) also seems to not make much sense. One such property is the Morgan Legacy Farm. The proposed route would require the destruction of the majority of the structures on this property, both residential and ranch related. Over the years, the Morgan Legacy Farm has hosted literally hundreds of groups of children and adults as an opportunity to experience Texas farm and ranch life. Not one of these groups has been asked to pay for anything! Running the train right through the middle of this property would literally make these events no longer possible. Alternatively, there is a nearby high-tension power line that seems to be a logical route for the rail to follow. It seems much more appropriate to run the train next to a high voltage power grid already existing. The environmental impact issues seem to make this a more logical route.	Refer to LU-5.
Suzanne Wade	3/6/2018	Website	The current high-speed rail routing will be detrimental to Morgan Legacy Farm on 709. Dividing this Property and running a rail through it will make it next to impossible to keep a relaxed atmosphere that this Ranch has always provided. Rerouting the train further north with the power lines or down I 45 would be a better option.	Refer to LU-5.

At this highest portion in the county I believe significant damage will occur to the environment and water shed adversely impacting migratory waters of the US. Further by separating access of the Morgan Legacy Farm Lodge from the Rodeo Arena and Guest Houses and Stables the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared. I would ask that this 5-7 mile portion scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic on the county that would occur if Morgan Legacy Farm is traversed.	Refer to LU-5.

Suzanne Wade	3/7/2018	Website	I would like to make comments regarding the proposed route for the High Speed Rail as proposed by the FRA. Although I'm sure there has been much research that went into this southernmost proposed route, the chosen route seems to defy logic. The route crosses several local roads and divides several properties. The work on the roads that would be needed to follow this route would obviously add considerable cost to the construction of the rail line. Dividing properties that have been in families for many years (or even generations) also seems to not make much sense. One such property is the Morgan Legacy Farm. The proposed route would require the destruction of the majority of the structures on this property, both residential and ranch related. Over the years, the Morgan Legacy Farm has hosted literally hundreds of groups of children and adults as an opportunity to experience Texas farm and ranch life. Not one of these groups has been asked to pay for anything! Running the train right through the middle of this property would literally make these events no longer possible. Alternatively, there is a nearby high-tension power line that seems to be a logical route for the rail to follow. It seems much more appropriate to run the train next to a high voltage power grid already existing. The environmental impact issues seem to make this a more logical route.	Refer to LU-5.
Suzanne Wade	3/8/2018	Website	I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.	Refer to LU-5.

On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.</p>	Refer to LU-5.

Suzanne Wade	3/8/2018	Website	<p>I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.	Refer to LU-5.
Suzanne Wade	3/8/2018	Website	I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.</p>	Refer to LU-5.
Suzanne Wade	3/8/2018	Website	<p>I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.	Refer to LU-5.
Suzanne Wade	3/8/2018	Website	I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. Suzanne Wade	3/8/2018	Website	<p>I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.</p>	Refer to LU-5.

Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.</p>	Refer to LU-5.

Suzanne Wade	3/8/2018	Website	I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.	Refer to LU-5.
Suzanne Wade	3/8/2018	Website	I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.	Refer to LU-5.

As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.</p>	Refer to LU-5.
Suzanne Wade	3/8/2018	Website	<p>I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.	Refer to LU-5.
Suzanne Wade	3/9/2018	Website	I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. Suzanne Wade	3/9/2018	Website	<p>I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.</p>	Refer to LU-5.

The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.	Refer to LU-5.

Suzanne Wade	3/9/2018	Website	<p>I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.</p>	Refer to LU-5.
Suzanne Wade	3/9/2018	Website	<p>I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.</p>	Refer to LU-5.

As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.</p>	Refer to LU-5.
Suzanne Wade	3/9/2018	Website	<p>I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.	Refer to LU-5.
Suzanne Wade	3/9/2018	Website	I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.</p>	Refer to LU-5.
Suzanne Wade	3/9/2018	Website	<p>I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.</p>	Refer to LU-5.

Suzanne Wade	3/9/2018	Website	I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. Suzanne Wade	3/9/2018	Website	I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.	Refer to LU-5.

Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. The Morgan family graciously allowed the Morgan Legacy Farm to be auctioned off at the gala for two separate weekends, raising a significant sum for OLPH and directly benefiting the families who want their children to enjoy a quality, faith-based education in a safe and caring environment. Not only was the use of the property itself donated, but all food, beverages and activities are provided completely free of charge, with the Morgan Legacy Farm covering 100% of the cost. The ability of schools and charitable organizations to use the Morgan Legacy Farm to raise money for children and other worthy causes is an invaluable asset that will be lost forever if the high-speed rail is built along the proposed route. I personally know of so many individuals and charities that have benefited from this unique and irreplaceable property. Please move the line north of the existing power line easement so that the Morgan Legacy Farm will be saved and the charitable, economic and cultural benefits of this property which have been enjoyed by hundreds of children and adults in the past can continue to be enjoyed by future generations.</p>	Refer to LU-5.
Suzanne Wade	3/9/2018	Website	<p>I would like to take this opportunity to express my concern about the proposed high-speed rail in Navarro County traveling through the intersection of FM 709 and 3194 which would cleave the Morgan Legacy Farm and cause the destruction of most of the structures on the property. In addition to the negative environmental and ecologic impact that the rail would have in this location, the benefits of the Farm for charitable fundraising will be destroyed forever. As a volunteer with a number of charitable organizations in the Dallas area, I have seen firsthand how the Morgan Legacy Farm has been used to raise many thousands of dollars for local schools and charities. On March 3 of this year, I volunteered for the annual gala of Our Lady of Perpetual Help, a Dallas elementary school with 90% of its students living at or below the poverty line. Because virtually all of its 201 students require tuition assistance, the funds raised from the gala are vital for covering tuition and related costs. William Wade	2/21/2018	Website	The automatic email to the FRA I just sent is set up where it does not explain that what I was sending was in support of the high speed train from Houston to Dallas. I am strongly opposed as this semi-government company was granted the right of eminent domain (in my opinion illegally). In addition, when the project fails Texas taxpayers will be responsible financially for this unneeded folly.	Refer to ED-1 and GN-4.
William Wade	2/24/2018	Website	"I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and proved less damage to the county long term."	Refer to LU-5.
William Wade	2/24/2018	Website	"I recently became aware of the possible loss of a property due to the proposed route of the HSR. This property listed as Morgan Legacy Farm located near FM 709 and 3194 is irreplaceable. Other than the obvious ecological damage if this route is used the charitable, economic and cultural benefits of this property would be forever lost. It appears to me that if this 6-7 mile line is moved north of the existing power line easement less damage to the county would occur."	Refer to LU-5.
William Wade	2/24/2018	Website	The current high-speed rail routing will be detrimental to Morgan legacy Farm on 709. Dividing this Property and running a rail through it will make it next to impossible to keep a relaxed atmosphere that this Ranch has always provided. I can't even count the number of times that I've sat down there just listening to nature. I have always looked forward to my children been able to go to the ranch and play in the outdoors and learn about nature there. Rerouting the train further north with the powerlines or down I 45 would be a better option.	Refer to LU-5.
William Wade	3/9/2018	Website	This Semi Government entity has somehow been given the right of eminent domain. I can't believe that is legal. This proposed project is not necessary and will fail leaving the taxpayers to pay the cost. This project is a folly of the worst kind. William Wade	Refer to ED-1, GN-4 and PN-3.
Vicki Wagner	2/27/2018	Website	This high speed rail will affect my community negatively. My neighborhood's property values will plummet with a high speed rail line barreling through it. I moved to the county for peace and quiet in an acreage community and now this. This will benefit no one in the long run and is becoming a ridiculous plan that will not be able to be funded privately. This plan for high speed rail needs to be eliminated.	Refer to VA-1.
Gerald Wagnon	2/6/2018	Website	I look forward to the jobs, tax and other benefits that the Grimes County HSR station will bring to the north part of Grimes County. The utility corridor route has the benefit of displacing fewer residents from their homes and has far less of an environmental impact than, for example a tolled highway or conventional rail line along the same route. It should also provide economic benefits far beyond the investment by Texas Central for the area along Texas Highway 30 and adjacent areas. I have talked to a number of people who share this view but have been afraid to speak out due to opposition by a vocal minority.	Refer to BA-5, BA-7 and SC-19.
Raphael Wakefield	2/3/2018	Website	I support the Utility Corridor routing.	Comment noted.
Linda Waldrop	1/31/2018	Handwritten	1) Put it on I-45 where you don't have to take people's land!! 2) We support if it goes up I-45 corridor. 3) We will support no other routes. 4) This project does not seem well though at out - Who is TCRR/ Where are their trains & rails?? Spanish speakers & Are they citizens of the u.s?	Refer to BA-9, ED-1, NE-1 and PN-3.
Marianne Waldrop	2/19/2018	Website	Build it!	Comment noted.
William Waldrop	2/18/2018	Website	I am extremely excited about this project and the benefits it will bring to all of Texas in ways of commerce and a safe and efficient travel option. I have ridden high-speed rail in Europe and it is amazing! The fact that is a privately financed project with no government taxpayer money is great news for all Texans. Please approve this project and let Texas entrepreneurship show the rest of the country that Texas can build it with private money, and make it a success!	Comment noted.
William Waldrop	3/5/2018	Website	WILLIAM WALDROP: My name is William Waldrop. I was born and raised in Houston and I'm a proud Houstonian and proud Texan. I have had the distinct opportunity in my life to ride passenger trains, not only all over this country but in Europe. So I speak from experience on my positive look towards this project. I also understand the opposition to it. But I look back to what has developed in Texas since the 1800s, such as the oil industry. The oil boom was in Texas. We have the world's first domed stadium in the Astrodome. We have the world's biggest and best medical center. We have NASA. Texas is a big state with passionate people that love to create and make a success of anything they put their mind to and this train will be no different. I believe the train will be a great benefit to not only people that live in Houston and in Dallas, it will be a benefit to everybody in the state of Texas, including the landowners affected because it will increase taxes for their county to go to	Comment noted.

			<p>the schools and the roads and however they want to use those taxes. I'm thrilled with the fact that it is funded by private money. It is not a government project and that's a real win-win for everybody. If it fails, it think everybody else needs to, also. If you look at the current infrastructure of Texas -- strike that. Looking back, all of Texas has grown tremendously in the population growth, in the weathering growth. We are a leader in the world for building revenue, being business positive, low taxes, a good business climate and that's why so many businesses and people move here because of that great climate to exceed in Texas and you can do it well in Texas. To me, in my mind, I see the infrastructure of Texas of millions of people as a busted can of biscuits because you bust that can and it's bulging at the seams and that's our infrastructure right now. We can't build bigger airports. We can't build wider highways. We need to lead with technology in this country in using high-speed rail. Anybody that has ridden high-speed rail in other countries knows how amazing it is, how quiet, safe, comfortable. It's truly a mind-changing event because although I like trains, it was mind blowing on how amazing it was and people I talk to on those trains are like -- from America are, like, why don't we have this in America. Amtrak has not been successful because it was a government project and it depended on freight railroads to run their passenger trains. This is a whole different system. It will have its own rail, its own track systems and won't interchange with the freeways. They're not dependent on other railroads. This is their own in-house system. It's a proven technology that is safe. After 50 years of use in Japan, they've never had an accident or injury or crisis. That makes this train safer than you walking down the street right now. It's the safest mode of transportation in the world. If you look at North America, actually, the western hemisphere from Alaska to the tip of South America, there is nobody in those tens of hundreds of miles that has high-speed rail, but other advanced countries in Europe do. Yes, they're smaller, but we have the population to support it more than they do. Texas was first in the oil industry and many other things that we have developed in this state and have led the world in things. I want to lead this country with this train and let us prove, once again, how great Texas is in starting something new, being bold, doing it right, making it successful, making it profitable and changing the face of transportation not only in the state at first but eventually in the entire country. The thing that would make my day and that I hope to hear one day are these six words: Welcome aboard the Texas bullet train. Thank you.</p>

C. Robert Walker	2/7/2018	Website	THIS POTENTIAL EXPANSION OF PASSENGER RAIL IS WHAT THE NATION NEEDS TO SHOW HOW WE CAN MOVE PEOPLE RAPIDLY AND SAFELY OFF THE HIGHWAYS WITH RELIABILITY AND COMFORT. WHAT WE NEED IS LOTS MORE INITIATIVES LIKE THE TEXAS RAIL TO HELP AMTRAK	Comment noted.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			AND OTHER PASSENGER RAIL PROGRAMS GET MOMENTUM MOVING FORWARD. THE STATE AND FEDERAL GOV'Ts SPEND HUNDREDS OF MILLIONS OF TAXPAYERS DOLLARS ON THE HIGHWAYS AND AIRPORTS WITH A PITTANCE GOING TO THE RAILROAD PASSENGER INDUSTRY. THAT IS MORE WASTE THAN WE CAN IMAGINE! ALL SECTORS OF THE USA NEED EXPANDED PASSENGER RAIL SERVICE AND HERE IN PITTSBURGH, PA THE PARTICIPATION WOULD BE EXTRAORDINARY ESPECIALLY WHEN CONSIDERING THE CONDITION OF THE HIGHWAY SYSTEM ( PENNDOT ) AND ENDLESS WEATHER RELATED DELAYS IN AIR TRAFFIC.	
Colvin Walker	12/28/2017	Email	My family owns property and homes in Madison County within the proposed route of the Dallas to Houston High Speed Rail Project. This property was purchased in 1967, and on which we built our residence in 1970. Now we find we will be directly impacted by the route cutting our properties in half which will disrupt our ranching operation as well as discount the value of land as well as homes and improvements, if we were willing to sell to private buyers. Also, our property is directly on the South side of FM 2289 across the road from the Ten Mile Cemetery where we own cemetery lots and adjacent to Union Baptist Church which just recently rebuilt a new church facility which is in the path of the railroad. As you would expect, we are highly opposed to any project that disrupts our country way of life, particularly the TCR High Speed Rail Project.	Refer to CR-8, LU-11 and VA-11. Unable to verify address of property based on comment. The majority of Project is on viaduct. TCRR shall negotiate with the landowner to provide adequate crossings or compensation for land that is severed.
Colvin Walker	1/30/2018	Oral	I'm Colvin Walker. I am your neighbor over here in Madison County We live about two miles where the crow flies across OSR and what's called the 10 mile community. Now the way that is going to affect us — we have been there 50 years. We have lived on the property 48 years and it's a family operation. We have cattle and we have hay production and things that relate to farming and ranching. North of our property which extends on the south side of farm road 289. Adjacent to that is a cemetery and according to the maps that I looked at here this afternoon that preferred route just passes right over the corner of the church: right past the cemetery: right across the center of our land. Which also has that high high voltage lines which crosses there. There is also 30 plat lines that crosses in the right-of-way that high voltage line. It appears to me that might be a conflict as far as passing my line and across the corner of the church and right directly by the cemetery. You know we chose to have this kind of life. The people that came out and spoke and were interested in getting information about the environmental study. You know I understand that was their job but we asked them if the train is going to cross this property? If this property was exactly what you wanted would you buy it? No, they wouldn't. It is going to affect not only the environmental aspect of this but look at the economic effect it is going to have on our property. Property values are going to be devalued. Nobody is going to want to buy it. If that high-speed rail crosses anywhere in the vicinity of where they might want to buy a home or have a place. I am about to turn 85 years old and I hope to live to be 100 years old and I hope that the rest of my life I never see this train across our property.	Refer to CR-8 and VA-1.

Colvin Walker	2/5/2018	Letter	Feb 5, 2018 Madisonville, Tx Please see attached comments and photos. 1. Comments 2. Photos of Union Baptist Church - Ten mile Church is identified as Historical Church 3. Photos of ten mile Cemetery - copy of Plaque and certificate verifying Texas Historical Cemetery. * Property acquisition - I am told that TCRR does not have the Right of Eminent Domain to acquire your land and other properties at this time. However, if Eminent Domain is obtained, the train track constructors can condemn up to 2 miles either side of the track to obtain material for building the foundation for the track. * Financial impacts to farmers and ranchers deriving their livelihood from their land and other assets. * Road crossings and access to other property cut off by train track: Movement of livestock and farm equipment to other side of track. Will the County be responsible for maintain crossings on county roads? There are 3 county roads in our immediate area that will be affected. * If the train goes through our property it will tremendously reduce property values. Who wants to buy property that a train crossing cuts the land in half? * There is a High Voltage Electrical Transmission Line that crosses our property directly on the West side of a county road and the Union	Refer to CR-8, ED-1, ED-2, EU-1, EU-2, LU-11, LU-14, TR-7, TR-8, TR-10 and VA-1.

			Baptist Church and adjacent Ten Mile Cemetery. Within the East Side Right of way of the Highline are 2- 30 inch Pipe Lines crossing our property going from the Gulf Coast to Oklahoma. There is not enough distance for the train track between the High Voltage Line and the church and cemetery.	
Colvin Walker	2/5/2018	Oral	Listening to the comments that have already been made tonight, I'd just be restating some of those and the people that have just spoken here, is my neighbor just across the road there. I am a member of cemetery board of the 10-mile Cemetery and serve with Jimmy Caldwell. My property is 10 miles west of here which we purchased in 1957. We built our home on that place 48 years ago, and we have basically spent our career earnings purchasing land building a home doing all the improvement and investments and equipment that go with that. Now, the high speed train directly crosses our property right in the vicinity of where 10-Mile Carrington Cemetery is. We are directly across the road from that property. And I think it's shameful that we're in that route which is the proposed route. The line crosses our property and the pipelines that have been placed there, one of them was about 35 years ago and one of them was five years ago. And a lot of reason why we feel like this is this is not a suitable location for that high speed rail to fall on. There are a lot of other that they say we've heard about here tonight is environmental impact, but there are a lot of other concerns that we have as citizens of the county landowners; people that are here because we want to live in the rural area. And we don't want to have to give our property up and make a change, move, go somewhere else. Financially it's going to be a big impact. I would advise you, I'm going to take my comments that I've prepared here and I'm going to send those in. And I would ask that you do the same thing. Get one of those sheets, you can go online and do that, but please give some response to your feelings and how you feel like this is going to impact our community. Thank you.	Refer to CR-8.
Danielle Walker	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.
Harry Walker	2/6/2018	Oral	I'm Harry Walker. I'm the Grimes County road and bridge engineer. And while Mr. Mannina has stolen most of my points already, I am responsible for trying to maintain the roads that will be used to access this project during construction, and I can tell you with certainty there is not a road in Grimes County that will withstand this kind of traffic, particularly for this period of construction duration. There's going to be a tremendous negative impact on the county due to the construction just in terms of trying to maintain our roads. The same impacts I'm also concerned about on our drainage because most of the waterways that are transversed by this project are not in studied flood plains, but they will be impacted, and they do not have the protections that FEMA provides under the National Flood Insurance Program. I'm also very concerned about the effect of the tremendous borrow pits that will have to be built to provide the materials for construction of this project and what impacts those will have on our ground water tables. Beyond that, I'll ask Mr. Mannina if he's got anything left to say. All right.	Refer to FP-1, LU-10, LU-14, TR-7, WW-1, WW-2 and WW-6.
Jennifer Walker	2/21/2018	Website	I can't wait for this project to become a reality. It's so stressful and tiring to visit Dallas and the train would change that. More tourism, less traffic is a great improvement.	Comment noted.
Thea Walker	2/16/2018	Website	I support the content in the EIS	Comment noted.
Sharock Wall	2/19/2018	Website	I support the privately funded HSR project and look forward to other cities being connected. I do think the Dallas station is not positioned properly - it would be best suited adjacent Dallas Union Station served by Amtrak/DART now. The adjoining property is vacant, owned by the city of Dallas and has substantial parking structure in place left unused since the demolition of Reunion Arena. The proposed station 1 mile away will negate many transit options and cause much more congestion as it is not easily accessed. It is owned by a TCRR investor who should work out a land swap w/city to put the North terminus in the city center where anyone intelligent (and honestly concerned w/connectivity) would want it to be. thank you Sharock Wall	Refer to GN-7, GN-8 and TR-3.
Waller Economic Development Corporation	2/6/2018	Oral	Good evening. I'm John Isom with the Director of City of Waller Economic Development Corporation. I'd like to say first I agree with all the concerns that have been expressed about the lack of financial feasibility of this project and the concerns it's going to end up back on the taxpayers. And also: it's going to have a permanent detrimental effect on agricultural land that in many cases: as we just heard, have been in family hands for many: many years. In addition: the City of Waller: Waller Council specifically has concerns about the (inaudible) effect on	Refer to ED-2, GN-4, LU-2, LU-3, LU-4, LU-11, NE-1, PI-1 and TR-1.

			major commercial development, the Waller Town Center. The Waller Town Center has been planned for several years now. The City has had the State Legislature create a management district for it as a part of our acknowledged strategy plan: and it is planned to be a 460-acre development northeast of the intersection of 290 and FM 2920 that will have nearly a \$300 million investment in retail: hotel: theater: medical: and housing development. So as you can imagine: this is a very important project to the City of IVA11er_ And the developers are at the Texas and the national conferences each year of the International Council of Shopping Centers, discussing with the national retailers the timing of this project. The problem is: the planned route of rail goes right through the middle of this planned development. The detrimental effects on this development have been reported twice now to FRA through the TXDOT meetings with the Waller County Sub-Regional Planning Commission in February 2016 and May 2017 _ Those detrimental effects on the whole project were ignored in the DEIS_ We believe that the DEIS NEPA process is flawed because of ignoring these important city plans, and we and it should result in a solution of no-build.	
Leslie Wallrath	1/30/2018	Oral	Leslie Wallrath I'm new to Leon County. Only been here about seven years. I'm a lawyer and I read through this. Number four, they want you to pay money if their sound barriers are not feasible or desirable You could put building sound installation. That would be a better choice for you to reduce your indoor noise. This is the federal government helping us tonight. You realize that: right? Number eight: they talk about endangered species so that is going to cost money because if there are any they are going to relocate them. Can the electric grid support the project? Did you read this? They are talking about adding capacity _ They might do it. That is going to cost money. The power that they might be able to give you h.wuld be what they are gomg to add, not what they haven't added yet. Well: hopefully it serves the needs of the train. They can't promise you that. Will the project require abandonment or closure of oil wells? Yes, it will This is going to cost you money not them. Will public roads be permanently closed? Not permanently: but you are going to pay to reroute your road. They're not Number 17 is the biggest lie of all. I am not even a rancher or a farmer. It says that this study comes with the land that we use to farm in Texas. In Texas is approximately 3% of the total acres of all the farmers in the state of Texas. Tha€s a lot. That's a whole lot and they tell you that the adverse impact on overall food production would not occur. That's a lie. They tell you the reason it won't occur is because there are other agricultural capacities within the study area. So your suppose to move your farm for them to have a train. Please remember, eminent domain. You're entitled to a jury trial no matter what they tell you. I'd like to be your lauyer_ Higher lawyers pay us. Don't pay them.	Refer to ED-2, EU-2, EU-4, LU-2, LU-11, NV-1, TR-7 and TR-8. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> . No public roads would be closed as a result of the Project.
C.W. Walsh	2/16/2018	Website	We need this train. It will connect families, create lots of jobs and bolster the Texas economy. Let's lead and not follow. Win not lose. Thank you.	Comment noted.
Catherine Walsh	2/6/2018	Handwritten	No this is not profitable. Will be too noisy will block roads & access against as cost will end up & citizens paying for it even though won't ride it. It will be easier & in some ways cheaper to drive to Dallas than take train since will have to drive to houston (takes 1-2 hr) or even Bryan - it takes about 1-1 1/2 hr might as well drive to Dallas - less time.	Refer to BA-4, GN-4, NE-1, NV-1 and TR-8.
Randall Walton	1/22/2018	Email	This train is designed to make money for the investors and cost taxpayers enormously. This boondoggle will not be able to meet his projections and the taxpayers have to take it over after it's ruined the rural way of life we moved to Grimes County in order to enjoy.	Refer to GN-4, NE-1 and PN-3.
Randall Walton	2/6/2018	Oral	My name is Randall Walton. I live in lola. I have a few notes I wanted to share with you-all. A lot of what I wanted to say has already said, so I don't want to be redundant. I recently moved to Grimes County. I don't have a long history with family owning anything. We moved out here in July, so pretty new. But we love it. We love the country around us. You know, we love the people we live near and around. One of the big things I've found about this--okay?--they put this train through, which is not actually going to go across my property, but if it goes anywhere near lola, what's going to happen to the property values in lola and lola ISD? You know, whatever supposedly taxes are going to pay towards the school district, will it offset the loss in property values and property taxes that we need to educate our kids? Additionally, this Shinkansen train--I probably mispronounced that, but sorry--they want to import from Japan has a 100 percent failure rate in sustaining itself without government bailouts anywhere in the world. Even the supposedly profitable Japanese line was built by the Japanese government and then gifted to the train. Moving on, you-all remember the Solyndra scandal a few years back? That was like \$535 million. Okay? That's chump change compared to this. Same thing, though--government funded loans guaranteed by who? The taxpayers, which is everybody here. All right? Again, we had to educate our kids. Right? To pay for roads. How are we going to do that when we're paying of this train? Actually, correction. Paying off the millionaire investors who bought in early, and they bought in because they knew they could get the taxpayers to pay them off. It's a project designed to fail, classic crony capitalism where the well-connected get paid off with taxpayer funding. I'm wanting to know when is the U.S. taxpayer going to come take over my mortgage on my and pay it off for me. It's fair, isn't it? This route is by far not the best route for connection Houston and Dallas. TxDOT already figured that out. It's called I-45. Fewer curves, fewer grade changes. I mean, the engineers can definitely attest to that. I'm not an engineer. But they chose this route because one of the initial investors owned land at the terminals in Dallas and in Houston. Surprise? And then bought land in Roans Prairie. But again, he has basically worthless land south of Dallas that was the ghetto. Not anymore. This is last thing I want to say. This is a 19th century solution looking for a problem in the 21st century. That's me.	Refer to BA-5, BA-9, GN-2, GN-4, GN-7, NE-1, TC-2 and VA-1.

Walton Texas GP, LLC	3/9/2018	Email	<p>Walton Texas, LP ("Walton") owns and/or acts for all other owners of over 1,200 acres of property in Ellis County, Texas that will be significantly impacted by the construction of the proposed Dallas to Houston High Speed Rail line ("Project"). This letter is submitted in response to requests for comments to the Draft Environmental Impact Statement ("DEIS") for the Project.</p> <p>Walton believes the DEIS fails to adequately consider the Project's substantial negative impacts, including those discussed in this letter. Accordingly, Walton requests that the Final Environmental Impact Statement ("Final EIS ") for the Project properly reflect all of the Project's impacts, including impacts on planned land uses. Further, Walton requests that upon analysis of these additional impacts and comments received from others, that you either revise the preferred route to avoid or minimize these impacts, or you select the "No Build" alternative. Walton owns an interest in and administers large tracts of land in Ellis County planned for development as master-planned communities. The first property ("Bluff Springs North") is a total of approximately 894 acres generally located south of FM 664, north of FM 983, and south and east of Bluff Springs Road. The Bluff Springs North property is planned for single-family homes, multi-family residential units, commercial uses, parkland, open space, and schools. The second property ("Bluff Springs South") is a total of approximately 313 acres generally located south of Wester Road, east of Palmyra Road, and west of Trumbull Road. The Bluff Springs South property is planned for single-family residential, parkland, and open space uses. Despite the assertion in the DEIS (page 3.13-1) that the DEIS considered "existing and planned land uses" and evaluated the compatibility of the Project with "applicable land use plans," that is not the case with respect to the Bluff Springs properties, and presumably other properties benefited by vested development rights under Texas law pursuant to land use plans. For the same reasons, Table 3.13-17 is inaccurate when it reports there is "no conflict" with local land use plans under any of the "Build" alternatives.</p> <p>The Bluff Springs properties were acquired and significant development entitlements obtained before, to Walton's understanding, there was any generally available public information that a private company would propose to run a privately owned and operated high speed rail project through the communities planned for those properties.</p> <p>Bluff Springs North is located in the extra-territorial jurisdiction of the City of Ferris, and that property is benefitted by a 2013 Development Agreement with the City entered into pursuant to Chapter 212 of the Texas Local Government Code. The Development Agreement, which is a public document that can be found in the City and County records, provides for the uses included in the master plan for the property, grants other important development rights, and gives rise to vested rights under Chapter 245 of the Texas Local Government Code with respect to the planned community. Bluff Springs South is not subject to the jurisdiction of any city, which provides exceptional development flexibility. In addition, both properties are contained (collectively) within Municipal Utility Districts (MUDs), governmental entities with all the powers and duties provided by the general law of the state of Texas applicable to municipal utility districts created under Section 59, Article XVI of the Texas Constitution. The MUDs substantially enhance both the ability to develop the properties and the ability to realize the full value potential of the properties.</p> <p>As it relates to the Bluff Springs properties, to Walton's understanding, the proposed route for the Project does not follow any existing infrastructure right-of-way; accordingly, the route fails to meet one of the three functional criteria for the Project. DEIS at ES-2 (environmental criteria of minimal impacts to the natural and built environments by maximizing adjacency to existing infrastructure right-of-way). Without limitation, as Walton understands it, the proposed route of the Project through the Bluff Springs properties does not follow the existing BNSF rail line or the existing high-voltage transmission line easements (i.e., the so called "Utility Corridor"1). DEIS at ES-4.</p> <p>Instead, the proposed route for the Project through the Bluff Springs properties runs through areas planned for residential subdivisions, green space, a park, and a school site. In addition, it appears the Bluff Springs North property would be further burdened by a permanent maintenance access road in addition to the typical minimum 100 foot wide "sealed corridor." It seems indisputable that the Project will materially and negatively affect the human, social and natural environment, including the use, enjoyment, and value of the Bluff Springs properties and the properties of others, by, for example:</p> <ul style="list-style-type: none"> <li>• subjecting future residents to between 68 and 80 train trips a day, 365 days a year;</li> <li>• creating a massive physical, aesthetic, and community divide through planned neighborhoods;</li> <li>• interrupting planned roads and traffic flows;</li> <li>• generating unacceptable levels of light, noise, and vibration inconsistent with planned homes, schools, and parks (sensitive land for these types of impacts);</li> <li>• raising safety, security and health concerns that will impact the ability to fully develop the properties;</li> <li>• requiring substantial buffer areas on both sides of the planned route;</li> <li>• obstructing natural drainage patterns;</li> <li>• requiring unusual, and likely extraordinary, adjustments of utility plans;</li> <li>• subjecting future residents and other individuals to the noise, light, and other disturbances of night-time maintenance activities;</li> <li>• causing diminished air quality due to a projected increase, for example, in NOx and VOC emissions in Ellis County during estimated</li> </ul>	<p>Refer to BA-6, BA-8, LU-9, NE-1, NE-9, PN-3, SC-19 and TC-4.</p> <p>The Draft EIS reviewed specific land use information within a half-mile wide area (a quarter mile on either side of the HSR track centerline) to establish the context of site-specific impacts. Land use information was collected from existing and approved plans, review of aerial photography and windshield surveys. Additionally, the intensity or density of land use in and along the track area was evaluated and the overall character or harmony of the land use was reviewed throughout <b>Section 3.13, Land Use</b>. Data collection and analysis was completed using the most accurate data available at the time of analysis and in compliance with industry standards and best practices. Bluff Springs has not been platted.</p>

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>construction activities spanning at least four years;</p> <ul style="list-style-type: none"> <li>• preventing the efficient development of the properties as master planned communities; and</li> <li>• diminishing the value of the properties.</li> </ul> <p>Accordingly, Walton believes the Project fails to satisfy a Federal Railroad Administration key objective to "[a]void, minimize and mitigate impacts to the human and natural environment," DEIS at ES-3, and fails to "avoid or minimize impacts to the socioeconomic, natural, cultural and physical environment." DEIS at ES-7. To the contrary, as to the Bluff Springs properties, the Project will destroy the very fabric of the planned human and natural environments and cause major impacts to the planned socioeconomic, natural, and physical environment of these master planned communities.</p> <p>Further, it seems that the Project will not provide any direct benefit to the future residents of the Bluff Springs properties as there is no station planned for Ellis County where residents can board the high speed rail. Consequently, a future Bluff Springs resident would need to drive over 25 miles to downtown Dallas, navigate the congested downtown area, and find and pay for parking just to have the opportunity to pay an estimated several hundred dollars to travel to a point outside of the downtown Houston area and then find connecting transportation into Houston with the cost and delay associated with these logistics. When considering the time and costs associated with using the proposed high speed rail, it seems unlikely future Bluff Springs residents traveling to Houston will chose the proposed high speed rail option over the approximately 3 hour drive.</p> <p>For all of the foregoing reasons, Walton respectfully requests that the Final EIS be revised to either select a preferred route to avoid or minimize the impacts discussed above, or to select the "No Build" alternative as the preferred alternative.</p> <p>Thank you for your consideration of these concerns, many of which Walton believes are common to other property owners that will be impacted by the Project.</p>	
Leslie Wang	2/5/2018	Website	A Texas High Speed Rail/ bullet train would be a tremendous asset to our area, making commutes to Dallas much quicker and easier than they are now. Setting a station along Hwy 290 would be a great location; easily accessible. It could even improve property values for homeowners out here in the Cypress area, as many would like easy access to the train. I can't wait to ride the bullet train!	Refer to GN-7.
Peter Wang	2/5/2018	Website	I am very much IN FAVOR of the Houston-Dallas high speed rail project. The need is so great, it cannot be built quickly enough. Please proceed as quickly as possible.	Comment noted.
Daniel Ward	1/30/2018	Email	I have land that will be affected by this unnecessary piece of garbage. It does not serve me, my community, or the other taxpayers in Texas who do not live in Dallas or Houston. It is projected to cost too much build, maintain, and ride at risk of the tax payers, it will disrupt and restrict access and travel through my area at the expense of our county, a great portion of the data submitted for the report was collected illegally or by speculation, a private entity should not be able to acquire private citizens property through eminent domain. There is no need for this!	Refer to ED-1, GN-1, PN-3 and TR-8.

Jelks Ward	3/9/2018	Website	As a citizen of Irving, Texas I am in favor of HSR from Houston to Dallas but NOT in favor of a plan to continue the route through Irving to Ft. Worth using the TRE alignment with an above grade track speeding through my city. Additionally a route connecting Dallas and Ft. Worth aligned along I-30 makes the most sense. Should there be a stop along I-30 , in my opinion, it would be a city that is a "regional player", one that participates in a agency such as DART or a similar agency in Tarrant County.	Refer to BA-1.
William Ward	1/30/2018	Email	<p>If allowed to be built, the Texas High Speed Rail system will not benefit the majority of Texas. The ridership predictions are extremely exaggerated, the cost has been greatly underestimated and will no doubt cost much more than they predict (look what happened in California). I do not believe it will ever be capable of paying for itself without government subsidies and it's unfair to ask citizens to pay for something that will only benefit a Japanese Train company and a few fat investors.</p> <p>Additionally, it would disrupt the lives of the people who live and work along the route. Many roads would necessarily be closed and/or re-routed, farms literally cut in half, school buss services disrupted and the noise would be almost unbearably to those living in close proximity. THE BULLET TRAIN IS UNNEEDED AND A BAD IDEA.</p>	Refer to GN-2, GN-4, LU-11, NE-1, NV-1, SC-6, SC-7, SC-19 and TR-8.
David Warren	1/29/2018	Oral	I am David Warren, better known as Butch Warren. I am a former county commissioner, Precinct 3 retired. And what I'd like to touch on tonight is the devastation to county roads. Now, I know that most of you-all live on a gravel or a dirt road, and just by experience I have witnessed, you know I mean, we've had floods, you know, natural disasters, and things like that, but when you have a man-made disaster, that's a whole different ball game. And a lot of these companies I mean, you know, I've seen oil pipelines and drilling equipment and stuff like that, and I know that all these I know that Jason had derailment in his precinct, and I know it probably took them a year to get that thing done sort of right, you know. But what I'm -- I've seen drilling equipment that was pulled in, and it had been raining, it had steadily rained for a number of days, and they got three trucks, I mean, big heavy equipment trucks stuck. And they decided they'd use a bulldozer to pull those things to the location. And we had ruts for probably a mile down that county road, and it rendered the road useless. I mean, the residents, the people that lived there, they didn't care one way or the other about how those people were going to get to and from their homes. And I was the one that got the calls. And, you know, everybody gets irate. Everybody has feelings. And I went out there first thing, and when I got my first call I got out there and I just couldn't believe what I was seeing. I was driving a four-wheel-drive Rubicon, in other words, I had a Jeep, and I couldn't even get that Jeep in there. It was ridiculous. But anyway, I just want to kind of touch base with you-all to make you aware of what can happen, and I guarandamtee you, you give them an inch and they'll take a mile. And God bless Texas.	Refer to TR-7.
David Warren	2/6/2018	Website	If this project comes to Texas, who do you think will be riding this HSR ? What security will there be in the stations, and on the HSR? How are you going to prevent undesirables, human traffickers, Thugs, Drug runners, Terrorists, from creating havoc, at 200 mph? What strategic locations will the HSR be routed across? Derailment? Not to mention the totally negitive affect on the Texas Counties it crosses. Food For Thought. We do not want HSR in Texas.	Refer to BA-8, GN-7 and TR-8.
Garrett Warren	2/19/2018	Website	Please consider the highspeed rail option between Houston and Dallas. This project offers our state and nation so much that we do not have already. It will offer citizens transportation mobility and improved infrastructure that can last for years. In addition, this opportunity will create thousands of jobs and offer so much economic power into the regions. Creating jobs for Texans more than 10,000 direct jobs per year during construction and more than 1,500 jobs permanently when operational at least 25% o them in rural counties along the route. It will also bring in \$6.5-\$7 billion net positive tax impact by 2040. This is a no-brainer for Texas and will offer us so much. I firmly support this project and believe this technology is the right choice for us.	Comment noted.
Jennifer Warren	3/9/2018	Website	I am firmly opposed to the Dallas to Houston high speed rail. It's infrastructure impact to the private property owners is not right. Texas does not need this project no matter where the money is sourced today. Furthermore the infrastructure and sound will negatively impact native, migratory and farm animals. Please stop this project before it's too late. Thank you.	<p>Refer to NR-1 and NR-2.</p> <p>For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b>. Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b>.</p>
Kevin Warzoic	2/6/2018	Handwritten	<p>I support the comments listed below and offer them as evidence supporting the "No Build Alternative"</p> <p>1. 			<p>2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas.</p> <p>3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas.</p> <p>4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact.</p> <p>5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites.</p> <p>6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.</p>	
Heather Washburn	2/6/2018	Oral	<p>Hi. Thank you very much. Hi. My name is Heather Washburn, and I'm here on behalf of Congressman Brady representing the 8th District of Texas in the United States Congress in the House of Representatives. I'm his district director in Conroe. Congressman Brady sends his regrets that he could not be here tonight as he is in Washington, D.C. for legislative business and votes, and asks that I provide a brief update. "I remain committed" -- these are in his quotes. "I remain committed to making sure that Texas Central Rail does not complete this project between Houston and Dallas against the wishes of a majority of the residents of Grimes, Madison, and Leon counties. "While I don't oppose high-speed rail as a concept and strongly support infrastructure that addresses the dynamic growth of Texas, transportation improvements need to work for local communities, not against them. "Landowners in my district have made it clear they have grave concerns with this project and the land grab it represents. This route fractures our rural lifestyle without any direct benefits to our communities. "The only acceptable option for the TCR High-Speed Rail Project belongs alongside the already developed I-45 route. For this reason, I strongly oppose the route as designated by TCR and any attempt by TCR to use eminent domain to take away land from hard-working Texans or use federal dollars to fund this project. "Along with the strong message the Texas legislature sent last year by prohibiting state funds from going to this project, I introduced legislative language that would accomplish the same goal at the federal level. Your tax dollars should not go to split your land in half. "This isn't my first high-speed rail dispute. As a Texas state legislator representing many of these same rural counties, I helped lead the successful 1990s fight against the proposed bullet train which cut through much of the same rural countryside. It was a difficult battle, but in the end we prevailed. "The TCR is privately funded and wholly within Texas. It is not a federal project, has no federal funding, and is not regulated as a railroad under federal law. However, my staff and I are working with state and local officials to ensure anything that can be done is being done to prevent this project from advancing along this current route. "I look forward to learning more from tonight's conversation and, as always, my staff and I are available to discuss or answer any questions you may have." And I am here and available. I do have cards. And I am in the Conroe office. I handed out some tonight. Thank you.</p>	Refer to BA-9, ED-1, GN-4 and NE-1.
Joel Wasinger	2/20/2018	Website	<p>Traffic between Dallas and Houston is heavy and continues to increase. Indeed, connectivity and ongoing positive relationships between these two vibrant, tech-friendly cities is unquestionably a good thing. Without high-speed rail, this traffic will continue to be predominantly automobiles, many of which are single occupant. High speed rail offers the opportunity of greater efficiency and a lower environmental impact over the status quo. Please keep that in mind as you evaluate the environmental impact of the project. It's incumbent on us to not only implement high-speed rail expeditiously for its obvious transportation value and other immediate benefits (including, as mentioned, direct benefit to the environment), but so that we can contribute to the development of this vital transportation alternative.</p>	Comment noted.
Mary Waters	2/22/2018	Website	<p>I am a resident of Grimes County, I am opposed to the High-Speed Rail Project that is to be built in the middle of my county. I call it my county because I live and work here as well as pay taxes here. I feel that this is a project that is doomed to fail leaving taxpayers stuck with the financial burden that will be left behind. If you want to build this High Speed Rail do so in a manner that it does not destroy a county. We already have been bombarded with transmission and pipe lines through our county. Fortunately with these we can still use our property, we can move about within our property and the county as we have in the past. With your project you will cut many properties in half. If you build your project without elevating it from point A to point B you are limiting the use of our land. Our land! That we have worked hard to acquire or that has been in families for generations.</p> <p>The only options that I see are NO Build or build it in the 1-45 corridor.</p> <p>Thank You</p>	Refer to BA-6, BA-9, GN-3, GN-4, LU-11, NE-1, NR-6 and TR-8.

Carol Weatherford	1/25/2018	Email	<p>I am lodging an objection to the proposed high speed rail line between Houston and Dallas for the following reason:</p> <p>Who would chose to use this rail system? Unless you live within walking distance of the downtown areas of Houston or Dallas, you would have to take some form of transportation to the stations, undergo security screening in the same way as using the airports, limit what baggage you could manage and absorb transportation costs at your destination. The airlines now perform this same function without taking private lands. I can make the same trip in an automobile for \$25 and not undergo security screening and baggage checks. Added transportation is not needed. I think the typical passenger would not be the average person. Any estimate on ridership must be carefully examined. It would not be just to have the landowning Texan to pay for the few train riders that would benefit. Is there a public need????</p> <p>The rail corridor will divide communities, cut roads, and divide emergency response centers. The local county officials would be required to reinvent the local road systems, build additional county health and emergency fire facilities. These affected communities will be burdened for years with infrastructure redesign. It is highly unlikely the cities of Dallas or Houston will help with these costs. While the TCRR hopes to make a profit, the terrible costs to mitigate the high speed rail's environmental damage will be left to the small communities. The TCRR has been adversarial and secretive regarding their plans and proposed routes both from the general public and officials of the counties that could have been affected. As a result, some land owners, along the several proposed routes, have sold their land based on fears that they would be immersed in Eminent Domain proceedings and be forced to sell at below market values. These actions (land grabs) should be recognized as a possible motive in implementing the TCRR's operational plan. History proves that the cost of building high speed rails cost many times the projected costs. If the business plan would lead to bankruptcy, and a government bailout is offered, the taxpayer and local communities will be the ones burdened with this horrible mistake.</p> <p>I propose that the only viable alternative would be that the "No Build" option be chosen in the final Environmental Impact Statement.</p>	Refer to GN-2, GN-4, NE-1, PI-1, PN-3, SS-23, SS-26, TR-6 and TR-8.
Sharon Webb	2/5/2018	Oral	<p>I'm Sharon Webb, and I have been concerned about the ridership projections, and apparently I'm not the only one. Judge Duhon told you about the Reason Foundation, and I just wanted to share with you the findings of Baruch Feigenbaum from the Reason Foundation. He says, "The biggest error in Texas Central's calculation appears to be its ridership projections. Texas Central predicts 5.9 million riders will use high-speed rail per year. To put that higher number into perspective, only 3.2 million passengers use Amtrak's busy Northeast Corridor, which serves multiple cities including New York City, Boston, Philadelphia, Baltimore, and Washington, D.C. Those cities have more than four times the population of Dallas and Houston, but the established rail system is getting just over half the ridership that is being predicted for two cities in Texas."</p> <p>We need the no build option.</p>	Refer to GN-2 and GN-3.
Dennis Webb	3/9/2018	Website	<p>The City of Irving, Texas, passed a resolution against the Trinity Railway Express,(TRE), Line being used as a connector to the Texas Central Rail Line discussed in this draft EIS. The TRE already serves as a connector between Dallas and Ft Worth and we believe it is detrimental to the City of Irving and it's citizen's to add another train to this corridor.</p>	Refer to BA-1, NE-1 and NE-9.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			To add another train to that alignment and disrupt the existing DART and T rail service provided in that corridor should not be considered at all . The USDOT and FRA should consider that the citizens of Irving have been a member of DART from their creation paying 1% of sales tax to do so. Arlington, which would benefit the most from this rail line, has never been a member of DART nor the T in Ft Worth and has not contributed financially in any way to transit. To use a rail line that has been paid for by the citizens of Irving for thirty five years and allow a train that benefits a city that has never been a member of a transit system and still is not, would be totally unconscionable to the taxpayers. While the east/west connector alignment is not a part of the current EIS for Texas Central High Speed Rail from Houston to Dallas, there has been continuous discussion at RTC about including it with that project. We want to insure that our position is well documented and understood by the USDOT and FRA.	
Dr. Patty Weber	3/1/2018	Website	If the current route of the HSR is maintained, it will cause great difficulty for the residents near 3194. This can be avoided by moving the route to the proposed 3Z route. This should save money on construction and maintenance as well.	Refer to LU-5.
Dr. Patty Weber	3/1/2018	Website	Morgan Family Legacy Farm provides a beautiful place to enjoy nature and history. Moving the route north of the power lines to the existing easement will preserve the benefit of the ranch without harming the project itself. Moving the route makes sense economically and from the standpoint of the community. 3Z is the way to be!	Refer to LU-5.
Gregg Weber	2/21/2018	Website	I disapprove of the current route dissecting the Morgan Creek Legacy Farm in Navarro County. I feel the current route is an avoidable issue to wildlife and watershed issues by moving the route north to run along current "power line" access.	Refer to LU-5.
Gregg Weber	2/21/2018	Website	I would like to minimize the aesthetic impact of the route in Navarro county by avoiding the Morgan Creek Legacy farm near 709 and 3194 by shifting the route north of the power lines. Thank you	Refer to LU-5.
Gregg Weber	2/22/2018	Website	please consider an alternate route that does not dissect the Morgan Creek Farm Legacy located in Navarro county at hwy 709 and hey 3194. The ranch has been used to entertain multitudes of people from all walks of life at no cost and generosity like that is a Texas treasure that should be maintained. Please adjust the route to north of the power lines crossing 709.	Refer to LU-5.
Gregg Weber	2/22/2018	Website	I am a veterinarian and a business owner and I have concerns about the path chosen for the HSR, specifically as it affects the Morgan Creek Legacy Farm in Navarro County. The farm functions as a game bird release area and as such, is increasing the native quail population. The ranch also serves as a breeding area for the Mexican fulvous whistling duck and a feeding location for many other migratory waterfowl. The chosen route would affect these important wildlife functions both by the presence of the train and the effect on the watershed. If a simple diversion of the train to north of the power lines across hwy 709 could prevent this damage, I believe it should be considered. Thank you.	Refer to LU-5 and NR-2.
Gregg Weber	2/23/2018	Website	please consider another route for the HSR that does not affect the Morgan Legacy Farm in Navarro County Near 709 and 3194. The impact on the Navarro country side would be less if the train were to travel north of the power lines and parallel to the power lines.	Refer to LU-5.
Gregg Weber	2/24/2018	Website	I feel that the current route of the HSR should be altered. Traveling alongside hwy 3194 in Navarro county, I believe quite a number of land owners would be adversely affected. Crossing the Morgan Creek Ranch, I feel would be a transgression on a historically important point in the county. Please consider alternatives.	Refer to LU-5.
Gregg Weber	2/25/2018	Website	I think the Hsr route dissecting Morgan creek ranch in Navaro county will adversely affect the wildlife in the area. Breeding pairs of Mexican Fulvous Whistling Ducks have been seen on the property as well as many other species of ducks feeding and resting on the lakes on the property. Reports of Bald Eagles in the area have been noted also. The route as is will affect these waters and the population of waterfowl using them. Please consider a route north of the power lines as an alternative.	Refer to LU-5 and NR-3.
Gregg Weber	2/26/2018	Website	Please consider the alternate route submitted as 3z running north of Morgan Creek legacy farm in Navarro county near 709 and 3194 as it would be a safer route for the public with less ground contacts.	Refer to LU-5.
Gregg Weber	2/26/2018	Website	Please consider an alternate route for the HSR avoiding the Morgan Creek Legacy Farm in Navarro County adjacent to hwy 709. The ranch has been used to entertain everyone from international guest to first responders all at the generosity of the owners. The ranch is about Texas hospitality and should be preserved to continue its mission. Please consider an alternate route north of the power lines.	Refer to LU-5.
Gregg Weber	2/27/2018	Website	An alternate route circumventing Morgan Creek Legacy Farm in Navarro county off hwy 709 should be considered. The current route has more point of contact with the ground than a proposed 3z route both of the power lines. The 3z route would be safer and more economical.	Refer to LU-5.
Gregg Weber	2/28/2018	Website	Please change the route for the HSR where it affects the Morgan Creek Legacy Farm in Navarro county off hwy 709. The ranch is a home for wildlife that could be less affected by diverting the ranch north of the ranch parallel to the power lines.	Refer to LU-5.
Gregg Weber	2/28/2018	Website	I am a veterinarian with a concern. The current HSR route bisects the Morgan Creek Legacy Farm in Navarro county. I have treated and seen the care first hand that the owners extend to pets, livestock, and wildlife on this property. They have provided nesting boxes for waterfowl and set aside a portion of their property as a wildlife release area. They are good stewards of the land and a simple alteration of the route to north of the property and parallel to the power lines ( optional route 3c) should be considered. Thank you.	Refer to LU-5 and NR-2. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in

				<b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Gregg Weber	3/1/2018	Website	Morgan Creek Legacy Farms in Navarro county off hwy 709 is an excellent example of multi use land that all Texas land owners should take notice of. I have observed the practice management towards the livestock and wildlife on the property and believe that the ranch is a significant contributor to the State of Texas. The ranch not only is an economic benefit to the local community through commerce and employment, but is an example of hospitality in how it is used to entertain and educate a great number of people about "the outdoors". Please consider another route and save this ranch for future generations of Texans. Thank you.	Refer to LU-5.
Gregg Weber	3/2/2018	Website	Please consider changing the route of the hsr and avoid the Morgan Creek Legacy Farm in Navarro county near the intersection of hwys 709 and 3194. An alternate route north of the property and parallel to the power lines would disturb the country side and wildlife less. Thank you.	Refer to LU-5.
Gregg Weber	3/2/2018	Website	Please consider altering the HSR route in Navarro County to avoid Morgan legacy farm at the intersection of 709 and 3194 because the alternative route called 3z along the power lines would avoid damaging the watershed and waterfowl using the property.	Refer to LU-5.
Gregg Weber	3/3/2018	Website	Please minimize the impact of the hsr in Navarro County by avoiding the Morgan Creek ranch and following a route north of the property parallel to the power lines.	Refer to LU-5.
Gregg Weber	3/4/2018	Website	Please consider changing the hsr route to avoid theMorgan. Creek Legacy farm in Navarro County because the alternate route3z running parallel to the power lines north of the property is a safer and more economical route.	Refer to LU-5.
Gregg Weber	3/4/2018	Website	Avoiding the Morgan creek ranch in Navarro county by using a route north of the property and parallel to the power lines will affect the looks of the countryside less and be safer with less affect on the road system.	Refer to LU-5.
Gregg Weber	3/4/2018	Website	Please consider an alternate route for the hsr to avoid Morgan Creek Legacy Farms in Navarro County. Using an alternate route parallel to the existing power lines would save a property that is beneficial to wildlife and used charitably by many	Refer to LU-5.
Gregg Weber	3/4/2018	Website	Please consider an alternate route for the hsr to avoid Morgan Creek Legacy Farms in Navarro County. Using an alternate route parallel to the existing power lines would save a property that is beneficial to wildlife and used charitably by many	Refer to LU-5.
Gregg Weber	3/4/2018	Website	The current route of the HSR bisects the Morgan Creek Legacy Farm off hwy 709 in Navarro County. The wildlife waterfowl and quail populations on the property should be maintained by altering the course to north of the power lines.	Refer to LU-5 and NR-2. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Gregg Weber	3/7/2018	Website	Please Consider an alternate route for the HSR that avoids bisecting the Morgan Creek Legacy Farm in Navarro County near the intersection of hwy 709 and 3194. The ranch has been and can continue to be a spectacular example of Texas hospitality as it has served as a respite used at no charge to first responders, boy scouts, multiple charitable organizations and guest from as far away as Okinawa Japan. The ranch has been a haven for wildlife such as Mexican fulvus whistling ducks, quail, deer and others. The presence of the rail would alter drainage and affect the watershed and habitat for this wildlife. The safety of the citizens in Navarro would be better served also if a more elevated route was taken north of the adjacent power lines as less ground to rail points and interference with existing roadways was taken. Thank you for your consideration.	Refer to LU-5.

			watershed and habitat for this wildlife. The safety of the citizens in Navarro would be better served also if a more elevated route was taken north of the adjacent power lines as less ground to rail points and interference with existing roadways was taken. Thank you for your consideration.	
Gregg Weber	3/7/2018	Website	Please Consider an alternate route for the HSR that avoids bisecting the Morgan Creek Legacy Farm in Navarro County near the intersection of hwy 709 and 3194. The ranch has been and can continue to be a spectacular example of Texas hospitality as it has served as a respite used at no charge to first responders, boy scouts, multiple charitable organizations and guest from as far away as Okinawa Japan. The ranch has been a haven for wildlife such as Mexican fulvus whistling ducks, quail, deer and others. The presence of the rail would alter drainage and affect the watershed and habitat for this wildlife. The safety of the citizens in Navarro would be better served also if a more elevated route was taken north of the adjacent power lines as less ground to rail points and interference with existing roadways was taken. Thank you for your consideration.	Refer to LU-5.

Gregg Weber	3/7/2018	Website	Please Consider an alternate route for the HSR that avoids bisecting the Morgan Creek Legacy Farm in Navarro County near the intersection of hwy 709 and 3194. The ranch has been and can continue to be a spectacular example of Texas hospitality as it has served as a respite used at no charge to first responders, boy scouts, multiple charitable organizations and guest from as far away as Okinawa Japan. The ranch has been a haven for wildlife such as Mexican fulvus whistling ducks, quail, deer and others. The presence of the rail would alter drainage and affect the watershed and habitat for this wildlife. The safety of the citizens in Navarro would be better served also if a more elevated route was taken north of the adjacent power lines as less ground to rail points and interference with existing roadways was taken. Thank you for your consideration.	Refer to LU-5.

Gregg Weber	3/8/2018	Website	I would like to comment on the current route of the HSR. The current route would dissect the Morgan Creek Lagacy Farm on FM 709 in Navarro County. This farm has had significant impact on me, employees of mine and national and international friends I have hosted at the ranch. The ranch was used to host Karate masters visiting the United States from both Canada and Okinawa. The ability to extend friendship and courtesy, at no cost, to international dignitaries has been and hopefully can continue to be an important consideration in route selection for the HSR. These Okinawan masters returned to their country extremely grateful for the hospitality and experiences they were shown at the Morgan Creek Ranch. The wildlife they saw, and outdoor experiences they had at the Ranch connected them in a new way to Texas and America. Traveling with the karate masters from Okinawa were senior teachers from Missouri, Florida, and California. Again, the ranch served as a bonding experience of national and international significance.  I have experienced the beauty and tranquility of Texas outdoors at the Morgan Creek Ranch. I am an avid duck hunter and have observed the many different species of ducks that utilize thewaters on the ranch. I have seen Mexican Fulvous Whistling Ducks, Mallards, Gadwalls, Teal, Ringnecks, Scaup, and Widgeon on the lakes on this property and I have concerns that the proposed route could destroy many of these bodies of water used by this abundant waterfowl. A route north of the proposed line through Morgan Creek Ranch could utilize the existing easement of power lines and mitigate the impact on the waterfowl of the ranch. The Morgan Creek Ranch is an ongoing ambassador for Texas Hospitality that should be cherished and preserved. Route selection for the HSR has many factors influencing it, obviously. But, the role the ranch as planed and will play in connecting people world wide should be considered. Thank you for your time and consideration.	Refer to LU-5, NR-3, WW-1 and WW-2.

Gregg Weber	3/9/2018	Website	Please Consider an alternate route for the HSR that avoids bisecting the Morgan Creek Legacy Farm in Navarro County near the intersection of hwy 709 and 3194. The ranch has been and can continue to be a spectacular example of Texas hospitality as it has served as a respite used at no charge to first responders, boy scouts, multiple charitable organizations and guest from as far away as Okinawa Japan. The ranch has been a haven for wildlife such as Mexican fulvus whistling ducks, quail, deer and others. The presence of the rail would alter drainage and affect the watershed and habitat for this wildlife. The safety of the citizens in Navarro would be better served also if a more elevated route was taken north of the adjacent power lines as less ground to rail points and interference with existing roadways was taken. Thank you for your consideration.	Refer to LU-5.

Pat Weber	3/6/2018	Website	The current proposed route for the HSR creates unnecessary hardship for the Morgan Family Legacy Farm. Such a project is always going be divisive but there is no reason for the rail to go straight through the ranch. This property provides a valuable asset to the state of Texas and Navarro county and can be preserved by a simple route change. Move the rail north of the power lines to the existing easement. Consider the 3Z route for everyone's benefit!	Refer to LU-5.

Patricia Weber	2/23/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easment would be less detrimental to the environment and save a unique irreplaceable property. By separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. Furthermore, I am concerned about the impact on resident wildlife such as bald eagles, ducks and other species of birds.	Refer to LU-5 and NR-3.
Patricia Weber	2/23/2018	Website	I am opposed to the proposed route of the HSR, going through Morgan Family Legacy Farm near FM 709 and 3194. That location will destroy a valuable resource that is currently used by myriad individuals as an escape from stress, it is used most every weekend and many week days by	Refer to LU-5.

			first responders, medical professionals and charity groups and would be a significant loss to the community. Moving the route to north of the power lines would preserve the benefits of the HSR as well as an irreplaceable benefit to Texas and Navarro County.	
Patricia Weber	2/25/2018	Website	The current route for the Dallas to Houston high speed rail is going to disrupt the ability of many homeowners to access their property on 3194. This can be avoided by moving the route north of the power lines where there is already an easement. Please move the line.	Refer to LU-5.
Patricia Weber	2/26/2018	Website	The 3Z route makes much better sense for the new HSR, it avoids several air to ground maneuvers, saving building costs and maintenance costs as well. It can avoid disrupting family properties and homeowner access from 3194 and more closely follows the existing easement. Please move the rail route!	Refer to LU-5.
Patricia Weber	2/28/2018	Website	The Morgan Family Legacy Farm is a bright spot in Navarro county. The Morgans have shared this resource with myriad groups such as nurses, doctors, first responders and charitable organizations to allow them to decompress and enjoy the calm quiet beauty of our state. The HSR tearing through the center of the buildings will destroy this haven but that can be avoided by moving the route north of the power lines. Please help save this wonderful oasis!	Refer to LU-5.
Patricia Weber	3/2/2018	Website	Morgan Family Legacy Farm offers a unique and irreplaceable resource for Navarro county. Putting the HSR right through the beating heart of this property makes no sense from a community perspective, nor is the best choice for water flow, wildlife or traffic concerns. Please move the route north of the power lines to the existing easement where both the county and the rail can peacefully coexist.	Refer to LU-5.
Patricia Weber	3/9/2018	Website	Please move the HSR route to avoid cutting directly through the Morgan Family Legacy Farm and the surrounding roads. The rail can be accomplished without the destruction of the ranch by moving the route north of the power lines to the existing easement.	Refer to LU-5.

Patty Weber	2/21/2018	Website	I am opposed to the new high speed train destroying a culturally, economically, historically, and charitably valuable property referred to as Morgan Legacy Farm located near FM 709 and 3194. A better placement is available if the train were to move north of the power lines paralleling the existing lines. That is already an established easement and would create the same benefits without the harm to the environment and the loss of a unique and irreplaceable property. By bisecting the property and separating access from the lodge to the stables, rodeo arena, guest houses and other amenities, the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. Every visit to Morgan Creek Ranch provides an opportunity to see and enjoy a sanctuary of wilderness that has been a part of Navarro county for decades. There is no need to destroy this oasis when a simple move to a better location is available.	Refer to LU-5.
Patty Weber	2/21/2018	Website	Please change the proposed route for the HSR. The project can go forward if the route is relocated to the north of the power lines adjacent to Morgan Creek Legacy Farm at FM 709 and 3194. The ranch provides an irreplaceable area for sharing the beauty of Texas with a wide variety of individuals, companies and charities and the HSR would destroy this ability. Morgan Creek Ranch is a unique jewel in Texas and must be preserved. Thank you for your consideration.	Refer to LU-5.
Patty Weber	2/22/2018	Website	I am writing to protest the current path of the HSR, going through Morgan Creek Legacy Farm at FM 709 and 3194. This is an area of beautiful undeveloped land that allows natural water flow and houses extensive wildlife and birds. Please relocate the path to the north above the existing power lines. That is a small adjustment that would allow for the preservation of a valuable property that is used for entertainment, recreation and relaxation by many diverse groups from Texas, the surrounding areas and even international visitors. Thank you.	Refer to LU-5.
Patty Weber	2/22/2018	Website	The HSR path is currently scheduled to go directly through the Morgan Creek Legacy Farm, near FM 709 and 3194. This property is a fantastic ambassador for Texas, it has been utilized free of charge by people and organizations from Texas, many other states and as far away as Japan	Refer to LU-5.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			and Canada. This property is unique and irreplaceable but its benefits could be saved by merely moving the proposed path to the north of the existing power lines. Please reconsider and save this valuable asset to Texas.	
Patty Weber	2/23/2018	Website	The current proposed route of the HSR would damage a significant charitable, environmental and recreational property, the Morgan Family Legacy Farm at 709 and 3194. This property is a natural preserve where bald eagles, ducks, deer and many other wildlife species are present. Moving the route to the existing easement north of the power lines would preserve the benefits of the ranch and also serve the needs of the HSR. Please reconsider the location of the rail.	Refer to LU-5.
Patty Weber	2/24/2018	Website	I oppose the current route of the HSR, this route is going to impact homeowners along 3194 and may disrupt water flow as well. A better route would be north of the power lines along the existing easement. Please consider changing the route. Vpy	Refer to LU-5.
Patty Weber	2/24/2018	Website	I oppose the plan for the HSR as it now stands. The proposed route bisects the Morgan Family Legacy Farm. This will disrupt a ranch that has been a beautiful part of Navarro county for decades. Moving the route to north of the power lines would keep this ranch of historical value and also preserve the new project. Please reconsider the route. K2r6	Refer to LU-5.
Patty Weber	2/25/2018	Website	The Morgan Family Legacy Farm is a boon to Navarro county and Texas. It is extensively used for first responders , medical personal, charitable organizations and others for stress relief and enjoyment. The Morgans never charge she tbt use of the property and share with hundreds and hundreds of people every year. Move the route to the north of the power lines, to the existing easement and preserve this valuable asset.	Refer to LU-5.
Patty Weber	2/26/2018	Website	Please consider the 3Z route for the proposed rail. The advantages are self evident in cost savings over the previous route, decreased maintenance costs long term, and better noise abatement with decreased disruption to the families along the route. This is a better plan for everyone.	Refer to LU-5.
Patty Weber	2/26/2018	Website	The high speed rail is going to inconvenience many people along the path, that is simply the nature of such a project. However it behooves the creators to do the best job they can to minimize disruption. Moving the route north of the power lines would be well worth the cost to preserve the ability of those who live along 3194 to enjoy their property. Route 3Z provides a viable alternative.	Refer to LU-5.
Patty Weber	2/27/2018	Website	Please reconsider the route for the HSR. The current route unnecessarily runs through a valuable property frequently used for charitable purposes, the Morgan Family Legacy Farm. This property generates enormous good will and benefit to Texas and Navarro county. Moving the route north of the power lines, to the proposed 3Z route, would allow the continuation of the benefits of the Morgan ranch as well as the rail.	Refer to LU-5.
Patty Weber	2/28/2018	Website	The current placement of the HSR is going to create major difficulties for the residents near 3194. These property owners need access to their property without the interference of the Rail. The problem could be solved by changing the route to the 3Z proposal, moving the rail north of the power lines. Please help us gain the most benefit with the least loss by relocating this project the small amount needed.	Refer to LU-5.
Patty Weber	2/28/2018	Website	Morgan Family Legacy Farm has seen amazing wildlife, including bald eagles as well as many other bird species. Disruption of the water flow pattern so essential to the continued diversity of the property will be a consequence of the current proposed route of the HSR. This impact can be mitigated by moving the route to the existing easement area north of the power lines. Please move this section and save this important property.	Refer to LU-5, NR-2 and NR-3.
Patty Weber	3/1/2018	Website	The current route of the HSR needlessly disrupts the Morgan Family Legacy Farm. The route could go north above the power lines and benefit both the project and the local neighborhoods. Please move the route!	Refer to LU-5.
Patty Weber	3/1/2018	Website	I oppose the current route of the HSR, it cuts through a ranch that has been used as stress relief and relaxation by many medical personnel, charitable organizations, both local and international, and others, always free of charge. Morgan Family Legacy Farm provides good will for Texas and Navarro county and it is ridiculous to run the HSR through the main buildings on the property when moving it north of the power lines could preserve the property and the rail.	Refer to LU-5.
Patty Weber	3/2/2018	Website	The proposed route of the HSR does unnecessary damage to a valuable area of Texas. There is no need for the rail to cut straight through the Morgan Family Legacy Farm, if the route is moved north of the power lines then it goes through an existing easement and decreases construction and maintenance costs as well, the 3Z route is the only one that makes economic and community sense. Please consider a change in the route	Refer to LU-5.
Patty Weber	3/2/2018	Website	The high speed rail track going through Navarro county is unnecessarily disruptive to the local population. There is no reason to compromise the use of FM 3194 and to make access to the local homeowners difficult. Move the rail to the proposed 3Z track, north of the power lines and to the already existing easement. Thank you.	Refer to LU-5.
Patty Weber	3/2/2018	Website	Please change the route for the Dallas to Houston HSR. There are currently several unnecessary elevations that will cost additional money to build and maintain and it cuts through property that can be avoided by staying with the existing easement. Do not disrupt the community near FM 709 and 3194, move the rail north of the power lines.	Refer to BA-8 and LU-5.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
Patty Weber	3/2/2018	Website	The current route of the HSR is much more disruptive to the community than it needs to be. The Rail is a worthy cause but it should be accomplished in the most economical fashion and with as little destruction to the community and surrounding properties as possible. Move the route north of the power lines to the existing easement, along the 3Z route, and this rail can be a good addition to the area.	Refer to BA-7, BA-8 and TR-8.
Patty Weber	3/2/2018	Website	The HSR is currently slated to go through the Morgan Family Legacy Farm, destroying the beauty and tranquility of the area. The current plan unnecessarily runs in the 75 yards between the main house and the rodeo arena and guest houses. This rodeo arena has been built for decades and provides a peek into the history of Navarro county as well as being functional for horseback riding at the ranch. Please move the route to north of the power lines, near the existing easement. Thank you for your consideration.	Refer to LU-5.
Patty Weber	3/2/2018	Website	There is a preferred alternative route for the HSR that would be simpler, easier to maintain and easier to build than the current route. Alternative 3Z allows the rail to proceed with fewer elevation changes and therefore a smaller impact on the surrounding water flow and natural areas. It would decrease traffic impact for the residents near 3194 and offers many advantages. Please consider this new route.	Refer to LU-5.
Patty Weber	3/4/2018	Website	I would ask that the 5-7 mile portion of the HSR scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic impact on the county that would occur if Morgan Legacy Farm is transected. Morgan Legacy Farm provides a place for respite for first responders, nurses, children and charitable organizations and others, always at no charge from the Morgans. This ranch provides a valuable and irreplaceable service, preserves the history of Texas and Navarro county, maintains the natural waterflow and serves as a home for wildlife in addition to being a working hay farm. A small change in the plans can preserve all of this and still serve the rail's needs.	Refer to LU-5.
Patty Weber	3/4/2018	Website	Please consider moving the section of the HSR planned to parallel 3194; I ask that this section be moved north of the existing power lines to lessen the environmental, economic, charitable and historic impact on the county that would occur if Morgan Legacy Farm is transected. Morgan Legacy Farm provides a place for respite for first responders, nurses, children and charitable organizations and others, always at no charge from the Morgans. This ranch provides a valuable and irreplaceable service, preserves the history of Texas and Navarro county, maintains the natural waterflow and serves as a home for wildlife in addition to being a working hay farm. A small change in the plans can preserve all of this and still serve the rail's needs.	Refer to LU-5.
Patty Weber	3/4/2018	Website	Please relocate the small stretch of the HSR that is scheduled to parallel 3194, this section can be moved north of the existing power lines to the 3Z route, in order to lessen the environmental, economic, charitable and historic impact on the county that would occur if Morgan Legacy Farm is transected. Morgan Legacy Farm provides a valuable service as an ambassador for the state county to groups all over Texas, the US and internationally. It provides a place for respite for first responders, nurses, children and charitable organizations and others, always at no charge from the Morgans. This ranch provides a valuable and irreplaceable service, preserves the history of Texas and Navarro county, maintains the natural waterflow and serves as a home for wildlife in addition to being a working hay farm. A small change in the plans can preserve all of this and still serve the rail's needs.	Refer to LU-5.
Patty Weber	3/4/2018	Website	The high speed rail is a valuable project that can benefit many people, however I would ask that the 5-7 mile portion of the rail scheduled to parallel 3194 be moved north of the existing power lines to lessen the negative impact on the immediate community. Property owners along 3194 will have a much harder time accessing their homes. Moving the rail to the existing easement would alleviate that problem and still allow the benefits of the rail in the county.	Refer to LU-5.
Patty Weber	3/4/2018	Website	Eminent domain has its place but when a small change in the proposed project can make a colossal change in the damage done by it, then it behooves a government to try to mitigate the harm while preserving the public good. IN the case of the HSR, moving the route to the easement north of the power lines will make a saving difference for the Morgan Family Legacy Farm. The current route will destroy enjoyment of the farm but this small move could make all the difference. Please move the route to the 3Z route.	Refer to LU-5.
Patty Weber	3/4/2018	Website	The Dallas to Houston HSR currently is planned to cut directly through the living areas of the Morgan Family Legacy Farm. I would ask that the 5-7 mile portion of the HSR scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic impact on the county that would occur if Morgan Legacy Farm is transected. Morgan Legacy Farm provides a place for respite for first responders, nurses, children and charitable organizations and others, always at no charge from the Morgans. This ranch provides a valuable and irreplaceable service, preserves the history of Texas and Navarro county, maintains the natural waterflow and serves as a home for wildlife in addition to being a working hay farm. A small change in the plans can preserve all of this and still serve the rail's needs.	Refer to LU-5.
Patty Weber	3/4/2018	Website	The principle of eminent domain is a necessary one but it should be pursued with the least damage possible for the greater good of everyone. The proposed route of the HSR sends it directly through the main use area of the Morgan Family Legacy Farm. There is no reason to use this route when moving the rail north of the power lines will allow the railroad to proceed with far less damage to this property and the economy of Navarro county. Please reroute the railroad!	Refer to LU-5.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
Patty Weber	3/4/2018	Website	The Morgan Family Legacy Farm has been used for charitable purposes and for stress relief for many medical personnel, charitable organization, children's groups, sports groups and many others. It is used every weekend, often by patrons of local markets and businesses, bringing a boost to the local economy. Running the HSR right through the center of the ranch will destroy that use and damage the economy and goodwill of Navarro county. Please move it north of the power lines.	Refer to LU-5.
Patty Weber	3/4/2018	Website	Any time new development is considered for an area there will be disagreements as to how to proceed. Personal bias is impossible to avoid; at the same time, common sense should prevail. If there is a small change to be made to a project that can mitigate the damage and still allow for the project's benefits, then that change should be made. The 3Z route for the HSR saves money, decreases maintenance and still preserves the function of the Morgan Family Legacy Farm. Consider the best option and change the route!	Refer to LU-5.
Patty Weber	3/4/2018	Website	The rugged beauty of the Navarro country side is sure to be disturbed by a HSR rocketing through, but it will be much worse if that rail dips and rises and dips and rises. Noise pollution will be worse, costs will be higher and maintenance will be more difficult. Move the rail to the existing easement north of the power lines. Let's at least do the least damage possible as this project goes forward.	Refer to LU-5 and NV-1.
Patty Weber	3/4/2018	Website	Please consider a change to the course of the HSR. I would ask that the 5-7 mile portion of the HSR scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic impact on the county that would occur if Morgan Legacy Farm is transected. Morgan Legacy Farm provides a place for respite for first responders, nurses, children and charitable organizations and others, always at no charge from the Morgans. This ranch provides a valuable and irreplaceable service, preserves the history of Texas and Navarro county, maintains the natural waterflow and serves as a home for wildlife in addition to being a working hay farm. A small change in the plans can preserve all of this and still serve the rail's needs.	Refer to LU-5.
Patty Weber	3/4/2018	Website	For heaven's sake! There is no need for the HSR to completely destroy the Morgan Family Legacy Farm. The rail can be built north of the power lines in the existing easement without the complete destruction of this one of a kind property that has been generously shared with so many, never with any charge or profit for the Morgans. Please move to the 3Z route.	Refer to LU-5.
Patty Weber	3/5/2018	Website	Eminent domain is a treasured principle of our country but the spirit of the law requires us to do the least damage possible in pursuit of the greater good. Transecting the Morgan Family Legacy Farm is not necessary to further the railroad, moving the route north of the power lines provides the same benefit to the HSR yet preserves this unique and irreplaceable ranch that is so frequently used for benefit of children's organizations, medical personnel, charitable groups and more. Please move to the 3Z route for everyone's benefit.	Refer to ED-1 and LU-5.

The Morgan Family Legacy Farm has been used for the benefit of many children's groups, charitable organizations, international sports groups and medical personnel, always at no charge. It houses the first rodeo arena in Navarro county, there have been historic arrowheads discovered and eagles and other bird and wildlife species have been seen. Move the route to the proposed 3Z route, north of the power lines to benefit the rail without destroying this unique and irreplaceable property.	Refer to LU-5.
Patty Weber	3/7/2018	Website	Please consider changing the route of the HSR. 			Navarro county. It has been used for charities, children's organizations, medical personnel and first responders, all at no charge to them. Please help save this valuable asset!	
Patty Weber	3/8/2018	Website	I am writing in the hopes that a change could be made to the proposed route for the Dallas to Houston High Speed Railway. The current plan the directly through an exceptional bright in Texas: the Morgan Creek Legacy Farm, near FM 3194. In addition to being a working ranch producing hay and contributing to the Of Navarro County. this wonderful spot provides an idyllic retreat. Or, Bob Morgan and his wife have created a spot of beauty and relaxation which they freely share with family and personal friends but also with many, many other groups and individuals. The Ranch has hosted diverse groups and organizations including Service providers such as first responders, nurses and doctors, charitable organizations and international groups. The goodwill extending from this One unique place extends literally across the world, making Texas and Navarro County a place highly regarded and esteemed by a wide variety of people. The Morgans have never charged for use of the property and have provided many amenities such as horseback fishing, skeet shooting as well as a place to enjoy nature in a quiet, reflective walk or observation of the glorious Texas sunset from one Of the many porches. A high speed train rocketing through the middle of the property, screaming through the 75 yards that separate the main house from the arena and some of the guest houses will destroy any possibility of experiencing what is a beautiful and irreplaceable asset of Our state. I have witnessed children who have never had such an opportunity to communicate with nature be mesmerized by watching the deer, trying to see a raccoon as it scurries across a trail, Seeing the swooping hawk as it descends. These children and adults are the future of conserving the beauty and resources of our State and our world. Certainly deciding the exact location of such a project is a challenge and certainly there will be disagreement as to the best route. However, by moving this project north of the power lines to the existing easement (following the suggested AZ route) both the project itself and the invaluable resource that is Morgan Creek Ranch can be saved. This Ranch is priceless and irreplaceable and it is worth saving. Please reconsider the route.	Refer to LU-5.
Patty Weber	3/9/2018	Website	Please change the proposed route of the HSR as it approaches FM 709 and 3194. The current route is going to cause much more property damage than needed, particularly destroying the Morgan Family Legacy Farm. Moving the route to the 3Z route, north of the power lines, will serve both the residents and the railroads. Thank you.	Refer to LU-5.

Patty Weber	3/9/2018	Website	Please change the proposed route of the HSR as it approaches FM 709 and 3194. The current route is going to cause much more property damage than needed, particularly destroying the Morgan Family Legacy Farm. Moving the route to the 3Z route, north of the power lines, will serve both the residents and the railroads. Thank you.	Refer to LU-5.
Robn Weber	3/6/2018	Website	I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property and will potentially cause serious watershed issues. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement.	Refer to LU-5 and TR-10.
ROBN WEBER	3/7/2018	Website	I oppose the proposed route in Navarro County at fm 709 and 3194 as it blocks the horse stables from the rodeo arena on the Morgan Creek Ranch. As veterinary student, the stress from the construction would be overwhelming detrimental to the horses, cows, deer, and waterfowl that reside on the property. Moving the construction north a few miles would be a better route.	Refer to LU-5.
Robyhn Weber	3/6/2018	Website	I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property and will potentially cause serious watershed issues. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement.	Refer to LU-5 and TR-10.
Robyn Weber	2/21/2018	Website	I have concerns about the high speed rail in Navarro Couty traveling through the intersection of 709 and 1394 cleaving the Morgan Creek Ranch and Farm. I am opposed to the train destroying the economically, culturally, charitable ranch. There would be significant damage that would destroy the water areas of the land, which would lead to destroying the migratory waters of the US. The train will be cutting directly through the main land of the ranch and completely destroy the purpose of it. I have spent many times reconnecting with my family meeting in the middle here at the Ranch. My schedule is extremely busy being in Veterinary school down at Texas A&M and the managers of the Morgan Creek Ranch have always been able to help plan a good trip and work with the schedules of many people to make it possible. If the proposed route is relocated just a few miles north of the utility lines the damage to the water shed, meaningful family ranch, will be lessened and this irreplaceable ranch and it's charitable mission could be spared.	Refer to FP-1, LU-5, WW-1 and WW-2.
Robyn Weber	2/22/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5.
Robyn Weber	2/22/2018	Website	I am a Veterinary student at Texas A&M University and I am opposed to the picked route through the Morgan Creek Ranch. The ranch holds the benefit of the large open area as a licensed bird release and deer release property which is an important aspect of the Texas agriculture and lifestyle.	Refer to LU-5.
Robyn Weber	2/22/2018	Website	I oppose the train bisecting Morgan Legacy Farm secondary to affect on migratory birds.	Refer to LU-5.
Robyn Weber	2/22/2018	Website	As a veterinary student at Texas A&M University i am opposed to the route through the Morgan Creek ranch near FN 709 and 3194 due to the affect on the reported bald eagle's lake that it feeds at currently.	Refer to LU-5.
Robyn Weber	2/22/2018	Website	I oppose the train bisecting Morgan Legacy Farms due to the educational benefits provided to a multitude of students here at Texas A&M University and multiple other university students.	Refer to LU-5.
Robyn Weber	2/22/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5.
Robyn Weber	2/22/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I am a veterinary student and this ranch has been an amazing place to have in my life during the challenging course load. The ranch has allowed me to have some hands on learning experiences with many different species which has helped expand my knowledge here in school.	Refer to LU-5.
Robyn Weber	2/22/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I am a third year veterinary student down at Texas A&M University. This ranch has been a happy middle place for me to be able to relax and rejoin with my family. It has been an emotional safe-heaven for me during my stressful time in veterinary school.	Refer to LU-5.
Robyn Weber	2/22/2018	Website	I am opposed to the route the train is expected to take, destroying the historic land of Morgan Creek Ranch near FM 709 and 3194. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory water fowl of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term.	Refer to LU-5.

Robyn Weber	3/2/2018	Website	I oppose the proposed route in Navarro County at fm 709 and 3194 as it blocks the horse stables from the rodeo arena on the Morgan Creek Ranch. As veterinary student, the stress from the construction would be overwhelming detrimental to the horses, cows, deer, and waterfowl that reside on the property. Moving the construction north a few miles would be a better route.	Refer to LU-5.
Robyn Weber	3/4/2018	Website	I oppose the proposed route in Navarro County at fm 709 and 3194 as it blocks the horse stables from the rodeo arena on the Morgan Creek Ranch. As veterinary student, the stress from the construction would be overwhelming detrimental to the horses, cows, deer, and waterfowl that reside on the property. Moving the construction north a few miles would be a better route.	Refer to LU-5.
Robyn Weber	3/4/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I am a veterinary student and this ranch has been an amazing place to have in my life during the challenging course load. The ranch has allowed me to have some hands on learning experiences with many different species which has helped expand my knowledge here in school.	Refer to LU-5.

Robyn Weber	3/4/2018	Website	X I am concerned about the watershed area with the proposed route. I think destroying this area will ruin that watershed area through the ranches in Navarro County.	Refer to WW-1 and WW-2.
Robyn Weber	3/4/2018	Email	I am concerned about the watershed area with the proposed route. I think destroying this area will ruin that watershed area through the ranches in Navarro County.	Refer to WW-1 and WW-2.
Robyn Weber	3/4/2018	Email	As a veterinary student at Texas A&M University i am opposed to the route through the Morgan Creek ranch near FN 709 and 3194 due to the affect on the reported bald eagle's lake that it feeds at currently.	Refer to LU-5.
Robyn Weber	3/4/2018	Email	As a veterinary student at Texas A&M University i am opposed to the route through the Morgan Creek ranch near FN 709 and 3194 due to the affect on the reported bald eagle's lake that it feeds at currently.	Refer to LU-5.
Robyn Weber	3/4/2018	Email	I oppose the train bisecting Morgan Legacy Farms due to the educational benefits provided to a multitude of students here at Texas A&M University and multiple other university students.	Refer to LU-5.
Robyn Weber	3/4/2018	Email	I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property and will potentially cause serious watershed issues. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement.	Refer to LU-5. Properties that front FM 3194 are no longer impacted and access would not be impacted by the Project. The Project would, however, still impact some landowners in the area, specifically the rear of parcels.
Robyn Weber	3/4/2018	Email	There would be significant damage that would destroy the water areas of the land, which would lead to destroying the migratory waters of the US. The train will be cutting directly through the main land of the ranch and completely destroy the purpose of it. I have spent many times reconnecting with my family meeting in the middle here at the Ranch. My schedule is extremely busy being in Veterinary school down at Texas A&M and the managers of the Morgan Creek Ranch have always been able to help plan a good trip and work with the schedules of many people to make it possible. If the proposed route is relocated just a few miles north of the utility lines the damage to the water shed, meaningful family ranch, will be lessened and this irreplaceable ranch and it's charitable mission could be spared.	Refer to LU-5.

Robyn Weber	3/4/2018	Email	I am a third year veterinary student down at Texas A&M University. The route proposed for the train will destroy a historic ranch site. This ranch has been a happy middle place for me to be able to relax and rejoin with my family. It has been an emotional safe-heaven for me during my stressful time in veterinary school.	Refer to LU-5.
Robyn Weber	3/4/2018	Email	I am opposed to the route option due to the affect on the reported bald eagle's lake that it feeds at currently and as a veterinary student at Texas A&M University i am opposed to damaging this land through near FM 709 and 3194	Refer to LU-5.
Robyn Weber	3/4/2018	Email	I am concerned about the watershed area with the proposed route. I think destroying this area will ruin that watershed area through the ranches in Navarro County.	Refer to WW-1 and WW-2.

Robyn Weber	3/4/2018	Website	I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property and will potentially cause serious watershed issues. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement.	Refer to LU-5 and TR-10.

Robyn Weber	3/4/2018	Website	There would be significant damage that would destroy the water areas of the land, which would lead to destroying the migratory waters of the US. The train will be cutting directly through the main land of the ranch and completely destroy the purpose of it. I have spent many times reconnecting with my family meeting in the middle here at the Ranch. My schedule is extremely busy being in Veterinary school down at Texas A&M and the managers of the Morgan Creek Ranch have always been able to help plan a good trip and work with the schedules of many people to make it possible. If the proposed route is relocated just a few miles north of the utility lines the damage to the water shed, meaningful family ranch, will be lessened and this irreplaceable ranch and it's charitable mission could be spared.	Refer to LU-5.

Robyn Weber	3/4/2018	Website	I am a third year veterinary student down at Texas A&M University. The route proposed for the train will destroy a historic ranch site. This ranch has been a happy middle place for me to be able to relax and rejoin with my family. It has been an emotional safe-heaven for me during my stressful time in veterinary school.	Refer to LU-5.

Robyn Weber	3/6/2018	Website	I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property and will potentially cause serious watershed issues. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement.	Refer to LU-5 and TR-10.

John Weed	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.
Alan Weeks	3/6/2018	Website	Texas thru away a chance to get High speed rail twenty years ago. Don,t make the same mistake twice. The FRA Environmental Report is solid and well thought out. Texas is showing the way for the U S when it comes to high speed rail.	Comment noted.

Rob Weeks	2/6/2018	Oral	(Plays audio of high-speed train) That's the sound of the high-speed rail that's coming. I'm here to just kind of give my opinion about the environmental impact. I'm Rob Weeks, And that sound you heard was an example of what that's going to sound like near your property, near your families, your livestock, et cetera. I just wanted you to hear that sound, because I think it kind of makes it real. That's what it sounds like. The impact of this project goes well beyond the noise and the visual intrusion of the structures and or sounds, walls, and fences in urban areas. There's impact on farming, noise impact to the wildlife, noise and visual impact on serene countryside farms, homes, families, my family. There's a major concern in terms of the wildlife impact of the fencing on wildlife movement and migration corridors. That's commonly known as habitat fragmentation. The HSR infrastructures allow little flexibility in route design in order to reach high speed without derailing. These trains require straight trajectories with minimum slopes. As a result, the rail cannot easily avoid intersecting areas of high bird density. In addition to intersecting bird flight paths, birds are almost incapable of avoiding high-speed trains when they approach. It's been observed that birds can barely avoid vehicles traveling 50 miles an hour. It's true. In the case of these high-speed trains, they reach 205 miles an hour. The combination of high speed and low-running frequency trains can produce high mortality rates in birds because they are interrupted by periods of quietness, making the birds feel confident perched on their nearby rail or tracks. Placing fences and barriers on both sides of the railway would force birds to raise their flight path and cross the railway. Bioacoustic emitters might be used to combat that effect, but had the environmental impact completed the assessment and completed taking into consideration the full lifecycle impact of the building providing electrical energy, the vehicle CO2, SO2, and GHZ impacts of the fully-loaded birth to grave rail system, air quality impact of all the required cement production, for example, manufacturing a car or propelling a train requires electricity, and the fossil fuels burned to produce that electricity produce sulphur dioxide emissions that can harm human health outside the regions where people drive cars or ride the rails. The people in populations who's lands are being impacted here aren't the ones getting the benefit from the project. So in summary, there are many impacts that are yet to be seen, and I vote no build option.	Refer to AS-1, LU-11, NR-1, NR-5, NR-6 and NV-1.
Jake Wegmann	2/23/2018	Website	We desperately need alternatives to overcrowded Interstate freeways. High-speed rail is an internationally proven technology that is superior in terms of environmental impact, linking economically productive job centers together, and customer experience. Dallas to Houston High-Speed Rail would be an excellent first step. Once it is up and running, I very much hope that it will provide service to the other big cities in the "Texas Triangle:" Fort Worth, San Antonio, and Austin, where I live. Having all of these cities linked together would be transformational for Texas' economy and quality of life. This particular project represents a chance for Texas to be a leader, not a laggard, in green transportation technology.	Comment noted.
Natalie Weiershausen	3/8/2018	Website	I am not as familiar with the location of the terminal station in Dallas, but in Houston where it is proposed to be at the former Northwest Mall, I wanted to express my hope that the station design would incorporate elements from the former mall. The reuse of materials (and possible reclamation of some of the structures) would not only help the rail connect to the community, but be more sustainable. I would also hope that this site would incorporate LID and other sustainable practices to have a beneficial impact to the organisms, air quality, and stormwater runoff (both quantity & quality). This station has the potential of being a showcase feature of both Houston & HSR. For reference, I have attached photos of some of the unexpected architecture still left at the mall (I'm not saying there is a lot of it, but still) and a photo of a very sustainable building, that is also breathtaking (obviously, sustainable design doesn't necessarily need to be this extravagant). Thanks, and I look forward to this project being built!.	Refer to GN-7 and GN-9. Currently there are no plans to incorporate the Northwest Mall building into the new station design. TCRR is employing an architecture firm who is responsible for the design of the stations. It is too early in the design process for the extent of the sustainability of the buildings to be fully known.
Elyette Weinstein	2/7/2018	Website	I support this project because: My family is in the Houston area. This project will bring visitors to your state more often and we spend money. As the population ages, we don't want to have to rent a car and drive on highways with which we are unfamiliar. It is environmentally responsible since it invests in mass transit, getting cars off the road; It is 100% privately funded infrastructure unlocks more local investment Creates 10,000 construction jobs each year and 1,000 permanent jobs Texas Central will be a tax-payer, not a tax-taker, paying \$2.5 Billion in taxes in 25 years It will inject an estimated \$36 Billion over next 25 years into the Texas economy Re-enforces importance of investment in a balanced transportation system It creates a vital piece of a 21st century transportation system The N700 Bullet Train emits 1/12th the CO2 as a jet would between Houston and Dallas The current 4-hour, 240 mile trek up I-45 is expected to increase to 6.5 hours by 2035 I-45 is the nation's 2nd deadliest interstate in the U.S.; rail keeps more cars off roads and saves lives With a 90-minute travel time, passengers can be at their destination before they could board a flight after arriving at an airport	Comment noted.
John Weirich	3/9/2018	Website	We transport medically needy foster children to Houston and Dallas as many as 3 days a week. This train will provide convenient and relaxing transportation for a difficult journey. Build this train!	Comment noted.
Rebekah Weirich	3/9/2018	Website	Build the train! Bring in jobs and access to transportation. Get some cars off the road and try to get ahead of the growth that is happening.	Comment noted.
Jeffrey Weiss	2/16/2018	Website	I WANT THE TRAIN / HIGH SPEED RAIL PROJECT FOR TEXAS.	Comment noted.

Stephen Weissman	2/7/2018	Website	A Dallas to Houston High Speed Rail would be a great asset not only to those two cities, but to all of Texas and to the nation's transport system. Estimates think that it will add billions of dollars to the Texas economy. It will reduce emissions, putting only 1/12 as much CO2 into the air as jet planes. It will relieve crowding on the already-choked I-45. It will save lives by reducing the accidents on I-45. It will save much time, for it will get from Dallas to Houston in about the same amount of time as it now takes to get to an airport, park, and get through security and board a plane.	Comment noted.
Rick Welch	12/28/2017	Letter	Dear Sirs, Recently, the Federal Railroad Administration (FRA), the Fort Worth District Office Of the US Corps of Engineers (USACE-SWF) and the Galveston District Office Of the Corps of Engineers (USACE-SWG) issued official public notices on the same day concerning the Dallas to Houston High Speed Rail proect. The two Corps of Engineers' public notices are actually dual official notices in that dry also r.resent public pncnices of required State Water Quality Certification by the Texas Ccxnrnmission Envirmmental Quality (TCEQ) under 401 Ofthe Clean Water Act. 2 Collectively, this represents a total of five official Public Notices of governmental processing of applications (Federal and State) on a single project that, by law, rquires the opportunity for public participation, including a chance to review, understand, research, request further information, and make public comment on all issues of concern and issues not adequately addressed in the applications. This is an unprecedented situation. public is faced with three separate and distinct Federal Public Not:ices with 60 day deadlines, and two State Public Notices with 30 day deadlines, for public Comment on a Major Development project that hase severe detrimental impacts to private landowners over a major swath of the state of Texas. These impacts are not merely impacts that would a landowner's properties where the development would take place. In fact, the entire project would require either the sale of the landowners' properties, often under duress, or taking of the properties under condemnation and eminent domain procedures. All ofthe major public notices were offcially released on December 22, 2017, three days before Christmas. All of the major public notices currently have a deadline for public comments set for either January 22, 2018 or February 20, 2018, a period of which mostly spans the Christmas New Year's holiday season, which are the focus of most family's joyous celebration and reconnection with extended family. Each public notice deserves the public's ability to evaluate the information on the proposed project on the merits presented in the public notice for a period of 60 days to formulate and make timely public comments. The timing Of the public notices, each on its own, over the holiday season, deserve an extension Of the deadline for public comments. Each public notice deserves a 60 period, on its own, for the public to consider and research and comment on the issues presented. In addition. due FRA's DEIS alone, is a document of more than considerable size covering many different areas that each deserve the public's consideration and opportunity to comment on. USACE-SWF and USACE-SWG public notices, likewise, cover many different issues that each deserve adequate time to respond to.^3 It is incumbent on governmental regulatory agencies to preserve the rights of Public Participation granted by the legislature in such permitting processes. In this unprecedented situation, those rights are being impinged upon because the public will not have adequate time to study and comment on all five of the public notices. For these reasons, I hereby request that the deadline for public comment on each of the mentioned public notices be extended for 150 days until July 20, 2018 (30 days for each of the public notices), so that the public the ability to study, evaluate, and properly prepare appropriate public comments on each public notice for such a proposed major that will, if approved, deprive so many private landowners of their life's work, investments, and property. ^1 The FRA Public Notice of the Draft Environmental Impact Statemalt (DEIS) for the project was set to be published in the Federal Register on December 22, 2017. The deadline for Public Comment was Februry 20, 2018. The two USACE Public Notices of Section 404 Permit Applications for the project were also set to be published in the Federal Register on December 22, 2017. The deadline for , Public Comment on these two Section 404 Public Notices are also set for February 20, 2018. ^2 The TCEQ Section 401 Certification Public Notices have a 30 day deadline for Public Comment for which the exact date was not announced, but is believed to be January 22, 2018. ^3 In fact. USACE-SWG public notice does not even include the rudimentary maps that the USACE-SWF public notice does, which will require additional time to request and receive.	Refer to NE-6 and PI-3.
Rick Welch	12/28/2017	Email	REQUEST FOR EXTENSION OF DEADLINE FOR PUBLIC COMMENT ON PUBLIC NOTICES FOR IHE FEDERAL RAILROAD ADMINISTRATION DRAFT ENVIRONMENTAL IMPACT STATEMENT AND THE JOINT USACE,'TCEQ PUBLIC NOTICES FOR SECTION 404 PERMIT APPLICATIONS SWF 2011 00483 AND SWG- 2014-00412 FOR THE DALLAS-HOUSTON HIGH SPEED RAIL PROPOSED PROJECT Dear Sirs, Recently, the Federal Railroad Administration (FRA), the Fon Worth District Office ofthe US Corps of Engineers (USACE-SWF) and the Galveston District Office of the corps of Engineers (USACE-SWG) issued official public notices on the same day concerning the Dallas to Houston High Speed Rail project. Sincerely, Rick Welch. In fact, the USACE-SWG public notice does not even include the rudimentary maps that the USACE-SWF public notice does, which will require additional time to request and receive.</p>	
Rick Welch	2/6/2018	Oral	<p>My name is Rick Welch. I live in Hockley. I hate to turn my back to you: but I do want to direct my comments towards the FRA. And I'm sorry that Mr. Wright got up and left. But first off: the FRA has totally violated the intent and the letter of the NEPA EIS process. Back during the scoping period: there were six or seven different alternative corridors that were listed. I attended the meetings. One of the alternatives was a utility corridor which had a single solitary path going through Waller County following mostly those utility lines. After the scoping period was over: the end of the public comment was also over. And it was not until they did alternatives analysis and chose an alternative through Waller County before it was announced that any other route through Waller County was made known to the public. So the HC-4 route was the one that was chosen: which was the one furthest to the west from the one that had been displayed during the public comment scoping period. The public has never had any opportunity to provide any public comment or information to the FRA on the HC-4 route which was selected through Waller County throughout this whole process. That is a violation of the intent and purpose of the NEPA EIS process: and it has its dangers in doing that: which I'll get to in a minute. The other is that the FRA has failed to coordinate with our local Texas governmental entities as our County Judge Trey Duhon said, who is also the President of the Waller County Sub-Regional Planning Commission. We have repeatedly requested for the FRA to come and coordinate with our local government entity in order to hammer out the details that need to be addressed: and the FRA has refused to do so, first saying that TXDOT would be the one to do the coordination; and then telling TXDOT not to come back and coordinate with us after they did the first time. And the judge talked about the lawsuit and all of that. Now, the danger of not accepting any input from the local governmental officials or the public is that you are unaware of dangers that are present. One is one such danger is the natural gas pipeline compressor station off of Binford Road. And natural gas line pipeline compressor stations are also the control center and the release point the safety center that releases natural gas out of the pipeline in case of emergencies. And emergencies can happen at any time. And they release large volumes of natural gas clouds. And to run a train within 580 feet of a natural gas pipeline compressor station that is run by electricity from the 252000-volt overhead catenary system that throws sparks as the train along it is a recipe for disaster. And this whole process that the FRA has violated is wrong and dangerous. Thank you.</p>	Refer to BA-3, BA-8, EU-2, EU-6, EU-7, EU-8, NE-1 and PI-1.
Rick Welch	3/9/2018	Email	<p>I live in Waller County, Texas and the ultimate path chosen through this county, the HC-4 route, never offered the opportunity for public to comment. Instead, a different path, the Hegar Road path, was presented during the scoping process as one of the optional corridors and was portrayed as the only route that would go through Waller County. The HC-4 route was only announced well after the scoping process and public comment period had ended, and only after it had been selected by TCR and FRA as the route that would go through Waller County. This has defeated the intent of the NEPA process and for the substantial</p>	Refer to PI-1 and PI-3.

			<p>reasons listed in my comments, the only viable alternative is the No Build Option.</p> <p>At the same time, I would like to protest the length of the public comment period since the release of the DEIS, even though it was extended to March 9. Texas Central Rail and the FRA have been working together on this DEIS since 2014. Landowners such as myself and my Comment on the Federal Railroad Administration Draft Environmental Impact Statement on the Texas Central Railway Dallas to Houston high speed rail project.</p> <p>2 neighbors have been blindsided by the sudden choice of the HC-4 route without any proper NEPA review or any public notice before it was chosen and we've been left without any open comment period in which to respond until the December 22, 2017 release of the DEIS. At the same time, Public Notices for two Section 404 permit applications from U.S. Army Corps of Engineers on the same project were announced, which had the same short public comment deadline. Given such a short period of time to respond, these comments must suffice as my comments to the two USACE public notices on Section 404 permit applications, although it has been impossible to even begin to fully evaluate those applications.</p> <p>This is a massive project that threatens to force people from their homes and properties and the public should have the right to be given enough time to provide proper comments. The two and a half month period is simply not long enough for the public to study and respond to all of the issues involved in such a massive project.</p>	
Monica Weldon	3/9/2018	Website	I would like to add that the high speed rail would be very beneficial for commuting back and forth from the two of the largest medical centers in North America involved in research. This would benefit our patient group allowing them to take special needs children in a short time to study clinics from the Dallas area to the Houston Medical Center. Our children have behavioral challenges and are sensitive change and transitions. Families would be afforded the option to return back home in the same day, saving money and added stress that traveling with a child that has special needs. These children would also benefiting from valuable research that could improve the quality of their lives with the ability to see specialists in the area of rare diseases.	Comment noted.
Angela Wells	3/9/2018	Website	As a fireman's daughter, we have benefited over the years from this property. To loose a property that first responders and our families have can visit for free is unacceptable. This would be a loss to the entire service community and I urge you to preserve this irreplaceable property.	Refer to LU-5.

Kim Wells-Baker	1/29/2018	Oral	I'm Kim and I spoke to you earlier and we talked about a lot. I am originally from California, and I moved here about ten years ago, and I left the hustle and bustle of L.A. so I could be in quiet Texas. And now the train in Los Angeles to San Francisco that was actually a 520-mile route has blown through every budget. It had started at \$33 billion, and is now up to close to \$67 billion, and some new numbers will come out in March. Now, if you divide that up by miles, that's about \$123 million a mile. Well, according to the numbers that they're giving us for the \$15 billion budget, that would only be \$62 million a mile, so actually they're half off. So and again, the numbers in L.A. are going higher and higher. So we're looking at maybe \$30 billion. And so they have investors here, investors there, but what happens when nobody wants to invest anymore? Because when we look at the numbers of Amtrak, which gets about a two percent ridership, and they're saying that this train's going to get a 36 percent ridership, where did they get the numbers? Now, when they might do a segment, like what L.A. is doing right now, they'll do a part of a segment and then say, Well, we've blown through that budget and need more money. What's going to happen when	Refer to ED-1, GN-2, GN-4 and PI-7.

			there's no more money to build the entire plan statewide? What will become of the viaducts and the other infrastructure? That's the question that I don't think can be answered because everybody's guesstimating. And that's what has everybody upset. And I know you -- and I talked and I said, you know, who gives them the right to eminent domain? You can see they've ripped through California. And it is a little bit different because it is getting some federal money, but it's also a private company. And you told me, sir, that there's a lot of private companies that have rails that exist currently, so -- and they do take eminent domain. And you said it would be up to the Texas legislature to make those decisions. So I'm telling everybody here how important it is that you do go online and you do complete your comments and what you're upset about and questions you might have, because just us, you know, kind of rambling here isn't going to get us anywhere. Thank you.	
Kim Wells-Baker	1/29/2018	Website	Who will give approval to a non railroad for eminent domain? When having to reroute roadways who will maintain cost of new roads in the future? When roads are damaged by trucks bringing abundant supplies to each location, who will cover the overused damaged roads? If Amtrak get a 2% ridership how did TCR come up with a 36% ridership? What is the dBA for two trains passing in opposite directions and how will the EPA approve such a loud dBA? This will occur on a daily basis and with the EPA calculated safe noise level for public to prevent hearing loss to be a 70 decibel time waited average and 85 decibel sound has a 31.6% mre energy than 70 how will that be addressed... again 85 dBA is more at a speed of 115 mph... so how is the noise being calculated? Noise has a nonauditory health impact. Typically it has been stated that a high speed train at 215 mph @ 100 feet is 95 decibels. Who determines when a private company can condemn private property? What if money runs out to build the entire statewide plan, what will become of the viaducts and other infrastructure?	Refer to ED-1, GN-2, NE-1, NE-9, NV-6, PN-3 and TR-7.

And now the train in Los Angeles to San Francisco that was actually a 520-mile route has blown through every budget. It had started at \$33 billion, and is now up to close to \$67 billion, and some new numbers will come out in March. Now, if you divide that up by miles, that's about \$123 million a mile. Well, according to the numbers that they're giving us for the \$15 billion budget, that would only be \$62 million a mile, so actually they're half off. So -- and again, the numbers in L.A. are going higher and higher. So we're looking at maybe \$30 billion. And so they have investors here, investors there, but what happens when nobody wants to invest anymore? Because when we look at the numbers of Amtrak, which gets about a two percent ridership, and they're saying that this train's going to get a 36 percent ridership, where did they get the numbers? Now, when they might do a segment, like what L.A. is doing right now, they'll do a part of a segment and then say, Well, we've blown through that budget and need more money. What's going to happen when there's no more money to build the entire plan statewide? What will become of the viaducts and the other infrastructure? That's the question that I don't think can be answered because everybody's guesstimating. And that's what has everybody upset. And I know you -- and I talked and I said, you know, who gives them the right to eminent domain? You can see they've ripped through California. And it is a little bit different because it is getting some federal money, but it's also a private company. And you told me, sir, that there's a lot of private companies that have rails that exist currently, so and they do take eminent domain. And you said it would be up to the Texas legislature to make those decisions. So I'm telling everybody here how important it is that you do go online and you do complete your comments and what you're upset about and questions you might have, because just us, you know, kind of rambling here isn't going to get us anywhere. Thank you.	Refer to ED-1, GN-2 and GN-4.
Kim Wells-Baker	1/31/2018	Oral	Hi. I'm Kimberly Wells-Baker, and I'm a resident of Navarro County, out of Wortham. I have read that a Draft EIS -- Actually, the FRA gentlemen over here told me. -- the Draft EIS will continue to be refined until a final resolution will be proposed in the fall of 2019. This Environmental Impact Study is to evaluate for impact to humans, and their natural environment. This impact study has been going on for nearly four years. This study -- if this study has been going on for four years, and we have about one more year to go, why is it, as the Navarro County Sheriff stated, that no one from the sheriff's office, the police, the EMS, the fire station, no one has been contacted in any of their offices by anyone from the railroad, from the high-speed rail, any government agency? So, if this is suppose to be an impact study of the impact for human safety, and for species, I know that they said that -- Let me -- Sorry. Sorry. I'm a little nervous. I don't speak very well in front of people. But to me, if you're saying for our safety, and you haven't even spoken to any of these people, at least in Navarro County, I don't know about Limestone County, I'm going to assume that no county --any of those agencies haven't been contacted. So, how can we go four years, and you tell us that "we're going to pick this proposed route based on our study"? So, what kind of study was taken, actually? And as far as their environmental study, when they say that there's no impact to any endangered species, I know that there's some bald eagles -- bald eagle nests along FM 3194. There's also species of concern, which we have river otters in that area. So, it's just questioning whether -- what really is the truth, and what isn't. And if our safety is involved, and they haven't contacted any of those entities, that's a concern of mine that I would like addressed. Thank you.	Refer to NE-1, NR-3, NR-5, PI-1, PI-1, SS-1, SS-18 and SS-23.
Charles A. Wendt	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. Kevin Kim West	1/31/2018	Email	<p>My name is Kevin West and we own several tracts of land in Freestone, Leon, and Limestone Counties. I'm writing today to formally OPPOSE the HSR no matter which route they may decide to take.</p> <p>This project is wrong on so many levels. It will impose hardship and burden on the good taxpaying citizens of the State of Texas. The rights of so many will be taken away, all for the financial benefit of a few, largely foreign, investors. The TCR and it's agents have, so far, proven to be deceitful and untrustworthy in their means and methods of conducting business. The purpose of the FRA is supposed to be development and enforcement of safety regulations on our existing railways in the country, not pushing private agendas on the people. So many questions regarding the safety and viability of this project, it seems, simply cannot be answered. We hope and pray that the elected officials of this country, as well as the State of Texas, will finally put an end to this project before irreparable damage is done.</p> <p>Yours Truly,</p>	Refer to NE-1 and SS-4.
R. L. West	1/30/2018	Handwritten	<p>I am against this project for the following reasons: 1. High speed rail in other parts of the world have a ridership that transferred from slower rail service. There is no passenger service between Dallas and Houston, where is the demand? 2. Airbus and private car transport is for the foreseeable future an equate for Dallas-Houston travel. 3. The counties that lie between Dallas and Houston would suffer great cost and inconvenience from the construction and operation of a high speed rail system while most job creation would be temporary. 4. The "private" rail system would be financed by federally backed loans, and or completion, large subsidies would be required for continued operation. This is a "Boondoggle of epic proportions".</p>	Refer to BA-4, GN-2 and GN-4.
Robert L. West	1/30/2018	Oral	<p>My opinion to the project is that it is a total waste of tax payer money. They are going to use federal loans in the form of guaranteed loans to finance it. The places in the world where this is actually a functioning bullet train they get most of their ridership from people who were riding slower trains. The transfer of the bullet train got that is going and there is nobody riding the train between Dallas and Houston that I am aware of. I really am not sure if even Amtrak goes there. It looks like a plan to just scam the American public out of their hard earned money to create a lot of havoc and expense to central Texas and no good to come of it. The only people I know of that are really for it are the mayors of the bigger cities. That is all of I got to say about it.</p>	Refer to GN-4 and NE-1.
West Houston Association	3/8/2018	Letter	<p>We are writing to express concerns regarding Texas Central Partners' (TCP) Highspeed Rail Project (HSR Project). The West Houston Association has advocated for better infrastructure and better quality of life in Greater West Houston since 1979. The HSR Project has the potential to provide an exciting transportation alternative for our region; we request that the Federal Railroad Administration's Final Order include key provisions to ensure that the HSR Project comply with state and local requirements to benefit the region. Background. Representatives of the West Houston Association have met on several occasions privately with TCP and attended various stakeholder events at which TCP has provided information. Based on our review of the Draft Environmental Impact Statement (DEIS), we are concerned that the preferred route and design are likely to significantly harm local transportation and development. Mobility. Our foremost concern is that segments of the proposed design in Waller County and Northwest Harris County rely on berms instead of viaducts (as previously discussed with TCP). These berms appear to divide communities that would otherwise be connected, reducing regional mobility options and impeding development of the major thoroughfare plan. The cost of mobility projects within the major thoroughfare plan will likely increase by tens of millions of dollars per project (in 2018 dollars) since these projects will require extensive grade separations.</p> <p>Land Use. The investment-backed expectations of numerous landowners within the area should cause concerns to any permit-granting agency. The commercial value and number of compatible uses for land near the HSR Project route appear significantly and demonstrably lower if a berm (versus a viaduct) is permitted. Landowners near the route have told us that their land values have already diminished and land deals have been interrupted by the change in conceptual design.</p> <p>Flood Control. Additionally, the berm concept may cause significant and undesirable flood risks to areas near the route and across the Katy Prairie. To avoid preemption concerns, the Final Order should require the HSR Project to meet state and local drainage requirements. Our Request. The HSR Project could greatly benefit our region but, as proposed in the DEIS, appears to impose costs and risks on Our region that warrant further consideration and mitigation. We request that the Final Order require the HSR Project to maintain the integrity Of the City Of Houston's Major Thoroughfare and Freeway Plan for existing and proposed thoroughfares and meet state and local drainage requirements.</p> <p>Mobility. Our foremost concern is that segments of the proposed design in Waller County and Northwest Harris County rely on berms instead</p>	Refer to FP-1, TR-1, TR-6, TR-7, TR-8, VA-1, WW-1 and WW-2. Engineering refinements made between the publication of the Draft EIS and Final EIS resulted in elevating 26 percent of Waller County segments on viaduct, in order to minimize impacts.

Kelly Wetterman	3/9/2018	Website	It's about time we have an option of travel between Dallas and Houston. We needed this, cut pollution and traffic on I-45. Quit making the roads wider. I'm for this so lets build.	Comment noted.
Marzulla Law	1/19/2018	Email	Mr. Wright, Roger Marzulla asked that I email you the attached letter. Thanks. January 19, 2018 letter to K _ Wright regarding request for extension Texans Against High-Speed Rail	Refer to PI-3.
Sarah Whelan	3/9/2018	Website	The high speed rail line from Houston to Dallas is critical if Texas wants to be able to accommodate its growing population. You cannot ignore the fact that this is a fiscally responsible and conservative move that the state can allow.	Comment noted.
Spencer Whelan	1/19/2018	Website	I think the Texas Bullet Train project is exactly what is needed for the state of Texas and for the United States as a whole. A private project, funded by realistic investors, using a transportation technology with a 53 year perfect track record is exactly the kind of ventures we want to be promoting in this country. We don't need another government takeover of land and tax dollars, we need to allow private investment to work within market parameters while working with the state and federal government to ensure public needs are addressed. I've seen nothing but integrity from the people leading this project and it needs to be fast-tracked to keep our economy moving.	Comment noted.
Chad White	2/28/2018	Email	At a time when we should be protecting waterfowl and native species the HSR will condemn thousands of sensitive acres that are privately owned, but heavily utilized by the native and migratory species. The Morgan Legacy Farm located near FM 709 and 3194 serves as nesting grounds for Mexican Black-belly Whistling ducks as well as several other migratory species who winter here in Texas. The construction of the HSR will permanently destroy this habitat as the tunnel and rail will permanently occlude the watershed. I am opposed to this project!!!	Refer to LU-5.
Chad White	2/28/2018	Email	I have concerns about the high speed rail in Navarro County travelling through the intersection of 709 and 1394 cleaving Morgan Legacy Farm. At this highest portion in the county I believe significant damage will occur to the environment and water shed adversely impacting the migratory waters of the US. Further by separating access of the Morgan Legacy Farm Lodge from the Rodeo Arena and Guest Houses and Stables the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared. Our office staff has had over 100 employees and family members visit this ranch, ride horses, take hay rides and enjoy the unique experience not offered by any similar property....all at no cost. I would ask that this 5-7 mile portion scheduled to parallel 3194 be moved north of the existing power lines to lessen the environmental, economic, charitable and historic on the county that would occur if Morgan Legacy Farm is traversed.	Refer to LU-5.
Chad White	2/28/2018	Email	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5.
Chad White	2/28/2018	Email	I have strong opposition about the high-speed rail in Navarro County traveling through the intersection of 709 and 1394 destroying Morgan Legacy Farm along with the water habitats of several rare waterfowl species. With so many other potential sites with less impact on water and landowners I can't support the current path through this important land	Refer to LU-5.

James White	12/25/2017	Email	If this is truly a privately financed and investor driven project it should not receive government funding or be allowed to exercise eminent domain. All of its security features should be privately financed. That is, no TSA assets. Private sector driven means starting a business just like every other business in East TX. No direct government funding, loans, subsidy, carve outs, or eminent domain. Period.	Refer to ED-1.
Martha White	2/5/2018	Handwritten	I am against this project! I, as a resident of Madison county, Texas do not want this in our area. I do not think it is necessary. If you want to go from Houston to Dallas there are daily flights. This will be a hardship on many citizens in its path and to all the citizens who travel our areas. As I understand it will split personal property, destroy county roads, cause a large level of noise and disrupt the lives of citizens in its path. Our property value will be affected and the cost to be passed on to citizens are not worth it. Emergency services will be affected and lives may be in danger if they cannot get to individuals. I think our tax dollars can be used to a better service. This will not be private.	Refer to BA-4, BA-12, GN-4, LU-11, SS-23, NV-1, TR-8 and VA-1.
Suzanne White	2/5/2018	Handwritten	There is no way this train will be utilized in the capacity you project. It is uneconomical and Texans DO NOT NEED or WANT this as a transportation option. NO BILL.	Refer to GN-2 and NE-1.
Brack Whitehead	2/6/2018	Website	I am against building high speed rail. I will have to look at high speed rail from my house. High speed rail puts financial strain on my local city resources. My property taxes will go up and pay for infrastructure that 99% of local citizens have voiced they do not want in 2-6-18 hearing. High speed rail will impede local roads which I use to transport hay and feed. My cost for producing beef and hay transportation of feed all increase. High speed rail increases my risk and insurance premiums. If economics of high speed rail was feasible and profitable, federal money would not be required. Energy companies regularly install pipelines with no government tax dollars. Economic evaluation is biased and should be done by an impartial party. Proposed rail design is anti-competitive and only allows design of one manufacturer in lieu of a universal rail where many manufacturers can compete at lower cost. The private company paying for economic and environmental study has a conflict of interest. Their study can not be used to justify building the high speed rail. It is public relation propaganda piece, a corrupt practice, financial gain of a private company through taxation of citizens.	Refer to GN-4 and NE-1.
Jo Dell Whitehead	3/8/2018	Website	WE NEED TO INCREASE OUR MODE OF TRANSPORTATION IN THIS COUNTRY.....IT WILL NEVER BE CHEAPER FOR THIS TO HAPPEN. IF WE WAIT, COST WILL ONLY GO UP.....THOSE WHO ARE OPPOSED TO THE TRAIN DO NOT LOOK TO THE FUTURE AS WE MUST DO FOR FUTURE GENERATIONS. JO DELL	Comment noted.
Brack Whitehead	2/6/2018	Handwritten	Property taxes will go up Noise in backyard Visual eye sore Little value added when alternative modes of transportation are more effective Impact my transportation of cattle feed Limit my economic options for expanding cattle grazing due to risk of increased traffic	Comment noted.
Diana Whitesell	3/9/2018	Email	As a citizen of the great state of Texas, I would like to express my deep opposition to the HSR. It's economically non-viable. It destroys people's property. (Some in the family for decades) It guts the heart of Texas. It destroys our beautiful state. It eliminates a God's house of worship (Ten Mile Community) It destroys historical landmarks. It creates health conditions. It will prolong response time of our emergency responders which will cost lives! The people of Texas have showed up and voiced their opposition to this. PLEASE LISTEN AND DO NOT BUILD!	Refer to CR-4, ED-2, GN-4, NE-1, SC-9 and SS-23.

Diana Whitesell	3/7/2018	Letter	Please vote no! Save our land! I AM OPPOSED TO HIGH SPEED RAIL! Keep Texas Central OUT of Madison County!	Comment noted.
Diana Whitesell	NA	Letter	It will ruin family and friends' land. I AM OPPOSED TO HIGH SPEED RAIL! Keep Texas Central OUT of Madison County!	Comment noted.
Gene Whiteside	2/5/2018	Oral	<p>Before I ask - - before my time starts, I'd like to do one thing. I'd like a show of hands of everybody that's opposed to this project. Please raise your hand. Hold on, hold on. Keep them up. I want this recorded. Somebody please get your camera and start recording this because I want this to be known. I want it to be known that we were cut from 600 seats to 300 because they never booked the Madisonville High School like they were supposed to, at which point the project manager said, Gene, it shouldn't be a problem; it's my understanding Madisonville is a small town anyway. That's right ladies and gentlemen, that's what we're dealing with. Keep them up. Keep them up. We got this recorded? Ladies and gentlemen, I stand before you today as an impacted land and homeowner as well as a retired military veteran. I ask each and every one of you to see this project for what really is. It's ill-conceived, ill-planned and to date is a poorly executed project. It does not benefit the public regardless of what the FRA and TCR state. It is proven that one TCR investor, Jack Mathews owns the land where the Dallas station will be located. And his business associate Joseph Drysale, first, it's a location in 2016 and also formed a company called HRS Holdings. LLC. Mr. Drysdale also owns the other parcels of property, also bought additional parts of the property along the utility corridor. I want you to think about that or a moment. The current route TCR want is the utility corridor is not being pressed because it's the most beneficial, the most economical or the most feasible. The TX-Dot ridership study even advised TCA against an intermediate stop also changed the modified Dallas/Ft. Worth to Houston corridor since removing the College Station stop, allowing for more a direct route and reducing the route length at a reduced capital cost. The rout TCR wants, the preferred route, the utility corridor, is being forced to that the rail line will hit the Roads Berry stop and allow it for Mr. Drysdale to get a return on his investments. I want each and every person in attendance to think about something else. Kevin Wright, the other FRA project manager, assured me numerous times during phone calls between the two of us over the past year, in addition to the routes, there would also be a no-build option. Think about that; no-build. He assured me that all information would be analyzed to include public comments and that indeed, the no-build option was a possibility. Now, I have been informed that Kevin, himself, waits until the public outreach meetings as starting to inform us, the public, that the no-build option is off the table. The reason?&amp;#183;&amp;#183;it doesn't meet the need. And I have witnesses that went to that meeting and heard that comment. So yes, indeed, it's true. I would submit to you, ladies and gentleman that TCR and FRA have not demonstrated a need for this project in any way. Additionally, Amtrak is studying and helps us to document that shows the congestion does not exist between Houston and Dallas, it exists between Houston and San Antonio. The FRA also knows that there is an approved DEIS for a rail project running from Oklahoma to Corpus Christi with a stop in Dallas. Why would the FRA burden Texas with two rails going to Dallas? Lastly, I want each and every individual in attendance to realize one last import thing. TCR bypassed the Texas government and sought the right to eminent domain through federal approval of the project with the Service Transportation board. The STB ruled they had no jurisdiction of the project and it must be decided in Texas as it's a state project. Texas Central then started suing land owners all along the route. There was only one case that was heard with thousands of pages of document submitted by both sided and the judge's ruling, it's a Harris County court case, that Texas Central had not proven that they were a railroad and had no eminent domain rights and therefore could not survey the landowner's property. There's been no other cases, and it stands Texas Central still does not possess eminent domain privileges. Now we are being told by the FRA supposedly they had taken the no-build option off the table. That means that this alleged railway is going to be in place some way, somehow, somewhere, no matter. What this really means is that an unelected body, another an unelected agency, along with the company that will have more than its half of the funding provided by the Japanese investment base as long as the remaining amount provided by tax payer dollars and private investors is dictating what will and will not happen. This is not representative of government of,by and for the people. And it surely not what I, my fellow veterans and service members have fought for here and fighting to defend. Hang on. Remember this, ladies and gentlemen, if this project is allow to proceed, no matter what the bank says, no matter what the deed to a land or home says, no matter the title company says, a private company saying they have the right of eminent domain can take what is legally yours and you will be expected to accept it and say</p>	Refer to PI-12.

			thank you. My name is name is Lt. Colonel-Retired Gene P. Whitesides, and I am soundly against this project. We are Madison county; we are Madisonville.	
Barret Whitesides	3/9/2018	Website	I am AGAINST this project! There are to many issues not addressed in the DEIS. There are issues with the Emergency Response times, lack of attention to safety, Noise levels (proven to cause stress and hearing loss), Emotional Impact and the fact there are too many holes in the DEIS to make it a viable project. I don't care what TCR says the DEIS says that there will be road closers as well as road that will have to be rerouted. Regardless, during the construction phase people will not have access to their homes, livestock etc.	Refer to GN-1, NE-9, NV-1, SS-1, SS-23, TR-8 and TR-10.
Barrett Whitesides	2/5/2018	Oral	My name is William Barrett K. Whitesides and I am 15 years old and a son of a US Army vet-Retired. I want it recorded that I am against this project for a multitude of reasons and one of them is that my family and numerous others will have to relocate in a new location and home for a profit that the ridership numbers and profit do not add up. As a military child and by the time I moved here when I was in 7th grade, I had already changed school six times since kindergarten and had to start making new friends. As my sister said, Texas is what we have always considered home and for a few reasons. That being knowing who the people are and, like, the scenic views. If this project were to continue through all these 240 miles, the impacts are indescribable. Some of the industries have been are the environmental impact and will increase an emergency response times, permanent destructions of land railways, emotional and stress impact on communities and families as well as the economic impact this will have on those communities. First of all, the noise pollution will impact everyone and everything. The train will pass every 15 minutes, 18 hours a day, 7 days a week and 365 days a year. Studies show that noise affects affect regular exposure to consistent elevated sound levels, elevated workplace or environment noise that can cause hearing impairment, hypertension, semi heart disease, noise and sleep disturbance exposure, changes in the immune system and birth defects has also been contributed to noise exposure. While this sounds nervous system. One reason we live in a rural area is to be able to relax, listen to the sounds of nature and look at the astonishing views. There will be no more star-gazing at the lights from the rail. The rail will destroy all of that. Something else to think about is the economic impact on the folks between Houston and Dallas. TCR claims that it will bring over 10,000 jobs to Texas if it actually gets built and it takes traffic off I-45, which I find it hard to believe that as Texans we have already 18 made their choice to either drive, fly or take the bus. However, if this is built and takes traffic of 1-45 then you are taking business away from everyone in the middle. So now you have taken jobs away from the locals in towns along the route. It's a location from where people run their businesses, so how do you justify taking jobs away in the middle of the game, jobs in Houston and Dallas. Think of it this way. How many of you remember the original Cars movie from Disney? The main character, Lightning McQueen gets lost on his way in a small town. Then the new highway gets built, aka the Texas High-speed train and the cars stop shopping in the town because they were no longer passing through. Guess what? This is called the economic impact which is a financial affect that some things, a situation or person has. Believe it or not or town has a lot of people that passes through here because of I-45. If this project is allowed to continue, all of the towns along the route will lose business which is an economic impact. So what jobs will the high speed rail bring to Texas? Nobody should lose business or their jobs in order for others to gain something. Thank you.	Refer to AS-1, GN-2, NE-1, NE-9, NV-1, SS-23, SC-4, SC-15, SC-19, SC-21 and TC-4.
Barrett Whitesides	3/9/2018	Website	I am AGAINST this project. All the sound measurements do not list how many trains per day, if any repairs every night, or speed of train is being measured.	Refer to NV-1. The noise assessment assumes that trains will run every 10-15 minutes in each direction between 5:30 AM and 11:30 PM, and that all trains will operate at a maximum speed of 205 mph, except in the vicinity of stations. Although there are two proposed trainset maintenance facilities and five maintenance-of-way facilities along each build alternative, there are no sensitive receptors within the FTA screening distance of 1,000 feet from these sites and therefore, noise impacts are not anticipated due to maintenance facility operations.
Gene Whitesides	1/19/2018	Email	I would like to know why the FRA is paying AECOM to book and lock in venues when they are an engineering firm. To add insult to injury, Kevin Wright told me that "it should be ok as it is my understanding that Madisonville is a small town anyway". It is unconscionable that a comment such as that would be made. At the very least this mistake is gross incompetence and at the very least it is gross negligence.	Refer to NE-5 and PI-11.
Gene Whitesides	1/19/2018	Email	I was informed on Wednesday, 17 January 2018, that the Madisonville High School auditorium venue had never been locked in by the FRA or AECOM. This confirmation came from Kevin Wright of the FRA.8 Additionally, I was informed by employees of the Madisonville Meteor newspaper that a representative of AECOM sent in a change of venue notification on the 9th of January 2018. That is nine calendar days and seven business days that AECOM knew the venue had not been locked in. In short, the auditorium holds 600 people and the Kimbro Center where the event is to be held at this time holds 300 people. On top of this, parking on the square is in short supply.	Refer to PI-11.
Gene Whitesides	2/5/2018	Oral	Little bit sweeter this time. Lady and gentlemen, I am still Gene B Whitesides. Lt. Colonel, United States Army-Retired. I again stand before you to discuss what the federal government already knows. You want to talk about alternatives, there is an alternative. They know there is	Refer to GN-3 and NE-1. FRA has a regulatory responsibility to evaluate the Project as

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>another viable option on the table as opposed to TRA's Dallas to Houston project. I looked at the fact earlier. There's already another transportation corridor that has an approved DEIS that extends from Oklahoma to Corpus Christi and it's described in <a href="https://www.fra.gov/p0716">HTTPS/WWW.FRA.FRA.Govp0716</a>. The website says the 850 mile Texas to Oklahoma passenger rail corridors, or TOPERS, extends to Oklahoma City in the North to Dallas, Ft. Worth, Austin, San Antonio, to destinations in South Texas, including Laredo, Corpus Christi and Brownsville. Let's consider another fact. There's also the Amtrak report I talked about. The Amtrak proposal for high speed passenger rail in the northeast corridor were the FRA's response to proposals, there's a federal register number, docket FRA-2016-0014, dated 31 August 2016 which shows two figures Figure 3 and Figure 4. Look them up. They show the peak period congestion on the national highway system 2002 and projected 2035. Once again, both figures, the congestion is not between Houston and Dallas, it's between Houston and San Antonio. The point of this is that the FRA knows there is already an alternative on the table and they haven't really done a good job to make the public aware of that. The top corridor meets the demonstrated needs as opposed to the TCR project which has not shown a need, not a want, to a desire, not a whim; a need. The Topper Project already has an approved DEIS. The only addition hat would need to be made in addition a Houston to San Antonio route and as mentioned, this would burden the state of Texas with two routes in Dallas when they already know the Houston to Dallas is not the issues. We the people, need to start asking the FRA one question, as opposed to having them and a private company dictate what's to happen. Once again, no build. Lastly, ask the commissioners and the county judge to get a Madison County advocacy group started to help us come together as one unit to stand united and stand against this train. Thank you.</p>	<p>proposed by TCRR which is a Dallas to Houston alignment. As part of this evaluation, FRA analyzes the indirect or cumulative impacts of other planned, programmed or reasonably foreseeable projects in <b>Chapter 4.0, Indirect and Cumulative Impacts</b>, of the EIS. This analysis includes FRA's and TxDOT's Texas-Oklahoma Passenger Rail Study (TOPRS) of passenger rail options, including conventional rail, higher speed rail, and high speed rail. The 2017 Tier I Record of Decision (ROD) formally identified seven Selected Alternative to serve as the framework for future investment in new and improved conventional and high-speed passenger rail service in three regions between Oklahoma City and South Texas. The ROD did not grant approval for construction, but selected alternatives for specific geographic sections along the corridor, to be carried forward in a more detailed, Project-Level EIS in the future. A Dallas to Houston geographic region was not assessed by TOPRS.</p>
Gene Whitesides	2/28/2018	Website	<p>Why is TCR attempting to push a transportation corridor down a utility corridor? It makes more sense to align this route down an existing transportation corridor as access routes for first responders have been emplaced as well as other transportation centric support requirements.</p>	<p>Refer to BA-5 and BA-9.</p>
Gene Whitesides	2/28/2018	Website	<p>It has been noted that Harris county has been granted another outreach meeting. I am asking for someone to explain to me why Madison county has not been granted another meeting. As discussed with Kevin Wright, due to an error on AECOM's part, the Madison county venue went from 600 seats to 300. Due to fire codes, the security at the Kimbro center venue stopped access when max capacity was reached. We estimate that there were close to 100 additional people who could not access the venue and speak. When I mentioned this to Kevin Wright, he stated that some issues in locking in venues were encountered but "it shouldn't be an issue as my understanding is Madisonville is a small town anyway". This is unacceptable and we demand another opportunity to engage the FRA.</p>	<p>Refer to PI-10 and PI-11.</p>
Gene Whitesides	3/5/2018	Oral	<p>My name is Gene Whitesides, Lieutenant Colonel, United States Army, Retired. Ladies and gentlemen, tonight, I stand before you as an impacted land and homeowner up in Madison County and a 20-year retired military veteran of the United States Army. I ask each and every person here to see this project for what it is, an ill-conceived, ill-planned, and to date, poorly executed project that does not benefit the public regardless of what the FRA and TCR state and would have you believe. We have proof. There's an Amtrak ridership study that shows that the true congestion is between San Antonio and Houston, not Dallas and Houston. Look it up. It's out there. All right? Mr. Hagy, who works for TCR, was at the Grimes County Sheriff's meeting back on March 1st. He says that they are working with land and homeowners to minimize the impact down this utility corridor. Think about it. They're trying to shove a transportation corridor down the utility corridor. Let me show you what working with some of these land and homeowners means. Lavon Thomas, are you here? Please stand up, ma'am. Donovan Merte, please stand up. Ron Richards, please stand up. Ladies and gentlemen, what you see, these three individuals that stand here before you: Miss Thomas, her husband is about 92, 93 years old, was a bomber pilot, United States Army Air Corps, World War II, European Theater of Operations. Members affiliated with TCR came to their house and beat on their door in the darkest part of the night, demanding to be let in, to be heard, to survey, when they were threatening them with jail. Go ahead and sit down, ma'am. Donovan Merte, his son has autism. He bought property out in the country to be with his son and raise his family. Once again, CLS and Sam, they told him that if they did not -- his family did not allow them to survey, they would take them to court. They would sue them. That's what working with the landowners means to this little project. Go ahead and sit down. Ron Richards, ladies and gentlemen, who's my father-in-law, he, on three separate occasions, has caught three different groups of people affiliated with this project in the active part of trespass onto our property after they were being told, "No, you do not have the right to survey." And that's been legally proven. Look it up. It's out there. All right? Sit down, please. mean, okay? Let me leave y'all with a couple of last-minute thoughts, and I am going to go over my time, but let me tell you something: I fought for the last 20 years of my life to defend the right (inaudible) to enjoy the First Amendment and due process. Lastly, I want every individual in this room to realize one last thing: The Texas government, they bypassed -- TCR bypassed the Texas government to get the right-of-way -- they bypassed the State to get the right of imminent domain, the Surface Transportation Board. The Surface Transportation Board sent them home. They tried it in the last State Legislature. They were told no. All right? So you remember this: If this project is allowed to proceed, no matter what the bank says, no matter what the deed to your land or your home says, no matter what the title company says: A private company claiming they have the right of eminent domain -- which we know they do not -- can take what is legally yours, and you will be expected to accept it and to say thank you. The only option here is no-build alternative. Lastly, I put in over 20 years of my life, multiple tours to Iraq. I did not know</p>	<p>Refer to BA-2, ED-1, ED-2, GN-2, NE-8, PN-3 and SC-19.</p>

			if I was going to be able to come home. I did not know what condition I was going to be in when I did come home. But the one thing that got me through it was my family, and knowing that I had family and a home to come home to. But now, I never once thought in my life that I would have to fight my own government and an unethical company, in TCR and its affiliates, for what is rightfully and legally mine. Thank you, ladies and gentlemen.	
Gene Whitesides	3/9/2018	Website	I am AGAINST this project as the real need is between Houston and San Antonio. Amtrak already has a DEIS with a trail that would connect Dallas and Houston. Why do we want to burden Texas with two High Speed Trains?	Refer to BA-2, GN-3, NE-1, PN-2 and PN-3.
Michaëlle Whitesides	1/29/2018	Handwritten	What steps will be taken to prevent sink holes, cracking & shifting Safety issues need to be addressed Why are you using old maps from 2014 and some are upside down Why has this been put out before the 3yrs. of endangered species survey has been completed Road rerouted responsibility of counties	Refer to SG-1.
Michaëlle Whitesides	1/29/2018	Oral	Yes. My name is Michelle Whitesides, AND I'm actually from Madison County and I originally was not going to speak this evening. However, I was just coming to kind of hear what everybody else had to say. I am an affected landowner as well, as my father, but when we walked in the door this evening a gentleman from TCR stated that we didn't belong here. And I walked up -- whether it's joking or not, I have every right to be here this evening. With that being said, first of all, I would like to address an issue with Madison County. You-all threw out and put all this information in these letters of all these meetings, but one, you, first of all, only sent them to impacted landowners. You did not bother to put this out in that two-mile radius. I have people that I'm talking to and they have no clue of what's even going on as far as these meetings are concerned. So you've left it up to us to fight this battle on our own, and I'm extremely frustrated with that. Second of all, you never once confirmed the venue in Madison County. You moved us -- when you contacted again and found out that you could not hold it at the Madisonville High School, you moved it from a venue that held 600 people down to 300 with very little parking, and I have an issue with that because when we contacted -- my husband contacted the representatives of FRA, guess what he was told--Madison County is a small county so it shouldn't be an issue. Very frustrating. So with that, first of all, you took four years to put this together. We get barely 80 days to go over a 5600-page report. No tax dollars being used? What do you think FRA is and TxDot? They've been using tax dollars this entire four years. Why did it only affect -- I already said that. Let me apologize. Re-routed roads. I know this has been stated, but guess what. If the counties are made to be -- re-route the roads and maintain, that's tax dollars. Movement of livestock, hay, et cetera. Guess what. Anyone between Houston and Dallas, you're talking about livestock and agriculture that's going between those two. Guess what. They can't ride the train. Also I also have an issue with the four-year-old maps that were in the EIS environmental statement, especially in Madison County. I'm not sure because I'm not familiar with the rest of it, but Madison County's are upside down, so it took my husband and I over three hours just to try to figure out where our piece of property that is getting ready to be taken away from us. So if you're going to take four years to put this together, at least update your information and your maps because those maps do not show my house, my parents' house, or anything. So if you can't even put that stuff -- get that stuff right, what else is incorrect in that environmental study? Plus on the pipeline that is already on there, we have sinkholes. We are constantly -- we lost a horse in one of those sinkholes on the pipeline, and my son fell in one. So guess what. Your train will be next.	Refer to GN-1, GN-4, NE-5, SG-1 and TR-7.

Michaelle Whitesides	1/30/2018	Oral	I will try not to get emotional. My name is Michaëlle Whiteside and I am highly against this project I have been married 23 years to a veteran who retired in 2014 and we moved to Madison County to get away from the hustle and bustle. To raise our kids morals and respect for others We have lived in the DC area. We hme in all types of areas, overseas and everywhere else. That is not where we want to be. We lvant to be here. So these are just a few things. How does TCR justify a S 199 one-way ticket? We have been told from 2014 onward that the cost would be comparable to an airplane ticket How does TCR explain that two of its imestors: Matthews and Drysdale property identified the Prairie the location being looked at the Dallas station. In addition Drysdale purchased additional property on the utility corridor in Grimes County _ How do you explain the perception that the only reason the utility corridor is being pushed is so the imetors can get their paydays? Especially after the Tx_DOT ridership study advised against an intermediary stop. Explain also why the satellite imagery used in the DEIS is 40 years old and does not show our homes and the roads and everything else we have cleared and so fourth What will happen when the investors getting tired of waiting and bail? Like they did in Califomia_ There is this FRA packet that they passed out here is just some questions. Question number two, it states — why doesn't a train go to downtown Houston? Two options were eliminated due to the environmental impact for the National Historic District. IVhy is Houston's history more than the history between the two stops? Statements of no public roads is a play on words is question number 14. When in fact roads will be closed and rerouted. Who will be responsible for rerouting these roads and maintaining them? In question number one in the FRA packet ya'll received also. Ifthe road along the route is temporarily closed there will be detours and appropriate signage put in place. Please tell me where you plan to detour along my route because in the study all roads leading to my property and around my property are setting personal disruption? Where do you plan on rerouting this traffic when all roads leading to my house will be permanently destroyed? I'm done.	Refer to BA-5, BA-9, BA-10, CR-13, GN-1, GN-7, NE-1, SC-3, TR-6 and TR-10.
Michaëlle Whitesides	1/31/2018	Oral	Try not to shake as bad as I did last night. Okay. My name's Michaëlle Whitesides and I'm from Madison County and the spouse of a retired U.S. Army vet. We are against this project. My comments and my story is similar to pretty much everybody else that has come up here so I want to focus on some of the questions that are in the packet that they are passing out. So question number seven says how do you know if there are -- excuse me. You know if there are threatened or endangered species on my property. There have been documented encounters of the endangered species or plants before this document was put out into the public. Not to mention the three-year study has not been completed. So how can you put in the EIS that there is none if that has not been completed yet. Question number eight on that packet says, what happens if you find a threatened or endangered species on my property? FRA's reply, relocation of the impacted species will be coordinated with the U.S. Fish and Wildlife Services. So just like us they do not get to choose where they want to live and will be relocated. So nothing is safe. They choose to live here just like we did and should be allowed to stay. Just because those that choose to live a ways from their work and do not want to drive the distance, the endangered species and landowners have to be relocated. Question number eight on that packet, how will I move my livestock across my property? FRA states, where the track is on an embankment, wildlife crossings, such as tunnels, will be incorporated to allow for movement and could -- I repeat could -- potentially accommodate livestock. What do you mean could? Wait a second, you are going to farming country and we don't even get a definite answer on this one, just a could. And I love that they assume that wildlife is just going to follow your signs and go right into the tunnels. We all know how many deer, hogs, and other wildlife are hit by cars and trucks because they do not follow the rules of the road. Oh, and wait, what about the large farm equipment. You have not even put that into consideration. Question number ten on that says, we will construct -- will the construction of this project cause upstream, downstream flooding? We all know that no matter what, when you start messing with the natural flow of water, we always get burned. Look at Houston, floods every time it sprinkles. Question number 12, if the project requires new electrical lines, who decides where to go? FRA's reply, any changes to overhead electrical lines, including pole adjustments, relocation, or new construction would be coordinated by the utility owners. Think about that. These changes would require an additional environmental analysis that would be completed by the utility owner. Wonder if they know that. And so that -- hold on. So we still don't even know if they will need additional power lines and if they do that means more people will be affected and more land will be taken. Seriously, do you think we're stupid? Oh wait, yes. As we live in the country and there's no way we can be intelligent or have a college education. Wrong. I have a bachelors in business and a masters in education, and let me tell you I know some pretty smart farmers that do not have a college education. As well as some of the -- some that have an education and question why they ever got it. Question number ten on that form, why does the train go -- why does the train not go to downtown Houston? Because of the environmental impact of the national historic district in Houston. Why is Houston's history valued more than the history between Houston and Dallas?	Refer to EU-2, EU-5, GN-6, GN-7, FP-1, LU-11, NR-4, NR-6, TR-4, WW-1 and WW-2. For information regarding the Endangered Species Act and federally listed species with potential to occur within the Project see <b>Section 3.6.4, Natural Ecological Systems and Protected Species, Affected Environment. Section 3.6.4.4.2, Natural Ecological Systems and Protected Species, Protected Wildlife Species</b> , discusses federally and state-listed species reported by USFWS and TPWD. All species listed as threatened or endangered either by USFWS or TPWD for Madison County are included in <b>Section 3.6.8, Natural Ecological Systems and Protected Species, Protected Wildlife Species</b> with Potential to Occur within the Study Area. As defined in <b>Section 3.9.5.2.1, Utilities and Energy, Utilities</b> , the Project limits of disturbance includes the potential locations of electrical utility modifications, including new connections to HSR facilities, and these areas are included in the assessment of impacts in the Final EIS. Historic districts are part of FRA's cultural resources evaluation. FRA conducted desktop evaluation of all 240 miles of each Build Alternative. Where access has been granted, FRA has also conducted visual historic surveys (above ground) for eligible, as well as potentially eligible historic resources. FRA has also conducted archeology (below ground) surveys where access allowed. FRA takes the historic integrity of the entire corridor into consideration when evaluating this Project.
Michaëlle Whitesides	2/5/2018	Handwritten	I am against this project as TCR has yet to prove that there is a need for this between Houston & Dallas. There is no Economic Impact study that has been completed.	Refer to PN-3 and SC-19.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
Michaëlle Whitesides	2/5/2018	Oral	My name is Michaëlle Whitesides. I am against this project. There is no demonstrated need as the real congestion is between Houston and Sand Antonio, which my husband has already said. The Amtrak party has already done the research. And there is an EIS taking high-speed train from Oklahoma to Corpus Christi, which also takes it to Dallas. Also, the draft EIS says that some utilities will need to be rerouted or moved. There are sections on the map where the pipelines will have to make some of these adjustments, possibly the power lines as well, which means that more property will have to be obtained in order to cut, cap and reroute the pipelines. So there are many places where the current utility corridor route the track will be directly on top of or cross over the existing active pipelines. Why are these numbers not included in the draft DEIS? So does this mean that we could see this project, meaning more than 8,000 acres to be completed? More land means more money, not to mention that you are planning on putting a train on top of a pipeline that we still have sinkhole issues, as the second pipeline was only put in about five years ago. We already had to rescue a horse and our son out of one of these. I think FRA tried pushing this through a little too quickly as there many gaps in your report. And no, you are still not allowed on our property. I won't go over the same stuff that everybody else did, but I want - - my question is, I think that - - I do appreciate the extra time, however, I do to feel that 75 days is enough time to process over 56,000 pages on the draft EIS. I am requesting an extra extension as most of us work. We're trying to go through this. Y'all's job may be just to sit here and go through that, TCR's job just to sit here and go through that, but the rest of us are trying to balance a family, our job and trying to go through this. Once again, I am against this. Thank you.	Refer to BA-2, EU-1, EU-2, GN-3, NE-1, PI-3, PN-2 and PN-3.
Michaëlle Whitesides	2/6/2018	Oral	My name is Michaëlle Whitesides, the spouse of a U.S. Army vet, and we're from Madison County, and I am against this project, as there is no demonstrated need, as the real congestion is between Houston and San Antonio. Amtrak has already done their research and has an EIS taking a high-speed train from Oklahoma to Corpus Christi, Texas, and its plans have a station that will go directly through Dallas. So why are we going to burden Texas with two high-speed rail stations in Dallas when there is already one in the works? Also, TCR has stated in several articles that they will be using Japanese bank and federal loans to help fund their project. They also state that this will help boost Japan's economy. I am not against Japanese, but what about boosting the U.S. economy? I don't think we should loan money to a company who seems to be more interested in boosting Japan's economy and lining their own pockets. Another point is the speed. There are 23 curves that will require the train to slow down, which means that a high-speed rail cannot maintain the 205 mile-an-hour speeds. The two train accidents that were in the recent news was crashed on curves where the train exceeded 30 to 50 miles per hour. The study does not mention how the speed will be handled on those curves. At least I did not find one. Also remember this project will not benefit majority of the people in the middle for multiple reasons. One, time cost analysis does not calculate to be beneficial, and a lot of those riders all have livestock and large equipment. The train will not accommodate those riders or their extra loads. Also Holly Reed, who is probably out talking to the media about how well they are working with the landowners, I am here as a landowner to tell you it is all lies. As for the last three going on four years, we have been asking questions, sending emails, with vague answers and no returned to our responses to our emails or anything. On our second meeting with TCR, we were told that they had eminent domain, which, our course, is a lie. We have received letters threatening legal actions if we did not allow them to survey our property. And I'm here to say you are still not allowed on our property.	Refer to BA-2, ED-1, ED-2, GN-2, GN-4, NE-8, PN-3, SC-19, SS-12 and TC-3.
Michaëlle Whitesides	3/5/2018	Oral	I have several of the comments that other people have said; however, tonight, I'm here to enlighten you on just how TCR has been working with the landowners. On every interview, one of TCR's reps gets on the media and tells the public that they are working so well with the landowners, and that people are so pleased with how things are being handled. I'm here to tell you it's all lies. My husband was even told at one of the meetings by David Benzion that people were weeping tears of joy of the offers they were making. Well, our offer was an insult. Sorry, lost my place, and I'm shaking. Sorry. Well, our offer was an insult. We are starting our fourth year of dealing with this project and the lies from TCR. I have been to just about every meeting possible, putting my kids and family aside to research and find out more information to questions that I or others have asked about back about three years ago. My husband and I have e-mails where we have asked -- have received no replies; and the few replies that we have received is the same song and dance: "When we have the answer, we'll get back to you," or it was -- "If we were in your shoes, we'd want somebody to be completely honest with me." And they're not being. To date, we still have a lot of questions that have not been answered. I have even posted some questions on TCR's Facebook page with no reply. We have also had verbal promises -- made with witnesses standing next to me -- by Eckels, Brandywine, Benzion and others that they would love to meet with us on numerous occasions to discuss with us our personal issues and concerns. To this day, the only contact we have had is a letter threatening us with a lawsuit if we did not allow them to survey. Oh, by the way, this letter was sent on Friday, July 1st, of the 4th of July weekend, with only a 7-day grace period to respond. The second time, Ken Williams with CLS showed up on opening season unannounced wanting to make an offer with no prior notice; therefore, not all parties were present. However, Ken Williams stated that they messed up our offer, and all the -- and all of the offers were put together by someone sitting in an office in Dallas. How can you accurately make an offer without seeing the homestead first? There are so many things that -- especially for those of us who will have to re -- completely relocate, to rebuild -- they did not even take into consideration when making their offer. Even though they currently still do not have eminent domain, that they continue to falsely state that they	Refer to ED-1, LU-12 and NE-8.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
Michaëlle Whitesides	3/5/2018	Oral	My name is Michaëlle Whitesides, and I'm against this project. I would like to start off by asking why Harris County got a second meeting when Madison County also met the max capacity on the February 5th meeting and people were turned away. So my first request is that you give all the residents of Madison County a second chance to actually attend, especially since the FRA is the reason the original venue of 600 capacity changed to 300, as you all never had it secured before sending out the letter with the meeting dates. I have several of the comments that other people have said; however, tonight, I'm here to enlighten you on just how TCR has been working with the landowners. On every interview, one of TCR's reps gets on the media and tells the public that they are working so well with the landowners, and that people are so pleased with how things are being handled. I'm here to tell you it's all lies. My husband was even told at one of the meetings by David Benzion that people were weeping tears of joy of the offers they were making. Well, our offer was an insult. Sorry, lost my place, and I'm shaking. Sorry. Well, our offer was an insult. We are starting our fourth year of dealing with this project and the lies from TCR. I have been to just about every meeting possible, putting my kids and family aside to research and find out more information to questions that I or others have asked about back about three years ago. My husband and I have e-mails where we have asked -- have received no replies; and the few replies that we have received is the same song and dance: "When we have the answer, we'll get back to you," or it was -- "If we were in your shoes, we'd want somebody to be completely honest with me." And they're not being. To date, we still have a lot of questions that have not been answered. I have even posted some questions on TCR's Facebook page with no reply. We have also had verbal promises -- made with witnesses standing next to me -- by Eckels, Brandywine, Benzion and others that they would love to meet with us on numerous occasions to discuss with us our personal issues and concerns. To this day, the only contact we have had is a letter threatening us with a lawsuit if we did not allow them to survey. Oh, by the way, this letter was sent on Friday, July 1st, of the 4th of July weekend, with only a 7-day grace period to respond. How can you accurately make an offer without seeing the homestead first? There are so many things that -- especially for those of us who will have to re -- completely relocate, to rebuild -- they did not even take into consideration when making their offer. Even though they currently still do not have eminent domain, that they continue to falsely state that they have.	Refer to PI-1, PI-4, PI-10 and PI-11.
Michaëlle Whitesides	3/8/2018	Website	I am against this project as they have lied and been unethical about the entire process. I think it is important for you all to know what type of company you all are dealing with. On TCR's Facebook page they are bribing people to make comments to the FRA in order to win a model train. My question is, if these comments are suppose to be sent directly to FRA how will they know who has sent in a comment to place them into a drawing? After further research I discovered on their Website that they are having people send comments to them so they can send to the FRA. This seems to be very deceitful, fraudulent and unethical. Attached is both their posting on Facebook and Website.	Refer to PI-4.
Michaëlle Whitesides	3/8/2018	Website	I am 110% Against this project. I am not a lawyer, but In my view, the DEIS is also an Illegal Document as the FRA was notified Before Release that Evidence Existed proving some Survey Data was Obtained Illegally without Landowner Permission. If that Data was Illegally Obtained and used by the FRA, then in my view the DEIS is Illegal. Not to mention the FRA released the DEIS while having the Knowledge and that Back-Up in their hands. NOT cleansing the document by reconfirming ALL Survey Data used was obtained with Landowner permission is Unethical to say the least and the FRA is Implicated. Also, at this time my father has run off three sets of surveyors who where trying to survey illegally. We still can not get TCR to answer the question have you surveyed our land or not. Their answer is I don't know. How can you run a business and not know what is going on. LIES!!!	Refer to GN-1 and NE-8.
Michaëlle Whitesides	3/9/2018	Website	I am AGAINST this project as it will not relieve the traffic that TCR claims it will relieve. If ticket prices ever become way less than the \$199 one way as stated in your DEIS. You are just moving traffic from 45 to a two lane road on HWY 30 and adding more congestion to 610 and 290.	Refer to SC-3, TR-2 and TR-5.
Michaëlle Whitesides	3/9/2018	Website	I am AGAINST this project! The maps in the DEIS are out dated and do not show all of the homes and buildings that will be destroyed. The maps are from 2014 and in some portions of Madison county are placed in the DEIS upside down. Making it difficult to determine where property is located and exactly what will be destroyed.	Refer to GN-1.
Michaëlle Whitesides	3/9/2018	Website	I am AGAINST this project! As it will destroy businesses along the route and cause others to lose business. TCR's claim of bringing in 1,000 permanent jobs does not justify others losing theirs. As there is no benefit to any of the counties between Houston and Dallas. This is called and Economic Effect.	Refer to SC-19 and SC-21.
Michaëlle Whitesides	3/9/2018	Website	I am AGAINST this PROJECT, TCR and its affiliates. They are using bribery to get people to make comments. This is definitely unethical and if not illegal, border line illegal. They have posted not only on their facebook page, but on their website send your comments to us to be entered to win a toy train. However, I thought all comments were suppose to go only to the FRA. So, how do they know who is turning in comments to the FRA if they do not have their hand in the pot. This entire process has been tainted with lies from TCR and unethical behavior. I want this bribery issue to be addressed immediately. Attached are the following screenshots of both.	Refer to PI-4.
Michaëlle Whitesides	3/9/2018	Website	I am AGAINST this project. The ridership numbers provided are flat out wrong and not substantiated by actual data. Looking at AADT station data north of Fairfield, there will be no way that TCR will be able to obtain the ridership numbers they have proposed. Other studies including	Refer to AQ-7, GN-2, GN-3, GN-4, NE-1 and PN-3.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
			Tx Dots multimillion dollar study only shows ridership figures of 0.7-2.7 million and the Reason report has only estimated 1.4 million annual ridership. This is extremely concerning as this will lead to not only a detrimental negative impact on the environment but since they are seeking federal taxpayer backed loans will also affect each of our back pockets. Currently there is only 1.3 million annual airline ridership for this route. There is only 89,060 annual workflow commuters according to Amercian Community Survey 2006-2010 Tract to Tract Data (see links below). So how are you calculating 5 million annual ridership when 100% of the airline traffic and workflow commuters in under 1.4 million? Please provide data to justify purpose and need. There clearly is not enough traffic or need for this route. Since this project involves the NEPA process and will lead to many negative impacts, the ridership and data must be vetted and substantiated. Dallas county to Harris county commuters- 65 <a href="http://bigbytes.mobyus.com/commute.aspx">http://bigbytes.mobyus.com/commute.aspx</a> Harris county to Dallas county commuters- 179 <a href="http://bigbytes.mobyus.com/commute.aspx">http://bigbytes.mobyus.com/commute.aspx</a>	
Michaëlle Whitesides	3/9/2018	Website	I am AGAINST this project. Any accounting for lost jobs due to lower AG income and such? 241K jobs impact for construction and 17 years operation. Any source on this? 10K per year and 1K for the 17 years you are well under 100K jobs from TCR. Need supporting data	As discussed in <b>Section 3.14.3, Socioeconomics and Community Facilities, Methodology</b> , all employment and earnings calculations are based on economic input-output multipliers that estimate the ripple effects of the Project's capital investment on the surrounding economy, including both direct employment and jobs created in supporting industries. The analysis uses RIMS II multipliers obtained from the U.S. Bureau of Economic Analysis (BEA) for each of the five Economic Analysis Study Areas. All employment estimates are reported in job-years, defined as one job for one person for one year. This allows for a more direct comparison of temporary jobs generated during construction and permanent jobs, with impacts assessed over 17 years through 2040. Permanent employment impacts would likely extend beyond 2040 but were not included in this analysis.
Michaëlle Whitesides	3/9/2018	Website	I am AGAINST this project. State solar panels will be used but no amounts listed in the DEIS.	Solar panels are incorporated in the FDCE as an option for sustainable development of the stations in <b>Section 3.14.2 Socioeconomics and Community Facilities, Regulatory Context</b> and will continue to be evaluated during project design.
Michaëlle Whitesides	NA	Website	am AGAINST this project. Normal chain link type Fencing is of no use to keep Feral Hogs off the tracks. A train hitting a 300# Feral Hog would be devastating. It takes special fencing as well as a methodology to minimize the digging under the fences to keep Feral Hogs out of an area they are unwanted. More specifics specifications should be provided to TCRR.	Refer to SS-2 and SS-12.
Michaëlle Whitesides	NA	Website	I am AGAINST Who will develop the specifications for Emergency Response on top of a Viaduct or tall Berm including requirements for High Elevation Evacuation of the Train sets? Again, an area totally missing in the DEIS. And Finally, there must be a Risk Assessment performed on the ability for Emergency Vehicles to reach any remote area along the 240 mile route. There is no mention of this in the DEIS. In any wet or winter months, it will be next to impossible to reach the track in the middle of a very remote pasture along the route. Will special Emergency Response Vehicles be purchased by TCRR and kept along the route for fast emergency use? Where is this covered in the DEIS?	Refer to SS-3, SS-18, SS-19, SS-23 and SS-26. TCRR does not plan to supply separate emergency response vehicles or staff beyond the private security force described in <b>Section 3.16.6, Safety and Security, Avoidance, Minimization and Mitigation, SS-CM#9</b> . TCRR will supply emergency equipment, such as fire suppression and first aid resources, consistent with the needs identified in its Emergency Preparedness Plan.
Michaëlle Whitesides	NA	Website	I am AGAINST this project. Construction Access will require the construction of new roads requiring the taking of more Private Property for roads. FRA needs to clarify who owns these newly constructed roads and who will be responsible for maintenance in the future. The FRA needs to also clarify if "New Roads" would fall under the normal Eminent Domain process, thereby this Project would then require the use of More Private Property simply due to its Discussion. The Public deserves this level of detail.	Refer to ED-1, TR-6, TR-7 and TR-8.
Morgan Whitesides	1/31/2018	Oral	My name is -- my name is Emily Morgan Whitesides. I am 12 years old and the daughter of a retired U.S. Army vet. I want it to be recorded that I am against this project. Aside from the environmental impact, safety concerns, financial burden, and et cetera, as I do not have the time to read the 5,600-plus pages you all have put out. I spend my time trying to help feed all the animals as well as do my homework done and studying done while my family is busy trying to save everything we own and work for. I wanted to speak briefly about the emotional impact on a lot of families. As a military child who lived without her father for 12 to 18 months, every time I wonder if I'm gonna ever get to see him again. Believe it or not the stress level for our multiple deployments has been way less stressful than the strain worrying about our forever home and our family. It has completely taken over my family's life as they try to research, read, and comprehend everything, while trying to maintain their jobs, take care of us, work on the farm, treat the horses, goats, rabbits, fix -- etc. The emotions are always at high levels. One	Refer to ED-2, LU-7, NE-1 and NE-9. NEPA requires that a proposed action's effects on the environment be assessed. It does not require an evaluation of emotional effects.

			<p>news broadcast, newspaper article, or information from other sources can turn a perfect day into well another time doing more research and making notes. Even though my brother and I know they are doing it for us, we still miss the times of being able to sit down together and not to hear the possibility that TCR and their employees can tear all that we have apart. I want to leave you all with something to think about. As a military child no matter where we live North Carolina, where I was born, Kansas, Virginia, and Pennsylvania, I never called any of those places home. Every summer when school was out my mom, not my dad, as he was either deployed or working too much, would pack my brother and I, all of our animals, usually four cats, two dogs, and two fish, and we would drive home to Texas. Yes, I said home. We would spend the entire summer in Texas visiting family and friends and looking for the special place to plant our feet when my dad finally retired. Yes, my brother and I had a voice in where we wanted to live and as a family of Madison County, we all agree that we wanted a small place where we could have horses, chickens, rabbits, and anything else we were not able to have with all the military moves. At this time what we have rescued five horses. I have 14 chickens I bought and helped build the coop with my own money. I pay for their feed by selling my eggs to family and friends. I have chores to do and I do not get paid for them. I do them because this is the life we choose as a family and it takes all of us including my brother to help keep everything running, while maintaining an A average in all of my classes and being a part of the National Junior Honor Society and the secretary of the student council. It took us years to get us where we are today and we still have plenty more that needs to be done. However, my point is that if this project continues then we'll need to get ourselves back to the same place we are today. I lay in bed and wonder what would happen to all of my four-legged family members if we only had 30 days to move. Where would they go until we were able to find another piece of property and rebuild to the point we are today? My question is why if we can't spend tax-paying dollars to do studies on all of these other issues, why can we not spend the money to do a study on the emotional effects this is having on the communities? When you have that answer for me, I would appreciate if you would personally contact me with a response. Until then I just want to say, Lord, please watch over the communities, families that are being affected by this project. Please stand by them through the process and help all of us continue to be Texas strong. If we stand together we can conquer anything, amen. Thank you.</p>

Morgan Whitesides	3/5/2018	Oral	My name is Morgan Whitesides. I am 12 years old and the daughter of a U.S. Army vet. I want it to be recorded that I am against this project. Aside from the environmental impacts, safety concerns, financial burdens, and et cetera -- as I do not have time to read the 5,600-plus pages you all have put out. I spend my time trying to feed all the animals as well as get my homework and studying done. While my family is busy trying to save everything we own and worked hard for, I -- I want to speak about the emotional impact this is having on a lot of families. As a military child who has lived without her father for 12 to 18 months at a time, not knowing if I would ever get to see him again, believe it or not, the stress level of multiple deployments has been way less stressful than this train tearing up our forever home and our family. It has completely taken over my family's life as they try to research, read, and comprehend everything while trying to maintain their jobs, take care of us and work on the farm. The emotions are always at high level. One news broadcast, newspaper article, or information from other sources can turn into, well, another day of spending time doing more research and making notes. Even though my brother and I know they are doing it for us, we still miss the times being able to sit together and not to hear of the possibility that TCR and their employees are tearing up what we have apart. Here is something to think about: As a military child, no matter where I lived: North Carolina, where I was born; Kansas; Virginia; and Pennsylvania, I never called any of those places home. Every summer when school was out, we would spend the entire summer in Texas, visiting family and friends and looking for that special place to (inaudible) when my dad finally retired. Yes, my brother and I had a voice in where we wanted to live as a family. We picked Madisonville. We all agreed that we wanted a small place where we could have horses, rabbits, chickens, and be able to enjoy nature, the beautiful landscape and peaceful noises. At this time, we have rescued five horses. I have fourteen chickens. I bought and helped build a coop with my own money. I pay for their feed by selling my eggs to family and friends. I have chores to do and I do not get paid for them. I do them because this is the life we selected as family, and it takes all of us, including my brother, to help keep everything running while maintaining an A average in all my classes and being a part of the National Junior Honor Society and the secretary of the student council. It took us years to get us where we are today, and we still have plenty more that needs to be done. However, my point is, that this project can -- if this project continues, we are the -- we are one of the families that will have to completely relocate and rebuild. We would need years to get ourselves back to the same place we are today, providing we found the land in the same county so I would not have to change schools and leave my friends. I often lay in bed and wonder, what will happen to all my four-legged family members if we have only 30 days to move? Where will they go until we were able to find another piece of property and rebuild to the point we are today? I do not believe that any child should have to be stressed and worried about when or if they will have to start all over. At this point, I have been worrying about this for one-third of my life. My question is why, if we can spend tax dollars to do studies on all these other issues, why can we not spend the money to do a study on the emotional impact this is having on the communities, the families, and the children. Thank you.	Refer to NE-1. NEPA requires that a proposed action's effects on the environment be assessed. It does not require an evaluation of emotional effects. The project would be subject to the provisions of the Uniform Relocation Act of 1970. The Act requires that the occupants of any property to be acquired be given a minimum of 90 days notice to vacate.
Morgan Whitesides	3/8/2018	Website	I am AGAINST this project as the ridership numbers have been embellished and there are still to many questions that have not been answered. Aside from all of the Environmental, Noise, impact to Agriculture and the fact that they do plan to file for federal loans, which does not make this project privately funded. I want to talk about the EMOTIONAL IMPACT this is having on all of the counties between Houston and Dallas. There has not been one study or concern about the impact it is having emotionally or the stress levels that it has caused. I feel that before any private project should be pushed down our throats you should at least perform an EMOTIONAL IMPACT on the landowners and counties in the middle. They are the ones who this will impact the most and there is absolutely no concern for those in the middle. Please get back to me is this is a huge concern to me.	Refer to GN-2 and NE-1.
Morgan Whitesides	3/8/2018	Website	I am AGAINST this project as the ridership numbers have been embellished and there are still to many questions that have not been answered. Aside from all of the Environmental, Noise, impact to Agriculture and the fact that they do plan to file for federal loans, which does not make this project privately funded. I want to talk about the EMOTIONAL IMPACT this is having on all of the counties between Houston and Dallas. Morgan Whitesides	3/9/2018	Website	I am AGAINST this project! TCR has been less than honest with the landowners. This emotional stress this is causing is unacceptable as going on 4 years we have been asking questions and still no answers. If they truly wanted to work with the landowners they would make themselves available to discuss the issues that we all have. Instead of doing the same song and dance and threatening us with Eminent Domain that they currently do not have.	Refer to ED-1 and ED-2.
Gene Whitesides	3/5/2018	Oral	Let me tell y'all something else: The DEIS is fatally flawed. The imagery is at least four years old. You don't take my word for it, look at Google Tools, Google Map, Google Earth, and take a look at it. All right? At least Google Earth has my home on it. The DEIS satellite imagery being four years old doesn't have my home on it, so everybody thinks it's just running through pasture land, okay?	Data collection and analysis was completed using the most accurate data available at the time of analysis and in compliance with industry standards and best practices.

Barret Whitesides	3/8/2018	Website	I am against this project and the Impact it will have on the counties in between Houston and Dallas. There is very little if any research to back TCR's claim that it will bring approx. 1,000 permanent jobs. This might sound like a lot however, it is not when the train will be taking jobs away from people who live in the counties between Houston and Dallas. As well as taking business away from the locals who depend on the people traveling between Houston and Dallas. There is not one person who should loose their job or business for another to gain something. This is called and Economic Effect and should not be allowed to line others pockets while others will lose their jobs/business. Please take the time, go through the appropriate steps, do the proper research and stop rushing this project along. As the way it is getting pushed through right now there are to many impacts and issues that have not been addressed.	No adverse economic impact is expected as a result of the Project. Rather, a net positive economic impact would occur as a result of capital investment during the Project's construction and increased state and local tax revenues resulting from TCRR's assets and operations. Economic impacts associated with the project are detailed in <b>Section 3.14.5.2.3, Socioeconomics and Community Facilities, Economic Impacts.</b>
Gary Whitfield	2/6/2018	Handwritten	Record me as opposed to this project: 1. Noise pollution alone will be a blight on our communities. 2. Texas Central is not a railroad 3. Construction will disturb drainage across the entire corridor. 4. This project does not cash flow. Construction costs are underestimated. Revenue over estimated.	Refer to FP-1, GN-2, GN-4, NE-1, NV-1, SC-22 and WW-2.
Gary Whitfield	2/6/2018	Handwritten	I am one of many tax paying citizens of the United States of America, and residents of the Great State Of Texas that is opposed to the proposed high speed rail between Houston and Dallas. I find many flaws and omissions in your Draft Environmental Impact Study dated December 12, 2017, among them ignoring the impact of emissions from electricity generated to power the proposed train. In your Executive Summary you boast that the proposed train would reduce Mobile Source Air Toxics, yet you dismiss the rise in emissions from electric power generating plants. You state that Qany number of regional power plants connected to the Electric Reliability Council of Texas (ERCOT) grid can satisfy operational demand for the HSR system and station areas." , yet you dismiss the increase in emissions from those power plants. The Federal Railroad Administration should determine the amount of electricity this project might consume, and examine the impact the increase in power production will have on the entire state of Texas, not just along the proposed route. Your report us fundamentally flawed, and biased in favor of this project.	Refer to AQ-1 and EU-4.
Gary Whitfield	3/5/2018	Handwritten	PLEASE STOP THIS PROJECT WE HAVE YET TO SEE DETAILS ON ADVERSE WEATHER. WILL THIS SYSTEM BE SAFE IN HIGH CROSSWINDS? WILL THIS SYSTEM BE SAFE IN THUNDERSTORM? WILL THIS SYSTEM BE SAFE IN A ICE STORM?	Refer to SS-15.
Gary Whitfield	3/5/2018	Handwritten	OPPOSED TO THIS PROJECT. YET TO SEE ANY DETAILS ON SECURITY. 1. Will The TSA, Transportation Security Administration, Screen Passengers? 2. Will Carry on Luggage Be Screened? 3. Will Checked Bags Be Screened? 4. Will The Tracks and Electrical Lines Be Guarded Continuously? By Whom? 5. Will There Be Parking At All Terminals? What Security Will Be There? YET TO SEE DETAILS ON ADVERSE WEATHER	Refer to SS-6, SS-7, SS-9, SS-15 and TC-5. Details regarding passenger luggage allowances and standard issue for security personnel will be determined through the System Security Plan in response to needs identified in Threat and Vulnerability assessments.
Simon Whitfield	3/5/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5, WW-1 and WW-2.
Simon Whitfield	3/8/2018	Website	Please see attached letter of comments regarding the destruction of Morgan Legacy Farm via the current proposed route. Dear Sirs, Dallas – Houston High Speed Rail Project I write to respectfully express my opposition to the proposed route of the Dallas – Houston High Speed Rail line through the charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. In the summer of 2016, whilst visiting Texas from England with my family, we were fortunate to be invited to visit the Farm and to experience the extraordinary range of activities that it has to offer. I know that Dr Robert Morgan undertakes a considerable amount of charitable work at the Farm and that it is a valuable resource for local people. Whilst it is of course essential for Texas to develop its infrastructure, I would like to urge you to do so in a way that	Refer to LU-5.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

			does not impact adversely on key environmental assets such as the Farm. I understand that an alternative route for the line north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military. I therefore urge you to reconsider the proposed routing of the line such that it avoids the Farm and the significant harm that it would cause. Yours faithfully, SIMON WHITFIELD	
Gary Whitfiels	2/6/2018	Handwritten	I am one of many tax paying citizens of the United States of America, and residents of the Great State Of Texas that is opposed to the proposed high speed rail between Houston and Dallas. I find many flaws and omissions in your Draft Environmental Impact Study dated December 12, 2017, among them ignoring the impact of emissions from electricity generated to power the proposed train. In your Executive Summary you boast that the proposed train would reduce Mobile Source Air Toxics, yet you dismiss the rise in emissions from electric power generating plants. You state that Qany number of regional power plants connected to the Electric Reliability Council of Texas (ERCOT) grid can satisfy operational demand for the HSR system and station areas." , yet you dismiss the increase in emissions from those power plants. The Federal Railroad Administration should determine the amount of electricity this project might consume, and examine the impact the increase in power production will have on the entire state of Texas, not just along the proposed route. Your report us fundamentally flawed, and biased in favor of this project.	The emissions from the electricity generated to power the train is not ignored. It was estimated and documented explicitly in the Draft EIS in <b>Section 3.2.3, Air Quality, Methodology</b> , complete with power consumption from train traction, stations and maintenance. All of these power consumption components had emissions estimated for them in the analysis of operational emissions. Calculations of emissions from the electricity generated to power the train are documented in the Final EIS in <b>Section 3.2.3.2, Air Quality, Operational Emissions Methodology</b> . This includes emissions from train traction, stations, and maintenance activities.
Rhena Whitlow	NA	Website	This is not a good thing for our county.	Refer to SC-19.
Jeff Whitsett	2/7/2018	Website	I feel this project is extraordinarily valuable for the State and the Dallas/Houston metroplexes. The cities will continue to grow, there's no stopping that. Houston has grown leaps and bounds outside of the Beltway and more will inevitably follow. While it's impossible to stop human expansion in these major cities, for those that do live out, their quality of life will increase due to the removal of cars and their pollution and the train would be a legitimate low emission option for mass travel. Getting cars off the road as much as possible is the best thing from an environmental standpoint. Regardless of the train's route, those that live in the 'country' today will live in the 'city' tomorrow simply from the inevitable expansion of city limits as population density takes place. Providing train as an alternative to car is good for this area now and in the future.	Comment noted.
Larry Wichman	2/20/2018	Website	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail Project from Dallas to Houston 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration US Department of Transportation revisit their vision for the need of High Speed Rail in Texas 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to its fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance such as cemeteries, farms and buildings that may qualify as historical sites 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.
Ben Wickman	2/24/2018	Website	I recently became aware of the possible loss of a property due to the proposed route of the HSR. This property listed as Morgan Legacy Farm located near FM 709 and 3194 is irreplaceable. Other than the obvious ecological damage if this route is used the charitable, economic and cultural benefits of this property would be forever lost. It appears to me that if this 6-7 mile line is moved north of the existing power line easement less damage to the county would occur.	Refer to LU-5.
A.J. Widacki	2/18/2018	Website	The Texas High Speed Rail Project is an unnecessary project by a foreign company trying to take 8000 acres of Texans property between Houston and Dallas. As an engineer, I was initially for this project, but after reviewing the ridership and financial projections for this project, it doesn't make sense. I've also experienced the "bullying" tactics of TCR attempting to gain entry for survey on my wife's property in western Harris County. They are not welcome. TCR needs to disappear, just like the Trans-Texas Corridor.	Refer to GN-4, LU-14, NE-8 and PN-3.
A.J. Widacki	2/5/2018	Oral	MR. WIDACKI: Howdy, I'm A.J. Widacki. I'm a civil engineer. And when this project first came about, I was for it and I've -- I've seen what's happened and I've seen the landowners'	Comment noted.

			<p>experience here and I spoke at two public meetings already, one in Cypress and one in Waller. And I've also seen additional data recently since those two meetings that makes me concerned. You know, they say there's no public money involved, but there is public money when you stop this thing at Northwest Mall when it doesn't go to downtown Houston. They're basically dependent on Metro, City of Houston and the public agencies around here to get that last mile into town and everybody to their destinations. So that's going to come out of your pocketbooks.</p> <p>What Bet mentioned about the thoroughfares is TCRR's plan doesn't -- doesn't account for and plans to block major thoroughfares -- major thoroughfare plans in west Harris County and Waller County, that they would force the counties to build their thoroughfares when they punch them through to go over their facilities, which is going to cost you and I money.</p> <p>So, you know, call BS, BS, when you see it. It's going to cost you money.</p> <p>Thank you.</p>	
Barry Wiener	2/24/2018	Website	Good Evening, My name is Barry Wiener and I have Opposed this Uneconomic Land Grab HSR Project for now 3 years. No build option should be chosen.	Refer to BA-6.
Barry Wiener	2/24/2018	Website	Texas Central is Forcing onto the Public not only a Huge 5 Year HSR Construction Project, but also a Large Road Construction Project resulting in increases to County Maintenance Costs AND loss of more Private Property to Road ROW. No build option should be chosen.	Refer to TR-6 and TR-7.
Barry Wiener	2/24/2018	Website	. You will see a huge increase in Traffic Flow, Congestion, Longer Travel times, Required New travel routes, Damaged existing roads, New roads and Overpasses for the County to maintain and treat in cold icy weather conditions, and New Congestion around Construction Sites non-existent today. No build option should be chosen.	Refer to TR-6 and TR-7.
Barry Wiener	2/24/2018	Website	More Private Property will be taken by TXDOT for New ROW required for the Road Changes (In some cases now taking homes that were not originally taken for the HSR itself). In many places an ACCESS Road, 126 miles of it, to become a PUBLIC Road is added alongside the HSR on your property cutting off the "Free Movement of Cattle and Equipment" once promised by Texas Central as a justification for the Viaduct. No build option should be chosen.	Refer to LU-11 and TR-7.
Barry Wiener	2/24/2018	Website	Montgomery County who will not receive a PENNY from any HSR Tax money but will see the devastation. Just imagine the traffic types and volumes moving through our small communities like Montgomery and Plantersville, particularly with the 249 construction and the annual Renaissance Festival? No build option should be chosen.	Future State Highway 249 would be crossed by the Project approximately 2.5 miles south of State Highway 105. For information about traffic impacts around the proposed Brazos Valley Intermediate Station in Grimes County, see <b>Table 3.11-49: Brazos Valley Intermediate Station Trip Direction and Mode</b> and <b>Table 3.11-50: Brazos Valley Intermediate Station Impacts 2040 LOS (Delay in Seconds per Vehicle)</b> . It is expected that the Build and modified Build conditions would result in increased traffic delays by about 5 seconds. Transit service could be provided by the Brazos Transit District or other entities to serve the Brazos Valley Intermediate Station. At this time, the Brazos Transit District does not have consistent service to this proposed station, but the agency is currently developing a service plan SH 105 would be crossed by the Project on viaduct, as shown in <b>Table 3.11-26: Roadway Crossings in Grimes County</b> . The Project would be built over the road which would not require SH 105 to be rerouted, closed, or reconstructed.
Barry Wiener	2/24/2018	Website	The FRA must Cease any Further Premature DEIS progression and show the Public a third party view of Quantified impact on Traffic, Quality of Life, Community issues and Damage to ALL Existing Infrastructure. No build option should be chosen.	Refer to NE-1 and NE-9.
Barry Wiener	2/24/2018	Website	Some concerns not Quantification include impacts on Housing, Medical facilities, Emergency Response Times, and the Negative Impact on Small Rural School ISDs? No build option should be chosen.	Refer to SC-6, SC-7, SC-10 and SS-23. Impacts to medical facilities within the project area are identified in <b>Section 3.14, Socioeconomic and Community Facilities</b> and also discussed in <b>Section 3.16, Safety and Security</b> .
Barry Wiener	2/24/2018	Website	The FRA Must Seriously Reconsider With Hard Facts, not qualified comments, the "NO BUILD ALTERNATIVE". No build option should be chosen.	Refer to BA-6.
Barry Wiener	2/24/2018	Website	The benefits for a very few select elite business people is significantly outweighed by the Public At Large Loss of Quality of Life, Loss in Property Values, Potential Loss of Lives due to longer ER times, and the Additional Cost Burdens being placed on the Counties and Taxpayers. No build option should be chosen.	Refer to BA-6, SS-19, SS-23 and VA-1.

Submitted By	Date Submitted	Submission Type	Comment	Response
Barry Wiener	2/24/2018	Website	I am more convinced than ever the FRA is not acting in an Independent capacity with TCRR, in fact is supporting this Project and is Disregarding the Safety of the Public in doing so. No build option should be chosen.	Refer to NE-1, NE-2 and SS-1.
Barry Wiener	2/24/2018	Website	We all know and have it well documented TCRR has told the public they will go after US RR Taxpayer supported Federal Loans. No build option should be chosen.	Refer to GN-4.
Barry Wiener	2/24/2018	Website	The FRA has artificially orchestrated a "Purpose and Need" definition that is not balanced, but bias by only supporting TCRR's Functional Criteria, not the public's interest or safety and is clearly designed to eliminate the "NO BUILD" Alternative. No build option should be chosen	Refer to BA-6, NE-1 and PN-3.
Barry Wiener	2/24/2018	Website	The FRA also said that the No Build will not meet the Traffic and Congestion relief needs. TCRR has stated in Public the HSR is will NOT fix any City traffic problems and folks; there are no traffic issues without an accident between Houston and Dallas. No build option should be chosen.	Refer to BA-6 and PN-3.
Barry Wiener	2/24/2018	Website	Dallas and Houston, with speeds exceeding 200 mph in a fully sealed corridor; Environmental: minimal impacts to natural and built environments by maximizing adjacency to existing infrastructure right-of-way (ROW). But one criteria eliminated from the Stage 1 Screening was the "Economic Viability". WOW, I wonder why? No build option should be chosen.	Refer to BA-6, BA-8, NE-1 and PN-3.
Barry Wiener	2/24/2018	Website	Per the DEIS, The FRA's mission, supports the development of safe and reliable intercity passenger rail. So tell me again where is the Independence? No build option should chosen.	Refer to GN-1 and NE-1.
Barry Wiener	2/24/2018	Website	The FRA is just going through the motions and the answer is baked in. No build option should be chosen.	Refer to NE-1.
Barry Wiener	2/24/2018	Website	What Federal Agency with any Ethical Backbone, in the interest of Public Safety and a Strong Learning Environment for our kids & grandkids would Approve placing a HSR two blocks from Leon High School AND a couple hundred acre Construction Site at the same location along the only travel corridor for the school, Hwy. 79? Young High School kids will be driving on that corridor during 5 years of Construction. No build option should be chosen.	Refer to SC-2.
Barry Wiener	2/24/2018	Website	Is the FRA looking out for their SAFETY? No build option should be chosen.	Refer to SS-1.
Barry Wiener	2/24/2018	Website	The DEIS uses Sloppy and unquantifiable Rationalization without the Data to back it up every time the FRA attempts to compare and convince us why the No Build is not the best answer vs. a Build Alternative. There is absolutely NO CREDIBILITY. No build option should be chosen.	Refer to GN-1 and NE-9.
Barry Wiener	2/24/2018	Website	There is no reason the No Build Alternative regarding ER did not win out over the Build Alternatives. No build option should be chosen.	Refer to BA-6 and SS-23.
Barry Wiener	2/24/2018	Website	The Waller County Regional Planning Commission, A Legal Local Government Entity, had to sue TXDOT as they would not work with them because the FRA told them not to, stating they were an Advocacy group. TXDOT lost the case, then Appealed, and TXDOT lost again. No build option should be chosen.	Comment noted.
Barry Wiener	2/24/2018	Website	TELL THE FRA TO PUT THE "NO BUILD" ALTERNATIVE BACK ON THE TABLE Rather than concluding it DOES NOT MEET THE PURPOSE AND NEED THAT WAS TCRR'S NEEDS. What about the Public's Safety and Purpose and Need? No build option should be chosen.	Refer to BA-6, PN-3 and SS-1.
Barry Wiener	2/24/2018	Website	Did you know the people used to prepare the DEIS are consultants paid for by TCRR? The FRA is responsible for managing the process. No build option should be chosen.	Refer to NE-5.
Barry Wiener	2/24/2018	Website	The FRA DEIS Incorrectly bases ALL of its NOISE Analysis Work using Only noise levels (87 dBA) for one train passing by. That is NOT the Maximum. The DEIS FAILS to use the Larger Noise Level of Two Trains passing each other in opposite directions WHICH IS REALITY. No build option should be chosen.	Refer to NV-1.
Barry Wiener	2/24/2018	Website	What part of this simple design criteria does FRA Not Understand. When one designs a wide two lane structural Bridge, do you assume the load of only one 18 wheeler passing? Of course not because two 18 wheelers can pass going in opposite directions on that bridge at the same time. The same is true about the Noise from these two sets of trains running in opposite directions passing each other. No build option should be chosen.	Refer to NV-1.
Barry Wiener	2/24/2018	Website	The FRA DEIS FAILS to disclose the Scientifically proven Fact of a "Slapping Sound" or popping noise as a result of the two air flows that are pushed by each train colliding and then bouncing between the sides of the trains. This was found after studying HSR's going through tunnels creating the loud popping sound. No build option should be chosen.	Refer to NV-10.
Barry Wiener	2/24/2018	Website	The DEIS does not specify criteria for Noise Mitigation or Abatement for TCRR except provide some general guidelines and state it will be looked at after more detailed design is completed. No build option should be chosen.	Refer to NV-1.
Barry Wiener	2/24/2018	Website	The FRA knows TODAY where the HSR passes closely by homes, businesses, schools, through, in front of, and alongside of Subdivisions. So Why has the FRA DEIS NOT set out specific Abatement use requirements vs. leaving it up to TCRR After Design is done? This MUST beat a minimum In the Detailed Design. Preliminary Design with a Known Route, Known Residents & Schools, and Known Maximum Noise Level is all that is needed to determine the need for noise abatement and where. No build option should be chosen.	Refer to NV-1.

Barry Wiener	2/24/2018	Website	Proven by a Cornell University Study, In Children, persistent noise (such as that from a HSR train) causes impaired reading comprehension, and long term memory problems. No build option should be chosen.	Refer to NV-1. The noise and vibration assessment was carried out in accordance with FRA guidance. The assessment methodology, criteria for impact, and locations of impacts are contained in <b>Section 3.4.3, Noise and Vibration, Methodology</b> and <b>Section 3.4.5, Noise and Vibration, Environmental Consequences</b> , respectively. Schools are included in FRA Category 3 for institutional receptors and, for the same existing noise level, the distance to impact for schools is much less than for residential land use. Because there are no schools located in very close proximity to the tracks, no noise impacts to schools have been identified.
Barry Wiener	2/24/2018	Website	Noises from Elevated trains lead to reading difficulties and negative academic performance. No build option should be chosen.	Refer to NV-1. The noise assessment methodology accounts for elevated structures and viaducts in calculating noise levels. This includes the height of the source and a reduction in the ground effect and shielding.
Barry Wiener	2/24/2018	Website	Over One Hundred Acre size Construction Sites, located on just about every major East-West travel Corridor from I45, will be a magnet for Workers, Raw Materials, Batch Plants & Concrete Trucks, Equipment, Large Heavy Trucking, Permit Loads, Vendors, & Staging areas. No build option should be chosen.	Refer to LU-10 and LU-13.
Barry Wiener	2/24/2018	Website	Over One Hundred Acre size Construction Sites, located on just about every major East-West travel Corridor from I45, will be a magnet for Workers, Raw Materials, Batch Plants & Concrete Trucks, Equipment, Large Heavy Trucking, Permit Loads, Vendors, & Staging areas. No build option should be chosen.	Refer to LU-10 and LU-13.
Barry Wiener	2/27/2018	Website	The public meetings did not allow for adequate public involvement. The Madisonville meeting was moved because AECOM never adequately booked the first place and the final forum didn't have enough room and people were not allowed to enter and were turned away. The same thing happened at Harris County forum where people were not allowed to enter and had to stand outside or were turned away. Many left because there was no parking. This violated the NEPA process. Texas Central reps were allowed to stay in these meetings while the public could not enter. We need more time to view the DEIS as many violations have already occurred in regards to public comment and participation. There was overwhelming opposition to the project. No build option should be chosen.	Refer to BA-6, PI-1 and PI-3.
Barry Wiener	2/27/2018	Website	Regarding the Grimes County meeting this is something that a public participant noticed. The Gym which was very large was used for TCR's and FRA's Posters, but the Public Comment Speaker Period used the relatively smaller Cafeteria. This was the end of the several steps by the FRA to squash the Opposition Voices. I know that some people left not knowing about the smaller separate room for the comments portion and know another person was turned away because the room was packed. How does this not violate NEPA when yet again this is just another public meeting that AECOM and FRA hosted that did not adequately allow for public participation. This occurred in Madison County, Harris County, and Grimes County. The public needs more time and I request the comment period be extended to allow for full public participation and comments since this was violated in at least three meetings.	Refer to PI-1, PI-3, PI-6, PI-8 and PI-11.
Barry Wiener	2/27/2018	Website	It would be fantastic to have a new rail system to surpass the system we have here in the N.E (the Electric Amtrak along the I-95). A Houston to Dallas Bullet train would be such an inspiration for the rest of the country to aspire to. and 205MPH! I support this project wholeheartedly.	Refer to PI-1.
Barry Wiener	2/27/2018	Website	I request an Immediate Halt of the D-H HSR FRA DEIS Process due to Loss of Credibility of what was supposed to be an Independent FRA Process but now looks like a Political Process with Houston's Mayor Turner interference with the FRA process by placing his finger on the scales by choosing the site of the Houston Mall based on Politics, and prior to the FRA actually making the decision for the Houston Station. This has been announced over and over again on the news By Mayor Turner and TCR and has tainted the process. The FRA is being influenced in this process by the Politics of it as proven by Mayor Turner's actions ahead of that by the FRA. The DEIS process should be stopped immediately as it is clear it is not being driven by an objective process. No build option should be chosen.	Refer to GN-9, NE-1 and PI-4.
Barry Wiener	2/27/2018	Website	Please refer to <a href="http://www.txdot.gov/apps/statewide_mapping/StatewidePlanningMap.html">http://www.txdot.gov/apps/statewide_mapping/StatewidePlanningMap.html</a> and check out Station Flag 82H83 Site ID H83 AADT 2016 29,759 Route ID IH0045-KG 2015 AADT 28,380 2035 Estimated AADT 54,490 24 Hour Truck Percentage 32.4 This is actually under a 90% pjected increase from 2016 figures to 2035. It is not >200% astated by TCR and allowed to be misrepresented in the DEIS. I have included the link to show the true data proving that mid point stations do not show the increase that TCR, FRA, and AECOM is purporting. Look at the Streetman station and the station just north of Fairfield on I45. Please correct all the errors related to this. The purpose and need is not justified and the no build option is the only option that should be considered due to the overwhelming amount of falsified data points arising from the DEIS. No build option should be chosen.	Refer to AQ-3.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
Barry Wiener	2/27/2018	Website	Please look at <a href="http://www.txdot.gov/apps/statewide_mapping/StatewidePlanningMap.html">http://www.txdot.gov/apps/statewide_mapping/StatewidePlanningMap.html</a> if you actually look at the data it isn't >100 or 200% of midpoint data points. Streetman is actually only 83% if you look at 2016 AADT figures and jump to 2035. So it isn't greater than 100 or 200%. These midpoints are under 100%. If someone brings it up I am going to tell them it is actually 83% midpoint locations. It goes from 29,802 to 54,620. This is less than 100% or greater. An 83% increase in traffic would be 54,537. So I actually rounded up for you guys. Please correct your data as your DEIS and TCR are using inflated figures. No build option should be chosen.	Refer to BA-2, GN-3, GN-4, NE-1 and PN-3.
Barry Wiener	2/27/2018	Website	This information comes from the DEIS, page 1-10: Per the DEIS: "According to the Texas Transportation Institute's 2010 report, even taking into account forecasted improvements, vehicular traffic on IH-45 between Dallas and Houston will increase more than 200 percent by 2035, resulting in average speeds decreasing from 59 to 39 mph." This is a simple math issue. Again looking at the TxDot Statewide Planning map various data points only show an 83% increase from 2016 to 2035. If the people creating the DEIS can't do math, then every number in the DEIS is called into question. This is not a minor error. If it were insignificant, it would not be in Texas Central's video. Members of the public and public officials both could very well be influenced by a greater than 200% increase in traffic. The DEIS and the DEIS comment period are fatally flawed. FRA should immediately issue a decision of NO BUILD. No build option should be chosen.	Refer to AQ-3.
Barry Wiener	2/27/2018	Website	Please review the attachment. The need of this project is not validated by a plethora of maps on the federal dot site and Tx Dot sites. The congestion now and in the future is between San Antonio and Houston and Dallas and San Antonio. Please explain why this Dallas to Houston route is being pushed when not supported by any of these maps or the state of Texas ridership study which shows the Dallas to Houston being the 4th or 5th route of choice with greatest ridership. The no build is the only option for this specific route as future data and congestion maps do not support the statements made in the DEIS. No build option should be chosen.	Refer to GN-3, PN-3 and SS-9.
Barry Wiener	2/27/2018	Website	Texas Central is saying the \$199 average fare is a "rumor" (implying it will be lower but not saying what the average train fare will be) used to calculate the sales tax revenue while simultaneously promoting the sales tax revenue of \$10 million for Dallas. This is unethical. How can they say that they will give Dallas \$10 million in sales tax revenue for ticket sales if this \$199 is a rumor. Because TCR is stating this, all of these figures using \$199 estimating tax payouts should be removed and the public needs to see the new figures. How can AECOM and the FRA work with such a company which can't give straight up info. Please clarify if the \$199 is a rumor as expressed by TCR on their website. Until we can actually obtain verifiable data, the DEIS process should be halted. In the very least an extension of the comment period is warranted. No build option should be chosen.	Refer to SC-3.
Barry Wiener	2/27/2018	Website	Looking at table 3.14-22 the experts that put this table together put more wrong data in it. They have excluded the federal excise tax on airline tickets. I can not understand how so many people that have worked thousands of hours on this project could have missed this simple piece of data. Again, there is ample amounts of wrong data that dismiss the positives of this project. Please also tell me how it is mentioned numerous times that this project would elicit 15-39 billion from sales tax on ticket sales. Please tell me how you arrived at this blatant misrepresentation of data? Is this over a period of 150 years? There is no way looking at your own tax tables that you have provided could one come to this conclusion. Again, there is a great deal of deceptive and manipulated data in order to push the project. No build option should be chosen.	Refer to PN-3, SC-3, SC-16 and SC-19.
Barry Wiener	2/27/2018	Website	Teleworking needs to be factored into the DEIS report when accurately judging traffic and speeds. The National Institute of Health even did a report and implemented the process. <a href="http://www.federaletc.org/pdf/NIH.pdf">http://www.federaletc.org/pdf/NIH.pdf</a> To ignore this in your report is negligent or is purposely trying to skew the data. Overview While there is no Census Bureau or government produced data provides additional granularity on the frequency of telework, Global Workplace Analytics' research finds that: 50% of the US workforce holds a job that is compatible with at least partial telework and approximately 20-25% of the workforce teleworks at some frequency 80% of the US workforce says they would like to telework at least part time. Two to three days a week seems to be the sweet spot that allows for a balance of concentrative work (at home) and collaborative work (at the office). Fortune 1000 companies around the globe are entirely revamping their space around the fact that employees are already mobile. Studies repeatedly show they are not at their desk 50-60% of the time. A typical telecommuter is college-educated, 45 years old or older, and earns an annual salary of \$58,000 while working for a company with more than 100 employees. 75% of employees who work from home earn over \$65,000 per year, putting them in the upper 80th percentile of all employees, home or office-based. Summary of trends: Regular work-at-home, among the non-self-employed population, has grown by 115% since 2005, nearly 10x faster than the rest of the workforce. 3.7 million employees (2.8% of the workforce) now work from home at least half the time. The employee population as a whole grew by 1.9% from 2013 to 2014, while employees who telecommuter population grew 5.6%. Forty percent more U.S. employers offered flexible workplace options than they did five years ago. Still, only 7% make it available to most of their employees. Larger companies are most likely to offer telecommuting options to most of their employees. New England and Mid-Atlantic region employers are the most likely to offer telecommuting options. Full-time employees are four times more likely to have work-at-home options than part-time workers. Non-union workers are twice as likely to have access to telecommuting, but union employee access is growing rapidly. <a href="http://globalworkplaceanalytics.com/telecommuting-statistics">http://globalworkplaceanalytics.com/telecommuting-statistics</a> Please consider impacts of this on future congestion and railway purpose. Due	Refer to BA-6, GN-2, GN-3 and PN-3.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			to the growth rate of this mode of work and the drop in transit usage, I vote for the No Build option as the only wise choice. This bullet train project has too many negative impacts and they will never be overcome. No build option should be chosen.	
Barry Wiener	2/27/2018	Website	Teleworking/Telecommuting (this has not been considered in the future projections of congestion yet has the fastest growth rate of all travel patterns and has already superseded public transportation) Why has this not been looked into and considered in this DEIS report. If this growing work mode has been ignored how much other relevant data has also been ignored? Highlights from The 2017 State of Telecommuting in the U.S. Employee Workforce report include: 3.9 million U.S. employees, or 2.9 percent of the total U.S. workforce, work from home at least half of the time, up from 1.8 million in 2005 (a 115 percent increase since 2005). The average telecommuter is 46 years of age or older, has at least a bachelor's degree, and earns a higher median salary than an in-office worker. Roughly the same population of women and men telecommute. Telecommuting is more common among employees over 35 years of age and most common among Baby Boomers. In more than half of the top U.S. metro areas telecommuting exceeds public transportation as the commute option of choice. It has grown far faster than any other commute mode. The 2017 State of Telecommuting in the U.S. Employee Workforce Report includes information on the following: Trends in the telecommuting workforce over the last ten years Demographics of the average telecommuter (age, gender, education, salary) Telecommuting by industries, occupations and sectors Telecommuting by metro areas (prevalence and growth) Actual and potential economic impact of telecommuting Environmental impact of telecommuting <a href="https://www.flexjobs.com/2017-State-of-Telecommuting-US/">https://www.flexjobs.com/2017-State-of-Telecommuting-US/</a> How can the DEIS be a credible document if data in conflict with the purpose in need is prevented from entering the report? Due to relevant data being omitted from the DEIS along with numerous other bad data points I opt for the No build option No build option should be chosen.	Refer to BA-6, GN-2, GN-3 and PN-3.
Barry Wiener	2/27/2018	Website	Telecommuting must be analyzed in order to achieve an accurate report. "More than just affecting the way people work, the increasing ease of telecommuting will dramatically affect the way we adapt our urban transportation systems. Indeed, an increase in working from home might suggest that we have less to fear about the future of traffic congestion than we might have believed." <a href="https://www.citylab.com/transportation/2014/02/why-telecommuting-really-matters-6-charts/8227/">https://www.citylab.com/transportation/2014/02/why-telecommuting-really-matters-6-charts/8227/</a> "Expanding mass-transit systems is a pillar of green and "new urbanist" thinking, but with few exceptions, the idea of ever-larger numbers of people commuting into an urban core ignores a major shift in the labor economy: More people are working from home. True, in a handful of large metropolitan regions what we might call "legacy cities" trains and buses remain essential. This is particularly true of New York, which accounts for a remarkable 43% of the nation's mass-transit commuters, and of other venerable cities, such as San Francisco, Washington, Boston, Philadelphia and Chicago. Together, these metros account for 56% of all mass-transit commuting. But for most of the rest of the country, transit use despite often-massive infrastructure investment has either stagnated or declined. Among the 21 metropolitan areas that have opened substantially new urban-rail systems since 1970, mass transit's share of work trips has declined, on average, from 5.3% to 1.5%. During the same period, the drive-alone share of work trips, notes demographer Wendell Cox, has gone up from 71.9% to 76.1%." - <a href="http://www.latimes.com/opinion/op-ed/la-oe-kotkin-telecommute-20170623-story.html">http://www.latimes.com/opinion/op-ed/la-oe-kotkin-telecommute-20170623-story.html</a> "Traffic congestion in Austin and other major Texas cities is notorious and continues to worsen. According to a recent study by a transportation analytics firm INRIX, Dallas, Houston and Austin are the 7th, 11th and 13th most congested urban areas in the United States. Many believe that adding light-rail lines and more bus lanes will encourage more commuters to take public transport and leave their cars at home. However, despite its population growth and large investments by Capital Metro to improve services, Austin's bus actual daily ridership has fallen 20 percent since 2012 (130,000 boardings a day in 2012 vs. 102,000 a day in 2016)" <a href="https://www.tribtalk.org/2017/09/21/is-the-uberization-of-public-transportation-the-future-for-texas-cities/">https://www.tribtalk.org/2017/09/21/is-the-uberization-of-public-transportation-the-future-for-texas-cities/</a> The DEIS needs to analyze this work mode as this will affect future congestion and ridership patterns. I opt for the no build.	Refer to BA-6, GN-2, GN-3 and PN-3.
Barry Wiener	2/27/2018	Website	It is clear that the engineers have realigned county roads that they will be unable to do as all county roads in between will not allow the realignments. Remember Texas Central was ruled to not have eminent domain nor be a railroad in a court case in Harris County so performing all these drawings is frankly putting the horse before the cart. Most of the counties have signed resolutions against the high speed rail so these road drawings are incorrect leaving construction costs and route not specific as well. Also the engineers did not take into account new construction at Highway 6. They have the Train route at the same place and height of Highway 6. This Tx Dot project has been in the works much longer than these preliminary drawings for Texas Central's project. I have a lack of confidence in the engineers on this project. It is questionable that the train can even go under beltway 8. No build option should be chosen.	Refer to ED-1, ED-3, NE-1 and TR-8. The Project would be on viaduct at the State Highway 6 crossing (road under rail). Preliminary design details show that there will be approximately 43 feet of separation from the rail to the existing road surface at this crossing. This will be a long span; therefore, the structure of the viaduct will need to be about 22 feet deep. This would mean there is about 21 feet of roadway clearance under the viaduct structure. The Project would be below-grade (retention-cut) at the State Highway 8 crossing. Approximately 985 feet of the Project would be constructed under the crossing.
Barry Wiener	2/27/2018	Website	Every map that we pull up from Federal DOT and Tx Dot do not show the need for this Dallas to Houston Route. Please put the following data on the record. The congestion is in the cities. The route on I-45 in between does NOT change in peak congestion from 2012 to 2032. Again this goes against the purpose and need of the project. Please explain why all the negative impacts to the environment, communities, landowners,	Refer to BA-2, GN-3, GN-4, NE-1 and PN-3.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			taxpayers is justified when the peak congestion has not budged on I-45 by 2032. Is the federal DOT documentation not accurate? Again looking at data the No build should be the only option.	
Barry Wiener	2/27/2018	Website	The Texas Oklahoma Passenger Rail Project put in their purpose and need that it needs to be economically viable and even goes on to say that HSR must be able to operate with 100% costs covered. All Aboard Florida also has an economic component and has provided a ridership and revenue study in their DEIS. This Houston to Dallas HSR had an economic component and was part of the steps presented to the public. FRA removed this component while also removing routes that were not economically feasible. How can you remove routes based on an economic feasibility and then remove the economic component of the purpose and need? The FRA needs to start over on this process as the public has been misled and the route tainted with variables that were later removed. The FRA had originally removed certain routes based on economics and then removed this component while also leaving routes that had a greater impact on lower income populations and minorities. How is this ethical? Especially when then removing the component of economic viability altogether. Again, please explain why the economic viability was removed from the project when it was first told to the public it would be a component. The public deserves to have a economic viable project as the FRA and TCR initially presented to them. I urge the FRA to halt this process immediately and start over with accurate variables that will be measured and presented to the public. Without any economic feasibility, the NO BUILD Option is the only alternative. No build should be the only option.	Refer to BA-3, BA-6, NE-1 and PN-4.
Barry Wiener	2/27/2018	Website	Why were FERC and PHMSA excluded from the FRA process for the TCR HSR project? This is very dangerous and doesn't take pipeline and public safety into consideration. For one there are numerous pipelines that will be impacted by the train both intrastate and interstate. FERC is required to be part of this process but TCR, AECOM, and the FRA has excluded them. Has cathodic protections of the pipelines been studied by TCR, Aecom, or the FRA since FERC and PHMSA were left out of the safety planning of this project? Has the new electrical impacts to pipelines been considered since FERC and PHMSA have been excluded from the planning process? The DEIS states that some pipelines will have to be relocated. Have TCR, AECOM, or the FRA reviewed any easements of current pipelines when evaluating the route? Some easements clearly don't have the ability for relocation in the contract signed. Seeing that only 15% of the route is under option contract and the vast majority of landowners are against this project, I don't see them redoing their easement to allow the relocation. There will also be clauses that will be added that will put the ownership squarely of any problems on the pipeline and I am sure that the pipelines will not take on this liability caused by TCR. This should have already been reviewed before eliminating routes and carrying others forward. It was very irresponsible for the FRA, TCR and AECOM not to include FERC and PHMSA when planning this project around pipelines. I am sending the link for FERC as the FERC offices are wondering why they were omitted in this process. <a href="https://www.ferc.gov/">https://www.ferc.gov/</a> Here is a video link so you can clearly see that FERC which is not mentioned at all in the DEIS should have been involved during this planning and environmental review aspect. <a href="https://www.ferc.gov/multimedia/what-is-ferc.asp">https://www.ferc.gov/multimedia/what-is-ferc.asp</a> I am also attaching an infographic detailing about FERC and how they should be involved in the planning process and since this process has been going on for 2 1/2 years and they have not been consulted I have grave concern that TCR, AECOM, and the FRA have been negligent regarding the public's safety as numerous pipelines will be impacted. I opt for the NO BUILD OPTION as the only alternative route to ensure the public's safety. No build should be the only option.	Refer to EU-1, EU-2 and SS-18.
Barry Wiener	2/27/2018	Website	Regarding EJ (environmental justice) whole corridors were removed for economic viability so they had economic viability and this trumps all other NEPA variables including EJ. And now the economic viability has been removed as a criteria yet EJ was not accurately reviewed. Please see attachments of how the selected corridor affects blacks and hispanics who will be disproportionately negatively impacted by this project. So the economic viability was removed and consideration was not taken for the increase in minorities being impacted. Please see the attachments to show how these groups will be disproportionately targeted in the preferred route vs their percentage of population in Texas. This needs to be immediately assessed. No build should be the only option.	Refer to EJ-1. The NEPA process includes the assessment of many varying topics including Environmental Justice (EJ). The Preferred Alternative was selected based on an analysis of the totality of impacts across all topics studied in the Final EIS. The EJ assessment was conducted with consultation of best practices established by TxDOT, FRA and FTA.
Barry Wiener	2/27/2018	Website	Texas is usually around a 4% unemployment rate. If you look at the attached pdf these counties along the route will be disproportionately affected as unemployment is much higher than the state overall. These affected areas show a consistently higher amount of unemployment which correlates to higher levels of poverty. The temporary construction jobs will not help this persistent problem. We need permanent growth and businesses in these counties. The train will not do this so the poor population will be disproportionately negatively impacted by this project. <a href="https://www.urban.org/research/publication/unemployment-and-poverty">https://www.urban.org/research/publication/unemployment-and-poverty</a> <a href="https://www.urban.org/urban-wire/long-term-unemployment-and-poverty-produce-vicious-cycle">https://www.urban.org/urban-wire/long-term-unemployment-and-poverty-produce-vicious-cycle</a> Here is the Bureau of labor statistics link <a href="https://www.bls.gov/eag/eag.tx.htm">https://www.bls.gov/eag/eag.tx.htm</a> Texas had an unemployment rate of 3.9% in Dec. 2017. This route focuses on individuals with a higher rate of unemployment and poverty. <a href="http://www.ncsl.org/research/labor-and-employment/state-unemployment-update.aspx">http://www.ncsl.org/research/labor-and-employment/state-unemployment-update.aspx</a> I am including unemployment maps, poverty maps, and graphs displaying percentages. The poor population will be greatly affected by this project and this has not been fully analyzed in the DEIS. The economic feasibility was placed higher than minorities and the poor population in this project. This is clearly unethical and does not really incorporate the NEPA process. The only ethical alternative is the NO BUILD OPTION.	Refer to EJ-1.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
Barry Wiener	2/27/2018	Website	<p>Here is the breakdown of sections according to how many new public roads are proposed. I counted the ones outlined in blue only: Houston Segment (section 45) Harris, Waller, Grimes Cty 43.3 miles West of Teague Segment (section 46) Madison, Leon, Limestone, Freestone 64.2 miles IH-45 segment - alternative route (section 47) Madison, Leon, Freestone, and portion of Navarro 4.09 miles Navarro West (section 48) 3.75 miles Navarro East - alternative route (section 49) 2.61 miles Ellis West segment (section 50) 13.07 miles Ellis East - alternative route (section 51) 6.7 miles Dallas Segment- (section 52) 2.5 miles Total proposed mileage for new public roads is 126.82 miles or just over half the entire route in new roads for the taxpayers. Here is info about taxpayers paying for the maintenance of these new roads in the DEIS. Public Roads - Roads that would be accessible to the general public. Ownership and responsibility for maintenance of these roads would be by the appropriate local, municipal, county, state, or federal authority. Design details, ownership, and maintenance responsibilities for these roads would be closely coordinated with the appropriate Project stakeholders during more advanced design. o Proposed Public Roads - New public roadways. In many cases proposed roads were designed to facilitate ROW access for TCRR and emergency access needs, but would also improve connectivity or provide access to properties along the ROW. As such, they were not designated as HSR MOW Access roads. o Realigned Public Roads - Realignment or reconfiguration of existing public roadways. In some cases, public roads are rerouted along the HSR alignment to achieve grade separation and would also serve to provide access to the HSR ROW. Is the FRA, AECOM, and TCR aware that in the last legislative session SB 977 was passed preventing any taxpayer money to go towards anything related to the construction, operation and maintenance of a high speed rail project. The DEIS clearly states that roads will have to be added that the taxpayers will be paying to maintain. If there was not a HSR dissecting Texas then no new public roads would be built. Maintenance of these public roads by taxpayers is clearly against the signed into law SB 977 regulations. All of the new overpasses that will have to be maintained by taxpayers clearly go against this law as well. All of this information has been sent to Governor Abbott and will be sent to the attorney general. Why was the mileage of proposed public roads omitted from the DEIS? Is the FRA, AECOM, and TCR trying to hide this information from the public and lawmakers? Why was this information not calculated into costs for taxpayers thus negating some of the proposed "tax benefits"? The FRA needs to immediately put these miles into the DEIS and needs to address this while looking at SB 977 and adjusting the tax benefit suggested by this report. This project will negatively impact every taxpayer in Texas and is clearly going against new laws that were just implemented, therefore the NO BUILD OPTION is the only alternative.</p>	<p>Refer to TR-6, TR-7 and TR-8. SB 977 prohibits the use of state funds to plan, build, or operate the high rail operated by a private entity. TxDOT owned roads (including overpasses and underpasses), however, would continue to be maintained by the state. For the mileage of proposed public roads, please see <b>Section 3.11, Transportation</b>, specifically <b>Table 3.11-62: Summary of Transportation Impacts by Build Alternative</b>. Reroutes to existing roads would result in the addition of approximately 16.6 miles to 46.9 miles of public roads. For information about roadway modifications per county, Segment, and Build Alternative, refer to <b>Section 3.11.5, Transportation, Environmental Consequences</b>.</p>
Barry Wiener	2/27/2018	Website	<p>I am writing today to request your immediate attention in order to prevent a potential environmental crisis to our community. As you are aware, a private for profit company was formed with joint collaboration with Japan to place a high speed rail train creating a divide across Texas spanning 239 miles. My family and I would be devastated by this project. The impacted land was granted as a League of Land from the State of Texas through Stephen F. Austin on March 10, 1831. Three generations of the House family have lived on this property working this land and keeping it in the family to this date. Calvin House and Pamela House currently live on the impacted property and their son and daughter plan on moving to this plot of land as well and building a house bringing with them their children. This would be five generations on this parcel. Over the years, this land has been utilized for cattle, rice and soybean farming, Jigg Bermuda grass for hay, oak and pine tree farming for wholesale, hunting and a thriving wedding venue business. Next to the wedding venue House Estate, Calvin House has set up a museum which includes pictures of the original home and House ancestors and memorabilia that has been utilized over the years in shaping this property into what it is today. The Texas map inside the museum displays a large red area where the House family ran their cattle. However, what began as a working ranch, raising Brahamas and mixed cattle, eventually changed in 1957 to a rice and soy bean farm tended to by the House family; and then changed again in 1976 to farming live oak and pine trees. Calvin House and his wife Pam still actively maintain the ranch, a tree farm and House Estate which is an 1890's historic home built by Calvin's grandfather. House Estate was renovated in 1998 and rests comfortably on 18 acres designated for special events, such as weddings, that they now host. The train will travel approximately 400 feet from the edge of the pond where outdoor weddings are performed. Texas Central Railway/Texas Central Partners (TCR/TCP) and the FRA have pictures of the back of this property labeled KVP#27 in DEIS section II stating that the train will be a neutral impact. They failed to mention the fountain, pond, 1890's historic mansion, paved lot, numerous gardens, landscaped acreage and large sign that states that this is a wedding venue. It would have been impossible to not notice this when taking these pictures. They mention that the train will only be seen by some residents and agricultural workers yet this is clearly marked a wedding venue with numerous wedding guests on a regular basis and this business will be devastated by this project and will have to close its doors. If they missed these clearly evident characteristics of this one property, how much have they missed along the 239 mile route? Please see the following link to view the wedding venue: <a href="http://thehouseestate.com/">http://thehouseestate.com/</a> . This property was inaccurately depicted in the DEIS and not assessed properly. I would like the negative impacts to actually be put into the document with the loss of income of this business to the community including all those that are employed by this venue which would lose their job. There will definitely be a negative ripple effect caused by the closure of this venue and this KNOWN AND VERIFIABLE data should be subtracted from any presumed economic benefit of this HSR project. I urge that this process be halted until an accurate and detailed analysis of the impacted landowners be assessed. The FRA, TCR, and AECOM are using maps that are dated and since</p>	<p>Refer to SC-21 and VA-4.</p>

Submitted By	Date Submitted	Submission Type	Comment	Response
			the ones in the DEIS are many years old they are not taking into account many homes and businesses along the route and their negative impacts. How could a proper analysis be done using maps that are a few years old? I recommend the NO BUILD OPTION as the FRA, AECOM, and TCR did NOT accurately assess negative impacts along the preferred route. NO BUILD OPTION is the only alternative.	
Barry Wiener	2/27/2018	Website	We currently have 6 ponds on our property and 1 will be directly impacted by the train. TCR has designed a berm over this pond which has many varieties of fish and wildlife and this 8 acre 32 foot deep pond will be filled in killing everything in the pond. Since TCR did not survey the property they didn't take into account the depth of the pond and more dirt will have to be acquired from additional land. Without doing boots on the grounds surveys for the majority of the route many environmental impacts were not assessed by TCR. Since AECOM and TCR did not know that this is 32 foot deep and 8 acre pond they did not accurately outline where they would obtain this dirt to fill in the pond. From an environmental standpoint how is the FRA and TCR justifying this project as there will be huge environmental negative impacts? Due to these negative impacts and lack of detailed analysis by the FRA, TCR, and AECOM I recommend the No Build option be moved forward.NO BUILD OPTION is the only alternative.	Refer to FP-1, NE-8, WW-1 and WW-2.
Barry Wiener	2/27/2018	Website	Our property has a large variety of wildlife that will be negatively impacted. We have seen bald eagles numerous times flying over our property. Each year we have migratory birds that utilize this land and ponds during their migration journey. We have red pileated woodpeckers as well on the property. There is a great concern due to the vast majority of migratory bird species and threatened birds on our property that a number of these birds will be killed due to the high speed rail transversing our parcel. Please refer to this independent research study regarding the mortality of birds <a href="https://www.frontiersin.org/articles/10.3389/fevo.2017.00117/full">https://www.frontiersin.org/articles/10.3389/fevo.2017.00117/full</a> From the study "Finally, we counted a total of 42 bird collisions, 28 of them recorded from the cabin. Collisions were recorded in 47.0% othe journeys. As a whole, the data are equivalent to a mortality of 0.0029 birds per km traveled by a high-speed train (i.e., one collision every 349.8 km). " We have too many threatened species on our property including those protected as migratory species. This huge negative impact must be analyzed in order to make an informed decision and conclusion of negative impacts on birds and protected species. The HSR will not allow birds to move out of its path and result in many deaths. This has not been studied as we only have existing slower rail. I urge the FRA to look at this study and review this impact to threatened species such as the bald eagle who has numerous nesting spots all along the proposed route. This will also affect migratory birds which are also along this route. Due to the detrimental affects of this high speed rail on these species which have not even been evaluated, I opt for the No Build Option. Please protect our protected and threatened species. NO BUILD OPTION is the only alternative.Thank you.	Refer to NR-2, NR-3 and GN-3. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . For information regarding vegetation please see <b>Section 3.6.4.2, Natural Ecological Systems and Protected Species, Vegetation</b> and mitigation measures <b>NR-MM#2</b> and <b>NR-MM#4</b> in <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .
Barry Wiener	2/27/2018	Website	Our property has not been surveyed by TCR as they came out numerous times to our house stating that they had eminent domain privileges but when asked to provide the paperwork showing this designation they never did and instead sued my family. In our court case, TCR lost the summary judgment with the judge declaring they did not have eminent domain privileges, were not a railroad, and could not survey the property. Since no survey was performed by TCR who does not have eminent domain privileges to this date, many critical elements of our property were not taken into account when TCR determined their route. For instance, we have pictures of the property that had a great deal of water during Hurricane Harvey and no such values have been considered when collecting data for the DEIS. Where is the Harvey flooding information? This project especially with the number of berms will exacerbate this flooding problem and needs to be fully assessed, addressed, and mitigated if necessary. We have a large section of berm on our property according to the drawings supplied by TCR in the DEIS. Harvey impacts need to be addressed in the DEIS and it is negligent not to include this in the report. Flooding has not been properly assessed by AECOM, TCR, and the FRA in the DEIS report. Therefore since inaccurate and omitted data is present in the DEIS the No Build Option should be considered.	Refer to FP-1, NE-8, SS-17 and WW-1.
Barry Wiener	2/27/2018	Website	There have been a number of arrowheads that have been found on the property over the years where the train is proposed to travel and before any major construction project is even considered this should be thoroughly investigated once there is proof that this private company has eminent domain privileges. A cultural survey must be performed on our property due to these findings. No surveys will be allowed to be performed until TCR has proven that the have eminent domain which they have been unable to do in a court of law. I request that this process be halted immediately until this can occur.No build option should be chosen. Thank you.	Refer to CR-5, ED-1, GN-1, NE-1 and NE-8.
Barry Wiener	2/27/2018	Website	Air travelers, and at the 5 Please refer to table 3.14-22 in the DEIS. It has at the \$7.2 million dollar level subtracting out 1.9 million million dollar level subtracting out 1.3 million air travelers. This chart incorrectly takes the taxes out for 100% omore of airline traffic. Why is this chart assuming that 100% oairline traffic will be diverted to HSR? This is just another incorrect data point that is being used in the DEIS. If AECOM, TCR, and the FRA cannot ensure that validated data is in the DEIS what else is wrong. There is numerous amounts of bad data in this DEIS but this just proves again that experts have used incorrect data for this report and the public. Due to the continued use and findings of inaccurate and bad data that is overinflated to try to prove a need for this project, the no build option is the only viable option. No build option should be chosen.	<b>Table 3.14-22: Range of Property Premium Impacts by Station Area, \$2019 (M)</b> in the Draft EIS reported the expected mode shift for TCRR passengers. By definition, the mode shift represents 100% of the passengers that would be diverted from air travel or personal vehicle to the Project and does not include estimates of total airline or vehicle travel between Dallas and Houston. This analysis has been removed from the Final EIS. The tax revenue estimate provided in the Final EIS in <b>Section 3.14.5.2.3, Socioeconomics and Community</b>

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
				<b>Facilities, Economic Impacts</b> , conservatively reflects only changes associated with capital investment, employment, and property taxes. Additional tax revenue generated through the State of Texas' Franchise Tax would fluctuate with annual changes to the state tax rate as well as TCRR revenue projections and is not included in the estimated tax impact. More information about tax revenue calculation methodology is available in <b>Section 3.14.3.2, Socioeconomics and Community Facilities, Economic Conditions</b> .
Barry Wiener	3/2/2018	Website	I own a small parcel adjacent to the property where the train will travel which has a warehouse on it and we were never notified of the public notice by the Corp for this project. Did TCR notify the Corp of this adjacent landowner property as required by the permitting process as we never received any notice from your organization for this comment period?	Refer to NE-6.
Barry Wiener	3/2/2018	Website	The maps used in the DEIS were very old and were not updated and many structures were not accounted for in the DEIS documents. They also listed our wedding venue as agricultural in the DEIS when it is clearly a business and has been an LLC for approximately two decades. These structures and designations were incorrectly classified or completely omitted in the DEIS and fall short of what is required in the Corp of Engineers permitting process. Can you please confirm with us that the proper documentation was reported regarding our property in this process as the DEIS has a great deal of incorrect information provided by TCR. Due to the overwhelming amount of incorrect data in the DEIS i recommend the No build as the only alternative in this process.No build option should be chosen.	Refer to BA-6, GN-1 and VA-4.

Barry Wiener	3/2/2018	Website	.TCR is asking for permits but has violated the permitting process of the USACE. It is a requirement of the permitting process for TCR to provide a list of local agencies including all approvals or denials regarding the project. Many rural counties have passed resolutions regarding this project and the permitting procedure and stated that TCR will not receive any permits without the proof of eminent domain and without this would not be able to move forward with construction of this project. TCR has yet to prove they have eminent domain and has not worked with local agencies. Has TCR provided the Corp with a list of these counties and their resolutions against the High Speed Rail project as required in the Corp's permitting process? I respectfully request an extension to the comment period in order to look further into the environmental impacts and NEPA process to ensure that the public is thoroughly able to review the massive first of its kind project. No build option should be chosen.Thank you.	Refer to ED-1, ED-3, PI-1 and WW-2.
Barry Wiener	3/2/2018	Website	There is a great deal of property that will have to be taken for this project to occur. TCR originally stated that 3000 acres or less will be needed and this has ballooned to more than 8000 acres according to the DEIS. This does not include all of the temporary acres that will be impacted for many years as well. There will be thousands of acres of special farmland that will be taken away forever should this project go forward. Please refer to the Step One Screening process developed by the FRA and TCR page 1-5 in the following link as I was unable to download the attachment on this site <a href="http://www.texascentral.com/wp-content/uploads/2015/09/Step" screening-of-corridor-alternatives-report.pdf"="">http://www.texascentral.com/wp-content/uploads/2015/09/Step"Screening-of-Corridor-Alternatives-Report.pdf</a> . Please adhere to what was stated in this report that was presented to the public when analyzing the process. It is completely wrong and unethical to try to push the project when almost three times the land will be taken vs what was originally stated by TCR. Please start over and keep the environmental and landowner impact closer to what was stated in your earlier reports to the public. Until this happens, I urge the no build option as the public has clearly been misled. No build option should be chosen.	Refer to BA-3, LU-9 and LU-14.
Barry Wiener	3/2/2018	Website	Since surveys were not conducted on much of the route as the landowners refused since TCR couldn't prove they have eminent domain, they have not accurately outlined the devastation to Navasota Lady Tresses and other plant and animal species along the path. The process should not move forward until endangered species impacts are thoroughly analyzed.This has not been done to date and vast amounts of endangered species will be forever lost. Therefore the no build option should be the only option that is considered. No build option should be chosen.	Refer to ED-1, GN-1, NE-1, NE-8 and NR-4.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
Barry Wiener	3/2/2018	Website	<p>The DEIS included a wildlife plan for crossings but did not take into account the new 126 miles of public roads that will be put in along the path. Many landowners will fence these areas as this is a new public access road. Due to this fragmentation of land throughout the route, wildlife corridors will be splintered as well with obstructed access. There will be a further fragmentation of land due to viaducts, berms, and new MOW access along the route. The current wildlife corridors in the DEIS were not accurately assessed due to the roads described above and with the travel of trains up to every 15 minutes along this path with plans to be as frequent as every 5 minutes in the future according to the DEIS. The wildlife crossings will be perpetually disrupted along the complete 239 mile path. None of this was addressed in the DEIS. To prevent the permanent detrimental impacts to the environment, the No Build Option should be the only option considered at this time. No build option should be chosen.</p>	<p>Refer to LU-9, NR-6 and TR-7. Private access roads (that would be maintained by TCRR), would be built along many portions of the Project to allow for maintenance. Additional public roads would be created through reroutes and realignments and would range from 16.6 miles to 46.9 miles, depending on the Alternative. For the mileage of proposed public roads, please see <b>Section 3.11 Transportation</b>, specifically <b>Table 3.11-62: Summary of Transportation Impacts by Build Alternative</b>. Specifically, "Conclusion and Limitations" explains that exact locations of wildlife crossings and corridors would require multi-agency coordination which would include transportation agencies such as TxDOT. The current analysis took into account the entire route, including new roadways. Approximately 55 percent of the Project is on viaduct (elevated), which would allow passage under the tracks. TCRR shall negotiate with the landowner to provide adequate crossings or compensation for land that is severed.</p>
Barry Wiener	3/2/2018	Website	<p>The carbon footprint will never be overcome on this project due to depressed ridership. Many studies show that in order to be considered a green project there needs to be greater than 10 million annual ridership. Tx Dot has only estimated 0.7-2.7 million and other independent studies had similar ridership reports. The VMT tables in the DEIS are also inflated to show a falsely elevated amount of emissions that will be removed. This data is flawed and incorrect in the DEIS and is further evidence that this project is not truly needed and why they have had to fabricate the numbers entered. The 1.2 passengers per vehicle was not taken into account in this information provided by TCR in the DEIS as well. Another table has the miles traveled inflated to show an increase in amount of VMT saved. Please conduct a full investigation of the data as this project will significantly affect the carbon emissions and damage the environment irreparably. THE NO BUILD SHOULD BE THE ONLY OPTION. No build option should be chosen.</p>	<p>The TxDOT Statewide Ridership Analysis Report that used the Statewide Analysis Model (SAM) stated that it was a high-level evaluation of forecasted ridership and cost effectiveness for various corridors to determine which ones may warrant further analysis. The report points out that the ridership forecast was conducted probabilistically to address uncertainties in estimated costs and forecasted ridership due to the inherent nature of a statewide high-level study that contained many unknowns that would need to be further evaluated and clarified in more in-depth corridor level studies. The report further states that the analysis was not intended to provide a detailed ridership analysis of an individual corridor, because many assumptions were applied to all corridors statewide, and would need to be modified to more accurately reflect the characteristics of any particular corridor. The range of ridership of 0.7 million to 2.7 million from the report cited in many comments were not the most appropriate Dallas-Houston corridor figures to use from this report. This is because the report states that further analysis was conducted on this corridor due to the results of the preliminary analysis being lower than other corridors, despite having higher numbers of intercity travelers. With further analysis using characteristics derived from publicized assumptions of the TCRR HSR at the 2013 date of the report, the ridership forecasted doubled to 7.8 million annual riders by 2035 with probabilistic results ranging 1.5 million to 5.7 million. The TCRR ridership number of 7.2 million that resulted from specific market analyses and using more specific and current service assumptions, are similar to the TxDOT projection of 7.8 million annual riders. None of the numbers used in the Draft EIS estimate were fabricated as they had bases in assumptions or other studies conducted. TCRR was consulted to verify what passenger ridership numbers meant in terms of a one-way or round trip. They indicated the numbers mean the number of trips in one direction. Therefore, the emissions for the Final EIS were revised with this assumption to calculate the numbers of cars removed from</p>

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
				the road due to HSR use. The assumption of one-way trips was checked for its impact on the conclusion of HSR net project emissions impacts for the Draft EIS emission estimate This change halved the vehicle miles traveled (VMT) and vehicle emissions removed by HSR use, but there was still a net reduction of operational emissions for all pollutants, except for sulfur dioxide, which was also projected to increase under the original round-trip assumption. Therefore, the conclusion of no adverse long-term impacts to air quality from operational air emissions would not change. This revised assumption was included in the Final EIS. Even when adjustments to the passenger trip assumption are made to assume one-way travel, and a higher vehicle occupancy of 1.5 passengers/car from newer state-level data, there is still a net reduction of CO2eq. The environment will not be damaged irreparably.
Barry Wiener	3/2/2018	Website	The need for this project is unfounded in actual verifiable data. Please refer to the attached validated maps. Clearly the congestion is between Houston to San Antonio and Dallas to San Antonio and NOT from Dallas to Houston. Due to the need being unsupported by various maps and data sets (Tx Dot study as well), the no build option should be chosen. No build option should be chosen.	Refer to BA-6, GN-1 and PN-3.
Barry Wiener	3/2/2018	Website	TCR has also stated numerous times and it is also written in the DEIS that there could be 15-39 billion going towards state taxes due to ticket sales. Please verify how this stated figure could occur. We need a complete detailed independent study of the financial feasibility of the project before going forward as this private company is seeking eminent domain privileges and RRIF and TIFIA federal loans in order to build this development project when the "public need and purpose" has not even been justified. I recommend the NO BUILD OPTION as the taxpayers will be on the hook for this project and there are many blatant errors and miscalculations in the DEIS.No build option should be chosen.	Refer to GN-1, GN-4, NE-1, PN-3 and SC-3.
Barry Wiener	3/2/2018	Website	On the Txdot AADT maps just North of Fairfield on Highway I-45 you can see that traffic counts haven't moved that much in the past 10 years moving from 27,000 to 29,759 which includes semi trucks and travelers that are not traveling the Houston/Dallas route but just driving in the local area. This would account for 10,862,035 annual vehicles but does not exclude local traffic and semi trucks and such who would have to be subtracted from this travel count. <a href="http://www.txdot.gov/apps/statewide_mapping/StatewidePlanningMap.html">http://www.txdot.gov/apps/statewide_mapping/StatewidePlanningMap.html</a> Please ensure that an accurate feasibility study is performed that uses verifiable data that the public can review as the public would be sacrificing a great deal for this private for profit venture before it goes any further. All of those individuals that will be devastated along the path that cannot even ride the train as it passes through their county deserve to see the feasibility of the project and verified "public need and purpose". Thank you in advance for your time and attention to this very important matter. Please move forward the no build alternative. No build option should be chosen.	Refer to NE-1 and PN-3.
Barry Wiener	3/2/2018	Website	The public's safety is of extreme concern as TCR, AECOM, and the FRA did not include FERC or PHMSA in their planning process despite hundreds of pipelines being impacted. Pipeline experts are very concerned as some pipelines are only 50 ft of the track and there has not been anything reported in the DEIS in relation to mitigation of vibration damage to the pipelines close to the tracks. There is much evidence that stress waves created by vibration results in dynamic stress (fatigue) on pipelines, causing misalignment, and damage such as crack propagation, which can result in the failure of the pipeline. Other experts are stating that explosions could occur. How could we be more than 2 1/2 years in this process and FERC not even been consulted when this is such a serious matter and hundreds of pipelines are being impacted. If this private company and engineering firm could be so irresponsible with something of this nature, the only option that should be concluded is the no build option in order to keep the public safe.No build option should be chosen.	Refer to EU-1, EU-2, NV-5 and SS-19.
Barry Wiener	3/2/2018	Website	Please look at the attached station information on I45 which again does not support the need of this project. Streetman location. There has been a 2.8% growth over the past 10 years. Many years it has went down. If we used 2015 it would have been a negative growth over the past 10 years. Again, the data does not support the ridership nor the need for the route. <a href="http://www.txdot.gov/apps/statewide_mapping/StatewidePlanningMap.html">http://www.txdot.gov/apps/statewide_mapping/StatewidePlanningMap.html</a> Station Flag 82H75 Site ID H75 AADT 2016 29,802 AADT 2015 28,446 AADT 2014 26,256 AADT 2013 25,084 AADT 2012 28,000 AADT 2011 29,000 AADT 2010 30,000 AADT 2009 26,000 AADT 2008 30,000 AADT 2007 29,000 Please refer to the next page of data points for this section showing expected traffic count in 2035 and you will see these figures. Route ID IH0045-KG 2015 AADT 28,446 2035 Estimated AADT 54,620 24 Hour Truck Percentage 32.4 Looking at these calculations you see that 32.4% o the traffic is projected to be trucks and this data can be validated when looking at axels and trailers etc. My point is this is all	Refer to AQ-2, AQ-13, GN-1, GN-2, GN-3 and GN-4.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>validated information. Looking at this data we can drill down on ridership as people traveling on I45 to go from Houston and Dallas and vice versa will have to travel through this point. Running these figures you have 2035 figures of 54.620 less the 32.4% o truck traffic and less the 35% fr local traffic leaves us with 17,806 estimated vehicles traveling to Houston to Dallas or Dallas to Houston. The standard for subtracting out local traffic according to the UIC and noted in Appendixes of Tx Dot study is 35%. he estimation used for passengers is 1.2 per vehicle. Factoring this in would lead us to possible 21,367 passengers daily traveling via car(subtracting out trucks traveling 32.4% ad local traffic 35%).Now using TCRR's figures of 16% mrket share (Chapter 1 DEIS page 1-8 footnote - 13 According to TCRR's 2043 ridership forecast, HSR would account for 21 percent of the traveling public market share between Dallas and Houston. This HSR market share would derive from a 16 percent decrease in vehicular traffic market share and a 6 percent decrease in air travel market share (numbers rounded). you will have 1,189,432 passengers projected in 2035 and far fewer at current dates due to very few cars on I45 currently at this date. 1,189,482 is a paltry amount of riders in 2035 and negates all the emission data which is an entirely different figure that is blatantly wrong in the DEIS and will NEVER overcome the carbon footprint and will be a huge economic albatross on the taxpayers' back. Since I was able to breakdown the figures and ridership data using accurate and verifiable data, please show your work proving the viability of the project. Keeping this hidden from the public stating it is proprietary when numerous other reliable studies prove their data to be fatally flawed and absolutely preposterous is unethical and wrong. Please show how the vehicle ridership data calculations I performed above is wrong showing a possibility of only 1,189,482 passengers IN 2035 using the inflated market share of 16% b TCRR. I would like to note that reputable research companies do NOT show a market share of 16% a I used above which were TCRR's figures. Some are estimating only 5%. AF used 7.2%. t should be noted that their tickets are not selling out. Now if we used AAF's more reasonable market share for vehicles the ridership projected would only be 561,524 passengers annually from cars. This is completely unacceptable that this private company is trying to obtain taxpayer loans for a project that will surely fail and the FRA has taken out the economic viability study from the process and has allowed their data to permeate the DEIS documents when it can't hold up to scrutiny and is easily proven false. I have included a snapshot of the data I have entered above for tx dot's statewide planning map. Please prove that these station figures are wrong from Tx Dot. The only option that should be carried forward is the NO BUILD ALTERNATIVE. No build option should be chosen.</p>	
Barry Wiener	3/2/2018	Website	<p>Please prove the following figures that are in the DEIS a number of times: Additional sales tax revenue would result from the sale of tickets for travel on the new HSR system on an annual basis while it is in operation. As shown in Table 3.14-22, HSR ticket sales could generate between \$15 billion and \$39 billion in sales tax for the state plus \$5 billion to \$12 billion in local tax revenue. Local sales tax is assumed to be collected at the point of sale, roughly split between Dallas and Houston jurisdictions. This is from Page 3.14-29 in the DEIS and also on page Executive Summary ES-22. Please see the following chart in the DEIS as well Page 3.14-29 : Table 3.14-22: Annual Ticket Revenue Impacts for all Build Alternatives Mode HSR Car* Air* Bus All Modes Build Market Share 21% 7% 3 2% 10% nNo-Build Market Share 0% 8% 9 2% 10% nAverage Trip Price (2016\$) \$199 *** \$199 \$25 High Impact Assessment based on 7.2 million annual HSR travel demand Ridership Impact 7,200,000 (5,300,000) (1,900,000) - Federal Tax Impact (2016\$)** \$0 \$(8,971,840) \$0 \$0 \$(8,971,840) State Tax Impact (2016\$) \$89,550,000 \$(9,752,000) \$(23,631,250) \$0 \$56,166,750 Local Tax Impact (2016\$) \$28,656,000 \$0 \$(7,562,000) \$0 \$21,094,000 Net Impact \$68,288,910 How are you coming up with 15 to 39 billion in income to the state for ticket sales even using your own incorrect high unrealistic figures which have already been disputed on previous comments? It can easily be calculated that with the over inflated figures of \$89,550,000 in 100 years this only adds up to 8.9 billion in possible sales tax from ticket sales to the state. That is 100 YEARS! Please see how TCR continues to mislead the public with information that the FRA has allowed into the the DEIS in the attachment. There is so much unverified and wrong data in the DEIS that this study is based on. I request an immediate halt and thorough review of all the data on this project. The no build option is the only feasible option for this particular project and route. No build option should be chosen.</p>	Refer to SC-3.
Barry Wiener	3/2/2018	Website	<p>Please show how this was omitted in the figures in the DEIS: Federal Excise Tax: A federal excise tax of 7.5% i charged on airfare. Segment Fee: A segment fee of up to \$4.00 USD does apply per flight segment. A flight segment is defined as one takeoff and one landing.Jan 11, 2018 Please see data from the table on page 3.14-29 Dallas to Houston HSR EIS Chapter 3.0 Section 3.14 Socioeconomic and Community Facilities : Table 3.14-22: Annual Ticket Revenue Impacts for all Build Alternatives Mode HSR Car* Air* Bus All Modes Build Market Share 21% 7% 3 2% 10% nNo-Build Market Share 0% 8% 9 2% 10% nAverage Trip Price (2016\$) \$199 *** \$199 \$25 High Impact Assessment based on 7.2 million annual HSR travel demand Ridership Impact 7,200,000 (5,300,000) (1,900,000) - Federal Tax Impact (2016\$)** \$0 \$(8,971,840) \$0 \$0 \$(8,971,840) State Tax Impact (2016\$) \$89,550,000 \$(9,752,000) \$(23,631,250) \$0 \$56,166,750 Local Tax Impact (2016\$) \$28,656,000 \$0 \$(7,562,000) \$0 \$21,094,000 Net Impact \$68,288,910 I am including the attachment showing that TCR, AECOM, and the FRA have not factored in the loss of federal tax on airline tickets. This will be a loss of an estimated 28,357,500 annually using your chart and figures. I would recommend the DEIS process to be stopped immediately as there is so much incorrect data that is falsely propping up the purpose and need and economic benefits of this project. In the end this entire table will be shown to be false with bad data and there will only be a net loss to taxpayers. But for this comment, please explain the incorrect information provided for the federal excise tax on airline tickets. I would</p>	Refer to AQ-3.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			suggest that "experts" who put these tables together and information in the DEIS actually look at fees on an airline ticket when putting together such an important study. Due to the massive amount of wrong data in the DEIS the only option carried forward should be the No build option. No build option should be chosen.	
Barry Wiener	3/2/2018	Website	Please refer to the Public Need statement in the the DEIS Dallas to Houston HSR EIS - Chapter 1.0 Pg. 1-6 : 1.2.2 Need The need for HSR service is a result of increasing travel demand and the deficiencies of the existing and proposed transportation infrastructure to accommodate this growing demand between Dallas and Houston. Current direct route transportation options between Dallas and Houston are limited to vehicular and air travel.4 Due to increasing congestion on IH-45, automobile travel times between the two regions are projected to increase as travel speeds decrease. Flight time between the two regions is relatively short; however, the overall trip duration when considering pre-arrival time more than doubles. Additionally, flights are more sensitive to inclement weather and other delay-causing events from inside and outside of Texas compared to HSR. Please look at the following statement from the above: Flight time between the two regions is relatively short; however, the overall trip duration when considering pre-arrival time more than doubles. If you look at the total trip time of the bullet train you will see that it is more than double as well. If you have a 90 minute bullet train and you have a total trip time of 3.5 hours as purported by TCR themselves you have a more than double trip time as you have stated is why this is a problem with airline traffic. Using simple map, double the trip time for a 90 minute ride would be 3 hours. TCR is purporting their total trip time is 3.5 hours which is more than double the 3 hours. The purpose and need of this project is again not proven when looking at the data. Please see the attachment and you can see where TCR is stating their total trip time is 3.5 hours. This is before the new increased TSA security for HSR that was passed with SB 975. The No Build Option is the only alternative that should be considered No build option should be chosen.	Refer to GN-3, PN-3 and SS-9.
Barry Wiener	3/2/2018	Website	KVP#27 is looking at the back of our property. Other segments of the landscape unit have newer suburban developments surrounded by open spaces for agriculture (KVP #27 and Figure 3.10-21). This landscape unit has a moderate visual quality, as shown in Table 3.10-19, and a moderate viewer sensitivity. KVP #27 is a typical view of the landscape unit for all Build Alternatives. The view is from Becker Road facing south (Figure 3.10-80). The simulated view is shown in Figure 3.10-81. As shown in the simulation, the HSR system would be compatible with the area, which includes two large communications towers. The HSR system would be in the distance, and views would be partially limited by trees. Viewers in this area would be mostly residents, with some workers in agricultural and other industries. There would be some travelers on US 290 north of the neighborhood; however, this set of travelers would have a low sensitivity to the HSR system. Viewers nearest to the HSR system would have moderate viewer sensitivity, as shown in Table 3.10-34. Despite a slight reduction in visual quality to the landscape unit, the degree of impact in this landscape unit would be neutral because the HSR system would be compatible with the area and viewer sensitivities are moderate. Mitigation measures for visual impacts are described in Section 3.10.7 All of this information and descriptions are completely skewed and false and much information has negligently or purposely omitted. They clearly ignored that we have a huge wedding sign right next to where they took the picture, they ignored the historic Victorian mansion, the lake, the pond, the landscaped acreage, the gardens, the fountain, the paved lot and drive, etc. They ignored this was a wedding venue and stated this would be a neutral impact which it would actually shut down the business and have a huge negative impact on this business resulting in loss of jobs and tax dollars. The main people that would see the train would be brides and their guests and not agricultural workers. The 18 acres is an LLC and not agricultural. The person taking the pictures clearly omitted the important data points for this property. Please see the attached pictures showing where they turned the camera angle to prevent capturing the lake and wedding venue sign. I am also including a video showing this property and cell phone tower. The train will be on the other side of the lake 600 feet from where the brides get married at the gazebo. Is this a neutral impact??? Please see this video. <a href="https://vimeo.com/230392998?ref=fb-share&amp;1">https://vimeo.com/230392998?ref=fb-share&amp;1</a> As this will destroy our wedding business and income source, I would request the No build option.	Refer to AS-1.
Barry Wiener	3/2/2018	Website	TCR failed to label a cemetery right next to its route which could easily be affected and within permit range which would justify a cultural survey according to section 106 of the USACE. The Whitfield Lake Cemetery Memorial marker is on Strawther Road at coordinates 30.896089,-96.026603. This is only the stone memorial, not the actual burial ground. The graves are so old, most if not all are marked any longer. The marker is 203.67ft to the South West of being directly under the transmission lines. <a href="http://files.usgwararchives.net/tx/madison/cemeteries/whitfield.txt">http://files.usgwararchives.net/tx/madison/cemeteries/whitfield.txt</a> Ms. Stephenson comments about Whitfield Lake Cemetery: She said her understanding is that when they ran the transmission lines through, the company working the project removed the tombstones, but did NOT move the bodies. She also said in her estimation, if they start working in that area they very well could dig up bodies. The owner of this parcel stated the bodies are still there and the parcel was NOT surveyed. Due to this negative impact along with the numerous other detrimental impacts I urge the No build option to be pursued. No build option should be chosen.	Refer to CR-6.

Barry Wiener	3/2/2018	Website	Smith Family Cemetary has the train or temporary construction area right on top of it. The DEIS footprint maps do NOT have this cemetery marked. Details for Smith Family The cultural maps have this cemetery and it will be impacted (Atlas Number 7113024705) 3820 East Illinois Ave Directions: At the intersection of East Illinois Avenue and Mayforge, turn south onto Mayforge which runs parallel to Interstate 45. Then immediately turn right onto private property which is fenced. The cemetery is located between the fence and a brick building which was originally the Linfield Elementary School built before 1954. Three gravestones are clearly visible near the fence not far from the right-of-way of East Illinois Avenue. Historic Texas Cemetery? Yes Designation Date 8/16/2016 Number of graves estimated 16 Burial Dates 1866-? Cemetery ID Number DL-C247 THE NO BUILD OPTION SHOULD BE IMPLEMENTED. No build option should be chosen.	Refer to CR-6. The Smith/Kinnard Family Cemetery was designated as a Historic Texas Cemetery in 2016 by the Texas Historical Commission. The cemetery is adjacent to the Limits of Disturbance (LOD) of Segment 1 and is not eligible for listing in the National Register of Historic Places (NRHP), as determined in consultation between the Federal Railroad Administration and the Texas Historical Commission. Construction and operation of the Project has the potential to have an adverse impact on this cemetery.
Barry Wiener	3/2/2018	Website	The FRA footprint maps have a permanent system over a portion of this cemetery. This needs to be verified as cultural maps have the cemetery in the woods. Information shows it to be in the pasture and https://atlas.thc.state.tx.us/Map Cemetery ID Number NV-C110 Cemetery Name Ward Cemetery Directions SH 31 west from Corsicana to FM 2452. Turn left and go 5.2 miles to FM 709. Turn right and go 2.3 miles. Cemetery is on the left in pasture. City Retreat County Navarro Historic Texas Cemetery? Yes Designation Date 2/1/2005 Number of graves 320 Burial Dates 1852 to present The No Build Alternative should be used as there will be numerous negative impacts of this project. No build option should be chosen.	Refer to CR-6. In the Draft EIS, Ward Cemetery was reported as Resource NA.040 and is also designated as a Historic Texas Cemetery. Due to changes in the conceptual design, the Ward Cemetery is located outside the Historic Resources Area of Potential Effects and will not be impacted by the Project.
Barry Wiener	3/2/2018	Website	The FRA maps have failed to acknowledge bald eagles in Harris County. We have seen bald eagles on our property a number of times and we believe there are nests nearby 15419 House Road Hockley Tx. 77447 21 Dallas to Houston High Speed Rail DEIS Appendix D_NaturalResources_Set_4of4 Harris county section. No build option should be chosen.	Refer to NR-3.
Barry Wiener	3/2/2018	Website	"There are several pairs of bald eagles that roost at gibbons creek and have fledglings that could be prepared to make nests outside of Gibbons. The Maxwell property has seen a pair on their family property every weekend since deer season this year." This is a mile from the train route and the FRA maps do not include the bald eagle information or sightings in their documents. This info is noted from an environmental scientist. 21 Dallas to Houston High Speed Rail DEIS Appendix D_NaturalResources_Set_4of4 Grimes county section No build option should be used. No build option should be chosen.	Refer to NR-3. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .
Barry Wiener	3/2/2018	Website	The public roads as evidenced in the drawings fragments almost the entire route even the viaduct sections. This is not what was proposed to the public and in order to mitigate this clear damage, the train should run alongside existing roads. http://www.iene.info/wp-content/uploads/COST341_final_report.pdf Dallas county- about 50% nw public roads. Ellis county- about 50% nw public roads. Navarro county- about 10-20% nw public roads. West of Teague segment (Madison, Limestone, Freestone, Leon) about 90% nw public roads. Houston segment (Harris, waller, grimes)- about 40-50% nw public roads or realigned public roads with the majority of Grimes county with new public roads and a significant portion of beginning of Houston section with no designation. These new public roads will not allow free passage of livestock and wildlife and will further fragment our wildlife and go against what they are claiming in their wildlife crossing maps. 53 Dallas to Houston High Speed Rail DEIS Appendix G_TCRR FDCE v7 DWGS VOLUME 5 pg 13-end Plus review corresponding maps 45-52 In order to prevent a detrimental impact to the wildlife for the entire 239 mile path the No Build Option is the only option that should be moved forward.No build option should be chosen.	Refer to GN-3, LU-9, LU-11, NR-6, TR-7 and TR-8.
Barry Wiener	3/2/2018	Website	The FRA maps have incorrect labeling of our business House Estate. They have labeled this as agriculture use when we clearly have 18 acres listed as an LLC so it should be listed as a commercial establishment. The facility was also built in the 1890's and doesn't show up in their map as even being a building much less a commercial facility. http://thehouseestate.com/ We also have 5 barns/sheds and a residence on our property that they failed to place on this map as well. 24 Dallas to Houston High Speed Rail DEIS Appendix D_LandUse_Set_3of3 Sheet 241 Because of their incorrect coding they failed to calculate the negative impact to this business which will have to be closed down and fire many employees. The no build option should be elected as the economic impact has not been properly assessed.No build option should be chosen.	Refer to GN-1, LU-7, LU-8, SC-19 and VA-4. While this business is near the LOD, it was not categorized or reviewed in the Land Use Technical Memorandum as a displaced business.

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS

Submitted By	Date Submitted	Submission Type	Comment	Response
Barry Wiener	3/2/2018	Website	"Between the county's northern boundaries where the proposed route crosses SH 99, the land use is mostly rural with scattered single family residences." They failed to address noise levels where the train will be right next to a wedding venue which will greatly impacted this business and will result in shutting it down. Again they have this site mislabeled as agricultural when it is a business and sound levels were not accounted for in this area at all. Any increase of noise would be detrimental to this business and was not addressed at all. They were not consistent with their noise measurements for any of the counties and used various time intervals for certain locations. They did not state exact measurements as well from structures to train. Highly subjective results and too many variables and data points not addressed to be accurate. 29 Dallas to Houston High Speed Rail DEIS Appendix E_Combined Tech Memos_Set 1 of 2 Pg 91 If this DEIS cannot use accurate data then the entire report is in question. AECOM reps stated that noise impacts were based at 125 mph to 175 mph. This is not even the travel speed of the train nor what it is expected to travel at. I would like to know which noise impacts were assessed at 125 mph as these data points are completely skewed and provide inaccurate data for the DEIS. Due to all of the incorrect data I opt for the No Build Option.	Refer to NV-1.
Barry Wiener	3/2/2018	Website	There is a soil conservation reservoir site adjacent to the train and permanent construction site which appears will be negatively impacted. This is not depicted on the FRA maps. <a href="https://mapcarta.com/21805530">https://mapcarta.com/21805530</a> 7 Dallas to Houston High Speed Rail DEIS Appendix D_Project_Footprint_Set_1of5 Sheet 52,53,84 Please assess. I request an extension of the comment period as many problems are being found in the DEIS and 75 days is not long to review a project that you have have 2 1/2 years to put together.No build option should be chosen. Thank you	Refer to PI-3. The Final EIS has identified in <b>Table 3.7-59: Estimated Waterbody Impacts – Navarro County</b> that Segment 3B would cross on viaduct at Soil Conservation Service Site 138. This comment appears to reference Soil Conservation Service Site 117, which is located greater than 1,500 feet east of the LOD for Segments 2A and 2B.
Barry Wiener	3/2/2018	Website	AAF another "private" railroad company has given their ridership and cost data in their DEIS. Why was this omitted in this project? <a href="https://www.fra.dot.gov/eLib/Details/L15932">https://www.fra.dot.gov/eLib/Details/L15932</a> Market share for this private train is estimated to be 7-8% while TCR is stating their market share is 21% which puts ridership at 2.9 million and not the 5 million. The actual ridership suggested of 5 million makes the market share at 36%. This is ridiculous as compared to this other private company. AAF has price per mile costing .35-.61 while TCR has costs averaging .83 TCR numbers not making sense and this private company just like AAF did needs to have their ridership and costs in the DEIS. This is especially warranted as this company is seeking eminent domain and federal tax dollars. Why did the AAF which is a private company have a ridership and revenue study while TCR did not in their DEIS? Please prove ridership details as your own numbers don't work out. The No Build Alternative should be chosen for this project. No build should be chosen.	Refer to ED-1, GN-2, GN-4 and NE-1.
Barry Wiener	3/2/2018	Website	Dallas county- about 50% nw public roads. Ellis county- about 50% nw public roads. Navarro county- about 10-20% nw public roads. West of Teague segment (Madison, Limestone, Freestone, Leon) about 90% nw public roads. Houston segment (Harris, waller, grimes)- about 40-50% nw public roads or realigned public roads with the majority of Grimes county with new public roads and a significant portion of beginning of Houston section with no designation. We passed a law to prevent taxpayer funding for this project and now each county is responsible for maintaining a number of new public roads solely because of this project. If we don't have the train, the taxpayers will not have to use tax dollars for these new roads. 126 miles of new public roads maps section 45-52 Why was new public roads not included in the DEIS? To prevent the taxpayers and landowners being harmed by this project, I opt for the No Build Option.	Refer to TR-7 and TR-8. <b>Table 3.11-61: Summary of Transportation Impacts by Build Alternative</b> provides a summary of new public road mileage by Build Alternative.
Barry Wiener	3/2/2018	Website	In the Deliberative Draft this is stated: The Project will extend approximately 240 miles long, with an estimated right-of-way (ROW) width of approximately 100 feet (ft), and varying depths of impact. Additional acreage is expected to be utilized for ancillary facilities consisting of passenger stations, rail car and track maintenance facilities, electrical substations, maintenance roads, and signal houses. To date, design efforts have focused on the rail alignment, the principal component of the Project. Once the rail alignment is fixed, siting and conceptual design of the ancillary facilities will begin. Notice where it states estimated ROW is approximately 100 ft yet the average ROW that is being sought is 275 ft. This is unacceptable and not what was originally stated to the public. The No build option should be pursued.	Refer to BA-3 and LU-14.
Barry Wiener	3/2/2018	Website	3.12 Safety and Security Safety and security considerations would be included in the design of infrastructure, systems, facilities, and stations for the proposed HSR system. The following are key guidelines that would be incorporated during detailed design. <ul style="list-style-type: none"> <li>• The design, construction, testing, and start-up of the HSR would comply with applicable safety and security laws (for persons and property), regulations, requirements and railroad industry practices.</li> <li>• Facilities and infrastructure design would provide capacity for safe emergency evacuation and compliance with emergency procedures.</li> <li>• Perimeter fencing would be installed on embankment infrastructure configurations with a footing to resist ingress from digging or burrowing animals.</li> <li>• Fencing, barrier separation, intrusion detection, and technological devices would be used to secure the right of way.</li> <li>• The HSR system would be equipped with an integrated system for detecting, monitoring, and responding to environmental conditions and emergency events.</li> <li>• Refer to Section 4 for more information.</li> </ul>	Refer to NR-6.

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>Please explain how this is NOT a barrier to wildlife and how this is not fragmenting wildlife populations. Thank you. Due to the detrimental effect on wildlife alone the No Build Option should be used</p>	
Barry Wiener	3/2/2018	Website	<p>13.8.7 Material Handling Practices The following list outlines some key measures that may be used to ensure that material handling practices comply with environmental requirements: Source</p> <ul style="list-style-type: none"> <li>• Fill material brought into the ROW from external source areas and used for the construction of any of the features listed would be from known sources with verified chemical properties.</li> <li>• Proper source documentation would be obtained by the Contractor and provided to regulatory agencies as required.</li> <li>• The use of fill material or soil from non-approved sources, including private landowners, would be in compliance with environmental and other applicable regulatory requirements.</li> </ul> <p>Have taking the large amount of fill materials from external sources and areas far from the actual berm been properly assessed when determining flood and drainage impacts around the berm? Where is the expert analysis regarding this? How can you build mounds of dirt and not expect this to impact drainage and flooding especially when the fill material is from external sources and no drainage is accounted for this close by? Where is the analysis of this in the DEIS? To prevent epic drainage issues and flooding which has not been properly analyzed in this report, the No Build Option is requested.</p>	Refer to BA-6, FP-1, SG-4, WW-1 and WW-2.
Barry Wiener	3/2/2018	Website	<p>15.4.1 Enterprise Products Seaway Pipeline A conflict with a recently constructed 30in (762mm) diameter Enterprise Product Partners Seaway crude pipeline was identified along sections of alignment Segments WT and IH during the course of the utility assessment and investigation EW Segment The overall area of conflict begins near Station WT 130+00 (near the Madison/Grimes county line) and continues to Station WT 1030+00. This is approximately a 17-mile (27km) long stretch where the HSR alignment either crosses, runs along the utility line, or follows too closely to the pipeline. However, within this 17-mile (27km) stretch there are only seven (7) cumulative miles (11km cumulative) that have actual conflicts with the Seaway Pipeline easement. The seven miles of conflicts are not contiguous, but occur intermittently through the 17-mile (27km) section. IH Segment The overall area of interaction between the HSR alignment and the pipeline begins near Station IH1 3925+00 and continues to Station IH2 820+00, approximately 12 miles (19km). Within this zone, the main area of alignment and pipeline conflict happens between Station IH1 4150+00 and Station IH2 245+00, approximately 9 miles (14km). As a part of our due diligence process, we have continued to review the alignment of both the HSR and Seaway pipeline internally, and with Enterprise Product Partners. One of the primary conclusions based on discussions with EPP, is that the amount of right-of-way (ROW) overlap between HSR and Seaway should be kept to a minimum. If a repair is required on the Seaway pipeline in an area where the HSR LOD and the Seaway easement overlap, there is a potential that the HSR service would have to be temporarily halted until the repair is complete. This scenario is particularly valid if the construction type of the HSR is embankment and the slope extends into the Seaway ROW. As the design has developed, coordination with Enterprise Products has been ongoing. Several options have been discussed to mitigate the conflict between HSR and the Seaway pipeline. The options discussed with Enterprise included:</p> <ul style="list-style-type: none"> <li>• Relocating the pipeline outside of the HSR LOD</li> <li>• Protecting the pipeline in place where feasible</li> <li>• Using viaduct to span and avoid pipeline crossings</li> </ul> <p>As the engineering and design of the alignment progresses, we would continue to coordinate with Enterprise Product Partners and their team. In addition, cost estimates for the different options would be refined as more design data is developed and assessed. Selection of the preferred option would strive to minimize cost, scheduling, and environmental impact Have you reviewed clauses in the easements? There are a number of easements that don't allow for relocations. During the due diligence was this looked at and investigated? Many landowners are completely against the project and will be looking closely at their easements. Many will not allow any changes to their easements without strong language in favor of the landowner and against texas central and terms that the pipeline would not be comfortable with taking on the whole liability in many cases. As much of this 2 1/2 year process is chalked full of omissions, gaps, and inconsistencies, I recommend No Build Option for this project to ensure the safety of the public.No build option should be chose.</p>	Refer to EU-2.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
Barry Wiener	3/2/2018	Website	1.1.3.3 Other Cooperating Agencies EPA has special expertise in regard to the Clean Water Act of 1972 (33 U.S.C. Â§ 1344), Rivers and Harbors Act of 1899 (33 U.S.C. Â§ 403) and the Clean Air Act of 1970 (42 U.S.C. Â§ 7401). FHWA may have an approval role related to certain road crossings or construction within federal right-of-way (ROW). FTA has special expertise in intermodal passenger service. No approvals or permits from FTA are anticipated. USFWS may have an approval role related to protected and endangered species and suitable habitat under the Endangered Species Act of 1973 as amended (16 U.S.C. Â§ 1531 et seq.), Migratory Bird Treaty Act of 1918 (16 U.S.C. Â§ 703-712; 50 C.F.R. 1) and Bald and Golden Eagle Protection Act of 1972 (16 U.S.C. Â§ 668). Where is the coordination between state and county regulations for roads, overpasses, and realignments? Please show evidence according to state statute where the supposed "railroad" has authority to realign roads AND go under roads. Since this has not been thoroughly investigated by looking at current laws the No Build Option is the only option that is feasible for this project. Thank you.	Refer to ED-1 and TR-6.
Barry Wiener	3/2/2018	Website	City of Houston Chapter 30 of the City of Houston Code of Ordinances specifies noise limits of 65 dBA and 58 dBA at residential property lines for daytime and nighttime periods, respectively. However, noise from railroad equipment on railroad ROWs is exempted. Noise from construction between the hours of 7 AM and 8 PM is also exempted, provided the noise levels do not exceed 75 dBA at residential property lines. Dallas to Houston HSR EIS - Chapter 3.0 Section 3.4 - Noise and Vibration Since they are stating they are exempted as a presumed "railroad" are you saying that they do NOT have to mitigate for these noise levels? Is the COH public aware of this? Due to the noise impacts and many detrimental effects to the public, the No Build Option is suggested.	Local noise ordinances are not applicable to HSR projects.
Barry Wiener	3/2/2018	Website	To supplement the noise impact criteria in Figure 3.4-3, FRA7 provides guidelines for identifying noise sensitive locations where increased annoyance can occur due to a sudden increase in noise (the startle effect) from the rapid approach of HSR trains. This effect is separate from the impact criteria defined above, and is dependent on the train speed and trainset and would be confined to an area very close to the tracks. For example, 200 mph train operations would have the potential for increased annoyance within about 40 feet of the track centerline. Thus, the area where rapid onset rates of train noise may cause startle would typically be within the ROW limits of the rail corridor. FRA also addresses impacts on wildlife (mammals and birds) and domestic animals (livestock and poultry). Noise exposure limits for each are a Sound Exposure Level 8 of 100 dBA from passing trains, as shown in Table 3.4-4. Dallas to Houston HSR EIS - Chapter 3.0 Section 3.4 - Noise and Vibration Please review this as the startle effect will be detrimental to our wildlife including cattle industry. <a href="http://www.cvzv.sk/slju/14_2/8_Broucek.pdf">http://www.cvzv.sk/slju/14_2/8_Broucek.pdf</a> NO BUILD OPTION SHOULD BE OPTED FOR AS THE BEST CHOICE FOR THIS PROJECT.	Refer to NR-1.
Barry Wiener	3/2/2018	Website	Site LT-1: 4019-4099 Bulova Street, Dallas. The Ldn measured at this location was 72 dBA. The dominant noise source was traffic on IH-45. Noise levels were measured for 24 hours near the gate to this parcel. Please tell us the speed of the train at this point. Please give the reference. Other DEIS reports show the exact speed measurements for each location. This report fails to mention this. AECOM has stated that noise impacts were measured with the train traveling at 125-175 mph yet we know that the train will be traveling at 186 mph and eventually over 200 mph. The noise impacts were not adequately assessed therefore the No Build Option is the only viable option until a reliable and accurate noise impact study can be performed. Please provide the speed of the train at this location in order to accurately gauge noise impacts.No build option should be chosen. Thank you.	Refer to NV-6.
Barry Wiener	3/2/2018	Website	Site LT-1A: 5125 Cleveland Rd, Dallas. The Ldn measured at this location was 53 dBA. The dominant noise sources were rural sounds and local traffic. Noise levels were measured during three separate one hour periods throughout the day along Cleveland Rd in front of the property. What time of day were these measurements taken and only three separate one hour periods were used? Could this provide accurate data. Other data points were for 24 hours. Please show the times and reports of when data was reported for this. Any data during the 11 pm hour? In order to have a reliable and accurate report a longer period of time needs to be measured and the public should have the report. The no build option should be chosen until accurate data is able to be reported.	Refer to NV-1.
Barry Wiener	3/2/2018	Email	Unfortunately, Texas Central Railway/Texas Central Partners (TCR, TCP) have kept the economics of the project hidden and refuse to release to the public feasibility studies of the project. Other private projects that involve the public such as All Aboard Florida (AAF) have released ridership and cost studies demonstrating the financial feasibility of the project before moving forward. AAF released their study in their DEIS which included a market share of 7.2% ad a public usage cost basis of 0.30-0.61 per mile. All TCR has released is a deficient biased report with unverifiable data with a market share of 36% ad a public usage cost basis of 0.83 per mile making the average ticket price of \$199 each way. This is unaffordable to the majority of the public therefore this project would not rise to a "public need" transportation modality. Objective studies have come to the same conclusion of Tx Dot of 0.7-2.7 million annual ridership and not the inflated ridership of 5 million as proposed by TCR who has refused to show their data. Since numerous studies have shown this not to be economically viable and the FRA removed this viability component presumably due to this, I emphatically request the NO BUILD OPTION for this project. No build option should be chosen.	Refer to GN-4, PN-3 and SC-3.

Barry Wiener	3/2/2018	Email	"For the Final Operating Scenario (FOS) in the analysis year (2040), it is assumed that trains will run every 10 to 15 minutes in each direction between 05:30 and 23:30, with the last trains departing from Dallas and Houston at 22:00." Seeing that the goal is for trains to pass approximately every 5 mins from one of the directions this will forever cause a divide between Texas. You will see startle scenarios in the tables and if you have a train coming by as frequently as every 5 mins you will never be able to move cattle even if you have a fence over a public road to move them to the other side. This will make the entire route impassable to wildlife and livestock. Please see the data in this report for the true effect of the startle effect which is extended out for quite a distance and will be a severe impact to many wildlife according to these charts. <a href="http://www.hsr.ca.gov/docs/programs/merced-fresno-eir/drft_EIR_MerFres_TR_Noise.pdf">http://www.hsr.ca.gov/docs/programs/merced-fresno-eir/drft_EIR_MerFres_TR_Noise.pdf</a> THE NO BUILD OPTION SHOULD BE CHOSEN.	Refer to NR-1.

Marcus Wiese	3/8/2018	Website	I worked on the Amtrak DC to Boston high speed improvement project in the late 80s. Best investment ever made. Now as a resident of TX, the lack of similar cost effective transportation between cities is long overdue for rectification! The two cities are screaming for something better than I45, or a congested airline flight between airports. This is it.	Comment noted.
Scott Wiesenborn	2/24/2018	Website	I support the Houston to Dallas high speed rail. Make it happen!!	Comment noted.
Norman Wigington	2/16/2018	Website	This is a project that is so overdue... we have needed speedy rail connections for the past forty years. Forty years ago I took the train from San Antoni to Dallas and it took ALL day... we actually went to Fort Worth first then BACKED UP into Dallas. This is no way to run a railroad. A swift and safe connection from Houston to Dallas would be a real incentive for travel, pleasure, business and family.	Comment noted.
Norman Wigington	2/22/2018	Website	I have full support of the fast train between Houston and Dallas. I personally would prefer the train to leave out from Downtown to the Northside/US 59 right of way to Bush IAH, to Lufkin/Nacogdoches and then go northwest to Dallas and enter Dallas from the eastside. That would mean a new direct link from Houston to Austin via College Station.	Refer to GN-7 and NE-1.
Tim Wikander	3/9/2018	Website	I live in White Oak Falls, Houston 77095. The rail will cut through the edge of my community. I'm within 700 feet of the proposed project I am opposed to the project and lack of respect Texas Central is showing our community. Many residents will live inconveniently close to the rail. Hundreds of homes will be impacted by noise and vibration. There's also the matter of real estate devaluation. My home is an investment and my property value is at risk.	Refer to LU-3, LU-7 NV-1 and VA-1.
Laura Wilborn	3/9/2018	Website	This rail system is greatly needed for Houston as we are the 4th largest city in the USA and traffic is now completely unbareable and unsafe in certain areas. This new rail system will certainly be a BIG ASSET to Houston's Econom!	Comment noted.
Timothy Wild	2/16/2018	Website	I am a locomtive Engineer.Time that Texas moved into the 21st Century.Let's get this train moving now.I live in Houston.We are way behind the East and West Coasts, and the Western World	Comment noted.
John Wiley Price	3/7/2018	Letter	Mr. Wright, I am writing this letter in reference to the Draft Environmental Impact Statement that was released by the Federal Railroad Administration (FRA) for the Dallas to Houston High-Speed Rail project. While I am an advocate for this project and this type of technology being implemented in the State of Texas and in the district which I represent, I am not in favor of the proposed Train Maintenance Facility located north of Pleasant Run Rd. The construction of this proposed train maintenance facility and the connecting at grade rail spur will result in the reconstruction of the federally funded improvements that are currently being designed by Dallas County for this section of Pleasant Run Rd. Since 2014 Dallas County and the Cities of Lancaster and Wilmer have been working towards improving Pleasant Run Rd from Lancaster-Hutchins Rd to Millers Ferry Rd. The roadway will be improved from a two lane undivided rural section to a four lane divided section with a 12'trail along the south side. Since this project has federal funds we are limited by time constraints on when construction must begin,	Comment noted.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			therefore not allowing this project to be constructed in unison with the High-Speed Rail. Dallas County's Pleasant Run Rd project is expected to be complete in 2020. Therefore, a High Speed Rail Maintenance Facility at this location will prolong construction in this area and cause disruptions to anticipated economic development resulting from the improved Pleasant Run Road. As Commissioner of District 3, which includes the City of Lancaster and Wilmer, I am committed to providing and assisting with major infrastructure improvements to the southern sector which will enhance economic development. Therefore, this project needs to facilitate this effort as an enhancement to proposed projects in the region. With the maintenance facility negatively impacting the Pleasant Run project in the Southern Dallas County Inland Port area we request that this facility be relocated and that continued partnerships exist to further improve the area.	
Kevin S Wiley Sr.	1/30/2018	Handwritten	America is way behind China and Japan where I have traveled extensively. We absolutely need this project for development of this region.	Comment noted.
Richard Wilkins	2/16/2018	Website	I am writing to express my strong support for the Texas Bullet Train project and urge the Federal Railroad Administration to move forward with the timely review and approval of the project. Creates jobs. Improves infrastructure. Attracts high caliber professionals to our economic hubs. Respects Texas lands. It's the safest train in existence. There's no sensible reason not to bring this train to the people of Texas. It is a transformational transportation project that will connect the two economic hubs of Texas, Houston and North Texas, with one stop in the Brazos Valley, while respecting Texas lands and providing a safe, convenient and clean alternative to flying and driving. The recent release of the Draft Environmental Impact Statement (DEIS) confirms this conclusion with detailed data and projections. The Texas Bullet Train will utilize the world's safest mass transportation technology, the Shinkansen system, which has had zero crashes or fatalities in 53 years of operation. The project is expected to create more than 10,000 direct jobs per year during construction and more than 1,500 jobs permanently when operational -- at least 25% of them in rural counties along the route. It will be an economic driver for the state as well as all counties along the route. As an electric train, this system will also be the best environmental alternative as 4 of the counties served are already air quality non-attainment status. This innovative new industry reduces road congestion, improves local economies and creates new jobs for Texans. I welcome a faster, safer and cleaner transportation alternative to reduce congestion because it's good for Texas!	Comment noted.
Quinta Wilkinson	2/7/2018	Website	I look forward to using this train. I use trains a lot and we need this. Trains are much more comfortable and less difficulty for older people.	Comment noted.
Quinta Wilkinson	2/19/2018	Website	This train will pay taxes not ask for money. This train will be better for the environment not like the ones now. It will make travel easier and the ability for people to travel to medical appointments and go home the same day. It will be more comfortable and very much needed. It will have its own rail line not relying on rail companies to make repairs and upgrades. Thanks I am looking forward to traveling it.	Comment noted.
Brad Williams	2/27/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5, WW-1 and WW-2.
Christopher Williams	12/28/2017	Website	I fully support the bullet train and look forward to utilizing its services. As a Houston resident who travels to Dallas often I am excited about an alternative to flying or driving. I understand some are upset about the imminent domain of the tracks and the impact. However, progress has a cost and you can't please everyone all the time. The train will have a significant positive impact on the internal economy in the state, will reduce traffic on the already too-dangerous 1-45 corridor, and will spur further completion with airlines offering service between Dallas and Houston. If the train goes through College Station it will be a huge asset for Texas A&M students and their families, providing safe and fast transportation to the College Station from the two largest cities in Texas. I urge you to approve the proposed plans so that this long over-due project may commence and begin benefiting Texans and all Americans.	Comment noted.
David Williams	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to its fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

			<p>4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact.</p> <p>5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites.</p> <p>6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.</p>	
Kasey Williams	1/30/2018	Email	I would like to address the fast track which beneficial to the ever growing Dallas and Houston areas it seems to affect smaller communities like navarro. We get absolute no benefit from except higher taxes! Please we are hard working people to raise taxes and take our land is unethical	Refer to GN-4 and SC-19.
Mark Williams	2/22/2018	Website	I support the Texas Bullet Train and the mall station location! I support the Texas Bullet Train and the proposed Northwest Mall station location, which happens to be about 2 miles from my house. As a home owner, I feel that it will raise my property value and help redevelop an area of my immediate neighborhood that has fallen into disrepair and frankly is a complete eyesore. Also, I look forward to convenience of close access to the Bullet Train upon its completion. Texas needs new and innovative ways to help alleviate the growing strain On the state's existing infmstructure -- and this project does exactly that. The recent release of the Draft Environmental Impact Statement (DEIS) confirms this conclusion with detailed data and projections. For instance, the DEIS outlines multiple options for the Houston station, which is expected to have a major economic impact, spurring an increase in propeny values within a half-mile of the terminal. I fully support the proposed Northwest Mall location, which is conveniently located in a high-growth area near the intersection of two major highways in northwest Houston. This location is closer to downtown than either Hobby or George Bush aimorts. It is also closer to Jersey Village, Katy and the Energy Corridor, among other population and cultural locations in Houston. For these reasons and many more, I urge you to expedite the review process for the Texas Bullet Train -- a much needed project that will help reduce road congestion in Houston, improve our economy and create new jobs for Houstonians. It's good for Texas!	Comment noted.
Mark Williams	2/22/2018	Website	I support the Texas Bullet Train and the proposed Northwest Mall station location, which happens to be about 2 miles from my house. As a home owner, I feel that it will raise my property value and help redevelop an area of my immediate neighborhood that has fallen into disrepair and frankly is a complete eyesore. Also, I look forward to convenience of close access to the Bullet Train upon its completion.	Comment noted.
Mark Williams	3/5/2018	Oral	My name is Mark Williams. I'm voicing my support for the location selection of the -- I forget what's the name of the organization -- the TCRR, so what they selected the location of the Northwest Mall being the location for the Houston station. I'm a property owner. My house is probably less than five miles of the Northwest Mall. That quadrant of the 610 Loop that I live in has probably been the quickest area to develop and the property value is rising quicker than any other area in Houston and the only real negative or eyesore near that community is the Northwest Mall. It's in disrepair; and it's basically been abandoned for years now, to my knowledge. Having something come in and bring industry to that and transform that would help the City of Houston, would help me specifically as a homeowner in the area, and I think it would be an overall benefit for Harris County and the greater Houston area.	Comment noted.
Marshell Williams	2/20/2018	Website	This train project will NOT go through my ranch.i will fight for my homstead, no matter what it takes.Come and take it, remember the Alamo	Comment noted.
Mary Williams	3/6/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and proved less damage to the county long term.	Refer to LU-5.
Paula Williams	12/28/2017	Email	This will become a taxpayer's nightmare. Japan's experience with high-speed rail has proven that unless subsidized - this will not be a profitable endeavor. We the people will end up paying for this. Am not in favor of this in any form or fashion. The use of eminent domain to force people off their land is a violation of our founding father's beliefs. This is a private company and should not be allowed to use eminent domain. This opens the doors for other privately owned companies to use the same principles to take land from the people. Again, not justifiable, profitable, etc.	Refer to ED-1, GN-4.
Paula Williams	2/20/2018	Website	I am writing this letter to the editor as a concerned grandparent, landowner, taxpayer, and someone who is proud to live in the Leon School District. I attended the meeting on Tuesday, January 30, concerning the High Speed Rail system being presented to the public. I was appalled at this meeting to learn a train, travelling in excess of 200 miles an hour, will be coming within 750 feet of the halls our children walk. This is not just one train, but 68 trains a day, every 30 minutes, from 5:30 am to 11:30 pm each day!!! I was told there would be no impact to our children!! As a country person, I say "BULLCRAP". Never once has the school been contacted by Texas Central (TCRR). This will affect our children! The sound vibrations alone will be a constant distraction throughout the day. Imagine trying to take the State Mandated STAAR	Refer to EU-5, NV-1, SC-6, SC-7, SC-8, SS-12 and SS-13. Potential impacts to Children's Health and Safety are documented in <b>Section 3.14.5.2.4, Socioeconomics and Community Facilities, Build Alternatives.</b>

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>tests while your seat is vibrating. Bus routes will be rerouted. Children may have to ride the buses longer. I drove a bus for 25 years, and I know how hard it is on those children who get on a bus at 6:20 am. Imagine adding 30 minutes or more to it. If we need to have sound walls, which will not be determined until additional noise assessments are done in the final design, we will be obligated to meet their aesthetic style, and pay for it. You, as a taxpayer, will be paying for it. When I expressed my concern for the safety of our children at the meeting I was told there would not be any adverse impacts to the children. When I told him that my grandchildren attended the school, and I was not comfortable with it, he stated he has 4 children. I asked him if he would want the train coming that close to their school and he didn't answer me. He just said the studies showed no adverse impacts. Not answering the question told me right there where he stood, he doesn't want it close to his children. I remember when the train derailed in Newby. It was only going around 50-60 miles an hour, and there were probably 20-30 cars that derailed. They were scattered all over the area. In Concord, a train derailed on the Concord Overpass. A fire resulted threatening our homes. That was a terrible sight to see. Just blessed that there weren't any cars going under the pass. Imagine a train going 200 miles an hour and derailling at the school crossing. Those cars head toward the school, which is only 750 feet away. It will wipe out the school!!!! It will kill our children. They are not safe with this train this close. It should have never been considered!! My suggestion was take it down I-45. State already has the land. Use it!</p> <p>Let's talk about electricity. You know it is going to pull a lot of electricity and will require new electrical lines. This will probably require additional environmental analyses that would have to be completed by our electrical providers, ERCOT, Navasota Valley, etc. Oh my there goes an increase in your electrical costs.</p> <p>How much will tickets cost? Hear that tickets will be \$199.00 per person. If you want to go to Six Flags in Dallas from Houston, with a family of 4, you will spend \$800.00. I don't know about you but I had rather have my own vehicle in either city.</p> <p>As a landowner, the value of your land will be going down. Already, they are addressing obtaining federal financial assistance in the form of a loan for the project. Since investors are foreign, they can just default on the loan, and the taxpayer will pick up the bill and the foreign investor will own your land. There's no doubt in my mind who will be picking up the bill for this project, we will!</p> <p>Please contact our Legislators, both State and Federal. Contact newspapers, TV stations, any communication that you can. We must protect our children. We need to stand together!!!</p> <p>I put this in the Jewett Messenger and surrounding newspapers. I contacted all state and US representatives.</p>	
Phil Williams	3/9/2018	Email	<p>Please note my opposition to the above referenced proposed bullet train between Dallas and Houston. I would not be opposed if this were a truly private venture; in fact, I would not mind if there was some public involvement in the development of the terminals. But, this project will require the forced sale of private property through government eminent domain. Therefore, it is not a private enterprise.</p> <p>Moreover, government approval through the permitting of this project is effectively giving the railroad's owners a protected monopoly on rail transit between these two cities.</p> <p>We currently have scheduled reliable, affordable, frequent, and fast transportation options from two airports in both cities. And, given the large geographic areas of both cities, point-to-point vehicle transportation in most cases will take no more time than a trip on this proposed bullet train.</p> <p>Additionally, I question the economic viability Of this project, which has an estimated initial capital cost Of \$16 billion. As we have seen in California, these estimates will likely increase; and, consequently, the owner's of the railroad, will seek public funding and subsidies, which will be paid by the taxpayers. More cost effective options would be available through pooled vehicle ride sharing, which would be forced to compete with this government subsidized service.</p> <p>For these reasons, I am opposed to this project.</p>	Refer to BA-4, BA-12, ED-1, GN-2, GN-4, NE-1, PN-3 and SC-22.
Phillip Williams	3/9/2018	Website	<p>To whom it may concern: Please note my opposition to the above referenced proposed bullet train between Dallas and Houston. Sarah Williams	2/6/2018	Email	Train is a terrible waste of taxpayers money. This train was not voted on by taxpayers and will end up costing us billions of dollars that could be better spent improving our roads and highways. Not to mention the illegal land grab that is involved. The number of people that would actually ride the train on a regular basis is minimal. Also the excessive sound and danger to farm animals and residents is unacceptable. Sci Fi should stay that way. There is a reason that we do not all have flying cars. It would not make any sense to implement this destructive plan.	Refer to ED-1, GN-2, GN-4, SS-1, NR-1, NV-1 and SS-1.
Shirley Williams	3/5/2018	Letter	I write to comment on the high-speed train between Dallas to Houston. The proposed route cuts my family farm in half damaging farming operation and decreasing its real estate value. I am an 83 year Old widow whose deceased husband bought this land in the to provide living funds for his widow. I am opposed to this route which greatly damages the land's value. Respectfully submitted, Shirley W. Williams,	Refer to LU-11.
Shirley W Williams	3/5/2018	Website	I write to comment on the high speed train between Dallas to Houston. The proposed route cuts my family farm in half damaging farming operation and decreasing its real estate value. I am an 83 year old widow whose deceased husband bought this land in the 1960's to provide living funds for his widow. I am opposed to this route which greatly damages the land's value. Respectfully submitted, Shirley W. Williams, Executrix for David W. Williams, Jr. Family Trust	Refer to ED-2, LU-7 and WW-1.
Stanley D. Williams	2/25/2018	Email	I would like to put in writing our objection to the proposed High Speed Rail project between Houston and Dallas. My wife and I are residents of Grimes County south of Anderson. This project does not tie together two cities that have rail infrastructures in place such as seen in New York City or Washington, DC. An HSR traveler would deal with the same problems as flying, i.e. Parking, Security, Rental Cars so in my opinion the commute time is not significantly different than flying. We read one counter proposal for a more statewide network extending from San Antonio along the I35 corridor to the DFW metroplex with a spur from Houston to San Antonio. It is easy to see this makes more sense for the state of Texas. Why not follow the I45 corridor that already supports commuters between these cities? It must surely be because it is cheaper to run through the open countryside and much easier to work out the problems. The I69 /Trans Texas Corridor tried to push this through also and met huge opposition from Texans all across the state. Well this is where I moved to get away from the city. I live 5 miles south of Anderson - a city with a heritage of travelers who stopped at Fanthorp Inn in the 1800's as they traveled through the hills around here by horse and wagon. Undoubtedly it was a good place to rest and enjoy the hilltop view of the surrounding countryside. Today on nice weekends we always see motorcyclists, bicyclists, and car clubs coming through enjoying the winding roads. You can easily transport back in time as you look across the valleys and see the cows grazing. Soon we may have an ugly view of a elevated train which will be hugely visible. When I visited one of the early open discussion meetings I asked one of the representatives why they couldn't follow one of the north/south rail routes and was told that at 200 mph the High Speed train couldn't have curves in the route. After thinking on this for a few weeks it came to me that they are not going to allow up and down elevation changes for the same reason. I'm sure they aren't planning tunnels so they will have to elevate the tracks across all the valleys. Only when they get it built will the public realize what an ugly site this will be in the beautiful hills of Texas. Our house is 1 1/2 miles from the proposed route here in Grimes County and the loss in property values will be huge but the installation of something so ugly will be sad for this pristine area of Texas. My wife agrees with this objection as well.	Refer to AS-1, BA-2, BA-7, BA-8, BA-9, LU-14, PN-3 and VA-1.
Steve Williams	2/24/2018	Website	I am against he train destroying the Morgan Legacy Farm located near FM 709 and 3194. I believe a move to the north, paralleling existing power lines would be much better for the environment and save a unique property which cannot be duplicated. The suggested route travels in the highest elevations which will likely create significant watershed issues, resulting in a loss of significant migratory waters. Many individuals including first responders, nurses, physicians, students and others enjoy the use of this property. A move to the north of the existing high power lines would have less impact on the environment and exact less damage to the county.	Refer to LU-5.
Mark Williamson	2/6/2018	Oral	I put up my name - my hand earlier. I came in the room -- I'm sorry. My name is Mark Williamson. I'm a property owner in Houston. I was unable to make the Houston meeting, so I came here for information. I came in the room generally in favor of the project. I've heard a lot of people tell me how it's being done wrong, and I agree with many of the ways which it's being done wrong. I disagree with many of the ways in which it's being done wrong. I think you've missed the point on a number of points, but you've caused me to seriously rethink some things. I do object to the way you are attacking these gentlemen. They are -- their job is to protect our interests, not to protect the railroad company's interests. And you may disagree with whether they're doing their job right, but that's the job they're here for: Not to ram this through, but to enforce the federal regulations to protect all of us. As I say, you've given me a lot more to think about, and I'm going to be running some meetings in Houston in the next few days that are going to be run a little differently because of the things I heard tonight.	Comment noted.
Joseph Willingham	2/5/2018	Oral	My name is Joseph Willingham and I'm completely against this train going through. I'm not a landowner. My father owns land and he was planning on being here today but unfortunately he's in a coma in a hospital right now. Day before yesterday he had a major heart attack. So pray he pulls through on that. But I have been listening about this train for a long time and absolutely hate it because of two words; eminent domain. And simply put, end definition, legalized theft. These people can build this train unless, again, eminent domain. And the state has already told them, get lost. And now they're saying, well, we won't go through them, we'll go above your heads and go federal. I say we take	Refer to ED-1, ED-4 and RF-2.

			<p>our hats off and say, hey, don't mess with Texans. Also something else. My father owns property up in Jewett and Leon County. I love that place more than any other place in the world. I grew up there hunting. My grandpa used to own property there and he taught me hunting, my dad taught me hunting. I love hunting. Hunting is practically my life. Now, I heard about this train coming through and I heard it was going to cut straight through our property and I was devastated. And I knew the value of that property. It's gone. If that train came through, it's gone. Now, today I found out that the train, the preferred route, not all the routes, but the preferred route is going to be a little less than two miles away. Am I happy? No. They're still trying to put the train through. It's not right. I may be born in the generation that is going to be some of the dumbest people in American, but even I am smart enough to know, no. And this train is coming through and I don't have data to support this and I can't find anything online about this. But I've heard this from at least two sources stating that at least half a mile to a mile, and I just want to stress anybody out there a hunter like me? Say goodbye; you're not allowed to use your firearms within but I have heard that from at least two sources. So all you hunters, all you people who want to defend your homes, good bye to that. All those who own mineral rights, where these places are going through, think about that. They're taking that away from you, no matter what deed you have. It's not right. It's theft. Complete and utter theft. And all the Texans I have spoken to are against this and I say we say get lost.</p>	
Becki Willis	2/20/2018	Website	<p>This High Speed Disaster is a waste of money, resources, and our precious Texas land. It benefits NO ONE along the 240 mile route. The sole stop will only benefit only one county, and only travelers to/from Dallas. It would be closer (and much cheaper) to drive into Houston from Grimes County. Honestly, who can afford a ticket to ride on this train? And can TEXANS afford the ultimate price? Japanese investors, loss of grazing and production lands, interruption to the tranquility of the countryside, interruption to lifestyles and existing roadways, strapped local emergency services when the unthinkable happens, schools with our precious children inside, just yards from the intended path... the list is endless. Think of the natural resources gobbled up by the rail lines. Do you honestly think businessmen will ride the shuttle on a daily basis, when most business is now handled on-line and over the phone? Do you think ordinary workers can afford to live in one city and travel to work in the other? Do you honestly envision families traveling on this train? Aside from an occasional novelty trip, how many times do you think the average Texan will actually use this train? Now think of those same Texans, and how many times a day they eat beef, pork or chicken, how many times a day they use fresh water, how many times a day they wear cotton and eat grains and vegetables. Take way our farm lands, and you take away from all Texans. Ask yourself. Is a High Speed Disaster, driven in part by foreign investors, really worth the price?</p>	Refer to GN-2, NE-1, NE-9, PN-3, SC-3, SC- 8, SS-18, SS-23 and SS-26.
Betty Willis	2/6/2018	Letter	<p>Many Of the reasons for a NO BUILD have not been addressed in this DE'S. Applicable Noise Measurements and Science Omitted by the DEIS (Ref: DEIS Appendix E Combined Tech Memos Set 1 of 2; Pgs. 4-8). TCRR has been asked this question regarding the maximum level of noise a number of times at Open Houses, Public Informational Forums, and in writing without a single response. Question: What is the maximum Noise Level in dBA of TWO trains, NOT ONE, passing each other at any point along the HSR Route while traveling in opposite directions on adjacent tracks? The DEIS only covers the Noise impact of One Train in One Direction (87 dBA at SC).</p>	Refer to NV-1.
Betty Willis	2/6/2018	Handwritten	<p>I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans.</p> <p>Many of the reasons for a NO BUILD have not been addressed in this DEIS. Significant changes to the magnitude, congestion, and make-up of Traffic Flows in small rural areas as a result Of newly built Construction Sites on major Road arteries, Road Closures, Road Modifications, and Rerouting Existing Roads (Ref. DEIS Appendix F TCRR CONSTRUCTABILITY REPORT: sect. 4.2, pg. 23;sect. 5, pg. 27).Question: What is the Quantified impact of increased Traffic in general, Damage to Existing Roads, and Traffic Congestion over and above the current rural environment, as the result of Project construction worker travel, equipment and raw material hauling, particularly around all of the Construction Sites and Staging Areas along the route, congestion associated with permit Loads, traffic associated with the road closures and road modifications or rebuilding. and that associated with construction of the HSR?</p> <p>I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.</p> <p>The general environmental review has been totally inadequate for a project that will create a major east-west barrier over most Of Texas. Such major projects deserve a long term, critical look, not to be hurried by the demands of Japanese financiers or corporations or their local skills.</p> <p>Safety Concerns — Look the Other Way and pray?</p> <p>Let's look at the recent track record of safety on America's rails. The main operator of passenger trains, Amtrak, has had a miserable record in the last year with fatal accidents spread across the country from South Carolina to Washington State. Apparently the Federal Railroad Administration is unable to properly oversee the existing technology and operators. Who will oversee the Japanese Bullet Train, the same group that has been doing such a good job with Amtrak?</p> <p>Who will operate the Japanese trains? Who will maintain the track and electronics? Will these workers be unionized? Who will be the safety</p>	Refer to BA-4, BA-9, ED-1, ED-2, GN-2, GN-3, GN-4, GN-6, PN-3, SS-3, SS-9, SS-13, SS-18, TC-3, TC-6, TR-3, TR-4, TR-6, TR-7 and VA-2. FRA is qualified to oversee safe operation of the Project as the federally designated agency for intercity rail safety oversight. TCRR must comply with the FRA-mandated Roadway Worker Protection Program, ensure employees have received the appropriate level of training for their position, and document all required safety training events as part of its safety program. The Paris to London line is a service crossing international borders and is subject to different regulations than applicable within the United States. As such, it does not reflect the screening and boarding requirements of the proposed Project.

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>regulator? What experience does that regulator have overseeing a completely new technology? The track record on overseeing 150 year old technology isn't good, why will it be better on this Japanese imported technology?</p> <p>Is the Federal Railroad Administration (FRA) going to certify training of maintenance and operating personnel? What is FRA's qualification to do so? Will the State of Texas have a role instead, since the entire railroad operates within the one state? Where will the State of Texas get this expertise? How much will it cost?</p> <p>If FRA certifies safety, will the Japanese bullet train workers have the same job protections as Amtrak workers? Who will write the insurance policy that covers an accident at 200 mph? How long will it take medical emergency teams to reach rural sections of track in the event of a catastrophic crash? (There is no other type with High Speed Rail!)</p> <p>Market Study — There's NO public Need or Benefit</p> <p>The market studies are flawed and designed to show a result that those who paid the consultants wanted. That's the way it works in the consulting world. The ridership and pricing is virtually opaque and doesn't take into effect the real world in which the Japanese bullet train would like to operate. Once those market studies prove just plain wrong, then all the apologists and Japanese financiers will be coming to the federal and state government asking for money out of our pockets, which they will call subsidies. If you want to keep the government out of your pocket, then don't support the Japanese Bullet Train. Here are some of the problems with the market for a bullet train.</p> <ol style="list-style-type: none"> <li>1. Competition is already highly developed in the Houston — Dallas corridor. There are different price points offered and different speeds available.             <ol style="list-style-type: none"> <li>a. The Bullet Train will take two hours at best. The Japanese bullet train PR people have lied about the speed they will attain. They talk about 205 MPH. By comparison, the French TGV high speed trains only achieve these kinds of speeds when they are stripped down, their weight is reduced, and they make runs intended to set speed records. Usually they run a maximum of about 140-160 MPH. If the Japanese bullet train that will slash up rural Texas runs at the same speed that the Japanese bullet trains operate in Japan itself, the Houston-Dallas run will take at least two hours, not the 1.5 hours used as a benchmark in the market study. That's a big difference and this claim could only be described as fraudulent.</li> <li>b. Airline competition. Prices are highly competitive, with both Houston and Dallas served by multiple carriers and two airports in each city. It's actually more competitive than between Washington and New York, which is served by only one shuttle between two airports. A bullet train will never match the speed of the airlines.</li> <li>c. Bus competition. The advent of the Big Bus and its competitors offer an attractive option with WIFI and comfortable seats at a dirt Cheap price. The timing is about four hours, similar to driving, and is more competitive since it can effortlessly develop service to locations around the cities of Dallas and Houston, which is impossible for the Japanese bullet train.</li> <li>d. Driverless Cars. The era of driverless cars will arrive long before the Japanese bullet train would ever be built, but it will provide a powerful competition for such a bullet train. Indeed driverless cars perform at their maximum on interstate highways due to the uniform markings on those highways. Yet the market study remains silent on this major future competition source.</li> <li>e. The time comparison ignores the requirement for high security on these enclosed high speed trains because doing so would kill their comparisons. The high speed train from Paris to London now requires arrival at the station one hour prior to departure time. Security is similar to airport security. The inevitable direction in high speed train security is to add layers of security (and thus time delays) to the boarding process. We would have no less security delays here in Texas.</li> </ol> </li> <li>2. Most importantly, the comparisons of elapsed time for trips between Houston and Dallas are a fairy tale.             <ol style="list-style-type: none"> <li>a. There are only about five people who will ever need to travel between the Dallas and the Houston stations without going any further. We are not generic people. We go from one point to another, and they are rarely train stations.</li> <li>b. Example: Someone in Pasadena, a southeastern suburb of Houston, will have to drive to the station at Northwest Mall, at Interstate 610 and Hwy 290, park their car (and pay for parking) and then reverse the process by renting a car in Dallas to go to the Dallas suburb of McKinney. This will make the entire elapsed time for a trip on the Japanese bullet train longer than simply driving from Houston to Dallas. Not to mention that the Pasadena traveler will be able to leave and arrive at whatever time desired, not wait on a train schedule.</li> <li>c. Houston and Dallas have very limited mass transit options and that will remain the case for the foreseeable future. High Speed trains are useful only when they connect to a well-developed intermodal train and mass transit system, which is not the case in Houston and Dallas, a single tram or two not withstanding.</li> </ol> </li> </ol>

			<p>3. Conclusion: The economic justification for this bullet train and its route is nonsense.</p> <p>Other Countries are Not Running to Build More Bullet Trains</p> <p>Japan and France are the two competitors in the high speed rail business and they have built more high speed rail lines than any other countries. Most serious studies have indicated that only two lines in the world pay for their operating costs, the Tokyo-Osaka route, and the Paris — Lyons route. All the others are losers, picking the pockets of tax payers.</p> <p>The challenges are too short a distance, like between Houston and Dallas, which leaves them vulnerable to car travel, or too long a distance like between Paris and Marseilles, when airplanes win the nod of the consumer. The optimal distance seems to be about 312 miles, not the 240 miles between Houston and Dallas. Moreover, it is probable that the profitability of the Tokyo-Kyoto route and the Paris — Lyons route are inflated because they connect seamlessly with trains on to other parts of the Country. That's not ever going to be the case with the Houston-Dallas route, not matter how much wishful thinking a Japanese bullet train backer can muster.</p> <p>Indeed, the French equivalent of the U.S. Government's General Accounting Office (the Courdes Comptes) published a paper in 2017 arguing to end the expansion of the French high speed rail system, since it is not meeting its projections and the subsidies required are digging deep into the pockets of the French taxpayer. I will note that the report indicated the problem is exacerbated by the addition of intermediate stops, which slow the trains. The stop in the Brazos River Valley being a perfect example of a stop which has no perceptible economic justification and will simply slow the trip between Houston and Dallas.</p> <p>The economists Albalade and Bel have written the definitive paper with lessons on the failures of High Speed Rail around the world. It should provide a sobering cold shower for the giddy cheerleaders Of the Japanese bullet train.</p> <p>The danger for the federal and Texas governments is that this proposed Japanese Bullet train will never meet its revenue projection because it never can. Eventually the Japanese bankers, having used rural Texas as their technology testbed, will tire Of subsidizing the twenty people per day who will use the Japanese bullet train and they will pack up and go home. At that point the apologists will come to the legislature and the Congress begging for money out of taxpayer pockets to subsidize this fiasco. Save time and say NO now.</p> <p>Lack of American Content</p> <p>The Japanese bullet train depends on Japanese technology and Japanese manufacturing. It's not a Texas train, it's Japanese. Federal law in the transportation sector looks to maintain our domestic, good American capability and not put our future in the hands of foreigners. As a result it looks to American content. Only if you believe in fairy tales, all of the time, can you find the American content in their project.</p> <p>This Administration has talked about infrastructure, but it is American infrastructure, not Japanese that the President has highlighted.</p> <p>Don't Steal our Land for Japanese Profits</p> <p>The only way the Japanese bullet train works is to steal the land of Texas farmers and ranchers using eminent domain. But this project is not an economically viable project and therefore does not meet the standard Of "for the common good" and therefore cannot be allowed to use eminent domain.</p> <p>The Japanese bullet train and its local apologists could have proposed a route right up Interstate 45. It links Dallas and Houston almost magically. Indeed in the Los Angeles basin, they have built a railroad into the San Bernardino freeway. There's no technological reason you couldn't do so on Interstate 45. But it would have been more expensive.</p> <p>Stealing land is just barely permitted if it's for the common good under the eminent domain Statutes. And only for the common good. But this Japanese bullet train is for the good of Japanese corporations and Japanese banks, not for the good of Texans. There is no widespread economic or social value.</p> <p>An entity such as the Japanese bullet train cannot be allowed to steal land when it's not a viable entity and not a project that can make any economic sense. Even without paying market rates for the land, this project is doomed. If it was such a good deal, such a sure thing, the Japanese would be out buying land at market prices, but instead they are insisting on eminent domain.</p> <p>There is also a silly theory that any entity that calls itself a railroad is entitled to use eminent domain. In that case, any two people could get together, incorporate and declare themselves a railroad, and plow a a right of way through the front nine holes of the River Oaks Country Club in Houston. Such a theory has no merit and deserves to be rejected along with the scoundrels making such noises.</p>	
Betty Willis	2/6/2018	Handwritten	<p>I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route.</p> <p>Many of the reasons for a NO BUILD have not been addressed in this DEIS. "NO Build Alternative", (Refl DEIS Main Text I, Sect. ES.8, pg. 8). The NO Build analysis totally skipped the huge increase in Impacted Acreage from 3000 acres as communicated in writing by TCRR to 8000 acres has not been addressed by the FRA at all nor was it a part Of the NO Build Alternative Analysis. TCRR'S current plan has caused the Closure, Rerouting, Modification, and Rebuilding over the HSR of many Private and Public Roads and increased the Road ROW land required without</p>	Refer to BA-3, LU-14 and TR-8.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			any ACCOUNTABILITY FOR TCRR'S Earlier Claims. The FRA simply glosses over those huge changes. Why is that? What about the many Public Safety considerations that the FRA has Glossed Over (Increased ER Times, Safety Of Traffic Congestion around Construction Sites, Lane closures, rerouting roads, road closures and more public Road Travel required just to get around from point A to point B due to the HSR)? The FRA does NOT provide adequate documentation for elimination Of the NO Build Alternative. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. Many of the reasons for a NO BUILD have not been addressed in this DEIS. "NO Build Alternative". (Ref: DEIS Main Text I, Sect. ES.8, Pg. 8). The FRA does NOT provide adequate documentation for elimination Of the No Build Alternative. No Build is actually the Correct Answer. First, the FRA DEIS Understates the Damage to the Public and Property but Overstates/Assumes the HSR Need. Second, TCRR Underestimates the Project Cost and Overestimates the Ridership. The FRA never considered the Reason Foundation's Analysis (which clearly proved this project WILL FAIL) nor has it been mentioned in the FRA DEIS at all. That is NOT AN OBJECTIVE UNBIASED FRA DEIS ANALYSIS. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to BA-6, GN-2, GN-3, NE-9 and PN-3.
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. Many of the reasons for a NO BUILD have not been addressed in this DEIS. "NO Build Alternative". (Ref: DEIS Main Text I, Sect. ES.8, Pg. 8). Here are reasons the "NO Build Alternative" MUST be reconsidered by the FRA. First, the Claims by the FRA on 1-45 Transportation Predictions, Traffic Congestion, Safety on 1-45, and Transportation Alternatives are Not Adequately supported with Detailed Facts. In fact the opposite cases have been made with much more Facts. Second, the "Public Need" has never been established in the DEIS by the FRA. Third, "Public Need" must clearly be established due to the huge negative Impact Of Landowner's property, Homes, Cemeteries, Livelihood, Existing Public Roads, and County Maintenance revenues that has not been adequately covered by the FRA DEIS nor has it been Quantified by the FRA like the Other things that support the HSR have been Quantified for comparison purposes. The FRA's DEIS is simply a "Thumb on the Scale for TCRRS Benefit" without the Facts to back it up. I propose that the only viable alternative would be that the NO BUILD option be Chosen in the final Environmental Impact Statement.	Refer to ED-2, TR-8 and TR-10.
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. Many of the reasons for a NO BUILD have not been addressed in this DEIS. "No Build Alternative". (Ref: DEIS Main Text I, Sect. ES.8, Pg. 8). The public is NOT going to accept from the FRA general statements that support the HSR without the FACTS to back it up. The appropriate level of Detail to support the FRA's claims about the No Build Alternative simply do not exist in the DEIS. Rationale is included in another Comments Page on this Subject. due to space limitationsThe FRA also mentions there would be no improvement of Safety on 145 with the No Build Alternative. The FRA must Quantify that claim BEFORE it can be used to support the FRAS conclusion that the No Build Alternative is Not an Option. Therefore, the FRA does NOT provide adequate documentation for elimination of the No Build Alternative.	Refer to BA-6.
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. Many of the reasons for a NO BUILD have not been addressed in this DEIS. "No Build Alternative". (Ref: DEIS Main Text I, Sect. ES.8, Pg. 8). The FRA does NOT provide adequate documentation for elimination ofthe No Build Alternative. First, any claim regarding this Project being a Traffic solution or Congestion Relief has been Contradicted by TCRR many times and we have that documented. TCRR has stated this Project will NOT solve any perceived Traffic issues, particularly near the big cities. Second, the FRA must show more data regarding future estimates Of traffic volume. Researching past predictions, today the traffic volumes of 145 have in no way even come close reaching those predictions, in fact, it has only reached roughly one half of those predictions. Third, the FRA simply makes the statement that No Build would provide No Alternative Transportation Needs. Where is the FRA Proof statistically the "NEED" exists as no data is shown by the FRA? I propose that the only viable alternative would be that the NO BUILD option be Chosen in the final Environmental Impact Statement.	Refer to AQ-2, BA-6 and PN-3.
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route.	Refer to SS-19 and TR-6.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			Lack of a Credible Comprehensive Risk Management System by the FRA and TCRR AND Emergency Response Planning for Public safety (Ref: DEIS Appendix F TCRR FDCE v7 REPORT: sect. 3.12, Pg. 49 of 199; sect 4.1, Pg. 62 of 199; Sect. 4.2, Pg. 63 of 199; Sect. 4.4, pg. 64 of 199). Comment: If the FRA is responsible for "RR Safety", it is inconceivable that the FRA is considering giving a Private Company to Construct and Operate an HSR a Green Light without the application of a Comprehensive Risk Management System, particularly since the Lives of the Public hinge on its Safe and Secure Construction and Operation. That sort of lack of credible Oversight by the FRA, a Federal Government Agency responsible for "RR Safety", could easily be considered "Negligent" to say the least. I propose that the only viable alternative would be that the NO BUILD option be Chosen in the final Environmental Impact Statement.	
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. Lack of a Credible Comprehensive Risk Management System by the FRA and TCRR AND Emergency Response Planning for Public Safety (Ref: DEIS Appendix F TCRR FDCE v7 REPORT: Sect. 3.12, Pg. 49 of 199; Sect 4.1, Pg. 62 of 199; Sect. 4.2, Pg. 63 of 199; Sect. 4.4, Pg. 64 of 199). Question: Were any Risk Management Systems applied to Emergency Response for the HSR if there is a shut down or emergency situation in the middle of nowhere? Question: What Risk Management System has been applied or what Emergency Response Planning been has done to handle High Elevation Rescue of the Public in case of a shut-down or Incident in the middle of nowhere during operation? Question: The same question would apply to the Construction Phase also? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to SS-19. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Lack of a Credible Comprehensive Risk Management System by the FRA and TCRR AND Emergency Response Planning for Public Safety (Ref: DEIS Appendix F TCRR FDCE v7 REPORT: Sect. 3.12, Pg. 49 of 199; Sect 4.1, Pg. 62 of 199; Sect. 4.2, Pg. 63 of 199; Sect. 4.4, Pg. 64 of 199). Question: Has a Risk Management System been applied to the Security of the HSR during Construction and Operation? Question: Since the FRA is responsible for RR Safety, including that of the Public, and would be the Federal Agency to allow TCRR to Operate a RR in the Future with the FRA's Oversight, why is there no mention in the DEIS of Risk Management systems being applied to Public Safety or Security? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to SS-7 and SS-19. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .

My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans.</p> <p>Many of the reasons for a NO BUILD have not been addressed in this DEIS. Business Ethics, Public Trust, and TCRR Competence Level (Ref: Nothing In the DEIS on This Issue). The Public has documented a number of misleading or false answers to questions or statements by TCRR about the HSR for almost three years. I suggest the FRA look seriously at all of the DEIS topics that the FRA has glossed over, leaving many of us the impression of minimizing any negative evaluation results of TCRR's Plan. Beware FRA, TCRR based on its track record for 3+ years, will likely not fulfill many of the commitments included in the DEIS and when they don't, the FRA will be held accountable. There are also questions about TCRR's Unethical Actions during the collection of Field Data and it looks like the FRA has NO Problem Implicating themselves in potentially illegal activity against the very people they are being paid to protect?</p> <p>I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.</p>	<p>Refer to BA-6, NE-1 and NE-8.</p> <p>For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b>. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans.</p> <p>Many of the reasons for a NO BUILD have not been addressed in this DEIS. Business Ethics, Public Trust, and TCRR Competence Level (Ref: Nothing In the DEIS on This Issue). TXDOT was unwilling to work with a Local County Government body regarding planning for the HSR, the Waller County Regional Planning Committee. This was not an Advocacy group, but a true County Government body. The County sued TXDOT and it was found during the court case that the FRA had told TXDOT NOT to work with this local Government body, and not attend the meetings. Waller County won the case, TXDOT then appealed, and lost the appeal. Question: Did the FRA Break Federal Law by telling a Texas State Government Body not to work with a County Government Body and not to attend the meetings? Question: Why would the FRA not want input from a County Government Body? Question: Since the Public is full aware of this case, does this not destroy the Public Trust in what the FRA has done regarding the HSR DEIS?</p> <p>I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.</p>	<p>Refer to PI-1.</p> <p>For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b>. 			capability to Operate a RR or not if TCRR has misled the Public on many issues as compared to what the FRA has included in the DEIS? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	<b>Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Water Supply for Use at All Construction Sites and During Construction All Along the HSR Route (Ref: DEIS Appendix F TCRR CONSTRUCT ABILITY v4 REPORT: Sect. 7.1, Pgs. 32-33 of 34). Comment: The FRA Must Quantify the Water needs over 5 years of Construction and reconcile that with the State or County Water Conservation agencies to determine the need for permits or approvals for the use of Source Water. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to WW-6. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Water Supply for Use at All Construction Sites and During Construction All Along the HSR Route (Ref: DEIS Appendix F TCRR CONSTRUCTABILITY v4 REPORT: Sect. 7.1, Pgs. 32-33 of 34). Question: Who in the public will be negatively impacted by the large use of water by the HSR project? Comment: Due to water conservation efforts in Texas, the public has been under more regulatory limitations associated with drilling new water wells vs. the use of available surface water. Because of the huge amount of road work, and the extremely large size of many of the Construction Sites, there will be a need for an enormous amount of water for keeping dust levels to a minimum as required in the air quality restrictions. The DEIS simply states that Water will be made available at the construction sites. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to WW-6. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Water Supply for Use at All Construction Sites and During Construction All Along the HSR Route (Ref: DEIS Appendix F TCRR CONSTRUCTABILITY v4 REPORT: Sect. 7.1, Pgs. 32-33 of 34). Question: Will water be used almost constantly during dry times (Almost all the time in Texas) to water all of the temporary dirt roads along the HSR construction route and at road modifications? Question: What is the volume of water usage for this project, including during Construction and how does it fit into Texas' focus on water conservation programs? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to WW-6. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . 			and Demand Chains, and the Negative Impact on Small Rural schools ISDs? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	<b>Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Additional Traffic and Congestion Due to permit Loads (Ref\8226 . DEIS Appendix F TCRR CONSTRUCTABILITY REPORT: Sect. 3, Pg. 22 of 34; Sect. 4, Pg. 23 of 34; Sect. 5, Pg. 27 of 34). Question: What is the quantity of Permit Loads the public should expect being added to their traffic flow over and above the norm prior to the execution of this Project? No figures on Permit Loads is included in the DEIS? There are Construction Sites all along the route that will be used for staging of materials and for the construction Of Pre-Cast concrete structural components. Many of those loads going to the Construction Sites as well as constructed structural components are very large likely qualifying as Permit Loads that must transverse existing roads to transport them to the HSR installation site. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to NR-5, NR-6, TR-6 and TR-7. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Applicable Noise Measurements and Science Omitted by the DEIS (Ref: DEIS Appendix E Combined Tech Memos Set 1 Of 2; pgs. 4-8). Question: Since TCRR and the FRA are aware that the Route Selected goes through or adjacent to many Subdivisions, Homes and Businesses, WHY has not the FRA DEIS set out specific specifications for the use of Noise Abatement Structures with minimum standards so TCRR is therefore required to put up Noise Abatement should those specifications not be met vs. leaving it up to TCRR once detailed Design is completed? For this issue, Preliminary Design with a Known Route and Known Noise Level is all that is needed to determine the location needs for noise abatement Specifications. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to NV-10. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Applicable Noise Measurements and Science Omitted by the DEIS (Ref: DEIS Appendix E Combined Tech Memos Set 1 Of 2; Pgs. 4-8). TCRR has been asked this question regarding the maximum level of noise a number Of times at Open Houses, Public Informational Forums, and in writing without a single response. Question: What is the additional Noise impact of the additional Scientifically Proven "Slapping Sound" as a result Of the aerodynamics Of two lead air flows from each train colliding with each other? The FRA Noise study MUST account for the Scientific Proven Aerodynamic "Slapping Sound". I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to NV-1. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DES. Road Closures and Modifications (Ref: DEIS Appendix F TCRR CONSTRUCTABILITY va REPORT: sect. 6.5, pgs. 29-30 of 34; Also Appendix F TCRR FDCE REPORT; Appendix C, pg. 1 of 14): File 3, TEXT III, Tables 3.11). TCRR has stated in a Public Forum that the only road going over the HSR is Beltway 8. Well, the DEIS shows 66 Private Road Closures, 43 Private Roads Rerouted, 161 Private Road Crossings, 1 Public Road Closure, 139 Public Roads Rerouted, 463 Public Road Crossings, and many roads, FM and CR. going OVER the HSR vs. the Viaduct going over the roads to minimize destruction of our road system. DIES states existing private property access will be provided as a part of purchase of property as a part ofthe ROW construction or New access if it is PROPOSED as part of the ROW construction? Question: What if it is NOT proposed, meaning TCR actually gets to decide? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to ED-2, TR-8 and TR-10. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>

			reconstructed. As any Road built along the HSR would become a public Road that must be fenced off due to Liabilities as well as keeping animals in the Landowner's property, this will negatively impact the free movement of equipment and animals even with the use of a Viaduct. TCRRs Advertisements of a Viaduct providing this free movement was FALSE. Animals would have to moved across a Public Road. Question: Will TCRR provide Culverts in any ditches alongside the access roads and Fence Gates as well as road shut-down/signaling methods at various locations so animals can be moved across the public Roads? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	<b>Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife.</b> Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many Of the reasons for a NO BUILD have not been addressed in this DEE. Road Closures and Modifications (Refr. DEIS Appendix F TCRR CONSTRUCTABILITY REPORT: sect. 6S, pgs. 29-30 of 34; Also, Appendix F TCRR FDCE v7 REPORT; Appendix C, pg. 1 of 14): File 3, TEXT lit, Tables 3.11) Question: Documentation exists TCRR told the public that they only needed around 100" ROW Width for the HSR. In many places that has increased to 400' at a minimum. Question: Is it not the case, after looking at all Of the HSR Route Maps ROW, the significant increase of ROW might be also a significant part Of that increase in Impacted Acreage? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to BA-3, LU-14 and TR-8. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife.</b> Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Road Closures and Modifications (Ref. DEIS Appendix F TCRR CONSTRUCTABILITY REPORT: Sect. 6.5, Pgs. 29-30 of 34; Also, Appendix F TCRR FDCE v7 REPORT; Appendix C, pg. 1 of 14): File 3, TEXT III, Tables 3.11) Question: viii. There exists documentation of TCRR stating the Impacted Acreage for the HSR would be around 3000 acres. The recently released DEIS shows around 8000 Impacted Acreage. The FRA should HAULT ANY FURTHER WORK on the DEIS until there is a clear understanding where all the Increases took place. Question: Is it not the case. after looking at all the Road Modifications including those reconstructed Over the HSR, that the significant increase Of new Road work ROW is a significant part Of that increase in Impacted Acreage? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to BA-3 and LU-14. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife.</b> Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Betty Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Regarding Emergency Response times during Construction of the Dallas to Houston HSR, the FRA DEIS Summary Statement in File TEXT III, 3.16-24, is "Impacts to Emergency Response (ER) Times are NOT Anticipated to be Significant". Question: Since the FRA study does indicate an increase in ER times, is even ONE Single Public Fatality due to Increased ER Times Acceptable by this FRA DEIS? Question: Since this FRA DEIS is not based on traffic modeling yet of the traffic increase, particularly during Construction with many Roads under construction ALSO, then how can the FRA with any credibility or accuracy make a claim that "Impact on ER Times is not anticipated to be Significant?" I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to SS-23. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife.</b> Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Betty Willis	2/6/2018	Website	Many of the reasons for a NO BUILD have not been addressed in this DEIS. Road Closures and Modifications (Ref: DEIS Appendix F TCRR CONSTRUCTABILITY v4 REPORT: sect. 6.5, pgs. 29-30of34; Also Appendix F TCRR FDCE v7 REPORT; Appendix C, pg. 1 of 14): File 3, TEXT III, Tables 3.11). A number of FM and CR roads all across the counties being closed and reconstructed with an overpass Over the HSR? Question: Who is to pay for maintenance of these overpasses that did not exist before this private plan ? Question: Who will pay for the future maintenance of the Access Roads built alongside the HSR route that will be used to get around many of the road closures and modifications? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to TR-7 and TR-8.
Betty Willis	3/5/2018	Letter	I am a resident of Grimes county, Texas. I am lodging an between Dallas and Houston and sited in the FRA DEIS published in December 2017. My husband and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity Of Our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from Our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. The proposed route for the high-speed rail cuts through the north end of one of the major wetlands in the region where duck hunting is vital	Refer to NR-1, NR-2, NR-6, RF-2, VA-1, WW-1 and WW-2.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			to the economy and where water fowl and their hunting will be diminished, if not destroyed by the high-speed train. Protection Of wetlands and wildlife is in the highest interest Of Texans. The undoubted result Of this high-speed rail will be that dues to lack Of funding through ridership Texans will be paying to ruin their own pristine lands that wildlife enjoys.	
Betty Willis	3/5/2018	Letter	I am a resident of Grimes county, Texas. I am lodging an between Dallas and Houston and sited in the FRA DEIS published in December 2017. My husband and I lived and worked in Houston for 37 years before building our retirement home in the country from the noise. congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from Our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. The Houston area has had a tremendous flooding problem in the last few years. The flooding also impacts the rural areas surrounding Houston - namely Grimes and Waller Counties. The route for the 11 h for the train and/or roads on the route. even more than we now experience. This will be devastating for our homes. Communities, future development and property values. The "No Build Alternative" is the only choice for the citizens of Texas.	Refer to FP-1, NR-1, VA-1, WW-1 and WW-2.
Betty Willis	3/5/2018	Letter	I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My husband and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity Of Our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact Our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. The proposed high-speed rail route goes right through established communities in northern Waller and southern Grimes counties. To name a few, these communities are Saddle Creek Forest, Plantation Forest, Oak Hollow, Remington Forest, Six Pines and Kickapoo Preserve. For all these developments the high-speed corridor cuts right through the development and destroys the economic viability Of them and the value of everyone's property. Then there are homes that are within yards of the corridor whose value will also plunge due to the planned 64 trips (l) a day that will pass close by their home. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens Of Texas.	Refer to LU-3, LU-4, NR-1, RF-1 and VA-1.
Betty Willis	3/5/2018	Letter	I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DE'S published in December 2017. My husband and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. Building the high-speed rail as proposed is essentially a land grab by private companv. The company Goes not own a railroad or have tracks or have the money to construct the line. Taking 8000 acres from private citizens and impacting thousands Of acres to speculate ridership will keep it economically viable is folly. The cost of building this line us grossly under-estimated and ridership is hugely over-estimated. If it is built, it will fail, and Texas tax payers will be bearing the cost to keep it running, There are no rail lines in the entire US. that are self-sustaining so why would anyone thing this one will be? Are Texans going to get out of their cars to ride a train? Don't bet taxpayers' money and land on it. The route was chosen because it is flat and "undeveloped". Does "undeveloped" mean no apartments, no high-rise buildings, no shopping centers? This land that is being grabbed has indeed been developed for grazing and raising cattle, horses, alpaca, emus and many other livestock. Just because there are no hard landscapes to tear up for building the route does not been it is not developed. This project is doomed to fail while sacrificing individual property owners' rights for the sake Of Japanese investors and Houston and Dallas opportunists. The "NO Build Alternative" is the only responsible choice for the citizens Of Texas. Sincerely,	Refer to NR-1 and VA-1.
Betty Willis	3/5/2018	Letter	I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My wife and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. This project will create an obsolescence that will negatively impact the property values in Waller County. The proposed	Refer to LU-3, LU-4, NR-1, RF-1 and VA-1.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			route will cause people to lose property value. Decreased valuation of property will cause lower tax revenue collected so school districts, emergency services and all public entities will lose income thereby forcing them to reduce services to taxpayers. Taxpayers will be losing land, suffering reduced valuation of the land they have left AND get reduced services for the taxes that they pay. All this for a project that doesn't benefit them in any way, shape or form. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	
Betty Willis	3/5/2018	Letter	I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My husband and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. My husband was transported by EMT to the Tomball Hospital this past year. Building the high-speed rail line through the proposed route will essentially disrupt EMT routes. Most of the roads in this area are "no outlet" roads. Having the high-speed rail line cut across those roads will restrict access to remote areas of the county and cause EMT response time to increase because of the circuitous route they will have to take to get to an emergency. TCR sees our land as easy to build on to connect Houston and Dallas. We see this route as making it more difficult for EMT vehicles to travel for an emergency. This project is doomed to fail while sacrificing individual property owner's rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to SS-23. <b>Section 3.4.6, Noise and Vibration, Avoidance, Minimization and Mitigation</b> identifies a number of mitigation measures, such as vegetation screening or insulation treatments, that would minimize impacts to properties in areas where higher noise or vibration levels may be present. As a result of minimal noise and vibration impacts, adverse effects on wildlife or adjacent property values would likely be minimal. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . See <b>Section 3.13, Land Use</b> for more information regarding potential impacts and mitigation measures for property owners.
Betty Willis	3/5/2018	Letter	I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My husband and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. Building the high-speed rail line through the proposed route will essentially disrupt fire department. Most of the roads in this area are "no outlet" roads. Having the high-speed rail line cut across those roads will restrict access to remote areas of the county and cause fire rescue response time to increase because of the circuitous route they will have to take to get to an emergency. TCR sees our land as easy to build on to connect Houston and Dallas. We see this route as making it more difficult for fire department vehicles to travel for an emergency. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "NO Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to SS-23. <b>Section 3.4.6, Noise and Vibration, Avoidance, Minimization and Mitigation</b> identifies a number of mitigation measures, such as vegetation screening or insulation treatments, that would minimize impacts to properties in areas where higher noise or vibration levels may be present. As a result of minimal noise and vibration impacts, adverse effects on wildlife or adjacent property values would likely be minimal. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . 			<p>values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. The proposed route for the high-speed rail will negatively impact the Katy Prairie. The prairie is a biologically diverse powerhouse with more than 300 species of birds. 110 species of mammals. amphibians and reptiles and more than 600 species of grasses A 200 mph train barreling within one mile of this migratory bird sanctuary is going to disrupt this fragile area as well as cause bird collisions and This project is doomed to fail while sacrificing individual property owner&lt; rights for the sake Of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.</p>	<p>updated to clarify and more fully describe scenarios and definitions for identifying communities and describing community cohesion. Methodology can be found in <b>Section 3.14.3, Socioeconomic and Community Facilities, Methodology</b>. The effects of the project on communities are further described in <b>Section 3.14.5.2.2, Socioeconomics and Community Facilities, Impacts to Community Character and Cohesion</b>. Additional information regarding the alignment of the project can be found in <b>Chapter 2.0, Alternatives Considered, and Appendix D, Lane Use Mapbook</b>.</p>
Betty Willis	3/5/2018	Letter	<p>I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed between Dallas and Houston and sited in the FRA DEIS published in December 2017. My husband and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy security and serenity of our residence and are devastated that the proposed high-speed rail will Cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. The proposed alignment for the rail line will run through a large portion of Waller district, which could negatively impact bus routes. This may cause Waller ISD to purchase additional school buses to transport students and accommodate delays due to county and private roads being impacted and/or closed by the proposed HSR project. Waller ISD has a significant percentage Of low income households who would bear the brunt Of purchasing new buses to transport students. This project is doomed to fail while sacrificing individual property owners' rights for the sake Of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens Of Texas.</p>	<p>Refer to NR-1, SC-19, TR-1, TR-6, TR-7, TR-8 and VA-1. Waller County ISD covers approximately 309 square miles within Waller County and into Harris County. The Project would intersect and account for less than two square miles (less than one percent) of the ISD area. No impacts to buses are anticipated because there would be no impact to existing or planned roadways within the Waller ISD area. For information about the Noise and Vibration analysis including mitigation measures, see Section 3.4, Noise and Vibration.</p>
Betty Willis	3/5/2018	Letter	<p>I am a resident of Grimes county, Texas. I am lodging an between Dallas and Houston and sited in the FRA DEIS published in December 2017. My husband and I lived and worked in Houston for 37 years before building Our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity Of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact Our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. This project will create an obsolescence that will negatively impact the property values in Waller County. The proposed route will cause people to lose property value. Decreased valuation of property will cause lower tax revenue collected so school districts, emergency services and all public entities will lose income thereby forcing them to reduce services to taxpayers. Taxpayers will be losing land, suffering reduced valuation of the land they have left AND get reduced services for the taxes that they pay. All this for a project that doesn't benefit them in any way, shape or form. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.</p>	<p>Refer to LU-3, LU-4, NR-1, RF-1 and VA-1.</p>

			the construction of this high-speed rail line, Texas Central will be forcing onto the public a huge 5-year HSR construction project AND a large road construction project on the counties impacted by and surrounding the proposed corridor. The county road construction cost will result in increases to county maintenance costs and loss of more private property to road right-of-way. This proposed project is HUGE and will result in road building, rebuilding and maintenance that will be overwhelming to the resources of the counties. This will again force the cost onto the taxpayers of Texas to pay for these roads. The DEIS does not consider the economic impact on the peripheral road consequences of building this railway. TCR will not pay for all the roads impacted so taxpayers will have to foot the bill. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "NO Build Alternative" is the only responsible choice for the citizens of Texas.	
Betty Willis	3/7/2018	Website	In the construction of this high-speed rail line, Texas Central will be forcing onto the public a huge 5-year HSR construction project AND a large road construction project on the counties impacted by and surrounding the proposed corridor. The county road construction cost will result in increases to county maintenance costs and loss of more private property to road right-of-way. This proposed project is HUGE and will result in road building, rebuilding and maintenance that will be overwhelming to the resources of the counties. This will again force the cost onto the taxpayers of Texas to pay for these roads. The DEIS does not consider the economic impact on the peripheral road consequences of building this railway. TCR will not pay for all the roads impacted so taxpayers will have to foot the bill.	Refer to TR-7 and TR-8.
Betty Willis	3/7/2018	Website	The proposed route for the high-speed rail will negatively impact the Katy Prairie. The prairie is a biologically diverse powerhouse with more than 300 species of birds, 110 species of mammals, amphibians and reptiles and more than 600 species of grasses. A 200 mph train barreling within one mile of this migratory bird sanctuary is going to disrupt this fragile area as well as cause bird collisions and accidents.	Refer to NR-2, NR-5 and RF-4. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . For information regarding vegetation please see <b>Section 3.6.4.2, Natural Ecological Systems and Protected Species, Vegetation</b> and mitigation measures <b>NR-MM#2</b> and <b>NR-MM#4</b> in <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .
Betty Willis	3/7/2018	Website	This proposed high-speed rail line will pass within approximately 580 feet of a Natural Gas Pipeline Compressor Station. This hazard was not addressed in the December 2017 DEIS. I can't imagine that this was not considered for the EIS.	Refer to EU-2, EU-6 and EU-7.
Betty Willis	3/7/2018	Website	My husband was transported by EMT to the Tomball Hospital this past year. Building the high-speed rail line through the proposed route will essentially disrupt EMT routes. Most of the roads in this area are "no outlet" roads. Having the high-speed rail line cut across those roads will restrict access to remote areas of the county and cause EMT response time to increase because of the circuitous route they will have to take to get to an emergency. TCR sees our land as easy to build on to connect Houston and Dallas. We see this route as making it more difficult for EMT vehicles to travel for an emergency.	Refer to SS-23.
Betty Willis	3/7/2018	Email	The proposed high-speed rail route goes right through established communities in northern Waller and southern Grimes counties. To name a few, these communities are Saddle Creek Forest, Plantation Forest, Oak Hollow, Remington Forest, Six Pines and Kickapoo Preserve. For all these developments the high-speed corridor cuts right through the development and destroys the economic viability of them and the value of everyone's property. Then there are homes that are within yards of the corridor whose value will also plunge due to the planned 64 trips (!) a day that will pass close by their home.	Refer to LU-3, SC-12 and VA-1.
Betty Willis	3/7/2018	Email	The proposed alignment for the rail line will run through a large portion of Waller ISD's district, which could negatively impact bus routes. This may cause Waller ISD to purchase additional school buses to transport students and accommodate delays due to county and private roads being impacted and/or closed by the proposed HSR project. Waller ISD has a significant percentage of low income households who would bear the brunt of purchasing new buses to transport students.	Refer to EJ-1 and SC-5.
Betty Willis	3/7/2018	Email	This proposed route for the high-speed rail cuts through the north end of one of the major wetlands in the region where duck hunting is vital to the economy and where water fowl and their hunting will be diminished, if not destroyed by the high-speed train. Protection of wetlands and wildlife is in the highest interest of Texans. The undoubted result of this high-speed rail will be that dues to lack of funding through ridership Texans will be paying to ruin their own pristine lands that wildlife enjoys.	Refer to NR-1, NR-2, RF-2 and WW-9.
Betty Willis	3/7/2018	Email	I am a resident of Grimes County, Texas. See <b>Section 3.13, Land Use</b> for more information regarding potential impacts and mitigation measures for property owners.
Betty Willis	3/7/2018	Email	The Houston area has had a tremendous flooding problem in the last few years. The flooding also impacts the rural areas surrounding Houston - namely Grimes and Waller Counties. The route for the high-speed rail necessarily will be creating berms for the train and/or roads on the route. These berms are essentially dams that will threaten homes and properties with flooding even more than we now experience. This will be devastating for our homes. Communities, future development and property values.	Refer to FP-1, WW-1 and WW-2. Approximately 25 percent of the Preferred Alternative in Grimes County and approximately 40 percent in Waller County will be constructed on viaduct (bridge type structure) which allows for free movement of water and would avoid and/or minimize floodplain and waters impacts.
Betty Willis	3/7/2018	Email	Building the high-speed rail line through the proposed route will essentially disrupt fire department routes. Most of the roads in this area are "no outlet" roads. Having the high-speed rail line cut across those roads will restrict access to remote areas of the county and cause fire rescue response time to increase because of the circuitous route they will have to take to get to an emergency. TCR sees our land as easy to build on to connect Houston and Dallas. We see this route as making it more difficult for fire department vehicles to travel for an emergency.	Refer to SS-23.
Betty Willis	3/7/2018	Email	Building the high-speed rail line through the proposed route will essentially disrupt emergency police routes. Most of the roads in this area are "no outlet" roads. Having the high-speed rail line cut across those roads will restrict access to remote areas of the county and cause police response time to increase because of the circuitous route they will have to take to get to an emergency. TCR sees our land as easy to build on to connect Houston and Dallas. We see this route as making it more difficult for police vehicles to travel for an emergency.	Refer to SS-23.
Betty Willis	3/7/2018	Email	am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My husband and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. Building the high-speed rail as proposed is essentially a land grab by a private company. The company does not own a railroad or have tracks or have the money to construct the line. Taking 8000 acres from private citizens and impacting thousands of acres to speculate ridership will keep it economically viable is folly. The cost of building this line us grossly under-estimated and ridership is hugely over-estimated. If it is built, it will fail, and Texas tax payers will be bearing the cost to keep it running. There are no rail lines in the entire U.S. that are self-sustaining so why would anyone thing this one will be? Are Texans going to get out of their cars to ride a train? Don't bet taxpayers' money and land on it. The route was chosen because it is flat and "undeveloped". Does "undeveloped" mean no apartments, no high-rise buildings, no shopping centers? This land that is being grabbed has indeed been developed for grazing and raising cattle, horses, alpaca, emus and many other livestock. Just because there are no hard landscapes to tear up for building the route does not mean it is not developed. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to BA-5, GN-2, GN-4, LU-14, NE-1, PN-3 and SC-22.

TCR sees our land as easy to build on to connect Houston and Dallas. We see this route as making it more difficult for EMT vehicles to travel for an emergency. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to LU-3, LU-4, NR-1, RF-1, SS-23 and VA-1.
Betty Willis	3/7/2018	Website	I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My husband and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. The Houston area has had a tremendous flooding problem in the last few years. The flooding also impacts	Refer to FP-1, LU-3, LU-4, NR-1, RF-1, VA-1, WW-1 and WW-2. Approximately 25% of the Preferred Alternative in Grimes County and approximately 40% in Waller County will be constructed on viaduct (bridge type structure) which allows for free movement of water and would avoid and/or minimize floodplain and waters impacts

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

			the rural areas surrounding Houston – namely Grimes and Waller Counties. The route for the high-speed rail necessarily will be creating berms for the train and/or roads on the route. These berms are essentially dams that will threaten homes and properties with flooding even more than we now experience. This will be devastating for our homes, communities, future development and property values. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	
Betty Willis	3/7/2018	Website	I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My husband and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. This proposed route for the high-speed rail cuts through the north end of one of the major wetlands in the region where duck hunting is vital to the economy and where water fowl and their hunting will be diminished, if not destroyed by the high-speed train. Protection of wetlands and wildlife is in the highest interest of Texans. The undoubted result of this high-speed rail will be that dues to lack of funding through ridership Texans will be paying to ruin their own pristine lands that wildlife enjoys. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to LU-3, LU-4, NR-1, NR-2 RF-1, RF-2, VA-1 and WW-2.
Betty Willis	3/7/2018	Website	I am a resident of Grimes County, Texas. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. The proposed route for the high-speed rail will negatively impact the Katy Prairie. The prairie is a biologically diverse powerhouse with more than 300 species of birds, 110 species of mammals, amphibians and reptiles and more than 600 species of grasses. A 200 mph train barreling within one mile of this migratory bird sanctuary is going to disrupt this fragile area as well as cause bird collisions and accidents. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to LU-3, LU-4, NR-1, NR-2, NR-5, RF-1, RF-4 and VA-1. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .
Betty Willis	3/7/2018	Website	I am a resident of Grimes County, Texas. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. The proposed alignment for the rail line will run through a large portion of Waller ISD's district, which could negatively impact bus routes. This may cause Waller ISD to purchase additional school buses to transport students and accommodate delays due to county and private roads being impacted and/or closed by the proposed HSR project. Waller ISD has a significant percentage of low income households who would bear the brunt of purchasing new buses to transport students. This project is doomed to fail while sacrificing	Refer to EJ-1, LU-3, LU-4, NR-1, RF-1, TR-1 and VA-1. Waller County ISD covers approximately 309 square miles within Waller County and into Harris County. The Project would intersect and account for less than two square miles (less than one percent) of the ISD area. No impacts to buses are anticipated because there would be no impact to existing or planned roadways within the Waller ISD area.

			individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	
Betty Willis	3/7/2018	Website	I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My husband and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. This project will create an obsolescence that will negatively impact the property values in Waller County. The proposed route will cause people to lose property value. Decreased valuation of property will cause lower tax revenue collected so school districts, emergency services and all public entities will lose income thereby forcing them to reduce services to taxpayers. Taxpayers will be losing land, suffering reduced valuation of the land they have left AND get reduced services for the taxes that they pay. All this for a project that doesn't benefit them in any way, shape or form. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to LU-3, LU-4, NR-1, RF-1 and VA-1.

Betty Willis	3/7/2018	Website	I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My husband and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. The proposed high-speed rail route goes right through established communities in northern Waller and southern Grimes counties. To name a few, these communities are Saddle Creek Forest, Plantation Forest, Oak Hollow, Remington Forest, Six Pines and Kickapoo Preserve. For all these developments the high-speed corridor cuts right through the development and destroys the economic viability of them and the value of everyone's property. Then there are homes that are within yards of the corridor whose value will also plunge due to the planned 64 trips (!) a day that will pass close by their home. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to LU-3, LU-4, NR-1, RF-1 and VA-1.

The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. In the construction of this high-speed rail line, Texas Central will be forcing onto the public a huge 5-year HSR construction project AND a large road construction project on the counties impacted by and surrounding the proposed corridor. The	Refer to LU-3, LU-4, NR-1, RF-1, TR-7, TR-8 and VA-1.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			county road construction cost will result in increases to county maintenance costs and loss of more private property to road right-of-way. This proposed project is HUGE and will result in road building, rebuilding and maintenance that will be overwhelming to the resources of the counties. This will again force the cost onto the taxpayers of Texas to pay for these roads. The DEIS does not consider the economic impact on the peripheral road consequences of building this railway. TCR will not pay for all the roads impacted so taxpayers will have to foot the bill. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	
Carl Willis	2/6/2018	Letter	Personal Safety Expectations During Construction (Ref: DEIS Omission; There are no Specific Expectations forced on TCRR regarding Personal Construction Safety. The work by TCRR'S Contractors' will be in close proximity to the Public. A lack Of a comprehensive personal Safety Program as well as Management Commitment and Leadership in Safety could lead to more danger on the Public than if this project had never been done. Also, many accidents including fatalities occur during road constnrction due to surprise lane changes and route changes catching the Public Off guard. These must be executed in a safe manner with lots Of warnings issued to the Public for route changes. The FRA should provide to TCR a set Of Construction Safety System Expectations not only for Personal Safety, but for the safety of Motorists.	Refer to SS-19 and TR-6.
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. Many of the reasons for a NO BUILD have not been addressed in this DEIS. "No Build Alternative". (Ref: DEIS Main Text I, Sect. ES.8, Pg. 8). The No Build analysis totally skipped the huge increase in Impacted Acreage from 3000 acres as communicated in writing by TCRR to 8000 acres has not been addressed by the FRA at all nor was it a part of the No Build Alternative Analysis. TCRR's current plan has caused the Closure, Rerouting, Modification, and Rebuilding over the HSR of many Private and Public Roads and increased the Road ROW land required without any ACCOUNTABILITY FOR TCRR's Earlier Claims. The FRA simply glosses over those huge changes. Why is that? What about the many Public Safety considerations that the FRA has Glossed Over (Increased ER Times, Safety of Traffic Congestion around Construction Sites, Lane closures, rerouting roads, road closures and more Public Road Travel required just to get around from point A to point B due to the HSR)? The FRA does NOT provide adequate documentation for elimination of the No Build Alternative. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to BA-6, LU-9, LU-11, LU-14, TR-6 and SS-23.
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. Many of the reasons for a NO BUILD have not been addressed in this DEIS. "No Build Alternative". (Ref: DEIS Main Text I, Sect. ES.8, Pg. 8).The FRA does NOT provide adequate documentation for elimination of the No Build Alternative. No Build is actually the Correct Answer. First, the FRA DEIS Understates the Damage to the Public and Property but Overstates/Assumes the HSR Need. Second, TCRR Underestimates the Project Cost and Overestimates the Ridership. The FRA never considered the Reason Foundation's Analysis {which clearly proved this project WILL FAIL) nor has it been mentioned in the FRA DEIS at all. That is NOT AN OBJECTIVE UNBIASED FRA DEIS ANALYSIS. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to BA-6, GN-2, GN-3, NE-1, NE-9, PN-3 and SC-22.
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. Many of the reasons for a NO BUILD have not been addressed in this DEIS. "No Build Alternative". (Ref: DEIS Main Text I, Sect. ES.8, Pg. 8). Here are reasons the "No Build Alternative" MUST be reconsidered by the FRA. First, the Claims by the FRA on 1-45 Transportation Predictions, Traffic Congestion, Safety on 1-45, and Transportation Alternatives are Not Adequately supported with Detailed Facts. In fact the opposite cases have been made with much more Facts. Second, the "Public Need" has never been established in the DEIS by the FRA. Third, "Public Need" must clearly be established due to the huge negative Impact of Landowner's Property, Homes, Cemeteries, Livelihood, Existing Public Roads, and County Maintenance revenues that has not been adequately covered by the FRA DEIS nor has it been Quantified by the FRA like the other things that support the HSR have been Quantified for comparison purposes. The FRA's DEIS is simply a "Thumb on the Scale for TCRR's Benefit" without the Facts to back it up. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to BA-6, CR-3, ED-2, GN-2, NE-1, NE-9, PN-3, TR-7, TR-8 and VA-1.

Submitted By	Date Submitted	Submission Type	Comment	Response
			Public is NOT going to accept from the FRA general statements that support the HSR without the FACTS to back it up. The appropriate level of Detail to support the FRA's claims about the No Build Alternative simply do not exist in the DEIS. Rationale is included in another Comments Page on this Subject. due to space limitations. The FRA also mentions there would be no improvement of Safety on 1-45 with the No Build Alternative. The FRA must Quantify that claim BEFORE it can be used to support the FRA's conclusion that the No Build Alternative is Not an Option. Therefore, the FRA does NOT provide adequate documentation for elimination of the No Build Alternative. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. Many of the reasons for a NO BUILD have not been addressed in this DEIS. "No Build Alternative". (Ref: DEIS Main Text I, Sect. ES.8, Pg. 8). The FRA does NOT provide adequate documentation for elimination of the No Build Alternative. First, any claim regarding this Project being a Traffic solution or Congestion Relief has been Contradicted by TCRR many times and we have that documented. TCRR has stated this Project will NOT solve any perceived Traffic issues, particularly near the big cities. Second, the FRA must show more data regarding future estimates of traffic volume. Researching past predictions, today the traffic volumes of 1-45 have in no way even come close reaching those predictions, in fact, it has only reached roughly one half of those predictions. Third, the FRA simply makes the statement that No Build would provide No Alternative Transportation Needs. Where is the FRA Proof statistically the "NEED" exists as no data is shown by the FRA? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to BA-6, NE-1 and PN-3.
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Lack of a Credible Comprehensive Risk Management System by the FRA and TCRR AND Emergency Response Planning for Public Safety (Ref: DEIS Appendix F TCRR FDCE v7 REPORT: Sect. 3.12, Pg. 49 of 199; Sect 4.1, Pg. 62 of 199; Sect. 4.2, Pg. 63 of 199; Sect. 4.4, Pg. 64 of 199). Comment: If the FRA is responsible for "RR Safety", it is inconceivable that the FRA is considering giving a Private Company to Construct and Operate an HSR a Green Light without the application of a Comprehensive Risk Management System, particularly since the Lives of the Public hinge on its Safe and Secure Construction and Operation. That sort of lack of credible Oversight by the FRA, a Federal Government Agency responsible for "RR Safety", could easily be considered "Negligent" to say the least. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to SS-19 and TR-6.
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Lack of a Credible Comprehensive Risk Management System by the FRA and TCRR AND Emergency Response Planning for Public Safety (Ref: DEIS Appendix F TCRR FDCE v7 REPORT: Sect. 3.12, Pg. 49 of 199; Sect 4.1, Pg. 62 of 199; Sect. 4.2, Pg. 63 of 199; Sect. 4.4, Pg. 64 of 199). Question: Were any Risk Management Systems applied to Emergency Response for the HSR if there is a shut down or emergency situation in the middle of nowhere? Question: What Risk Management System has been applied or what Emergency Response Planning been has done to handle High Elevation Rescue of the Public in case of a shut-down or Incident in the middle of nowhere during operation? Question: The same question would apply to the Construction Phase also? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to EU-2, LU-3 and SS-19.
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to SS-19 and TR-6. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Lack of a Credible Comprehensive Risk Management System by the FRA and TCRR AND Emergency Response Planning for Public Safety (Ref: DEIS Appendix F TCRR FDCE v7 REPORT: Sect. 3.12, Pg. 49 of 199; Sect 4.1, Pg. 62 of 199; Sect. 4.2, Pg. 63 of 199; Sect. 4.4, Pg. 64 of 199). Question: Why does the DEIS NOT mention any Risk Management System to be applied to the crossing or close proximity of the HSR with other hazardous facilities such as O&G Facilities, Pipelines, or Transmission Lines? Question: Does the FRA NOT consider Pipelines being crossed by the HSR a Risk Management Issue considering Pipeline Explosions have occurred in Texas? Does the FRA Employ Risk Management Engineers for the purpose of implementing a Risk Management System or ARE the FRA's Safety processes VOID OF A RISK MANAGEMENT SYSTEM? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to EU-2, SS-18 and SS-19. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Business Ethics, Public Trust, and TCRR Competence Level (Ref: Nothing In the DES on This Issue). The Public has documented a number of misleading or false answers to questions or statements by TCRR about the HSR for almost three years. I suggest the FRA 100k seriously at all of the DEIS topics that the FRA has glossed over, leaving many of us the impression of minimizing any negative evaluation results of TCRR'S Plan. Beware FRA, TCRR based on its track record for 3+ years, will likely not fulfill many Of the commitments included in the DEIS and when they don't, the FRA will be held accountable. There are also questions about TCRR'S unethical Actions during the collection of Field Data and it looks like the FRA has NO Problem Implicating themselves in potentially Illegal activity against the very people they are being paid to Protect? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to BA-6, NE-1, NE-2, NE-8 and NR-5. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Business Ethics, Public Trust, and TCRR Competence Level (Ref: Nothing In the DEIS On This Issue). TXDOTwas unwilling to work with a Local County Government body regarding planning for the HSR, the Waller County Regional Planning Committee. This was not an Advocacy group, but a true County Government body. The County sued TXDOT and it was found during the court case that the FRA had told TXDOT NOT to work with this local Government body, and not attend the	Refer to PI-1 and NR-5. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species,</b>

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			meetings. Waller County won the case, TXDOT then appealed, and lost the appeal. Question: Did the FRA Break Federal Law by telling a Texas State Government Body not to work with a County Government Body and not to attend the meetings? Question: Why would the FRA not want input from a County Government Body? Question: Since the Public is full aware of this case, does this not destroy the public Trust in what the FRA has done regarding the HSR DEIS? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	<b>Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Business Ethics, Public Trust, and TCRR Competence Level (Ref: Nothing In the DEIS on This Issue). Question: Has the FRA evaluated the answers provided to the Public in Open Forums by TCRR on a full host of questions as compared to what has been included now in this DEIS? Question: If not, is the FRA interested in any false or misleading statements made to the Public by TCRR vs. what the FRA has included in the DEIS? Question: Is it important to FRA's analysis of the TCRR's capability to Operate a RR or not if TCRR has mislead the Public on many issues as compared to what the FRA has included in the DEIS? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to BA-6, NE-1 and NE-8. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Water Supply for Use at All Construction Sites and During Construction All Along the HSR Route (Ref: DEIS Appendix F TCRR CONSTRUCTABILITY v4 REPORT: Sect. 7.1, Pgs. 32-33 of 34). Comment: The FRA Must Quantify the Water needs over 5 years of Construction and reconcile that with the State or County Water Conservation agencies to determine the need for permits or approvals for the use of Source Water. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to WW-6. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Water Supply for Use at All Construction Sites and During Construction All Along the HSR Route (Ref: DEIS Appendix F TCRR CONSTRUCTABILITY v4 REPORT: Sect. 7.1, Pgs. 32-33 of 34). Question: Who in the public will be negatively impacted by the large use of water by the HSR project? Comment: Due to water conservation efforts in Texas, the public has been under more regulatory limitations associated with drilling new water wells vs. the use of available surface water. Because of the huge amount of road work, and the extremely large size of many of the Construction Sites, there will be a need for an enormous amount of water for keeping dust levels to a minimum as required in the air quality restrictions. The DEIS simply states that Water will be made available at the construction sites. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to WW-6. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. Significant changes to the magnitude, congestion, and make-up of Traffic Flows in small rural areas as a result of newly built Construction Sites on major Road arteries, Road Closures, Road Modifications, and Rerouting Existing Roads (Ref: DEIS Appendix F TCRR CONSTRUCT ABILITY v4 REPORT: Sect. 4.2, Pg. 23;Sect. 5, Pg. 27). Comment: Rural communities and all roads in the vicinity of the HSR will see a significant increase and change in type of traffic flow and volumes. Existing roads will be damaged as a result of that increased traffic, particularly with lots of heavier loads than normal. The Public has no idea of the potential negative impacts to their local communities and roads as a result of this Project. The DEIS is not complete without the FRA advising the Public what they should expect as well as the changes that might have to be considered in the local infrastructure to mitigate some of the many negative impacts of the HSR Project Construction Phase.</p> <p>I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.</p>	<p>Refer to TR-6 and TR-7.</p> <p>For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife.</b> Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b></p>

			rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many Of the reasons for a NO BUILD have not been addressed in this DEIS. Adverse Impact of the Added Construction Personnel on the area traffic, schools, and housing Infrastructure (Ref: DEIS Omission; Nothing I could Find In the DEIS on This Infrastructure Topic during Construction. Comment: Past Projects such as Road, Transmission Line, and Pipeline projects normally employ a very significant contingent of workers from Outside Texas and certainly from Outside the Local Areas. This will result in additional pressure on County services and infrastructure. The Counties must have Time and Funding to be able to adequately respond to these large challenges. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Adverse Impact of the Added Construction Personnel on the area traffic, schools, and housing Infrastructure (Ref: DEIS Omission; Nothing I could Find In the DEIS on This Infrastructure Topic during Construction). Question: There exists nothing in the DES to address this issue. Has the FRA been working with Counties to provide them with the extraordinary needs that will be thrust upon them as a result of the huge influx of construction personnel and to understand the Countys view Of the increased resources and infrastructure that will be required of them including Education, particular in very small ISDs? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to SC-4 and SC-6. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DES. Adverse Impact of the Added Construction Personnel on the area traffic, schools, and housing Infrastructure (Ref: DEIS Omission; Nothing I could Find In the DEIS on This Infrastructure Topic during Construction). Question: What is the Negative Impact due to increased construction personnel over and above those normally in the areas and their traveling needs as it impacts specifically Traffic, Congestion, Housing, Medical Absorption of a portion of the Food Supply and Demand Chains, and the Negative Impact on Small Rural School ISDs? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to SC-4 and SC-6. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons fora NO BUILD have not been addressed in this DEIS. Additional Traffic and Congestion Due to permit Loads (Ref. DEIS Appendix F TCRR CONSTRUCTABILITY REPORT: sect. 3, pg. 22 Of 34; Sect. 4. pg. 23 Of 34; Sect. 5, pg. 27 Of 34). Question: What is the quantity Of permit Loads the public should expect being added to their traffic flow over and above the norm prior to the execution of this Project? NO figures on Permit Loads is included in the DEIS? There are Construction Sites all along the route that will be used for staging of materials and for the construction of Pre-Cast concrete structural components. Many Of those loads going to the Construction Sites as well as constructed structural components are very large likely qualifying as Permit Loads that must transverse existing roads to transport them to the HSR installation site. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to TR-6 and TR-7. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Personal Safety Expectations During Construction (Ref: DEIS Omission; There are no Specific Expectations forced on TCRR regarding Personal Construction Safety. The work by TCRR'S Contractors' will be in close proximity to the Public. A lack Of a comprehensive personal Safety Program as well as Management Commitment and Leadership in Safety could lead to more danger on the Public than if this project had never been done. Also, many accidents including fatalities occur during road constnrction due to surprise lane changes and route changes catching the Public Off guard. These must be executed in a safe manner with lots Of warnings issued to the Public for route changes. The FRA should provide to TCR a set Of Construction Safety System Expectations not only for Personal Safety, but for the safety of Motorists. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to SS-19 and TR-6. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . 			<p>rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans.</p> <p>Many of the reasons for a NO BUILD have not been addressed in this DEIS. Applicable Noise Measurements and Science Omitted by the DEIS (Ref: DEIS Appendix E Combined Tech Memos Set 1 Of 2; Pgs. 4-8). TCRR has been asked this question regarding the maximum level of noise a number of times at Open Houses, Public Informational Forums, and in writing without a single response. Question: What is the maximum Noise Level in dBA of TWO trains, NOT ONE, passing each other at any point along the HSR Route while traveling in opposite directions on adjacent tracks? The DEIS only covers the Noise impact of One Train in One Direction (87 dBA at W).</p> <p>I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.</p>	<p>see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b>. Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b>.</p>
Carl Willis	2/6/2018	Handwritten	<p>I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans.</p> <p>Many of the reasons for a NO BUILD have not been addressed in this DEIS. Road Closures and Modifications (Ref:#8226;. DEIS Appendix F TCRR CONSTRUCTABILITY va REPORT: sect. 6.5, pgs. 29-30of 34; Also Appendix F TCRR FDCE v7 REPORT; Appendix C, Pg. 1 of 14): File 3, TEXT III, Tables 3.11). TCRR has stated in a Public Forum that the only road going over the HSR is Beltway 8. Well. the DEIS shows 66 Private Road Closures, 43 Private Roads Rerouted, 161 private Road Crossings, 1 Public Road Closure, 139 public Roads Rerouted, 463 Public Road Crossings, and many roads, FM and CR, going OVER the HSR vs. the Viaduct going over the roads to minimize destruction of our road system. DIES states existing private property access will be provided as a part of purchase of property as a part of the ROW construction or New access if it is PROPOSED as part of the ROW construction? Question: What if it is NOT Proposed, meaning TCR actually gets to decide?</p> <p>I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.</p>	<p>Refer to ED-2, TR-8 and TR-10.</p> <p>For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b>. Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b>.</p>
Carl Willis	2/6/2018	Handwritten	<p>I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans.</p> <p>Many of the reasons fora NO BUILD have not been addressed in this DEIS. Road Closures and Modifications (Ref: DEIS Appendix F TCRR CONSTRUCTABILITY v4 REPORT: sect. 6.5, pgs. 29-30 of 34; Also Appendix F TCRR FDCE v7 REPORT; Appendix C, pg. 1 of 14): File 3, TEXT III, Tables 3.11). Contrary to previous TCRR Documented Statements, a number Of FM and CR roads all across the counties are being closed and reconstructed with an overpass Over the HSR? Question: Will Texas State Eminent Domain powers for Road Construction be used to acquire the additional ROW necessary to reconstruct the roads over the HSR or for any road rerouting or modifications for that matter AND for the destruction Of people's Homes that originally would not have been taken specifically due to the HSR? If so, THIS IS UNLAWFUL STEALING OF MORE LAND AND HOMES THAN NECESSARY AS THERE IS NO PROVEN NEED OR NECESSITY FOR THIS PROJECT. The FRA MUST CEASE ANY FURTHER WORK ON THIS TCRR HSR EIS.</p> <p>I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.</p>	<p>Refer to BA-6, ED-1, ED-3, NE-1, LU-11, TR-8 and LU-14.</p> <p>For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b>. 			MUST BE REJECTED BY THE FRA IMMEDIATELY DUE TO THIS HARM TO LANDOWNERS. I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	<b>Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DES. Road Closures and Modifications (Ref: DEIS Appendix F TCRR CONSTRUCTABILITY v4 REPORT: sect. 6.5. Pgs. 29-30 of 34; Also, Appendix F TCRR FDCE v7 REPORT; Appendix C, pg. 1 of 14): File 3, TEXT III, Tables 3.11). An Access road will be built all up and down the HSR to help move traffic from closed roads or roads being rerouted or reconstructed. As any Road built along the HSR would become a Public Road that must be fenced off due to Liabilities as well as keeping animals in the Landowners property, this will negatively impact the free movement of equipment and animals even with the use of a Viaduct. TCRR's Advertisements of a Viaduct providing this free movement was FALSE. Animals would have to be moved across a Public Road. Question: Will TCRR provide Culverts in any ditches alongside the access roads and Fence Gates as well as road shut-down/signaling methods at various locations so animals can be moved across the Public Roads? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to LU-11, NR-6 and TR-8. Culverts, fencing, and fence-gates would be included as possible negotiation measures to allow livestock crossings. This would be conducted on a case-by-case basis between TCRR and the landowner. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife.</b> Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many of the reasons for a NO BUILD have not been addressed in this DEIS. Road Closures and Modifications (Ref: DEIS Appendix F TCRR CONSTRUCTABILITY REPORT: sect. 6.5, pgs. 29-30 of 34; Also, Appendix F TCRR FDCE v7 REPORT; Appendix C, Pg. 1 Of 14): File 3, TEXT III, Tables 3.11) Question: viii. There exists documentation Of TCRR stating the Impacted Acreage for the HSR would be around 3000 acres. The recently released DEIS shows around 8000 Impacted Acreage. The FRA should HAULT ANY FURTHER WORK on the DEIS until there is a clear understanding where all the Increases took place. Question: Is it not the case, after looking at all the Road Modifications including those reconstructed Over the HSR, that the significant increase of new Road work ROW is a significant part of that increase in Impacted Acreage? I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to BA-3, LU-14 and TR-8. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife.</b> Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Carl Willis	2/6/2018	Handwritten	I am writing to object to the proposed high-speed rail line between Houston and Dallas, Texas. I live in Grimes County, Texas approximately 1.5 miles from the recommended high-speed rail route sited in the FRA DEIS published in December 2017. My home and subdivision are in a rural area that will be split in two by the rail route. It will adversely impact wildlife and quality of life for rural Texans. Many Of the reasons for a NO BUILD have not been addressed in this DE'S. Regarding Emergency Response times during Construction of the Dallas to Houston HSR, the FRA DEIS Summary Statement in File TEXT III, 3.16-24, is "Impacts to Emergency Response (ER) Times are NOT Anticipated to be Significant". Question: Since the FRA study does indicate an increase in ER times, is even ONE Single Public Fatality due to Increased ER Times Acceptable by this FRA DEIS? Question: Since this FRA DEIS is not based on traffic modeling yet Of the traffic increase, particularly during Construction with many Roads under construction ALSO, then how can the FRA with any credibility or accuracy make a claim that "Impact on ER Times is not anticipated to be Significant?" I propose that the only viable alternative would be that the NO BUILD option be chosen in the final Environmental Impact Statement.	Refer to SS-23. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species and Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife.</b> Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting and Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures.</b>
Carl Willis	3/5/2018	Letter	am a resident of Grimes county, Texas. I am lodging an objectiuon to the proposed high speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My wife and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed	Refer to VA-1.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. This project will create an obsolescence that will negatively impact the property values in Grimes County. The proposed route will cause people to lose property value. Decreased valuation Of property will cause lower tax revenue collected so school districts, emergency services and all public entities will lose income thereby forcing them to reduce services to taxpayers. Taxpayers will be losing land, suffering reduced valuation Of the land they have left AND get reduced services for the taxes that they pay. All this for a project that doesn't benefit them in any way, shape or form. This project is doomed to fail while sacrificing individual property owners' rights for the sake Of Japanese investors and Houston and Dallas opportunists. The "NO Build Alternative" is the only responsible choice for the citizens Of Texas. Sincerely, Carl L. Willis [...]	
Carl Willis	3/5/2018	Letter	Building the high-speed rail line through the proposed route will essentially disrupt fire department routes. Most of the roads in this area are "no outlet" roads. Having the high-speed rail line cut across those roads will restrict access to remote areas of the county and cause fire rescue response time to increase because of the circuitous route they will have to take to get to an emergency. TCR sees our land as easy to build on to connect Houston and Dallas. We see this route as making it more difficult for fire department vehicles to travel for an emergency.	Refer to SS-23.
Carl Willis	3/5/2018	Letter	I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My wife and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. This project will create an obsolescence that will negatively impact the property values in Waller County. The proposed route will cause people to lose property value. Decreased valuation of property will cause lower tax revenue collected so school districts, emergency services and all public entities will lose income thereby forcing them to reduce services to taxpayers. Taxpayers will be losing land, suffering reduced valuation of the land they have left AND get reduced services for the taxes that they pay. All this for a project that doesn't benefit them in any way, shape or form. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to LU-3, LU-4, NR-1, RF-1 and VA-1.
Carl Willis	3/5/2018	Letter	The proposed alignment for the rail line will run through a large portion of Waller ISD's district, which could negatively impact bus routes. This may cause Waller ISD to purchase additional school buses to transport students and accommodate delays due to county and private roads being impacted and/or closed by the proposed HSR project. Waller ISD has a significant percentage of low income households who would bear the brunt of purchasing new buses to transport students.	Refer to EJ-1 and SC-5.
Carl Willis	3/5/2018	Letter	I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My wife and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. Building the high-speed rail as proposed is essentially a land grab by a private company. The company does not own a railroad or have tracks or have the money to construct the line. Taking 8000 acres from private citizens and impacting thousands of acres to speculate ridership will keep it economically viable is folly. The cost of building this line us grossly under-estimated and ridership is hugely over-estimated. If it is built, it will fail, and Texas tax payers will be bearing the cost to keep it running. There are no rail lines in the entire U.S. that are self-sustaining so why would anyone thing this one will be? Are Texans going to get out of their cars to ride a train? Don't bet taxpayers' money and land on it. The route was chosen because it is flat and "undeveloped". Does "undeveloped" mean no apartments, no high-rise buildings, no shopping centers? This land that is being grabbed has indeed been developed for grazing and raising cattle, horses, alpaca, emus and many other livestock. Just because there are no hard landscapes to tear up for building the route does not mean it is not developed. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to NR-1 and VA-1.
Carl Willis	3/5/2018	Letter	This proposed route for the high-speed rail cuts through the north end of one of the major wetlands in the region where duck hunting is vital to the economy and where water fowl and their hunting will be diminished, if not destroyed by the high-speed train. Protection Of wetlands and wildlife is in the highest interest of Texans. The undoubted result Of this high-speed rail will be that dues to lack Of funding through ridership Texans will be paying to ruin their Own pristine lands that wildlife enjoys.	Refer to NR-1, NR-2, RF-2 and WW-9.

Carl Willis	3/5/2018	Letter	The Houston area has had a tremendous flooding problem in the last few years. The flooding also impacts the rural areas surrounding Houston - namely Grimes and Waller Counties. The route for the High Speed Rail necessarily will be creating berms for the train and/or roads on the route. These berms are essentially dams that will threaten homes and properties with flooding even more than we now experience. This will be devastating for our homes. Communities, future development and property values.	Refer to FP-1, WW-1 and WW-2.
Carl Willis	3/5/2018	Letter	The proposed high speed rail route goes through established communities in northern Waller and southern Grimes counties. To name a few, these communities are Saddle Creek Forest, Plantation Forest, Oak Hollow, Remington Forest, Six Pines and Kickapoo Preserve. For all these developments the high-speed corridor cuts right through the development and destroys the economic viability of them and the value of everyone's property. Then there are homes that are within yards of the corridor whose value will also plunge due to the planned 64 trips (!) a day that will pass close by their home.	Refer to LU-3, LU-4, NR-1, RF-1 and VA-1.
Carl Willis	3/5/2018	Letter	Building the high-speed rail line through the proposed route will essentially disrupt emergency police routes. Most of the roads in this area are "no outlet" roads. Having the high-speed rail line cut across those roads will restrict access to remote areas of the county and cause police response time to increase because of the circuitous route they will have to take to get to an emergency. TCR sees our land as easy to build on to connect Houston and Dallas. We see this route as making it more difficult for police vehicles to travel for an emergency.	Refer to SS-23.
Carl Willis	3/5/2018	Letter	I have been transported by EMT to the Tomball Hospital this past year. Building the high-speed rail line through the proposed route will essentially disrupt EMT. Most of the roads in this area are "no Outlet" roads. Having the high-speed rail line cut across those roads will restrict access to remote areas of the county and cause EMT response time to increase because of the circuitous route they will have to take to get to an emergency. TCR sees our land as easy to build on to connect Houston and Dallas. We see this route as making it more difficult for EMT vehicles to travel for an emergency.	Refer to SS-23.
Carl Willis	3/5/2018	Website	I am a resident of Grimes County, Texas. am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My wife and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. The proposed route for the high-speed rail will negatively impact the Katy prairie. The prairie is a biologically diverse powerhouse with more than 300 species of birds. 110 species of mammals. amphibians and reptiles and more than 600 species of grasses A 200 mph train barreling within one mile of this migratory bird sanctuary is going to disrupt this fragile area as well as cause bird collisions and accidents. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to NR-2, NR-3 and RF-4. For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b> . For information regarding vegetation please see <b>Section 3.6.4.2, Natural Ecological Systems and Protected Species, Vegetation</b> and mitigation measures <b>NR-MM#2</b> and <b>NR-MM#4</b> in <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b> .
Carl Willis	3/5/2018	Website	This proposed high-speed rail line will pass within approximately 580 feet of a Natural Gas Pipeline Compressor Station. This hazard was not addressed in the December 2017 DEIS. I can't imagine that this was not considered for the EIS.	Refer to EU-2, EU-6 and EU-7.

Carl Willis	3/7/2018	Website	<p>I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My wife and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. Building the high-speed rail as proposed is essentially a land grab by a private company. The company does not own a railroad or have tracks or have the money to construct the line. Taking 8000 acres from private citizens and impacting thousands of acres to speculate ridership will keep it economically viable is folly. The cost of building this line us grossly under-estimated and ridership is hugely over-estimated. If it is built, it will fail, and Texas tax payers will be bearing the cost to keep it running. There are no rail lines in the entire U.S. that are self-sustaining so why would anyone thing this one will be? Are Texans going to get out of their cars to ride a train? Don't bet taxpayers' money and land on it. The route was chosen because it is flat and "undeveloped". Does "undeveloped" mean no apartments, no high-rise buildings, no shopping centers? This land that is being grabbed has indeed been developed for grazing and raising cattle, horses, alpaca, emus and many other livestock. Just because there are no hard landscapes to tear up for building the route does not mean it is not developed. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.</p>	<p>Refer to BA-6, BA-7, BA-8, ED-2, GN-2, GN-4, LU-3, LU-4, LU-11, LU-14, NE-1, NR-1, PN-3 RF-1, SC-22 and VA-1.</p>
Carl Willis	3/7/2018	Website	<p>I am a resident of Grimes County, Texas. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. The Houston area has had a tremendous flooding problem in the last few years. The flooding also impacts the rural areas surrounding Houston – namely Grimes and Waller Counties. The route for the high-speed rail necessarily will be creating berms for the train and/or roads on the route. These berms are essentially dams that will threaten homes and properties with flooding even more than we now experience. This will be devastating for our homes. Communities, future development and property values. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to FP-1, LU-3, LU-4, NR-1, RF-1, VA-1, WW-1 and WW-2.
Carl Willis	3/7/2018	Website	I am a resident of Grimes County, Texas. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. This proposed route for the high-speed rail cuts through the north end of one of the major wetlands in the region where duck hunting is vital to the economy and where water fowl and their hunting will be diminished, if not destroyed by the high-speed train. Protection of wetlands and wildlife is in the highest interest of Texans. The undoubted result of this high-speed rail will be that dues to lack of funding through ridership Texans will be paying to ruin their own pristine lands that wildlife enjoys. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to LU-3, LU-4, NR-1, NR-2, RF-1, RF-2, VA-1 and WW-2.

			will benefit from its operation. The proposed route for the high-speed rail will negatively impact the Katy Prairie. The prairie is a biologically diverse powerhouse with more than 300 species of birds, 110 species of mammals, amphibians and reptiles and more than 600 species of grasses. A 200 mph train barreling within one mile of this migratory bird sanctuary is going to disrupt this fragile area as well as cause bird collisions and accidents. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	
Carl Willis	3/7/2018	Website	I am a resident of Grimes County, Texas. I am lodging an objection to the proposed high-speed rail line between Dallas and Houston and sited in the FRA DEIS published in December 2017. My wife and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. The proposed alignment for the rail line will run through a large portion of Waller ISD's district, which could negatively impact bus routes. This may cause Waller ISD to purchase additional school buses to transport students and accommodate delays due to county and private roads being impacted and/or closed by the proposed HSR project. Waller ISD has a significant percentage of low income households who would bear the brunt of purchasing new buses to transport students. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to EJ-1, NR-1, SC-5 and VA-1.
Carl Willis	3/7/2018	Website	I am a resident of Grimes County, Texas. My wife and I lived and worked in Houston for 37 years before building our retirement home in the country away from the noise, congestion and crime in the city. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. This project will create an obsolescence that will negatively impact the property values in Grimes County. The proposed route will cause people to lose property value. Decreased valuation of property will cause lower tax revenue collected so school districts, emergency services and all public entities will lose income thereby forcing them to reduce services to taxpayers. Taxpayers will be losing land, suffering reduced valuation of the land they have left AND get reduced services for the taxes that they pay. All this for a project that doesn't benefit them in any way, shape or form. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to LU-3, LU-4, NR-1, RF-1 and VA-1.
Carl Willis	3/7/2018	Website	I am a resident of Grimes County, Texas. We saved for 47 years to be able to build and live in this house on acreage in a community that is home to myriad wildlife. We enjoy the security and serenity of our residence and are devastated that the proposed high-speed rail will cut our subdivision literally in two pieces. The proposed route will be less than a mile from our home. It will very negatively impact our property values and the wildlife by bringing in noise and vibration to a neighborhood that neither wants the train nor will benefit from its operation. The proposed high-speed rail route goes right through established communities in northern Waller and southern Grimes counties. To name a few, these communities are Saddle Creek Forest, Plantation Forest, Oak Hollow, Remington Forest, Six Pines and Kickapoo Preserve. For all these developments the high-speed corridor cuts right through the development and destroys the economic viability of them and the value of everyone's property. Then there are homes that are within yards of the corridor whose value will also plunge due to the planned 64 trips (!) a day that will pass close by their home. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	Refer to LU-3, LU-4, NR-1, RF-1 and VA-1.

			construction project AND a large road construction project on the counties impacted by and surrounding the proposed corridor. The county road construction cost will result in increases to county maintenance costs and loss of more private property to road right-of-way. This proposed project is HUGE and will result in road building, rebuilding and maintenance that will be overwhelming to the resources of the counties. This will again force the cost onto the taxpayers of Texas to pay for these roads. The DEIS does not consider the economic impact on the peripheral road consequences of building this railway. TCR will not pay for all the roads impacted so taxpayers will have to foot the bill. This project is doomed to fail while sacrificing individual property owners' rights for the sake of Japanese investors and Houston and Dallas opportunists. The "No Build Alternative" is the only responsible choice for the citizens of Texas.	
Marc Willis	1/17/2018	Website	This is a test	Comment noted.
Roger Willis	1/29/2018	Email	The high speed rail will disrupt and divide our county. Our roads will be cut off, the beauty of our land will be an eye sore, the property values of our property will go down, which means our tax dollars go dow, Which is not good for our schools and our ESD districts. The high voltage power lines will be a hazard to everything us and our environment. It's projected to run way to close to our school, the travel up and down the tracks will disrupt our school and if there was a derail there what would happen. Being that close to the school could it hit it? Could the high voltage power lines cause problems around the school especial if a derail was to happen there. Is the decimal level to high and cause disruption in our schools. They don;t have the funds for this project is it going to be like California and be billions Of dollars over budget and our tax dollars are to pay for it to give it to a foreign country.WHY!!! Why are our congress allowing this to happen.	Refer to AS-1, EU-5, NV-1, SS-19 and TR-8. As indicated in <b>Section 3.9.2, Utilities and Energy, Regulatory Context</b> , high voltage power lines would be sited, permitted, and constructed in accordance with applicable state safety regulations. Please also note that both the Project and the power lines comply with the US regulations for public EMF exposure. Thus, the power lines and the Project are not expected to interfere with each other nor to have adverse health effects for human beings living along the length of the Project. Impacts to schools are discussed in <b>Section 3.14.5.2.5, Socioeconomics and Community Facilities, Build Alternatives</b> . No schools are located within 500 feet of a new transmission line, based on the proposed alignments.
Dedrick Wilmer	3/9/2018	Website	First I want to thank you for the opportunity to be part of something special that will impact America, Not just the State Of Texas but many generations to come. I'm Dedrick T. Wilmer president Of the White Oak Falls Homeowners Association Board of Directors. The community I preside over is perhaps the largest diverse community in this Nation. We represent every continent, sub-continent, faith, race/ethnicity and race in this 744+ Single Family Community that I called my home. White Oak falls per the DEIS is mentioned as the most impacted community within the entire route. gy mentioned this I recommend to the FRA & Texas Central to consider these recommendations in mind for our community Take Provide a Financial package that's very lucrative for our residents by assisting them in securing housing in limited space of affordability & supply of homes within a upper moderate range of home prices within Cypress, TX Explore the opportunity to extend the DEIS recommendation of securing additional ROW that include a min of 1250 feet which will perhaps leave absorb the development to the original state prior to 2005 before our development. Maintain the commitment for any lost assessments that will be present once homes are acquired as a property owner vs being a utility easement. Assisting in Capital Improvements within our community that include deepening our rendition ponds, building a paved track including lights, benches around the ponds, club-home including pool for the community this will result in improving property values & your investment in our community as our Neighbor. Finally I personal support this project due to the enormous economic impact from Dallas to Houston wells as in between. Including providing residents in this great state an opportunity to advance in the new aged of transportation. Please consider the recommendations during your approval process.	Comment noted.
Andy Wilson	1/4/2018	Email	The purpose of this correspondence is to inquire about the recent release of the FRA's environmental impact study for the proposed Texas Central Railway high speed rail between Dallas and Houston. It is my understanding that many landowners along the proposed route did not allow Texas Central representatives or representatives of the company that performed the survey access totheir property. Therefore, I do not see how a legitimate evaluation of train's impact on the environment could be completed. Is it necessary to have information from a ground survey to complete an environmental impact study? Another concern I have regarding the train and the FRA's evaluation is the economic viability of the project. My research indicates that there is a strong reasonable doubt that he project will ever be profitable. Section 1.2 of the FRA's study briefly discusses the viability of this project. Is the viability of the project a concern for the FRA and will this be looked into further before the project gets final approval? In order for this project to be executed land will have to be taken using eminent domain process from owners unwilling to sell. This process seems very unreasonable without first ensuring that the project will be viable and the land is being used for a worthy cause. Does the FRA have an opinion on this matter? I look forward to your response.	Refer to ED-1, GN-1, NE-1 and NE-8.
Bill Wilson	1/23/2018	Website	Dallas to Houston High-Speed Rail is good for Texas. It will help the economy, reduce fuel consumption, ease traffic and benefit the environment.	Comment noted.

Dennis Wilson, Limestone County Sheriff	3/9/2018	Email	<p>I am the current elected sheriff Of Limestone County, Texas. I have served in Law Enforcement here in Limestone County for all most 43 years. I began my first term as Limestone County Sheriff on January 1, 2001. I truly know and understand the citizens at Limestone County and am honored to serve them as the Sheriff. I will continue to work on their behalf by providing the protection and Law Enforcement services they so richly deserve. I have had No Contact with the High Speed Rail people other than one visit from a land surveyor who had been trespassing on private and county property. Our Texas Sheriff Coalition has agreed to have one message from one voice that represents all of our sheriffs concerns. We will speak in unison concerning this unnecessary project.</p> <p>I write to you today to express my concern regarding the Draft Environment Impact Statement for the Dallas Houston High-Speed Rail. The public comment period for the Draft EIS will end today, March 9. The public has been given 75 days to review a 5,647-page document Of highly technical information that took years to produce and is a first of its kind project with no assumptions or historical reference. Yet in all that time, Texas Central nor the Federal Railroad Administration ever found time to coordinate with any of our County Officials, commissioners' courts or sheriffs, to properly coordinate the public safety aspects of the Draft EIS, or the project as a whole. In addition to the many apparent errors, inconsistencies and conflicting information, the most serious concern I have about the document is the lack of regard for public safety specific to the communities the HSR will pass thro ugh.</p> <p>I stand with seven other County Sheriffs who have also taken an oath to protect and serve the citizens ofthis great State. Each day we work to ensure their protection and quality Of life is maintained. This coalition Of Sheriffs representing the counties between Dallas and Harris came together to stand for public safety and security because we are concerned about the proposed Dallas Houston HSR project and the safety of our citizens.</p> <p>For well over 4 years now, Texas Central has been working in Texas to advance their project. And within the Draft Environmental Impact Statement published by the Federal Railroad Administration, there is a lengthy, albeit generic, section on Public Safety. Prior to the publication of this document, not one Sheriffs Office had ever been contacted by Texas Central or the FRA to coordinate the public safety aspects Of this project as it relates to Our counties. And only after they learned all us sheriffs were meeting together to discuss our concerns, did they provide us with any substantive information. Finally, a company rep has reached out to me to coordinate a meeting between myself and their chairman ofthe board. Since the time ofour press conference on March 1 , Texas Central has also told the media that they were in touch with Sheriffs Offices as early as May 2016, but we do not have any record Of this. They have talked a big talk in the media about equipment and training for first responders, but, frankly, they have no idea what equipment and training we already have because they never even acknowledged us, yet set forth with their public safety assessments in the FRA's Draft EIS.</p> <p>To be very clear, I am the top law enforcement and public safety officer in my county. It is absolutely unacceptable that this company failed to conduct the proper coordination with our Sheriffs Offices.</p> <p>Because of this lack of coordination, the Draft EIS and the entire project planning process do not accurately reflect the priority that needs to be placed on Public Safety, Public Security, and the realities of law enforcement capabilities and challenges within my county. Within the DEIS is a list of first responders' service name and location. This tells the public nothing about how well those first responders are prepared for a critical incident or how the county will be able to provide adequate service to our citizens if resources are diverted to respond to issues with the HSR.</p> <p>One issue noted in the Draft EIS that we take particular exception to is the FRA's assumption that increased response times due to rerouted roads during and after construction would be within acceptable limits. We take our response times very seriously. This is truly a matter of life and death in some cases. Any increase in response time is unacceptable. The DEIS states, "Traffic control plans would be established to ensure emergency response times are within regulatory limits across the entire Study Area." "Regulatory limits" for response times do not exist. The DEIS also loosely uses "within acceptable limits" and "no significant impact" as it relates to public safety and security issues. This is entirely subjective, and unless Texas Central or the FRA has spoken to anyone in my Office, no measure exists for what is "significant" or "acceptable" within my County.</p> <p>As a note of correction, in Texas, the Office of Sheriff is a statutory/constitutional office having and authority under state law and/or state constitution. My Office is not a department within our County government. Any and all references to Sheriffs Department should be updated to Sheriffs Office.</p> <p>We also have concerns about not only the first response to a critical incident involving this HSR, but our supporting medical facilities. And while the DEIS mentions "Construction Site Safety" related largely to traffic accidents, it fails to mention of Construction Site Security. We know from experience that with a construction project of this scale comes increased crime at the construction site and as a result of the temporary workforce, as they are seeing with the California HSR already.</p> <p>This project has already created issues within our communities related to reports of trespass and harassment by agents of Texas Central</p>	Refer to ED-2, NE-1, NE-8, PI-1, PI-3, SS-7, S5-18, SS-23 and SS-26.

			<p>Railway. With these problems arising so early in the progression of this project, and having no coordination with company officials, we are very concerned about the future impact to our and their personal property, especially since the eminent domain authority of Texas Central is still the topic of ongoing litigation in Leon County and they have been ordered by the court to not survey specific property in Harris, Grimes, and Waller Counties.</p> <p>As such, we have made our citizens aware that any violations including, but not limited to, the mishandling of paper service, any reports of harassment or intimidation, especially of the elderly and infirm, and all cases of trespass or illegal survey by any agent of Texas Central, including those of the Federal Railroad Administration, will immediately be handled by our Offices and referred to the District Attorney for review and possible prosecution to the fullest extent of the law. Our citizens deserve to have their private property and quality of life protected.</p> <p>Texas Central Often claims they are working closely with landowners... based on calls we have received from citizens, we can each attest that is about as true as their claim that they are working closely with elected officials in each county. Keeping that in mind, as well as our commitment to public safety, this coalition of Sheriffs will be coordinating a meeting with Texas Central at a time and location that we can all be in attendance together with a court reporter to ensure that the information we are told is documented and consistent. We understand that it is difficult to get this company to commit to and stand by their word, so we feel a court reporter would be beneficial. In our line of work, it is paramount that we plan for the worst-case scenario and still expect the unexpected. But when we are intentionally kept in the dark by Texas Central and the Federal Railroad Administration about a project Of this magnitude, the safety and security Of our citizens are put in jeopardy. .. and we will not allow this to happen on our watch.</p>	
Jim Wilson	2/19/2018	Website	I am in support of the Texas Central project as outlined in the latest Draft EIS. I am also in favor of the proposed Houston station site at the Northwest Mall. My opinion is this important passenger link between Dallas and Houston will provide the needed capacity and speed of movement for people between these two Mega Cities now and for the future. I also see an opportunity for high speed small parcel freight to move on this line to add to the financial success in the future. The use of proven technology, the ability to upgrade rail vehicles as new innovation allows is a key factor for success. This "greener" technology and the ability to dampen the noise and vibration impact of the project where required will deliver desired results to population along the right of way. From my experience the people affected by the "threat" of eminent domain do not understand that is the last resort and worst financial resort for all parties involved. A land sale negotiation with proper mitigation for the impact on the landowner is the proper way to proceed. This can provide the win-win for everyone along the route.	Comment noted.
JoAnn Wilson	2/13/2018	Website	I am opposed to building the Dallas to Houston High Speed Rail. After attending a meeting, researching the information given, I believe due diligence has not been given to the environmental impact of our area. I also do not believe the rider ship estimate will be met and the project will financially fail causing undo financial burdens on private citizens. In my study of Texas Law A Private Company does not have the right to Eminent Domain. They are not the Government or Railroad Company and should cease trying to harass land owners into giving up their property.	Refer to ED-1, ED-2, GN-2, NE-1 and NE-9.
JoAnn Wilson	3/2/2018	Website	Texas Central has not contacted or met with us or our community to best of my knowledge and this project will certainly affect our property. 3.10.6.1 Mitigation Measures The following Mitigation Measures (MM) would minimize the aesthetic and scenic impacts of Build Alternatives A through F. AS-MM#1 Public Outreach-Public Meetings with Impacted Neighborhoods. As part of the LID approach, TCRR shall continue to incorporate stakeholder input into design throughout the project to inform their decision-making process. Prior to construction, TCRR or its contractors shall present visual impact mitigation strategies to the following neighborhoods: Saddle Creek Forest Development (Grimes and Waller counties), Plantation Drive (Grimes and Waller counties), Mallard Crossing (Harris County), Stone Creek Ranch (Harris County), Mallard Crossing (Harris County), Stonegate (Harris County) and White Oak Falls (Harris County). For all other residential areas, public comments from the Draft EIS will be incorporated into the Final EIS. The responses and comments would be used to guide mitigation measures implemented during construction and operation of the HSR system.W	Refer to PI-1. For all other residential areas, public comments from the Draft EIS will be incorporated into the Final EIS.
John Wilson	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

			6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.	
Laura Wilson	2/24/2018	Website	"I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and proved less damage to the county long term."	Refer to LU-5.
Laura Wilson	2/27/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and proved less damage to the county long term.	Refer to LU-5.
Fit to Print	2/28/2018	Website	I recently became aware of the possible loss of a property due to the proposed route of the HSR. This property listed as Morgan Legacy Farm located near FM 709 and 3194 is irreplaceable. Other than the obvious ecological damage if this route is used the charitable, economic and cultural benefits of this property would be forever lost. It appears to me that if this 6-7 mile line is moved north of the existing power line easement less damage to the county would occur.	Refer to LU-5.
Laura Wilson	3/8/2018	Website	am writing this comment to oppose the location of the High Speed Rail. Currently the route cuts through Morgan Legacy Farm located on FM 709 and 3194. This ranch serves as a retreat (free of charge) to many medical service providers. The location of the route goes directly in front of the main lodge separating the rodeo arena, cabins and pastures (that are used for cattle). There will be no way to access these areas with the needed equipment to provide care for the cattle. Also this takes away from the ones using the ranch for retreat purposes. If the route was moved north of the existing power lines it would be saving Morgan Legacy Farm so it can continue to serve the community.	Refer to LU-5.
Logan Wilson	1/30/2018	Oral	Good afternoon. I am Logan Wilson here with my wife. I understand I have three minutes to save the land that's been in our family for six generations. My aunt and my uncle and my father were born on that land and it means a lot to us. I could tell you how I feel about it. Probably the same way you feel about your land. But rather than that I would like to read you something that my daughter, Ann wrote and God knows she writes better than I do. I would like to read it to you what my daughter has to say about this. Hello, my name is Ann and my parents, the Wilson's own land in Mexia, Texas which investors threaten to condemn and take away from us for eminent domain in order to build a high-speed rail. The project can not be built without taxpayers subsidy. Something to think about. The purpose I have written this however to give the reader my perspective of this situation and how it will affect our family. My parents own 55 acres in Limestone County. Their land is part of the larger parcel of land that has been divided amongst our extended family back in the mid 1850's. They lived there and worked the land. Tended crops to support their family. My grandmother and her sister and her brother were later born of this property. Although no one lives there anymore. My father and brother still tend to the land. We spent a lot of money and time doing just that. They are making improvements to it. It is now a place where our family many generations meet from all over Texas and spend quality time together. The site of the original homestead is the site where my daughter and I pitch our tent, sleeping a few feet away from where our ancestors 160 years ago. We find pieces of old farm equipment that they left behind. We feel connected to the past. There is a feeling of continuity that's hard to explain but maybe you can understand. Campouts are part our families history and today we are making these same memories with our children. How we see family that we may not have seen in a long time. At night we all sit along the campfire. We will laugh and tell stories. New ones and those that are well worn and we love sitting down and looking up to the stars. They are always brighter in the country. To us, it is not just another piece of land. This land means something to us. The high-speed rail does not propose to cut through. They want the entire property. We don't want to sell and I believe we have the right to keep what is ours. We worked hard for it. We should be able to see the fruits of our labor and raise our kids or grand kids and great grandkids without fear of having it being taken away from us. This an issue about landowners right. That is mighty gracious of you. Now, if these people take our land away from us we are going to have what you would call the last campout. That is where we pick up our belongings and say goodbye to the land we love. If they don't take way our land we are going to have a celebration campout. Tell me which you would like to see.	Refer to ED-1, GN-4 and NE-1.
Logan Wilson	1/31/2018	Oral	Good evening. My name is Logan Wilson. I: and my wife: own 55 acres in the Personville area. We live close to the land in Mexla_ I see: again: that I have three minutes to defend the land thats been in my family for five generations. Thank you so much. How it impacts our family. This	Refer to CR-4, Ed-1, ED-2 NR-1, NR-5 and NR-6. All information provided by landowners and informants, including

			<p>land has been in our family for five generations: that I know of. My aunt: my uncle: and my mother were born on that land: God rest their souls. In our hearts and minds: this place is up there with the Alamo. Most Texans will understand this. These people won't. (her the years: we've spent considerable time: money: and effort in maintaining and making improvements to our farm. We've cleared land: we've built creek crossings: built roads: disced and plowed fields: and planted Bahia and rye grass. Our son has built a camphouse. He and my grandsons hunt on this property: something that they enjoy. Our daughter frequently digs artifacts left by our ancestors in the general site of old Fort Spunky. Our current plans for improvement is to build a lake, a camphouse, and a creek crossing: of great importance to our family: Many families scattered all over the state. While we all visit the land whenever we can: we have a minimum of two reunions--we call campouts--per year; one in the spring: and one in the fall. We look forward to one place we can call our own and have our family reunions. Representatives of TCR provided us with an option agreement: which we refused to sign. They offered to buy the land in total. The proposed line runs diagonally right through the middle of our property. And in the same breath: reminded us that if we should refuse to purchase the land: they can take it from us by eminent domain. As it turns out: they: in fact: do not have eminent domain. If they did, they would be taking our land already: and yours. The bottom line is that land is not for sale at any price: and as long as I have breath. There is not enough money in Tokyo to buy that property. Impact as it relates to the history of the area. Old timers: even older than myself: if you can believe that: talked of a Fort Spunky in the area. Most tell us it was located on the land that we own. Not much of it is known about: because it's been lost in history. We believe that some of the artifacts our daughter has exhumed might be the remains of old Fort Spunky. Impact as it relates to landowners and citizens of the area. The wife and I circulated a petition in Limestone and Freestone Counties. We left the petition at over 100 places of business. In the process of doing this: we had the opportunity to talk to many: many people. I remember only two people who were for this HSR. Our petition was sent to public officials and legislators: contained 3400 signatures. This experience suggests to us that the HSR certainly is not favored by the citizens who know anything about it. You need to find out. Impact as it relates to the environment. We are fortunate in that there has always been an abundance of wildlife on the farm and surrounding areas. We endeavored to practice good stewardship for the wildlife. We hunt in strict accordance with the game laws of Texas: and go even further with our own requirements when we think necessary. We intend to purchase and stock quail this spring. TCR has stated that the rail will not impede the movement of wildlife. In truth: two parallel fences 12 feet high will: in fact: drop an iron curtain across Central Texas: and will indeed impede the movement of wildlife. Common sense dictates that a 200-mile an hour train passing every 30 minutes cannot help but adversely and significantly affect the wildlife: as well as our peace and quiet. Thank you. I'll join you later. Much to say.</p>	<p>oral histories, regarding the presence of historical sites, artifacts, and cemeteries, will be used by project archeologists and cultural resource personnel to locate historic and archeological resources, both previously recorded and unrecorded within the Limits of Disturbance (LOD). If artifacts or features related to Old Fort Spunky are found within the LOD, they will be investigated and assessed for National Register of Historic Places eligibility and subject to the methodology outlined in the Programmatic Agreement.</p>
Logan Wilson	1/31/2018	Oral	<p>Thank you. Well, I'm Logan Wilson, again. We left off talking about the environment. I can save these folks a lot of time. I'll tell you who, and what the most endangered species is. Its landowners, me, and you people. If this thing goes through, there's going to be a whole lot less landowners. Understand that. The greatest threat to the local environment is the land next to us that belongs to kinfolks. On that land, which I'm familiar with, there is what our family has called a dismal swamp. It's been well named. I would say without reservation it is the mother of all swamps. We've never hunted in it because you can't get a vehicle in it, and you can't get big game out of it. There's no doubt that it is a swamp, and it is a haven for deer, hogs, and who knows what. Impact as it relates to Limestone County. Looking at a county map, it is inconceivable that an elevated structure will be built at every county road crossing. There's bound to be many parcels of land cutoff from access. Landowners will quit paying taxes on land they cannot get to, and I wouldn't blame them. The county then will have to build more roads, go-arounds. That's more money; more tax money. No county in Texas I know of could come close to affording this expenditure. The next subject is -- I've termed "Negotiation", for better -- lack of a better term. Last night in Jewett, I asked TCR several questions, and got the same non-answer. The answer was "we will negotiate it". I'll repeat just a few of them here for you; my questions. "For landowners who make a living from the land, how will you compensate them for the loss of income?" "Well, Logan, we'll negotiate that". "For landowners whose land is not taken, but is close by this proposed project greatly diminish the value of the property. How does TCR propose to compensate them?" "Well, we'll negotiate it". "Explain to us how an elderly couple who has been kicked off their land and out of their home can start over". "We'll negotiate it". "We're told by several lawyers that if the proposed rail goes into bankruptcy, we might get pennies on the dollars, according to the bankruptcy laws. How can you guarantee this won't happen?" "We'll negotiate it". "The landowner will lose their mineral rights. Why it takes mineral rights to build a railroad, I don't understand. Why does TCR have the right to take mineral rights to build a railroad?" You guessed it, "We'll negotiate it". In conclusion, TCR touts what they considered the benefits of this project. No mention of the profits to foreign investors. TCR also touts to be a Texas company, but it is known that 80 percent of the investment has been provided by the Japan bank of international cooperation. We're also aware that the proposed HSR in California is an economic disaster. Everyone knows that. While we understand and appreciate the need of eminent domain, we are firm in our opinion that it is grossly misused, and in fact, prostituted in this case. It's being used to condemn private property for the benefit of investors. That's not what eminent domain was supposed to be about. The bottom line is this project is a slippery slope toward the taking of private property for the sole purpose of greed and profit. We have vigorously fought this thing from the beginning, and continue to do so. In the event we lose our land to this ill-conceived</p>	<p>Refer to CR-4, Ed-1, ED-2 NR-1, NR-5 and NR-6. 			project, we plan to have the last reunion on the land; our land. It will be a sad affair where our family will remove what belongings we can, and as we leave say farewell to our beloved land. In the event we prevail, we plan to have a great celebration camp out. The question is, which will it be? Thank you, and God Bless Texas.	
Marsha C. Wilson	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. A move to north of the already existing high power lines would have less impact on the environment and proved less damage to the county long term."	Refer to LU-5.
Welcome Wilson	1/5/2018	Website	This will be of great benefit to the business community of Texas and will add greatly to the reputation of Texas. land owners will be justly compensated for their right-of-way.	Comment noted.
William Wilson	2/5/2018	Website	This high speed rail link between Dallas and Houston will be good for the Texas economy. It will create hundreds of full-time, well paying jobs, in addition to the several thousand jobs required for construction. It will help reduce pollution, take vehicles off the road, and show the rest of the country that Texas can take the lead on bold innovation. We must have the foresight to allow this project to proceed.	Comment noted.
Stephen Wimmer	3/9/2018	Website	The open source Hyperloop concept is faster. Why not go with that design?	Refer to BA-4.
Daniel Wingerson	3/9/2018	Website	I support high speed rail in the State of Texas.	Comment noted.
Daniel Winget	3/9/2018	Website	Build it! Let's be the first state to move into the future	Comment noted.
Timothy Wingfield	3/1/2018	Website	Ideally, the United States would forego party politics and pursue a high speed rail transit system nationwide. We must choose to invest in our future. High speed rail, as found in Japan and other countries in Asia and Europe, is unparalleled compared to America's transit system in terms of safety, carbon footprint, efficiency, on-time trips, ease of use, and speed over certain distances. I've been blessed with the opportunity to visit Japan four times, and I can personally attest toward the value Shinkansen gives back to its community and its economy. The bullet train enabled me to visit dozens of cities from as far south as Nagasaki to as far north as Yamagata. High speed rail enabled me to spend significantly more money as a tourist, given its speedy access to far-flung attractions and hotels. En route, the transit-oriented retail developments were unparalleled; the business opportunities and real estate appreciations outpaced the cost of the projects many times over. Specifically with the private Houston-Dallas proposed line, it is a fantastic and highly needed start toward a nationwide endeavor. Ideally, all portions of the Texas triangle (Houston, Dallas/Fort Worth, Austin, San Antonio, Waco, etc.) would all be connected to each other by multiple HSR lines. This proposed line is the place to start, as it connects the two largest metros in the state. The Houston-Dallas connection already sees time-consuming congestion, both in airport delays and in I-45 traffic, and both of which will only get worse over time. If the Houston-Dallas line is anything like the Japanese lines, ticketing and boarding should only take a few minutes, the train will always run on time, and the trip will only take an estimated amount of 90 minutes. I do not have enough experience to speak toward the Dallas terminal location, although I expect the downtown location to work out well. The	Refer to GN-6, GN-7 and TR-2.

			<p>Brazos Valley location seems to lack the required density for a stop; the route should bend westward to College Station, bend even more westward to stop in Austin-Round Rock (my personal preference), or simply omit the stop for now. Situated roughly half an hour by car from College Station, Huntsville, Madisonville, and Navasota, the company may hope to capture enough business from all four towns, but I personally don't believe the value-time proposition adds up.</p> <p>The Northwest Mall terminal in Houston makes a lot of sense. The area is ripe for a large redevelopment. It is at the nexus of I-10, I-610, and US-290. It is, importantly, very close to the population center of town. Detractors may complain about last-mile issues, but I suspect that automated ride-sharing will complete the last mile with ease. This terminal is surely better located to important Houston destinations relative to outlying Bush and Hobby airports (or a future Ellington Spaceport). Ideally, government entities would work to improve automobile access to the site, as currently the highways bypass the site in overall terms. Also, it would be in Houston's best interest to build the scrapped Uptown light rail plan, connecting the HSR terminal at Northwest Mall to the Galleria.</p> <p>Overall, I highly recommend this high speed rail plan move forward to immediate construction and completion. It is a key investment in Texas' economy and prosperity.</p>	
Alicia Winkelblech	2/28/2018	Website	The City of Arlington strongly supports the Dallas to Houston High Speed Rail project. As the State grows and congestion increases, alternative transportation options will become more critical. The City supports the completion of the environmental process and the full implementation of the project. This project is important not only for the travel corridor between Dallas and Houston, but also for the entire statewide plan for high speed rail.	Comment noted.
Don Winn	2/16/2018	Website	Traffic on our highways is just not getting better, faster, or safer. We need to do everything we can to build an infrastructure for the future. Rail, especially high speed rail needs to be a critical part of that plan. The rest of the developed world has figured this out.	Comment noted.

As a tax payer, we know this will fail and we will be taxed accordingly.</p> <p>4. Ridership is inflated. You've allowed these numbers to flourish without being truthful.</p> <p>5. The aerial photos shown of properties are four years old. Not accurate.</p> <p>6. Thirty families in Grimes county have been filed against because they won't allow surveyors on the property.</p> <p>7. We have traveled trains in many countries because there was a need. There is no need for a bullet train in Texas.</p> <p>8. Ticket cost is ridiculously. \$199 one way. Really!!!</p> <p>9. EMTs in Leon county have told us they cannot serve the community due to road closures.</p> <p>10. Endangered animals are always a concern on any project. However, we've not been contacted by the railroad but each year the coal company does an evaluation, yet this project boasted about the research. Others have testified no research has been done. Again, falsifying the facts.</p> <p>11. The train will stop in Roans Prairie for Aggies! A student is going to get someone to drive him/her 30 miles then pick him up on his return? You can rent a car in Bryan for \$35 per day.</p> <p>12. A church in Normangee is being affected and a cemetery as well. Talking with Austin, they said they'd try to fence off the gravesides but if needed, they would move the bodies! How's that going to workout?</p> <p>13. We urge you to drop this project. This is bad for locals, Texans, Americans, farmers and ranchers. These are just a few things that deeply concerns us We are against this railway.</p>	requirements of the Texas Health and Safety Code Chapter 711, Title 13 Part 2 Chapter 22, Rule 22.4(b) of the TAC - Unknown and Abandoned Cemeteries, and Rule 22.5 of the TAC - Removal of Remains from an Abandoned or Unknown Cemetery.
Jo Winn	2/21/2018	Website	We are totally against the bullet train. Anyone who has viewed this project would know this is economically, humanity and soundly wrong. Look at California, a total loss to mankind. Don't make farmer and ranchers leave their land. Don't take away the good they are producing. This is a private business that is being promoted to come into the breadbasket of Texas. As a 4th generation landowner, please don't take our farm.	Comment noted.
Jo Winn	3/5/2018	Website	The more I see, hear and investigate, the more awful I think this deal is. Why would anyone want this in their state? Why would anyone want to have their land and homes taken away from them in such an ill advised deal. Either there is an evil scheme at large or there are people on the rail board that cannot think nor read. Each person advising should have to research California's situation. Don't do this to Texans. I urge those who are voting on this project to stop this in its own tracks. We don't want this train, we don't need this train. I've lived and traveled in countries where this would be needed or is being used but not in Texas.	Refer to NE-1 and PN-3.
Neal Winn	2/27/2018	Website	This is another Superconducting Super Collider that has face of the Bullet Train! Deceitful from the beginning and cost \$11 billion dollars and which proved to be worthless. Left the Waxahachie area with tunnels and wasted land with landowners holding the bag. Why would anyone try to same thing again. Shameful to use the farmers and ranchers a second time.	Comment noted.
Neal Winn	3/8/2018	Email	I support the Texas Bullet Train and the mall station location! Please stop this bullet train from Texas soil. This is a shame and disgrace to the Texas way of life. I've studied everything available on this project and it is bound for failure. Being an engineer and designing plants all over the world, I know a failure from the very existence. This is a failure to Texas and Texans. Don't take the Texans land who are the bread basket providers. I urge you to halt this train that's on a bad rail For Texas.	Refer to GN-9 and NE-1.
Bryan Wirwicz	3/9/2018	Website	BUILT THE TRAIN! In fact, build the route: Houston, Dallas, Austin, San Antonio. Good economic development and infrastructure improvement for Texas.	Refer to BA-2.
Michael Wisnoski	3/6/2018	Email	I am a constituent in the 8th Texas Congressional District and am writing you today with regards to the Dallas to Houston High Speed Rail Project. I am a resident of Anderson, Texas in Grimes County which lies on the proposed route for the Rail Project. I am writing to voice my concerns in opposition to the Rail Project. According to maps diagramming the proposed route of the rail line, the project would divide a parcel of my families land. This land has been in the family for over a century so you can imagine our dismay as the prospect of the rail line effectively cleaving the land into. In analyzing the proposed route, it is evident that the rail project will consume a great deal Of rural agricultural land where my family as well as many others across the state earn a living through agricultural practices. The division of these parcels across a number of counties by the high-speed rail presents a practical imposition to those families and to mine. It will also create logistical problems for rural families like mine that will have to be rerouted to access our land Once it divided by the rail line. This logistical consideration raises concerns as to whether emergency services and first responders will be able to respond in a timely manner in the presence of the rail line. It has been explained that the construction of the rail line will necessitate the installation of more infrastructure in the form of roads, overpasses, underpasses, and bridges representing a massive amount of public expenditure. I would like to know if there has been enough study to demonstrate whether the project will have enough ridership to fully fund such expenditures on infrastructure. In conclusion, I want my voice to be counted among those in opposition to the Dallas to Houston High-Speed Rail Project. While I understand the	Refer to GN-2, GN-4, LU- 2, LU-7, LU-11, TR-7 and TR-8.

			importance of multi-modal transportation Systems between cities, I feel that the Rail Project is not the proper mode for fulfilling the transportation needs of Texans when the inherent difficulties to my family and families like mine are taken into consideration. Thank you for your attention and help in this matter.	
John S. Wolfe	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.
Donna Wolski	2/16/2018	Website	I do not support the bullet train and the entire project should not proceed. It will fail.	Comment noted.
Ian Wong	2/6/2018	Email	I am writing this email after hearing about the Texas High Speed Rail proposition connecting Houston and Dallas. My family owns property in Waller County (which is directly next to the proposed rail line). I am in staunch opposition to this project as I strongly believe it will not fulfill any need for transportation in Texas. As a native Houstonian that has traveled throughout much of the U.S. and the world as part of my career in U.S. Army Special Forces, I have been able to take note of the negative impacts of places such as train stations in a city. I, for one, would not like the Northwest Mall to turn into an even higher crime area that will attract the likes of drug dealers and prostitutes to the location. This is the trend in every single city that I have been in that has had a train station. I do not see that being any different for Houston's preferred location of Northwest Mall as a train station. Most importantly, my father came to this country' in the 1970s with little money but a lot of determination. Through his work ethic over the past few decades, he has been able to live the American Dream and purchase his own land. I personally do not want to see our family's property either negatively affected or taken away for a private company to make hundreds of millions of dollars building a rail system that will not draw enough revenue to be successful. There are already very affordable and, from what I'm told, nice buses that transport people from Houston to Dallas and vice versa. People are also able to take a very convenient short flight through either airport in Houston to Dallas and back. The environmental, financial, and quality of life impact on taxpayers, most notably the people living in these rural areas, far outweighs any supposed reduction in private vehicle traffic. After seeing first-hand public works projects overseas in such places as Afghanistan and Saudi Arabia far exceed their budgets, I firmly believe this would be a very unwise endeavor. I believe the only ones that stand to benefit are the rail companies that do not actually care if this high speed train system will better the lives of residents of Texas and the politicians who are also driven by greed instead of actually taking the time to assess what the needs of the people are.	Refer to BA-4, ED-1, GN-2, GN-7, GN-9, NE-1, NE-9, PN-3 and SS-8.
Amelia Wood	1/31/2018	Email	Who regulates the use of eminent domain as in the acquisition of land for the proposed high-speed rail project between Dallas and Houston, Texas. THSR implies that if they meet resistance, they can use condemnation to obtain a swath of land cutting through the center of our state. Isn't this a violation of a citizen's property rights as granted by the Fifth Amendment? How is it possible that a PRIVATE company can essentially steal land from families (who in many cases have owned the land for generations) for a PRIVATE venture that could line the pockets of the investors and possibly end up costing taxpayers billions of dollars. How can the Federal Railroad Administration favor this?	Refer to ED-1, ED-2, NE-1 and GA-4.
Brian Wood	2/7/2018	Website	The Dallas to Houston High-Speed Rail project is a signature transportation investment of national significance. We have many international examples to show us the value of HSR, but we need to see it happen in the US. The project creates jobs, reduces the environmental impact of travel versus other modes and decreases travel time significantly. Even though I don't live in Texas, I believe that it is critical that this project moves forward.	Comment noted.

Lindsay Wood	1/25/2018	Website	It will create permanent, well-paying jobs in the railroad industry It's a private company investing in Texas and is not asking for state or federal funding to build or operate the railroad Roads don't pay property taxes but a private railroad will and it benefits towns and cities Frequent schedules will mean I don't have to wait a long time for a train	Comment noted.
Marcus Wood	2/16/2018	Website	I am a native of Dallas born in the 1940s who has seen change and improvements in all forms of transportation in the USA, except for rail which unfortunately lags well behind the rest of the world. The proposed Texas Central Railway between Dallas and Houston will change that. I support that effort which will provide a safer, faster, environmentally, and, yes, financially better means of transportation between these key regions of Texas. I find the DEIS supportive to this effort. There are those opposed today to the Texas Central Railway for many of the same reasons in past decades - opposed to the Interstate Highway system, airports and plane travel, and yes, even the internal combustion vehicles which scared horses. I urge the FRA to move swiftly in completing the Final EIS and Record of Decision in support of the Texas Central Railway. It is time for passenger rail transportation in Texas and the USA to join the rest of the world with this single purpose rail method of transportation. I want to ride on it.	Comment noted.
Erica and David Woodall	2/6/2018	Handwritten	There are so many concerns about the high speed rail. Land acquisitions in rural areas. Emergency vehicles being rerouted unnecessarily being two concerns. After being in the travel industry for over 20 years I know there is no such thing as a privately owned rail supporting itself. It always ends up getting state funding. I also know the commute between Dallas and Houston has been tried by many using smaller airports around IAH and HOU and all have failed. After its initial inaugural period this rail is destined to fail.	Refer to ED-2, GN-4, LU-7, NE-1, PN-3 and SS-23.
Brian Wooddell	1/29/2018	Website	I'm a resident of Fort Worth and am fully in support of HSR across Texas and the nation. This would help the state and national economies and would contribute greatly to the development of Brazos County specifically. My only question is interoperability with other trainsets, specifically the French-style trains used by Amtrak that will (hopefully) be deployed nationwide. If the company developing the DFW- Houston route can figure out a way to accommodate non-Japanese style trains, we will be well on our way to seeing an HSR revolution in the southern United States.	Refer to GN-8, TC-6 and TC-7.
Brian Wooddell	2/20/2018	Website	This is an excellent project that needs to move forward. It will disrupt some lives and land in its path, but that disruption will be nothing compared with the comparable roads and support infrastructure that it would replace. It will also be cleaner and more efficient than the equivalent number of motor vehicles. This project will benefit tens of millions. A little eminent domain is a small price to pay.	Comment noted.
Joseph Woodley	3/8/2018	Website	I request you reconsider the location off the HSR station in Dallas. It should be as close as possible to Union Station to allow connectivity with DART and Amtrak. A location a mile away without adequate DART connection would not be in the best interest of the citizens of the area who utilize Amtrak. From Shreveport, we need to go to Dallas on Amtrak on connect with HSR to Houston.	Refer to GN-7, GN-8 and TR-3.
Audrey Woods	2/21/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easement would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional	Refer to LU-5, NR-2, WW-1 and WW-2.

I believe a move north of the power lines paralleling the existing lines in an established easment would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. Furthermore, I am concerned about the benefit the first responders not available at any other venue.	Refer to LU-5.
Clifton Woods	2/21/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easment would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. Furthermore, I am concerned about charitable benefits as the family is vastly generous about sharing the ranch with those deserving but unable to afford such a nice place. The Morgans and the ranch are a staple for so many people who would otherwise not be able to experience the beauty and nature of rural Texas.	Refer to LU-5, WW-1 and WW-2.
Mindy Wooldridge	2/15/2018	Website	I do NOT appreciate the rich, we-will-do-what-we-want private Texas Central high horses PUSHING their plans on those of us who CHOOSE to live in RURAL Texas!!!! Do we go to Dallas or Houston with our horses, cows, tractors, hay and other livestock and crops and plop them in their skyscrapers and manicured yards?? Don't plopp their electric railroad on OUR land. Statistics are one-sided! Have any of them even attempted to REALLY read up on noise and vibration??? Do any of you even care what re-routed roads will do to school districts or farmers needing to move equipment? I know it does not matter to you about cutting our county completely in two, not to mention family farms and ranches. I know that some things that I have mentioned are more "way of life" than "environmental", but our RURAL county is important. Book a ticket on a plane or drive back and forth to Houston. Heck, do your business online!! Stay in your urban county unless you want to visit country relatives or friends, or buy a fruitcake. We will stay in our RURAL county unless we need a mall, or specified physicians, attend an occasional professional ballgame, or happen to drive there to work, only to return to our QUIET county. OUR county leaders say they do NOT have eminent domain. They say they do. Pardon me, if I believe RURAL folks! I PROMISE the Chinese, whom they are fronting for, DO NOT!! I understand the darn train is even going to be built in China and shipped here in pieces...shameful!!!	Refer to BA-4, ED-1, LU-7, LU-11, NE-9, NV-1, NV-5 and SC-6.
Chris Woosley	1/29/2018	Handwritten	How will this project take into account the enviroment impact species in Navarro County? These rail lines travel thru bald eagle habitats, but also through feral hog country. How will this project prevent Wild hogs, weighing in excess of 500 lbs regularly. from wandering onto the rails? These hogs destroy everything in their path, and it is no a question of it, but when these hogs will derail a train at 200 mph. This is a danger that has been grossly ignored by TCR. How will this project be built safely on our evershifting black soil? This soil shifts regularly, and of train travelling in excess of 200 mph is in imminent danger any time the soil shifts. How does this project necessitate the greater public good requirement for eminent domain? There is no public good gained between Dallas and Houston.	Refer to NR-3, PN-3, SG-2, SS-2 and SS-12. The Project takes into account the impact to species in Navarro County, including bald eagles. Christen Workman	1/30/2018	Oral	Good Evening. I am here on behalf of the thousands of impacted Texans Against High-Speed Rail. It's important for everyone here tonight to know that Texas Central claims of imminent domain authority is still the topic of ongoing litigation and even despite the companies own guidelines of providing proof of authority, they have none. We have shared serious concerns and documented evidence to the members of Congress about the draft EIS being based on illegally obtained information from the illegal surveys and trespassing by Texas Central agents. This proposed route has been selected by little coordination or few regards for the future plans of the impacted passed through counties. Each impacted county were invited to meet just last week following the issuance of the draft EIS to coordinate with technical experts and this is unacceptable. This draft EIS does not contain adequate ridership and revenue information to not even show it is feasible. The EIS for all of North Florida showed a very similar high-speed rail private project includes this information. This information should be the starting point of what is provided to the public not something Texas Central can keep and say just trust us. That is not what this process is about. If they can't get their own numbers accurate like needing 8,000 acres when they told the public they only need 3,000 acres. Or a bait-and-switch like 126 miles of new roads to access their train tracks that they went our county tax dollars to maintain. The county should not trust then and have access to every bit of information available. My question tonight is when will the Texas Central feasibility study be available to the public? You can go to our website or our Facebook page to get more information about our efforts and highlights about many issues this project presents. Our website is <a href="http://TexansagainstHSR.com">TexansagainstHSR.com</a> .	Refer to BA-8, ED-1, GN-1, GN-2, LU-14, NE-1, NE-8, PI-1 and TR-7.

Christen Workman	1/30/2018	Oral	<p>Good evening. My name is Christen Workman. I'm a resident of Leon County, and I'm here on behalf of the thousands of impacted Texas families who make us Texans Against High-Speed Rail. It's important to know for everyone here tonight that Texas Central claims to have eminent domain authority. It's still the topic of ongoing litigation, and even despite the company's own guiding principles of supplying written proof of eminent domain authority, they have none. We have shared serious concerns and documented evidence for our members of Congress about the Draft EIS being based on illegally obtained information through illegal surveys and trespass by Texas Central agents. This proposed route has been selected with zero formation for regard to the future plans of the impacted pass-through counties. Each impacted pass-through county officials were invited to meet just last week following the issuance of the Draft EIS to coordinate with (indiscernible). This is unacceptable. This Draft EIS does not contain adequate financial and revenue information to even show it's feasible. The EIS for all of north Florida, a very similar HSR project, includes this information. This information should be the starting point of what is provided to the public, not something Texas Central can keep hidden and say "just trust us". That is not what this process is about. If they can't get their own numbers accurate, like, "we need 8,000 acres", when they told the public for years that only -- they only needed 3,000 acres, or bait and switch, like, 126 miles of new roads to access their train tracks, and that they want county tax dollars to maintain the pub -- to maintain it, the public should not trust them, and have access to every bit of information available to vet this project properly. You can go to our website, or Facebook page, to get more information about the efforts of Texans Against High-Speed Rail, where we highlight the many issues that this project presents. Our website is <a href="http://TexansAgainstHSR.com">TexansAgainstHSR.com</a>. Thank you.</p>	<p>Refer to BA-8, ED-1, LU-14, NE-1, NE-8, PI-1, TR-7 and TR-8.</p>
Kyle Workman	1/30/2018	Oral	<p>I am probably going to go a lot longer than three minutes. I am Kyle Workman, the President of Texans Against High-speed Rail. I am going to read from mine as well. Thank you. All right. TCR's claim on imminent domain authority is just simply false and misleading and it fails to meet the statutory definition of a railroad, which has been mitigated. In fact, two recent court orders show that TCR is not a railroad. Simply put, TCR can not condemn your property nor force access to survey it as Mr. Miles testified to earlier. TCR has not, as the judge just said coordinated plans with the county. How in the world can they put together a environmental impact statements discussing all the impacts without having gone and discussed all the impacts without having discussed anything with the county governments? It's just absurd is what it is. And as of late Tx.DOT is even absent and we don't know if they are coordinating with Tx.DOT. They have been removed apparently as the co-lead agency. So we are not even sure if the state is being included in this. We will look and make sure that statement legal. The draft impact statement does not grant any authority interest for them to build this project. Their own website says that the FRA says "draft environmental impact statement does not grant any approvals or authorizations for the project." Don't be misled by the fact that it says they are going to start any time soon. Currently, there are no regulations. There are no regulations for two or three railroads that go over 100 miles per hour which is what is generating this whole environmental impact statement. So to be clear, they don't have the authority to run the train let alone build one. So even if -- we just got to keep in mind an ongoing operation issue as well. There is simply no need for this project. If you look at the passenger railroad statistics and now it's almost nonexistent. So now why do we do think people going to ride a train? It is just basically absurd. I believe the no build alternative has not been properly considered due to the stated purpose to get the DEIS. To quote the DEIS, "the no build would not meet the specified purpose and need for this project". Apparently the only evaluation this alternative was against TCR goals and objectives. Which number 1 would be to build the train. Clearly the no build alternative has the least amount of impact on the natural and human environment. Which is the stated objective of the FRA and TCR continues to mislead the public at large with assertions that the impact to these environments will be mitigated and that is just not true. By maximizing the adjacency to existing railroad infrastructure if you look at their picture, it is right next to the power line. None of these will not even be close to the power lines and they know that. I will close with the county leadership has done everything we needed them to do and I am proud to stand by them and for their commitment to the citizens of Leon. If I can do anything let me know. I challenge Texas Central to a public debate anytime. Let's go.</p>	<p>Refer to BA-6, ED-1, GN-1, NE-1, NE-2, NE-6, NE-8, PI-1, PI-1, PN-3 and SS-4.</p>
Kyle Workman	1/30/2018	Oral	<p>Just to start off I will be outside there a little bit longer if anybody has got any questions or comments. I am just going to run down some of things here and this traffic impact study is fundamentally flawed and through prior survey data and as we have heard tonight there has been an enormous amount of impact to the human environment. It is impossible in my opinion to evaluate the impact if you don't talk to every single person that is going to be impacted. We can't rely on a public comment period to really understand how somebody is going to be impacted especially if we didn't or they didn't survey it, right? If they did survey it, we would need to know -- or need the FRA to release the surveys so we can compare that to who all gave authorization to be surveyed. In my opinion, if those surveys were undertaken illegally they should be removed from the impact statement. And they should be disregarded as being not authorized. The FRS needs to extend the comment period again. We've asked for 90 days and we have been granted 15. TCR has had four years to put this together. We have been given 60 days. We can't mount a campaign that's effective to go through that I know and Glenn and Donavon and all kinds of people are pouring through these documents every day. But unfortunately their just so many pages. 6,547 and we did the math. That is 65 pages a day you would have to digest in 60 days. That is not a lot of time to mount a response that somebody can use. We want to know why TCR have continued to be allowed to profit misinformation about this process. Why in the world people think this is a done deal. It is not a done deal.</p>	<p>Refer to NE-2, NE-8, PI-1 and PI-3.</p>

			<p>They are light years away from getting this. They have very little to they are going to have to get approval from our county government and our county government says they ain't going to grant the permit. So why are we sitting here having this conversation about Texas Central about it start because it ain't happening anytime soon if we have anything to do with it. Let's see, I'm sure this thing is going to beep on me. I will be outside if you have any questions. Thank you, everybody, for your support. Lets step this fight up. Let's go.</p>	
<p>Kyle Workman</p>	<p>1/31/2018</p>	<p>Oral</p>	<p>I'm not hot. I don't know what -- Can y'all all hear me? Good evening. My name is Kyle Workman. I am the president of Texans Against High-Speed Rail. We're glad that you're all here. We appreciate your comments and your -- and your attendance here tonight. My comment this evening has to do with the change - Okay. It works now. They just got it working for me. Are you going to start me over, again? My name is Kyle Workman. I'm the president of Texans Against High-Speed Rail. My comment tonight has to do with the change in the purpose and need for the project. When we were originally going through the scoping process back in 2014, one of the key components of that -- Let's see how - - What do they call it? The criteria, and the purpose and need, was for it to be an economically viable transportation alternative. As you can imagine, that's a pretty significant issue. Well, they have now removed the requirement -- or, the purpose and need criterion for it to be economically viable. We all know why, because it's not going to be economically viable. So, if it had to be economically viable, it would not be done, which is what we all expected would happen. So, we think that that is a very significant and substantive change to the overall purpose and need for the project precipitating a new scoping process, and starting over. The other thing I want to point out this evening is that despite the propaganda to the alternative, Texas Central is simply not a railroad. They do not have eminent domain, they cannot force themselves on your property, they cannot serve your property -- survey your property without your permission. So, when you are told that they have eminent domain, that is not true. We have litigated that, we know where it stands, it's not -- it's not really a question at this point. So, please don't be fooled and misled by that information. We have asked for an extension of the Public Comment period. We ask that everybody in here do the same. We asked for a 90-day extension. They gave us 15 days. Texas Central has had four years to put this together. We've been given 75 days to review and respond. That's not -- Not only is it not reasonable, it's absurd. This is a brand new type of project that's never ever been tried before in the United States. We need more time. All of us need more time. If you divide the 5,000 pages by the number of days we're given, you have to read and digest something like 65 pages a day. And all of that technical data, and all the maps have to be evaluated by different experts in the field. So, again, we appreciate your support, we ask that you continue to voice your opinion, and help us oppose this project.</p>	<p>Refer to ED-1, NE-1, NE-8, PI-3, PN-3 and PN-4.</p>
<p>Kyle Workman</p>	<p>1/31/2018</p>	<p>Oral</p>	<p>I could spend all night. A couple of things I want to just point out. And Kim did a good job of explaining this. This process does not grant Texas Central the right to do anything. They don't have this draft Environmental Impact Statement. It's just a step. It's not an end game. It's got -- they've got a lot more that has to be done. Don't let -- don't be misled by the propaganda that says "we're on the cusp of getting this started". As he mentioned, there are currently no regulations for (indiscernible) railroads, railroad that go over 150 miles an hour. As such, even if they got the final record or decision, they still wouldn't be able to operate a train because there are no safety standards in place. So, it's still a very long process that has to take place to get to the end of this deal.</p> <p>We talked about that there's certainly no need for this project. There is currently passenger rail service between Dallas and Houston, and guess what, it goes through San Antonio. Do you know why? There's not enough demand to go from Dallas to Houston. Every time that one of these trains is reasonably successful, they replace existing railway -- passenger rail service. There's no (indiscernible). Someone mentioned earlier I-45. I-45 is not congested in the middle. It's congested on the end. The traffic is not in Buffalo. I drive it every week. I drive to Houston, I drive to Dallas. I know the traffic, and it's not that bad. And if you want to talk about it realistically, talk about traffic, let's get some of the trucks off the road and get some of those containers on freight rail.</p> <p>As I mentioned it earlier, the No-Build Alternative has not been properly evaluated. By Texas Central's own statement, it -- the No-Build Alternative would be absolutely against their purpose and need. So, therefore -- You know, their personal need is to build a train; therefore, we know the No-Build Alternative is not being properly considered. The impacts to the folks -- to the human and the natural environment are much greater than necessary, if this thing proceeds -- if this project proceeds. There continues to be an enormous amount of misleading information about all of that, including the -- there's propaganda that it's going to be running along existing runs. The idea there is to make everybody believe that it's already ruined land, and that ruined land is just something else, we're just going to tag our little train on the side of. We all know that the vast majority of this is going to go through grain fields, farms, and ranch land, prime farm and ranch land, where we can grow crops, where we can have cows that can produce much more per acre than in large -- a larger percentage of the state. This is not the place to do this. One final item, just in close, saying this is not a done deal. Do not give up, do not lose heart. We've got a long way to go. We've got to stick together, but we can do it. So, thank y'all very much.</p>	<p>Refer to BA-2, BA-6, GN-2, LU-2, LU-7, LU-11, NE-2 and PN-3.</p>
<p>Kyle Workman</p>	<p>2/2/2018</p>	<p>Email</p>	<p>Kevin It was truly a pleasure meeting you this week and I appreciate your candor. As a follow up, I ask the following: 1. Will the applicant be required to perform surveys on ALL properties prior to commencement of construction?</p>	<p>Refer to GN-1, GN-2, NE-2, NE-6, NE-8, PI-3, PN-4 and SS-4.</p>

Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS				
Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>2. If the ROD can be issued prior to completing the required surveys, can you help me understand why? It seems that without a complete understand of the impacts to the environment, any ROD would be flawed.</p> <p>3. What is current forecasted timeline for the EIS process, through ROD?</p> <p>4. Can you provide me with the appropriate contact within the Office of Safety for the RPA process? I would like to make contact and understand their timeline(s).</p> <p>5. Can you provide an explanation as to why the granted extension was only 15 days? This seems very light, given the magnitude of the project and the DEIS document, along with the fact that this type of project has not been done in the US. The public at large deserves ample opportunity to evaluate the project in its entirety...75 days is simply inadequate.</p> <p>6. How does the 404 permit fit into the DEIS process? Is its completion/approval a prerequisite?</p> <p>7. Given the modification to the "Purpose &amp; Need", specifically relating to the economic viability, will the FRA be performing any analysis as to the project's feasibility?</p> <p>Again, thank you for your time and candor. I look forward to maintaining an open line of communication. If I can be of service, please let me know.</p> <p>Please feel free to call me to discuss. Thank you!</p>	
Kyle Workman	2/5/2018	Oral	<p>Good evening. My name is Kyle Workman. I am president of Texans Against High Speed Rail. We're going to respectful; we're going to get our point across. I'm actually here in place of we had a switch a little bit. He's in Harris County today. He wanted to send his thoughts and prayers to everybody as well. Everybody knows this has impacted us all. We had a ongoing tip with Texas Central about what's rumor versus reality. There is no question that Texas Central is not a railroad. And in order for you to have eminent domain you have to be a railroad. In order for you to be a railroad you have to have tracks and trains and tracks on train, trains on tracks, excuse me. So consequently there is simply no way that Texas Central has the power of eminent domain nor it's a railroad. Conversely, if they do become a railroad they would have the ability under section 112 to condemn up to four miles wild, two miles from the right of way. So when they say it will never happen that's absolutely false. It's completely false. We all know it's false and I have the and I will be glad to share it to you. As we've heard already, we have a large amount of landowners have shared, their properties have been illegally surveyed. We ask the FRA to discard all that information and reconcile the survey that have been taken to make sure they logged properly nor that permission was granted. As the FRA representative said earlier, this process does not Texas Central the authority to construct, okay. As much as Texas Central would like everyone would believe that they are almost at the end of this process, they're very much at the beginning. One of the things they have to also figure out is where to find 12, 18, 20, 30, 40 billion dollars; that's a "b". That's a lot of money. They're already said under oath they have less than one percent of their funds. We know that they're nowhere near that. The second thing she said is also very important for you to know; I'm not sure you caught it, is that there is this rule of particular applicability which precipitated this particular process. At the end of the day, even if they were to complete the environmental impact statement they don't have the authority to run the train let alone build it. Okay? The rule of particular applicability will give them the safety standards that are necessary for tier 3 railroad. Right now there is no such safety standards in place. So as it stands, they simply don't have the ability to be able to do that. One thing I also want to point out, I find it very interesting Texas Central did a press conference today announces that the FRA had told them exactly where the Houston station was going to go. And our wonderful representative over here just got through telling us that she doesn't know where it's going to go. Just like everything else, everything else everything is smoke and mirrors. They had the mayor of Houston standing on a stage this morning saying we know where it's going to be; it's going to be at the Northwest Mall. And here in Madison County, we have the FRA saying, we have no idea where it's going to be. So which is it? We want to know exactly what's going on here. We need to be told the truth and excruciatingly painful details Right? This is our properties; these or our lands, this is our lives that are being affected. We should be told everything that is going on. With that I will yield my time.</p>	Refer to ED-1, GN-1, GN-9, LU-14, NE-2, NE-8 and NR-7.
Kyle Workman	2/6/2018	Oral	<p>Good evening my name is Kyle Workman, and I'm president of Texans Against High-Speed Rail, and I'm here on behalf of the thousands of people who make up Texans Against High-Speed Rail and we thank you for your support; we thank you for your continued commitment to this particular project and how we'll defeat it. As you know, the Draft Environmental Impact Statement is 5,647 pages. I want you to know that there is a very dedicated team of volunteers and legal experts that are going through that on our behalf, all of our behalf. Texans Against High-Speed Rail is doing what we can to put the resources together that individually none of us could do by ourselves. So we ask that you continue to support us. Frankly, 45, 60, or even 75 days is simply not enough to go through this. This is the first of its kind in the nation. We don't have enough information. It's clearly lacking significant data. We need more time. We're asking -- we've already asked for one extension. We're asking for that extension to be extended so that we can have the ample amount of opportunity to review these documents and to determine the flaws that are undoubtedly in there. As you know, Texas Central continues to undermine the process. Yesterday, the Mayor of Houston stood on a stage and said that he knew that the project was going to be -- that the Houston station would be at the Northwest Mall. You just heard the FRA say to you that they don't know where it's going to go and that it's not their preferred location. Something is amiss. Like</p>	Refer to GN-7, PI-3 and PN-3.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>everything else that we deal with on this project, it's a series of smoke and mirrors. Look over here. Don't look over here. They were so desperate to put out information that would be positive that they came up with a scheme to make Houston believe that the station location had been selected when it indeed has not. Texas Central continues to tell the public that they're going to start construction in 2019. As you just heard from the FRA, the RPA process has not hardly even started. They certainly do not have the authority to run the train or build the train. They are not anywhere near getting that done, let alone finding the \$20 billion to \$30 billion that it would take to actually do this. Make no mistake. They intend to go after federal loans; and ultimately, we will have to pay for that. Eminent domain: I'm going to make something very clear: Texas Central does a rumors versus reality. I'm going to do a little reality check. They simply do not have eminent domain, okay? There's no court order; there's no authority for them. They do not have eminent domain. I have the documents, be glad to share with anybody. We will be submitting our comments officially. We'll share those with y'all when they get there. One last thing: As you were probably aware if you're studying these documents, the purpose and need for the project was changed between the scoping process to exclude one very substantive thing. They took out the economic viability that would be required. Now, why do you think that's the case? Because that would that we require that it would be evaluated for economic availability. Again, in closing, we're here to support you. We thank you for your continued support. If we can do anything to help, we'll be here as much as we can to help. Thank you.</p>	
Kyle Workman	2/16/2018	Email	<p>Jerry and Kevin, As discussed, attached find the letter regarding the realignment or new construction of county roads...Grimes County passed theirs today and other counties are in process. This letter from Leon went out in the mail today, but I wanted to provide you with an advanced copy. How will the FRA/AECOM handle these within the DEIS? Clearly, these letters significantly alter the assumptions utilized in the DEIS and therefore cause a large portion of the findings to become invalid. Surely, one cannot argue that these will be addressed within the FEIS, as the fundamentals must be substantively modified yielding the entire DEIS process mortally flawed and meritless. It seems a redesign is in order, along with a re-issuance of the DEIS and restarting of the comment period. Frankly, this should be considered a cardinal change in the project's design, assumptions, and necessarily the results of the DEIS. I look forward to hearing from you. Thank you in advance.</p>	Refer to ED-3, NE-6 and TR-8.
Kyle Workman	3/2/2018	Email	<p>Thank you, I saw that and took a screen shot. I was hoping for a 8.5x11 pdf that was clear and could be forwarded. I appreciate your time yesterday, my apologies for my passion. Please understand nothing is directed at you personally. Perhaps one of the misunderstanding(s) may be what the FRA is actually assessing through this process. Is there a listing or other explanation documents that outlines what the FRA's required evaluations include? Thank you again.</p>	Refer to GN-1, NE-1 and NE-9.
Kyle Workman	3/5/2018	Oral	<p>Good evening. My name is Kyle Workman. I'm the president of Texas Against High-Speed Rail. I'll go through this about as fast as I can because I want to try to be respectful of everybody's time. As you might know, Texas Against High-Speed Rail is the leading opposition group. We do support not only rural interests but also the urban interests. So we are very interested to understand and hear from y'all that are going through this very same thing that we're going through in the rural areas here in urban. I hear the same comments, the same concerns both in the Houston area, as well as I do out in the rural. Texas does not -- simply does not have the density necessary for this project to be successful and the car ridership is way too high. Everybody owns too many cars. There's not enough density. And so therefore, that's a recipe for disaster. I heard quite a few of the positive comments tonight based on the fact that this will be a, quote, "private rail." I want to make it very clear that the use of federal government loans is not private money. When it fails, it becomes a taxpayer subsidy. We need to be very clear about that when we're thinking about whether or not we want to support this project. As you can see, also, Texas Central wants the City of Houston to finish the project for them. They want to stop out at the Northwest Mall and they want the City of Houston, through Metro, to make the connection to downtown. That, by itself, is, by definition, taxpayer money being put into the project to finish it. The Houston station was located -- excuse me -- Houston station location was announced without the FRA's approval, okay? And so we need to make sure it's very clear that we all understand that the Houston station location has not been decided upon. TCRR is so desperate to buy the comments relating to this project and the direct Environmental Impact Statement that they are offering a raffle for people who submit comments to get a little toy train. So they are trying to influence the system and get more people to be positively -- insert positive comments so that they can ultimately get a little train. What have I got? One minute? Okay. Good. So just make sure you understand that everything that can be done possible to circumvent this very process is being done by Texas Central. One of the things I heard was this was a new and innovative project. I also heard it was a 50-year-old technology project. I'm not sure which it is. But those two are non -- those are noncompatible, right? And the last thing I want to say is, the counties between Dallas and Houston have passed resolutions that will not allow the rerouting of roads. So what you need to understand is, in spite of the propaganda to the contrary, the project -- the DEIS process and the design that's currently in front of us will not be the final design. And so, therefore, the DEIS process is going to need to start over because there's absolutely no way for us to</p>	Refer to ED-3, GN-2, GN-4, GN-6, GN-7, GN-9, NE-6, TR-1, TR-4, TR-8 and PI-4.

			evaluate the project based on the information that we've been provided to date because it simply does not comport with what the law is between Dallas and Houston. Okay. Thank you very much. If I can help you, let me know.	
Kyle Workman	3/9/2018	Email	Kevin, An additional comment: In 2014 the project's purpose and need included economic viability. This was a critical part of the scope assumptions and presentations. The removal of the economic viability from the purpose and need constitutes a material change in the project, thus requiring the initiation of a supplemental scoping period and subsequent DEIS process. The purpose should be consistent throughout the process. Thank you.	Refer to NE-1, PI-1 and PN-4.
Kyle Workman	3/9/2018	Email	The DEIS fails to identify and analyze the impacts to the rural communities and businesses who rely on IH-45 vehicular traffic. Relying on TCR's ridership declarations, enormous focus is placed on the "positive" impacts to the Houston and Dallas economies, but not the negative impact(s) to the small businesses and small towns along IH-45. Many of the small town economies between Dallas and Houston are dependent on revenue from vehicular travel stops between these two metro areas. Reduced revenue, to the businesses along IH-45, will likely result in a reduction in rural jobs and local sales tax revenue which is a vital part of these economies. Thank you.	Refer to BA-6 and SC-21.
Robert Wormuth	3/9/2018	Website	It's about time Texas and the U.S. have high speed rail. If we can approve thousands of pipelines we should approve high speed rail.	Comment noted.
Donnell Wright	2/27/2018	Email	Further by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term. Furthermore, I am concerned about The impact on limited areas for special charitable giving events.	Refer to LU-5.
Donnell Wright	2/27/2018	Email	The preferred route of this rail travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory water fowl of the US.	Refer to WW-1.
Donnell Wright	2/27/2018	Email	Morgan Legacy Farm located near FM 709 and 3194 is irreplaceable. The charitable benefits are something that can truly not be found anywhere else in the area. The benefit the first responders are given at Morgan Legacy Farm is simply not available at any other venue and the value that providing all of it at no cost is immeasurable. There is a suitable alternate route that would not destroy all that the ranch has to offer the community. I highly oppose the current route and am so disappointed the destruction of such a community asset would even be considered.	Refer to LU-5.
Donnell Wright	2/27/2018	Email	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US.	Refer to LU-5.
Donnell Wright	2/27/2018	Email	By separating access on the Morgan Legacy Farm property from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and proved less damage to the county long term.	Refer to LU-5.
Donnell Wright	2/27/2018	Email	There couldn't possibly be a reason to destroy Morgan Legacy Farm in lieu simply moving the rail to north of the existing power line easement. It seems much more appropriate to run the train next to a high voltage power grid already existing. Making the environmental issues far less detrimental to the county. The property and environment that would be destroyed on Morgan Legacy Farm could not be replaced. I strongly oppose the current proposed route.	Refer to LU-5.
Donnell Wright	2/28/2018	Email	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5.
Donnell Wright	2/28/2018	Email	I believe significant damage will occur to the environment and water shed adversely impacting migratory waters of the US. And by separating access of the Morgan Legacy Farm Lodge from the Rodeo Arena and Guest Houses and Stables -the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel.	Refer to LU-5.
Donnell Wright	2/28/2018	Email	Morgan Legacy Farm cannot be destroyed. . If the proposed route is relocated to north of the utility lines the damage to water shed will be lessened and this irreplaceable ranch and it's charitable mission would be spared. So it would be beneficial environmentally, economically and charitably speaking.	Refer to LU-5.
Donnell Wright	2/28/2018	Email	Although I'm sure there has been much research that went into this southernmost proposed route, the chosen route seems to defy logic. The route crosses several local roads and divides several properties. The work on the roads that would be needed to follow this route would obviously add considerable cost to the construction of the rail line.	Refer to BA-5, BA-7, BA-8 and TR-8.

A move to north of the already existing high power lines would have less impact on the environment and proved less damage to the county long term.	Refer to LU-5.
Donnell Wright	2/28/2018	Email	I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property and will potentially cause serious watershed issues. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement.	Refer to LU-5. Properties that front FM 3194 are no longer impacted and access would not be impacted by the Project. The Project would, however, still impact some landowners in the area, specifically the rear of parcels.
Donnell Wright	3/1/2018	Email	I recently became aware of the possible loss of a property due to the proposed route of the HSR. This property listed as Morgan Legacy Farm located near FM 709 and 3194 is irreplaceable. Other than the obvious ecological damage if this route is used the charitable, economic and cultural benefits of this property would be forever lost. It appears to me that if this 6-7 mile line is moved north of the existing power line easement less damage to the county would occur.	Refer to LU-5.
Donnell Wright	3/1/2018	Email	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing powerlines would be less detrimental to the environment and save a unique irreplaceable property.	Refer to LU-5.
Donnell Wright	3/1/2018	Email	I strongly oppose the loss of watershed and loss of water for migratory waterfowl at Morgan Legacy Farms, given the topography construction go this rail would be better suited north of the ranch along the existing power lines.	Refer to LU-5.
Donnell Wright	3/1/2018	Email	Morgan Legacy Farm holds cultural, historical, economic and unique emotional benefits to the county, the state and also has international significance. It cannot be destroyed by the proposed route- I urge the rail to move the route north near the existing power lines and allow Morgan Legacy Farm to continue to serve the community.	Refer to LU-5.
Donnell Wright	3/1/2018	Email	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5, WW-1 and WW-2.
Donnell Wright	3/1/2018	Email	The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory water fowl of the US. Furthermore, I am concerned about The impact on limited areas for special charitable giving events.	Refer to BA-3 and WW-2.
Donnell Wright	3/1/2018	Email	The current high-speed rail routing will be detrimental to Morgan legacy Farm on 709. Dividing this Property and running a rail through it will make it next to impossible to keep a relaxed atmosphere that this Ranch has always provided. I can't even count the number of times that I've sat down there just listening to nature. I have always looked forward to my children been able to go to the ranch and play in the outdoors and learn about nature there. Rerouting the train further north with the powerlines or down I 45 would be a better option.	Refer to LU-5.
Donnell Wright	3/1/2018	Email	I have concerns about the high speed rail in Navarro County travelling through the intersection of 709 and 1394 cleaving Morgan Legacy Farm. At this highest portion in the county I believe significant damage will occur to the environment and water shed adversely impacting migratory waters of the US. Further by separating access of the Morgan Legacy Farm Lodge from the Rodeo Arena and Guest Houses and Stables the train will destroy one of the primary purposes of the ranch which is to provide emotional respite for hospital employees, nurses, fire and police personnel. If the proposed route is relocated to north of the utility lines the damage to the water shed will be lessened and this irreplaceable ranch and it's charitable mission could be spared.	Refer to LU-5.

Donnell Wright	2/27/2018	Email	The current high-speed rail routing will be detrimental to Morgan legacy Farm on 709. Dividing this Property and running a rail through it will make it next to impossible to keep a relaxed atmosphere that this Ranch has always provide. Especially to first responders, doctors and nurses that need a respite more than most. And no one is ever charged for the use of this special ranch that has opened itself up to the community and the world- even having tsunami victims seek comfort there! Do not rip that from the community and those who need it the most- not when another more suitable and less destructive route is possible!	Refer to LU-5.
Donnell Wright	2/27/2018	Email	This route through Morgan Legacy farm causes multiple issues that are truly detrimental to migratory waters, the bald eagle habitat and have a huge impact on the environment that is totally unnecessary. There is an alternate route along the power lines with an existing easement that would make much more sense and not destroy all that Morgan Legacy Farm protects. Destruction of this safe haven is deplorable.	Refer to LU-5.

Donovan Wright	3/1/2018	Email	The possible loss of Morgan Legacy Farm due to the proposed route of the HSR is a travesty. Morgan Legacy Farm located near FM &#160;709 and 3194 is irreplaceable. Other than the obvious ecological damage if this route is used the charitable, economic and cultural benefits of this property would be forever lost. It appears to me that if this 6-7 mile line is moved north of the existing power line easement less damage to the county would occur	Refer to LU-5.

Dora Wright	1/29/2018	Oral	My name is my Dora Wright. My first concern is the rail is gonna be about 20 yards from a water system that seven families use. Are you gonna repair what damage is done while you're building and afterwards. If you're not it's gonna be big trouble and the next thing our house is 100 yards from one of the wells that we built. What kind of sound is it gonna affect us living 100 yards away. And I've lived there 20 years. I moved out there to get away from traffic and the noise and don't look like it's gonna happen that way. It looks like somebody's gonna push us into another situation. So, anyway, I hope you're listening to people that's concerned because it affects a lot of people and my opinion is that majority of the people don't like it but the people that got the money get their way and that's not right. This is a country for the people by the people not for just some people, thank you.	Refer to NV-1 and WW-6.
John Wright	3/8/2018	Website	The HSR project will connect other cities however connectivity in Dallas fails because of the proximity of the proposed station misses the opportunity to connect with Dart, TRE and Amtrak. Transportation is all about connections. Why not locate the new station in walking distance to Dallas Union Station.	Refer to GN-7, GN-8 and TR-3.
Rebecca Wright	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.
Ron Wright	1/29/2018	Oral	Hi. I'm Ron Wright. I'm also a candidate for Congress, but the reason I'm here tonight is to remind you of a couple of simple truths. The first is Navarro County and the other affected counties do not exist for the benefit of Houston and Dallas. That's not why we're here. And the people of these counties should not be made to suffer because the people of Dallas and Houston want something. I don't care how big they are. I don't care how populated they are. And the thought that imminent domain would even be considered for private enterprise for profit to take the land away from these people is an outrage. Look, I grew up milking cows on a farm the other side of Fort Worth, and when you work on a dairy you have to learn to use a shovel because cows have no sense of propriety. And I'm telling you, this project smells an awful lot like what I used to shovel out on that farm. Don't do this. Thank you.	Refer to ED-1 and PN-3.
Daniel Wu	1/25/2018	Website	Hi, as a native Houstonian, please build the high speed rail to Dallas. Our Texas economy is too precious to pass up on a great opportunity to build an even tighter Houston-Dallas synergistic economy. This benefits citizens and businesses and makes more accessible resources from Houston in Dallas and vice versa. As someone who has traveled regularly to Japan, I'm confident that the JR Rail partnership and trains as the best option. Traveling by high speed rail is easier than air and more productive. Through this I hope we will connect all major cities of Texas and in the region.	Comment noted.
Hui Wu	1/26/2018	Website	Although my area would not benefit from this project, immediately, this project is long overdue. The high-speed train will provide convenience and safety to people while protecting the environment. I hope the line can be extended to connect Houston to Austin and Dallas to Fort Worth. If Texas cities of over 100,000 people can be connected by highspeed trains, like in Japan, then Texas would attract more people to live across the State.	Comment noted.
William Tyler Wunderlich	2/11/2018	Website	Dear FRA: I am a proud Texas resident that lives in the Houston metropolitan area. I do believe ideas and innovative thinking are some of the key factors that shows that The United States of America is the land of opportunity. I'm grateful for having Constitutional rights as an American citizen,	Refer to ED-1, GN-2, GN-4, GN-5, NE-1 and VA-3.

			<p>and I express my sincere gratitude of being able to have the right to vote. Since I have the right to vote, I am here to vote NO on the high speed train proposed to be built from Houston to Dallas, TX. I believe it will cost taxpayers significant amounts of money, and property taxes will have no choice but to go sky high. In addition to what I stated is the government will then have the right to commit to eminent domain which I believe is wrong. Many generations of families that reside between Houston and Dallas have rich farmland and rich history in their households they hold dear to their hearts. I also believe it's wrong to have a high speed train because it won't be cost effective, and ridership will be at an all time low that will never break even with the maintenance costs on the train systems alone. Thank you for allowing me the opportunity to vote on this proposal, God bless Texas, and God Bless America.</p> <p>Regards: William Tyler Wunderlich</p>	
Claude Wynn	3/9/2018	Website	<p>On behalf of the South Main Alliance in Houston, Texas, we ask that the Federal Railroad Administration swiftly move forward with the approval of your environmental review and approval of the Texas Bullet Train that will connect Houston to North Texas in 90 minutes. The South Main Alliance was founded based on recommendations in the National Endowment for the Arts funded study "Options for a Unique Texas Place" that urged creating a framework for collaboration to protect and enhance a special area of Houston with great diversity and quality of life. Supporters of the South Main Alliance include the Hermann Park Conservancy; Houston Community College - Central Campus; Houston Livestock Show &amp; Rodeo; Houston Museum District Association; Houston Texans; Miller Outdoor Theatre; Museum of Fine Arts, Houston; Rice University; Texas Medical Center; and the University of St. Thomas, among others. The Texas Bullet Train will be an economic driver for the region, the state and our country. Not only does it plant the seed of a new industry in Texas and the United States, but it is projected to generate a \$36 billion economic impact over its first 25 years. The recent release of the Draft Environmental Impact Statement (DEIS) confirms this with detailed data and projections. We support this project because in part it will:</p> <ul style="list-style-type: none"> <li>Create jobs for Texans - more than 10,000 direct jobs per year during construction and up to 1,000 jobs permanently when operational -- at least 25% of them in rural counties along the route;</li> <li>Increase tax rolls in ALL impacted counties - \$6.5-\$7 billion net positive tax impact by 2040;</li> <li>Bring the safest mass transportation technology in the world to Texas - Shinkansen trains boast a 53-year history with ZERO crashes or fatalities while in operation;</li> <li>Be a cleaner way to travel - an environmentally-friendly alternative to flying or driving in an area where 4 of the counties served are already air quality non-attainment status;</li> <li>Preserve land access for property owners - a majority of the 240-mile route will be built on elevated viaducts, allowing easy access from one side of the tracks to the other;</li> <li>Give travelers with disabilities a safe, comfortable alternative to driving or flying - system meets or exceeds the requirements of the Americans with Disabilities Act (ADA).</li> </ul> <p>The need for this project is clear. According to the Texas Transportation Institute, I-45 will see an increase in vehicular traffic of more than 200% between Dallas and Houston by 2035 - and current state and local transportation plans cannot adequately address these growing population concerns. We are excited to support the first true high-speed passenger train system in the United States - a transportation infrastructure project of national importance that will provide a safe, reliable and convenient travel alternative between Houston and North Texas and we ask that you expeditiously process the remaining steps in the review.</p>	Comment noted.

Miles Yao	2/23/2018	Website	The US has fallen way behind Europe and Asia in modern public transportation. Given the crumbling gridlocked highways and the jittery gridlocked customer-hostile commercial flights, a fast, high-capacity alternative like HSR is sorely needed. As Europe and Asia demonstrated, a strategically-designed HSR network can unleash a huge multiplier effect on the economy by integrating disparate population centers into one commutable "virtual city". People can jump on the train at a moment's notice and zip to another city far away, conduct business, and zip back in the same day. And Dallas-Houston have exactly the size, distance, wealth, and complementary economies to showcase HSR's potential.	Comment noted.
Bob Yarger	2/7/2018	Website	This project is a win-win project for all and should be approved.	Comment noted.
Cecil Yates	2/16/2018	Website	I support the DEIS. I believe it is needed by Texas as just one of many ways to serve the needs of the explosive population growth in the major commerce centers in our state.	Comment noted.
Cecil Yates	3/8/2018	Website	I believe this would be beneficial to both the Dallas Fort Worth and Houston economies. I definitely would travel to the Houston area more often for tourism, and I would think Houston area residents would reciprocate. This would also put either city within easy reach for travelers flying into Houston International or D/FW Airport. This, again, would be beneficial to commerce in both areas.	Comment noted.
Maria Teresa Yates	3/9/2018	Website	I strongly agree with the approval of the Dallas-Houston High Speed Rail Train. It will improve the transportation choices of the residents on both cities as well as the students attending Texas A & M. It will make a big difference for the persons, like myself, that do not enjoy driving 4 hours to go to Dallas. Or, if you fly, have to waste 2 hours at the airport. It is time for Texas to have a reliable and first class medium of transportation like Europe, Japan and China already have. This project can be the beginning of low cost and effective transportation for everyone.	Comment noted.
Erdem Yaziciogla	1/26/2018	Website	I support building this train	Comment noted.
Catherine York	2/5/2018	Letter	NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of the Waller/HARRIS County area, the proposed alignment of the High Speed Rail will run through a large portion of the Waller ISD's district. This would negatively impact bus routes, which may cause Waller ISD to purchase additional school buses to transport student, and accommodate delays to county and private roads being impacted and/or closed by the proposed High Speed Rail project. The safety of our children is the utmost concern for our Waller/Harris County residents, parents, and school facility. Why add the risk? Why add the tax dollars, to withstand this unneeded debt to our community. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS	Refer to SC-5.
Catherine York	2/5/2018	Letter	NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY It would be a huge devastating issue for the residents, and community Of Waller/Harris County. Our residents, and our community area would be living, working, functioning day to day within the noise and vibration within noticeable distance. The sight Of the rail, as well as the 90 minute train, that will pass several times a day. These high speed rails are elevated, which would add to the distracting visible eye sight Of Waller/Harris County. HSR's are known for derailing, and that would add devastating issues to the surround area of Waller/Harris County. This would add concerns of safety for our Waller/Harris County residents in that existing surrounding area, as well. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS	Refer to AS-1, NV-1, NV-5, SS-1 and TC-4.
Catherine York	2/5/2018	Letter	NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY Today in our community, we are very fortunate to be able to drive by, admire, and learn the history of this community of Waller County. An Army Corps of Engineers Section 4 Permit report has revealed four archaeological sites, and two pre-historic sites considered at this time for inclusion in the National Register of Historical Places. my deprive our County of this Historical Event. Due to the fact that FRA FAILED to COORDINATE with THE LOCAL WALLER COUNTY GOVERNMENT, stop this disaster from destroyed our "HISTORY". NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS	Refer to CR-9 and PI-1.
Catherine York	2/5/2018	Letter	NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of the Waller/Harris County Area, the "Need and Purpose" of this project has not been shown to date. A High Speed Train would not be beneficial to our land, our city, our community, our schools, our roads, our emergency services, and neighboring communities. HC-4route through Waller County, is some three miles west of the original publicity noticed route, and changed without any opportunity for public input from those affected. EMERGENCY SERVICES could be negatively impacted by the HSR line, due to its potential impact on our county and private roads. Many of which are used for emergency vehicles that now service the District and provide an 8 - minute response time. This HSR goal is to service from only one city central to the next city central with a possible ONE stop in-between. This HSR will not benefit Waller residents in anyway. Why make our community pay the price of a future disaster to take place in our wonderful small community. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS	Refer to BA-3, PI-1, PN-3, SC-6, SC-19, SS-1, SS-23, TR-1 and TR-8.
Catherine York	2/5/2018	Letter	NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident Of Waller/HarHs County, am worried about the impact Of the High Speed Rail would have on the Conservancy, which is a biologically diverse powerhouse with more than 300 species of birds, 110 species of mammals, amphibians and reptiles and more than 600 species of grasses, wildflowers, trees, vines and shrubs. A 200 MPH train barreling within one	Refer to RF-4.

Cathy York	2/5/2018	Letter	<p>NO HIGH SPEED RAIL WALLER/HARRIS COUNTY This project will create an obsolescence that will negatively impact the property values in Waller/Harris County. The proposed route will cause people to lose value in their property, and decreased valuation of property will cause lower tax revenue collected and school districts, cities, emergency services and all public entities will lose income reducing the services that are provided to the citizens who pay the taxes. As a resident of the Waller/Harris County area, FRA, High Speed Rail. failed to coordinate with the local Waller County Government, and it is obvious it would not be beneficial to our area. Looking at the proposed route, the HSR will run through a large number of pieces of private property owned by myself and many of neighbors and friends. The train will be felt by the surrounding residents up to 2 miles (either side Of the rail), which would definitely cause future foundation issues to surrounding homes in the close proximity Of the proposed route. This proposed route Of HSR's goal is to service from only one City central to the next city central with a possible one stop in-between. This HSR will not benefit one Waller resident in anyway. In fact it will add many safety concerns. Why make our community pay the price of a future disaster to take place in our wonderful small community. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR HIGH SPEED RAIL IN TEXAS</p>	<p>Refer to LU-14, NV-5, PI-1, SC-19, SG-2, SS-1, TC-4 and VA-1.</p>
Cathy York	2/5/2018	Letter	<p>No high Speed Rail for Waller/Harris County I am a resident of Waller/Harris County. Our community has dozens of roads planned that will make transportation times more doable, that will bring more residents to this area, as well of jobs, and businesses. But, none will be able to be completed If The High Speed Train Cuts through, which will also be Stifling to All Future Economics Development in this area.</p> <p>HC-4 route through Waller/Harris County: This route is some three miles west of the publicly notice route, and changed without any public input from those affected: Waller/Harris County. FRA Failed To Coordinate With The Local Waller County Government.</p>	<p>Refer to PI-1 and SC-13.</p>
Cathy York	2/5/2018	Letter	<p>As a resident of the Waller/Harris County Area, I take pride in my neighbors, and community. The IMPACT ON THE CITY OF WALLER, one of my main surrounding areas in my community I feel the HSR will affect. The HC-4 Route passes through the civts extraterritorial jurisdictions and through the planned Waller Town Center. HC-4 passes through the Delta Troy Interests, a 990 -a tract being held for housing and commercial development. HC-4 also passes within 4.000 feet of the Dgikin/Gpgdmgm facility. FEASIBILITY OF PROPOSED HIGH SPEED RAIL, The Reason Foundation, concludes that the proposed high speed rail project could lose over \$500 Million a year. Why pass that future disaster and clean up debt on to the surrounding communities of the Waller/Harris County Area.</p>	<p>Refer to AQ-7, GN-3, LU-4 and NE-1.</p>

			these developments and destroys the economic viability of them and the value of everyone's property, which is devastating to each individual and or piece of property of each resident. Why? Why destroy this TEXAS soil with a HSR? Our community is made up of beautiful acreage, and residents that have paid high dollar for their Texas Soil. Stop the High Speed Rail in Waller/Harris County, say: No To High Speed Rail, save our Communities, save our Texas Heritage, Save Our Land. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS	
Cathy York	2/5/2018	Letter	REFERENCE: FARM, AND SHOW ANIMALS. AND THE MAJOR IMPACT OF HIGH SPEED RAIL PLACE ON THEIR GROWTH PERFORMANCE. PRODUCTION AND SUPPLY OF LAND FOR TABLE NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY Our Homestead in Waller/Harris County supplies numerous benefits as the pleasant viewing of the farm animals, as well as the High Dollar Show Lambs, my family enjoys on a day to day basis. Each one of these is a big source of our daily nourishment. As we all know, animals are sensitive to the vibration sounds, panic, that they would be subjected to these continued effects, even 90 minutes due to the High Speed Train. Our family has supplied generations to come with the lifestyle of animal life, which so many never benefit from. As we all know THE FEASIBILITY OF THE PROPOSED HIGH SPEED RAIL, The Reason Foundation, concludes that the proposed high speed rail project could lose Over \$500 Million a year. Stop this madness, let today's, tomorrow's, and future generations enjoy this lifestyle of Farm of Nature, Land and Animals, which so many miss in today's world. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS	Refer to NE-1 and NR-1.
Cathy York	2/5/2018	Letter	This project will create an obsolescence that will negatively impact the property values in Waller/Harris County. The proposed route will cause people to lose value in their property, and decreased valuation of property will cause lower tax revenue collected and school districts, cities, emergency services and all public entities will lose income reducing the services that are provided to the citizens who pay the taxes. As a resident of the Waller/Harris County area, FRA, High Speed Rail, failed coordinate with the local Waller County Government, and it is obvious it would be beneficial to our area. Looking at the proposed route, the HSR will run through a large number of pieces of private property owned by myself and many of neighbors and friends. The train will be felt by the surrounding residents up to 2 miles (either side of the rail), which would definitely cause future foundation issues to surrounding homes in the close proximity of the proposed route.	Refer to PI-1, NV-5 and VA-1.
Cathy York	2/5/2018	Letter	NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY As a resident of Waller/Harris County, I am devastated each time there is volume-over abundance of rain in our Community, now! Waller/Harris County cannot take the impact of more water entering or be retained by the development of the holding walls the High Speed Rail will add to our community. Local Environmental Impact includes the Spring Creek Watershed where five creeks will cross the tract of the HSR. Stop this future flooding issues from adding to our drainage issues, stop the HSR. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS.	Refer to FP-1, FP-4, SS-17 and WW-8.

Frank D. York	2/6/2018	Handwritten	<p>REFERENCE: IMPACT ON WALLER INDEPENDENT SCHOOL DISTRICT NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY</p> <p>As a resident of the Waller/HARRIS County area, the proposed alignment of the High Speed Rail will run through a large portion of the Waller ISD's district. This would negatively impact bus routes, which may cause Waller ISD to purchase addition school buses to transport student, and accommodate delays to county and private roads being impacted and/or closed by the proposed High Speed Rail project.</p> <p>The safety of our children is the utmost concern for our Waller/Harris County residents, parents, and school factuality. Why add the risk? Why add the tax dollars, to withstand this unneeded debt to our community.</p> <p>NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY OPTION FOR TEXAS</p> <p>Sincerely From a Concerned Resident of Waller/Harris County.</p>	Refer to SC-5 and SC-8.
Frank D. York	2/6/2018	Handwritten	<p>REFERENCE: IMPACT OF QUALITY OF LIFE NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY</p> <p>"Quality of Life", would be a huge devastating issue for the residents, and community of Waller/Harris County. Our residents, and our community area would be living, working, functioning day to day within the noise and vibration within noticeable distance. The sight of the rail, as well as the 90 minute train, that will pass several times a day. These high speed rails are elevated, which would add to the distracting visible eye sight of Waller/Harris County.</p> <p>HSR's are known for derailing, and that would add devastating issues to the surround area of Waller/Harris County. This would add concerns of safety for our Waller/Harris County residents in that existing surrounding area, as well.</p> <p>NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS</p> <p>Sincerely From a Concerned Resident of Waller/Harris County.</p>	Refer to AS-1, NV-1, NV-5, SS-1 and TC-4.

Frank D. York	2/6/2018	Handwritten	<p>REFERENCE: IMPACT ON HISTORICAL SITES NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY</p> <p>Today in our community we are very fortunate to be able to drive by, admire, and learn the history of this community of Waller County. An Army Corps of Engineers Section 4 Permit report has revealed four archeological sites, and two pre-historic sites considered at this time for inclusion in the National Register of Historical Places. Why deprive our County of this Historical Event. Due to the fact that FRA FAILED TO COORDINATE WITH THE LOCAL WALLER COUNTY GOVERNMENT, stop this disaster from destroyed our "HISTORY".</p> <p>NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS</p> <p>Sincerely From a Concerned Citizen of Waller/Harris County.</p>	Refer to CR-9.
Frank D. York	2/6/2018	Handwritten	<p>REFERENCE: IMPACT ON HEWLETT PACKARD DATA CENTER NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY</p> <p>Waller County welcomes large growth for our community, Hewlett Packard Date Center Enterprise is currently not in a position to approve or disapprove the proposed route of HSR. This Data Center would bring jobs to the Waller/Harris County. However the proposed route would have very serious negative impact on our Waller/Harris County property of the critical outcome of the data center operations at the proposed property.</p> <p>FRA FAILED TO COORDINATE WITH LOCAL WALLER COUNTY GOVERNMENT. Our Waller/Harris County Community deserves to be abreast of our county government functions happening in our surrounding county area. Our Government cannot do their job property if FRA failed to coordinate with our local county government, for the High Speed Rail in our area.</p> <p>As a resident of Waller/Harris County, I do not feel the "Need and Purpose" of this project has "not" been shown. It does not benefit our Waller County Community in any way.</p> <p>NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS</p> <p>Sincerely From a Concerned Citizen of Waller/Harris County.</p>	Refer to SC-11.
Frank D. York	2/6/2018	Handwritten	<p>REFERENCE: IMPACT ON WALLER HARRIS EMERGENCY SERVICES DISTRICT NO. 200 NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY</p> <p>As a resident of the Waller/Harris County Area, the "Need and purpose" of this project has not been shown to date. A High Speed Train would not be beneficial to our land, our city, our community, our schools, our roads, our emergency services, and neighboring communities. HC-4 route through Waller County, is some three miles west of the original publicity noticed route, and changed without any opportunity for public input from those affected.</p> <p>EMERGENCY SERVICES could be negatively impacted by the HSR line, due to its potential impact on our county and private roads. Many of which are used for emergency vehicles that now service the District and provide an 8 — minute response time.</p> <p>This HSR goal is to service from only one city central to the next city central with a possible ONE stop in-between. This HSR will not benefit Waller residents in any way. Why make our community pay the price of a future disaster to take place in our wonderful small community.</p> <p>NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS</p> <p>Sincerely from a Concerned Citizen of Waller/Harris County.</p>	Refer to BA-3, PI-1, PI-8, PN-3, SC-7, SC-19 and SS-23.
Frank D. York	2/6/2018	Handwritten	<p>REFERENCE: IMPACT ON KATY PRAIRIE CONSERVANCY NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY</p> <p>As a resident of Waller/Harris County, I am worried about the impact of the High Speed Rail would have on the Katy Prairie Conservancy, which is a biologically diverse powerhouse with more than 300 species of birds, 110 species of mammals, amphibians and reptiles and more than 600 species of grasses, wildflowers, trees, vines and shrubs. A 200 MPH train barreling within one miles of this migratory bird sanctuary is going to cause bird collisions and accidents. This Is also where important wetlands of the Waller County area exist, which will be directly or indirectly affected by a HSR corridor.</p> <p>As our community grows, with progress, why tear each mile Stone down, with an un-needed, un-wanted high speed rail. How can Waller County grown with this no-nonsense HSR in our area!</p> <p>NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS</p> <p>Sincerely From a Concerned Resident of Waller/Harris County.</p>	<p>Refer to NR-2, RF-4 and WW-2.</p> <p>For information regarding impacts to wildlife and vegetation please see <b>Section 3.6, Natural Ecological Systems and Protected Species</b> and <b>Section 3.6.5.2.2, Natural Ecological Systems and Protected Species, Wildlife</b>. Impacts to wildlife and vegetation will be minimized due to compliance and mitigation measures listed in <b>Section 3.6.6.1, Natural Ecological Systems and Protected Species, Compliance Measures and Permitting</b> and <b>Section 3.6.6.2, Natural Ecological Systems and Protected Species, Mitigation Measures</b>.</p>
Frank D. York	2/6/2018	Handwritten	<p>REFERENCE: IMPACT ON G&amp;W WATER NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY</p> <p>As a resident of Waller/Harris County, and after the research on the devastating affects the high speed rail would put on our community, my concern with the quality of local drinking water which would have a potential impact, with a High Speed Rail Track and Train operating within feet of this Water Tower.</p>	<p>Refer to GN-3 and WW-6.</p> <p>The Project would not impact the water tower. The rail would be located approximately 320 feet from the water tower.</p>

Frank D. York	2/6/2018	Handwritten	REFERENCE: IMPACT OF PUBLIC SAFETY NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY To me public safety is a big issue, a factor in our day to day operations, as wemove from location to location within OUT community as it is, day to day!!! The HIGH SPEED RAIL TRACKS would pass with approximately of 580 feet of a Natural Gas Pipeline Compressor Station. THIS HAZARD IS NOT ADDRESSED!!! NO one has considered the lives of the residents that live in our community, or our safety of an explosion, from the speed of the train. Again FRA FAILED TO COORDINATE WITH THE LOCAL WALLER COUNTY GOVERNMENT!!!!!!!!!! NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY VIABLE OPTION FOR TEXAS Sincerely From a Concerned Citizen of Waller/Harris County.	Refer to EU-2, EU-6, EU-7 and PI-1.
Frank D. York	2/6/2018	Website	REFERENCE: FARM, AND SHOW ANIMALS, AND THE MAJOR IMPACT OF HIGH SPEED RAIL WILL PLACE ON THEIR GROWTH, PERFORMANCE, PRODUCTION AND SUPPLY OF LAND TO TABLE NO HIGH SPEED RAIL FOR WALLER/HARRIS COUNTY Our Homestead in Waller/Harris County supplies numerous benefits as the pleasant viewing of the farm animals, as well as the High Dollar Show Lambs, my family enjoys on a day to day basis. Each one of these is a big source of our daily nourishment. As we all know, all animals are sensitive to the vibration sounds, panic, that they would be subjected to these continued effects, every 90 minutes due to the High Speed Train. I feel our family has supplied generations to come with the lifestyle of animal life, which so many never benefit from. As we all know THE FEASIBILITY OF THE PROPOSED HIGH SPEED RAIL, The Reason Foundation, concludes that the proposed high Speed rail protect could lose over \$500 Million a year. Stop this madness, let todays, tomorrows, and future generations enjoy this lifestyle of Farm Of Nature, Land and Animals, which so many miss in today's world. NO BUILD OPTION SHOULD BE CHOSEN AS THE ONLY OPTION FOR TEXAS	Refer to GN-3, NE-1 and NR-1.
Chelsea Young	2/27/2018	Website	I strongly support the Dallas to Houston High-Speed Rail project, and look forward to progress on building it. Texas is such a thriving and productive state to live and work in, and tying together these two major metropolitan areas via high speed rail will support and enhance our productivity and quality of life. I personally have family and business relations in the DFW area, and know that I would use the rail frequently once it is up and running. Thank you for the updates and I am hopeful for more progress on this great project.	Comment noted.
Lynn Young	3/3/2018	Email	My name is Lynn Young and I am a Resident of Denton Tx, I am writing to you about the proposed route for the high speed rail. The current proposed path will go directly through The Morgan Creek Legacy Farm located off hwy 709 in Navarro county. If the rail is allowed to take this route in will have a profoundly negative impact on the property. The farm is a retreat that has been enjoyed by many at no cost, Bob Morgan allows friends, family, and international guest to stay on the property and take in the wild life, ride horses, and explore the property. I ask that you please explore alternate routes to include a route north of the power lines off of the property. Thank you for your time,	Refer to LU-5.

Marc Young	2/6/2018	Oral	My name is Marc Young from the state of Texas. I am candidate for Texas HD-13, just like Ben Leman here. While he and I may not agree on everything, we agree on the fact this high-speed rail should be a no build option. I am a licensed engineer in four states, including Texas, and currently reapplying for the fifth, Alaska, unintelligible because I was busy involved in the campaign. I'm also a licensed engineer in Oregon, probably one of the most severe environmental states to deal with. I'm not going to be directly affected by the high-speed rail, other than I might want to represent some of these people if I'm lucky. But I've been exposed to similar projects, Trans-Texas Corridor which mapped five routes across my land. The DEIS that was done was hastily prepared, and when I compared the other alternatives that were not considered, I was able to reduce by one half all of the impacts that were reported. I have looked at the high-speed rail DEIS, and it is my opinion--and remember, I'm a licensed engineer--that it was hastily prepared and -- in my opinion it was hastily prepared. I have gone back to the original route selection due to questions that it raised. This is the original 2015 report. This is where the original sloppy work was done. I found severe fault with the underlying report. It is missing some key criteria for the selection process. One I could point to is a Farmland Protection Policy Act. This is a -- no consideration was made for this required NEPA consideration by FRA. It is a requirement. My summary of the report was that people's homes, their farms, and livelihoods were not as important as a few trees in the Sam Houston forest. I'd say these studies are seriously flawed, so no build alternative is the only option. And I'd also emphasize -- Mr. Mannina is correct about one thing. Grimes County has the worst overall health outcomes of all the rural counties in 13. You layer this additional response time on top of that, they're going to go from about 134 to probably the 254th out of all the counties in Texas. In 2011 -- you know, I worked for president [sic] Perry in his presidential campaign. Now, why would someone whose home was threatened by the Trans-Texas corridor do that? It was because when we opted for the no build option in Trans-Texas, he respected it.	Refer to BA-8, BA-11, NE-7 and SS-23.
Marc Young	3/4/2018	Website	In reviewing the DEIS with respect to the NRCS input forms NRCS-CPA-106 which is the LESA evaluation that was performed for the DEIS in 2016, the form which is attached has three routes that have been considered. Since 2015 only one route has been selected to run through Grimes County. Also the basis for the evaluation appears to be flawed in that the wrong major crop and thus soil type was selected. Grimes county is not a cotton, milo or corn producing area and in fact the Selected Route Segment 5 actually crosses through two distinct regions. One of prairie hayland where forage is a major crop and then a Forest Area where the major crop may be timber or if cleared also forage (hay). The evaluation was artificially low due to the selection of the wrong crop type using a default which sets the soil type. A request was made of the NRCS to justify their evaluation and to get copies of the information used as inputs to the LESA process. The NRCS has put up an objection to providing such material first thorough requiring a FOIA request, then suggesting that a non-applicable set of exemptions be applied. An appeal has been submitted. It should be required that a tolling period be required before closing the commenting period until the validity of these exemptions be determined and it be determined whether NRCS has erred in its required Farmland Protection Policy Act before any additional work be authorized on this high speed rail line or any additional federal funds be expended as mandated by the Act.	Refer to NE-1 and WW-9.
Larry Youngblood	1/30/2018	Oral	Kevin Ellis brought up a few things that I wanted to talk about, which regardless of where this thing goes. While it is under construction how are EMS going to get around? We are going to have to reassign all our 911 calls. How are the fire trucks going to run? I support the fire trucks as everybody does her. You got to put in a little money every year. How are they going to get there for you? I just don't see that happening right now. Apparently, at this juncture, I haven't seen or heard anybody say yes we have coordinated with this group. We know actually how we are going to handle 911 and EMS. How are they going to land these helicopters that have to come around here and pick up people that have heart attacks when you have windmills all over the place. If I was them I would not show off those windmills in my advertisement. How are we going to get from point A to point B? The emergency vehicles and the sheriff and the EMS?	Refer to SS-23.
L Yudovich	2/26/2018	Website	I oppose the location of the High Speed Rail as the currently planned route cuts directly through Morgan Legacy Farms (located on FM 709 and 3194). Morgan Legacy Farms' bald eagle habitat and migratory waters will be disrupted. Also, this ranch serves as a retreat facility free of charge to numerous non-profit organizations. If the route was moved north of the existing power lines, it would be save Morgan Legacy Farms so it can continue to serve the community and environment.	Refer to LU-5.

**Table H-12: Response to Comments Received on the Dallas-Houston HSR Draft EIS**

Submitted By	Date Submitted	Submission Type	Comment	Response
George Z	2/7/2018	Website	This defines 'no brainer' in my book. More connections - more strength. All my friends support rail, no surprise, but why do we have to invent the wheel all over again with every project. Like I said, no-brainer. georgeZ	Comment noted.
Maggie Zarrabi	2/26/2018	Website	Dallas to Houston High-Speed Rail Environmental Impact Statement The suggested route will disrupt the natural habitat of Morgan Creek Farms. Also by separating access from the lodge to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the ability of the Ranch to provide Charitable events. I would suggest to move the lines north of the power lines.	Refer to LU-5.
Tim Zbylot	2/6/2018	Handwritten	I support the comments listed below and offer them as evidence supporting the "No Build Alternative" 1. I support the "No Build Alternative" on the Texas Central Railway High Speed Rail in Texas. 2. I support the "No Build Alternative" and recommend that the Federal Railroad Administration, US Department of Transportation revisit their vision for the need of High Speed Rail in Texas. 3. I support the "No Build Alternative" and recommend that the Federal Railroad Commission study the use of existing infrastructure to it's fullest extent before allowing any private company eminent domain authority for a project that due to cost will be prohibitive for use by all citizens of Texas. 4. I support the "No Build Alternative" because there is no mitigation for loss of agricultural land or evaluation of such impact. 5. I support the "No Build Alternative" because the current DEIS does not take into consideration sites that have significant historical or cultural significance, such as cemeteries, farms and buildings that may qualify as historical sites. 6. I support the "No Build Alternative" because the current DEIS does not offer any consideration that the building and operation of HSR results in land take, noise and air pollution, visual disruption and a high consumption of electricity.	Refer to AQ-1, AS-1, BA-4, BA-6, CR-3, CR-4, CR-6, CR-11, CR-13, ED-1, ED-2, EU-4, LU-2, LU-11, NE-1, NV-1 and PN-3.
Tom Zellers	3/9/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military.	Refer to LU-5, WW-1 and WW-2.
Yiping Zhou	3/8/2018	Website	My house is very close to the High-Speed rail. And I really have big concern about: 1) big noise affect the environment 2) potential health affect 3) house's property value According to the information I got, the high-speed railway will use more than 50 years old Japanese technology, as technology has been developed so fast, it's very unwise to pay so much money for the old technology, and definitely, the old technology will create more environment and health issue to the local resident.	Refer to NV-1 and TC-2.
Lihui Zhuang	2/7/2018	Website	1.What is Segment 2B mean? 2.My House is in the yellow zone what does that mean? 3. what is Residential within LOD mean? 4. under Structures my house consider Residential what does that mean?	Refer to BA-8. Segment 2B begins approximately 1.5 miles south of the Ellis County line. Near the City of Palmer, Segment 2B deviates to the east of the utility easement and crosses West Jefferson Street, FM 879, SH 287 and FM 34. It crosses FM 984 north of Rankin and rejoins Segment 2A 4 miles south of Bardwell. The yellow area shown on the Land Use Mapbooks (Appendix D) are the residential properties within the study area. Limits of disturbance (LOD) refers to the footprint for the construction of the train tracks and ancillary facilities needed for the project. Aerial photography was reviewed and limited field surveys were conducted to identify structures located within 200 feet of the LOD. Residential areas within the LOD include rural and developed residential property including single- and multiple-family dwellings within those limits.
Derek Zick	3/5/2018	Website	I am strongly in support of the train and would use the train frequently to commute. Having done significant international travel I am experienced with using trains and excited to have the opportunity to make trips using them - reduced stress and risk of accident. I would make significantly more trips to Dallas and spend more of my money within the state as opposed to out of state travel since trains are much more convenient than air travel.	Comment noted.

Karl Ziebarth	1/25/2018	Website	The Dallas to Houston High Speed Rail EIS is a sound and well done report, which deals realistically with a complicated and emotional subject. It carefully selected the least disruptive route, and examined carefully all of the alternatives and effects. The Texas Central team has provided meaningful and responsive data to meet all questions. The project deserves strong support from all Texans; the opportunities it will provide will benefit most of us. I write as a professional rail consultant, who was not involved in any way with the EIS preparation.	Comment noted.
Karl Ziebarth	2/16/2018	Website	This is a critical step to ensuring that Texas can grow and support more jobs in the future. Every day they make more babies by no more land. We can't just keep paving over more and more good cropland to build toll roads. They hand full of local landowners who are screaming so loud should be fairly compensated for the present value of their property using standard eminent domain proceedings (including the right to appeal to the courts if they feel the price is too low) but we cannot permit a bunch of robber barons to hold up critical infrastructure. The draft JARPEIS is well and solidly done with facts and should be adopted as a final determination	Comment noted.
Karl Ziebarth	2/28/2018	Website	I am writing to express my strong support for the Texas Bullet Train project and urge the Federal Railroad Administration to move forward with the timely review and approval of the project. Despite the claims of ignorant obstructionists who dominate County Commissions, NO local roads will be closed. This false and misleading allegation is designed to stir up opposition to a desperately needed infrastructure improvement being built as a private sector project: NO GOVERNMENT APPROPRIATION. Texas Central is fully at risk if the project is unsuccessful. Let's get that on the table up front. It is a transformational transportation project that will connect the two economic hubs of Texas, Houston and North Texas, with one stop in the Brazos Valley, while respecting Texas lands and providing a safe, convenient and clean alternative to flying and driving. The recent release of the Draft Environmental Impact Statement (DEIS) confirms this conclusion with detailed data and projections. The DEIS is thorough and professional, and takes account of all possible objections which are based on fact. The Texas Bullet Train will utilize the world's safest mass transportation technology, the Shinkansen system, which has had zero crashes or fatalities in 53 years of operation. This is a safety record which is unmatched in the world. The project is expected to create more than 10,000 direct jobs per year during construction and more than 1,500 jobs permanently when operational -- at least 25% of them in rural counties along the route. It will be an economic driver for the state as well as all counties along the route. Rural areas will benefit as well, both from construction jobs and permanent employment. Agricultural activities WILL NOT be halted or impaired by a raised track structure, or one at grade with wide underpasses to permit cattle to move freely. As an electric train, this system will also be the best environmental alternative as 4 of the counties served are already air quality non-attainment status. This innovative new industry reduces road congestion, improves local economies and creates new jobs for Texans. I welcome a faster, safer and cleaner transportation alternative to reduce congestion because it's good for Texas! And the United States. It is wholly consistent with the President's plans for US infrastructure improvements. No artificial, made-up obstacles should be permitted to slow this critical US infrastructure program.	Comment noted.
Gilbert Zientek	2/7/2018	Email	Dear FRA Officials and Texas Central, We own land in Grimes County. Three of our relatives also own land in Grimes County that was subdivided from the same original land plot of about 100 acres. Access to our land requires traveling down a lane that we own. This lane serves as our easement to the land. The map suggests the lane will be closed. Neighbors in the area also have indicated that the lane will be closed because a home will be destroyed that is next to the lane and the lane will be between the home and the train. If this information about the home is correct, the train will landlock our family land . This email is to inform you that the easement that gains us access to the approximately 100 acres will be blocked. There are no other access routes to the land. Please send an email confirmation that you have received this email.	Refer to PI-1 and TR-8.
Linda Zientek	2/5/2018	Email	Dear FRA Officials, We own land in Grimes County. Three of our relatives also own land in Grimes County that was subdivided from the same original land plot of about 100 acres. Access to our land requires traveling down a lane that we own. This lane serves as our easement to the land. The train will landlock our family land because of the building support that is being constructed on 313 . This email is to inform you that the easement that gains us access to the approximately 100 acres will be blocked. There are no other access routes to the land. Johnathan Zimmerer			I respectfully present these comments on behalf of Morgan Legacy Farms and concerned citizens directly impacted by the portion of the 'Preferred' alignment referred to in the DEIS as Segment 3A. In Part 1 of these comments, I identify key concerns with Segment 3A that were not considered or appear inconsistent with design standards purportedly used in the DEIS report. In Part 2 of this comment, I suggest an alternative route '3Z' that would avoid this particular section of 3A and thereby mitigate many of the identified adverse impacts. COMMENTER BACKGROUND Johnathan Zimmerer, P.E., is a Texas Licensed Professional Engineer with 7 years of roadway, rail, and drainage design experience. Significant projects include IH3SW in Tarrant County, TexRail, US-75 in Plano, and US-27 in Chattanooga. Mr. Zimmerer has also been named the 2018	Refer to AS-1, FP-1 and LU-5.

			<p>ASCE Fort Worth Branch Young Engineer of the Year.</p> <p>PART 1: QUESTIONS AND COMMENTS REGARDING SEGMENT 3A</p> <p>I have the following questions and concerns regarding Segment 3A:</p> <ol style="list-style-type: none"> <li>Exhibit 1 identifies three large drainage areas in red. If Segment 3A was built with the 20' deep retained cut section that is currently shown, those areas would no longer drain to the lakes and ponds as happens today. How does the rail intend to maintain these existing drainage patterns?                      Pond #1 and Lake: The existing catchment area for Pond #1 and the Lake is 120.6 acres. If the rail was built it would remove 18.9 acres from the 120.6 acres. This is a 15.7% reduction in catchment area.                      b. Pond #2: The existing catchment area for Pond #2 is 6.8 Acres. If the rail was built it would remove 4.2 acres from the 6.8 acres. This is a 61.8% reduction in the catchment area for Pond #2.                      c. Pond #3: Since Pond #3 is directly downstream of the Pond #1, the Lake, and Pond #2, it will be impacted by the 15.7% &amp; the 61.8% reduction in the catchment areas stated above. Additionally, a 5.1 Acres area would be removed from its existing 32.2 acre catchment area. This is a 15.8% reduction from its catchment area plus the reduction of runoff coming from the Lake and Ponds #1&amp;2.</li> <li>The tee intersection of FM 3194 and FM 709 shown in the DEIS report does not meet TxDOT design criteria. As proposed in the report, the reverse curves that re-tie FM 3194 to FM 709 do not even support a 20 mph design speed. However, FM 3194 has a posted 55 mph speed limit. Please review Exhibit 2, which shows the impacts of this realignment if TxDOT design criteria were used. In Exhibit 2, the alignment uses the minimum radius curves for 55 mph with an 8% max superelevation and uses the recommended superelevation transitions for each curve. Note the additional residential and agricultural structure displacements when TxDOT criteria are met. I am also concerned the FM 3194 tie in to FM 709 is not located far enough from the new FM 709 Bridge over the high speed rail to meet vertical sight distance criteria for the turning maneuvers at the FM 709 and FM 3194 intersection. I do not have enough information to verify whether this criteria are met and suggest that you investigate this issue further.</li> <li>Based on Google Street view and a site visit on February 2, 2018, I have identified numerous power line impacts for Segment 3A, some of which are not shown in the DEIS report. See Exhibits 3, 4, &amp; 5. Exhibit 5 shows all the power line impacts I identified for both Segment 3A and Segment 3Z. These figures are tabulated in Part 2 of these comments.</li> <li>The DEIS report has diagrams showing visual impacts across the project, but the main concern seems to be in around the stations. Exhibit 8 &amp; 9 show the existing and proposed visuals of Segments 3A and 3Z around the FM 709 area. This segment of the rail may be in a lower density, rural area, but the Navarro County citizens are just as concerned with the visual impacts as the citizens around the stations in Dallas, Houston, and the Brazos Valley. Can higher quality visualizations be provided showing how the rail may look in these areas? What can be done to ensure the visual impacts are minimized?</li> <li>The land utilized by the Morgan Legacy Farms is subject to a charitable trust, and guests from all over the world and all walks of life are welcome come and enjoy the beautiful area and abundance of wildlife. Families can come out to relax and unwind. The children are offered horseback riding lessons, they can pet the animals, feed the deer, go fishing, ride across the ranch on UTVs, and get a feel for nature they normally would not experience. All of this is offered to families FREE OF CHARGE. If Segment 3A is used, it is unlikely that the current usage of the property for charitable purposes could continue.</li> </ol> <p>PART 2: ALTERNATE ROUTE 32 (FEASIBLY BLENDED FROM VETTED ALIGNMENTS 3B AND 3C)</p> <p>Mr. Zimmerer collaborated with others in the development of a feasible alternative route in Navarro County, which is named Segment 32 and shown on the attached location map and schematic exhibit. The northern limit of Segment 32 would diverge from 3A approximately at the State Highway 31 crossing. The southern limit of Segment 32 would converge with 3A near County Road SW 2190. Segment 32 runs nearly parallel to the previously studied route 3C from its northern divergence from 3A and blends with vetted route 3B to the south to converge back to 3A. See attached exhibits showing general location and route schematics. The following impact comparison was developed from review and analysis of the DEIS document and other publicly available information about the project area. The tables are very similar to the ones found in the DEIS report that were used to compare all the previously proposed alignments. These tables however only compare the Preferred Route (3A) to the alternative route 32. The environmental impacts were analyzed in a separate comment from LCA Environmental, Inc. by Mark Boyd, but shown below as well for your convenience. The basis of design for 32 was to avoid the large elevation changes that Segment 3A encounters (see Exhibit 7). By going around the highest elevations, the rail can maintain shallower grades which give the opportunity for operational cost savings and eliminates the need for the 1600 feet of retained cut section. As shown in the table, Segment 32 becomes 0.24 mile longer than 3A, however the reduced impacts and costs associated with 32 should offset this cost of rail. Another basis of design for Segment 32 was to reduce the number of transitions from viaduct to embankment/cut. This could potentially accelerate construction, reduce costs, and minimize unexpected challenges during construction. Segment 3A touches ground 9 different times over a</p>

Submitted By	Date Submitted	Submission Type	Comment	Response
			<p>13.17 mile stretch. At this point in the design, alternate route 32 touches ground 3 times (similar to 3B as it converges into segment 3A). After that, 32 is in a viaduct for 12 miles (similar to 3C until it ties back in with Segment 3A). Staying in a bridge section may cost more per mile for the rail itself, but it reduces the impacts to road crossings, parcels, residential and agricultural structure displacements, streams, wetlands, lakes, ponds, watersheds, fences, sound walls, etc. With further design, the rail may choose to lower sections of Segment 32 to have more cut/embankment sections. Two possible locations where this may be possible have been identified below, however for the purposes of this comment, the Segment 32 reflects the sections shown in the DEIS report for Segments 3B and 3C. The alignment of Segment 32 from the previously proposed 3B to 3C was designed to follow the divide between the Broad Creek - Pin Oak Watershed and the Little Pin Oak Creek-Richland Creek Watersheds. This area provides a good opportunity for Segment 32 to be lowered into an embankment/cut section without creating some of the watershed issues associated with 3A (detailed in Part 1 of these comments). Another area that presents itself to enter an embankment/cut section would be the FM 709 crossing. The location where Segment 32 crosses FM 709 is more desirable than 3A since it does not require a realignment of another FM road, there is less development in the immediate vicinity, and it is 20' lower in elevation so the large retained cut would not be necessary. I understand that reducing the impact of the rail on existing properties is one of the reasons for utilizing the "utility corridor." Aside from the physical rail attributes, alternate route 32 was able to avoid every residence and agricultural structure over the 13.41 mile stretch, whereas Segment 3A displaces 24 structures. The overall cost of these displacements may not affect the price of the entire project, but some of these displacements may include relocating families from their homes. Reducing these impacts should be one of the highest priorities. Transportation impacts are greatly improved by selection of alternative 32 in this area. Segment 3A crosses over/under seven public roads. Of these seven crossings, Segment 3A has to reconstruct three state roads and two county roads and adds two bridges to the state roads. Segment 3Z crosses over/under six public roads. Of these, segment 3Z only has to reconstruct two of the county roads (both of which are simple 20' gravel roads). In revising these crossings, Segment 3A requires 31% more roadway reconstruction than Segment 3Z and effects Farm to Market roads instead of cheaper County Roads. I was initially concerned that the impact on electrical utilities posed by Segment 3Z might exceed 3A; however, upon further research, Route 3Z appears to impact the same number of High Transmission lines and fewer local distribution lines. The DEIS report only shows one adverse visual effect for the entire route from Dallas to Houston; the Bravos Valley Station. Since Navarro County was not considered to have any adverse visual impacts I have attached the Exhibits 8 &amp; 9 to compare the visual impacts of Segment 3A versus Segment 3Z. There is a very different visual feel for the areas surrounding PART 2: Segment 3A and Segment 3Z. As you can see in Exhibit 8 (KVP #21 from the DEIS report), by staying closer to the high transmission lines like Segment 3Z there is not a new visual impact because the high transmission lines already exist. On the other hand, looking at Exhibit 9, this visual impact is more clearly negative. For instance, today, an observer can overlook a 100' drop in elevation and view the beautiful scenery below. However, the current trajectory of the high speed rail completely inhibits the observer's view. Based on the data available and my personal observations, Segment 3Z substantially reduces the impacts reported in the DEIS for Segment 3A. While Segment 3Z appears to be superior to Segment 3A, there may be similar or improved alternatives that would likewise reduce the environmental impacts. Further, as mentioned above, the rail may choose to lower the Segment 3Z alignment into embankment/cut sections to reduce costs as opposed to the extended viaduct section. However, even with the large viaduct section, Segment 3Z has the potential to reduce costs over 3A, among many other advantages. The bridge section may cost more per mile, but displacing families, purchasing large parcels, reconstructing roadways, mitigating ponds, streams, and wetlands, and surveying Native American remains would also cost substantial amounts of money.</p> <p>CONCLUSION There are many questions and concerns regarding Segment 3A over this 13.17 mile stretch. The impacts of departing from the high transmission alignment and cutting through this area are significant. The alternative route 3Z presents an opportunity for significant benefits by reduction of environmental, cultural, monetary, and personal impacts upon the families especially those who will be displaced from their homes. Segment 3Z also allows Morgan Legacy Farms to continue its charitable purposes and allow police officers, doctors, nurses, mental health workers, and children to experience rural Texas. I respectfully suggest the FRA and project planners reexamine the High Speed rail route through this segment of Navarro County and recommend an approximate alignment more consistent with blended route 3Z as depicted on the attached exhibits. Thank you for your review and serious consideration of this comment.</p>	
Jonathan Zimmerer	3/6/2018	Letter	I respectfully present these comments on behalf of Morgan Legacy Farms and concerned citizens directly impacted by the portion of the "Preferred" alignment referred to in the DEIS as Segment 3A. In Part 1 of these comments, I identify key concerns with Segment 3A that were not considered or appear inconsistent with design standards purportedly used in the DEIS report. In Part 2 of this comment, I suggest an alternative route "3Z" that would avoid this particular section of 3A and thereby mitigate many of the identified adverse impacts.	Refer to LU-5.
Lisa Zimmerer	2/21/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north of the power lines paralleling the existing lines in an established easement would be less detrimental to the environment and save a unique irreplaceable property. The preferred route travels in one of the highest elevations which will create in my opinion significant watershed issues causing a loss of migratory waters of the US. Further by separating access from the lodge	Refer to LU-5.

			to the stables, rodeo arena, guest houses and other amenities the proposed route will destroy the primary charitable, historical and emotional support provided to literally thousands of individuals including first responders, nurses, physicians, students and others. A move to north of the already existing high power lines would have less impact on the environment and prove less damaging to the county in the long term.	
Lisa Zimmerer	2/21/2018	Website	As a Physician Assistant at a busy urgent care, stress free time away from work is important. I've spent many of my free weekends at Morgan Creek Ranch de-stressing and relaxing. If the high speed rail maintains its current projected path we will loose that valuable resource.	Refer to LU-5.
Lisa Zimmerer	2/22/2018	Website	Current trajectory for the high-speed rail bisects Morgan Creek Ranch. That ranch has hosted our team, at no cost, and has provided relief and offered an escape to hundreds of others, especially healthcare workers and first responders. There is nothing else like this ranch and the high-speed rail should be moved north to preserve the ranch.	Refer to LU-5.
Lisa Zimmerer	2/22/2018	Website	I am concerned about disrupting land that has already been improved, why not move the train to mirror this transmission lines so as not to disrupt already improved land?	Refer to LU-5.
Lisa Zimmerer	2/22/2018	Website	There have been Bald Eagle siteings on Morgan Creek Ranch, shouldn't the protective zone be extended?	Refer to LU-5 and NR-3.
Lisa Zimmerer	2/24/2018	Website	I have concerns about access for homeowners in Navarro County located on 3194 because the proposed route closely parallels 3194 blocking access to their property. I would recommend the path cross northeast and remain parallel to the exiting power lines already located in an easement."	Refer to LU-5. Properties that front FM 3194 are no longer impacted and access would not be impacted by the Project. The Project would, however, still impact some landowners in the area, specifically the rear of parcels.

Jason Zimmerman	2/27/2018	Website	I am opposed to the train destroying a culturally, economically, historically, and charitable ranch referred to as Morgan Legacy Farm located near FM 709 and 3194. I believe a move north paralleling the existing power lines would be less detrimental to the environment and save a unique irreplaceable property. This facility is highly developed with multiple amenities including multiple guest houses, a lodge, a fully operational rodeo arena, horse barn, colt barn all within walking distance of each. The proposed path of the train would destroy the guest houses, part of the rodeo arena and by cleaving the property block access to the colt and horse barns and lodge rendering this property useless for fulfilling its primary purpose. Further because of the high location it appears the proposed route will cause watershed issues reducing the available migratory waters and have significant negative impact on the environment. Perhaps one of the greatest purposes has been the service to health care providers, first responders and military. It is important to recognize that this facility has served as an emotional release for health care providers, first responders and military. I am a first responder, working call hours in an ER and working with special needs children. I have personally healed from a visit to this land. It is a shame to ruin such a special place. Dr. Jason Zimmerman	Refer to LU-5.
Jason Zimmerman	2/28/2018	Website	Opposed to route through delicate wetlands and the Morgan Family Ranch. A route more north through existing easements would prove less detrimental.	Refer to LU-5 and WW-2.
Angela Zoch	2/5/2018	Website	I would like to receive updates. Thank you	Refer to PI-1.
Colleen Zwiebel	1/29/2018	Website	Roads don't pay property taxes but a private railroad will and it benefits towns and cities. When a road gets too crowded they need to make it wider and wider, when a railroad gets too busy they add a car or add a train, they don't need to make the railway ROW wider.	Comment noted.
