E.2 – Wetland Summary Tables

Table E-1: Field-Delineated Waterway Summary

Table E-2: Field-Delineated Wetland Summary

Table E.1. Field-Delineated Waterway Summary

Map Sheet No.	Waterway ID[i]	Use Class[ii]	Cowardin Classification[iii]	Flow Type	Nexus to TNW	Common Substrate	Stream Characteristics	Average Bank Width (ft.)	Average Bank Height (ft.)
	WASHINGTON METROPOLITAN WATERSHED								
2	**WL193**	I	R2SB	Perennial	Flows to Unnamed Tributary (UT) to Brier Ditch, confluent to Northeast Branch (NEB) Anacostia River, a Traditional Navigable Water (TNW)	Cobble, Gravel, Sand, Silt, Rip Rap	Waterway flows from culvert northwest into WL186.	4	4
2	**WL186**	I	R5UBH	Perennial	Flows to Brier Ditch, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows east out of study area. Waterway has undercut banks and severe bank erosion.	10	5
2	**WL185**	I	R4SB	Intermittent	Flows to UT to Brier Ditch, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Rip Rap	Waterway flows northeast. Stream is culverted on southwest end and rip rap occurs throughout the length of the stream.	8	2
2	**WL189**	I	R4SB	Intermittent	Flows to UT to Brier Ditch, confluent to NEB Anacostia River (TNW)	Silt	Waterway flows west into WL186.	3	2
3	**WL324**	I	R5UBH	Perennial	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows west into a culvert under the Baltimore-Washington Parkway (BW Pkwy).	8	3
3	**WL327**	I	N/A	Ephemeral	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows north to WL324.	1	1
3	**WL323**	I	N/A	Ephemeral	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Silt, Muck	Waterway flows out of a culvert under BW Pkwy and flows northeast into WL324.	5	6
3	**WL328**	I	R4SB	Intermittent	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows south through WP326 and into WL324.	1	1
3	**WL134**	I	R4SB	Intermittent	Likely flows to UT of Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Silt	Waterway flows northwest out of study area.	5	1

Table E.1. Field-Delineated Waterway Summary									
Map Sheet No.	**Waterway ID[i]**	**Use Class[ii]**	**Cowardin Classification[iii]**	**Flow Type**	**Nexus to TNW**	**Common Substrate**	**Stream Characteristics**	**Average Bank Width (ft.)**	**Average Bank Height (ft.)**
3	**WL135**	I	R4SB	Intermittent	Likely flows to UT of Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Silt	Waterway flows west into WL134.	3.5	1.5
4	**WL136**	I	R4SB	Intermittent	Flows to Beck Branch via WP133, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand	Waterway flows northeast into WP133.	2	1.5
4	**WL129**	I	R5UBH	Perennial	Beck Branch is confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Silt	Waterway is Beck Branch and a continuation of WL118. Waterway flows northwest out of study area into a culvert under the BW Pkwy.	12	4
4	**WL118**	I	R5UBH	Perennial	Beck Branch is confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway is Beck Branch and a continuation of WL129. Waterway flows west out of study area.	9	4
4	**WL116**	I	R4SB	Intermittent	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Gravel, Silt, Muck	Waterway is roadside drainage, and flows west to WL114.	5	6
4	**WL114**	I	R5UBH	Perennial	Beaverdam Creek is confluent to NEB Anacostia River (TNW)	Sand, Silt, Muck	Waterway is Beaverdam Creek and a continuation of WL131. Waterway is abutted by WP115.	10	4.5
4	**WL131**	I	R5UBH	Perennial	Beaverdam Creek is confluent to NEB Anacostia River (TNW)	Sand	Waterway is Beaverdam Creek and a continuation of WL114. Waterway flows west out of the study area and is abutted by WL068.	11	3.5
4	**WL411**	I	N/A	Ephemeral	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows west through WP128 until going underground. Waterway likely receives flow from WL410 and contributes sheet flow to adjacent WL131 (Beaverdam Creek) via WP128.	3	1.5
4	**WL410**	I	N/A	Ephemeral	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt, Roots	Waterway flows north into WL131 (Beaverdam Creek). Waterway also contributes sheet flow to adjacent wetland WP128.	2	0.5
4	**WL132**	I	R4SB	Intermittent	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Silt	Waterway flows south into WL131.	1.5	2

Table E.1. Field-Delineated Waterway Summary									
Map Sheet No.	**Waterway ID[i]**	**Use Class[ii]**	**Cowardin Classification[iii]**	**Flow Type**	**Nexus to TNW**	**Common Substrate**	**Stream Characteristics**	**Average Bank Width (ft.)**	**Average Bank Height (ft.)**
4	**WL067**	I	R4SB	Intermittent	Coveys flow to Beaverdam Creek via WP068 and WL132, confluent to NEB Anacostia River (TNW)	Gravel, Sand, Silt	Waterway flows south from culvert under BW Pkwy into WP068.	6.5	1
4	**WL121**	I	R4SB	Intermittent	Likely flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Silt	Waterway flows east out of study area. Stream is culverted under the power lines.	4	8
4	**WL122**	I	R4SB	Intermittent	Likely flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows southeast into WP124. Stream is culverted under the power lines.	6	2.5
4	**WL123**	I	R4SB	Intermittent	Likely flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows southwest into WL122.	6	2
6	**WL211**	I	N/A	Ephemeral	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows south into WL214 (UT to Beaverdam Creek).	4	1
5, 6	**WL216**	I	N/A	Ephemeral	Flows to WP212E, which flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows southeast into the WP212 series of wetlands, which drain into WL304 (Beaverdam Creek).	2	1
6	**WL205**	I	N/A	Ephemeral	Nexus to TNW unknown	Cobble, Gravel	Waterway flows east from headcut to a riser structure in an unmaintained agriculture field.	5	4
5, 6	**WL215**	I	R4SB	Intermittent	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows north into WL214 (UT to Beaverdam Creek).	4	1.5
5, 6	**WL214**	I	R5UBH	Perennial	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway is UT to Beaverdam Creek. . Waterway flows west from a culvert to WL304 (Beaverdam Creek).	5	4
6	**WL236**	I	R4SB	Intermittent	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows southwest into WL214 (UT to Beaverdam Creek).	5	4

Table E.1. Field-Delineated Waterway Summary									
Map Sheet No.	**Waterway ID[i]**	**Use Class[ii]**	**Cowardin Classification[iii]**	**Flow Type**	**Nexus to TNW**	**Common Substrate**	**Stream Characteristics**	**Average Bank Width (ft.)**	**Average Bank Height (ft.)**
5, 6	**WL304**	I	R5UBH	Perennial	Beaverdam Creek is confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway is Beaverdam Creek. Waterway flows west out of a culvert under Springfield Road and exits the study area, eventually flowing into Indian Creek.	5	2.5
5	**WL303**	I	R4SB	Intermittent	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Flows southwest from a drained ponded area within WP300 and into WL304 (Beaverdam Creek).	5	1.5
5, 6	**WL213**	I	R4SB	Intermittent	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows southwest from a culvert and into WL214 (UT to Beaverdam Creek).	3	1.5
5	**WL302**	I	R4SB	Intermittent	Flows into a large wetland that abuts Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows south out of a PVC pipe from an agricultural field and into WP300.	3	1.5
5	**WL301**	I	R4SB	Intermittent	Flows into a large wetland that abuts Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows south out of a terracotta pipe from an agricultural field and into WP300.	3	1.5
5	**WL408**	I	R5UBH	Perennial	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows south into WL131 (Beaverdam Creek) and is problematically incised.	20	3.5
5	**WL307**	I	R5UBH	Perennial	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway drains WP306 and flows south out of the study area.	6	2
4, 8	**WL072**	I	R4SBC	Intermittent	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Gravel, Sand, Silt	Waterway is UT to Beaverdam Creek and a continuation of WL127. Waterway flows out of the study area to a culvert under BW Pkwy.	6	4.5
4, 8	**WL127**	I	R4SBC	Intermittent	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand	Waterway is UT to Beaverdam Creek and a continuation of WL072. Waterway lows east out of study area to a culvert under BW Pkwy.	4	2
8	**WL073**	I	R4SBC	Intermittent	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Gravel, Concrete, Sand	Waterway is UT to Beaverdam Creek. Flows out of the study area.	8	4

Table E.1. Field-Delineated Waterway Summary									
Map Sheet No.	**Waterway ID[i]**	**Use Class[ii]**	**Cowardin Classification[iii]**	**Flow Type**	**Nexus to TNW**	**Common Substrate**	**Stream Characteristics**	**Average Bank Width (ft.)**	**Average Bank Height (ft.)**
7	**WL310**	I	R4SB	Intermittent	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows southwest from a culvert under Springfield Road and through WP309 before exiting the study area, where it drains into an UT to Beaverdam Creek.	3	0.5
7, 8	**WL319**	I	R5UBH	Perennial	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway is UT to Beaverdam Creek. Waterway flows south out of the study area to Beaverdam Creek.	20	5
7, 8	**WL320**	I	R4SB	Intermittent	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows northeast into WL319 (UT to Beaverdam Creek) and has severe bank erosion causing the stream to be problematically incised.	10	15
8	**WL400**	I	N/A	Ephemeral	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Silt	Waterway flows east from culvert under BW Pkwy and into WL077. Waterway has severe bank erosion.	5	5
8	**WL076**	I	N/A	Ephemeral	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows from WP075 into WP077.	6	1
8	**WL321**	I	N/A	Ephemeral	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows southeast out of a culvert and into WL078.	3	2
9	**WL228**	I	R4SB	Intermittent	Likely flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows southwest out of the study area.	3	3
8	**WL078**	I	R4SB	Intermittent	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Silt, Muck	Waterway flows northeast into WL077 and is abutted by WP079. Orange flocculant in water.	3	1
8	**WL404**	I	N/A	Ephemeral	Ultimately flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows south into WP403 which abuts WL401.	3	1
8	**WL401**	I	R4SB	Intermittent	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Silt	Waterway flows south from WP402 into WL077B.	6.5	1

Table E.1. Field-Delineated Waterway Summary

Map Sheet No.	Waterway ID[i]	Use Class[ii]	Cowardin Classification[iii]	Flow Type	Nexus to TNW	Common Substrate	Stream Characteristics	Average Bank Width (ft.)	Average Bank Height (ft.)
7, 8	**WL077, WL077B**	I	R2UBH	Perennial	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway is UT to Beaverdam Creek. Waterway flows southwest out of the study area.	11	2.5
8	**WL405**	I	N/A	Ephemeral	Ultimately flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows north into WP406. Culverted at upstream end.	1.5	1
8, 10	**WL080, WL080B**	I	R5UBH	Perennial	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Gravel, Sand, Silt	Waterway is UT to Beaverdam Creek. Waterway flows out of study area to culvert under BW Pkwy. Waterway is incised.	11	6
9	**WL224**	I	R4SB	Intermittent	Flows into WP221, which drains to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows east from a culvert and dissipates as overland flow within WP221.	2	1
9	**WL222**	I	R4SB	Intermittent	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows southeast from a culvert into WL223.	1	6
9	**WL223**	I	R4SB	Intermittent	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows northeast out of study area to UT to Beaverdam Creek.	2	1
8	**WL081**	I	N/A	Ephemeral	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Gravel, Silt	Waterway flows to WL080.	3	2.5
9	**WL232**	I	R4SB	Intermittent	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Bedrock, Cobble, Gravel, Silt, Clay	Waterway flows northeast into WL233 (UT to Beaverdam Creek).	2	2
9	**WL235**	I	R4SB	Intermittent	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Sil	Waterway flows southeast from a culvert and into WL233 (UT to Beaverdam Creek).	1	1
9	**WL230**	I	R4SB	Ephemeral	Flows to WP231B, which drains to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows north into WP231B.	3	1

Table E.1. Field-Delineated Waterway Summary									
Map Sheet No.	**Waterway ID[i]**	**Use Class[ii]**	**Cowardin Classification[iii]**	**Flow Type**	**Nexus to TNW**	**Common Substrate**	**Stream Characteristics**	**Average Bank Width (ft.)**	**Average Bank Height (ft.)**
9	**WL233**	I	R5UBH	Perennial	Flows to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows east to Beaverdam Creek and receives flow from WL232.	15	7
10	**WL082**	I	R4SB	Intermittent	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Gravel, Sand, Silt	Waterway flows west, out of study area to culvert under BW Pkwy.	7	2
10	**WL083**	I	R4SB	Intermittent	Flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Gravel, Sand, Silt	Waterway flows to WL082.	6	3
10	**WL090**	I	R4SB	Intermittent	Likely flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows from WP084 into a culvert under BW Pkwy.	4	1
10	**WL091**	I	R4SB	Intermittent	Likely flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Cobble, Gravel, Sand, Silt	Waterway originates outside of study area from a flooded culvert at BW Pkwy. Waterway flows southwest to WL083 via overland flow. Waterway loses bed and bank due to severe erosion.	4	2
10	**WL089**	I	R4SB	Intermittent	Likely flows to UT to Beaverdam Creek, confluent to NEB Anacostia River (TNW)	Sand, Silt	Waterway flows from a culvert and drains to WP084.	2	1
	PATUXENT RIVER WATERSHED								
10	**WL057**	I	R4SB	Intermittent	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Gravel, Sand	Waterway flows northeast into WP056. Culverted.	6	6
10	**WL058**	I	R4SB	Intermittent	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel, Sand	Waterway flows southeast from WP056 and into a roadside drainage. Portion of the waterway is underground.	1.5	1
10, 11	**WL059**	I	N/A	Ephemeral	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Silt	Waterway flows south. Wide forested riparian zone. Waterway was dry at the time of delineation.	4	6

Table E.1. Field-Delineated Waterway Summary									
Map Sheet No.	**Waterway ID[i]**	**Use Class[ii]**	**Cowardin Classification[iii]**	**Flow Type**	**Nexus to TNW**	**Common Substrate**	**Stream Characteristics**	**Average Bank Width (ft.)**	**Average Bank Height (ft.)**
10,11	**WL060**	I	N/A	Ephemeral	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Gravel, Sand, Silt	Waterway flows north into WL061. Culverted.	4	3
11	**WL061**	I	R2SB	Perennial	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel, Sand	Waterway flows north. Culverted.	6	4
11	**WL062**	I	R4SB	Intermittent	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows northeast and is abutted by WP063. Culverted under the on-ramp.	4.5	1
11	**WL154**	I	N/A	Ephemeral	Flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows northeast into WP108. Reclassified as ephemeral per agency review in the field.	4	1
11	**WL065**	I	N/A	Ephemeral	Flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Sand, Silt, Muck	Waterway flows east into WL064. Waterway is abutted by WP066.	3	1
11	**WL064**	I	R2UBHx	Perennial	Flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel	Waterway is UT to Patuxent River and a continuation of WL109. Waterway flows northeast and is abutted by WP066.	7.5	4
11	**WL085**	I	N/A	Ephemeral	Flows into Patuxent River (TNW)	Silt	Waterway is UT to Patuxent River. Waterway flows into WL109 and is within a Nontidal Wetland of Special State Concern (WP108A). Reclassified as ephemeral per agency review in the field, pending determination USACE.	3	1
11	**WL109**	I	R5UBH	Perennial	Flows into Patuxent River (TNW)	Cobble, Gravel, Silt	Waterway is UT to Patuxent River and a continuation of WL064. Waterway is within a Nontidal Wetland of Special State Concern (WP108A).	11.5	1
11	**WL110**	I	R5UBH	Intermittent	Flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel, Silt	Waterway flows northwest to WL109 and is within a Nontidal Wetland of Special State Concern (WP108A).	13	1
11	**WL019**	I	R2UBH	Perennial	Patuxent River is a TNW	Cobble, Gravel, Sand, Silt	Waterway is the Patuxent River. Waterway is a continuation of WL113/WL113B and is abutted by a Nontidal Wetland of Special State Concern (WP108A).	40	3

Table E.1. Field-Delineated Waterway Summary

Map Sheet No.	Waterway ID[i]	Use Class[ii]	Cowardin Classification[iii]	Flow Type	Nexus to TNW	Common Substrate	Stream Characteristics	Average Bank Width (ft.)	Average Bank Height (ft.)
11	**WL113, WL113B**	I	R2UBH	Perennial	Patuxent River is a TNW	Sand, Silt	Waterway is the Patuxent River. Waterway is a continuation of WL019 and is abutted by WP066.	40	3
11	**WL071**	I	R2SB	Perennial	Flows into Patuxent River (TNW)	Sand, Silt	Waterway flows south-southeast to Patuxent River.	30	4
11	**WL606**	I	N/A	Ephemeral	Flows to wetland that drains to UT to Patuxent River, confluent to Patuxent River (TNW)	Wetland delineated during July 2019 Agency Site Visits, per direction from MDE. Datasheet not prepared. MDE delineated an ephemeral channel connection WP111 and WP112.			
11	**WL021**	I	N/A	Ephemeral	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Sand, Silt	Waterway flows southeast.	4	2.5
12	**WL105**	I	R4SBC	Intermittent	Flows into Patuxent River (TNW)	Cobble, Gravel, Sand	Waterway is UT to Patuxent River. Stream is severely incised.	15	7
12	**WL069**	I	R4SB	Intermittent	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Sand, Silt	Waterway flows west towards Suburban Airport. Culverted under pedestrian trail and Brock Bridge Road.	4.5	0.5
12	**WL100**	I	N/A	Ephemeral	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Gravel, Muck	Waterway flows west to BW Pkwy toe of slope. Waterway may not be visible during dry summer conditions.	4.5	0.5
12	**WL101/ WL101A**	I	N/A	Ephemeral	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Gravel, Silt	Waterway is UT to Patuxent River. Waterway originates at culvert under BW Pkwy and flows east. Waterway dissipates into wet/braided flat area outside of the study area.	5	1
12	**WL086**	I	N/A	Ephemeral	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Silt	Waterway is an isolated stream with no downstream connection. Waterway was dry at time of observation.	7	.2
12, 13	**WL018 A/B/C**	I	R4SB	Intermittent	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Gravel, Silt	Waterway flows east out of the study area.	4	1

Table E.1. Field-Delineated Waterway Summary									
Map Sheet No.	**Waterway ID[i]**	**Use Class[ii]**	**Cowardin Classification[iii]**	**Flow Type**	**Nexus to TNW**	**Common Substrate**	**Stream Characteristics**	**Average Bank Width (ft.)**	**Average Bank Height (ft.)**
13	**WL017**	I	PFO1A	Perennial	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Boulders, Cobble, Gravel	Waterway flows west to culvert under BW Pkwy.	10	3
13	**WL159**	I	R4SB	Intermittent	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Sand, Silt	Waterway flows northwest into WL017.	3	1
13	**WL016**	I	R4SB	Intermittent	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Boulders, Cobble, Gravel	Waterway flows south into WL017. The channel is rip rap.	10	2
13	**WL087**	I	R4SBC	Perennial	Flows into Patuxent River (TNW)	Sand, Silt	Waterway is UT to Patuxent River. Waterway flows northwest out of the study area.	9	1
13	**WL088**	I	R4SBC	Perennial	Flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows west into WL087.	6	2
12, 13	**WL237**	I	R5UBH	Intermittent	Flows to Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel, Sand, Silt	Waterway is UT of Patuxent River. Waterway flows west out of study area.	9	2
13	**WL238**	I	R5UBH	Intermittent	Flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows into WL237.	4	2
13	**WL053**	I	R4SBC	Intermittent	Flows to Patuxent River (TNW)	Gravel, Sand, Silt, Muck	Waterway is UT to Patuxent River. Waterway flows south to a culvert under BW Pkwy.	6	1.5
13	**WL014**	I	N/A	Ephemeral	Likely flows to UT to Little Patuxent River, ultimately confluent to Patuxent River (TNW)	Sand, Silt	Waterway flows north from WP015 into WP012.	4	0.5
13	**WL013**	I	N/A	Ephemeral	Likely flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Silt	Waterway flows west into WP012.	2	0.5

Table E.1. Field-Delineated Waterway Summary									
Map Sheet No.	**Waterway ID[i]**	**Use Class[ii]**	**Cowardin Classification[iii]**	**Flow Type**	**Nexus to TNW**	**Common Substrate**	**Stream Characteristics**	**Average Bank Width (ft.)**	**Average Bank Height (ft.)**
13	**WL051**	I	R4SB	Intermittent	Flows to UT Patuxent River, confluent to Patuxent River (TNW)	Gravel, Silt, Muck	Waterway flows southwest into WL053.	2.5	0.5
13	**WL052**	I	R4SBC	Intermittent	Flows into Patuxent River	Gravel, Silt, Muck	Waterway is UT to Patuxent River. Flows east into WL051.	3	0.5
13	**WL165**	I	R4SB	Intermittent	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel	Waterway flows north into WL164. Drains WP166.	2.5	1.5
13	**WL011**	I	R4SB	Intermittent	Likely flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Gravel, Silt	Waterway flows north into WL010 just before culvert.	7	0.4
13	**WL163**	I	R4SB	Intermittent	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows south into WL164. Rip rap has been placed at downstream end.	3	1
13	**WL164**	I	R4SB	Intermittent	Likely flows to UT to Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel	Waterway flows west into culvert under BW Pkwy.	4	1
13	**WL010**	I	R4SB	Intermittent	Likely flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Gravel, Silt	Waterway flows southwest.	3.5	1
13	**WL048**	I	R2SB	Perennial	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Gravel, Sand, Silt, Muck	Waterway flows northeast into WL047. Channel is incised, and banks are severely eroded.	7	5
13	**WL007**	I	N/A	Ephemeral	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Gravel, Sand, Silt	Waterway flows south from culvert under BW Pkwy and is abutted by WP004.	3	1
13	**WL006**	I	R2SB	Perennial	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel	Culverted under an old access road. Waterway flows east into WL005. Eroded bank.	11	3

Table E.1. Field-Delineated Waterway Summary									
Map Sheet No.	**Waterway ID[i]**	**Use Class[ii]**	**Cowardin Classification[iii]**	**Flow Type**	**Nexus to TNW**	**Common Substrate**	**Stream Characteristics**	**Average Bank Width (ft.)**	**Average Bank Height (ft.)**
13	**WL005**	I	R4SB	Intermittent	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel	Waterway flows southwest out of the study area.	11	3.5
13	**WL049**	I	R4SB	Intermittent	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Gravel	Waterway flows northeast into WL048.	3	1
13	**WL047**	I	R2SB	Perennial	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel, Sand	Waterway is UT to Little Patuxent River. Waterway flows southeast to culvert under BW Pkwy.	10	2
13	**WL045**	I	R4SB	Intermittent	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Gravel	Waterway flows southwest into WL047.	4	1
13	**WL046**	I	R4SB	Intermittent	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Sand, Silt, Muck	Waterway flows southeast into WL045.	3	1
13, 14	**WL003**	I	N/A	Ephemeral	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel, Silt	Waterway conveys flow east from culvert under powerline access road. Flow comes from WP001 and uplands.	3	1
13, 14	**WL037**	I	R4SB	Intermittent	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Concrete	Waterway flows south to WL036. Waterway is a concrete drainage channel.	5	3
13, 14	**WL036, WL036A**	I	R4SB	Intermittent	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Concrete	Waterway is UT to Little Patuxent River. Waterway is a concrete drainage channel.	5	.5
13, 14	**WL039**	I	N/A	Ephemeral	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel	Waterway flows into culvert under the road.	1.5	0.8
14	**WL172**	I	R4SB	Intermittent	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Silt	Waterway flows southeast into WL042 and abuts WP171 and WP173.	2.5	1

Table E.1. Field-Delineated Waterway Summary

Map Sheet No.	Waterway ID[i]	Use Class[ii]	Cowardin Classification[iii]	Flow Type	Nexus to TNW	Common Substrate	Stream Characteristics	Average Bank Width (ft.)	Average Bank Height (ft.)
15	**WL178**	I	R4SB	Intermittent	Likely flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Sand, Silt	Waterway flows east into WP177. Waterway has no obvious connection to downstream waters.	2.5	1
15	**WL175**	I	R4SB	Intermittent	Likely flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Silt	Waterway flows southeast into WP170.	4	3
14	**WL040**	I	R4SB	Intermittent	Likely flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel, Sand	Waterway flows northeast to a culvert under the road.	4.5	1
14	**WL041**	I	R4SB	Intermittent	Likely flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Sand, Silt	Waterway flows northwest into WL040 just before the culvert.	4	2.5
14	**WL044**	I	N/A	Ephemeral	Flows into WP043 which drains into UT to Little Patuxent River	Gravel	Waterway flows northwest into WP043. Waterway is an incised channel.	2	1
14	**WL042**	I-P	R5UBH	Perennial	Flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Sand, Silt	Waterway is UT to Little Patuxent River. Waterway exits study area and passes under BW Pkwy through a culvert. Waterway re-enters study area around 700 ft downstream then flows out of study area into culvert.	5.5	2
14	**WL029**	I	N/A	Ephemeral	Ultimately flows to Little Patuxent River (TNW)	Sand	Waterway is an UT to the Little Patuxent River and is adjacent to WP030.	2	0.5
14, 15	**WL181**	I	R4SB	Intermittent	Ultimately flows to Little Patuxent River (TNW)	Sand, Silt	Waterway is UT to Little Patuxent River. Flows east from WP183, into WP182; waterway reforms at east end of WP182.	5	1
14, 16	**WL155**	I	R4SB	Intermittent	Ultimately flows to Little Patuxent River (TNW)	Cobble, Gravel Sand, Silt	Waterway flows north and becomes sheet flow before discharging into WL032. Cobblestone stabilization near the downstream end; majority of flow is beneath cobble stones.	1.5	2
14, 16	**WL032**	I	N/A	Ephemeral	Ultimately flows to Little Patuxent River (TNW)	Gravel, Sand, Silt	Waterway flows east to WP031 where it ends. WP031 drains to WL157 (Little Patuxent River).	4.5	0.25

Table E.1. Field-Delineated Waterway Summary

Map Sheet No.	Waterway ID[i]	Use Class[ii]	Cowardin Classification[iii]	Flow Type	Nexus to TNW	Common Substrate	Stream Characteristics	Average Bank Width (ft.)	Average Bank Height (ft.)
16	**WL157**	I-P	R2UBH	Perennial	Little Patuxent River is a TNW	Cobble, Gravel, Sand	Waterway is the Little Patuxent River which flows east into the Patuxent River. Waterway receives flow from WP031.	60	12
16	**WL099**	I	R4SB	Perennial	Ultimately flows to Little Patuxent River (TNW)	Cobble, Gravel Sand, Silt	Waterway is UT to the Little Patuxent River. Waterway appears to be excavated.	20	6
16	**WL201**	I	R4SB	Intermittent	Ultimately flows to Little Patuxent River (TNW)	Sand, Silt	Waterway is an inline pond. Waterway flows into a culvert under BW Pkwy into Dorsey Run.	750	3
16	**WL035**	I	N/A	Ephemeral	Likely flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel	Waterway was dry at the time of delineation. Waterway is adjacent to WP203.	3.5	1
17	**WL027**	I	N/A	Intermittent	Likely flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Cobble, Gravel, Sand	Waterway flows northwest to a culvert under BW Pkwy.	15	3
17	**WL139**	I	R4SB	Intermittent	Likely flows to UT to Little Patuxent River, confluent to Patuxent River (TNW)	Sand, Silt, Leaf litter	Waterway is UT to the Little Patuxent River. Waterway flows northwest into culvert and continues as WL027. Waterway drains WP140.	1	.5
17	**WL028**	I-P	R4SB	Intermittent	Flows to UT to Dorsey Run, ultimately confluent to Little Patuxent River (TNW)	Cobble, Gravel, Sand	Waterway flows northeast to WL146.	3	0.7
17	**WL152**	I	N/A	Ephemeral	Flows to UT to Dorsey Run, ultimately confluent to Little Patuxent River (TNW)	Sand, Silt	Waterway flows north into WP147.	1	.3
17	**WL033**	I-P	N/A	Ephemeral	Flows to UT to Dorsey Run, ultimately confluent to Little Patuxent River (TNW)	Cobble, Gravel, Sand, Silt	Waterway flows southwest to UT to Dorsey Run.	4	1
17	**WL146**	I-P	R4SB	Intermittent	Flows to Dorsey Run, confluent to Little Patuxent River (TNW)	Cobble, Gravel, Sand	Waterway is UT to Dorsey Run. Waterway flows north into a culvert on NPS property and is adjacent to WP147. Reclassified as intermittent per agency review in the field.	6	3

Table E.1. Field-Delineated Waterway Summary									
Map Sheet No.	**Waterway ID[i]**	**Use Class[ii]**	**Cowardin Classification[iii]**	**Flow Type**	**Nexus to TNW**	**Common Substrate**	**Stream Characteristics**	**Average Bank Width (ft.)**	**Average Bank Height (ft.)**
17	**11-26**	I	R4SB	Intermittent	Waterway was delineated by Ft. George G. Meade staff in 2014, and boundaries were verified by Straughan in 2020. Sample plot data not available.				
17	**WL142A/ WL142B**	I-P	R4SB; R5UBH	Intermittent; Perennial	Flows to Dorsey Run, confluent to Little Patuxent River (TNW)	Sand, Silt, Muck, Leaf litter	Waterway is UT to Dorsey Run. Waterway flows northwest through WP143 out of study area. Split into intermittent and perennial per agency review in the field.	4	.5
18	**WL150**	I-P	R4SBC	Perennial	Flows into Dorsey Run, confluent to Little Patuxent River (TNW)	Cobble, Gravel, Sand, Silt	Waterway is UT to Dorsey Run. Waterway receives flow from WL600, flows northwest into Dorsey Run, and abuts WP149.	7	4
18	**WL600**	I	R4SB; N/A	Intermittent; Ephemeral	Flows to UT to Dorsey Run, confluent to Little Patuxent River (TNW)	Wetland delineated during July 2019 Agency Site Visits, per direction from MDE. Datasheet not prepared. USACE determined the drainage through wetland WP149 to be an ephemeral/intermittent waterway. Waterway flows north through WP149 into WL150.			
18	**WL240**	I	R5UBH	Perennial	Flows to Dorsey Run, confluent to Little Patuxent River (TNW)	Cobble, Gravel, Sand	Waterway flows north out of study area.	5	3
	PATAPSCO RIVER WATERSHED								
21	**WL200**	I	R4SB	Intermittent	Flows to Cabin Branch, confluent to Patapsco River (TNW)	Boulders, Cobble, Gravel, Silt	Ephemeral at culvert to downstream end of rip rap. Waterway is intermittent from rip rap to downstream exit of study area.	4	1.25
22	**WL097**	I	R4SB	Intermittent	Flows to the Patapsco River (TNW)	Bedrock, Cobble, Gravel, Sand	Waterway flows southwest to WP098. Waterway is culverted from the BW Pkwy/I-895 on ramp to DNR property. No longer flows through concrete culvert due to erosion.	30	15
23	**WL094**	I	R2SB	Perennial	Flows to the Patapsco River (TNW)	Cobble, Gravel, Sand, Silt	Waterway is UT to Patapsco River. Waterway receives flow from culvert and is adjacent to WP095. Waterway is severely eroded. Reclassified as perennial per agency review in the field.	15	3
24	**WL197**	I	R2SB	Perennial	Likely flows to the Patapsco River (TNW)	Cobble, Gravel	Waterway flows north into culvert under railroad. Waterway has severe bank erosion and is problematically incised.	4	3

[i] These tables include systems that were field-delineated by Straughan and all 600-systems that were added by as directed during agencies site visits. This table excludes all 500-systems, which were desktop-delineated.
[ii] Closure Period for Use Class I and I-P is 3/1-6/15
[iii] Based on Cowardin, et al. 1979 and FGDC (2013).

10	**WP605**	PFO	Wetland delineated during July 2019 Agency Site Visits, per direction from MDE. Datasheet not prepared. This area receives flow from WL091 and exhibited hydric soils (F3), FAC vegetation (American holly, blackgum, common greenbrier), and hydrology (saturation). MDE confirmed the field-delineated boundary and indicators.					
10	**WP604**	PFO	Wetland delineated during July 2019 Agency Site Visits, per direction from MDE. Datasheet not prepared. This small depressional area exhibited hydric soils (redox mottles), hydrophytic vegetation (red maple), and hydrology (sparsely vegetated concave surface, water-stained leaves). MDE confirmed the field-delineated boundary and indicators. A wood frog was observed in this area.

23	**WP603**	PEM	Wetland delineated during July 2019 Agency Site Visits, per direction from MDE. Datasheet not prepared. This ponded area is potentially an unmaintained stormwater management feature between the Light Rail track embankment and the BGE right-of-way. It exhibited open water with emergent vegetation. MDE requested this system be delineated via aerial mapping.
