 Summary of Total RCRA Characteristics in Soil
 Caemmerer Yard West Investigation

Location ID	RCRA Standard for Characteristic Hazardous Waste	SB-H-12	SB-H-12
Sample ID		SB-H-12-LIRR-0-2	SB-H-12-LIRR-6-9
Depth		0-2	6-9
Sample Date		10/1/2004	10/2/2004
Unit		mg/Kg	mg/Kg
Reactive Cyanide	250 mg/kg*	10 U	10 U
Reactive Sulfide	500 mg/kg*	40 U	40 U
TOTAL PETROLEUM HYDROCARBONS	-	480	47 U
pH	> 2 and < 12.5 pH Units*	9.8	8.4

Notes:

- mg/kg - milligrams per kilogram
- DUP - denotes field duplicate of preceding sample
- U - Indicates the compound was analyzed for but was not detected
- * - Units for results are same as those presented for the standard

Table 12
 Summary of Total RCRA Characteristics in Soil
 Caemmerer Yard West Investigation

Location ID	RCRA Standard for Characteristic Hazardous Waste	SB-H-12	SB-H-12
Sample ID		SB-H-12-LIRR-16-18	SB-H-12-LIRR-28-29
Depth		16-18	28-29
Sample Date		10/2/2004	10/2/2004
Unit		mg/Kg	mg/Kg
Reactive Cyanide	250 mg/kg*	10 U	10 U
Reactive Sulfide	500 mg/kg*	40 U	40 U
TOTAL PETROLEUM HYDROCARBONS	-	53 U	46 U
pH	> 2 and < 12.5 pH Units*	7.9	8.2

Notes:

mg/kg - milligrams per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for but was not detected

* - Units for results are same as those presented
 for the standard

Table 12
Summary of Total RCRA Characteristics in Soil
Caemmerer Yard West Investigation

Location ID	RCRA Standard for Characteristic Hazardous Waste	SB-H-13	SB-H-13
Sample ID		SB-H-13-LIRR-2-4	SB-H-13-LIRR-4-6
Depth		2-4	4-6
Sample Date		9/25/2004	9/25/2004
Unit		mg/Kg	mg/Kg
Reactive Cyanide	250 mg/kg*	10 U	10 U
Reactive Sulfide	500 mg/kg*	40 U	40 U
TOTAL PETROLEUM HYDROCARBONS	-	760	150
pH	> 2 and < 12.5 pH Units*	9.6	-

Notes:

mg/kg - milligrams per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for but was not detected

* - Units for results are same as those presented
for the standard

 Caemmerer Yard West Investigation

Location ID	RCRA Standard for Characteristic Hazardous Waste	SB-H-13	SB-H-13
Sample ID		SB-H-13-LIRR-14-16	SB-H-13-LIRR-24-26
Depth		14-16	24-26
Sample Date		9/26/2004	9/26/2004
Unit		mg/Kg	mg/Kg
Reactive Cyanide	250 mg/kg*	10 U	10 U
Reactive Sulfide	500 mg/kg*	40 U	40 U
TOTAL PETROLEUM HYDROCARBONS	-	19	24 U
pH	> 2 and < 12.5 pH Units*	8.6	8.5

Notes:

mg/kg - milligrams per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for but was not detected

* - Units for results are same as those presented
 for the standard

Table 12
 Summary of Total RCRA Characteristics in Soil
 Caemmerer Yard West Investigation

Location ID	RCRA Standard for Characteristic Hazardous Waste	SB-H-15	SB-H-15
Sample ID		SB-H-15-LIRR-2-3	SB-H-15-LIRR-6-8
Depth		2-3	6-8
Sample Date		9/25/2004	9/26/2004
Unit		mg/Kg	mg/Kg
Reactive Cyanide	250 mg/kg*	10 U	10 U
Reactive Sulfide	500 mg/kg*	40 U	40 U
TOTAL PETROLEUM HYDROCARBONS	-	290	110
pH	> 2 and < 12.5 pH Units*	10.3	1.3

Notes:

mg/kg - milligrams per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for but was not detected

* - Units for results are same as those presented
 for the standard

Sample ID		SB-E-10-NYDOS-20-22	SB-U-2-DOS-2-3
Depth		20-22	2-3
Sample Date		9/12/2004	9/11/2004
Unit		mg/kg	mg/Kg
Reactive Cyanide	250 mg/kg*	10 U	10 U
Reactive Sulfide	500 mg/kg*	40 U	40 U
TOTAL PETROLEUM HYDROCARBONS	-	21 U	45 U
pH	> 2 and < 12.5 pH Units*	9	8.4

Notes:

mg/kg - milligrams per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for but was not detected

* - Units for results are same as those presented
for the standard

Table 12
 Summary of Total RCRA Characteristics in Soil
 Caemmerer Yard West Investigation

Location ID	RCRA Standard for Characteristic Hazardous Waste	SB-U-2	
Sample ID		SB-U-2-DOS-3-5	
Depth		3-5	
Sample Date		9/11/2004	
Unit		mg/Kg	
Reactive Cyanide	250 mg/kg*	10	U
Reactive Sulfide	500 mg/kg*	40	U
TOTAL PETROLEUM HYDROCARBONS	-	780	65 U
pH	> 2 and < 12.5 pH Units*	8.6	8.6

Notes:

mg/kg - milligrams per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for but was not detected

* - Units for results are same as those presented
 for the standard

is >25% difference for detected concentrations between
two GC columns

The lower of the two values is reported on Form 1
and flagged with a "P"

ENDRIN KETONE	-	1.4 U	1.5 U
GAMMA - BHC (LINDANE)	60	1.3 U	1.4 U
GAMMA-CHLORDANE	-	1.6 U	1.7 U
HEPTACHLOR	100	1.4 U	1.5 U
HEPTACHLOR EPOXIDE	20	1.4 U	1.4 U
SILVEX	700	1.5 U	1.6 U

Notes:

ug/kg - micrograms per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for
but was not detected

J - Indicates an estimated value

P - This flag is used for Pesticide target analyte when there
is >25% difference for detected concentrations between
two GC columns

The lower of the two values is reported on Form 1
and flagged with a "P"

Notes:

ug/kg - micrograms per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for
but was not detected

J - Indicates an estimated value

P - This flag is used for Pesticide target analyte when there
is >25% difference for detected concentrations between
two GC columns

The lower of the two values is reported on Form 1
and flagged with a "P"

Notes:

ug/kg - micrograms per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for
but was not detected

J - Indicates an estimated value

P - This flag is used for Pesticide target analyte when there
is >25% difference for detected concentrations between
two GC columns

The lower of the two values is reported on Form 1
and flagged with a "P"

Notes:

ug/kg - micrograms per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for
but was not detected

J - Indicates an estimated value

P - This flag is used for Pesticide target analyte when there
is >25% difference for detected concentrations between
two GC columns

The lower of the two values is reported on Form 1
and flagged with a "P"

Notes:

ug/kg - micrograms per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for
but was not detected

J - Indicates an estimated value

P - This flag is used for Pesticide target analyte when there
is >25% difference for detected concentrations between
two GC columns

The lower of the two values is reported on Form 1
and flagged with a "P"

HEPTACHLOR	100	1.5 U	1.6 U
HEPTACHLOR EPOXIDE	20	1.5 U	1.5 U
SILVEX	700	1.6 U	1.6 U

Notes:

ug/kg - micrograms per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for

but was not detected

J - Indicates an estimated value

P - This flag is used for Pesticide target analyte when there is >25% difference for detected concentrations between two GC columns

The lower of the two values is reported on Form 1 and J flagged with a "P"

Notes:

ug/kg - micrograms per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for
but was not detected

J - Indicates an estimated value

P - This flag is used for Pesticide target analyte when there
is >25% difference for detected concentrations between
two GC columns

The lower of the two values is reported on Form 1
and flagged with a "P"

Notes:

ug/kg - micrograms per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for
but was not detected

J - Indicates an estimated value

P - This flag is used for Pesticide target analyte when there
is >25% difference for detected concentrations between
two GC columns

The lower of the two values is reported on Form 1
and flagged with a "P"

HEPTACHLOR EPOXIDE	20	1.5 U	1.8 U
SILVEX	700	1.7 U	2 U

Notes:

ug/kg - micrograms per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for
but was not detected

J - Indicates an estimated value

P - This flag is used for Pesticide target analyte when there
is >25% difference for detected concentrations between
two GC columns

The lower of the two values is reported on Form 1
and flagged with a "P"

 Summary of Total PCBs in Soil
 Caemmerer Yard West Investigation

Location ID	TAGM RSCOs	SB-H-20	SB-H-20	E-23/SB-U-4
Sample ID		DUP-S-10-06-04	SB-H-20-LIRR-18-20	E-23-LIRR-1-2
Depth		4-6	18-20	1-2
Sample Date		10/6/2004	10/6/2004	9/21/2004
Unit		ug/Kg	ug/Kg	ug/Kg
PCB Compound Name				
AROCLOR-1016 (PCB-1016)	1.000	1.2 U	1.3 U	5.6 U
AROCLOR-1221 (PCB-1221)	1.000	1.7 U	1.9 U	3.8 U
AROCLOR-1232 (PCB-1232)	1.000	1.6 U	1.7 U	2.6 U
AROCLOR-1242 (PCB-1242)	1.000	1.7 U	1.9 U	3.3 U
AROCLOR-1248 (PCB-1248)	1.000	2.1 U	2.4 U	3.9 U
AROCLOR-1254 (PCB-1254)	1.000	1.8 U	2 U	1.4 U
AROCLOR-1260 (PCB-1260)	1.000	1.5 U	1.7 U	2.1

Notes:

ug/kg - micrograms per kilogram

DUP - denotes field duplicate of preceding sample

U - Indicates the compound was analyzed for

but was not detected

J - Indicates an estimated value

P - This flag is used for PCB target analyte when there is >25% difference for detected concentrations between two GC columns

The lower of the two values is reported on Form 1 and flagged with a "P"

Table 14

AROCLOR 1248 (PCB 1248)	1,000	4.3 U	5.9 U	4.2 U
AROCLOR 1254 (PCB 1254)	1,000	1.6 U	2.2 U	1.5 U
AROCLOR 1260 (PCB 1260)	1,000	3.5 U	4.7 U	3.4 U

Notes:

- ug/Kg = micrograms per kilogram
- PCB = polychlorinated biphenyls (premixed sample)
- U = indicates the compound was analyzed for but was not detected
- J = indicates an estimated value
- P = This flag is used for PCB target analyte when there is >25% difference for detected concentrations between two GC columns
The lower of the two values is reported on Form 1 and flagged with a "P"

AROCLOR-1248 (PCB-1248)	1,000	4.8 U	4.3 U	4.4 U	5.2 U
AROCLOR-1254 (PCB-1254)	1,000	1.8 U	1.6 U	1.6 U	1.9 U
AROCLOR-1260 (PCB-1260)	1,000	3.9 U	3.5 U	3.6 U	4.2 U

Notes:

ug/kg - micrograms per kilogram

DUP - denotes field duplicate of preceding sample

U - indicates the compound was analyzed for
 but was not detected

J - indicates an estimated value

P - This flag is used for PCB target analyte when there
 is >25% difference for detected concentrations between
 two GC columns

The lower of the two values is reported on Form 1
 and flagged with a "P"

NOTE:

ug/L - micrograms per liter

U - Indicates the compound was analyzed for but was not detected

J - Indicates an estimated value

D - Indicates the compound identified in an analysis at a secondary dilution factor

B - Indicates the analyte was found in blank

E - Indicates the analyte's concentration exceeded the calibrated range

of the instrument for that specific analysis

Bold - Indicates TOGS exceedance

ANTHRACENE	50	0.16 U	2.1 J

NOTE:

ug/L - micrograms per liter

U - Indicates the compound was analyzed for but was not detected

J - Indicates an estimated value

D - Indicates the compound indentified in an analysis at a secondary dilution factor

B - Indicates the analyte was found in blank

E - Indicates the analyte's concentration exceeded the calibrated range

of the instrument for that specific analysis

Bold - Indicates TOGS exceedance

APPENDIX B

**ANALYTICAL LABORATORY DATA FOR
SOIL AND GROUNDWATER SAMPLES
(on enclosed compact disc)**

APPENDIX C
STATISTICAL EVALUATION OF
SOIL ANALYTICAL RESULTS

Statistical Evaluation of Soil Analytical Results

Methodology

The statistical evaluation of soil analytical results obtained from the vertical split spoon and Geoprobe samples consisted of estimating the central tendency, the variation, and the upper confidence limit of the mean of soil analyte concentrations in the area of interest. This evaluation takes the soil analytical results from the sampling effort and helps to make conclusions about the mean and the variation of analyte concentration that can be expected across the entire CYW (area of interest) within the relative tolerable error and confidence level assumed in the sampling design. The estimations were performed separately for the following four objectives: 1) characterization of historical fill for the proposed caissons; 2) characterization of historical fill for utility construction and installation; 3) characterization of historical fill for the excavation of the relocated Quill Bus Depot; and 4) characterization of the deepest sample interval.

The statistical sampling design consisted of collecting 25 borings over the entire CYW, assuming an analyte CV of 100% and a relative tolerable error of the mean of 40% at the 95% confidence level. The 25 borings were allocated over the entire CYW (sampled population) using the "random sampling within blocks" method. The number of split spoon samples collected from each boring varied depending on the objectives and fill thickness of interest. The soil samples from the split spoon samples were analyzed based on the three-stage sampling procedure. The analytical results from the soil thus sampled were analyzed in the following manner.

The *central tendency* of the analyte concentration in the entire CYW was estimated by computing the mean of the mean concentration of analyte in each boring. Histograms of the mean analyte concentrations from the borings showed that most of the data were skewed to the right and could be best described by the lognormal distribution. Hence, the mean of the mean concentrations of analyte in each boring was also computed by assuming the mean concentration of analytes in each boring followed a lognormal distribution. The mean of a lognormal distribution (Gilbert, 1987) is computed as:

$$\hat{\mu} = \exp\left(\bar{y} + \frac{s_y^2}{2}\right) \quad (1)$$

where:

$\hat{\mu}$ = mean of the two-parameter lognormal distribution

\bar{y} = arithmetic mean of the n transformed values $y_i = \ln x_i$

s_y^2 = variance of the n transformed values $y_i = \ln x_i$

The *variation* of the analyte concentration in the entire CYW was estimated by computing the variance, standard deviation, and the coefficient of variation of the mean concentration of analyte in each boring (under the normal distribution assumption). The variance of the mean concentrations of analyte in each boring was also computed by assuming the mean concentration of analytes in each boring followed a lognormal distribution. The variance of a lognormal distribution (Gilbert, 1987) is computed as:

$$\hat{\sigma}^2 = \hat{\mu}^2 \left[\exp(s_y^2) - 1 \right] \quad (2)$$

where:

$\hat{\sigma}^2$ = variance of the two-parameter lognormal distribution

The upper one-sided 95% confidence limit of the mean of the mean concentration of analyte in each boring was estimated assuming that the mean concentration of analytes in each boring followed a normal as well as a lognormal distribution.

The upper one-sided 95% confidence limit for a normal distribution was computed as:

$$UL_{1-\alpha} = \bar{x} + t_{1-\alpha, n-1} \left(\frac{s}{\sqrt{n}} \right) \quad (3)$$

where:

$UL_{1-\alpha}$ = upper one-sided 100 (1- α)% confidence limit for the mean

$t_{1-\alpha, n-1}$ = value that cuts off (100 α /2)% of the upper tail of the t distribution that has $n-1$ degrees of freedom s = standard deviation of the sample

n = sample size

The upper one-sided 95% confidence limit for a lognormal distribution was computed as:

$$ULL_{1-\alpha} = \exp \left(\bar{y} + 0.5s_y^2 + \frac{s_y H_{1-\alpha}}{\sqrt{n-1}} \right) \quad (4)$$

where:

$ULL_{1-\alpha}$ = upper one-sided 100 (1- α)% confidence limit for the mean of the lognormal distribution

Results and Discussion

The following sections discuss the results for the four objectives described earlier.

Statistical Evaluation of Soil Analytical Results from the Historic Fill for the Construction of the Proposed Caissons

Table C-1 provides the mean, variance, standard deviation, coefficient of variation (C.V.), and the upper confidence limit of VOCs assuming that the VOC concentrations in each boring followed a normal distribution as well as the mean, variance, and upper confidence limit assuming that the VOC concentrations in each boring followed a two-parameter lognormal distribution. The C.V.s for VOCs were much greater than 100% and the variance was much greater than the lognormal variance indicating that there

were one or more high values of VOCs causing the normal distribution results to be high. In such cases, the VOC concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-1 shows that the mean and the upper confidence limit of Total Xylenes exceeded TAGM RSCOs but the lognormal mean and the lognormal upper confidence limit of Total Xylenes did not exceed TAGM RSCOs; the upper confidence limit of Benzene exceeded TAGM RSCOs, but the mean, the lognormal mean and the lognormal upper confidence limit of Benzene did not exceed TAGM RSCOs. **Therefore, it can be concluded that even though concentrations of VOCs exceeded TAGM RSCOs in some locations, the mean concentration of the VOCs over the entire CYW do not exceed TAGM RSCOs.**

Table C-2 provides the statistical estimators for SVOCs for characterizing the historical fill for the construction of the proposed Caissons. The C.V.s for most SVOCs were around 100% and while other SVOCs were around 200%. The variance was much greater than the lognormal variance indicating that there were one or more high values of SVOC causing the normal distribution results to be high. In such cases, the SVOC concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-2 shows that the lognormal upper confidence limit of benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, dibenzo(a,h)anthracene, p-chloroaniline, and phenol exceeded TAGM RSCOs. For benzo(a)anthracene, benzo(a)pyrene, dibenzo(a,h)anthracene, and p-chloroaniline, the normal mean exceeded TAGM RSCOs. The lognormal means for the SVOCs do not exceed the TAGM RSCOs. **Therefore, it can be concluded that the mean concentrations of the SVOCs over the entire CYW do not exceed TAGM RSCOs, but the upper confidence limits of benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, dibenzo(a,h)anthracene, p-chloroaniline, and phenol over the entire CYW exceeded TAGM RSCOs.** In the case of p-chloroaniline and phenol, no detectable concentrations of these compounds were present in the soil samples analyzed. A value equal to the method detection limit (MDL) was used in calculations, hence the mean MDLs exceed the TAGM RSCOs.

Table C-3 provides the statistical estimators for Metals for characterizing the historical fill for the construction of the proposed Caissons. The C.V.s for most Metals were around or greater than 100%. The variance for Metals was different than the lognormal variance, some greater, some lesser. Overall, the Metals concentrations are better described by the lognormal distribution than the normal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, the lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-3 shows that the lognormal upper confidence limits of Mercury and Zinc exceed TAGM RSCOs. For these and some other Metals, the normal mean and the normal upper confidence limits exceed TAGM RSCOs. The lognormal means for the Metals do not exceed the TAGM RSCOs. **Therefore, it can be concluded that the mean concentrations of the Metals over the entire CYW do not exceed TAGM RSCOs, but the upper confidence limits of Mercury and Zinc over the entire CYW exceed TAGM RSCOs.**

Table C-4 provides the statistical estimators for RCRA Characteristics for characterizing the historical fill for the construction of the proposed Caissons. The C.V.s for Reactive Cyanide and TPH were much greater than 100%. The variance for these characteristics was greater than the lognormal variance. Overall, the RCRA Characteristics are better described by the lognormal distribution than the normal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-4 shows that lognormal means or lognormal upper confidence limits of the RCRA Characteristics do not exceed RCRA criteria. Only the normal upper confidence limit for Reactive Cyanide exceeded the RCRA criterion. **Therefore, it can be concluded that neither the mean concentration nor the upper confidence limits of the RCRA Characteristics over the entire CYW exceed RCRA criteria.**

Table C-5 provides the statistical estimators for the Pesticides/Herbicides for characterizing historical fill for the construction of the proposed Caissons. The C.V. for one of the Pesticides/Herbicides was above 100% and the variance for these Pesticides/Herbicides were greater than the lognormal variance indicating that there were one or more high values of these Pesticides/Herbicides. In such cases, the Pesticides/Herbicides concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. **Table C-5 shows that the mean, the upper confidence limit, the lognormal mean, and the lognormal upper confidence limits of the Pesticides/Herbicides over the entire CYW do not exceed TAGM RSCOs.**

Table C-6 provides the statistical estimators for the PCBs for characterizing historical fill for the construction of the proposed Caissons. The C.V. for one of the PCBs was above 100% and the variance for these PCBs were greater than the lognormal variance indicating that there were one or more high values of these PCBs. In such cases, the PCBs concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. **Table C-6 shows that the mean, the upper confidence limit, the lognormal mean, and the lognormal upper confidence limits of the PCBs over the entire CYW do not exceed TAGM RSCOs.**

Statistical Evaluation of Soil Analytical Results from the Historic Fill for Installation of Utilities

Table C-7 provides the statistical estimators for the VOCs for characterizing historical fill for Installation of Utilities. The C.V. for five of the VOCs were above 100% and the variance for these VOCs were greater than the lognormal variance indicating that there were one or more high values of these VOCs. In such cases, the VOCs concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. **Table C-7 shows that the mean, the upper confidence limit, the lognormal mean, and the lognormal upper confidence limit of the VOCs over the entire CYW do not exceed TAGM RSCOs.**

Table C-8 provides the statistical estimators for SVOCs for characterizing the historical fill for the installation of Utilities. The C.V.s for most SVOCs were around 100%, while the other SVOCs were around 200%. The variance was much greater than the lognormal variance indicating that there were one or more high values of SVOC causing the normal distribution results to be high. In such cases, the SVOC concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-8 shows that the lognormal upper confidence limits of 4-nitrophenol, benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, dibenzo(a,h)anthracene, p-chloroaniline, and phenol exceed TAGM RSCOs. For benzo(a)anthracene, benzo(a)pyrene, dibenzo(a,h)anthracene, p-chloroaniline, and phenol, the normal means exceed TAGM RSCOs. The lognormal means for the SVOCs do not exceed the TAGM RSCOs. **Therefore, it can be concluded that the mean concentrations of the SVOCs over the entire CYW do not exceed TAGM RSCOs but the upper confidence limits of 4-nitrophenol, benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, dibenzo(a,h)anthracene, p-chloroaniline, and phenol over the entire CYW exceed TAGM RSCOs.** In the case of 4-nitrophenol, p-chloroaniline, and phenol, no detectable concentrations of these compounds were present in the soil samples analyzed. A value equal to the MDL was used in calculations, hence the mean MDLs exceed the TAGM RSCOs.

Table C-9 provides the statistical estimators for Metals for characterizing the historical fill for the installation of Utilities. The C.V.s for most Metals were around or greater than 100%. The variance for the Metals was different than the lognormal variance, some greater, some lesser. Overall, the Metals concentrations are better described by the lognormal distribution than the normal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, the lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-9 shows that the lognormal upper confidence limits of Beryllium, Chromium, Copper, Iron, Mercury, Nickel, and Zinc exceed TAGM RSCOs. For these and some other Metals, the normal means and the normal upper confidence limits exceed TAGM RSCOs. The lognormal means for the Metals do not exceed the TAGM RSCOs. **Therefore, it can be concluded that the mean concentrations of the Metals over the entire CYW do not exceed TAGM RSCOs, but the upper confidence limits of Beryllium, Chromium, Copper, Iron, Mercury, Nickel, and Zinc over the entire CYW exceed TAGM RSCOs.**

Table C-10 provides the statistical estimators for the PCBs for characterizing historical fill for Installation of Utilities. The C.V. for one of the PCBs was above 100% and the variance for these PCBs were greater than the lognormal variance indicating that there were one or more high values of these PCBs. In such cases, the PCBs concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. **Table C-10 shows that the mean, the upper confidence limit, the lognormal mean, and the lognormal upper confidence limit of the PCBs over the entire CYW do not exceed TAGM RSCOs.**

Table C-11 provides the statistical estimators for the Pesticides/Herbicides for characterizing historical fill for Installation of Utilities. The C.V. for one of the Pesticides/Herbicides was above 100% and the variance for these Pesticides/Herbicides

were greater than the lognormal variance indicating that there were one or more high values of Pesticides/Herbicides. In such cases, the Pesticides/Herbicides concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, the lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. **Table C-11 shows that the means, the upper confidence limits, the lognormal means, and the lognormal upper confidence limits of the Pesticides/Herbicides over the entire CYW do not exceed TAGM RSCOs.**

Table C-12 provides the statistical estimators for RCRA Characteristics for characterizing the historical fill for the installation of Utilities. The C.V.s for TPH were greater than 100%. The variance for this characteristic was greater than the lognormal variance. Overall, the RCRA Characteristics are better described by the lognormal distribution than the normal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-12 shows that lognormal means or lognormal upper confidence limits of the RCRA Characteristics do not exceed RCRA Criteria. **Therefore, it can be concluded that neither the mean concentrations nor the upper confidence limits of the RCRA Characteristics over the entire CYW exceed RCRA Criteria.**

Statistical Evaluation of Soil Analytical Results from the Excavation Area for the Proposed Relocated Quill Bus Depot

Table C-13 provides the statistical estimators for VOCs for characterizing the relocated Quill Bus Depot excavation area. The C.V. for six of the VOCs were above 100% and the variance for these VOCs were greater than the lognormal variance indicating that there were one or more high values of these VOCs. In such cases, the VOC concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, the lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. **Table C-13 shows that the means, the upper confidence limits, the lognormal means, and the lognormal upper confidence limits of the VOCs over the entire CYW do not exceed TAGM RSCOs.**

Table C-14 provides the statistical estimators for SVOCs for characterizing the relocated Quill Bus Depot excavation area. The C.V.s for most SVOCs were around 100% and the other SVOCs were around 200%. The variance was much greater than the lognormal variance indicating that there were one or more high values of SVOC causing the normal distribution results to be high. In such cases, the SVOC concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-14 shows that the lognormal upper confidence limits of benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, dibenzo(a,h)anthracene, p-chloroaniline, and phenol exceed TAGM RSCOs. For benzo(a)anthracene, benzo(a)pyrene, dibenzo(a,h)anthracene, and p-chloroaniline, the normal means exceed TAGM RSCOs. The lognormal means for the SVOCs do not exceed the TAGM RSCOs. **Therefore, it can be concluded that the mean concentrations of the SVOCs over the entire CYW do not exceed TAGM RSCOs, but the upper confidence limits of benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene,**

dibenzo(a,h)anthracene, p-chloroaniline, and phenol over the entire CYW exceed TAGM RSCOs. In the case of p-chloroaniline, and phenol, no detectable concentrations of these compounds were present in the soil samples analyzed. A value equal to the MDL was used in calculations, hence the mean MDLs exceed the TAGM RSCOs.

Table C-15 provides the statistical estimators for Metals for characterizing the relocated Quill Bus Depot excavation area. The C.V.s for most Metals were around or greater than 100%. The variance for the Metals was different than the lognormal variance, some greater, some lesser. Overall, the Metals concentrations are better described by the lognormal distribution than the normal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-15 shows that the lognormal upper confidence limits of Arsenic, Chromium, Iron, Mercury, Nickel, and Zinc exceed TAGM RSCOs. For these and some other metals, the normal means and the normal upper confidence limits exceed TAGM RSCOs. The lognormal means for the Metals do not exceed the TAGM RSCOs. **Therefore, it can be concluded that the mean concentrations of the Metals over the entire CYW do not exceed TAGM RSCOs, but the upper confidence limits of Arsenic, Chromium, Iron, Mercury, Nickel, and Zinc over the entire CYW exceed TAGM RSCOs.**

Table C-16 provides the statistical estimators for PCBs for characterizing the relocated Quill Bus Depot excavation area. The C.V. for one of the PCBs was above 100% and the variance for these PCBs were greater than the lognormal variance indicating that there were one or more high values of these PCBs. In such cases, the PCBs concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. **Table C-16 shows that the means, the upper confidence limits, the lognormal means, and the lognormal upper confidence limits of the PCBs over the entire CYW do not exceed TAGM RSCOs.**

Table C-17 provides the statistical estimators for the Pesticides/Herbicides for characterizing the relocated Quill Bus Depot excavation area. The C.V.s for Pesticides/Herbicides were well below 100% and the variance for Pesticides/Herbicides were similar to the lognormal variance. In such cases, the Pesticides/Herbicides can be described by both the normal and lognormal distribution and the mean and lognormal mean can be used the estimator of central tendency. Also, the normal and lognormal upper confidence limits can be used. **Table C-17 shows that the means, the upper confidence limits, the lognormal means, and the lognormal upper confidence limits of the Pesticides/Herbicides over the entire CYW do not exceed TAGM RSCOs.**

Table C-18 provides the statistical estimators for RCRA Characteristics for characterizing the relocated Quill Bus Depot excavation area. The C.V.s for TPH were greater than 100%. The variance for this characteristic was greater than the lognormal variance. Overall, the RCRA Characteristics are better described by the lognormal distribution than the normal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-18 shows that lognormal means or lognormal upper confidence limits of the RCRA Characteristics do not exceed RCRA Criteria. **Therefore, it can be concluded that neither the mean**

concentrations nor the upper confidence limits of the RCRA Characteristics over the entire CYW exceed RCRA Criteria.

Statistical Evaluation of Soil Analytical Results from the Deepest Sample Interval

Table C-19 provides the mean, variance, standard deviation, coefficient of variation (C.V.), and the upper confidence limit of VOCs assuming that the VOC concentrations in each boring followed a normal distribution as well as the mean, variance, and upper confidence limit assuming that the VOC concentrations in each boring followed a two-parameter lognormal distribution. The C.V.s for VOCs were much greater than 100% and the variance was much greater than the lognormal variance indicating that there were one or more high values of VOC causing the normal distribution results to be high. In such cases, the VOC concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-19 shows that the mean and the upper confidence limit of Total Xylenes exceed TAGM RSCOs but the lognormal mean and the lognormal upper confidence limit of Total Xylenes do not exceed TAGM RSCOs. Also, the upper confidence limits of Acetone, Benzene, Ethylbenzene and Methyl Ethyl Ketone (MEK) exceeded TAGM RSCOs, but the means, the lognormal means and the lognormal upper confidence limits of Acetone, Benzene, Ethylbenzene and MEK did not exceed TAGM RSCOs. **Therefore, it can be concluded that even though concentrations of VOCs exceeded TAGM RSCOs in some locations, the mean concentrations of the VOCs over the entire CYW do not exceed TAGM RSCOs.**

Table C-20 provides the statistical estimators for SVOCs for characterizing the deepest sample interval. The C.V.s for most SVOCs were around 100% and the other SVOCs were around 200%. The variance was much greater than the lognormal variance indicating that there were one or more high values of SVOC causing the normal distribution results to be high. In such cases, the SVOC concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, the lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-20 shows that the lognormal upper confidence limits of benzo(a)anthracene, benzo(a)pyrene, dibenzo(a,h)anthracene, p-chloroaniline, and phenol exceed TAGM RSCOs. For benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, dibenzo(a,h)anthracene, and p-chloroaniline, the normal means exceed TAGM RSCOs. The lognormal means for the SVOCs do not exceed the TAGM RSCOs. **Therefore, it can be concluded that the mean concentrations of the SVOCs over the entire CYW do not exceed TAGM RSCOs, but the upper confidence limits of benzo(a)anthracene, benzo(a)pyrene, dibenzo(a,h)anthracene, p-chloroaniline, and phenol over the entire CYW do not exceed TAGM RSCOs.** In the case of p-chloroaniline, and phenol, no detectable concentrations of these compounds were present in the soil samples analyzed. A value equal to the MDL was used in calculations, hence the mean MDLs exceed the TAGM RSCOs.

Table C-21 provides the statistical estimators for Metals for characterizing the deepest sample interval. The C.V.s for most Metals were around or greater than 100%. The variance for the Metals was different than the lognormal variance, some greater, some lesser. Overall, the Metals concentrations are better described by the lognormal

distribution than the normal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-21 shows that the lognormal upper confidence limits of Chromium, Copper, Iron and Zinc exceed TAGM RSCOs. For these Metals, the normal means and the normal upper confidence limits also exceeded TAGM RSCOs. The lognormal means for the Metals do not exceed the TAGM RSCOs. **Therefore, it can be concluded that the mean concentrations of the Metals over the entire CYW do not exceed TAGM RSCOs, but the upper confidence limits of Chromium, Copper, Iron and Zinc over the entire CYW exceed TAGM RSCOs.**

Table C-22 provides the statistical estimators for the PCBs for characterizing the deepest sample interval. The C.V. for PCBs were well below 100% and the variance for PCBs were similar to the lognormal variance. In such cases, PCBs can be described by the normal or lognormal distributions and the mean or lognormal means can be used as the estimator of central tendency. Also, the normal or lognormal upper confidence limits can be used. **Table C-22 shows that the means, the upper confidence limits, the lognormal means, and the lognormal upper confidence limits of PCBs over the entire CYW do not exceed TAGM RSCOs.**

Table C-23 provides the statistical estimators for the Pesticides/Herbicides for characterizing the deepest sample interval. The C.V. for three of the Pesticides/Herbicides were above 100% and the variance for these Pesticides/Herbicides were greater than the lognormal variance indicating that there were one or more high values of these Pesticides/Herbicides. In such cases, the Pesticides/Herbicides concentrations are better described by the lognormal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. **Table C-23 shows that the means, the upper confidence limits, the lognormal means, and the lognormal upper confidence limits of the Pesticides/Herbicides over the entire CYW do not exceed TAGM RSCOs.**

Table C-24 provides the statistical estimators for RCRA Characteristics for characterizing the deepest sample interval. The C.V.s for Reactive Cyanide and TPH were greater than 100%. The variance for these characteristics was greater than the lognormal variance. Overall, the RCRA Characteristics are better described by the lognormal distribution than the normal distribution and the lognormal mean is a better estimator of central tendency than the mean. Also, lognormal upper confidence limit is a better indicator for detecting outliers than the normal upper confidence limit. Table C-24 shows that lognormal means and lognormal upper confidence limits of the RCRA characteristics do not exceed RCRA Criteria. The mean and the normal upper confidence limit for Reactive Cyanide exceed the RCRA Criterion. **Therefore, it can be concluded that neither the mean concentrations nor the upper confidence limits of the RCRA characteristics over the entire CYW exceed RCRA Criteria.**

Conclusion

Statistical analysis revealed that the mean concentrations of none of the analytes (based on the lognormal distribution) over the entire CYW exceed the TAGM RSCOs. The upper 95% confidence limits (based on the lognormal distribution) over the entire CYW

of the following SVOCs exceed the TAGM RSCOs: benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, and dibenzo(a,h)anthracene. The upper confidence limits (based on the lognormal distribution) over the entire CYW of the following Metals **exceed** the TAGM RSCOs: Arsenic, Beryllium, Chromium, Copper, Iron, Mercury, Nickel, and Zinc. In the case of the SVOCs 4-nitrophenol, p-chloroaniline, and phenol, no detectable concentrations of these compounds were present in the soil samples analyzed. As concentrations below the MDL were not provided by the laboratory, a value equal to the MDL was used in the statistical analysis; this explains why these compounds were identified as having mean concentrations exceeding TAGM RSCOs, although not detected in the soil samples at concentrations above laboratory MDL.

**John D. Caemmerer West Side Yard
Block 676, Lot 3
New York, NY**

**Phase I Environmental Site Assessment Update
Report**

New York, NY

January 2009

EXECUTIVE SUMMARY

Under Contract with AKRF Environmental and Planning Consultants (AKRF), Louis Berger & Assoc., P.C. (LBA) conducted an update to a Phase I Environmental Site Assessment (ESA) of the Western Rail Yard section of the John D. Caemmerer West Side Rail Yard located in the City of New York, New York County, New York (the Site). The Site is identified as Block 676, Lot 3 and encompasses an approximate area of 13.085 acres. The Site is currently owned by the Metropolitan Transportation Authority (MTA).

LBA understands that the Site is being considered for mixed-use development. The Phase I ESA update was conducted in conformance with ASTM Standards related to the Phase I ESA process. The Phase I ESA update was based on a Site reconnaissance, interviews with personnel familiar with the site, a review of available files and previous reports, and the findings of an environmental database report. The purpose of the Phase I ESA update was to identify any changes in the environmental conditions at the Site since the previous Phase I ESA was conducted in 2004 and to identify any additional potential Recognized Environmental Conditions (RECs) at the Site and the potential implications of those RECs for future development of the property.

The Site is rectangular in shape and is approximately 13.085 acres in area. The Site currently consists of an active rail storage yard and ancillary maintenance facilities operated by the Long Island Rail Road (LIRR), a New York City Department of Sanitation (DSNY) and private bus operator parking areas, a New York City Transit (NYCT) storage area, and an elevated freight railroad viaduct that is no longer operable. Portions of the Site were constructed on formerly inundated land that was filled-in during the later part of the 19th century. The Site has historically been used as a freight yard, train storage and lumber yard. The Site is located within a mixed residential, commercial and office use area.

During the July 2004 Phase I ESA, the RECs identified included historical uses at the Site and vicinity, as well as three (3) open NY Spills/LTANKS cases in the vicinity of the Site (PB, 2004). As a result, a Phase II Environmental Site Investigation (ESI) was subsequently conducted in 2004. Pesticides, herbicides and PCBs were not detected in the soil samples at levels exceeding the New York State Department of Environmental Conservation (NYSDEC) Technical and Administrative Guidance Memorandum HWR-94-4046 Recommended Soil Cleanup Objectives (TAGM RSCOs). Of the 175 soil samples collected, nine (9) samples were found to contain benzene at concentrations above the applicable TAGM RSCOs. Three (3) of these samples also contained ethylbenzene at concentrations above the TAGM RSCOs. These volatile organic compound (VOC) exceedances were attributed to isolated petroleum releases. In addition, semi-volatile organic compounds (SVOCs) and metals were detected at concentrations exceeding the TAGM RSCOs. These concentrations were found to be consistent with the presence of historic urban fill.

Pesticides, herbicides and polychlorinated biphenyls (PCBs) were not detected in the eleven (11) groundwater samples. Petroleum-related VOCs and SVOCs were detected in two (2) of the samples at concentrations exceeding the NYSDEC Technical and Operational Guidance Series (TOGS) Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations. The groundwater

samples also contained elevated concentrations of metals, which was attributed to the high levels of turbidity in the groundwater samples. Based on the results of the sampling, groundwater would require pre-treatment to address petroleum-related compounds and to remove sediments, prior to discharge.

During the July 2004 Phase I ESA, the RECs identified included historical uses at the Site and vicinity, as well as three (3) open NY Spills/LTANKS cases in the vicinity of the Site (PB, 2004). Based on the 2008 data obtained during the site reconnaissance, subsequent regulatory and records review, and interviews with persons familiar with the Site and its history, LBA considers the historical usage of the Site and vicinity to be a REC. However, the three (3) off-site cases have since been closed and are no longer considered RECs with respect to the Site.

LBA identified the following additional RECs associated with the Site:

- Open Spill #04-07411, which is currently being addressed under a region-wide NYSDEC Order on Consent File Nos. R2-20031230-384, R2-20031230-385 and R2-20031230-386.
- Spill #04-07107, for which closure was requested. LBA was unable to locate any documentation of the spill being closed by the NYSDEC. However, this spill is not included in the above-mentioned region-wide Order on Consent between NYSDEC and LIRR; therefore, it is likely that this spill was closed.
- In the vicinity of the Site, two off-site properties were identified in the LTANKS database with open/active spills; two off-site properties were identified in the NY Spills database with open/active cases and one off-site property was identified in the CERCLIS-NFRAP database. Due to proximity and/or assumed hydraulic gradient, these properties have the potential to impact the subject Site. The properties are identified as follows:
 - West 29th Street and 9th Avenue (Manhattan General Mail Facility)
 - 555 West 34th Street (Mueshar 34th Street LLC)
 - 524 West 29th Street (High Ridge Enterprises)
 - 538 West 34th Street (Federal Express)
 - 309 11th Avenue (Mobil S/S)
- Based on a review of the VCP sites, it appears that the West 34th Street Development Project is a Brownfields site being remediated through the BCP. Based on proximity, there is a potential for contamination from this facility to migrate to the Site via groundwater; therefore, this facility is considered a REC. The property is identified as follows:
 - 555 West 34th Street (West 34th Street Development Project)

This 2008 assessment did not reveal the presence of any additional historical RECs in connection with the property since the 2004 Phase I ESA. In addition, no other environmental concerns were identified.

LBA recommends the following:

- Before beginning any excavation or construction activity, Construction Health and Safety Plan (CHASP) documents should be prepared for the project. The CHASP shall meet the requirements set forth by the Occupational, Safety and Health Administration (OSHA), the New York State Department of Health (NYSDOH), New York City Department of Environmental Protection and any other applicable regulations. The CHASP should identify the possible locations and risks associated with the potential contaminants that may be encountered, and the administrative and engineering controls that will be utilized to mitigate concerns (i.e., dust control procedures). During future construction activities, the Contract documents should identify provisions and a contingency for managing, handling, transporting and disposing of any potentially impacted soil. The Contractor should be required to submit a Materials Handling Plan to identify the specific protocol and procedures that will be employed to manage the waste in accordance with applicable regulations;
- Dewatering may be performed as part of construction activities. If water will be discharged to a New York City Department of Environmental Protection (NYCDEP) combined sanitary and storm sewer, the water must be sampled for the NYCDEP sewer discharge parameters. If the NYCDEP sewer discharge limits are exceeded, the Contractor may be required to obtain a NYCDEP sewer discharge permit and perform sampling, laboratory analysis, and pretreatment of water prior to discharge into sanitary and combined sewers;
- If discharge into storm sewers is required during dewatering, it must be done under the appropriate NYSDEC State Pollutant Discharge Elimination System (SPDES) permit. Additional sampling and laboratory analysis will be required to satisfy NYSDEC requirements prior to discharge into storm sewers; and
- Building plans must take into account the presence of these petroleum impacts and institute environmental controls which are necessary in order to manage the risk to future building occupants. In order to address any impacted soil vapor at the Site, recommended environmental controls include a vapor barrier below the concrete building slab, as well as sufficient sub-slab piping and risers that can be operated, if deemed necessary, as a sub-slab venting system.
- The vapor barrier should be installed below the concrete building slab. The vapor barrier should be constructed of welded polyethylene plastic or by other commercially available liner materials that are made for this type of application (i.e., Liquid Boot). The vapor barrier will act to prevent the migration of gases through the building slab.
- If the vapor barrier is not considered to provide sufficient protection from soil vapors, the sub-slab system could be implemented using the sub-slab piping set within a porous gravel layer and connected, via solid riser pipe, to a discharge point on the proposed building's roof. The sub-slab venting system could initially be operated as a passive system, with the addition of wind-driven

fans on the risers and, if necessary, be converted to an active system using mechanically-driven blowers. The blowers will provide a negative suction pressure below the slab, creating a negative pressure gradient below the slab to prevent vapors from passing through the slab into the building.

1.0 INTRODUCTION

This report presents the findings of an update to a Phase I Environmental Site Assessment (ESA) of the Western Rail Yard section of the John D. Caemmerer West Side Rail Yard located in the City of New York, New York County, New York (the Site). This report was prepared by Louis Berger & Assoc., P.C. (LBA) at the request of AKRF Environmental and Planning Consultants (AKRF) for the Hudson Yards Development Corporation (HYDC). The Site is identified as Block 676, Lot 3 and encompasses an approximate area of 13.085 acres.

LBA understands that the Site is being considered for mixed-use development. The Phase I ESA was conducted to determine whether hazardous material contamination is present on the Site as a result of historic or current uses. The assessment evaluated the potential for disturbance during construction and whether contamination could persist on-site after development.

1.1 PURPOSE

The purpose of the Phase I ESA was to identify the presence of any Recognized Environmental Conditions¹ (RECs), and/or Historical Recognized Environmental Conditions² as defined by ASTM International (ASTM) Standard Practice E1527-05, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, with respect to the Site. This report has been prepared at the request of AKRF for HYDC, also designated by the term “User,” within the context of ASTM Standard Practice E1527-05.

The application of ASTM Standard Practice E1527-05 in the preparation of this report is intended to permit the designated User of this report to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser (collectively, “landowner liability protections”) limitations on liability with respect to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). This report, therefore, intends to represent “all appropriate inquiry” into the previous ownership and uses of the Site, consistent with good commercial or customary practice, as defined by CERCLA in 42 U.S.C. §9601(35)(B).

¹ ASTM Standard E1527-05 defines “Recognized Environmental Conditions” as follows: “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.”

² ASTM Standard E1527-05 defines “ Historical Recognized Environmental Condition” as follows: “ an environmental condition which in the past would have been considered a *recognized environmental condition*, but which may or may not be considered a recognized environmental condition currently. The final decision rests with the Environmental Professional and will be influenced by the current impact of the historical recognized environmental condition on the property.”

1.2 SCOPE OF SERVICES

LBA's scope of services for this Phase I ESA update consisted of the following components, as further detailed in subsequent sections of this report:

- Records review;
- Site visit and reconnaissance; and
- Evaluation of information and preparation of a Phase I ESA report

The User's responsibilities, as set forth in Section 6 of ASTM Standard Practice E1527-05 with respect to the identification of RECs in connection with the Site, comprise an additional scope of inquiry. These responsibilities consist of the following tasks and information sources, as further discussed in Section 3 of this ESA:

- Review of Title and Judicial Records for Environmental Liens or Activity and Use Limitations (AULs);
- Specialized Knowledge or Experience of the User;
- Actual Knowledge of the User;
- Reason for Significantly Lower Purchase Price;
- Commonly Known or Reasonably Ascertainable Information; and
- Reason for Requesting a Phase I ESA

1.3 SIGNIFICANT ASSUMPTIONS

In general, LBA has assumed in the conduct of this ESA that respondents to our inquiries offered information in good faith and that, through our research, we obtained reasonably correct and accurate information from the sources consulted.

1.4 LIMITATIONS AND EXCEPTIONS

This investigation was limited to the review of available records, interviews with local officials and persons familiar with the Site, and an on-site visual inspection. The Site inspection was limited to observation of surficial conditions only. Such an inspection cannot be expected to reveal all oil or hazardous materials or situations that might be present on-site; some hazardous materials or conditions may exist and not be detected because they are beyond the scope of this study. The investigation was conducted in a manner consistent with that level of care and skill exercised by environmental professionals currently practicing under similar conditions and was based on information made available to the representatives of LBA. All documents prepared by or furnished by LBA pursuant to this project are to be used in the context of the scope of services contracted. This document is not intended or represented to be suitable for reuse by the client or others on modifications of the project scope. Reuse or release to third parties without the expressed written permission of the consultant is prohibited.

1.5 USER RELIANCE

This Phase I ESA update was conducted in a manner consistent with the level of care and skill exercised by environmental professionals currently practicing under similar conditions and was based on information made available to LBA representatives. LBA conducted interviews, file, and data reviews to obtain information that could reveal the past or present use, storage and/or disposal of hazardous substances or petroleum products on or near the Site. LBA performed a visual reconnaissance of the Site to identify evidence of potential sources of contamination.

The Phase I ESA update conforms to the general content requirements of ASTM Standard E-1527, to address the due diligence provisions of CERCLA. This report was prepared in accordance with Section 9601 (35)(b) of the Superfund Amendments and Reauthorization Act, to satisfy the provision that “all appropriate inquiry” be made into the presence or potential presence of hazardous substances or petroleum products on the Site.

Additional information, which was not available at the time of this report’s preparation, may result in the modification of the information present herein. The scope of work for this Phase I ESA update did not include evaluation of asbestos, lead-based paint or radon gas.

2.0 SITE DESCRIPTION

This section provides general information on the ownership and location of the Site, and current uses of the Site and surrounding properties. The Site consists of the Western Rail Yard section of the John D. Caemmerer West Side Rail Yard, and is located in the Borough of Manhattan, New York (Block 676, Lot 3). The Site is rectangular in shape and is approximately 13.085 acres in area. The Site currently consists of a rail storage yard operated by the Long Island Rail Road (LIRR).

2.1 LOCATION AND LEGAL DESCRIPTION

The 13.085-acre Site is identified as Block 676, Lot 3 and is located at 319 11th Avenue in the Borough of Manhattan, New York. The location of the Site is shown in Figure 1. Figure 2 consists of a Site Plan, which shows the property boundaries of the Site.

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The Site currently consists of an active rail storage yard operated by the LIRR. The Site is located within a mixed residential, commercial and office use area. Photographs of the Site and vicinity are presented in Appendix A.

2.3 CURRENT USE OF THE SITE

The majority of the Site is currently utilized as a rail storage yard by the LIRR. Several buildings / structures and small above ground facilities located along the Site's perimeter are utilized for maintenance or storage purposes. There are three LIRR maintenance and operations buildings along the western property boundary. The southern portion of the Site is utilized by a bus operator and the New York City Department of Sanitation (DSNY) for vehicle storage. A New York City Transit (NYCT) storage area occupies the southeastern corner of the Site. The abandoned High Line, an elevated freight railroad viaduct, is partially located along the western and southern boundary. The remainder of the property is predominantly covered by railroad tracks.

2.4 DESCRIPTIONS OF STRUCTURES, ROADS, OTHER IMPROVEMENTS ON THE SITE

The Site consists of the western end of the LIRR rail storage yard. The Site is predominantly covered by numerous sets of railroad tracks that run in a general east to west direction. Three (3) LIRR maintenance and operations buildings were noted on the western portion of the Site. A fire pump house with associated large aboveground storage tank (AST) containing water is located near the southeast corner of the Site. The abandoned High Line railway runs above the western side of the Site, approximately north to south. Near the southwest corner of the Site, the elevated High Line railway turns east and runs along the southern portion of the Site, approximately west to east. Eleventh Avenue forms an overpass over the railyard to the west of the Site. Route 9A (West Side Highway) borders the Site to the west. West 30th

Street and West 33rd Street border the northern and southern boundaries of the Site, respectively. The Site is fenced to the north, south and west. Near the eastern portion of the Site, the rail yard is approximately 10 feet below grade from West 33rd and West 30th Streets. Near the western portion of the Site, the rail yard is at the same grade as Route 9A.

2.5 CURRENT USE OF THE ADJOINING PROPERTIES

The Site is located within a mixed residential, commercial and office use area. Three (3) active construction sites are located to the northeast, southeast and southwest of the Site. To the southeast, it appeared that work activities related to the dismantling of the High Line rail overpass is underway. To the southwest, a large multi-story building is under construction. A Mobil filling station is located to the south of the Site. Directly west of this filling station and south of the Site is a garage, identified as Mike's Auto Repair. The southwestern corner of 11th Avenue and West 30th Street was noted to be occupied by Penske Truck Storage.

3.0 RECORDS REVIEW

Federal and State record sources were reviewed to identify potential sites of environmental concern located within established search distances of up to 1.0 mile from the Site. The review of the standard environmental record sources was accomplished utilizing a computer database search report provided by Environmental Data Resources, Inc. (EDR) of Milford, Connecticut. A copy of the EDR database report (EDR, 2008a) is included as Appendix B. A description of the various databases reviewed and the summaries of the reviews are provided below.

3.1 STANDARD ENVIRONMENTAL RECORD SOURCES

The databases discussed in this section were reviewed for information regarding documented and/or suspected releases of regulated hazardous substances and/or petroleum products on or near the Site. Based on the review of addresses, one site appears to be incorrectly plotted, so it was excluded from the discussion below. LBA also reviewed the forty (40) “unmappable” (also referred to as “orphan”) listings within the database report, cross-referencing available address information with facility names. Only orphan sites which were found to be located within the applicable search radii are discussed below. A summary of the sites identified through the Federal and State regulatory agency databases review is presented in the following table.

Federal and State List	Site Appears on List	Search Radius*	No. of Sites within Search Radius	Last Updated
National Priorities List for Federal Superfund Cleanup (NPL) / Delisted NPL	No	1.0 mile	0 / 0	4/30/2008 / 4/30/2008
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	No	0.5 mile	0	7/9/2008
CERCLIS - No Further Remedial Action Planned (CERCLIS-NFRAP)	No	0.5 mile	0	12/3/2007
Resource Conservation and Recovery Information System – Treatment, Storage, or Disposal Facilities (RCRAInfo-TSD)/RCRIS Corrective Action Activity (CORRACTS)	No	0.5 mile / 1.0 mile	0 / 0	5/12/2008 / 5/12/2008
Resource Conservation and Recovery Information System Generators/Transporters (RCRAInfo Gen/Trans)	No	0.25 mile	66	5/12/2008
Facility Index System/Facility Identification Initiative Program Summary Report (FINDS)	No	Site	0	7/1/2008
Emergency Response Notification System (ERNS)	No	Site	0	12/31/2007
State Hazardous Waste Sites (SHWS)	No	1.0 mile	0	6/10/2008
Hazardous Substance Waste Disposal Site (HSWDS)	No	0.5 mile	0	1/1/2003
Solid Waste Facilities/Landfill Sites (SWF/LF)	No	0.5 mile	2	7/29/2008

Federal and State List	Site Appears on List	Search Radius*	No. of Sites within Search Radius	Last Updated
Solid Waste Recycling Facilities (SWRCY)	No	0.5 mile	0	7/29/2008
Leaking Underground Storage Tanks (LTANKS)	No	0.5 mile	89	6/10/2008
Underground Storage Tanks (USTs)/Chemical Bulk Storage USTs (CBS USTs)	Yes	0.25 mile	2 / 0	8/7/2008 / 1/1/2002
Aboveground Storage Tanks (ASTs)/Chemical Bulk Storage ASTs (CBS ASTs)	No	0.25 mile	34 / 0	8/7/2008 / 1/1/2002
Manifest	No	0.25 mile	57	5/27/2008
NY Spills	No	0.125 mile	66	6/10/2008
Voluntary Cleanup Program (VCP)	No	0.5 mile	4	6/10/2008
Drycleaners	No	0.25 mile	1	6/15/2004
Brownfields	No	0.5 mile	0	6/10/2008
Institutional Controls (INST CONTROL)	No	0.5 mile	1	6/10/2008
Engineering Controls (ENG CONTROL)	No	0.5 mile	1	6/10/2008
Restrictive Declarations (RES DECL)	No	0.180 mile	0	12/31/1992
New York State Pollution Discharge Elimination System (SPDES)	No	Site	0	8/5/2008
NY E Designation	No	0.125 mile	32	3/26/2008
Toxic Release Inventory System (TRIS)	No	Site	0	12/31/2006

* The surrounding area search radius indicates the radial area (measured from the Site) for which the database review was performed.

The following subsections provide a discussion of the databases reviewed, as well as sites identified within the search radius and listed in the above table.

3.1.1 NPL/Delisted NPL

The U.S. EPA National Priorities Listing (NPL), or Superfund List, is a Federal listing of uncontrolled or abandoned hazardous waste sites. The list is created from the CERCLIS database (see next subsection) and is primarily based upon a score that each site or facility receives from the U.S. EPA's Hazard Ranking System. After a site or facility has been identified as a CERCLIS site, the U.S. EPA conducts an assessment of the property. The ranking score associated with the degree of contamination found is one of the determinations made as to whether the Site is placed on the NPL. These sites are then prioritized for possible long-term remedial action and referred to the state for further action under state programs. Delisted sites are those sites that have been deleted from the NPL when no further response is appropriate. Neither the Site nor any other facilities within a 1.0-mile radius of the Site are listed in the NPL or Delisted NPL databases.

3.1.2 CERCLIS

The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) list is a compilation of records from a nationwide database created to maintain and regulate those facilities or sites that the U.S. EPA has investigated or will investigate for suspected or uncontrolled releases of hazardous substances, contaminants or pollutants as reported by states, municipalities, private companies and private citizens under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA or the Superfund Program). Once a site is placed on the CERCLIS list, it may be subjected to several additional levels of evaluation to determine the severity of the contamination. These levels of evaluation range from discovery and preliminary assessment to site inspection, and possibly to the Hazard Ranking System. Such a determination could ultimately place the site under consideration for inclusion on the NPL. Inclusion on the CERCLIS list does not confirm the presence of an environmental problem or a public health threat. Neither the Site nor any other facilities within a 0.5-mile radius of the Site are identified in the CERCLIS database.

3.1.3 CERCLIS-NFRAP

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list a site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. Although the Site was not listed in the CERCLIS-NFRAP database, one (1) other facility within a 0.5-mile radius of the Site was identified. The property was identified as Manhattan General Mail Facility, located at West 29th Street and 9th Avenue, approximately 0.34 miles to the southeast of the Site. Based on assumed hydraulic gradient and topographic gradient, there is a potential for contamination from this facility to migrate to the subject Site, adversely impacting its environmental integrity. Therefore, this property is considered a REC with respect to the Site.

3.1.4 RCRAInfo TSD/CORRACTS

The Resource Conservation and Recovery Act (RCRA) program identifies and tracks hazardous wastes from the point of generation to the point of disposal. The Resource Conservation and Recovery Information System (RCRAInfo) database tracks those facilities that treat, store and/or dispose of hazardous materials as defined by RCRA (referred to as TSD facilities). The RCRAInfo Corrective Action Activity (CORRACTS) database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. Neither the Site nor any other facilities within a 0.5-mile radius of the Site are identified in the RCRAInfo-TSD or CORRACTS databases.

3.1.5 RCRAInfo Gen/Trans

RCRAInfo is the EPA's comprehensive information system, providing access to data supporting RCRA (the Resource Conservation and Recovery Act of 1976) and the Hazardous and Solid Waste Amendments

of 1984. Inclusion on the list is not necessarily indicative of contamination; rather, it indicates the presence of potential sources of contamination. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. Conditionally exempt small quantity generators (CESQGs) generate less than 100 kilograms (kg) of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQG”) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kg of hazardous waste, or over 1 kg of acutely hazardous waste per month. Non-generators (Non-Gen) are former generators of hazardous waste. The Site was not identified in the RCRAInfo database; however, sixty-six (66) other facilities, including one (1) orphan site, within a 0.25-mile radius of the subject Site are listed in the RCRAInfo Gen/Trans databases. Based on proximity and/or assumed hydraulic gradient, there is a potential for contamination from one (1) of these facilities, Mueshar 34th Street LLC at 555 West 34th Street, to migrate to the Site. This facility is identified in the LTANKS database with an open case, as well as the VCP program, and is considered a REC with respect to the subject Site.

3.1.6 FINDS

The Facility Index System/Facility Identification Initiative Program Summary Report (FINDS) contains facility information from several databases including the Federal Permit Compliance System Wastewater Discharges database, the U.S. EPA Civil Enforcement Docket, and the New York State Air Discharge database. The Site was not identified in the FINDS database.

3.1.7 ERNS

The Emergency Response Notification System (ERNS) is a national database used to collect information on reported releases of oil and hazardous substances. The Site was not listed in the ERNS database.

3.1.8 SHWS

The State Hazardous Waste Sites (SHWS) list is the states’ equivalent of CERCLIS. Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites. The report did not identify the Site or any other facilities within one mile as being listed in the database.

3.1.9 HSWDS

The Hazardous Substance Waste Disposal Site (HSWDS) Inventory includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites from which the US EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Neither the Site nor any other facilities within 0.5 mile of the Site appeared on the HSWDS database.

3.1.10 SWF/LF

The Solid Waste Facility/Landfill Facilities (SWF/LF) database is a comprehensive listing of State permitted/recorded solid waste disposal facilities or landfills. Although the Site was not listed in the SWF/LF database, two (2) other facilities within a 0.5-mile radius were identified. Red Ball Interior Demolition, located at 625 W. 29th Street, is an inactive transfer station. Based on assumed hydraulic gradient and the absence of reported releases, this facility is not considered a REC with respect to the Site. Con Edison, located at 281 11th Avenue, is identified as an inactive construction and demolition waste processing facility. This facility is also listed on the NY Spills database with closed cases. Based on assumed hydraulic gradient and case status, it is unlikely that this facility would have an adverse impact on the environmental integrity of the Site.

3.1.11 SWRCY

SWRCY is the recycling facility directory. Neither the Site nor any other facilities within a 0.5-mile radius are listed in the SWRCY database.

3.1.12 LTANKS

The NYSDEC Leaking Storage Tank (LTANKS) Incident Reports contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. Although the Site did not appear in the LTANKS database, eighty-nine (89) other facilities within a 0.5-mile radius of the Site are identified. Of these, twelve (12) cases are listed as being open. A summary of the open LTANKS cases is presented in the table below.

<i>Database Listing</i>	<i>Distance/ Direction</i>	<i>ID No.</i>	<i>Comments</i>
Brownfield Site 555 West 34 th Street New York, NY	0 – 0.125 mile Northeast	0706755	A tank failure was reported on 9/18/07 for a tank containing an unidentified petroleum product. The spill case is part of a long-term Brownfields project.
High Ridge Enterprises 524 West 29 th Street Manhattan, NY	0 – 0.125 mile Southeast	0307633	An overfill of a petroleum tank was reported on 10/20/03. Soil and groundwater contamination, including presence of free product. Groundwater flow to the north/northwest at a depth of 8-9 feet below grade. AS/SVE remediation system is in operation. Groundwater analytical results are slightly above applicable criteria.
Gaseteria 466 10 th Avenue New York, NY	0.125– 0.25 mile East-northeast	8909614	A tank failure was reported on 01/05/90 for a tank containing gasoline. Gasoline vapors detected in sewers across from facility. Soil and groundwater investigation conducted and contamination confirmed. DEC requires further investigation.
Commercial Property 537-545 West 27 th Street New York, NY	0.125 - 0.25 mile South	0613440	A tank failure was reported on 03/14/07 for a tank containing diesel fuel. Tanks were removed, remediation is pending.

<i>Database Listing</i>	<i>Distance/ Direction</i>	<i>ID No.</i>	<i>Comments</i>
Penske Truck Leasing Co L P 536 W. 26 th Street New York, NY	0.125 - 0.25 mile South-southwest	9801954	An overfill of a gasoline tank was reported on 5/14/98. Free product present in monitoring wells. Remedial Action Plan approved by DEC. Subsequently, DEC informed that site will be used as staging area for initial shaft for tunnel boring machine for No. 7 subway extension project.
Helipoint W 30th St/Manh Helipoint/West 30th Street New York City, NY	0.25 - 0.5 mile East-southeast	8903684	A tank test failure was reported on 7/13/89 for a tank containing jet fuel.
Hertz/Penske - Man 493 / 7 10 AVE Manhattan, NY	0.25 - 0.5 mile East-northeast	8906443	A tank failure was reported on 12/12/89 for a gasoline tank. Site has been excavated; end point samples to be collected. No further information available in database report.
523 11th Av/Greyhound Bus 523 11th Avenue New York City, NY	0.25 - 0.5 mile North-northeast	8904384	A tank failure was reported on 08/02/89 for a release of motor fuel and other petroleum. Contained in clay soil. Oil in groundwater. Ongoing investigation.
505-509 West 41st St Manhattan, NY	0.25 - 0.5 mile Northeast	9912551	A tank failure was reported on 02/03/00 for a tank(s) containing No. 2 fuel oil. Three tanks and contaminated soil were removed off-site. No post-excavation samples collected. New building was constructed at site. NYSDEC has requested documentation of proper tank and soil disposal.
Port Auth NY/NJ – Man W 39 St / 9 Ave Manhattan, NY	0.25 - 0.5 mile East-northeast	8911942	A tank failure was reported on 03/16/90 for a tank containing No. 2 fuel oil. Approximately 200 gallons of fuel oil are unaccounted for. No further information provided.
Baptist Church 410 West 40 th Street New York, NY	0.25 - 0.5 mile East-northeast	0713240	A tank failure was reported on 03/14/08 for a tank containing No. 2 fuel oil. The tank was pumped, cleaned and cut open. No holes observed. Soil borings conducted and no VOCs or elevated SVOCs detected. Tank will be abandoned and a new tank will be installed in the basement. Case is listed as closed in DEC remarks.
12 th Avenue and 43 rd Street Manhattan, NY	0.25 - 0.5 mile North-northeast	9401276	A tank failure was reported on 08/02/89 for two (2) 10,000-gallon tanks containing No. 6 fuel oil. Groundwater remediation system installed to recover free product in groundwater. Bioremediation program also conducted at site. Ongoing quarterly groundwater monitoring. Remedial Action Plan was scheduled for submittal on 11/28/07.

Based on proximity and/or assumed hydraulic gradient, there is a potential for contamination from two (2) of these facilities, i.e., the Brownfields site at 555 West 34th Street and the High Ridge Enterprises site at 524 West 29th Street, to migrate to the Site, therefore, these facilities are considered potential RECs with respect to the subject Site.

3.1.13 PBS USTs/CBS USTs

The Underground Storage Tank (UST) database is a list of facilities that have USTs that are regulated under Subtitle I of RCRA. The Chemical Bulk Storage (CBS) UST database is a list of facilities that store regulated hazardous substances in underground tanks of any size. The Site is identified on the

Petroleum Bulk Storage (PBS) UST database, but not the CBS database. In addition, thirty-four (34) other facilities within a 0.25-mile radius of the Site were identified on the PBS UST database. There were no listings on the CBS UST database. Of the off-site listings, two (2) facilities also appear on the LTANKS database with active cases. The following table presents a summary of the Site, as well as the two (2) facilities with open cases.

<i>Database Listing</i>	<i>Distance/ Direction</i>	<i>ID No.</i>	<i>Comments</i>
Dept Of Sanitation Manhattan District 6 319 Eleventh Avenue New York, NY	Site	2-601983	Active Status. Two 2,500-gallon USTs, contents unidentified, installed on 10/1/94 and removed on 10/17/07. Two in-service 1,000-gallon USTs, contents unidentified, installed on 10/1/94. Two in-service 2,500-gallon USTs, contents unidentified, installed on 10/24/07.
537-545 West 27 th Street New York, NY	0.125 – 0.25 mile South	2-610856	Facility is Administratively Closed. Six 550-gallon unregistered USTs, contents unidentified, dates of installation not provided.
Penske Truck Leasing Co., L.P. 536 West 26th Street New York, NY	0.125 – 0.25 mile South-southwest	2-108774	Facility is Unregulated. Four 550-gallon USTs, contents unidentified, removed on 3/1/98. One 4,000-gallon UST, contents unidentified, removed on 3/1/98.

Based on location, assumed hydraulic gradient, absence of reported releases and/or case status, none of the off-site UST listings are considered to be of concern with respect to the Site.

3.1.14 PBS ASTs/CBS ASTs

The Aboveground Storage Tank (AST) database is a list of facilities that have registered ASTs. The list is derived from NYSDEC's Petroleum Bulk Storage (PBS) Database. The Chemical Bulk Storage (CBS) AST list includes facilities storing hazardous substances listed in Title 6 New York Codes, Rules and Regulations (6 NYCRR) Part 597, in aboveground tanks with capacities of 185 gallons or greater. The Site did not appear on the AST database. However, thirty-four (34) other facilities within a 0.25-mile radius of the Site were identified on the AST database. There were no listings on the CBS AST database. Of the listings, one (1) facility also appears on the LTANKS database with an open case. The following table presents a summary of the facility.

<i>Database Listing</i>	<i>Distance/ Direction</i>	<i>ID No.</i>	<i>Comments</i>
Penske Truck Leasing Co., L.P. 536 West 26th Street New York, NY	0.125 – 0.25 mile South-southwest	2-108774	Facility is Unregulated. One in-service 550-gallon AST, contents unidentified, installation date not provided. One in-service 270-gallon AST, contents unidentified, installation date not provided.

Based on location, assumed hydraulic gradient, absence of reported releases and/or case status, none of the off-site listings are not considered to be of concern with respect to the Site.

3.1.15 MANIFEST

A Manifest lists and tracks hazardous waste from the generator through transporters to a toxic substance disposal (TSD) facility. The Site was not identified on the MANIFEST database; however, fifty-seven (57) other facilities, including three (3) orphan sites, within a 0.25-mile radius of the Site were listed.

3.1.16 NY Spills

The New York Spills Database contains data collected on spills reported to NYSDEC as required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Part 613 (Section 613.8) or 6 NYCRR Part 595 (Section 595.3). It includes spills active as of April 1, 1986, as well as spills occurring since this date. The Site did not appear in the NY Spills database; however, based on a review of LIRR records (Langan, 2005), LBA is aware that the Site is subject to a NYSDEC Order on Consent File Nos. R2-20031230-384, R2-20031230-385 and R2-20031230-386 due to a release in the northwest corner of the property (Case No. 04-07411). During subsurface investigations on 10/4/04 conducted by Langan Engineering (Langan) on behalf of the Jets Development LLC (Jets), elevated PID readings and petroleum odors were noted in a boring, E-61, along the east sidewalk of 12th Avenue near 33rd Street. VOCs, SVOCs and metals were detected in soil and groundwater at concentrations exceeding the TAGM RSCOs and TOGS Ambient Water Quality Standards and Guidance Values. Specifically, benzene was detected in soil at a concentration of 2.2 ppm at a depth of 22-24 feet (ft). Total VOCs exceeded the TAGM RSCOs in boring E-61 at depths of approximately 18-26 ft; and in boring E-62 at 24-26 ft. SVOCs and metals exceeded the TAGM RSCOs in all samples collected. SVOC concentrations were noted to increase with depth. The highest VOC concentrations in groundwater were also associated with the location E-61 (i.e., monitoring well MW-61). Benzene was detected at 1,000 micrograms per liter ($\mu\text{g/l}$); toluene was detected at 1,000 $\mu\text{g/l}$; ethylbenzene was detected at 3,600 $\mu\text{g/l}$ and total xylenes were detected at 4,900 $\mu\text{g/l}$.

Delineation activities were subsequently conducted and, on 7/18/05, Langan requested that the case be closed as the spill appeared to be localized and due to an off-site source. However, the NYSDEC declined to do so based on its view that there was insufficient evidence to definitively conclude that the spill originated outside the rail yard.

In December 2006, the NYSDEC and LIRR executed the above-referenced Order on Consent to address multiple spills throughout LIRR's service region, including Spill No. 04-07411. The Order on Consent requires further monitoring and investigation activities, as well as remedial action, if found to be necessary based on the investigation findings.

In order to satisfy the requirements of the Order on Consent, LIRR conducted quarterly groundwater sampling events at the Site between May 2007 and May 2008. The analytical results demonstrate an

improvement in the quality of groundwater since 2005, when the spill was reported. Benzene, toluene, ethylbenzene and xylene (BTEX) concentrations in MW-61 have been less than the applicable TOGS standards and guidance values since December 2007. The remaining monitoring wells did not exhibit any exceedances of the applicable TOGS standards and guidance values for BTEX compounds. SVOCs detected above applicable TOGS standards and guidance values included various phthalates and are attributed to laboratory contamination (TRC, 2008).

TRC has prepared a Remedial Investigation Work Plan (RIWP) for the Site in accordance with the Order on Consent (TRC, 2008). The RIWP outlines the activities proposed to investigate the petroleum contamination at the Site. Proposed activities include the following:

- Survey of existing monitoring wells;
- Determination of groundwater gradient and tidal influence study;
- Installation of three (3) on-site and two (2) off-site soil borings and subsequent collection and analysis of soil samples to further investigate potential sources of petroleum contamination and delineate extent of petroleum impacts to soil;
- Installation of five (5) monitoring wells and subsequent collection and analysis of groundwater samples to further delineate the extent of petroleum contamination in the groundwater in the vicinity of the reported spill at MW-61. All wells (i.e., existing and newly-installed) will be sampled to evaluate groundwater quality.

TRC also indicated that a Remedial Investigation Report (RIR) will be prepared to document the investigative activities, findings and conclusions of same, and to present recommendations based on those findings.

In addition, 66 other facilities within a 0.125-mile radius of the Site are identified in the NY Spills database. Of these, eight (8) facilities are listed with open cases. A summary of the open NY Spills cases at the off-site facilities is presented in the table below.

<i>Database Listing</i>	<i>Distance/ Direction</i>	<i>Spill No.</i>	<i>Comments</i>
Federal Express 538 W. 34 th Street New York City, NY	0 – 0.125 mile East-northeast	9000078	Spill occurred on 3/14/90 due to equipment failure. Contaminated soil discovered during tank closure. DEC has no documentation of remediation, so new investigation is required.
NYCT 35 th Street/11 th Avenue Manhattan, NY	0 – 0.125 mile North-northeast	0304463	Spill of unknown petroleum reported on 7/28/03. Soil contamination identified during soil borings conducted for NYCT.
NYC Dept. of Sanitation 606 West 30 th Street Manhattan, NY	0 – 0.125 mile South	0602047	Spill of petroleum product occurred on 5/24/06. Leaking tank, but leak contained as tank was double-walled. Tank was scheduled to be replaced.

<i>Database Listing</i>	<i>Distance/ Direction</i>	<i>Spill No.</i>	<i>Comments</i>
Mobil S/S 309 11 th Avenue New York, NY	0 – 0.125 mile South-southwest	9305598	Spill of gasoline occurred on 08/05/93 as a result of equipment failure. Free product present in monitoring well along West 30 th St. Groundwater delineation not yet completed. Additional investigation to be done.
11 th Ave and W. 29 th Street Manhattan, NY	0 – 0.125 mile South-southwest	9113336	Spill of dielectric fluid occurred on 8/16/91 due to equipment failure. Reported by ConEd on 5/4/95 as required under Consent Order.
Working Parking Lot 282 11 th Avenue New York City, NY	0 – 0.125 mile South-southwest	0700587	Spill of petroleum on 4/16/07. Soil and groundwater contamination associated with USTs. Site will be redeveloped. Contamination will be remediated via excavation.
NYCT 28 th St/11 th Ave New York, NY	0 – 0.125 mile South-southwest	0305824	Spill of petroleum product reported on 9/2/03. Soil contamination discovered during boring.
West 28 th St Yard 281 11 th Avenue Manhattan, NY	0 – 0.125 mile South-southwest	0400801	Spill of 30 gallons of unknown petroleum occurred on 4/30/04. Hydraulic oil discovered in sump pit for hydraulic lift. Oil and water mixture reportedly cleaned. Trap was to be sealed and checked.

Based on proximity, assumed hydraulic gradient and/or size/severity of the spills, two (2) of these facilities, Federal Express at 538 West 34th Street, and the Mobil S/S at 309 11th Avenue, may potentially impact the subject Site and are considered RECs.

3.1.17 VCP

The Voluntary Cleanup Program (VCP) uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination. The Site did not appear on the VCP database; however, four (4) other facilities within a 0.5-mile radius were identified. There is potential for contamination from one (1) of these facilities to the Site via groundwater, however, this facility is actually being remediated through the Brownfield Cleanup Program (BCP) and is not considered to be a VCP facility. The BCP facility is discussed further in the Brownfields Section (Section 3.1.19).

3.1.18 DRYCLEANERS

This is a listing of registered drycleaners. The Site was not identified on the DRYCLEANERS database; however, one (1) other facility within 0.25 miles appeared on the database. Based on assumed hydraulic gradient and absence of reported releases, this facility does not constitute a REC with respect to the Site.

3.1.19 BROWNFIELDS

A Brownfield is any real property where redevelopment or re-use may be complicated by the presence or potential presence of a hazardous waste, petroleum, pollutant, or contaminant. The database report did not identify the Site or any other facilities within a 0.5-mile radius on the Brownfields database. However, based on a review of the VCP sites, it appears that the West 34th Street Development Project is a Brownfields site being remediated through the BCP. Based on proximity, there is a potential for contamination from this facility to migrate to the Site via groundwater; therefore, this facility is considered a REC. This facility is described in the table below.

<i>Database Listing</i>	<i>Distance/ Direction</i>	<i>Comments</i>
West 34th Street Development Project 555 West 34th Street Manhattan, NY	0 – 0.125 mile Northeast	Program Type: BCP Site Code: 359020 Eight 550-gallon USTs are abandoned in-place on site. Two 4000-gallon USTs have been removed. Suspected contaminants from petroleum, including MTBE. Soil and shallow groundwater are contaminated. Off-site contamination is not known. RIR and RAWP approved and site clean up work began on 8/27/07.

3.1.20 INST CONTROL

The INST CONTROL database is a listing of Environmental Remediation maintained by NYSDEC that have institutional controls in place. Although the Site was not identified on the INST CONTROLS database, one (1) other facility within a 0.5-mile radius of the Site appeared in the database. Based on assumed hydraulic gradient and the establishment of institutional controls at this facility, it is unlikely that this facility would have an adverse impact on the Site.

3.1.21 ENG CONTROL

The ENG CONTROL database is a listing of Environmental Remediation maintained by NYSDEC that have engineering controls in place. Although the Site was not identified on the ENG CONTROLS database, one (1) other facility within a 0.5-mile radius of the Site appeared in the database. Based on assumed hydraulic gradient and the establishment of engineering controls at this facility, it is unlikely that this facility would have an adverse impact on the Site.

3.1.22 RES DECL

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and

development of the property. Certain restrictive declarations are indicated by a “D” on zoning maps. The Site was not identified on the RES DECL database.

3.1.23 NY SPDES

New York State has a state program which has been approved by the U.S. Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law, the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters. The Site was not identified on the NY SPDES database.

3.1.24 NY E DESIGNATION

The (E (Environmental)) designation database is maintained by the NYC Department of City Planning. The (E) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP. Although the Site did not appear on the (E) Designation database, thirty-two (32) other facilities within a 0.125-mile radius were identified. Until releases are reported for these properties, it is unknown whether they have the potential to impact the subject Site; therefore, these sites are not considered RECs.

3.1.25 TRIS

The State Toxic Release Inventory System (TRIS) identifies facilities that release toxic chemicals to the air, water and land in reportable quantities. The Site was not listed in the TRIS database.

3.2 PROPRIETARY DATABASE REVIEWS

EDR maintains databases that contain sites of potential environmental concern that are not necessarily included in standard government records. A summary of the sites identified through the EDR proprietary databases review is presented in the following table:

<i>EDR Proprietary Record Source</i>	<i>Site Appears on List</i>	<i>Search Radius*</i>	<i>No. of Sites within Search Radius</i>	<i>Last Updated</i>
EDR Manufactured Gas Plants	No	1.0 mile	4	N/A

* The surrounding area search radius indicates the radial area (measured from the Site) for which the database review was performed.

The following subsections provide a discussion of the databases reviewed, as well as any sites identified within the search radius and listed in the above table.

3.2.1 EDR Manufactured Gas Plants

The Manufactured Gas Plant Database, a proprietary EDR database, includes records of coal gas plants. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed directly at the plant site can remain or spread slowly, serving as a continuous source of soil and groundwater contamination. Although the Site was not listed in this database, four (4) other facilities within a 1.0-mile radius were identified. Based on distance from the Site and/or assumed hydraulic gradient, it is unlikely that contamination from any of these facilities would migrate to the subject Site.

3.3 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

Additional state and local records sources were investigated in an attempt to supplement information obtained through review of standard environmental record sources. The additional records and sources consulted in conjunction with this Phase I ESA are listed below. Copies of correspondence to and received from, any of these record sources are included in Appendix C.

3.3.1 New York State Department of Environmental Conservation (NYSDEC)

A Freedom of Information Law (FOIL) request was filed with the NYSDEC on September 9, 2008 in an effort to determine whether they had any records for the Site. On September 23, 2008, NYSDEC provided copies of available records to LBA. The records included an NYSDEC Spill Report Form, which documents a spill from a 55-gallon drum of motor oil on November 26, 2005 at the West Side Storage Yard. Also included was a copy of an LIRR Spill Incident Fact Sheet for the same incident. Reportedly, a truck accidentally knocked over a 55-gallon drum of motor oil onto the roadway. The spill was cleaned by AB Oil with speedi-dry and absorbent pads. The waste material was removed off-site and the asphalt was power-washed. It should be noted that the address of the spill is listed as 34th Street and 11th Avenue, which is located within the West Side Yard, but is not situated in the portion of the Yard that is the focus of this Phase I ESA update.

3.3.2 New York City Department of Environmental Protection (NYCDEP)

A Freedom of Information Law (FOIL) request was filed with the NYCDEP on September 9, 2008 in an effort to determine whether they had any records for the Site. In a letter dated January 7, 2009, the NYCDEP's Division of Emergency Response and Technical Assessment notified LBA that no records pertaining to the Site were available.

3.3.3 City of New York Department of Health and Mental Hygiene

A Freedom of Information Law (FOIL) request was filed with the City of New York Department of Health and Mental Hygiene on September 9, 2008 in an effort to determine whether they had any records for the Site. A response is still pending; upon receipt of a response, it will be reviewed and, if conclusions within this report are affected, an addendum will be issued.

3.3.4 Fire Department of New York City (FDNY)

A Freedom of Information Law (FOIL) request was filed with the FDNY on September 9, 2008 in an effort to determine whether they had any records for the Site. A response is pending; upon receipt of a response, it will be reviewed and, if conclusions within this report are affected, an addendum will be issued.

3.3.5 United States Environmental Protection Agency (U.S. EPA)

On September 8, 2008, a Freedom of Information Act (FOIA) request was submitted to the U.S. EPA in an effort to determine if they had any records for the Site. In a letter dated September 19, 2008, the RCRA Programs Branch of the U.S. EPA notified LBA that no records pertaining to the Site were available.

3.4 PHYSICAL SETTING SOURCES

The Site is located at Block 676, Lot 4 in New York, New York, and encompasses approximately 13.085 acres. The Site is bounded to the north by West 33rd Street, to the east by 11th Avenue, to the south by West 30th Street and to the west by 12th Avenue. The Site is situated at approximately 40° 45' 11.8" North Latitude and 74° 0' 13.6" West Longitude. Figure 1 is an annotated USGS 7.5-minute quadrangle topographic map (Weehawken, NJ, 1995) showing the Site location, local topography, drainage and cultural features. The detailed discussions presented below were obtained from the 2004 Phase I ESA Report (PB, 2004) and Phase II Environmental Site Investigation Report (LBA, 2004).

3.4.1 Topography and Drainage

According to a review of the United States Geological Survey (USGS) 7.5-Minute Quadrangle Map, Weehawken, NJ - NY, dated 1981, the elevation of the Site is approximately 10 feet above mean sea level (MSL). The Site was observed to be on a gently sloping plain, with a slight gradient to the west. Surface

drainage, based on identified topography, flows in a westerly direction from the Site. Stormwater runoff from the Site is expected to drain into stormwater drains (PB, 2004). A copy of the topographic map is presented in Figure 1.

3.4.2 Geology and Soil

The Site is underlain by the Manhattan Prong of the New England Uplands physiographic province. The bedrock of the Manhattan Prong underlies much of southwestern Connecticut, Westchester County, New York, and New York City, and ends at the southern tip of Manhattan Island. Three distinct metamorphic rock formations make up the Manhattan Prong; known collectively as the New York City Group. These formations are: the highly folded and contorted Fordham gneiss, the oldest and most widespread of the formations; the Inwood marble, derived from dolomitic limestone; and the younger Manhattan Formation, consisting largely of mica schist, overlying the Inwood marble and making up most of the rock outcrops on Manhattan Island. The soils are mostly acidic, shallow to deep, and rocky.

In general, the geology underlying the Site consists of unconsolidated materials overlying bedrock (i.e., naturally occurring and fill material). A review of geological logs of soil borings advanced at the Site in the early 1980s indicated that from ground surface to the top of rock, the unconsolidated materials comprise fill material, organic material, sand and silt, and glacial till. The fill material was placed at the Site in the latter half of the 1800s and is described as loose to compact, grey to brown, fine to coarse sand and gravel, some silt with cinders, brick and concrete. The depth of the fill material ranges from 10 and 15 feet below ground surface (bgs) in the eastern portion of the property and from 25 to 35 feet bgs in the west, with a natural depression in the central western portion that is approximately 45 feet bgs (PB, 2004).

The organic material below the fill material is a riverine deposit and is described as soft to medium, dark grey organic silty clay to clayey silt with fine sand seams. The organic material ranges in thickness from about 5 feet in the eastern portion of the Site to 70 feet in the western portion.

The sand and silt are composed of material eroded from upland locations and is described as medium compact to compact, red-brown silt or clayey silt with layers of silty fine sand to silty fine sand to silty fine to coarse sand, with some gravel. This stratum underlies the eastern to central portions of the Site and ranges from approximately 5 to 10 feet in thickness.

Glacial till consists of material deposited during the last continental glaciation as the glacial ice melted and released rock fragments carried by the glacier. It is described as very compact, red-brown silty fine sand to silty fine to coarse sand, some gravel with boulders. The glacial till deposits underlie the central to western portions of the Site and range from 5 to 10 feet in thickness.

Bedrock underlies the sand and silt in the eastern portion of the Site and glacial till in the western portion. Bedrock comprises the Manhattan Schist and is described as moderately jointed and fractured mica schist with quartzite seams.

3.4.3 Groundwater

Manhattan Island is underlain by pre-Cambrian metamorphic rocks which have been tightly folded and subsequently eroded. In most places, these pre-Cambrian rocks are overlain by a thin covering of Pleistocene deposits, consisting chiefly of till. The rock beneath most of the island is the Manhattan schist. Manhattan schist contains some joints, irregular fractures and faults along which groundwater moves but, in some places, chemical weathering has filled these openings with clay. The Manhattan schist underlies more than three-fourths of Manhattan, but it is not considered to be an important source of groundwater since openings in the bedrock that yield water through joints and fractures are minimal.

Due to the thinness and low permeability of the Pleistocene till, water yields are low. However, there are two large bodies of stratified drift in Manhattan that contain and yield considerable groundwater. Neither of these bodies, which are associated with the prominent depressions in the bedrock surface, is located in close proximity to the Site. One is located in northern Manhattan (extending from 96th Street and the East River to about 145th Street and the Hudson River), while the other is located in southern Manhattan (all of the island south of 14th Street).

Based on a review of existing information, groundwater beneath the Site is expected to flow in a westerly direction, ultimately discharging into the Hudson River located approximately 250 feet west of the Site. Surface drainage, based on identified topography, flows in a westerly direction from the Subject Property. Estimated groundwater levels and/or flow direction(s) may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations. Stormwater runoff from the Site is expected to drain into stormwater drains (PB, 2004).

3.4.4 Surface Water and Wetlands

The nearest surface water body to the Site is the Hudson River, which is located 0.3 miles west-northwest of the Site. The designated use of these waterways is maintenance, migration and propagation of the natural and established biota, migration of diadromous fish, maintenance of wildlife, secondary contact recreation, and any other reasonable uses.

Based on a review of the 1975 New York State Department of Environmental Conservation (NYSDEC) Freshwater Wetlands Map, New York County, Map 2 of 4, no wetlands that are regulated under the Freshwater Wetlands Act are present in the Borough of Manhattan. A review of National Wetlands Inventory (NWI) information present in the EDR Radius Map Report (EDR, 2008) indicated that no wetlands are present on or adjacent to the Site. A review of the Federal Emergency Management Agency's digital Q3 flood data for the Site indicated that the Site is located within the 100- year flood plain.

3.5 HISTORICAL USE INFORMATION ON THE SITE

Information on history of the Site was obtained through interviews with persons familiar with the area, municipal records, historic maps, and aerial photographs.

3.5.1 Fire Insurance Maps

Historical Sanborn Fire Insurance Maps for the years 1890, 1899, 1911, 1930, 1976, 1979, 1980, 1982, 1992, 1993, 1994, 1995 and 1996 were obtained from EDR and reviewed as part of the 2004 Phase I ESA (EDR, 2004). The findings are summarized below.

The review of the Sanborn Maps indicated that both the Site and its surrounding area have been used mostly for commercial purposes since 1890. The entire Caemmerer Yard was used as a freight yard, the offloading of materials from rail cars to local transportation, by the New York Central Railroad Company from 1890 through the early 1980s, at which time it was converted to a storage yard for Long Island Rail Road (LIRR) train cars. Historical use of the Site as a freight yard and a train storage yard is considered a REC. Additionally, the historical presence of a lumber yard at the Site may have resulted in localized impacts due to releases of petroleum and/or metals from wood treatment substances and is considered a REC.

The historical presence of coal yards, a lumber yard, filling station, locomotive house and motor freight station at properties in the vicinity of the Site is considered a REC due to the possibility of releases of petroleum and/or metals.

The review of the Sanborn Maps identified evidence of historical RECs at the Site and surrounding area, as summarized below.

Year	Description/Property Use	Distance/Direction	Assumed Hydraulic Gradient
1890	Freight Rail Yard; Lumber Yard	Site	Site
	Freight Rail Yard; Coal Yard; Locomotive House; Iron Works	To the East across 11 th Avenue	Upgradient
	Lumber Yard	To the South across West 30 th Street	Crossgradient
1899	Freight Rail Yard; Lumber Yard	Site	Site
	Freight Rail Yard; Coal Yard; Locomotive House	To the East across 11 th Avenue	Upgradient
	Lumber Yard	To the South across West 30 th Street	Crossgradient
1911	Freight Rail Yard	Site	Site
	Freight Rail Yard; Coal Yard; Locomotive House	To the East across 11 th Avenue	Upgradient
	Coal Yard; Soap Factory	To the South across West 30 th Street	Crossgradient
1930	Freight Rail Yard	Site	Site
	Freight Rail Yard; Locomotive House	To the East across 11 th Avenue	Upgradient

Year	Description/Property Use	Distance/Direction	Assumed Hydraulic Gradient
	Metal Works; Junk Yard; Gasoline Station; Auto Repair Shop	To the Southeast across West 30 th Street	Crossgradient
1950	Freight Rail Yard	Site	Site
	Freight Rail Yard; Metal Purchasing Co.	To the East across 11 th Avenue	Upgradient
	Garage; Filling Station; Junk Yard; Auto Repair Shop	To the South and Southeast across West 30 th Street	Crossgradient
1979	Freight Rail Yard	Site	Site
	Freight Rail Yard	To the East across 11 th Avenue	Upgradient
	Motor Freight Station	To the Northeast across West 33 rd Street	Crossgradient
	Truck Rental Company; Filling Station; Motor Freight Station; Garage; Auto Repair Shop	To the South and Southeast across West 30 th Street	Crossgradient
1992-1996	LIRR Storage Yard	Site	Site
	LIRR West Side Storage Yard	To the East across 11 th Avenue	Upgradient
	Truck Rental Company; Filling Station; Motor Freight Station; Garage; Auto Repair Shop	To the South and Southeast across West 30 th Street	Crossgradient

3.6 HISTORICAL USE INFORMATION ON ADJOINING PROPERTIES

Information on history of adjoining properties was obtained through a review of historical Sanborn Fire Insurance Maps. The area surrounding the Site appears to have been used for commercial purposes dating back to at least the late 1890s.

3.7 OTHER DOCUMENTS

LBA reviewed the Phase I ESA Report that was prepared by the Parson Brinckerhoff Team in July 2004 (PB, 2004). Information obtained from the review is incorporated into this report, as appropriate.

LBA also reviewed the Phase II Environmental Site Investigation Report that was prepared in November 2004 (LBA, 2004). In 2004, a Phase II ESI was conducted at the Site by LBA. The objectives of the Phase II ESI were to confirm environmental conditions identified in the 2004 Phase I ESA and to determine if they have resulted in impacts to the soil and/or groundwater at the Site. The Phase II ESA included the installation of forty-five (45) soil borings and eleven (11) monitoring wells. A total of 175 soil samples and eleven (11) groundwater samples were collected for laboratory analysis.

No elevated concentrations of methane were detected in the soil at the Site during field screening. Pesticides, herbicides and PCBs were not detected in the soil samples at levels exceeding the TAGM RSCOs. Of the 175 soil samples collected, nine (9) samples were found to contain benzene at concentrations above the applicable TAGM RSCOs. Three (3) of these samples also contained ethylbenzene at concentrations above the TAGM RSCOs. These VOC exceedances were attributed to isolated petroleum releases. In addition, SVOCs and metals were detected at concentrations exceeding the TAGM RSCOs. These concentrations were found to be consistent with the presence of historic urban fill.

Pesticides, herbicides and PCBs were not detected in the eleven (11) groundwater samples. Petroleum-related VOCs and SVOCs were detected in two (2) of the groundwater samples at concentrations exceeding the NYSDEC TOGS Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations. The groundwater samples also contained elevated concentrations of metals, which was attributed to the high levels of turbidity in the groundwater samples. Based on the results of the sampling, groundwater would require pre-treatment to address petroleum-related compounds and to remove sediments, prior to discharge.

In addition, LBA reviewed a Spill Closure Report that was prepared by Langan for the Jets for Spill #04-07107, which was encountered at the Site on September 25, 2004 (Langan, 2004). Elevated PID readings were detected in the soil samples collected from boring location E-52 at depths of 3 to 6 feet. A sheen was also observed in groundwater at 8 feet below grade. No VOCs or PCBs were detected in soil above applicable TAGM RSCOs. SVOCs and metals were detected above applicable TAGM RSCOs, but are attributed to historic fill. No VOCs, SVOCs or PCBs were detected in groundwater above applicable TOGS Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations. Only metals were detected above the applicable TOGS standards and guidance values, but were found to be similar to those encountered across the entire Site. Based on the results, Langan concluded that a spill had not occurred at the Site, and any exceedances were due to the presence of historic fill. Langan requested that NYSDEC close the spill. No documentation was found to indicate that Spill #04-07107 was closed; however, this spill was not included in the region-wide Order on Consent between NYSDEC and LIRR. It is assumed, therefore, that no further action is requested with respect to this spill.

4.0 SITE RECONNAISSANCE

Mr. Stephen Morse and Mr. Adam Trescott of LBA conducted a Site visit on September 22, 2008. LBA was accompanied by Mr. George Asimenios of MTA-LIRR during the Site visit. The weather was sunny, with a temperature of about 70° F at the time. Photographs taken during the Site visit are included as Appendix A.

4.1 METHODOLOGY AND LIMITING CONDITIONS

LBA visually surveyed areas of the Site that were readily accessible. The only structure that was available for surveying was the fire pump house.

4.2 GENERAL SITE SETTING

The Site is rectangular in shape and is approximately 13.085 acres in area. The Site currently consists of an active rail storage yard operated by the LIRR. The Site is located within a mixed residential, commercial and office use area.

4.3 EXTERIOR OBSERVATIONS

The Site consists of the western end of the LIRR rail storage yard. The Site is predominantly covered by numerous sets of railroad tracks that run in a general east to west direction. Three (3) LIRR maintenance and operations buildings were noted on the western portion of the Site. A fire pump house with associated large AST containing water is located near the southeast corner of the Site. The abandoned High Line railway runs above the western side of the Site, approximately north to south. Near the southwest corner of the Site, the elevated High Line railway turns east and runs along the southern portion of the Site, approximately west to east. Eleventh Avenue forms and overpass over the railyard to the west of the Site. Route 9A (West Side Highway) borders the Site to the west. West 30th Street and West 33rd Street border the northern and southern boundaries of the Site, respectively. The Site is fenced to the north, south and west. Near the eastern portion of the Site, the rail yard is approximately 10 feet below grade from West 33rd and West 30th Streets. Near the western portion of the Site, the rail yard is at the same grade as Route 9A.

Numerous drums, holding various cleaning supplies were noted under the 11th Avenue overpass, near the southeastern corner of the Site. In this same southeastern area, a large dumpster was noted, partially full with miscellaneous debris. Also in this area, a sign indicating "Waste Chip Storage" was posted. Some visible ground staining was noted on the concrete slab in this area, likely related to historic drum and dumpster storage.

On the western side of the fire pump house, located along the southern side of the Site, four (4) 55-gallon drums labeled as "non-hazardous waste" and stored on wood pallets. No visible staining was observed related to these drums.

The southwestern portion of the site was noted to be used for storing multiple buses. Also, the southwestern corner of the Site, as viewed from West 30th Street, was observed to be used for storage of several DSNY garbage trucks and a garbage truck filling station was noted.

Along the western side of the Site, several large storage containers, drums and dumpsters were noted. These items were mostly related to train-cleaning and maintenance activities and were observed to be well-kept and in good condition. Visible staining was not observed on the ground in the vicinity of these items.

During the time of the Site walk, a drill crew was observed conducting test borings along the southern portion of the railyard, east of 11th Avenue and directly east of the Site. Three (3) active construction sites were also noted on adjacent lots to the Site. Directly northeast of the Site, on the northeastern corner of 11th Avenue and West 33rd Street, there was an active construction site, though the purpose of construction activities was not discernible from the street. Southeast of the Site, another construction site was observed on the southwest corner of the Western Rail Yards Site, along the northern side of West 30th Street, between 10th and 11th Avenues. Though construction activities were not readily discernible, it appeared that work in this area was related to the dismantling of the Highline rail overpass. Another large construction site was observed directly southwest of the Site, south of West 30th Street, involving construction of a large, multi-story building.

Also noted just south of the Site, on the southwestern corner of 11th Avenue and West 30th Street, was a Mobil filling station. Directly west of this filling station and south of the Site is a garage, identified as Mike's Auto Repair. The southwestern corner of 11th Avenue and West 30th Street was noted to be occupied by Penske Truck Storage.

4.4 INTERIOR OBSERVATIONS

The fire pump house building was accessible to visually survey during the time of the Site walk. Within the pump house, no environmental areas of concern were noted.

5.0 INTERVIEWS

LBA inquired as to the availability, for interviews, of past owners, operators, and occupants of the property who were likely to have material information regarding the potential for contamination at the property, to the extent that such persons could be identified. Information received is described below.

5.1 INTERVIEWS WITH OWNER

As part of the Phase I ESA process, LBA provided a questionnaire to the owner; however, a response is pending.

5.2 INTERVIEWS WITH SITE MANAGER

An interview has not yet been conducted with the site manager.

5.3 INTERVIEWS WITH OCCUPANTS

An interview has not yet been conducted with the site occupants.

5.4 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

Written communications were made to local government officials. The findings are presented in Section 3.

6.0 FINDINGS

LBA has completed a Phase I ESA update for the Site located at Block 676, Lot 3 in New York City, New York. The Phase I ESA update was conducted in conformance with ASTM Standards related to the Phase I ESA process. The Phase I ESA update was based on a site inspection, interviews with personnel familiar with the site, a review of available files and previous reports, and the findings of an environmental database report. The purpose of the Phase I ESA update was to identify any changes in the environmental conditions at the Site since the previous Phase I ESA was conducted in 2004 and to identify any additional potential RECs at the Site and the potential implications of those RECs for future development of the property.

6.1 RECOGNIZED ENVIRONMENTAL CONDITIONS

During the July 2004 Phase I ESA, the RECs identified included historical uses at the Site and vicinity, as well as three (3) open NY Spills/LTANKS cases in the vicinity of the Site (PB, 2004). Based on the recent data obtained during the site reconnaissance, subsequent regulatory and records review, and interviews with persons familiar with the Site and its history, LBA considers the historical usage of the Site and vicinity to be a REC due to the confirmed presence of VOCs, SVOCs and metals in soil above applicable TAGM RSCOs, and VOCs and SVOCs in groundwater above applicable TOGS Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations at the Site. However, the three (3) off-site cases have since been closed and are no longer considered RECs with respect to the Site.

LBA identified the following additional RECs associated with the Site:

- Open Spill #04-07411, which is currently being addressed under a region-wide NYSDEC Order on Consent File Nos. R2-20031230-384, R2-20031230-385 and R2-20031230-386.
- Spill #04-07107, for which closure was requested. LBA was unable to locate any documentation of the spill being closed by the NYSDEC. However, this spill is not included in the above-mentioned region-wide Order on Consent between NYSDEC and LIRR, therefore, it is likely that this spill was closed.
- In the vicinity of the Site, two off-site properties were identified in the LTANKS database with open/active spills; two off-site properties were identified in the NY Spills database with open/active cases and one off-site property was identified in the CERCLIS-NFRAP database. Due to proximity and/or assumed hydraulic gradient, these properties have the potential to impact the subject Site. The properties are identified as follows:
 - West 29th Street and 9th Avenue (Manhattan General Mail Facility)
 - 555 West 34th Street (Mueshar 34th Street LLC)
 - 524 West 29th Street (High Ridge Enterprises)

- 538 West 34th Street (Federal Express)
- 309 11th Avenue (Mobil S/S)

6.2 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

No historical RECs were identified in connection with the Site, except for the ones already identified during the 2004 Phase I ESA (i.e., historical usage of Site and vicinity for transportation and industrial purposes).

6.3 OTHER ENVIRONMENTAL CONCERNS

No other environmental concerns were identified.

7.0 OPINION

Based on the findings of this ESA, summarized in Section 6, LBA believes that the environmental concerns identified would not warrant further investigation to determine the extent to which environmental remedies might be required in connection with the Site.

8.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment update in conformance with the scope and limitations of ASTM Practice E 1527-05 of the property located at Block 676, Lot 3 in the City of New York, New York County, New York. Any exceptions to, or deletions from this practice are described in Section 9 of this report.

During the July 2004 Phase I ESA, the RECs identified included historical uses at the Site and vicinity, as well as three (3) open NY Spills/LTANKS cases in the vicinity of the Site (PB, 2004). Based on the recent data obtained during the site reconnaissance, subsequent regulatory and records review, and interviews with persons familiar with the Site and its history, LBA considers the historical usage of the Site and vicinity to be a REC due to the confirmed presence of VOCs, SVOCs and metals in soil above applicable TAGM RSCOs, and VOCs and SVOCs in groundwater above applicable TOGS Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations at the Site. However, the three (3) off-site cases have since been closed and are no longer considered RECs with respect to the Site.

LBA identified the following additional RECs associated with the Site:

- Open Spill #04-07411, which is currently being addressed under a region-wide NYSDEC Order on Consent File Nos. R2-20031230-384, R2-20031230-385 and R2-20031230-386.
- Spill #04-07107, for which closure was requested. LBA was unable to locate any documentation of the spill being closed by the NYSDEC. However, this spill is not included in the above-mentioned region-wide Order on Consent between NYSDEC and LIRR, therefore, it is likely that this spill was closed.
- In the vicinity of the Site, two off-site properties were identified in the LTANKS database with open/active spills; two off-site properties were identified in the NY Spills database with open/active cases and one off-site property was identified in the CERCLIS-NFRAP database. Due to proximity and/or assumed hydraulic gradient, these properties have the potential to impact the subject Site. The properties are identified as follows:
 - West 29th Street and 9th Avenue (Manhattan General Mail Facility)
 - 555 West 34th Street (Mueshar 34th Street LLC)
 - 524 West 29th Street (High Ridge Enterprises)
 - 538 West 34th Street (Federal Express)
 - 309 11th Avenue (Mobil S/S)
- Based on a review of the VCP sites, it appears that the West 34th Street Development Project is a Brownfields site being remediated through the BCP. Based on proximity, there is a potential for

contamination from this facility to migrate to the Site via groundwater; therefore, this facility is considered a REC. The property is identified as follows:

- 555 West 34th Street (West 34th Street Development Project)

This assessment did not reveal the presence of any additional historical RECs in connection with the property since the 2004 Phase I ESA. In addition, no other environmental concerns were identified.

Based on the findings and conclusions of the Phase II ESI at the Site (LBA, 2004), there is currently minimal risk of exposure to contaminated soil and groundwater if the recommended precautionary measures are followed during construction at the Site. LBA recommends the following:

- Before beginning any excavation or construction activity Construction Health and Safety Plan (CHASP) documents should be prepared for the project. The (CHASP) shall meet the requirements set forth by the Occupational, Safety and Health Administration (OSHA), the New York State Department of Health (NYSDOH), New York City Department of Environmental Protection and any other applicable regulations. The CHASP should identify the possible locations and risks associated with the potential contaminants that may be encountered, and the administrative and engineering controls that will be utilized to mitigate concerns (i.e., dust control procedures). During future construction activities, the Contract documents should identify provisions and a contingency for managing, handling, transporting and disposing of any potentially impacted soil. The Contractor should be required to submit a Materials Handling Plan to identify the specific protocol and procedures that will be employed to manage the waste in accordance with applicable regulations;
- Dewatering may be performed as part of construction activities. If water will be discharged to a NYCDEP combined sanitary and storm sewer, the water must be sampled for the NYCDEP sewer discharge parameters. If the NYCDEP sewer discharge limits are exceeded, the Contractor may be required to obtain a NYCDEP sewer discharge permit and perform sampling, laboratory analysis, and pretreatment of water prior to discharge into sanitary and combined sewers;
- If discharge into storm sewers is required during dewatering, it must be done under the appropriate NYSDEC State Pollutant Discharge Elimination System (SPDES) permit. Additional sampling and laboratory analysis will be required to satisfy NYSDEC requirements prior to discharge into storm sewers; and
- Building plans must take into account the presence of these petroleum impacts and institute environmental controls which are necessary in order to manage the risk to future building occupants. In order to address any impacted soil vapor at the Site, recommended environmental controls include a vapor barrier below the concrete building slab, as well as sufficient sub-slab piping and risers that can be operated, if deemed necessary, as a sub-slab venting system.

- The vapor barrier should be installed below the concrete building slab. The vapor barrier should be constructed of welded polyethylene plastic or by other commercially available liner materials that are made for this type of application (i.e., Liquid Boot). The vapor barrier will act to prevent the migration of gases through the building slab.
- If the vapor barrier is not considered to provide sufficient protection from soil vapors, the sub-slab system could be implemented using the sub-slab piping set within a porous gravel layer and connected, via solid riser pipe, to a discharge point on the proposed building's roof. The sub-slab venting system could initially be operated as a passive system, with the addition of wind-driven fans on the risers and, if necessary, be converted to an active system using mechanically-driven blowers. The blowers will provide a negative suction pressure below the slab, creating a negative pressure gradient below the slab to prevent vapors from passing through the slab into the building.

9.0 DEVIATIONS

The following deviations from ASTM Standard Practice E1527-05 were noted for this Phase I ESA update:

- LBA was not contracted to obtain chain of title information.
- A questionnaire per ASTM E1527-05 was not completed by the User as it is not necessary for the User to qualify for the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001.

10.0 ADDITIONAL SERVICES

The scope of work for this Phase I ESA did not include evaluation of radon gas. However, information related to radon gas was provided in the EDR Report (Appendix B), and is therefore conveyed here. According to the EDR Report, the EPA classifies New York County as located in radon zone 3 (indoor average <2 picocuries per liter [pCi/L]).

The scope of work for this ESA did not address other non-scope considerations, including, but not limited to:

- Wetlands protection;
- Regulatory compliance;
- Cultural and historic resources;
- Industrial hygiene;
- Health and safety;
- Ecological resources;
- Air quality;
- Biological agents;
- Asbestos;
- Lead-based paint;
- Mold;
- Flood hazards;
- Electromagnetic fields;
- Seismic hazards;
- Stormwater management or drainage;
- Structural engineering or integrity;
- Geotechnical engineering;
- Public safety; or
- Dam safety.

12.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

The environmental professionals whose signatures are provided below performed and reviewed this environmental site assessment.

We declare that, to the best of our knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

INDIAN LUST.....	Leaking Underground Storage Tanks on Indian Land
INDIAN UST.....	Underground Storage Tanks on Indian Land
INDIAN VCP.....	Voluntary Cleanup Priority Listing

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

FEDERAL RECORDS

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/03/2007 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 05/12/2008 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 05/12/2008 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 05/12/2008 has revealed that there are 9 RCRA-CESQG sites within approximately 0.25 miles of the target property.

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 05/12/2008 has revealed that there are 46 RCRA-NonGen sites within approximately 0.25 miles of the target property.

STATE AND LOCAL RECORDS

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 07/29/2008 has revealed that there are 2 NY SWF/LF sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 06/10/2008 has revealed that there are 89 NY LTANKS sites within approximately 0.5 miles of the target property.

NY HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the NY HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 79 NY HIST LTANKS sites within approximately 0.5 miles of the target property.

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 06/10/2008 has revealed that there are 66 NY Spills sites within approximately 0.125 miles of the target property.

NY Hist Spills: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there

EXECUTIVE SUMMARY

are 41 NY Hist Spills sites within approximately 0.125 miles of the target property.

NY ENG CONTROLS: Environmental Remediation sites that have engineering controls in place.

A review of the NY ENG CONTROLS list, as provided by EDR, and dated 06/10/2008 has revealed that there is 1 NY ENG CONTROLS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Environmental Remediation sites that have institutional controls in place.

A review of the NY INST CONTROL list, as provided by EDR, and dated 06/10/2008 has revealed that there is 1 NY INST CONTROL site within approximately 0.5 miles of the target property.

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, and dated 06/10/2008 has revealed that there are 4 NY VCP sites within approximately 0.5 miles of the target property.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there are 4 Manufactured Gas Plants sites within approximately 1 mile of the target property.

Actual: RCRAInfo is a national information system that supports the Resource
 15 ft. Conservation and Recovery Act (RCRA) program through the tracking of
 events and activities related to facilities that generate, transport,
 and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
 program staff to track the notification, permit, compliance, and
 corrective action activities required under RCRA.

Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler accessibility indicator: Transferred to the program or state equivalent.

Handler Activities Summary:

U.S. importer of hazardous waste: Unknown
Mixed waste (haz. and radioactive): Unknown
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: Unknown
Furnace exemption: Unknown
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Historical Generators:

Date form received by agency: 02/05/1999
Facility name: NYC DEPT OF SANITATION
Classification: Not a generator, verified

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 09/09/1999
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported

DEC Remarks: On March 12, 2001, DEC Sigona called David Nickerson and requested a copy of

GREYHOUND FACILITY (Continued)

S103941004

the report left Message on voice mail). On June 5, 2001, DEC Sigona received the results of soil investigation for tank installation, dated June 1, 2001. DEC's comments regarding the results of a site investigation performed by Parsons Engineering Science, Inc. (PES) at the above referenced site. The results of the investigation report, dated June 1, 2001 reveal the presence of petroleum contamination which exceed recommended cleanup levels in the DEC's Technical Administrative Guidance Memorandum (TAGM) Determination of Soil Cleanup Objectives and Cleanup Levels, dated January 24, 1994. The results of laboratory analysis for soil collected from test borings Nos. SB-1, SB-2, SB-4, SB-5 and SB-6 all exceed the level recommended for the cleanup of semi-volatile petroleum contamination. The level of volatile petroleum compounds evident in the soil sample collected from soil boring No. SB-3 exceed the cleanup level of all tentatively identified compounds, which cannot exceed 10 ppm. The level of p-Isopropyl toluene found in the soil sample was detected at 11 ppm. However, the laboratory reported a detection limit for benzene and MTBE at 0.94 ppm and 19.0 ppm respectively, which exceed the required detection limit acceptable to this Department. The levels of petroleum vapors recorded by field soil testing ranged from non-detectable to as high as 1140 ppm in soil boring No. SB-3. The PES investigation did not include the installation of groundwater monitoring wells or collection of any groundwater samples. The depth of the soil borings ranged from 3 feet to 10 feet below grade and indicated the presence of materials, including, wet fill material, concrete, gravel, sand and refusal. A Geoprobe™ drill was used to collect the samples and was unable to penetrate some of the refusal at the site. The DEC recognized that the PBS facility was being upgraded to replace two aboveground 2,000 gallon diesel storage tank and piping systems with two new 6,000 gallon aboveground tanks. Moreover, the existing tanks passed inspections and tests for tightness following the closure and removal activities, and did not appear to be a direct source of the contamination. Rather, the consultant suggests that the contamination was likely the result of background contamination from historic fill material placed on the site. While this may provide a plausible explanation for the elevated levels of semi-volatile petroleum hydrocarbons or Polynuclear Aromatic Hydrocarbons (PAHs), it does not explain why there were elevated levels of volatile organic compounds (VOCs). The DEC is concerned that the presence of these VOCs may be the result of gasoline or diesel fuel spills on the parking lot area. Based upon these results the baseline site assessment performed, DEC requires additional investigatory and remedial actions pursuant to the requirements of 6 NYCRR Part 611 and Article 12 of the NYS Navigation Law. All areas with elevated VOC contaminated soils must be remediated. In this regard, GL has at least two options, A and B, as follows: A) If GL chooses to further assess the extent of petroleum contamination prior to remediation, then you must sample soils and/or groundwater around and below the boring sample location SB-3. The assessment must conform to DEC's Spill Prevention Operations Technology Series SPOTS 14) Site Assessments at Bulk Storage Facilities, dated August 1, 1994. B) If GL chooses to remediate the petroleum contamination prior to assessment, then you must excavate site soils around boring sample location SB-3. GL must then collect and analyze endpoint soil and samples below and/or groundwater around the excavation every 15- 20 linear feet, in accordance sampling guidelines referenced in DEC's SPOTS 14. In either event, GL should evaluate the quality of soils that are immediately surrounding the former boring location SB-3 for compliance with TAGM) Determination of Soil Cleanup Objectives and Cleanup Levels, dated January 24, 1994. GL should be advised to further document the nature of the fill material throughout the upper ten feet layer of the property, referenced by PES. All of the petroleum contaminated soils must be excavated and disposed off-site in accordance with 6 NYCRR Part 364. Polynuclear Aromatic Hydrocarbons (PAHs) - The report notes the

GREYHOUND FACILITY (Continued)

S103941004

presence of PAHs. We concur that these chemicals appear to be from fill material previously brought to the site. The concentration of PAHs in the various samples taken at the site have not been demonstrated to be a hazardous waste. It is suggested that you maintain a two-foot thick cover of clean soil or an equivalent protective layer of concrete or asphalt be placed on all areas where soils exceeded TAGM levels for PAHs at the Site. Wherever surface soils exist, you should place a clean 2 foot layer of soil. Any material brought to the site should not be a material that would be considered a regulated solid waste under 6NYCRR Part 360. Any clean soil cover which is placed on the site should be properly landscaped to effect soil erosion control. This would effectively provide a protective layer to further eliminate the possible risk to human health from any subsurface soils that do not meet TAGM soil cleanup levels. GL must implement the required remedial actions to address the VOC contamination, and submit the results of the required confirmatory laboratory testing referenced in item No. 1, by April 1, 2002. In addition, GL should include a description of any additional actions taken to prevent possible exposure to PAHs in the subsurface soils at this site.

Remark: Caller was calling for greyhound they got the results back back in december and found petroleum constituents in the soil.call the complaint.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department

of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

2/10/2004: This spill case was reassigned from Sigona to Rommel for management. (Sigona) 10/7/2004: Project management transferred to D. Harrington in Central Office. (Rommel) 10/7/2004: Sent letter to Exxon Mobil approving the site characterization work plan. (Harrington) 6/6/2005: Sent Exxon Mobil a letter approving the SI report and the supplemental SI work plan. Additional monitoring wells will be installed along West 30th Street. Quarterly sampling will be conducted for 1 year, then a remedial plan will be developed if necessary. (Harrington) 9/8/2005: Spill no. 05-06979 was assigned due free product being observed in MW-1. Nature of the product was unknown at the time spill was called in. (Harrington) 10/4/2005: Sent e-mail to Exxon Mobil approving the revised supplemental SI work plan, which changed the location of the proposed monitoring wells along the south side of West 30th Street due to utility clearance issues. (Harrington) 2/1/2006: Approved the supplemental SI report. Station is currently scheduled for divestment in the first half of 2006. Exxon Mobil to submit documentation regarding decommissioning activities when they occur. RAP will be developed after receipt and review of decommission report and the analytical results of 4 additional rounds of quarterly groundwater sampling. (Harrington) 3/8/07 - DEC lead changed from Dave Harrington to Mike Haggerty 7/3/07 - Haggerty - approved Groundwater Characterization Work Plan dated 6/28/07. MW-1 along West 30th Street has had intermittent product over the past year. Kleinfelder didn't believe product to be petroleum based. Running parallel to the sidewalk are Oil-to-Static Electric lines. These underground lines are insulated by a di-electric. Kleinfelder believed PCB's could be the unknown product in the well. I was on-site July 26, 2007 when they sampled to see for myself. No free product. Analyticals proved no PCB's are present, only petroleum compounds detected. 7/26/07 - I was on-site while they sampled to see for myself. No free product. Analyticals eventually proved no PCB's are present, only petroleum compounds detected. 1/3/08 - Haggerty - spoke with Shan Zuidema from Kleinfelder concerning future remediation plans. EFR events were conducted monthly starting in September. Effectiveness will be determined after the January EFR event. Additional remedial strategies will be proposed. Also, groundwater isn't fully delineated. The placement of additional downgradient MWs is difficult due to the presence of underground utilities in the adjacent sidewalks. 6/2/08 - Haggerty - approved Remedial Investigation Work Plan dated May 20, 2008. Additional wells will be installed in the northern portion of the site to track down free product and get a sample for analysis.

Remarks: CONTAMINATED SOIL IN U/G TANK EXCAVATION -

DEC Memo: e2mis 153351 At 16:15hr I&A Supv. K Wilkinson #24331 was inspecting VS7361 and discovered 5 gal of an unknown substance. Supv. stated a body shop sit in front of the vault. Source of spill unknown, cause of spill unknown. No sewer/waterway affected. No Sewer connetion. Chain of custody #cc18096 three samples will be taken oil id, pcb, and flash point. environment tag #18353 was placed in vault. Lab Sequence Number: 04-03647-002 Flash Point, PMCC < 77 deg F Oil Identification Analysis by NYSDOH 310- (Hydrocarbon Scan) Analysis indicates the presence of a substance similar to a light fuel oil. Lab Sequence Number: 04-03647-001 PCBs < 1 PPM. Lab Sequence Number: 04-03783-001: Total Organic Halides (TOX) 6.80 mg/L 5/17/04 16:55 M. Lyons I&A supervisor called to report that clean Harbors was completed with the cleanup. He Gave the phone to Hector Soler Supervisor from Clean Harbors Who gave the report. He states that the cleanup was completed at 16:45. There was 1drum of solid waste generated from this cleanup. Their tanker removed 380 gallons of water/oil mixture. The structure was triple washed with citrus cleaner. The Clean Harbors crew was: R. Sanchez, & L. Scott . The spill tag was removed.
Remarks: Found in a manhole in standing water. A body shop sits in front of the vault.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "SANGESLAND"
Sangesland DDO TTF letter sent to: Ms Fran Goldned Matthew Adam
Properties 127 East 59th St New York, NY 10022 8/28/2003 PTC submitted
soil boring results and a short writeup. DEC sent back a letter requesting test
results compared to TAGM and justification for exceeding limits. 9/2/2003
PTC resubmitted their letter with the TAGM comparison information added.
Results are just slightly above the standard and are consistent with old coal
ash fill material. Spill Closed

DEC Memo: According to the NYSDEC records, on August 5, 1998, the on-site 2,000 gallon UST failed a tank tightness test and was issued Spill #98-05607. After review of information received from the client, it has been determined that after the UST failed tank tightness testing, the UST was cleaned, sandblasted, and relined with an epoxy lining, and the associated piping was replaced in September 1998. On July 10, 2003, the 2,000 gallon UST failed a tank tightness test was issued Spill #03-03799. It appears that soil borings were performed to determine the extent of the UST leak/spill. Upon reviewing data received from the NYSDEC Spills Database, the NYSDEC notes section determined the soils were "slightly above" TAGM guidelines due to levels consistent with "old coal ash fill materials" and was granted "closure" status on September 2, 2003. The UST was emptied and taken out of service, and an 1,080 gallon steel registered AST was installed in a small cellar area near the north bay door area. On September 28, 2005, EnviroTrac contacted the NYSDEC regarding Spill #98-05607 to determine what is needed to "close" the Spill. It was determined that since Spill #98-05607 was prior to Spill #03-03799 which is "closed", and was the same tank and area, it should be "closed" as well.

Remarks: TANK TO BE EVACUATED, CLEANED, AND LINES TO BE TESTED.

VCP:

Program Type: BCP
 Site Code: 359020

**Actual:
 29 ft.**

Assessment: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Env Problems: There are eight 550 gallon USTs abandoned in-place on site. Two 4000 USTs have been removed. Groundwater is at approximately 20 to 26 feet deep. Bedrock is at approximately 17 to 24 feet deep. Suspected contaminants at this site are primarily from petroleum. These contaminants are impacting the soil and shallow groundwater. The bedrock aquifer does not appear to be contaminated. Of the 5 reported spills associated with this site, all are closed. The shallow groundwater contamination is basically from petroleum compounds, including MTBE. Metals contamination is not a problem at this site. Off-site contamination is not known.

Site Desc: The Site is located at 555 West 34th Street, also known as 400 Eleventh Avenue, between 10th and 11th Avenues in Manhattan, New York City, New York County. The property is identified as Block 706, Lot 1 in New York City's tax records and consists of a 37,800 square-foot (1.02 acre) rectangular-shaped vacant parcel. The surrounding urban area consists primarily of retail and commercial business. Current use of this site is for commercial and industrial uses. Future use of this site will be for unrestricted use. The BCP Agreement was signed by the DEC on February 21, 2007. The Citizen's Participation Plan has been approved. A Remedial Investigation Report (RIR) and a Remedial Work Plan (RWP) have been approved. Site clean up work began on August 27, 2007.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: need to contact either jeff bohlen at envirotrack (631-471-1500) or Jerome Kung at verizon (212-338-6754) to determine what work is being done on the site. No letter has been sent yet. 06/21/05-SR// Spoke with jeff Bohlen(516-807-8983). He will forward all necessary documents to DEC. 10.07.05 Sharif is currently reviewing the subsurface investigation report submitted by Envirotrac. 3/20/06- DEC Piper reviewed tank closure report. As per report and database, there are two historic spills at the property, 9007995 and 9314833. In 1994, two 4K gasoline UST's were removed, and two 3K gasoline UST were installed. Samples collected from the limits of the excavation detected petroleum impacted soils in the vicinity of these USTs. Additionally, 8- 550 gal USTs are located in the basement of the property. These tanks were allegedly closed along w/ the two 4K gal USTs. SVOC's were detected exceeding NYSDEC TCLP guidance values. Spills 9007995 and 9314833 were closed on 8/6/96 after receipt of tank closure reports for the 2 4K USTs and 8- 550 USTs. In June- August 2005, seven (7) MWs were installed on site. Lab analytical revealed VOC's , SVOC's, and metals above TAGM 4046. Note: the groundwater was determined to be slightly to moderately saline. From Jan 6- 11, 2006, Envirotrac removed the two 3K gasoline USTs that were installed in 1994 and constructed of double wall fiberglass. A total of six (6) endpoint samples were collected from the excavation. With the exception of the West sidewall in which 226 ppb of benzene was detected, no other VOC's were detected above TAGM 4046. Additional excavation was performed in the area of the two- 4K UST remote fills and the two- 3K UST remote fills. Analytical results suggest that VOC's were not present above TAGM 4046, however SVOC's were. In addition to the sampling performed in reference to the UST's, soil samples were collected at the base of the Truck Elevator Shaft where it was determined that VOC's and SVOC's were detected above TAGM 4046, due to a bad seal. To minimize any future impact, the seals were replaced and vegetable oil was used in place of pet. based hydraulic oil. As per the report, the property is currently in negotiations to be sold. This party reportedly plans on razing the building and excavating to bedrock. 45 feet bgs. In the meantime Envirotrac recommends quarterly sampling of the MW network. Referred to K. Tang 3/21/06 - reviewed the tank closure report. Soil and GW contamination is minimal, max GW VOCs is 200 ppb and only one side

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "ROMMEL"
4/12/04-Vought-Spill transferred from Tomasello to Rommel as per Rommel.
3/5/08 - Austin - Assigned to Ketani for further investigation - end 5/5/08
- Raphael Ketani.I re-opened the case. There is no paper file. The spill was
the discovery of oil contaminated soil in the process of closing some tanks.
The discovery took place on 3/14/90. I tried to contact Don Scicutella of
Federal Express in Manhattan at (212) 465-4310, but found out that the phone
number belonged to a different business. The PBS case #2-600488 lists 13
tanks numbered #1 to #12 and #OO5. Tanks #1 to #12 had diesel, gas, #2 oil, and
#6 oil. Tanks #3 and #4 are each 275 gals. and were converted to non-regulatory
use. They contain waste oil. Tank #OO5 is 500 gals. and contains waste oil.
Tanks #1, #2, #5 to #12 were closed in place. There is a local contact person
and phone number, but the number doesn't work anymore. The local Federal
Express address is: 538 West 34 Street, NY, 10001. The main business address
is: 3620 Hacks Cross Road, Bldg. B, 2nd Floor, Memphis, TN, 38125. I sent a CSL
to the main business address for Federal Express. 6/2/08 - Raphael Ketani.
I spoke to Tony Gulla (goo-la) (973) 565-2305 of FED EX. He said that he talked
to a number of people and no one can recall the spill. He said that FED EX just
vacated the site. I told him that DEC has no documentation that the spill was
remediated. So a new investigation needs to take place. I told him that the
tanks are registered to FED EX. He asked for a copy of the PBS registration. I
sent it to him by FAX (973) 565-2363.
Remarks: TANKS TO BE CLOSED IN PLACE, CONTAMINATED SOIL WAS DISCOVERED.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Higher Other Pertinent Environmental Activity Identified at Site

Actual: RCRAInfo is a national information system that supports the Resource
31 ft. Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "FOLEY" e2mis no. 138097: 7/09/01 14:15 hrs. Mechanic from Corporate Transportation, reported at 14:00 hrs. that he found approx. 2 gallons of compressor oil had spilled along the sides of the compressor, the piping, other associated equipment and the asphalt. The compressor is part of the CNG (Compressed Natural Gas) Station which is located at 281 11th Ave (West 28th Street Yard). He was called to the CNG Station to investigate a ground fault indication when he discovered oil coming from the compressor vent. The compressor oil is 5W40 engine oil and non-PCB. The packing seal between the motor and compressor failed causing oil to be spilled outside the compressor. Cleanup was started at 14:00 hrs. using absorbent pads and degreaser (Infinity Chem. Group T.R. -1). Victor Cinquemani reported that the cleanup was completed at 17:39 hrs. using absorbent pads, degreaser and speedi-dry granules. One 55 gallon drum of solid non-hazardous debris was generated.

Remarks: LEAK FROM VENT ON CNG COMPRESSOR. SPILLED ONTO ASPHALT. BEING CLEANED UP. COMPRESSOR TAKEN OUT OF SERVICE FOR REPAIRS. CON EDISON REFERENCE NUMBER 138097.

DEC Memo: 04/17/07-Vought-Off hours responder. Vought called Carroll (212-675-3225 fax 212-675-3224) and soil boring was being performed for E designation. Unsure of tank size. DEP contact is Mohammed Ahmed (212-675-3225). Site is going to be mixed commercial and residential. Spill will be remediated via excavation for building. Proposed development will include 400sq ft below grade parking spaces. No soil sample analyticals but strong gasoline odors and free phase product in soil. Sheen on groundwater in one boring. Groundwater depth at 11'. Dewatering will most likely take place and DEP sewer permit will be required. Report will be submitted within two months. Buildings are still onsite. Carroll will call back Vought with current and former owner of USTs. Upon reception of owner information Vought will send out soil contamination letter with below requirements. DEC requires: 1) copies of everything 2) regular intermittent sampling of groundwater 3) moisture barrier or vapor barrier description 3) delineation soil and groundwater 4) updating of PBS registration to show that tanks are temporarily out of service 5) cc and call to DEP Ahmed. 8/3/07 - Austin - Transferred from Vought to Patel for further review and action - end 08/27/07 - Hiralkumar Patel. visited site. site lot is divided into two different areas. site area along 11th ave is occupied by parking lot and remaining half portion of site along W 28th Street is occupied by autobody shop. spoke with Moe (212-502-4236) at parking lot. he doesn't have any UST and doesn't have any knowledge of any tanks. spoke with Sam Garcia, owner of autobody shop who has sub-leased this property from Kaz Systems, Inc. as per Mr. Garcia, he is unaware of any underground tanks on-site. he is using two aboveground tanks for waste oil. Sam Garcia Complete Automotive Service Ph. (212) 691-0200 Fax 9212) 967-7383 Kaz Systems, Inc. 1683 Lexington Avenue, Suite # 101 New York, NY 10029 Ph. (212) 831-6905 Fax (212) 828-6373 spoke with Mr. Carroll. asked him to submit report and owner's information. found PBS record. PBS #: 2-350281. as per PBS record, site has eight 550 gal USTs, temporarily out of service. alternate site addresses: 282-292 11 Ave, 282-288 11 Ave, 298 11 Ave, 552 W 29 St, 553 W 28 St, 560 W 29 St

09/05/07-Hiralkumar Patel. spoke with Mr. Carroll. he just got approval from his client to release the report. he will send report by end of this week.
09/11/07-Hiralkumar Patel.received email from Mr. Carroll containing copy of investigation report. he mentioned another spill # (0603351), which is assigned to Mr. Tang in remediation as found groundwater contaminated during Phase II investigation in July 2006. ***** abstract of Phase II report, done in July 2006: - investigation done by Envirotrac - based on Phase I done in Dec. 2005, Envirotrac did Phase II - collected soil samples from six temporary boring locations and groundwater samples from three temporary boring locations - at each soil borings, continuous soil samples were collected from surface grade to maximum depth of approx. 12 ft bg <----- (report doesn't include exact depth of each sample) - site has two UST fields: one consists 8 out-of-service USTs and another has 3 out-of-service USTs - all 11 tanks are 550 gal tanks - field screening shows site has fill material from grade to depth of 5 ft bg - found groundwater contaminated -----GP-4-----GW-1
Ethylbenzene-----218 Xylene-----177
1,3,5-Trimethylbenzene---137 1,2,4-Trimethylbenzene---229
Naphthalene-----113 MTBE-----1,470
groundwater sample GP-4 was taken at 13 ft bg (groundwater table at 10 ft) and GP-5 was taken at 14 ft bg (groundwater table at 10 ft), both samples were taken deeper than water table. ***** abstract of investigation report, done in Sep. 2007:- Fleming-Lee Shue did investigation - site has "e" designation <----- - site is currently developed with two parking lots and two buildings - both parking lots have aboveground hydraulic lift systems - a one-story building, located at the corner of 11th ave and 29th street, is used as an auto repair shop <----- - another one-story building, located between two parking lots with an entrance on 28th street, is used for a combination of auto repair and finishing, including painting and detailing <----- - site would be developed as residential <----- - based on topography and proximity to the Hudson river, anticipated groundwater flow is to the west - groundwater was observed to vary from 6 to 12.5ft bg, with an average depth of approx. 10.25 ft bg - site has 11 550-gal gasoline USTs, all are out-of-service - eight 550 gal gasoline tanks, which are located in northern portion of parking lot, are registered (PBS #: 2-350281) <----- three 550 gal gasoline tanks, which are located in southern portion of parking lot, are not registered <-----
- soil samples were collected from total of 14 borings (SB-11 through SB-24) - groundwater samples were collected at 7 of 14 boring locations (SB-11,12,14,18,19,20 & 24) - soil borings were installed to depths ranging 12 to 16 ft bg - two soil samples were collected from each borings: one at the surface between grade and 2 ft bg and one based on field screening (highestPID or directly above groundwater interface or directly above depth of refusal) - most of the soil at the site is urban fill material, extending to depths ranging from 4 to 16 ft bg. fill consisted of mixtures of brick, concrete, ASH, cinders, wood and gravel in matrix of silty sand <----- - found about four SVOC compounds in almost all soil samples (may be due to ash in fill material) - found xylene contamination (10,000 ppb) in soil sample from boring SB-16 at depth of 9-11 ft bg<----- - found groundwater contaminated -----SB-12-----SB-14-----SB-18-----SB-20-----SB-24
Benzene-----110-----497
MTBE-----118-----228-----1,040
***** NO INVESTIGATION HAS DONE ALONG UNDERGROUND LINES ASSOCIATED WITH OUT-OF-SERVICE GASOLINE TANKS, AT DISPENSER ISLANDS AND AT OLD FILL PORTS <----- spoke with Jeff at Envirotrac. asked him to submit Phase I report, done in Dec. 2005. also asked him to submit depth of soil samples taken during Phase II in July 2006.

received phase I report. during Phase I, found 275 gal waste oil AST and parts washer was observed along the north side of the repair bay area. no staining or floor drains observed near waste oil AST or part washer area. <----- left message for Roy Bernstein (212-757-5531), property owner. received call from Mr. Bernstein. he mentioned that he has leased this property to AvalonBay, who will develop a residential complex at site. Mr. Bernstein has hired Envirotrac and AvalonBay has hired Fleming-Lee Shue for environmental work. Valeray Real Estate Co, Inc. **property owner** C/O Roy J. Bernstein 6665th Avenue, 14th Floor New York, NY 10103 Ph. (212) 757-5531 (O) (917) 667-2293 (C) Fax (212) 582-0176 email: royjbernstein@aol.com Jeff Bohlen **owner's consultant** EnviroTrac Ltd. Ph. (631) 924-3001 Fax (631) 924-5001 AvalonBay Communities, Inc. **future tenant** 275 7th Avenue, 25th Floor NY, NY 10001 Attn.: Tom Javits Ph. (212) 309-1601 Fax (212) 370-1415 Mohamed Ahmed **future tenant's consultant** Fleming-Lee Shue, Inc. Ph. (212) 675-3225 (O) (917) 612-6018 (C) Fax (212) 675-3224 email: Mohamed@flemingleeshue.com old spill #: 0603351 has closed and will be investigated under this case. <----- 09/13/07-Hiralkumar Patel. sent letter to Mr. Bernstein and Mr. Javits requiring complete soil/groundwater delineation around entire tank systems, surrounding area site map with locations of all tanks, dispenser islands, fill ports etc, registration of three USTs and one used oil AST, submission of RAP including monthly monitoring and quarterly sampling of groundwater (as construction will start around Sep. 08), endpoint samples, vapor barrier, possible SSDS and CAMP. letter faxed to Mr. Bernstein, Mr. Javits, Mr. Heath at DEP, Jeff and Mr. Ahmed. 09/14/07-Hiralkumar Patel. received message from Mr. Ahmed. left message for Mr. Ahmed. received call from Mr. Ahmed. he mentioned that delineation work has done. explain him that three out of four wells, where found groundwater contaminated, are located on property boundry and to define area of contamination, the department requires further delineation on-site as well as off-site. also the department requires delineation at fill ports, dispenser island and any other area of concern (hydraulic tank, drain etc.). he was mentioning that all this work will be done during construction at site. told Mr. Ahmed that investigation must be done, according to letter, in specified deadline. Mr. Ahmed wants to discuss further about sampling locations. he will send scaled sitemap with locations of all samples (current and previous), tanks, dispenser islands, remote fill ports, drains, hydraulic lifts etc. Mr. Ahmed will send site map next week. 09/27/07-Hiralkumar Patel. received email from Bill from Fleeming LeeShue with proposed well locations. Mr. Ahmed proposed total of four wells on sidewalk (two on 11th ave, one on W 28th St and one on W 29th St). sent email with changes in proposed well locations. asked him to install wells in each area of concern (previous borings SB-12, SB-14, SB-18, SB-20 & SB-24), according to DER-10. also asked to include sampling points along old supply/return lines, fill lines, fill ports etc. asked Mr. Ahmed to submit work plan by Oct. 5, 2007. spoke with Mr. Ahmed. he mentioned that during development, entire site will be excavated down to 10 ft below water table, as part of sub-basement. 10/04/07-Hiralkumar Patel. received message from Mr. Ahmed. he has prepared work plan for further delineation and has sent to owner's consultant for review. he will send work plan by Tuesday 10/09/07. 10/09/07-Hiralkumar Patel. received work plan for groundwater delineation. will install six monitoring wells (three in each area of previous tanks) 10/16/07-Hiralkumar Patel. sent email to Mr. Ahmed with approval of submitted work plan. 11/21/07-Hiralkumar Patel. received message from Mr. Ahmed stating that they having some trouble getting access to property for well installation. spoke with Mr. Ahmed. they got permit to install well on sidewalk but having hard time getting access into site. asked him to provide tenant's contact info. 11/28/07-Hiralkumar Patel. received message from Mr. Ahmed. spoke with Mr. Ahmed. he asked to call Ali. spoke with Ali, tenant renting

WORKING PARKING LOT (Continued)

S108636200

property from Mr. Bernstein. he is running parking lot in corner of 11th ave and W 28th street and has subleased corner at 11th ave and W 29th street to garage operator. Ali mentioned that he never used tanks which are in ground and didn't know about it. as existing USTs belongs to site owner, Ali asked for compensation for a week as he need to close his business for week for monitoring well installation work. as Ali not getting any compensation, he refused access to site. Ali Yaghoubi **current tenant** Kaz Systems Inc. 1683 Lexington Avenue Suite # 101 New York, NY 10029 Ph. (212) 831-8300 (917) 217-4843 Fax (212) 828-6373 email: comprop3@aol.com Laurance Kalik **current tenant's attorney** Herzfeld & Rubin Ph. (212) 471-8545 Fax (212) 232-6645 left message for Mr. Bernstein. received call from Mr. Bernstein. he will talk to tenant and will schedule work. asked Mr. Bernstein to submit delineation report by Dec. 31, 2007. 12/05/07-Hiralkumar Patel. received call from Mr. Ahmed asking help getting access to site. also spoke with Roberta Gordos, attorney representing Avalon Bay. as per Ms. Gordos, Avalon Bay is now ground leasee and will do all required work. Ms. Gordos asked for help from the Department getting access to the site. Roberta Gordos **Avalon Bay's attorney** Ph. (212) 541-2076 discussed with DEC Urda. he spoke with Mr. Bernstein. Mr. Bernstein confirmed that Avalon Bay is ground leasee and now has right to enter. Urda will send letter to Mr. Jacobi. 12/14/07-Hiralkumar Patel. DEC Urda sent letter to Ali requiring access to the site. 12/18/07-Hiralkumar Patel. received message from Jessica Tofi, attorney representing Mr. Yaghoubi. spoke with Jessica with DEC Urda. they are currently negotiating with property owner. she asked what needs to be done at site. explained her that without reviewing groundwater delineation report (as required), the department can't comment on possible remediation at site. asked her to submit groundwater delineation report by Jan. 15, 2008. Jessica Tofi **current tenant's attorney** Law office of Borah Goldstein PH. (212) 965-2614 (O) (646) 436-5996 (C) email: jtofi@borahgoldstein.com 12/19/07-Hiralkumar Patel. sent email to Ms. Tofi with copy of Phase I, Phase II and remedial investigation report. left message for Collista Nazaire at NYC DEP. asked her to provide project manager's information in DEP who is handling this "e" designated site. Collista Nazaire Ph. (718) 595-4401 Fax (718) 595-4479 email: cnazaire@dep.nyc.gov received call from Ms. Nazaire. she mentioned that DEP hasn't received any application for redevelopment, so not working on-site. sent email to Gary Heath with all available reports and copy of all correspondence, for their record, with information of all involved parties. 01/17/08-Hiralkumar Patel. spoke with Mr. Ahmed. currently owner and tenant are in court fighting for access. once access agreement get signed, Mr. Ahmed will apply for sidewalk permit and will submit work schedule. 02/08/08-Hiralkumar Patel. left message for Mr. Ahmed. received call from Mr. Ahmed. owner and tenant just reached an agreement and will sign agreement by end of Feb. 2008. Mr. Ahmed will do well installation after that in Mar. 2008. 03/06/08-Hiralkumar Patel. received message from Mr. Ahmed. they installed six monitoring wells at site. will do monitoring for free product. sent email to Mr. Ahmed. asked him for groundwater samples also along with soil samples during well installation. also asked for product sample, if found free product in any well. received call from Mr. Ahmed. he mentioned that as per their proposed work plan, they had only planned to monitor wells for any free product and not planned to collect any water samples. will monitor wells until site remediation begins during proposed site development. after reviewing work plan, spoke with Mr. Ahmed. asked him to take one groundwater sample from each of upgradient well in two sets (one set in corner of 11th ave & W 28th st and second set in corner of 11th ave & W 29th st). Mr. Ahmed mentioned that after defining groundwater flow direction, will take water samples from upgradient wells. 03/31/08-Hiralkumar Patel. received well installation and gauging report. abstract: - six monitoring wells installed - soil sample with

highest PID or just above water table were collected during each well installation - wells were installed to depths of between 16 to 18 ft bgs and were constructed with ten ft of 2 inch dia. PVC screen - during well installation, 10 ppm PID were observed in soil samples collected at 7 to 9 ft bgs - petroleum odors observed in soil samples collected at 7 to 9 ft bg - no free- phase product observed on groundwater surface in any well - will continue to monitor wells monthly for the presence and possible volume of free-phase product - will do well survey to define groundwater flow direction and based on flow direction, will collect groundwater sample from most upgradient well 04/23/08-Hiralkumar Patel. sent email to Mr. Ahmed requiring submission of schedule for well survey and groundwater sampling from upgradient wells. 05/14/08-Hiralkumar Patel. received monitoring well gauging/sampling report. during well gauging, found groundwater flowing into west direction. based on groundwater flow direction, they collected sample from one upgradient well MW-1 and found MTBE contamination (187 ppb) in groundwater. no sample collected from well MW-6 which is upgradient from second set of wells located in corner of 11th ave and W 29th street. during previous study, highest contamination was found in boring SB-20 which is located near tank field in corner of 11th ave and W 28th street and recent upgradient groundwater sample from that end showed little contamination. will gauge wells for any free product. based on submitted report, the department will wait for complete remediation that will occur during site redevelopment. **.*"e" designation at site**

store room. Excavation about 4' deep, no odor, no visible contamination in soil. Soil is verydry. Tank was 65 to 75 gal capacity. Told them to take endpoint samples. There will only be 2 sidewall samples since 2 walls are concrete. Both USTs for oil/water separator overflow are not being replaced. Pulled covers of oil/water separator - 2ndary containment full of oil. Can't tell how oil got there. Facility will block off all floor drains and remove product from o/w spearator vault. See spill file for site sketch. (CAE) E2MIS 122078 12/21/98 14:15HRS -- HOLDINGAREA FOR SEPARATER -- TRANSPORTATION -- 281 11AV M.HARTE 95970, CONST-MGMT REPORTS FOUND APPROX 550GALS UNKNOWN FLUID IN ADJACENT CONTAINMENT AREA FOR OIL & WATER SEPARATER. LOCATION IS INSIDE TRANSPORTATION GARAGE (TIRE ROOM). SPILL WAS FOUND DURINGINSPECTION BY DEC C. ENGLEHARDT AND R. FITZPATRICK (CON ED). IN PROCESS OF INSPECTING PREVIOUS REMOVAL OF OVERFLOW TANK OF OIL AND WATER SEPARATER THIS VAULTED AREA WAS FOUND CONTAINING UNKNOWN FLUID. THIS VAULTED AREA ACTS AS A SECONDARY CONTAINMENT FOR OIL/WATER SEPARATER. M.HARTE REPORTS UNABLE TO VERIFY CRACKS, SUMP, OR SEWER CONNECTION. CHEM LAB TO TAKE SAMPLE From: Romanelli, Anthony Sent: Tuesday, December 22, 1998 8:13 AM To: Zoeller, Richard Subject: W 28th RICHARD RECEIVED TEST RESULTS FOR PCB ON LIQUID DISCOVERED IN SEPARATOR VAULT AND SEPARATOR. STILL AWAITING RESULTS FOR BENZENE AND HALOGENS. WILL KEEP YOU POSTED ON PENDING RESULTS. TEST RESULTS WILL BE FORWARDED TO YOU. INCIDENT NUMBER 122078. Update 10/17/05, at this time the type of oil cannot be determined, however; it was determined that the separator was the source of the leakage and has been repaired and operating correctly to date. The entire area is cleaned and working.

Remarks: DURING AN INSPECTION FROM DEC CHRIS ENGLEHART, UNDERGROUND SECONDARY CONTAINMENT AREA WAS FOUND TO HAVE THIS OIL/WATER MIX.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "ENGELHARDT"
DEC INSPECTOR NOTES: 12/3/98, 08:40 hrs: spoke with ERT Wallace - doing gas
tank excavation. Contractor removed 21,000 gallons of water from excavation to
holding tank on 11/24/98. When he returned on 12/2/98 observed 18,000 gallons
missing from tank. There was pump hose left in frac tank and it siphoned back
into excavation. Water has been sampled from holding tank - no results yet.
Water has no visible signs of gas or oil. Water was again pumped from excavation
to frac tank. Con Ed reported because they thought there might be a SPDES
violation. Awaiting sample analysis for disposal. (CAE)
E2MIS 121655 12/02/98 15:10 MIKE HARTE OF CONSTRUCTION MGMT REPORTS WHILE
WORKING AT W 28 ST YARD(281 11TH AVE) ON THE UNDERGROUND GASOLINE TANK
REMOVAL THE CONTRACTOR HAD REMOVED 21,000 GALLONS OF WATER FROM THE EXCAVATION
TO A HOLDING TANK BY THE EXCAVATION ON 11/24/98. ON 12/2/98 AT 14:10 HRS HE
OBSERVED THAT THE HOLDING TANK HAD RELEASED ABOUT 18,000 GALLONS OF POSSIBLY
CONTAMINATED WATER FROM THE HOLDING TANK BACK INTO THE EXCAVATION. THE WATER
HAS NO VISIBLE SIGNS OF GAS OR OIL IN IT. THE WATER WAS RELEASED DUE TO A HOSE

THAT WAS INADVERTANTLY LEFT IN THE TANK. HARTE HAS THE CONTRACTOR ON LOCATION AND THEY HAVE PUMPED THE WATER FROM THE EXCAVATION BACK INTO THE HOLDING TANK. THERE WERE SAMPLES TAKEN FROM THE WATER A NUMBER OF DAYS AGO BUT MR HARTE IS NOT SURE OF THE DATE. HARTE NOTIFIED MCHUGH IN THE CONTROL CENTER OF THE PROBLEM AT 15:10 HRS. UPDATE: On 11/24/98, 8 days prior to this incident, samples were taken of the water in the frac tank for discharge parameters. These results along with a schematic were submitted to the NYCDEP by the contractor, ECI Building Corp. ECI Building Corp. requested permission from NYCDEP to discharge approximately 9,800 gallons per day of groundwater through a carbon filtration system to Con Edison's storm house sewer located on West 28th Street site. 1/21/99 - ECI Building Corp. was conditionally authorized based on the pollutant concentrations to discharge the groundwater through the carbon filtration system. The conditional approval from NYCDEP was subject to ECI Building Corp obtaining a groundwater discharge permit from the Division of Connections and Permitting. 3/5/99 through 3/10/99 - Water in frac tanks was pumped through filtration system into storm sewer. Frac tanks are empty, however, will remain on site until UST job is complete. Excavation currently has groundwater in it. Job has been delayed. Awaiting new tanks to be delivered. Projected date of job being resumed: 11/8/99 G.Garramone #46575 all water from frac tanks put through carbon filter as per DEP permit and Frac tanks removed from site. Gas station complete. Exact date tanks removed unknown. project to be closed out.

Remarks: AFTER A TANK REMOVAL WATER ENTERED THE EXCAVATED HOLE. UNKNOWN IF IT IS CONTAMINATED. ONLY 3000 GAL WAS RECOVERED. A SAMPLE WAS TAKEN FROM THAT AMOUNT. THE OTHER 18000 GAL RE ENTERED THE HOLE. CON ED 121-655.

DEC Memo: 7/14/06 - Raphael Ketani. The contaminated soil was found on 6/27. I tried calling Jeff Bohlen of Envirotract (631) 471-1500, but could only leave a message. 7/18/06 - Raphael Ketani. I could only leave a voice message. 7/19/06 - Raphael Ketani. Jeff of Envirotrak called to say that they are preparing the phase I and II report for DEC. There is a tank field with 8 USTs and another with 3 USTs. There is soil and groundwater contamination. They are negotiating with the owner to remove the tanks. However, one set of tanks can't be removed and will be abandoned in place as it is under the lift that brings the cars to the upper floors of the garage. 8/7/06 - Raphael Ketani. Today, I received the July 21, 2006 Phase II Environmental Site Assessment Report from Envirotrak (631) 471-1500. Soil samples with exceedences of the TAGM are GP-1 (SVOCs only), and GP-2 (total xylenes). Groundwater samples with TAGM exceedences are GP-4 (many VOCs), GP-5 (many VOCs), and GW-1 (only MTBE). They recommend removing the 8 USTs, the soil, and the groundwater. The report didn't have a site map showing where the borings were done. They, also, don't mention whether they checked the areas of the remote fills or the pump islands for contamination. They need to do borings and sampling in these areas. They need to revise their PBS record if they remove or abandon in place the tanks. As the phase II investigation found gasoline contamination of groundwater, I am transferring the case to Koon Tang. 8/21/06 - Mr. Jeff Bohlen from Envirotra, 613-471-1500. They will tell the RP that DEC requires full delineation of contaminated soil and GW. The source of the spill has not been characterized. He mentioned that the tanks are still in the ground, abandoned with water/oil mixture in them. Don't know if there is contaminated

soil around the tank or pipings acting as a source to contaminate the GW. Told Envirotra to send in a RI report so I can prioritize the spill. - KST10/18/06 - (KST) reviewed the Phase 2 and provided the following comments to Envirotrac. Comments on the Phase 2 Report: 1) The write-up should provide more detailed discussion on the results. Need to know the depth of each soil samples, depth to groundwater, some discussion of the site geology. Are the USTs actively used? If not, what happened to the dispensers and fill port? 2) Data gap at the fuel dispensers and along the fill port and fill lines of the USTs. Should have taken soil and groundwater samples along these possible release points. 3) Detection limits (DL) should have been reported on the data summary table. Without the DL, DEC can not tell if the non-detected (ND) is below the regulatory guidance numbers or the lab instrument was masked to see the contamination. Looks like many of the soil samples could have VOCs over the TAGM numbers based on the lab reported DL. 4) Need boring logs describing the lithology as well as visible/olfactory observation. Based on the data in the report, the level of contamination is low and your recommendation of USTs removal and end-point samples is an acceptable means to ascertain if further remedial work is needed. Pls revise the report to address all the comments above and proceed with the tanks removal. 09/11/07-Hiralkumar Patel. another spill reported at site. case closed. will be investigated under new spill number. refer spill #: 0700587.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

Map ID

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 278

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 27

E2MIS 121751 THIS INCIDENT IS VOIDED BECAUSE IT IS IN THE WRONG SITE. IT IS
REPLACED BY INCIDENT #121761 IN THE W 28 ST SITE. MAKE ALL UPDATES TO INCIDENT
121761.12/06/98 08:00 HRS KENNETH SCHNORR #64555 REPORTS PALL UNIT ON THE BACK
OF TRUCK #40751 LEAKED 2-GALLONS OF TRANSFORMER OIL ONTO FLOOR OF FLATBED OF
TRUCK. NO WATERWAYS OR SEWER EFFECTED. SAMPLE TAKEN AND CLEAN UP IS IN
PROGRESS. 12/06/98 12:30hrs - Update to spill - In accordance with I&A
OS, K. Schnorr #64555, no sample was taken today. Oil spill is from PALL unit
and therefore, from last unit (after recycling) that the PALL was used for.
Paged ERT - no answer. 12/06/98 13:05hrs - Contacted ERT (Wallace #84274)-
need more information about spill - Did oil spill only on truck or also on
pavement? 12/06/98 13:10hrs I&A Splicer, M. Reiter #27277 reports spill
was on truck 40751 (approx 1/2 gallon) and on pavement at tail gate of truck
(approx 1 1/2 gallons). Only historical data available is hard copy displaying
182PPM from before last transformer was recycled - which is V5147 at 56 Hudson
St. However, PCB count after recycling should be less. New sample was taken on

S103575143

11/28/98 after V5147 was recycled. The PCB count on the Nov 28 sample should be the same as for today's spill as it is the same oil. The Nov 28, 1998 sample is waiting for results to be posted. 12/06/98 13:20hrs I&A OS K. Schnorr reportspill was cleaned up 12/06/98 @ 08:15hrs. I&A Cleanup crew was M. Reiter #27277 and J. Jones #48534. Area on truck and pavement was double washed with slix. Original hard copy of 182 PPM was used with 1 barrel of assumed >49PPM waste stream generated and stored in PCB temporary storage area at W. 28 St. Update to waste stream and this E2MIS report pending sample results of Nov 28, 1998 (from V5147 @ 56 Hudson) 12/06/98 13:25hrs ERT phone busy 12/06/98 13:35hrs ERT (Wallace #84274) updated. Cannot take additional sample from PALL unit as requested by ERT. 12/06/98 13:45hrs Chem lab contacted and requested to upgrade status of 11/28/98 sample of vault 5147 56 Hudson St to Emergency sample. Chem lab supervisor, J. Hendrick will look into matter 12/06/98 13:50hrs ERT (Wallace #84274) updated 12/06/98 14:20hrs Astoria Chem Lab supervisor, J. Hendricks reports 11/28/98 sample for V5147 @ 56 Hudson St cannot be found. 12/06/98 15:05 CIG, E. Rowland #43784 updated....A. Johnon #81226 12/10/98 18:00PM No sample results can be found by district I&A or Astoria Lab. Told information to ERT (W. Wallace #84274). PCB count of 182PPM as found on original hard copy (prior to recycling) is acceptable limits to closeout job. Cleanup on 12/6/98 was in accordance with 182 PPM even though count is probably lower. Job can be closed out. E2MIS 121761 THIS INCIDENT REPLACES INCIDENT #121751 WHICH WAS ENTERED INTO THE WRONG SITE (MEDS) 12/06/98 08:00 HRS KENNETH SCHNORR #64555 REPORTS PALL UNIT ON BACK OF TRUCK#40751 LEAKED 2-GALLONS OF TRANSFORMER OIL ONTO FLOOR OF FLATBED. NO WATERWAYS OR SEWER EFFECTED . SAMPLE TAKEN AND CLEAN UP IS IN PROGRESS. JUAN MEJIAS JR. #44729 12/07/98 11:00 JUAN MEJIAS ENTERED INCIDENT AGAIN SEE INCIDENT#121571 FOR THE ORIGINAL REPORT. JUAN MEJIAS JR #44729 12/06/98 12:30hrs - Update to spill - In accordance with I&A OS, K. Schnorr #64555, no sample was taken today. Oil spill is from PALL unit and therefore, fromlast unit (after recycling) that the PALL was used for. Paged ERT - no answer. 12/06/98 13:05hrs - Contacted ERT (Wallace #84274)- need more information about spill - Did oil spill only on truck or also on pavement? 12/06/98 13:10hrs I&A Splicer, M.  DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "FOLEY" Con Ed e2mis #146784: 1/17/2003 @ 11:40 At 11:15 Reiter # 27277 of l&a reported to me that while doing switch repairs he discovered in V-853 approx 5 gallons of dielectricfluid in the structure as the result of a Bottom Leak. He was working on Feeder 13M53. The location is at 628 W.28 st & 11 Av. No fire/smoke was involved, no injuries, weather did not contribute, No private property was affected. No substantial cracks observed, no sump verified, no sewer connection as per Conduit plate # 22-C-3. There is Dielectric filled equipment in the structure. The source of the spil is the Tranformer and the cause is a Bottom leak. Environmental tag # 18352 was hung. Twosamples for PCB and ID will be taken and courier called for pickup. Chain of Custody # BB 04312 will be used for this incident. Baloneys and absorbent pads placed around the Transformer and contained the spill. The Feeder is being requested taken out of service OOE / 2 to schedule cleanup. Equipment is a Westinghouse year 1961 with Serial # 2200389 with a capacity of 290 gallons and 13 PPM as per "Cindy". It is a Class v-4 and 500 KV. 1/17/2003 @ 12:27 hrs I spoke to Shift Manager M Barryin the Manhattan Control Center and he informed me that as of now due to contingencies on this network, this Feeder 13M53 can not be scheduled at this time to be taken out of service. Analysis indicates the presence of a substance similar to a dielectric fluid. UPDATE 1/17/03 Lab Sequence Number: 03-00483-001 Date Approved: 1/17/2003 E2 Incident Number: 146784 Date Received: 1/17/2003 Chain of Custody ID: BB04312 Date Sampled: 1/17/2003 MATRIX: OIL GRAB LOCATION: 628-58 W.28 ST STRUCTURE: VAULT 853 FEEDER ID: 13M53 EQUIPMENT: TRANSFORMER SERIAL #: QC ID: 06-200301162217 TEST DESCRIPTION RESULT UNIT METHOD Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 11.3 ppm EPA 608/8082 TOTAL PCB 11 ppm Transformer removed and replaced on 4/18/03 Zoeller, 11940 4/17/03 21:20 V. Mirance # 58484 cable/cleanup supervisor called to report that the cleanup was completed at 21:15. All debris & liquid was removed by the flush truck. The structure was double washed with slix & rinsed down with the flush truck. The spill tag # 18352 was removed. The cleanup crew was: J. Bauer # 03431, R. Laroza # 12108, M. Pelusio # 87327, R. Barger # 14903.
 Remarks: cleanup pending power being turned off ref #146784

E2MIS 104205 02/11/97 14:55 IANNINO #51505 REPORTS: A SPILL OF VEH.
ANTIFREEZE OF APPRX. 1 GAL..WAS CLEANED UP IMMEDIATELY COMPLETE IN 10
MINS...WAS FOUND AT 14:45...COMP...14:55...NO WATER ...WAS CONTAINED DID NOT
ENTER WATERWAY OR SEWER SYSTEM.....DR #23349 Chronology: On Feb 11, 1997 at
1445 hrs A. Perez started vehicle 40630 to move it into a parking space. After
parking the vehicle and turning off the engine, he got out and noticed
antifreeze leaking onto the pavement from the radiator hose. He put a pan under
vehicle to catch any dripping antifreeze and cleaned up antifreeze from
pavement with absorbent and pads. About one gallon of antifreeze was cleaned
up. No impact on waterway or sewer. #9 notified and report was given to Mr. J.
Carroll. Vehicle was turned into transportation for repair.

 DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "RODRIGUEZ" E2MIS NOTES 145512 At 22:45 hrs on Oct 09,200 Mr. Horace Davis #80496 Section Manager Cable Dept. At 28 st yard. 281 11 Ave. reports that on 10/07/09 @ 00:25 hrs That Joseph Napolitano #19711 Mech B of the cable dept. was doing an inspection on Veh60654 And found approx 1 oz of hydraulic oil dripping from under truck On to asphalt. At this point according to Mr. Davis, Mr. Napolitano failed to respond to this Incident. Mr. Davis did however observe that oil absorbent was spread over leak and that it was cleaned up on the same date, but he states it is unknown as to who did the clean up. No samples taken at this spill location No fire or smoke from Veh60654 No sewers or waterways affected from this spill from Veh60654 The clean up is complete, But clean up persons are unknown and furthermore It is unknown as to the time it took to do the clean up,according to Mr Davis.

DEC Memo: 160699. On 8/24/05 at 15:24 P. Matsis # 85647
of transportation called to report that at 14:39 J. Baptiste the guard from W.
28 St yard reported to him that a N.Y. University trolley bus license plate
33218BA had spilled 1 qt of antifreeze near the gas pumps at W. 28 St while
gassing up. The fluid landed onto concrete. There was no sewers or waterways
affected. No fire or smoke was involved. No private property was affected. No
injuries were related to the spill. The cleanup was started at 14:42 and
completed at 14:55. The crew was R. Cardio # 12238 , E. Cross # 05574. They
used pads and granuals & will dispose of the waste in W. 28 St transportation.
8/24/05 16:12 CIG T. Enright # 48536 was notified.* R. Bruns # 21106

 Source of spill: Unknown Cause of spill: Unknown Spill on: Asphalt
 Update: 4/2/04 @ 16:23 hrs. The following is a clarification of this incident based on a review of the audio tapes and the Manhattan Environmental Desk's notification to CIG. At 09:26 hrs. on 3/31/04 Bill Zuk of Transportation notified the Manhattan Environmental Desk (Wally Lee) of a sheen throughout the parking lot at the West 28th Street Work-out Facility. Mr. Zuk stated that he was notified of the spill by Facilities at approx. 09:20 hours. He was asked what the source of the spill was and replied that he didn't know. He was then asked what time the spill was discovered. Mr. Zuk didn't know but asked someone in the yard. He replied that the spill was discovered at 09:10 hours. He also stated that the sheen went into the catch basin. When we learned that the sheen went into the catch basin R. Pellegrino #38620 called CIG at 09:33 hrs. and spoke to Bill Murphy. When he explained the incident to CIG, Mr. Murphy stated that they (CIG) were already aware of the incident. Mr. Pellegrino asked how that could be since we were just notified of the incident from Transportation. Mr. Murphy turned to someone at his desk to inquire and stated that they were called by Bob Philips (Facilities) directly. Mr. Pellegrino stated that it was great that CIG got the call directly from the site (since the call to the Environmental Desk was 16 minutes after discovery into the catch basin). At 09:37 hrs. Mr. Lee spoke to Mr. Zuk again to get the remainder of the information for the e2MIS report. Mr. Zuk stated that the incident was a sheen and the substance (& source) was unknown. He also stated that the ERT just arrived on location. Based on an e-mail from Paula Jones to Ed Radtke dated 4/1/04 @ 09:52 hrs. the following is information regarding the cleanup: "Facilities Management contacted Allstate Power (P.O. 2-22768) to perform the clean up. Allstate performed the clean up. A sample was taken. Chain of custody DD02391. As soon as the results are in from the Chem. Lab the waste will be disposed of. It was determined the cause of the leak was diesel fuel from truck #40970 (I&A) which is in Transportation for repairs." Manhattan Environmental Desk contacted Bill Zuk of Transportation to get the details of the cleanup. Mr. Zuk stated that Facilities arranged for the cleanup by Allstate and Mr. Delahoz would have more information regarding the details of the cleanup. Closure of this incident is pending details of the cleanup from Mr. Delahoz. 05/21/04 @ 14:15 R Phillips # 78645 of Maintenance Facility reported about this incident that occurred at W. 28 St. yard that the final cleanup was completed on 3/31/2004 at 09:00. No solid waste was removed and the type of liquid was removed by Outside Vendor - Allstate Power Vac. Approx 355 gallons was removed. The materials used to clean the structure were reported as unknown. Cleanup was done by the Vendor. The source of the spill was Con Edison truck # 40970.

Remarks: DUE TO RAIN: NO TO 5 QUESTIONS: SOME OF SHEEN ENTERED STORM DRAIN: PLACED PADS DOWN:

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "O'CONNELL"
4/26/04: met on site with Dave Perez (CFS EH&S) - during pre-inspection for audit found old sump that was apparently used to drain former hydraulic lifts. Pit is approx.4' x 4' x 20' deep. There is sump pump at bottom of trench which connects to the sewer. Dave told me that the oil ID came back as "similar to dielectric fluid". I asked him to send copy of lab results, including chromatogram for sample and referencestandards for both df and hydraulic oil. The pit was cleaned by Clean Harbors. I aked Dave to have sewer trap checked, cleaned and sealed (since this pit is no longer used). (JHO) 4/27/04: Lab report faxed from Chem Lab indicates results are hydraulic fluid, not dielectirc fluid. (JHO) e2mis no. 153047: D. Perez # 80578 of EH&S for central field services called to report that at 11:00 while making an inspecting for an audit at the W. 28 St. yard (281 11 Ave) he found 30 gallons of an unknown oil mixed with 20 gallons of water. He states that the

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "O'CONNELL" e2mis no. 132753: 8/8/00 Mr L. Faro, EH&S, #34079, reported a tar like substance spilled from a gas pipe inside W.28 st hazardous containment area onto a concrete pad. The substance is known to contain 137 ppm PCB's Samples were taken on 8/1/00 and results from Chem lab received on 8/7/00. Mr Faro has made area safe and is arranging clean up. Update 08-AUG-2000 09:50 am Pipe was brought in from field location at 301 West 38th pending analysis. Pipe ends were wrapped with plastic and duct tape and pipe was placed in hazardous waste storage area. Spill occurred when the tar residue inside pipe melted from the heat and leaked past plastic containment onto concrete pad. Spill cleanup overseen by Gary Windman, Manhattan Gas Environmental Coordinator. Spill occurred when the tar residue inside pipe melted from the heat and leaked past plastic containment onto concrete pad. Spill cleanup overseen by Gary Windman, Manhattan Gas Environmental Coordinator. Spill was triple washed and section of concrete with stain removed for proper disposal. Lab Sequence Number: 00-07434 OIL AROCLOR 1242 - 137 PPM UPDATE - August 8, 2000 09:45 Cleanup of spill is complete. The concrete has a small layer of tar still on the surface. Repeated scrubbing with wire brush and degreaser not removing tar. Crew setting up to breakout 18" x 18" square of concrete. On August 8th, gas construction crew brokeout 18" x 18" concrete where spill occurred. Concrete was disposed of as PCB/Benzene hazardous waste.
Remarks: TAR LIKE SUBSTANCE LEAKING FROM PIPE. PCB 137PPM. CLEANUP PENDING.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "RODRIGUEZ"
E2MIS 151323 On 12/1/03 at 17:25 W. Zuk # 85848 of W. 28 st transportation
reports a spill of gasoline. He states that at 17:15 1 qt. of gasoline
spilled from the back of a contractors vehicle (Transclean) onto the ground.
This was near a 3' square drain that previously had a baricaides (a board with
rubber seal that was provided by Transclean) around it. However about 8 oz has
leaked past & into the drain.Additional diapers were put down around the drain.
The spill has stopped at this time. He also says that in this 3' drain there is
about 60 gallons of water. Wilson Renalds of Clean Harbors will have a truck
& crew to drain & clean the liquid that is still in the drain. They should be
on location at 8 pm. There was no fire or smoke involved. No private
property was affected. No injuries were related to the spill. Weather
conditions do not contribute to the hazard of the spill. Update12/12/03
Cleanup completed by Clean Harbors on 12/01/03 @ 2230.
Remarks: 8 oz of gasoline leaked from a box truck into the sewer but it is now contained

DEC Memo: e2mis no 155226 E.Manning 03430 reports that in the 28 St. yard a garbage

dumpster was leaking an unknown oil into a drain. He reports that this unknown oil has made sheen and he has used diapers and was able to remove all of the sheen at this time He has also placed oil absorbent on the asphalt by the garbage dumpster preventing any more from going in the above said drain. At this point it is unknown as to the connection going to this drain itself. Source and cause of spill are unknown. Nosamples taken at this time, clean up pending response from Facilities Mgt Dept. Sept 05,2004 @ 07:30, I T. Haynes spoke to R. Carty in refer. to the above. He states, that the unknown oil made be hydraulic fluid, and isn't coming from the dumpsters. The assumption is, that a vehicle may have been passing through and leaked the hydraulic fluid from it's vehicle onto the asphalt, which went into the drain. Two samples were taken 1 oil id and 1 pcb. 10:00, I spoke to Flush Supv. Jenkins, hehas one of his crew members cleaning up the spill. He also said; there is hydraulic fiuid inside of the catch basin. Once lab results come back we will preceed with the clean-up. Lab Sequence Number: 04-07067-001: Analysis indicates the presence of a substance similar to a solvent; PCBs < 1 PPM 9/7 @ 02:05 Spoke to Jenkins 56029 Flush Supervisor and he informed me that the cleanup completed as of 14:20 on 9/5/2004. The basin was cleaned with the Vactor truck. Encironemtnal tag # 38689 was removed.

Remarks: Oil sheen on stagnant water near dumpster. Absorbant pads used to recover all of product.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "FOLEY" Con Ed e2mis #144803: On 8/30 @ 16:26 HRS D Derasmo # 35379 of SSC reported to me that driver M Stewart # 16223 while in Boom truck # 60162 hit the yellow station by the gas tanks in the W.28 st yard and spilled approx 35 gallons of hydraulic fluid on the asphalt. Sewer/ waterways may be affected because the spill entered the metal boxes that may be connected to our drainage system. On further investigation by company forces, the metal boxes are not connected to the waterways. No sample was taken. The cleanup is in progress at this time. UPDATE 8/30 @ 17:20 HRS Derasmo informed me that the cleanup start was 16:05 and completion time was 17:05 on 8/30/2002
Remarks: line broke on boom truck #60162. spill in process of cleanup by con ed.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "ENGELHARDT"
e2mis no. 127140: FOUND 16 OZ TRANSFORMER OIL ON FLOOR IN V0853 ON FEEDER
13M5 FROM A LEAKING GROUND HANDEL. PIGS,PADS AND OIL ABSORBMENT ON FLOOR AND
BLOCK DRAIN. NOWATERWAYS OR SEWER AFFECTED. NO SUMP. Transformer repaired.
Ground Handle Packing Nut was tightened and leak subsequently stopped. Final
cleanup completed as 50-499 ppm PCB by removing all debris and double washing
side of transformer and vaultfloor with degreaser. Unit was pressure tested
and held pressure. Repair held. LAB SEQ#99-08373 Aroclor 1260 PCB 13 ppm.
Remarks: vault #0853 - spill contained in vault spill being cleaned up spill from a
feeder - con ed #127140

Historical Generators:

Date form received by agency: 09/11/1998
Facility name: EVERBRITE-DAUMAN INC
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED

DEC Memo: 205311. see eDocs. Apartment bldg at 527 West 34 Street referred to Spills Group. 4/23/07 - Raphael Ketani. The spill was originally reported by Con Ed (Tom Marcirnek (212) 580-6763) as they found 4 gals. of fuel oil in their VS #3863. The ERTSDESK for Con Ed (212) 580-8383 was the contact. I spoke to Pat at the ERTSDESK and he said he didn't have any more information on the spill into the transformer vault than what was already given to the DEC. He claimed it was coming from the apartment building at 527 West 34 St., NY. The building is managed by Downing Management Corp., 12 E. 49 St., rm. 1204, NY, 10017-8283, (212) 750-4299. The block and lot are: 00706/0017. I contacted the receptionist at Downing and she said that the super would call me back. 4/24/07 - Raphael Ketani. I never got a response back. So I made a site visit. The fill port for the building is right above the Con Ed transformer vault grating. Stains were slightly visible on the edge of the grating and on the wall below the fill port. Based upon the small size of the spill, the fact that Con Ed already cleaned it up, the location of the fill port right above the grating and no evidence of any other reason for the spillage of oil into the vault, I am closing the spill case.

Remarks: LEAKED FROM A BUILDING FILLIN POINT: WILL BE CLEANED UP NO TO 5. 205311

 Operable Unit: 01
 Material ID: 2141576
 Material Code: 0002
 Material Name: #4 Fuel Oil
 Case No.: Not reported
 Material FA: Petroleum
 Quantity: 0
 Units: Gallons
 Recovered: No
 Resource Affected: Soil
 Oxygenate: False
 DEC Memo: 2/25/08 - City owned building (HPD) had a loose vent pipe fitting on the top of the tank. Overfill caused 40-50 gal of #4 oil to spill to the basement floor over the side of the tank. Eastmond was hired to do the cleanup. SS.
 2/27/08 Cleanup iscomplete and EastCoast Boiler is in the process of rebuilding the vent piping. Cleanup is complete. SS.
 Remarks: could be a broken pipe still investigating

Lower Other Pertinent Environmental Activity Identified at Site

Actual: RCRAInfo is a national information system that supports the Resource
10 ft. Conservation and Recovery Act (RCRA) program through the tracking of
 events and activities related to facilities that generate, transport,
 and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
 program staff to track the notification, permit, compliance, and
 corrective action activities required under RCRA.

S106720194

Resource Affected: Air
 Oxygenate: False
 DEC Memo: 11/1/04-Vought-This spill closed due to non petroleum spill and open spill #0307633 at same location.
 Remarks: Caller states that while performing drilling to install monitoring wells the adjacent tennant to high ridge enterprise reported diesel fumes inside the building, fenley and nicol shut the job down. plan to bring in exhaust hose for the drill rig onmonday and install an explosion proof fan as a precaution, will monitor the air quality. dec rep is jeff vought.

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead DEC Field was "VOUGHT
"10/20/03. Contaminated soil letter sent to Walter Seelig (High
Ridge Enterpr.). Also see spill # 9008960. YK. 11/21/03 Rommel Met Brian
McCabe, seniorgeologist, on site. Soil samples collected from 8 to 16 feet
below grade were contaminated. Groundwater (15 to 18 feet) was also sampled
during the investigation and were impacted by BTEX and MTBE. They will
excavate what soil they can and install a minimum of three monitoring wells
(one outside by remote fills). Spill 9008960 reported TTF of 4000 gallon gas
UST 11/14/1990 STIPULATION SIGNED RD 2/18/04. 3/18/04-Vought-Spoke with
Rob Ferguson (631-586-4900). Subsurface Investigation report sent to DEC on
2/3/2004. Ferguson will send small CAP upon receiving subsurface investigation
report review. Ferguson requires review of subsurface investigation as per
STIP. Vought requested that another copy of the Subsurface investigation be
sent to DEC. 4/1/04-Vought-Spoke with Tom Melia (F&N) and he requested
that he be point of contact. Spill transferred from Rommel to Vought.
4/6/04-Vought-File review by Vought: Contaminated soil letter sent form DEC
Krimgold to High Ridge Enterprises. Site meeting minutes (Fenley & Nicol
Brian McCabe)-11/25/03. Site meetin on 11/24/03. In attendance were DEC
Rommel, F&N McCabe, F&N Melia and F&N Hole. "The results of the sampling
indicated that the contamination islocated in the northern portion of the
building. The effected area extended from the north end od the 4000 gallon
tank excavation to the front of the building, approximately thirty five feet
and from the center for the 550-gallon tank excavation west to the side of the
building, approximately twenty feet." DEC recommended additional soil
excavation without comprising structural intergrity and required
1)installation of one well inside the building after backfilling completed
2)installation of two wells on sidewalk at the location of the former remote
fills and twenty feet west of the bay door. Letter from Fenley &
Nicol(Thomas Melia) to DEC(Rommel)-12/18/03. "The new owner of the building
indicated that his intended use forthe building is as an art gallery". During
building remodeling excavation was performed and tanks were discovered under
floor. Two gasoline USTs (one 4000-gallon and one 550-gallon) were removed and
were in separate loations fifteen to twenty feet apart. "Upon removal of the
bottom slab the soil encountered was saturated with liquid phase hydrocarbon".
Depth to water expected to be 18' below grade. F&N proposes delineation of
soil and groundwater contamination, installation of wells andadditional soil
excavation. See also Spill #9008960 reported in 1990 for tank test failure
and administratively closed on 3/4/03. Letter from DEC Rommel-12/4/03.

Letter approving installation of wells on the sidewalk on the south side of West 29th Street between 10th and 11th Avenues and requesting expediting of sidewalk permits. Letter from F&N(Melia) to DEC Rommel-12/18/03. "At this time we are continuing our efforts to delineate the extent of the contamination...". Three monitoring wells installed (one inside and two outside building). "At this time the owner of their property feels that it would be too far costly to excavate the contaminated soil without jeopardizing the structural integrity of the building, and would prefer that we install an air sparge/soil vapor extraction (As/SVE) system to remediate the hydrocarbon impact". Please indicate your approval below. No approval indicated by DEC Rommel. Stipulation Agreement-1/15/04. Stip with deadline of 2/13/04 sent to: Walter Seeling High Ridge Enterprises, Inc. P.O. Box 2542 York, Pa. 17405. Subsurface Investigation Report (F&N-Melia 631-586-4900x190) -3/19/04. Investigation consisted of six soil borings, six temporary groundwater monitoring points and three monitoring wells. "The central and eastern units are currently vacant and undergoing renovations for use as an art gallery". Depth to groundwater is 8-9' and flows northwest. Soil analyticals show 35ppb benzene(SP-1 at 12'), 882ppb benzene(SP-2 at 12'), 14ppb (SP-3 at 12'), 4900ppb benzene(SP-4 at 12'), 817ppb benzene(SP-5 at 12'). Groundwater analyticals show 2.5 ppb benzene(TW-1), 1459ppb benzene(TW-2), 45ppb benzene(YW-3), 2109ppb benzene(TW-4), 254ppb benzene(TW-5), 11ppb benzene(TW-6), 1200ppb benzene(FN-1), 206ppb benzene(FN-2), 4.2ppb benzene(FN-3). Report recommends Air Sparge/Soil Vapor extraction system. NYSDEC requires: 1) signing of Stipulation before any further correspondence 2) presence or absence of free product and interim remedial recovery if present 3) surrounding area site plan including property usage 4) additional wells east of FN-2 and well north of FN-2 to calculate required radius of influence for system design. 4/6/04-Vought called F&N(Melia) to repeat Stipulation requirement and left message to return call to DEC. 4/7/04-Vought-Received faxed copy of STIP already implemented by DEC Kunkel on 2/18/04 (Copy of original not in file). 4/8/04-Vought-Sent letter to High Ridge requiring well installation north of FN2 and east of FN2, submission of monitoring well data and surrounding property sketch. 4/16/04-Vought-Wells will be installed next week (tentatively). Wells for pilot test will also be installed. Mailing address is: High Ridge Enterprises P.O. Box 2542 York, Pa. 17405 4/18/04-Vought-Received message from David Oloke (F&N-631-586-4900x144) that he is new project manager for site. Vought called David and two additional wells installed (one north of FN2 and one east of FN2). All onsite wells were sampled. No free product in new wells. Four vapor wells installed and air sparge well will be installed. DEC will receive pilot test report by 7/15/04. 6/23/04-Vought-Spoke with David and initial results faxed on 6/9/04. .5" of free product in well in 1" vapor well sent for fingerprinting. EFR not effective. DEC requires recovery of free product and submission of pilot test. 9/2/04-Vought-File review by Vought: Groundwater results (F&N)-6/23/04. Groundwater analyticals show 1.2ppb benzene(FN5), 1.8ppb benzene(FN4), 14ppb benzene(FN3), 26ppb xylene(FN3), 474ppb benzene(FN2), 621ppb MTBE(FN2), 8ppb toluene(FN2), 2065ppb benzene(FN1), 47170ppb MTBE(FN1), 4106ppb toluene(FN1) and 2761ppb xylene(FN1). Addendum to the direction beneath the site was found to be toward the north." Property Subsurface Investigation Report (F&N)-7/14/04. On 5/7/04 two additional monitoring wells were installed. "On June 4, 2004 the AS/SVE pilot tests were conducted". One inch of floating product was detected in P2. "The results of the AS pilot test indicated that the introduction of air pressure into the formation below the contaminant zone is a viable remediation technique". Report recommends commencement of an interim remedial measure to recover product from P-2 via weekly EFR. Report also recommends installation of another well to replace P2. Vought called David from F&N to approve work plan. Well installation will be included with

S106124184

final remedial action plan. Vought sent letter approving of proposed workplan (installation of well at P2 and IRM) and included requirement of determination of groundwater flow direction and surrounding property sketch. 9/3/04-Vought-Received fax from Oloke (F&N). "The groundwater flow sage of downgradient sites to the north are a parking garage and an art studio. Vought called Oloke and approved workplan as per 9/2/04 letter. Vought called Oloke and he will begin drafting RAP for submission to DEC. 9/29/04-Vought-Spoke to David F&N and he will be sending RAP in overnight. 10/1/04-Vought-Reviewed RAP received by DEC on 10/30/04. "Site is currently occupied by a masonry block structure which is subdivided into three sections. An art gallery occupies the western unit. The central and eastern units are currently vacant and are undergoing renovations for use as an art gallery. RAP proposes weekly recovery of free product from FN2 via a peristaltic pump until well is converted to a 2" product recovery well designated at FN6. Two additional wells will be installed in the interior of the building. Monthly groundwater monitoring and quarterly sampling. Five air sparge and four SVE wells will be installed in the interior of the building. Remedial system will be installed on the roof of the building. Daily monitoring for the first week, weekly monitoring for the first month, monthly maintenance visits and effluent sampling, quarterly effluent sampling and groundwater sampling. Vought sent letter approving of RAP. 10/28/04-Vought-Spoke to David(F&N) and FN1 must be reinstalled due to it was a bent well. Wells will be installed during the next few days. 9/27/05 - SPILL TRANSFERRED FROM VOUGHT TO OBLIGADO 11/9/05 - Obligado - Review System Startup Report. AS/SVE system consists of 5 HP compressor and 3.5 hp blower and 5 air sparge wells and four soil vapor extraction wells. Effluent air stack results show 31.4 ug/m3 for benzene. Operation and maintenance schedule proposes monthly SVE effluent monitoring and Quarterly Status Reports. System started in May 2005. Due to noise generation, the system only runs from 9pm to 6am. Quarterly Status Report - Groundwater analyticals show 4.7 ppb benzene (FN3), 50.1 ppb MTBE (FN2), 78.3 ppb MTBE SVE5, 1.7 ppb MTBE SVE3. Benzene effluent show 46.74 ug/m3. 5/15/06 - Obligado - Called David Oloke. Asked that he send recent Quarterly Status Reports. 5/22/06 - Obligado - 2Q06 Quarterly Status Report, submitted by Fenley Nicol, Inc. Ground water analyticals show 9 ppb benzene 35 ppb MTBE in FN3 and and 3.7 ppb benzene in FN4. Benzene effluent below STIP limits. There is duplicated data on Table 2 Air Sampling Results, probably a cut and paste error, call Dave Oloke, he said he will look into it at send a new table with the electronic copy. Report recommends continuing system operation. 6/23/06 - Obligado - Called David Oloke. Asked for the corrected Table. He said he will email it to me. 10/23/06 - Obligado - Called David Oloke. Left message requesting most recent quarterly status report. David Oloke call me back and said he would send the report shortly and he would correct the typo on Table 2. 1/30/07 - Obligado - Review 3Q06 monitoring report. Typo in 2Q06 table has been fixed in cumulative table. AS/SVE system online and working at 100 maximum capacity. Air samples collected monthly. Benzene in gw exceeds standard at 4 ppb. in 2 wells. All effluent below STIP guidance. Benzene detected in VES/AS effluent at 4.86 ug/m3 in 6/06. Recommends continued operation of the system. Review 4Q06 monitoring report - AS/SVE system operating at 100 capacity 9hours per day. All effluent samples below STIP guidance. BTEX effluent at 361.71 ug/m3 during 10/27/06 Report recommends continued operation of system. GW results show minor exceedences of Benzene - max concentration at 8 ppb in FN3. However gw monitoring does not include FN1 where highest contamination was found. 9/13/07 - Obligado - Review 1Q07 monitoring report. According to the report, the AS/SVE system is running at 100 capacity. System is still pulling vapors, at a flow rate of 50 cfm and a concentration in March 07 of 111.30 ug/m3 BTEX. Benzene (12.8 ug/m3) was below the STIP limit. Recommends continued operation of AS/SVE system. 10/26/07 -

DEC Memo: 1/18/06 - Performed site inspection. Difficulty finding the building as it is currently 261 11th Avenue (inclusive 271). Building sup't Ali provided access to the basement. He was employed by this building management and recalled the spill. He knows the spill amount is a gross overestimation. Noted 2 large aboveground petroleum storage tanks. No oil on floor or adjacent drain/sump. Former spill area clean and took photos. Spill closed. 6/15/05 - No file.
DEC Lead changed to Grathwol. Prior to Sept, 2004 data translation this spill Lead DEC Field was "M TIBBE"

Remarks: EMPLOYEE TOLD TO REMOVE ASBESTOS FROM BOILER AND DISPOSE IN GARBAGE BACK SUMP LOADED WITH #6 FUEL OIL

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "VOUGHT"
8/2001-Tank closure report prepared by Franklin Company Contractors.
6/29/2001-Franklin implemented bioremediation by mixing 240lbs of ORC with
surrounding soils and filling in excavation. 500 gallons of Waste stream
technologies W-4 bio-blend mixture also injected.. Site was bakcfilled with 3
to 6 feet of clean fill, 6 inches of crushed stone and an 8-mil polyethylene
vapor barrier. Area was then covered with 6 inch reinforced concrete slab.
Soil VOC pass TAGM, soil SVOC exceed TAGM but are due to fill composition.
Site visit by Jacob Krimgold showed no visual evidence of contamination.
Groundwater VOC and SVOC also pass TAGM. 12/13/2001 Spill closed asper Mark
Tibbe, Jacob Krimgold and myself (all NYSDEC personnel).
Remarks: SOIL SAMPLE RESULTS FROM REMOVAL OF 3 TANKS AT LOCATION. NO VISABLE SIGNS OF
CONTAMINATION.

NY MANIFEST **NYR000113332**
RCRA-CESQG

Relative: **FINDS:**
Higher Other Pertinent Environmental Activity Identified at Site

Actual: RCRAInfo is a national information system that supports the Resource
32 ft. Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D006
Waste name: CADMIUM

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Actual:
18 ft. AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V

of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "ZHAO/DO"
12/19/02 - AUSTIN, DDO - TTF LETTER SENT 1/11/06- DEC Piper spoke w/ Eugene
Degan, (PRev. Owner Rep 845.294.7509) regarding tank test. He could not be sure
though he thinks the tanks are still empty. He will look into this. Piper then
contacted new owner Dov Hertz, Extell Group. 212.712.0633. He knows nothing and
will have previous owner get info. Galden Frankel performed Phase I and II on
property. Left message atGF requesting call back. 1/18/06- DEC Piper spoke w/
property manager, Rob Scharf 212.712.6111. Stewart Dean Co. -212.695.3180. He

S105997685

will fax info. DEC Piper to review and inform Rob of additional work if warranted. 2/6/06- DEC Piper spoke w/ Rob S.I explained to him that he was still in violation of PBS code. I have received analytical suggesting that there was no release at the site. The tank test results indicated a dry ullage leak. The tank is empty and still needs to be removed or closed in place. As per Rob, he will be sending in the new application this week. I instructed him to include a line item that that due to the razing of the building, that they will remove the tank when the activities have been completed. Afterwards, he will need to update the PBS records to indicate that the tank has been removed. Upon review of a limited phase II investigation of the site performed by Galden Frankel, of the six soil samples taken from various locations throughout the site, no elevated constituents were detected. However, three GW samples were collected. The results indicate 1,040 ppb of MTBE and slightly elevated levels of PERC and its byproducts. 5/15/06- DEC Piper. Referred to Remediation. 5/31/06 - reviewed file: MTBE was detected without other VOCs usually present in a petroleum release. The MTBE is likely the leading edge of an off-site impact. Low level of CVOCs are also detected. These CVOCs are only detected in GW with no soil contamination or other sources on site. Spill is closed, no NFA issued since no remediation was ever conducted at site. - KST

Remarks: they are going to abandon the tank

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Sangesland spoke with Carol Owings of Key Environmental. She said the site is an industrial building that had several buried tanks removed. There is contaminated soil on the site that can not be removed, so the area will be treated in place. KeyEnviornmental will work on a plan to submit to the DEC for review. Sangesland wrote a CSL letter and listed Ryan Piper as the contact for the site. CSL sent to one of the owners: William Cirillo, 33 Tiers St, Apt F, Bronx, NY 10464 5-31-07- EWMA- new contractor. will contact me. 2/6/08- DEC Piper reievwed RAWP addendum and approves. 05/20/08-Hiralkumar Patel. another spill reported (Spill #: 0801913) as found more tanks from site. during excavation, found three approx. 1000 galsize tanks, in middle of property. one tank was found empty and has been removed from ground. multiple holes noted on that tank. another two tanks sitting next to each other and has product in it. contractor will remove tank properly and will take endpoint samples.

Remarks: TANKS WERE REMOVED: REMEDIATION PENDING:

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

DEC Memo: letter to be sent Last update by JBMCCULL on 12/20/05 - transferred back to R-2 3/5/08 - Austin - Assigned to Ketani for further investigation - end 4/21/08 - Raphael Ketani. The spill occurred on 5/11/89. The UST was filled with water and the top of the tank and the cement were seeping oil. The tank holds #6 oil. Richard Breslow, 559 W. 45 Street, NY (212) 265-4023 was on the original spill report as the spiller. There is no file for the case. I checked Property Shark, NYC Property Tax listings, and ACRIS and found the owners as: 27th Street Property, LLC, c/o Centaur Properties, LLC, 35 E. 21 Street, 3rd Floor, NY, 10010; and Gaiety Investments, Ltd., c/o Hartman & Craven, LLP, 488 Madison Avenue, NY, 10022. There is no PBS registration for 530 nor 532 nor 534 West 27 Street. The block and lot are 698 and 54. I sent CSLs to both 27th Street Property and Gaiety Investments, Ltd. 4/23/08 - Raphael Ketani. Joe Graceson of Centaur Properties (212) 308-4443 called and left his phone number in a voice mail message. I made contact with Mr. Graceson. He said that Centaur is the sole owner. He said that the building uses gas only. The building was bought from Gaiety a little while ago. Centaur has had little cooperation from Gaiety in obtaining old records. He asked for any records that DEC has. I told him we have nothing. He asked what the next step would be if he can't find any information regarding the cleanup. I told him that Centaur will have to hire an environmental company to do an investigation and cleanup. I told him that DEC will need to receive the investigation plan, the site investigation report, the remediation plan, and

S104275540

the remediation report. He said he understood. With that, the conversation ended. 4/28/08 - Raphael Ketani. Steve O'Connell of Hartman & Craven (212) 836-4933 called. He said he represents Gaiety. He said that his company was involved when Gaiety first purchased the property and when they recently sold it. He said that Gaiety has no involvement with the site. 5/28/08 - Raphael Ketani. Mohammed Ahmed of Fleming Lei Shue called and said that he can't find any records or plans showing where the fuel tank used to be. He asked whether DEC had any records. I told him "No." He said he will try to put together an investigation plan. He said that he thinks he has a general idea of where the tank used to be. I told him that it may "boil down" to just doing some geoprobing all over the basement. He said that may be what will happen. 5/29/08 - Raphael Ketani. Mr. Ahmed called. He said that he found a 1 page document from the NYFD stating that the tank was removed. I told him to send the document to me. I also told him that this doesn't preclude doing a soil investigation. He said he understood and that he will send a proposal for the work to be done. I received the Fire Department document by FAX from Mr. Ahmed. 6/3/08 - Raphael Ketani. Today I received the site investigation plan dated 5/29/08 via e-mail from Mr. Ahmed. I reviewed the plan, found it acceptable and e-mail Mr. Ahmed to go ahead with the work.

Remarks: BURIED UNDERGROUND TANK FILLED WITH WATER BUT SURFACE SOIL AROUND TANKTOP & CEMENT IS SEEPING WITH OIL, OIL WAS SAMPLED.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Facility Has Received Notices of Violations:

Regulation violated: Not reported
Area of violation: LDR - General
Date violation determined: 06/20/1996

Other Pertinent Environmental Activity Identified at Site

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CAS Number: Not reported
Last Date: 19940929
DEC Remarks: 8/27/99 - Saccacio - on 7/31/99 I called the caller and he said that speedy-dry had been applied and that a cleanup crew was enroute. Called the spiller Tmore) and he said that he contracted tyre to do the cleanup. I asked him to send me a letter certifying the spill had been cleaned up. I called him and left him a message on 8/27/99 reminding him I need that letter to close out the spill
Spill Cause: tank was overfilled at location - speedy dry applied - cleanup crew enroute - some material may have flowed into storm drain and street update 0400 hrs - spill only 5-7 gal all cleaned up - none entered waterway

Actual: AFS (Aerometric Information Retrieval System (AIRS) Facility
37 ft. Subsystem) replaces the former Compliance Data System (CDS), the
National Emission Data System (NEDS), and the Storage and Retrieval of
Aerometric Data (SAROAD). AIRS is the national repository for
information concerning airborne pollution in the United States. AFS is
used to track emissions and compliance data from industrial plants.
AFS data are utilized by states to prepare State Implementation Plans
to comply with regulatory programs and by EPA as an input for the
estimation of total national emissions. AFS is undergoing a major
redesign to support facility operating permits required under Title V
of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department
of Environmental Conservation (DEC) information system for tracking
environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource
Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

Date form received by agency: 07/15/2003
Facility name: ORSAP TAXI REPAIR
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Actual: RCRAInfo is a national information system that supports the Resource
8 ft. Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with

Map ID

FBI AUTOMOTIVE REPAIR UNIT (Continued)

1001090118

a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

NY MANIFEST:

or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Owner/Operator Summary:

Owner/operator name: HELMSLEY SPEAR INC
Owner/operator address: 60 E 42ND ST
NEW YORK, NY 10017
Owner/operator country: Not reported
Owner/operator telephone: (212) 687-6400
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: Not reported
Owner/Op end date: Not reported

Handler accessibility indicator: Transferred to the program or state equivalent.

Handler Activities Summary:

U.S. importer of hazardous waste: Unknown
Mixed waste (haz. and radioactive): Unknown
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: Unknown
Furnace exemption: Unknown
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Historical Generators:

Date form received by agency: 02/08/1996
Facility name: FBI AUTOMOTIVE REPAIR UNIT
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS

Map ID
 Direction
 Distance
 Elevation

MAP FINDINGS

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D006
 Waste name: CADMIUM

Waste code: D008
 Waste name: LEAD

Waste code: D018
 Waste name: BENZENE

Waste code: D035
 Waste name: METHYL ETHYL KETONE

Waste code: D039
 Waste name: TETRACHLOROETHYLENE

Waste code: D040
 Waste name: TRICHLOROETHYLENE

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 07/26/2005
 Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
 Area of violation: Not reported
 Date achieved compliance: Not reported

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSLEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: D010
Waste name: SELENIUM

Higher Other Pertinent Environmental Activity Identified at Site

Actual: RCRAInfo is a national information system that supports the Resource
34 ft. Conservation and Recovery Act (RCRA) program through the tracking of
 events and activities related to facilities that generate, transport,
 and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
 program staff to track the notification, permit, compliance, and
 corrective action activities required under RCRA.

Material Code: 0009
Material Name: Gasoline
Case No.: Not reported
Material FA: Petroleum
Quantity: 0
Units: Gallons
Recovered: No
Resource Affected: Soil
Oxygenate: False
DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "VOUGHT"
10/25/00 - REASIGNED FROM O'DOWD TO SANGESLAND. 12/2/2003 Transferred
from Sangesland to Rommel. 1/8/04-Vought-Spill transferred from Rommel
to Vought.4/8/04-Vought-Spoke with Mathew Schieferstein (Anson Environmental
631-351-3555). Recently contracted by owners. Tradewinds were former
contractor. Three monitoring wells onsite were abandoned. No groundwater
analyticals on file. Vought approved Geoprobe samples at former well locations.
Groundwater will be sampled for 8260/8270 and will take deepest dry soil
samples or the highest PID. DEC will see report by 6/15/04. 9/23/05-FILE
TRANSFERRED FROM VOUGHT TO OBLIGADO 2/2/06 - Obligado- called Anson
Environemntal, Mathew Schieferstein no longer works there. Company was bought
in 7/04. No recollection of this project. Will call back with any information
they can dig up. 2/3/06 - Obligado - Received call from Fritz Gros-Daillon
at Anson Environmental. She said Anson in 2004 recommended geoprobing to
owners however the Owners never approved work. No work was ever done.
10/16/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Called
Steven Rosen Baum (212)687-3440 and left message to call me back. -QA
05/15/07: Called Mr. Steven Rosenbaum at (212)972-0902 to discuss regarding
spill. He was not there left message to call me back. -QA 06/19/07: Called
Ms. Firtzi Mazzola (Anson Environmental) at (631)351-3555 to discuss regarding
present status of the spill. She said that she will find out about the
information of spill with in three four days and then she will call me back.
-QA 10/03/07: Called Ms. Firtzi Mazzola (Anson Environmental) todiscuss
regarding spill. She was not there left message to call me back. -QA
Remarks: underground storage tanks each 550 gal have caused soil contamination over a
period of 10 yrs-tanks were tested for tightness and do not appear to be
leaking-contamination likely to have been caused by overfill at different
periods based upon delineation by engineer contamination localized around
fill pipe based on geo-probe boring and results of lab sample

Relative: **FINDS:**
Lower Other Pertinent Environmental Activity Identified at Site

Actual: RCRAInfo is a national information system that supports the Resource
10 ft. Conservation and Recovery Act (RCRA) program through the tracking of
 events and activities related to facilities that generate, transport,
 and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
 program staff to track the notification, permit, compliance, and
 corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "ROMMEL"
Formerly assigned to Tomasello 4/10/2002 - Someone from Penske Truck Leasing
called looking for a closure letter on this site. Sangesland spoke to him.
DeMeo was on duty for the day, therefore it was assigned to DeMeo. Sangesland
suggested the rep from Penske should send a copy of the original closure report
to DeMeo along with a request for closure. 8/29/03 TJD Work plan
approved. 12/9/03 TJD Transferred Demeo >>> Rommel. 1/7/04
Reviewed 12/31/03 report from GES proposing 5 additional delineation wells.

Spoke to Tony Dellaria, GES, verbally approved additional well locations with the addition of one well downgradient of MW4. Letter to Penske, Route 10, Green Hills, PO Box 7635 Redding PA 19603-7635 Rommel 3/8/04 Spoke to Debra Kaplan, GES. Wells are scheduled for 3/22/04. Rommel. >>>
<DKaplan@gesonline.com> 05/13/04 10:46AM >>> Ms. Rommel, Attached please find the Subsurface Investigation Report for the above-referenced site. The hard copy of the report was sent to you today. If you have any questions, please feel free to call Anthony Dellaria at (631) 420-5095. Thank you. >>>
Jennifer Rommel05/13/04 03:43PM >>> DEC approves the work proposed in the Subsurface Investigation Report dated 5/13/04. At the end of the three months of HIT events, please submit an evaluation of the need for a permanent recovery system. 5/17/04
Received summary, 4 mw installed. Total 8 wells. Product in MW1 and MW4 - quarterly bailing recommended. Rommel 10/14/04 Reassigned from Rommel to Sun. 10/31/04 File Update by Sun:- On 11/22/04, Sun sent a letter to Richard Saut of Penske requiring complete delineation of soil and groundwater contaminations, submittal of an Investigation Summary Report followed by a Remedial Action Plan. The Department set a deadline of 12/10/04 for signing the Stipulation Agreement. The Stipulation Agreement was signed by Penske on 12/10/04 and implemented by the Department on 12/27/04. -On 12/21/04, Sun sent a letter to Richard Saut of Penske informing him that the Department has approved the Remedial Action Plan (RAP)/HypeAir Work Plan prepared by his Consultant, Groundwater & Environmental Service (GES) for the subject site; specifically two in-situ chemical oxidation events at the site via "HypeAir" air and Hydrogen peroxide injection system. The Department requires that due to the proximity of existing utility corridors, temperature, pH, pressure, oxidation-redox potential (ORP), conductivity and dissolved oxygen (DO) shall be monitored on all the monitoring wells. Any potential accumulation of vapors during the injection activities shall be avoided. (Sun) 02/21/06: Sun received 4th Quarter 2005 Site Status Update Report. Review of this report is pending. (Sun) 02/27/06: The Department approves the GES's request for two (2) additional injection events to be completed in April and May 2006; specifically two in-situ chemical oxidation (Chem-Ox) events at the above referenced site utilizing a hydrogen peroxide, ozone, and persulfate injection system (HypeAir). (Sun) 07/23/07-Sun: On 07/23/07 the Department approves the GES's request for performing enhanced product recovery through the injection of surfactant into MW-5. The Department also approves a series of high intensity targeted (HIT) remediation events using high vacuum extraction at monitoring wells MW-3, MW-4, and MW-5 to reduce residual hydrocarbons impacts on-site for 8-hour events for approximately four (4) months. (Sun) 08/09/07-Sun: On 7/18/07 Joe Sun of DEC was informed by Kevin Heaphy of Parson Brinckerhoff America (PB) that the MTA will be using this site (Lot 60) and the adjacent Fed Ex lot for a mocking pit to build the initial shaft for Tunnel boring machine to be used for the No. 7 subway extension project. In general, the site is slated to be used as a staging area for the project. A meeting was held on 8/9/07 to discuss project among all the key parties, including DEC, MTA, NYCT, Developer, Parson Brinckerhoff (PB), Penske, property owner (Michael Silvermintz) and Penske's consultant, GES. The meeting concluded that PB will first review the GES's investigation and remediation reports and then will discuss with GES and MTA project team to assess if other viable remedial action plans (RAP) can be implemented to expedite the cleanup process. Any new proposed RAP will be submitted to DEC for review and approval. (Sun) 08/23/07-Sun: Sun received 2nd Quarter 2007 Site Status Update Report. Based on laboratory analytical results, a 64 reduction of dissolved benzene, toluene, ethylbenzene, and total xylenes (BTEX) concentrations has been observed on and off-site since initiating hydrogen peroxide and ozone injections at the site. (sun) 08/30/07: Sun received the following email from Heather Cloud of GES

"Joe, Penske and GES submitted all historical documents to Kevin Heaphy for his review. He reviewed the documents and we had a follow up call with him and the MTA this past Monday (8/27). During the call, Kevin brought up a suggestion of relocating the wells off-site or installing remote access points in the sidewalk. As discussed at the NYSDEC meeting, we told Kevin that that locating the wells offsite was not an option, and installing remote access points in the sidewalk could not be sufficient for our liquid level measurements and groundwater sampling activities. Additionally, there is a high pressure gas main in the sidewalk, so we would not be able to drill safely in this area. They did not have any additional suggestions or ideas beyond relocating the wells. (Sun) Since they did not have any additional suggestions, it was decided that GES is going to proceed with our approved work plan. We are actually scheduled to conduct our surfactant injection on September 5 and the high vacuum extraction events on the 6th and 7th. Once we get the data back from the first event, we will evaluate the effectiveness and move forward from there." (Sun) 11/19/07-Sun: Sun received the following email from Heather Cloud of GES, "Hi Joe, We conducted the Surfactant Injection at MW-5 on September 5, 2007 followed by a high vacuum extraction event on September 7, 2007 to remove and recover residual product at MW-5. Since conducting the injection event, we have not seen any product at MW-5. Groundwater data at MW-5 prior to the injection (July 3, 2007) was 489 ppb BTEX (144 ppb benzene). Following the injection (October 12, 2007), groundwater data at MW-5 was 87 ppb BTEX (66 ppb benzene). Since the injection event, we have conducted 2 high vacuum extraction events on MW-3 and MW-4. These events were completed in September and October. Between the 2 high vacuum extraction events, we have recovered 5 pounds of mass and 1,300 gallons of water. We were at the site today and are at the site tomorrow to complete our 3rd high vacuum extraction event on MW-3, MW-4, and MW-5. The 3rd QTR Site Status Update Report is currently being reviewed by the client, so you should have it shortly." (Sun) 02/15/08-Sun: DEC received the following email from Andrew Cullen of Penske, "All, After much review, we have come to the conclusion that we will make an attempt to meet the requirements of the contractor and complete the necessary remediation work required by the NY DEC on two Saturday's per month. However, I need all the parties to understand that our agreement specifically states we need 2 to 3 days per month to perform the necessary remediation. Limiting us to only two days per month may cause the remedial efforts to go past our original estimates. Moreover, MTA also agreed to reimburse Penske for "any premium costs associated with work that must be scheduled outside of normal working hours (i.e. Monday to Friday 8:00am to 5:00pm)". If at any time we find the contractor is not cooperating, our remedial efforts will require more than 2 days per month, or any invoices for premium costs or damage by the contractor are not paid in accordance with our agreement, we will alert the appropriate parties. I do not anticipate this happening, but given the events that have lead us to this point, I feel compelled to remind everyone of the terms and conditions of our agreement." (Sun) 03/04/08-Sun: Sun sent the following email to all the parties involved, "Penske may have to conduct remedial efforts more often than 2-3 days a month if project demands. The required frequency and nature of remedial efforts will depend on results of on-going remediation to be received in future. If current extraction method does not produce acceptable (to the NYSDEC) results, DEC reserves its rights to require Penske to undertake more aggressive remedial efforts. NYSDEC is not a party to any of the agreements between Penske and MTA, and reserves all rights under the existing Laws and Regulations." (Sun) 03/25/08-Sun: Sun received the 4th Quarter 2007 Site Status Update Report. (Sun)

Remarks:

CALLER RESPONDED TO ABOVE LOCATION TO REMOVE FUEL TANKS. UPON REMOVAL SOME SOIL CONTAMINATION DISCOVERED. TANKS REMOVED AND SOIL EXCAVATION IN PROGRESS. NO CALL BACK REQUESTED.

EPA Region: 02
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler accessibility indicator: Transferred to the program or state equivalent.

Handler Activities Summary:

U.S. importer of hazardous waste: Unknown
Mixed waste (haz. and radioactive): Unknown
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: Unknown
Furnace exemption: Unknown
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Historical Generators:

Date form received by agency: 07/14/1999
Facility name: PENSKE TRUCK LEASING CO L P
Classification: Small Quantity Generator

Date form received by agency: 10/21/1986
Facility name: PENSKE TRUCK LEASING CO L P

(212-564-2006) saying that he hired a company to work on the tank. If it can be fixed, it will be. If not, it will be abandoned. 5/2/2005 Sangesland spoke to Mr. Usdan. He said PTC found a dry leak in the vent line and replaced the line. Tank was retested and passed, no contamination was visible. Sangesland asked Mr. Usdan to submit all of this in writing to DEC. 5/5/2005 Sangesland received a letter from MarkSalamack at Petroleum Tank Cleaners. Tank was originally tested and failed by another company. PTC emptied the 1500 gal tank, isolated the lines and the stickline and vent line were found to leak. The gasket was replaced and then the tank was tested alone and passed. All necessary piping was replaced and no contamination was found. Spill Closed

Historical Generators:

Date form received by agency: 10/21/1998
Facility name: EVERGREENE PAINTING STUDIOS
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Facility Has Received Notices of Violations:

Regulation violated: Not reported
Area of violation: Generators - Pre-transport
Date violation determined: 05/23/2007
Date achieved compliance: 07/20/2007
Violation lead agency: State
Enforcement action: WRITTEN INFORMAL

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Actual: RCRAInfo is a national information system that supports the Resource
13 ft. Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

Used oil processor: No
 User oil refiner: No
 Used oil fuel marketer to burner: No
 Used oil Specification marketer: No
 Used oil transfer facility: No
 Used oil transporter: No
 Off-site waste receiver: Commercial status unknown

Historical Generators:

Date form received by agency: 07/08/1980
 Facility name: ADMIRATION GLOBE FUR DYEING CORP
 Classification: Not a generator, verified

Hazardous Waste Summary:

Waste code: U122
 Waste name: FORMALDEHYDE

 Waste code: U123
 Waste name: FORMIC ACID (C,T)

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 12/06/1983
 Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
 Area of violation: Not reported
 Date achieved compliance: Not reported

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking

environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D005
Waste name: BARIUM

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "VOUGHT"
01/05/90: (6) MONITORING WELLS INSTALLED,OIL TANKS BEING TESTED BY CONTRACTORS(TRINITY & FENLEY & NICOL), ALL TANKS PUMPED & CLEANED, REPAIRING WATER MAIN. 10/10/2003-Vought-Spoke with LaJuana Smith (works for Clinton Housing-212-967-1644) and she is looking to resolve spill). In Nov 1996 DEC required further work from DEC. Ms Smith will call back on Wed for current site status and will possibly submit FOIL request upon her discussion with bank. 10/17/2003-Vought-File review by Vought: Community Board 4 Meeting Notice-2/21/90-Meeting held with DEC, NYFD, NYPD, DCA and NYCDEP to discuss current status and plans of site. Fax to DEC from Gaseteria-2/22/90-Pedneault Associates (516-467-8477)-Groundwater analyticals from six monitoring wells and two soil disposal piles (no site plan in file). Groundwater analyticals show 275ppb benzene(W1), 341ppb benzene(W2), 327ppb benzene(W3), 448ppb benzene(W4), 158ppb benzene(W5) and 128ppb benzene(w6). Disposal samples show 1433ppb benzene(east pile) and 188ppb benzene(west pile). Groundwater analyticals-5/21/90-Pedneault Associates-Groundwater analyticals from six monitoring wells (no site plan in file). Groundwater analyticals show 2308ppb benzene(W1), 1091ppb benzene(W2), 680ppb benzene(W3), 385ppb benzene(W4), 736ppb benzene(W5) and 810ppb benzene(w6). Subsurface Investigation-7/90-Environmental Management Services. "In Jan 1990 a subsurface water line broke beneath 10th avenue near the northwest side of the

GASETERIA (Continued)

1001482964

site. Water entered the basement of the adjoining building along with some gasoline." DEC required installation of six monitoring wells on Gaseteria property. Gasoline vapors detected in sewers in building across 10th Avenue. This subsurface investigation consisted of eight soil borings and installation of two additional monitoring wells. Three pump islands serviced by 12 (550-gallon) gasoline USTs and one (2000-gallon) diesel UST. Local topography slopes to the north. Groundwater at depth of 7-9' below grade. Bedrock is 7-11' below grade and slopes downward toward the northwest and southwest corners of site. Groundwater "suspected to flow northward". Allwells onsite were set "firmly on bedrock" and "there is not sufficient information available to determine specific groundwater flow". No free product detected in wells. Groundwater appears to flow from 10th Ave towards the USTs. Report recommends groundwater monitoring with possible additional delineation. No soil samples submitted for analysis nor were screened via PID. Letter from DEC to Gaseteria-7/12/90. Letter from DEC (Sigona) to Gaseteria (Oscar Porcelli) requesting subsurface investigation work plan to be approved by the DEC to investigate the presence of gasoline vapors. Plan must be received by the DEC by 7/17/90. Odor complaints in January 1990 and again in July 1990. Sigona performed site visit on 7/13/90. Fax to DEC-7/17/90. Letter from Environmental Management Services to DEC (Sigona) proposing: 1) investigation of subsurface utilities as potential pathways 2) determination of groundwater flow direction 3) groundwater monitoring 4) installation of six soil borings along western margin of station and installation of two additional monitoring wells. Letter from DEC to Gaseteria-1/5/95. Letter from DEC (Sigona) to Gaseteria (Angel Chang) requiring "cleanup and removal of discharge". Letter also required immediate steps to abate seepage into basement of 403 W 40th Street. Response from Gaseteria required to DEC by 1/15/95. Letter from Gaseteria to DEC-1/20/95. Letter from Gaseteria (Chang) to DEC (Sigona) stating that Gaseteria will: 1)"divert the flow of surface water away from the south wall of the building" 2)install a SVE system in the basement alongside of the south wall between the concrete floor and the building foundation. Gaseteria does not believe "there is a need to install new groundwater monitoring wells or to further develop existing wells.....since the problem appears to be surface related". Sample analyticals from basement of 480 10th Ave-8/96. Soil analyticals show 20664ppb ethylbenzene(sample 48334), 59164ppb xylene(sample 48334), 11000ppb naphthalene(sample 48334). Letter from DEC to Gaseteria-9/10/96. Letter from DEC(Rommel) to Gaseteria(George Esayan). "DEC in possession of analyticals from Clinton Housing(403 W. 40th Street)". Gaseteria required to sample two of the onsite monitoring wells for 8021/8270/lead. Letter from Clinton Housing Development Company-9/11/96. Letter from Clinton(Joseph Tuana) to DEC(Rommel) with copies of analyticals discussed above. Letter from Carl Sulfaro (attorney for Gaseteria) to DEC (Rommel)-9/20/96. Letter stating that Sulfaro "authorized EMS Environmental Services to take two samples of the onsite monitoring wells". Samples will be taken 9/27/96. Groundwater analyticals-10/10/96. Analyticals from MW5 by EMS showing 42.56ppb methylene chloride, 5549ppb benzene, 107.33ppb toluene, 1024.75ppb ethylbenzene, 393.15ppb xylene and 0ppb MTBE. Letter from Clinton(Kathy Prioleau) to DEC(Rommel)-11/11/96. On 10/27/96 "strong fumes entered basement of 480 10th Ave". NYFD onsite. Letter requests that DEC relay information on "testing done at Gaseteria and UST inspection of Gaseteria". Letter from DEC(Rommel) to Gaseteria(Sulfaro)-11/25/96. Letter stating that requirements of fax dated 9/10/96 were not met because only one well was sampled and 8270/Lead analyses were not performed. Letter requires: 1)submittal of an investigation plan to delineate soil and groundwater contamination 2)source determination 3)installation of three additional monitoring wells 4)installation of an air sampling port on the exhaust line of the venting system and monthly sampling for benzene and THC. Letter states

GASETERIA (Continued)

1001482964

that "action must be taken within 45 days". Letter from DEC(Rommel) to Prioleau(Clinton)-11/26/96. Letter stated that "DEC was never notified" of odor complaints as 11/11/96 letter stated. Also attached to letter was copy of 11/25/96 letter from DEC to Gaseteria. Letter from Gaseteria(Sulfaro) to DEC(Rommel)-1/15/97. Letter stating that Gaseteria "would prefer to perform site investigation, soil removal and/or remediation as needed concurrent with excavation anticipated as part of Federal EPA UST upgrade mandate" and the work is expected to take place in "Spring 1997". Letter from DEC(Rommel) to Gaseteria(Roberto Porcelli)-7/29/98. Letter "serving as final notification of obligations regarding petroleum contamination and vapor incidents". On 6/28/03 petroleum contaminated groundwater infiltrated basement of 480 10th Ave due to heavy rains. This is the "seventh vapor complaint associated with Gaseteria since Jan 1990". Letter states that the "Department is allotting 30 days for Gaseteria to satisfy all requirements in DEC letter dated 11/25/96". Deadline of 8/31/98 given by DEC. Letter from Gaseteria(Seth Friedland) to DEC(Rommel)-8/13/98. Letter stating that "the June 1998 episode was caused by heavy rains and appears to be an isolated event" and that Gaseteria does not agree with Departments conclusions". Letter stated that the station will be taken out of service on 9/15/98, permanently close the USTs and reinstall upgraded USTs on the northern boundary of the site. Letter from DEC(Rommel) to Gaseteria(Roberto Porcelli)-8/28/98. Letter serving as a "reminder of 8/31/98 deadline". Letter from Gaseteria(Oscar Porcelli) to DEC(Rommel)-8/28/98. Letter stating that new USTs were ordered and that work will start the second week of September. Gaseteria intends to install four monitoring wells to replace those destroyed by station upgrade and will retain Environmental Management services to develop remedial plan. Letter from DEC(Rommel) to Gaseteria(Oscar Porcelli)-8/31/98. Letter confirming phone conversation where an agreement was reached that Gaseteria will comply with following requirements and complete the tank upgrade prior to 9/30/98. Letter also required that a workplan be submitted prior to 9/4/03 which included 1)complete delineation 2)soil and groundwater sampling plan for use during excavation activities 3)sampling of SVE emissions 4)installation of three monitoring wells into bedrock and 5)cleaning and proper disposal of oil in the building floor drains and all associated discharge points. Letter from Camin Cargo Control(Gaseteria's Enviro consultant) to Gaseteria-10/5/98. Letter from Camin(Patricia Badding) stating that a site investigation and report shall be prepared. Investigation with Geoprobe and subsequent insallation of monitoring wells scheduled for 10/16/98. Soil samples will also be collected during excavation for new USTs. Venting system emissions will also be sampled. "Cleaning and proper disposal of any oil in the building floor drains and all associated discharge points is the responsibility of Gaseteria". Letter from DEC(Rommel) to Gaseteria(Oscar Porcelli)-10/8/03. Letter acknowledging receipt of Camin 10/5/98 proposal and requiring the following by 10/13/98: 1)Site plan with proposed boring locations 2)discussion of locations 3)discussion of endpoint sampling locations from UST excavation 4)discussion of delineation procedure 5)include MTBE with analyticals 6)collect groundwater samples from Geoprobe locations. Letter from Camin(Badding) to DEC(Rommel)-10/13/03. Submission of 1)site plan with ten boring locations 2)Collection of six endpoint soil samples from UST excavation 3)excavation and disposal of contaminated soil encountered during tank installation 4)Inclusion of MTBE analyticals 5)collection of groundwater samples(if encountered). Investigation Results from Camin(Badding) to DEC(Rommel)-11/6/98. Results of eight soil borings performed. Soil analyticals show 2149ppb MTBE(SB1), 526ppb benzene(SB2), 188ppb benzene(SB4), 212ppb benzene(SB5), 4576ppb MTBE(SB6), 1458ppb benzene(SB7), 29114ppb naphthalene(SB7), 187ppb benzene(SB8). Groundwater analyticals show 1239ppb benzene(SB4), 1975ppb benzene(SB5), 5360ppb benzene(SB6). Subsurface Investigation Report Camin Badding

1001482964

908-523-0616 10/16/98). Investigation report including results above of eight soil borings performed. "There is approximately 2-4 inches of contaminated soil at the soil/bedrock interface in soil boring locations SB2, SB4, SB5, SB7 and SB8. Bedrock at depths of 6-11.5' below grade". "A sheen was detected on all samples"(groundwater). Venting system was samples on 12/11/98 via a vacuum canister attachment to vent. Removed dispenser island is the proposed location of new USTs. See analyticals above. Venting analyticals show 264ppm TPH and no other volatiles. Baseline Acquisition Assessment Report-10/10/02 Delta Environmental (Brad Fisher). Purpose was to establish baseline conditions prior to proposed lease and raze and rebuild of site by BP. One soil borings performed in 4/02 to depth of 11.5'. Two borings drilled to 24.5" via air rotary and converted to temporary monitoring wells (MW1 and MW2). Delta recommends 1)gaseteria install permanent monitoring wells to delineate contamination. "It is Delta's understanding that Gaseteria will retain the environmental liability of the subject site until spill closure has been obtained". At time of assessment three USTs on site (two 6000-gallon gasoline USTsand one 6000-gallon diesel UST) and four pump islands with six dispensers. Surrounding area is multiple story apartment buildings. "Groundwater is located within bedrock fractures at depths between approximately 12.5 and 13.5 ft bgs". Former USTsonsite which were CLOSED IN PLACE include two (6000-gallon) gasoline USTs in 1998 , one 6000-gallon diesel in 1999, ten 550-gallon gasoline USTs in 1998, one 550-gallon waste oil in 1998 and one 550-gallon fuel oil in 1996. Soil analyticals show 4570ppb xylenes(SB1) and 3970ppb isopropylbenzene(SB1) from depths of 10-11.5'. Groundwater analyticals show 148ppb benzene(MW1), 24800ppb MTBE(MW1) and 30.7ppb benzene(MW2). 10/21/2003-Vought-Reviewed site with DEC(Rommel). Sent Stipulation Agreement with the following requirements: 1)Groundwater delineation via installation of bedrock monitoring wells at former boring locations SB1, SB4, SB5, SB6, SB7 2)Monitoring of vapors and groundwater intrusion 480 10th Ave 3)current status of SVEsystem and submittal of historic and current SVE effluent samples for benzene analysis or collection of indoor air samples from 480 10th Ave. 10/24/2003-Vought-Called LuJuana Smith (212-967-1644) and left message and explained requirements of 10/21/03 letter. 10/27/2003-Vought-Received message from Steve Muller will be taking indoor air samples from 480 10th Avenue. Vought returned call to Muller (516-395-5957). 10/28/2003-Vought-returned call to Steve Muller to discuss indoor airsamples. Left message to return call to DEC. Left message for LuJuana Smith to call DEC. Vought spoke with Muller and okayed PID and stated that SUMA sample as per NYSDOH guidance was not necessary until 1)closure of SVE system or 2)PID indications of petroleum vapors followed by subsequent remediation. Vought also instructed Muller to check sumps. Vought spoke to LuJuana Smith who will be sending in FOIL Request for continuous updates on site. Vought also called Muller and gave him LuJuana's phone (212-967-1644) for access arrangements. 11/6/2003-Vought-Spoke with Steve Muller who was onsite. No PID readings and no olfactory evidence of petroleum and no groundwater infiltration into basement and no product in sump. Muller will produce summary letter and send to DEC. 11/7/2003-Vought-Received Summary Letter from Applied Geosolutions(Muller). Site visit performed on 11/6/03 and inspection of basement at 480 10th Ave. "AGS observed no olfactory detection of odors or vapors consistent with hydrocarbons related to gasoline". PID readings of 4.8ppm were attributed to moisture in basement. Small amount of standing water present near leaking hose. No signs of product in sump. Vapor abatement system nonoperational during site visit. Photos of basement submitted with report show no free product or petroleum impact. 11/24/2003-Vought-Received signed STIP from Adam Good(Gaseteria) with revised Corrective Action Plan. 11/26/2003-Vought-Spill transferred from Rommel to Vought. Vought received call from LuJuana Smith and she requested update. Vought faxed her copy of 11/7/03 report and letter sent

GASETERIA (Continued)

1001482964

to Gaseteria on 10/21/03. Vought submitted STIP for implementation to DEC Kunkel. 12/2/03-Vought-STIP implemented by Kunkel. Copy sent and faxed to Good and Muller. 12/17/2003-Vought-See closed spill 0301220 at same location. 9/14/04-Vought-New file review by Vought: Letter from Applied Geosolutions (Steven Muller 516-395-5957). "On November 6, 2003 Applied Geosolutions inspected the basement of 480 10th Avenue to perform vapor monitoring and to identify the presence of groundwater". "During the inspection AGS observed no olfactory detection of odors or vapors consistent with hydrocarbons related to gasoline. The air space was monitored with a portable PID indicating a measurement of 4.8 ppm... This detection is likely the result of low atmospheric pressure followed from periods of rain causing the basement to be damp." The basement floor did not indicate the presence of groundwater...". Line and Dispenser Upgrade Report (Delta Environmental Brad Fisher 914-765-8180). "This Line and Dispenser Report summarizes the results of pump island and product piping upgrade assessment activities conducted by Delta Environmental and Gasoline Installations on behalf of BP Products North America". Work performed included the removing and installing new spill containment boxes beneath each dispenser, removal and replacement of product piping and installation of electronic line leak detection systems. Soil analyticals only show minor TAGM 4046 SVOC exceedences attributable to fill. Subsurface Investigation Workplan (Applied Geosolutions)-July 2004. Bedrock at depth of 10' below grade and groundwater at depth of 12.5-13.5' below grade. Report proposes installation of four wells via air rotary followed by groundwater sampling. Groundwater flow direction not determined as of yet. 9/14/04-Vought-Sent letter to Gaseteria approving of Subsurface Investigation Workplan. Vought received message from Lujanna Smith (212-967-1644) and returned call. Vought spoke to Smith and no indication of vapors was noted. Ms. Smith requested info on the applicability of the BCP program for 480 10th Avenue and Vought replied that was only available if HPD was willing to take responsibility of the spill and that she should call Albany for further information. Vought also suggested that she return the call to DEC on 11/14/04 which is when the workplan results are due to DEC. 9/17/04-Vought-Received fax from Applied Geosolutions (Muller). "466 10th Avenue-AGS is currently getting drilling quotes and will complete the Workplan within the 60 day time frame". 1/6/05-Vought-Reviewed Subsurface Investigation Summary Report (Applied Geosolutions) dated December 2004 and received on 1/3/05. Location north of USTs not possible due to concrete with rebar. Installation of three monitoring wells. Groundwater from 7-11' bgs and flow to the west. Groundwater analyticals show 48ppb xylene(MW1), 13ppb 1,2,4-trimethylbenzene(MW1), 17ppb 1,3,5-trimethylbenzene(MW1), 26ppb naphthalene(MW1), 1400ppb MTBE(MW1), 23ppb MTBE(MW2), and 20ppb MTBE(MW3). "The existing groundwater monitoring wells should be monitored on a monthly schedule and sampled on a quarterly schedule to document changes in groundwater elevation and contaminate concentration trends in order to develop and appropriate remedial strategy". DEC requires: 1) installation of monitoring wells on West 37th Street north northeast of site and downgradient from abandoned tankfield along 10th Avenue. 1/19/05-Vought-Meeting at DEC with ASR Tomasello. Will examine possibility of borings across 10th Avenue (may not be possible due to utilities) and also onsite adjacent to 480 10th Avenue. If onsite boring adjacent to 480 10th Avenue is not possible then boring will be installed on 37th Street. 2/17/05-Vought-Spoke to Muller and site visit scheduled for 2/24 at 10am to discuss possible well installation locations. 2/24/05-Vought-Site meeting with ASR Tomasello and no borings possible across 10th Avenue. Well will be installed onsite under canopy downgradient of abandoned tankfield. Well will also be installed on West 37th Street north northeast of site. Obligado- SITE TRANSFERRED FROM VOUGHT TO OBLIGADO 10/12/05 - Spoke with Tomasello ASR, requests to talk about closure for sp0206783. 10/17/05- Obligado - File

1001482964

Review: Final Subsurface Investigation Report, dated June 2005. 4 monitoring wells installed at the site. Wells were installed into Bedrock down to 25 ft bgs. 3 wells installed in December 2004, one additional well installed in March 2005. Groundwater encountered at approximately 7 to 11 feet. No product encountered. Initial gw samples in Dec. 2004 show ND for Benzene in all wells, 1400 ppb MTBE (MW-1), 23 ppb MTBE (MW@), 20 ppb MTBE (MW-3), 48 ppb Xylene (MW-1). March 2005 gw results show 140 ppb benzene (MW1), 2100 ppb MTBE (MW-1), 26 ppb benzene (MW-3), 16 ppb MTBE (MW-3). June 2005 results show 45 ppb benzene (MW-1), 11 ppb Ethylbenene (MW-1), 750 ppb MTBE (MW-1), 52 ppb benzene (MW4), 10 ppb toluene (MW-4), 170 ppb Napthalene (MW4), 55 ppb MTBE (MW4), 193 ppb xylenes (MW-4). 4Q05 Monitoring Report, dated 10/15/05. Ground water analyticals at show 20 ppb benzene (MW-1), 580 ppb MTBE (MW1), 23 ppb MTBE (MW-2), 21 ppb benzene (MW-3), 15 ppb MTBE (MW-3), 16 ppb benzene (MW-4), 52 ppb ethylbenzene (MW-4), 140 ppb MTBE (MW-4). 11/14/05 - Obligado - Site visit with ASR Tomasello. Request to see at least 2 more quarters of monitoring at a minimum. 12/8/05 - Obligado - Will do a sensitive receptor survey. Continue monitoring. Only 2 quarters of data at MW4. 3/1/06 - Obligado - PPhone call with Chris/STeve, ask that site be monitored quarterly not monthly. 4/12/06 - Obligado - review 1Q06 monitoring report. BTEX ND to 33 ppb, MTBE ND to 800 ppb. 11/21/06 - Obligado - Reviewed Closure Petition/Sensitive Receptor Survey. Sent email to ASR denying NFA stating the following: "Due to historical vapor issues in the adjacent apartment, and the presence of benzene above guidance levels in ground water, the Department requires laboratory analyzed vapor samples from either the slab slab system (if operational) or indoor air samples to confirm no vapor intrusion. The Department also requires an additional round of ground water monitoring to confirm benzene and MTBE levels are still decreasing. NYSDOH Vapor Intrusion Guidance should be followed when collecting air samples available at http://www.health.state.ny.us/environmental/investigations/soil_gas/svi_guidance/index.html. Please submit the results of the additional investigation by January 21, 2007." 12/1/06 - Obligado - Steve Muller will be onsite today to collect additional data.

Remarks: GASOLINE ENTERED BUILDING 478 10TH AVE & SEWER SYSTEM, (3) OFFICE BLDGS (475, 478, 483 10TH AVE) EVACUATED, EXPLOSIVE CONDITIONS IN SEWER, DEC & LOCAL AGENCIES ON SCENE. (SIGONA)

Off-site waste receiver: Commercial status unknown

Historical Generators:

Date form received by agency: 08/10/2004
Facility name: TODAY VIDEO INC
Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "ROMMEL" 03/29/04 Transferred from James to Rommel 10/29/04 Reassigned from Rommel to Sun. 11/1/04 Sun sent a letter to Richard Saut, Environmental Manager of Penske, requiring by January 14, 2004 the following: 1) Delineation of soil and groundwater contamination. A subsurface investigation to adequately characterize site hydrogeology and to completely delineate the full extent of petroleum contamination to soil and groundwater both on-site and off-site must be performed. 2) A surrounding property sketch including layout and usage must be submitted to the Department, 3) The locations of former remote fills and dispenser island must be submitted to the Department, and 4) A PBS registration must be submitted immediately reflecting the former tanks and their subsequent decommissioning. 1/5/06: Called Richard Saut and left a message (610-775-6298) to ask for an update on what was required in 11/1/04 letter. 1/10/06: Spoke with Richard Saut and he said he would speak to his consultants and get back to me. 1/30/06: Left a message with Richard Saut to follow up. 3/15/06: Spoke with Matt of Groundwater Environmental Services (631-582-4187 x15, mschieferstein@gesonline.com). I sent him a copy of the additional delineation letter that was sent to Hertz. 5/19/06: Left voice message with Matt Schieferstein about overdue workplan. 6/21/06: Spoke to Matt Schieferstein of GES. Penske is doing research on this site and has not authorized GES to do any work. Spoke to Richard Saut of Penske. Richard Saut said that Hertz is responsible for this spill and forwarded DEC's letter to Virginia Carlson of Hertz. He forwarded me the correspondence between him and Virginia Carlson. 7/19/06: Sent Virginia Carlson an email to followup. 8/10/06: Owner according to propertyshark.com: 500 West 38 L.L.C. 290 Park Ave S New York NY 10010-5313 Sent delineation required letter to above address. Assessment required by 11/10/06. 8/16/06: Received phone call from Mindy Horowitz (212-675-3225) of Fleming Lee Shew, consultant for property owner. She will submit a workplan for remediation after a FOIL request is reviewed. 8/17/06: Received email from Mindy Horowitz: We will begin our remedial investigation upon reviewing the previous investigations conducted at this site. We are simultaneously performing an investigation for the New York City Department of Environmental Protection, as this site has an "e" designation. Mindy Chassin Horowitz Project Manager Fleming-Lee Shue, Inc. 6 E32nd Street, 4th Floor New York, NY 10016 (212) 675-3225 (telephone) (212) 675-3224 (fax) mindy@flemingleeshue.com 11/6/06: Received and approved investigation workplan. Four soil borings will be performed surrounding the former UST location. A soil sample from directly below the floor and from the interval with the highest PID reading will be collected from each boring. The report noted the possible presence of a transformer and hydraulic lifts on the property. 11/14/06: Received call from Fleming Lee Shue. Soil borings installation is not possible because clearance in basement is too low. Borings will be installed following building demolition in early 2007. 12/4/06: Received letter indicating that delineation is not possible, will occur in early 2007 after building demolition. Assessment report submission due 3/30/07. 4/3/07: Emailed Mindy Horowitz to followup on site status. 4/12/07:

Received email from Mindy Horowitz: "We have contacted our client to ascertain when the building will be demolished, allowing us to install the proposed soil borings. I will let you know as soon as I've heard something. Please call me with any questions." 5/2/07: Received email from Matthew Carroll: "The building at 493-497 Tenth Avenue is scheduled to be demolished next week, May 7 through May 11. The following week we will be conducting a site walkover to determine what type of drill rig we can use to collect the required samples around the tank. I will contact you when we have scheduled the sampling event." 5/24/07: Left phone message for Mindy Horowitz to followup on site status. 6/4/07: Spoke to Matthew Carroll (matthew@flemingleeshue.com, Fleming-Lee Shue, Inc. 158 West 29th Street, 9th Floor, New York, NY 10001, T: 212-675-3225, F: 212-675-3224). Building was demolished. The subbasement has not been cleared. He is waiting for the sub basement to be cleared to identify tank location, and sample. 7/30/07: Spoke to Matthew Carroll. Slab has not been removed yet. Site will be excavated to bedrock, and then 10-15 ft of bedrock will be removed. Endpoint samples will be collected, and the presence of bedrock fractures will be noted. 9/5/07: Emailed Matthew Carroll for an update on demolition and investigation. 9/11/07: Received email from Matthew Carroll, site is being excavated, soil samples will be collected. Sent letter requiring endpoint bottom samples for every 900 square ft, and sidewall samples for every 30 linear ft. 9/13/07: Spoke to Matt. Three endpoint samples will be collected on Monday. Ten to 15 ft of bedrock will be removed. Groundwater has not been encountered below portion of site where the bedrock has been removed already. 9/18/07: Site inspection by DEC Kann, Feng, and Chandra. 3/27/08: Left voice message for Matthew Carroll. The final report is overdue. 4/9/08: Spoke to Matthew Carroll. He will submit a letter report with an update on site status. 5/20/08 - Carlson: Left voice message for Matthew Carroll.

Remarks:

LAB REPORT REVEALED HIGH LEVELS OF HYDROCARBONS BELOW TANK & IN EXCAVATED SOIL - PB LEVELS WERE ALSO HIGH - FLASH PT > 160 DEG F - SPILLER AGREED TO SUBMIT MORE INFO & REMEDIATE SITE IF NECESSARY.

DEC Memo: DEC Piper spoke w/ Charles Rose. Assistant to the principal. As per conversation, they were getting ready for winter and noticed a leak. When the janitor inspected found approx 200 gal in vaulted area. Spill is contained and in vault. PTC to respond today and pump out remaining oil and oil on floor. No drains, sewers effected. PTC to contact DEC upon completion of emergency cleanup. School is not in session and no children are present. Odors present in basement only and not in school. 9/11/06- DEC Piper spoke w/ Sister Kathleen, PTC had cleaned up emergency spill. Piper spoke w/ PTC, tank was above ground on concrete. Concrete was in good shape. School is going to replace tank. 6 drums of oil soaked speedy dry removed. Closed.
Remarks: TANK IS LEAKING IN THE TANK ROOM OF SCHOOL: CREW ENROUTE TO PUMP OUT TANK AND

DEC Memo: Sangesland spoke with Roux Assoc. Tank excavation with some spillage around tanks. (Tanks had been previously abandoned in place). Now tanks are being pulled. Sangesland asked for several end point soil samples taken from tank grave after removal. Test for VOC & SVOC. 3/16/2005 Sangesland reviewed a report from Roux Assoc. dated 3/9/05 On 2/18/05 Roux collected 6 post-ex samples. One per each side & 2 bottom VOC's - All samples contained low levels of VOC's, but they were ALL BELOW RSCO Stds. SVOC's - Some minor "Hits" on PAHs consistant with historical fill levels. Results show some contaminants exceed regulatory standards. Samples taken on removed (waste) soils showed much higher VOC & SVOC levels. Roux conclusionsays that the contamination "source" has been removed and the site should be closed out. Based on the soil sampling work performed on the site and the report prepared by Roux Assoc., the NYSDEC agrees with the conclusion and the spill case is closed with: "No Further Action - Does Not Meet Standards"
Remarks: REMOVING TANK, JUST AN ODOR IN THE SOIL: NOT SURE HOW TO MOVE FORWARD WITH PROJECT:

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead DEC Field was "SAWYER" 4/22/03 SAMUEL- RCVD TANK CLOSURE & SITE ASSESSMENT REPORT. CONTACT PERSON:- HUGH J FREUND 212 705 7000- ATTORNEY FOR THE MARY BOONE GALLERY (R.P) 2/9/06- DEC Piper spoke w/ LEE WESTCHOTT at Whitman CO. As per conversation there was free floating product discovered at the property. There is a monitoring well network. It has been recently sampled and Lee will forward a summary status report to the dept. including analytical summaries within the next month. Case referred to Koon Tang. 06/08/06: This spill transferred to S.Kraszewski. - SK 08/14/06: Received a voicemail from Ira Whitman, concerning the status of the site. He gave no callback number. SK reviewed the Tank Closure Report from Fall 2001. It is evident that high levels of VOCs were detected around the fuel oil UST. Lower exceedances were also found around the gasoline USTs and the Oil/Water separator. No mention if GW was encountered; the site lies next to the Hudson River so GW is probably shallow. No MWs were installed during the investigation. Must know the GW condition above all else at this point. - SK 08/15/06: Called Ira Whitman (732-553-4333) after he left a voicemail. He is no longer the consultant involved with this site, in fact he believes that no firm is involved at all. He was involved on a site project adjacent from this one: Dynamic Delivery was the contractor involved with the clean-up. He said this site already received an NFA. I said, based on the report, the GW condition must be established. He said it might be worth-while to review the reports from the neighboring site, which is also downgradient from this one (closer to the Hudson.) He said to contact a John Houshmand, of Clark Construction, who discovered the tanks during renovation work on the property. - SK 08/18/06: Left a message for John Houshmand (917-553-4333). - SK 08/22/06: John Houshmand called back. He gave me the contact info for Mary Boone, owner of the gallery. Gallery: 212-753-2929, Cell: 917-861-2929. She is not the property owner of the site, she only rents the space. According to John, contractor for the building and several others nearby, after the abatement of the gasoline tanks, fuel oil tank and sump pit the entire area was covered in concrete and established as the Mary Boone Gallery. He also mentioned the adjacent site which supposedly has GW wells and may be useful in characterizing the GW condition for this site. I told John I would look into this other site and get back to him, since he regularly deals with the owner. - SK 08/29/06: I discussed the site situation with JK. The site needs a GW investigation, unfortunately there is no access to the interior so the MWs need to be placed on the sidewalk next to the former gasoline USTs and oil/water separator pit. Also, a soil boring next to the gasoline fill port will be needed. I called John Houshmand (917-553-4333) and explained what work would need to be done. I also asked him for the property owner's contact info since it is not on file. He will find out, plus he asked about other consultants to do the work since The Whitman company had a falling out with Mary Boone. I said to convince her that he seems like a reputable company based on the report. Letter was sent out

asking for two MWs, a soil boring and sub-slab soilgas sampling. Property owner is a Samuel Weinberg. - SK 11/09/06: Reassigned from Stephen Kraszewski to Chanda. (Chanda) 01/02/07: Kartik Chnada of DEC sent a letter to Property Owner (Mr. Samuel Weinberg), requiring that an additional investigation of GW and additional monitoring wells at the site. A work plan is mandated by 03/02/07 for approval. 01/10/07: Chanda received an e-mail from John Houshmand, Clark Construction Corp. He said that the RP will be retained Long Island Analytical Laboratories (LIAL), Inc. to perform this work. 2/27/07: Chanda received a limited subsurface investigation work plan prepared by LIAL dated on 2/26/07. 2/28/07: Chnada reviewed the limited subsurface investigation work plan. on 2/28/07, the Department conditionally approves this work plan. On 2/28/07, Chanda sent a letter to RP (Samuel Weingberg) and his consultant (John Hushmand), Michael Veraldi (LIAL), requiring that an investigation summary report be submitted to DEC for review by April 16, 2007. 4/19/07: Chnada received a phone call from Michael Veraldi, LIAL concerning the status of the site. He explained to me the cause of the delay on the investigation work report. 4/23/07: Chanda received a letter from Michael veraldi, LIAL regarding an extension to complete the approved work plan at the site. 4/24/07: Chanda sent a time extension approval letter to the RP (Samuel Weingberg) and his consultant (John Hushmand), Michael Veraldi (LIAL). An Investigation Summary Report must be submitted to the Department by May 4, 2007. (Chanda) 5/24/07: Chanda called John Hushmand (Clark Construction Corp.) and Micheael Veraldi (LIAL) regarding the investigation Summary Report and present site status. Micheal told me all work has been done and he is waiting for analytical results. The report will be submitted to DEC for review by 5/31/07. 6/6/07: On 6/5/07, Chanda received a Limited sub-surface site investigation report prepared by LIAL dated May 30, 2007. 6/8/07: Kartik Chanda of DEC reviewed the limited sub-surface site investigation report regarding this spill. The soil samples, groundwater samples and soil vapor samples showed that results do not exceed our NYSDEC and NYSDOH guideline. Chanda discussed with Joe Sun (NYSDEC) regarding the results of soil, groundwater, and soil vapor samples. Based on the information presented to the Department DEC closed this spill case. 6/11/07: Chanda sent a NFA letter to Samuel Weinberg, Weinberg Properties and his consultants (John Houshmand, and Michael Vrraldi) regarding closed this spill case.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "TIBBE/SANGESLAND" 12/10/2002 Sangesland reviewed a report prepared by David Winslow of ATC Associates Inc (212-353-8280). Report states that contamination was found around a buried 1000 gal tank under the floor of the

Map ID
Direction
Distance
Elevation

MAP FINDINGS

Site

562 W 23RD ST/MANHATTAN (Continued)

S104275573

building. The tank was cleaned out and excavated around. Because of foundation issues, the tank could not be removed and not all of the contaminated soil could be removed. Based on the soil conditions, Sangesland requested groundwater samples from the area. ATC took four groundwater samples in the area of this tank. GW is at approx 8 ft below the cement floor level. 3 of 4 samples are clean. One has some VOC hits just over 8020. Based on the location and the inability to excavate further, and that the surrounding water samples were clean, we can conclude that the contamination is localized and not spreading. Spill closed

Remarks: CALLER STATES UPON REMOVAL OF THE UNDERGROUND TANK - FOUND HOLES IN THE TANK AND CONTAMINATED SOIL

DEC Memo: 02-22-05: NYCT was performing an overfill test of one of their diesel tanks to ensure that the Veeder-Root probe was operating correctly. When the truck hose was removed from the fill line, approximately 5 gallons spilled in the overfill bucket. The spill was contained by the bucket and clean by NYCT.

DEC Memo: Sangesland sent contaminated soil letter Curt Schmidt said that Mark Tibbe knows about a major spill site just upgradient from this site. 2/5/03 - TRANSFERRED FROM SAWYER TO ROMMEL 3/1/04 Reassigned from Rommel to K Foley. Spill RemediationPlan received 12/22/03 for removal of four 260gal gas USTs, one 500gal gas UST, and one 500gal no. 2 fuel oil UST. Site under development but once contained three buildings. A former auto service and plastic manufacturing existed on site. Five USTsfrom NW corner were removed 9/29/03 (four 260gal gas USTs and one 500gal gas UST). Soil excavation was postponed due to safety concerns. Will excavate and direct load for disposal. A minimum

of four post-ex samples will be collected at PID hot spots on each sidewall. DTW is 6'bgs and therefore a bottom sample will probably not be feasible. If there is potential for structural damage to the adjacent building, two soil samples will be collected from that sidewall. Two samples will be collected from sidewalls greater than 20' in length. Analysis by VOCs (8021) and SVOCs (8270). Spill #9704542 was previously reported for a fuel oil release from UST. Scaled site map with former tank locations/hot spots and Phase I and II reports. There have been site investigations and proposed remediation plans submitted for 543-547 West 23rd St (spill #8605848). There is documented fuel oil and gasoline contamination of groundwater associated with sites to the east that have encroached upon the site. Mendon Leasing, 527 W 23rd file(#9605688,9808740,9511782, 9513588). 3/22/06 Reassigned from Foley to Tang. (KMF) 4/3/06: Reassigned to Andersen. Three sources of contamination: Fuel oil leak from a UST in northeast corner. Gasoline leak from five USTs in northwest corner. Gasoline groundwater contamination from adjacent Mendon Leasing site. All six tanks were removed by Fleming Lee Shue (FLS). The tank closure report was not received. Spoke with FLS and they will resend areport that was sent to Albany. 4/7/06: Received and reviewed tank closure report. Soil was excavated from three areas of contamination. Residual SVOC contamination from urban fill and VOC contamination from the adjacent spill site is present. The site will be redeveloped with a vapor barrier. NFA letter sent.

Remarks:

CALLERS COMPANY PERFORMING EXCAVATIONS ON SITE, AND SOIL SAMPLES ARE SHOWING GASOLINE CONTAMINATION OF THE SOIL AROUND SOME UNDERGROUND TANK SITES ON THE PROPERTY

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "KOLLEENY"
TYREE REMOVED A 550-GALLON STEEL SINGLE-WALLED EMERGENCY GENERATOR DIESEL TANK.
SOIL HAD PETROLEUM ODOR AND SHEEN. CONTAMINATED SOIL WAS OVER-EXCAVATED AND
STOCKPILED; POST-EXCAVATION SAMPLES WERE TAKEN. J. KOLLEENY OF DEC
SPOKE WITH LAURIE JODICE OF TYREE ON 4/12/01; SHE WILL FORWARD COPY OF CLOSURE
REPORT WHEN AVAILABLE. ACCORDING TO LJ, MOST CONTAMINATION WAS REMOVED AND THE
SOIL LEFT IN THE PIT WAS RELATIVELY CLEAN. THE TANK LOCATION WAS VERY CLOSE TO
WHERE O'BRIEN-KREITZBERG IS INSTALLING AN SVE SYSTEM TO REMEDIATE GASOLINE
CONTAMINATION. KOLLEENY WILL FOLLOW UP TO ENSURE THAT RESIDUAL CONTAMINATION
FROM THE EMERG. GEN. TANK (IF ANY) IS ADDRESSED, EITHER BY THE SVE SYSTEM OR IN
SOME OTHER WAY. This spill is referred to spill # 9512583 and is closed
today by II (01/10/05).

 Quantity Recovered: 0
 Unkonwn Quantity Recovered: True
 Material: UNKNOWN PETROLEUM
 Class Type: UNKNOWN PETROLEUM
 Times Material Entry In File: 16414
 CAS Number: Not reported
 Last Date: 19940929
 DEC Remarks: TYREE REMOVED A 550-GALLON STEEL SINGLE-WALLED EMERGENCY GENERATOR DIESEL TANK. SOIL HAD PETROLEUM ODOR AND SHEEN. CONTAMINATED SOIL WAS OVER-EXCAVATED AND STOCKPILED; POST-EXCAVATION SAMPLES WERE TAKEN. J. KOLLEENY OF DEC SPOKE WITH LAURIE JODICE OF TYREE ON 4/12/01; SHE WILL FORWARD COPY OF CLOSURE REPORT WHEN AVAILABLE. ACCORDING TO LJ, MOST CONTAMINATION WAS REMOVED AND THE SOIL LEFT IN THE PIT WAS RELATIVELY CLEAN. THE TANK LOCATION WAS VERY CLOSE TO WHERE O BRIEN-KREITZBERG IS INSTALLINGAN SVE SYSTEM TO REMEDIATE GASOLINE CONTAMINATION. KOLLEENY WILL FOLLOW UP TO ENSURE THAT RESIDUAL CONTAMINATION FROM THE EMERG. GEN. TANK IF ANY) IS ADDRESSED, EITHER BY THE SVE SYSTEM OR IN SOME OTHER WAY.
 Spill Cause: WHEN TANK WAS REMOVED THERE WAS AN ODOR OF PETROLEUM. SEE DEC NOTES.

Assessment: Currently direct contact exposure are prevented since the site is covered with a building, pavement and landscaped areas. The proposed remedy calls for the removal of waste from landscaped areas and the continued maintenance of the building and paved areas. Soil gas and indoor air sampling showed no evidence of soil vapor intrusion. Public water is provided to the area, thereby preventing exposures to groundwater.

Env Problems: Con Edison completed a Site Characterization (SC) under the Voluntary Cleanup Program (VCP) in 2003. The SC identified residual MGP contamination at depth across the site, including heavily stained soils with some sheens and liquid coal tar. Based on the SC results, the NYSDEC has determined that the site poses a significant threat to the environment. Additional investigation of the former MGP is being conducted by Con Edison under the VCP as site number V00531. The remedy has been implemented and site management has begun. The

Site Desc: Department does not foresee any unacceptable impacts to the environment provided the Site Management Plan (SMP) continues to be implemented.
Formerly Site #V00531 The site is a portion of the former 42nd Street Manufactured Gas Plant (MGP), which operated from 1860 to the early 1920s. The site is currently occupied by the River Place I apartment building and a small park, bounded by 12th Avenue, 41st Street, 42nd Street, and a parking lot to the east. The site use is proposed to be continued use as a high-rise residential apartment building. The project is being jointly managed by Con Edison, the former operator of the MGP, and Silverstein Properties, the developer. Con Edison completed a Site Characterization (SC) under the Voluntary Cleanup Program (VCP) in 2003. The SC identified residual MGP contamination at depth across the site, including heavily stained soils with some sheens and liquid coal tar. Based on the SC results, the NYSDEC has determined that the site poses a significant threat to the environment. Additional investigation of the former MGP is being conducted by Con Edison under the VCP as site number V00531. Remedial Work has been completed onsite. The FER was approved and the COC was issued June 19, 2007. The final phase of the remedial project, site management, has commenced in accordance with the Department-approved Site Management Plan. The site was remediated according to an approved remediation work plan. It is now subject to ongoing institutional controls. Offsite impacts are being addressed through a separate voluntary cleanup agreement with Consolidated Edison.

MGP impacts are evident across the site. Remediation of the far eastern end of the site is being completed under the BCP for sites C231012 and C231024. The western portion of the site, under 12th Avenue appears to be impacted with coal tar NAPL. Continued investigation of these impacts is ongoing.

Site Desc: Transition Sites #C231024, C231012 The site is the location of the former 42nd Street Manufactured Gas Plant (MGP), which operated from 1860 to the early 1920s. The site is located on the city block bounded by 42nd St, 43rd St, 11th Ave, and 12th Ave. The former plant also extended west across 12th Ave and into what is now the Hudson River. The main part of the site, bounded by 11th and 12th Avenues has been separated out and has entered the Brownfield Cleanup Program as two separate sites, C231012 and C231024. Those sites are being jointly managed by Con Edison, (the former operator of the MGP) and Silverstein Properties, the developer. Con Edison completed a Site Characterization (SC) under the Voluntary Cleanup Program (VCP) in 2003. The SC identified residual MGP contamination at depth across the site, including NAPL along the east side of 12th Avenue. Based on the SC results, the NYSDEC has determined that the site poses a significant threat to the environment. Additional investigation of 12th Avenue and areas west of 12th Avenue are being pursued under a supplemental RI. Field work has been delayed by access limitations, and is still under way.

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead DEC Field was "TIPPLE"
01/20/95: DEC HIRED FENLY AND NICOL TO INSTALL A GROUNDWATER REMEDIATION SYSTEM
TO RECOVERY OIL IN GROUNDWATER ADJACENT TO LEAKING USTS. 2-10,000 GALLON #6 FO
TANKS FAILED TANK TEST. NEW ABOVEGROUND INST. Reassigned from Sigona to
Tipple on June 21, 2004. 8/19/05-Vought-Received call from Lin Jian (Chinese
consulate) regarding reception of fax from Tipple. Vought called back and left
message to refax. Vought received fax from Jian " I would like to remind you
that the metal covers of the manholes on 43rd Street have got uneven after
years of service...." "So we request your department to take immediate action
to replace them with new covers...". Vought called Bruce and left message to
return call to DEC. Vought spoke to Bruce, Bruce will send someone out and
repair. Bruce will send email after site visit. Vought called Lin and informed
him of upcoming National site visit and manhole repair.8/23/05 - Raphael
Ketani. Case transferred to Jeff Vought. 9/20/05-Vought-Contract Payment
Package (National)-Biweekly well monitoring and gauging. 10/3/05-Vought-File
review by Vought: Letter from DEC Tomasello to Milro (Milici)-4/21/94. Milro
contacted by DEC to perform emergency oil recovery. "In doing so approximately
400 gallons of oil was collected". "This yard specifically in respect to this
400 gallons of oil shall be exempt from part 360 and 373 storage
requirements...". Note from DEC Sigona-4/24/94. "3rd week in May determined
consulate as source..". Note from DEC Sigona-4/28/94. Consulate tank #2
(10000-gallon #6 fuel oil) failed tightness test. DEC took over cleanup of
sewer with Fenley and Nicol (F&N). Three monitoring wells installed in 5/2/94.
Meeting held with consulate on 5/8/94 and consulate agreed to installation of
recovery system in sidewalk. Analyticals from H2M Labs-Analytical of oil
sample from sewer shows 10800ppm fuel oil. Letter from H2M Labs
(Hopkins)-6/23/94. "Enclosed please find copies of the chromatograms you
requested.." from sewer manhole and tank excavation. "The petroleum
fingerprints obtained from the above samples most closely resemble that of a
#4 fuel oil." "Samples "sewer manhole" and well FN-2 appear to be most closely
related, as each sample contains just the #4 fuel oil". Haz Waste Disposal
Manifests from Milro-6/30/94. Monitoring Report (F&N)-June thru July 1994.
Weekly monitoring, bailing of free product. Recovery system is total fluid
ejectors, oil water separator and 275-gallon holding tank. Total recovered to
date is 1460 gallons of product. Letter from Clean Venture-8/26/94. "Please
be advised that United Parcel Service Inc of 643 West 43rd Street, New York,
New York has paid us in full for labor, equipment, materials and other costs
incurred during the 4/26, 4/27 and 4/28/94 spill cleanup". Monitoring Report
(F&N)-August 1994 thru September 1994. Same recovery system as above. Total
recovery to date is 765 gallons. Subsurface Investigation Report
(F&N)-9/1/94. "This investigation is being conducted as a result of the
detection of petroleum hydrocarbons in the basement of United Parcel Service
building across 43rd Street from the site". "The recovery system currently
consists of three total fluid ejectors installed in monitoring wells FN2, FN3
and FN4, an air compressor to power the ejectors and a 250-gallon oil water
separator and a 150-gallon holding tank." Groundwater at 8-10' below grade.
Pressure test was performed and leaking stick and suction lines were found.
Tops and sides of tank were heavily rusted. On 6/23/94 the cleaning of the USTs
was completed and they were ready for abandonment by filling with concrete

S101103245

slurry. A total of five monitoring wells were installed. Floating product was also recovered from sewer on 43rd Street. Groundwater flow to the north. Report recommends continuation of OM&M. Revised Subsurface Investigation Report (F&N)-9/1/94. "The report of #6 fuel oil by the NYDEP prompted an emergency response by the NYSDEC. The NYSDEC requested that UPS provide a contractor to investigate the condition of the sewer in an attempt to determine the source of oil. The investigation by UPS determined that the oil was entering the sewer between 11th and 12th Avenues. F&N then performed an extensive investigation of the fuel oil tanks in the basement of the Consulate General in the Peoples Republic of China". Letter from F&N (Porsche)-9/22/94. "As you requested F&N has attempted to make a determination of the point at which oil is entering the 43rd Street sewer at the above referenced site". Field crews have determined that the point of entry is approximately 40' feet east of the sewer manhole located at the intersection of 43rd Street and 12th Avenue" "...F&N believes that the installation of two additional ejectors are warranted". Letter from F&N (Porsche)-9/30/94. "...F&N is prepared to begin the following work: 1) Two additional wells will be installed at the Chinese Consulate site". One well will be upgradient and the other downgradient of the ejectors. Letter from OSC to Chinese Consulate-10/25/94. "An application for damage compensation has been filed by United Parcel Service.." Instructions attached to letter. Monitoring Report (F&N)-October 1994 thru December 1994. Same recovery system as above with a total recovery of 958 gallons of free product. Letter from F&N (Sehamy)-1/5/99. The following is a summary of the discussions during the meeting: "Install 4" monitoring wells in the vicinity of the wells containing ejectors. Install heater to expedite the removal of #6 fuel oil. Discontinue use of adsorbent pads in sewer area.." Letter from OSC to Chen Yong Kang (Consulate)-2/10/95. "...we requested that NYSDEC determine the nature and location of the work performed by the United Parcel Services' contractor." The purpose of the investigation was to verify the costs incurred by UPS for the cleanup. "If we have clearly verified that UPS's costs relate only to the offsite investigation and cleanup of the fuel oil spill originating at the Chinese Consulate". If oil spill compensation fund reimburses UPS for expensed, OSC will go after Consulate as responsible party. Monthly Monitoring Reports (F&N)-February 1995 thru December 1995. Total product recovered to date is 1791.25 gallons. Status Report (F&N)-July 1995 thru December 1995. Remediation system consists of five total fluid ejectors installed in monitoring wells FN2, FN3, FN4, FN6 and FN7, air compressor to power the ejectors, twelve monitoring wells, a 250-gallon oil water separator and a 275-gallon holding tank. OM&M consists of biweekly well monitoring and bailing of free product, monthly collection of wastewater effluent samples. Report recommends continuation of OM&M. Monthly Monitoring Reports (F&N) Jan 1996 thru June 1996. Total product recovered to date is 2616.75 gallons. Status Report (F&N)-Dec 1995 thru June 1996. Five fluid ejectors, twelve monitoring wells onsite. Report recommends: Site visit with vacuum truck to recover free product found well FN-9a and any other well detected with free product at the time of monitoring. Status Report (F&N)-December 1996. Same recovery system as above. "At the end of the period covered by this report, a total of 2890.75 gallons of free product was recovered". Groundwater at depth of 8' below grade and flow to the northwest. Report recommends: 1) continuation of free product removal via vacuum truck 2) steam injection in wells with product. Letter from F&N (Lorthior) to DEC Tomasello-3/18/97. On 3/17/98, F&N "implemented the second phase of the bioremediation program at the Chinese Consulate". "Twenty five gallons of MicroBac M1000H* bacteria was evenly distributed to wells" containing free product. 35 gallons of nutrients were then also injected into each of the six wells. "Monitoring of bacterial activity at the site will begin in April of 1998." Status Report (F&N)-June 1997. Five fluid ejector

onsite. Groundwater 8-10' below grade and flow to the northwest. OM&M consists of bimonthly well monitoring and free product recovery, monthly collection of effluent samples, recovery of free product from wells via vacuum truck. As of June 1997, 3617 gallons of free product was recovered from site. Report contains bioremediation proposal. "Concentrations for all the available months exceeded the wastewater effluent limits". Report recommends: 1) continuation of vacuum truck visits to recover free product 2) application of MicroBac and 3) treatment of effluent by activated carbon prior to discharge. Letter from F&N Abbasi to DEC Toamsello-8/6/97. Proposal for Micro Bac application. First bacterial application will be to reduce viscosity of easier recovery. Second bacterial application will be regular bacteria for hydrocarbon degradation. Letter from OSC to US Coast Guard-10/14/97. "Your review is necessary for the Fund to document that cleanup and removal activities are consistent with the National Contingency Plan" Letter from F&N Lorthior to DEC Tomasello-11/5/97. First bacterial application to take place on 11/11/97. Pump and treat system will be shut off one month after first and second application. Letter from F&N Lorthior to DEC Tomasello-11/18/97. First application performed on 11/11/97. Recovery system will be inactive until 12/15/97. Status Report (F&N)-December 1997. Five fluid ejector onsite. Groundwater 8-10' below grade and flow to the northwest. OM&M consists of bimonthly well monitoring and free product recovery, monthly collection of effluent samples, recovery of free product from wells via vacuum truck. As of June 1997, 3880 gallons of free product was recovered from site. Bioremediation program has been implemented. Injectors were shut down for one month after application. Site will be monitored for bacterial activity, nutrient and DO on a monthly basis beginning in October. Report recommends continuation of OM&M and sampling of waste water for TPH. Status Report (F&N)-Jan thru June 1998. Bioremediation program currently underway onsite. Five fluid ejector onsite. Groundwater 8-10' below grade and flow to the west. OM&M consists of bimonthly well monitoring and free product recovery, monthly collection of effluent samples, recovery of free product from wells via vacuum truck. As of June 1997, 4450 gallons of free product was recovered from site. Second phase of bioremediation program was implemented in March 1997. Site also being monitored for bacterial activity, nutrients and DO on a monthly basis. Wastewater influent is no longer sampled for TPH. Report recommends continuation of OM&M parameters and Biorem sampling. Letter from F&N(Lorthior) to DEC Tomasello-10/19/98. F&N "recently performed a viscosity test on the petroleum present..." "The results of the viscosity test indicate that the viscosity of the product has been reduced by the MicroBac treatment". Injectors will be reinstalled and a bioactivity test will be performed at the site. Status Report (F&N)-July thru Dec 1998. Bioremediation program currently underway onsite. Five fluid ejector onsite. Groundwater 8-10' below grade and flow to the west. OM&M consists of bimonthly well monitoring and free product recovery, monthly collection of effluent samples, recovery of free product from wells via vacuum truck. As of December 1998, 4450 gallons of free product was recovered from site. Viscosity went from that of a #6 fuel oil to that of a #4 fuel oil. Groundwater sampling show bacterial activity as "excellent". Report recommends: 1) Continuation of OM&M efforts 2) installation of monitoring wells in the basement or boiler room of the building 3) use of Biosolve. Status Report (F&N) Jan 1999 thru June 1999. Bioremediation program currently underway onsite. Five fluid ejector onsite. Groundwater 8-10' below grade and flow to the west. OM&M consists of bimonthly well monitoring and free product recovery, monthly collection of effluent samples, recovery of free product from wells via vacuum truck. As of December 1998, 4452 gallons of free product was recovered from site. Groundwater sampling show bacterial activity as "excellent". "However, F&N has analyzed the monitoring data on a monthly basis and has determined that the Bioremediation Program has had little, if any

effect, on the amount of free product at the site." "This data leads F&N to conclude that the Bio-remediation program at the site is not performing to expectations". Report recommends: 1)continuation of OM&M 2)use of Biosolve and the application in a limited area to study its effectiveness 3)resurveying of wells 4)installation of monitoring wells in basement or boiler room. Letter from F&N Lorthior to DEC Tomasello-8/23/99. "This letter isintedned to propose a work plan to utilize Oxygen Release Compounds at the above referenced property". Plan for ORC to be injected into proposed peizometers in basement. Letter from OSC to National Pollutions Funds Center-10/13/99. "The responsible party has been contacted and has refused to accept responsibility for this release". Email from DEC Rommel to DEC Tipple-8/4/00. Consulate would like to construct a pump room in September in the location of the existing recovery system. Decision was made to move the system to the second floor of the continuous circular ramp parking garage immediately above its current location. Letter from Miller (Silberger) to DEC Rommel-8/4/00. Recovery system not in operation during 8/3/00. Miller proposes: 1)VEFR of wells containing free product 2)VEFR recovery system 3) relocation of recovery system. On 8/7/00, approximately 700 gallons of free product was recovered. Hazardous Waste Manifests (Miller)-9/18/00. Letter from Attorney General to Consulate-7/25/03. " I have been asked to provide you with additional information regarding a fuel oil spill discovered at the Chinese Consulate in 1994". "The oil recovery system is no longer in place in the consulate and the DEC is not able to determine the extent of contamination at this time..." "In order for the State of New York to refrain from filing suit in this matter, it will be necessary for you to execute the enclosed tolling agreement..." Letter from AttorneyGeneral to Consulate-10/8/03. "Enclosed is a complete set of vouchers to date for the cleanup activities a the Consulate". Hazardous Waste Manifests (Miller)-5/18/04. Site Status Monitoring Report (Miller)-Dec 1999 thru Oct 2004. "In December 1999, the NYSDEC contracted MEG to take of over the maintenance of the recovery system and the groundwater monitoring program". Recovery system was relocated in August 2004. "The Consulate General of the People's Republic of China removed the compressor. The system has not operated since that time and access within the building has been very difficult to obtain. It is believed that the recovery system has been removed". MEG currently performing biweekly VEFR events and well gauging. Groundwater flow to the west-southwest. From Dec 1999 thru Oct 2004 approximately 10714 gallons of free product has been recovered. Report recommends establishing status of recovery system and continuation of biweekly OM&M. Fax from Consulate (LinJian) to DEC Tipple-10/25/04. Letter sent requesting the following info: 1)frequency of contractor site visits 2)information on consulting companies 3)Efficacy of addressing source area 4)current inspection procedures. Letter from DEC Tipple toJin Lan-10/25/04. Answer to above questions: 1)bimonthly VEFR events, biweekly well monitoring 2)contractor list is attached 3)investigating under consulate would effectuate remediation 4)use of sonic interface probe for product levels. 10/04/05-Vought-Continued File Review by Vought: Addendum to Site Status Monitoring Report (Miller)-12/14/04. "Plesa note that all plume maps are produced using Surfer 7.0 software". "As such these plume maps should be viewed as general indicators notas a definitive resource". Fax from Lin Jian to DEC Tipple-1/10/05. "I found that Miller Environmental Group provided DEC a report that covered all their activities performed from Dec 1999 to Oct 2004 and the work is still going on. Question is when all this work could be stopped? What is the criteria that the pollution had been controlled and the case could be cleared?" "I question the value of the report". Letter from DEC Tipple to Lin-1/20/05. Answers to above questions: 1)work can be stopped when soil and groundwater meet TAGM standards. "The DEC highly recommended the Consulate retain their own consultants to complete the remedial work" 2)The report value is used to track movement of the plume since the

product composition is already known and the amount recovered is not an indicator of successful remediation. Site Investigation Report (GZA Geoenvironmental)-August 2005. "The site is comprised of a multi-story building, which is surrounded by commercial properties. The building does not contain a basement." Facility currently heated by natural gas. Groundwater from 6-11'."The system continued to operate until at 1999 when it was shut off during a relocation of the system components. The system was never put back on line." "In 1999 Miller Environmental Group began VEFR events utilizing a vacuum truck on a twice monthly basis". "Over the course of the remediation program, the remediation system reportedly recovered 4452 gallons of product. 10,714 gallons of an oil/water mixture were recovered using VER methods". Historical records show and MGP facility was once present on-site. Investigation involved seven borings drilled off site and three borings performed inside building. One well was installed inside the building. Groundwater samples collected from inside well and five outside wells. Three wells contained free product. "In general the upper 4 to 5 feet of the site contains fill material consisting of cinders and ash". Report recommends that: 1)remedial efforts at the site be suspended for one year to determine if free product in the wells increases 2)installation of one monitoring well west of FN6 3)monitoring of adjacent catchbasin. Fax from Consulate (Jian) to DEC Tipple-8/10/05. "I would like to remind you that the metal covers of the manholes on 43rd Street have got uneven after years of service, which no doubt have become a hazard to the people walking by". "So we request your Department to take immediate action to replace them with new covers in case anything more serious occurs". Fax from National Environmental-8/25/05. Wells 7A and 10A contain free product. Well monitoring performed biweekly. 10/04/05-Vought-After review DEC approves GZA report recommendations pending inclusion of: 1)biweekly product monitoring and submission of quarterly monitoring reports 2)letter also addressed former sidewalk conditions. Vought spoke with DEC Austin who confirmed that the manhole conditions are now the responsibility of the consulate. Vought also called and spoke with David Winslow to confirm that the proposed well will be located between the recovery system and the Hudson River. 10/24/05-Vought-Contract Payment Package (National)-Biweekly groundwater monitoring, report preparation. (6/1/05-7/31/05). 12/20/05-Vought-Contractor Payment Application (Miller)-Work performed from 01/29/04-02/17/04 included liquid disposal, VEFR on monitoring wells, site summary report, well monitoring. Payment approved as per DEC Karwiel due to paid invoice not in file and check not cut as per FMIS. 12/20/05-Vought-Contractor Payment Application (Miller)-Work performed from 10/03/03 to 10/22/03 included well monitoring, VEFR on monitoring wells, liquid disposal. Payment approved as per DEC Karwiel due to paid invoice not in file and check not cut as per FMIS. 12/20/05-Vought-Contractor Payment Application (Miller)-Work performed from 11/26/03 to 01/29/04 included liquid disposal, VEFR on monitoring wells, well monitoring, site summary report. Payment approved as per DEC Karwiel due to paid invoice not in file and check not cut as per FMIS. 03/06/06 Noelle Thomas- 08/01/05-09/30/05 reviewed previous contractor's report, monitoring of fluid, data recording and prepared report. 08/09/07-Vought-Updated file report review as per request from GZA Sajida (212-594-810): Quarterly Groundwater Monitoring Report No. 2(GZA)-June 2006. Two (10000-gallon) #6 fuel oil USTs previously abandoned in place. Facility currently using natural gas. "Approximately 4452 gallons of product have reportedly been recovered by the product recovery system and 10714 gallons of an oil water mixture was recovered using VER methods."As of July 2005 only .04 feet present in well FN-11. Groundwater from 6-11'bg. Biweekly well monitoring being performed. Groundwater not sampled from wells FN10a and GZA3 due to free product. Report recommends continued monitoring. As of 6/06: .10'FP(FN10A), .20'FP(GZA-3). Groundwater analyticals show: 13ppb MTBE(FN1).

Quarterly Groundwater Monitoring Report No. 3(GZA)-August 2006. Groundwater from 6-11'bg. Biweekly well monitoring being performed. Free product in wells NF10a and GZA-3 but product thickness incorrectly measured. Quarterly Groundwater Monitoring Report No. 4(GZA)-January 2007. Well monitoring shows: .09'FP(FN10A), .14'FP(GZA-3). "...it is unlikely that further remedial efforts using the technologies already implemented at the Site, will achieve significant results". "In addition, product levels do not appear to have increased in horizontal or vertical extent; therefore, GZA recommends no further action and closure at the Site based on the limited potential exposure pathways and recovery to the extent practical". Groundwater shows minor TOGs 1.1 exceedences for SVOCs. Vought reviewed site with DEC Austin and DEC cannot close site with free product. DEC requires further remedial action and monitoring possibly but not limited to source removal and/or soil flushing. 08/24/07-Vought-Sent letter with above requirement for further remedial action. 09/07/07-Vought-Received call from and spoke to GZA Hayes. Chinese consulate requesting meeting with DEC Vought and DEC Austin and Vought proposed dates for 7/24-7/28. 09/11/07-Vought-Meeting date set for 9/28 at 11am with DEC Austin, GZA Hayes and consulate. 09/28/07-Vought-Meeting at DEC with GZA Hayes, GZA Winslow, Consulate Zheng Xuan, Consulate Xu Hangtian and DEC Urda. Discussion of remedial history, presence of free product in two wells, lack of DEC closure due to free product and further remedial options. As per Winslow limited height boiler room and garage surrounding tank room preventing installation of wells. DEC discussed possible solutions including grout curtains, hand dug recovery trenches, biosolve. GZA will continue quarterly groundwater monitoring and will submit RAP by 11/28/07.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "KRIMGOLD" 01/26/04 Reassigned from Rommel to Austin 02/17/04: Reassigned from AUSTIN to KRIMGOLD. 3/15/05. J.Krimgold reviewed a letter dated December 2, 2004 from AKRF. The letter stated that three tanks along with contaminated soil were removed from this site. However, post-excavation samples were not obtained and a new building was constructed at this site. AKRF was requesting a spill case closure. 3/15/05. J.Krimgold called AKRF and spoke to Andrew Rudko. Requested any supporting documentation showing that tanks and contaminated soil were indeed removed and disposed properly. 04/13/06- Case was transferred from Jake Krimgold to Koon Tang.

Assessment: On-site soil is contaminated with petroleum related Volatile Organic Compounds (VOC's). The site is vacant and capped with concrete, therefore, direct contact exposure is not expected. Groundwater is contaminated with petroleum related VOC's, however, ingestion exposure is not expected since the area is served with public drinking water. Sub slab soil vapor on the site was found to have elevated levels of petroleum related VOC's. This would pose a potential for soil vapor intrusion and subsequent inhalation exposure if buildings are constructed on-site in the future. Vapor intrusion into off-site structures is a potential exposure pathway that needs to be investigated. Therefore, the site poses a significant threat to public health dueto the potential for exposure to site related contaminats via vapor intrusion.

Env Problems: A Remedial Investigation Work Plan/Remedial Investigation Report was submitted on April 13, 2007. It was approved on June 22, 2007. Previous investigations have revealed the following contamination: The VOC analytical results indicated elevated levels including numerous TAGM 4046 RSCO exceedances in soils in the vicinity of the two on-site source areas namely the location of three closed in place USTs and the former gasoline dispenser; Elevated levels of naphthalene were detected insamples in the vicinity of the closed in place USTs; Elevated levels of SVOCs in shallow soil were attributed to the presence of historic fill which lies 0.5-8 feet below the basement floor; The types and concentrations of VOCs in the groundwater are indicative of petroleum contamination in the area of the USTs. There were TOGS exceedances in groundwater samples from wells in the vicinity of the former gasoline dispenser and closed in place USTs; Soil gas analytical results revealed elevated concentrations of VOCs at all 14 sampling locations. Total VOC concentrations exceeded NYSDOH's background levels, as presented in Soil Vapor Intrusion

WEST 42ND STREET REDEVELOPMENT PROJECT (Continued)

S108984483

Site Desc: Guidance, by orders of magnitude as high as 4.
 The site is 0.346 acres, identified as tax Block 1090, Lot 23 and located in New York County (Manhattan). The site includes 605 West 42nd Street and 615 West 42nd Street and lies on the north side of West 42nd Street between 11th and 12th Avenues. The site included in the application consists of a three-story garage which is presently abandoned. It is now owned by the volunteer 605 West 42nd Owner LLC who acquired it from Verizon. After careful review, the Department determined that this parcel (605/615 West 42nd Street - the former Verizon garage) is eligible for the BCP. The applicant was informed of this by the DEE on 10/11/06. The surrounding parcels are currently used for a combination of commercial and residential purposes- such as United Parcel Service (UPS), the Riverbank West Apartment Tower, Mobil filling station (now closed), street-level parking lot and a New York City mounted patrol unit building. Prior uses of the site were a coal and coke yard, a can manufacturer and a metal manufacturer. The Sanitary Automatic Candy Corporation and the New York Telephone Company have also occupied the current buildings. Contaminants which are known or suspected to affect soil, groundwater and/or soil gas are petroleum, petroleum related VOCs, SVOCs and metals. As of this update, this site has completed investigations including a Phase 1, Phase 2 and a Remedial Action Plan which was prepared under a stipulation agreement with the Department but never executed. The stipulation agreement was initiated prior to the site's entry into the BCP. The volunteer has submitted a draft RIWP with associated Fact Sheet and CP Plan. The RIWP was approved June 22, 2007. An RAWP was submitted in July 2007. The associated fact sheet was released along with the RAWP for public review on July 6. The comment period ended on August 19. There were no comments received. This site poses a significant threat to the public health as determined by NYSDOH. The RAWP with Stipulations was approved by the Department on November 5, 2007.

DEC Remarks: Dec Sigona met with Dormitory Authority staffon July 17, 1995. Meeting included David Recino Dormitory Authority), E. Dowd Hunter College), Roy Fein ig Rose, Beaton Rose), R. Dib Aqua-X. Investigation found oil leak in tank. product leaked to soil and surrounding water table. Inspection of Con Ed vault outside of the building revealed 6 fuel was seeping into vault. Notified Con Ed who sent personnel to respond and document. Telephone call on 1/3/96 found that Woodward-Clyde was awarded bid to provide investigation of the spill. They will start advancing borings on the week of January 8, 1996. I requested that I could be present to observe the installation of monitoring wells. Roy Fein ig will be overseeing the work and I asked David Recino to have him call me ASAP to set up the drilling apointment.

Spill Cause: TANK WAS EMPTIED AND CLEANED DURING A TEST TODAY - THEY FOUND AN UNKNOWN AMOUNT OF OIL UNDER TANK. CALLED DAVID KATZEN, PREPARING TO ABANDON TANK - CLEANED OUT HTE TANK - DRILLED INSIDE THE TANK.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "SANGESLAND"
Sent TTF letter to consultant: Maria Ramirez, GZA, 65 Willowbrook Blvd,
Wayne, NJ 07470 11/5/2003 Sangesland spoke with Maria Ramirez at GZA.
She says the building is converting to natural gas and the 10,000 gal tank will
be abandoned in place. Tank is below the basement floor under an electrical
utility room. They cleaned out the tank and found holes in the top 1/3 of the
tank. They will take borings through the bottom of the tank to determine if
the area is contaminated. 12/4/2003 e-mail message from Maria Ramirez
said the soil borings through the bottom of the tank would take place around
12/12/03. 12/11/2003 Sangesland reviewed a submittal from Maria
Ramirez of GZA dated Nov 19, 2003. This outlined the the work discussed above
and stated that 4 holes will be drilled through the bottom of the tank and
samples will be collected for testing (if possible-it may be in cement). If
the samples are clean, the tank will be abandoned in place with foam.
12/22/2003 Sangesland spoke with Fran Schultz of GZA about this site. They
made 4 holes in the bottom and sides of this tank and hit cement. Water is
entering the tank. To date approx 700 gal of water has entered the tank. They
believe the water is from a broken water main. Sangesland asked GZA to test
the water for VOC and SVOC. GZA said they would also test for Floride and
Clorine to determine if this water is city tap water or groundwater. If
the water samples come back clean, then GZA will prepare an arguement that the
tank is in a subbasement vault. All records of the building (blueprints) are
gone (they were in 7 World Trade Center). There are lots of utilities nearby.
The tank is being abandoned in place. GZA will request closure of the spill
number. 3/15/2004 Sangesland reviewed a report from Maria Ramirez of
GZA. Based on the description of the tank location (below ConEd electrical
equipment), the drilling of holes through the bottom and sides of the tank (all
into cement), results of water tests on the water that came into the tank after
drilling (no petroleum but did have Floride & Chlorine). Based on allof this
information, the DEC will allow GZA to go ahead with abandonment of the tank.
After proper abandonment is complete, GZA will submit a final report with a
request for spill closure. 11/14/05 - Larry Alden - Reviewed file and concur
with assessment of Sangesland (3/15/04). Reviewed PBS# 2-606121, which showed
that 10,000-gallon tank was closed in-place on 7/8/04. With absence of any
contamination, and tank subsequently closed, this spill can be closed.

Spill Tank Test: 1548876
 Tank Number: 1
 Tank Size: 4000
 Test Method: 03
 Leak Rate: 0
 Gross Fail: Not reported
 Modified By: Watchdog
 Last Modified: 05/06/05
 Test Method: Horner EZ Check I or II
 DEC Memo: pbs # 2-270873 TTF letter sent to PBS Contact: PR 30 LLC 205 West 15th St New York, NY 10011 Attn: Michael Rahav 10.14.05-Sharif sent another violation letter since the department has n't rec'd any correspondence regarding the repair of the tank. 10.25.05 Sharif- Rece'd work invoices from Mr. Michael Rahav. The tank test failed because of the vent line problem which runs aboveground. PTC replaced the vent line and the tank then passed. There was no oil spill observed.

Remarks: ABOVE LIQUID LEAK DRY PORTION

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead DEC Field was "HARRINGTON"
This spill site has been transferred from DEC Sigona to Remedial Bureau B, on
August 4, 2003. This spill site has been consolidated under Spill No.
8806783. Reassigned from O'Dowd on March 1, 2000 DEC's comments
regarding a proposed Work Plan for On-Site and Off-Site Investigation by Roux
Associates, dated April 30, 2003. Based on the results of our site visit on
March 7, 2003, and evaluation of the proposal by Roux Associates, the DEC
accepts ExxonMobil's Work Plan and Schedule to evaluate the on-site and
off-site contamination at this location. Exxon-Mobil must now complete the
implementation of the Work Plan according to the proposed schedule. The
results of this investigation must be compiled into a Subsurface Investigation
Report prepared in accordance with Section No. 3, paragraph 3.14 of the
Division of Environmental Remediation's Draft DER-10 Technical Guidance for
Site Investigation and Remediation, dated December 2002. A complete Remedial
Investigation Report must be submitted for DEC review and approval according to
the proposed implementation scheduled.

Remarks: LEAK IS AT SUBMERSIABLE PUMP

 DEC Memo: 02/03/06 Feroze talked with Mr. Minick (owner) 212-604-9898. He informed that there was a leak in the tank, they have closed the leak and pumped the oil out. It is above ground tank, floor is made of concrete. An environmental company is working for them. TTF is sent to : Mr. Minick 440 west 22nd Street New york, NY 10011. 02/10/06 Mr. Minick called and told me that they will close the tank by PTC. He will submit DEC the documents soon. 03/02/06 Feroze, : Mr.Minick told me that PTC has taken soil sample. He will submit soil analysis result and tank closer report to DEC soon.It was 275 gallon tank. 03/10/06 Feroze received a certificate and soil analysis result. The result shows that VOC and SVOC are within accepable limit. They also submitted a manifest for removal of contaminated soil. The spill is closed.
 Remarks: ruptured tank in basement:

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "HARRINGTON"
This spill site has been transferred from DEC Sigona to Remedial Bureau B, on
August 4, 2003. This spill site has been consolidated under Spill No.
8806783. Reassigned from O'Dowd to Sigona on 11/6/00 DEC's comments
regarding a proposed Work Plan for On-Site and Off-Site Investigation by Roux
Associates, dated April 30, 2003. Based on the results of our site visit on

March 7, 2003, and evaluation of the proposal by Roux Associates, the DEC accepts ExxonMobil's Work Plan and Schedule to evaluate the on-site and off-site contamination at this location. Exxon-Mobil must now complete the implementation of the Work Plan according to the proposed schedule. The results of this investigation must be compiled into a Subsurface Investigation Report prepared in accordance with Section No. 3, paragraph 3.14 of the Division of Environmental Remediation's Draft DER-10 Technical Guidance for Site Investigation and Remediation, dated December 2002. A complete Remedial Investigation Report must be submitted for DEC review and approval according to the proposed implementation scheduled.

DEC Memo: Spoke to Dr. Sandoval who represents Whitehouse - the tenant/builder/runner of future club. Swingtime is the owner of the property. According to a report written by Swingtime's consultant, American Envmtl Assessment(AEA), there was no contamination. DEC Saccacio required more work. PDM performed own investigation for Whitehouse and found contamination. Whitehouse's attorney(Michael Perle) will send DEC letter. Reassigned from Saccacio. 5/9/03 Reassigned from Rommel to Harrington. 1/5/05 Reassigned from Harrington to Foley. Changed address back to 609-611 11th Avenue. Address was 561 11th Ave and listed ExxonMobil as RP. Two PBS registrations, one at each location. Appeared to have been consolidated under spill #8806783 in error. Cross-reference open #9501693 for 609-611 11th Ave. (KMF) From closed spill file: (KMF, 3/24/05) 10/24/00 Letter from PDM Environmental Services addressed to Mr. Oscar Sandoval of The White House. PDM reviewed the American Environmental Assessment Corp Summary Report for Soil Removal. They noted that in some samples the reported values were greater than the guidance values. Also noted that some samples were contaminated and above STARS guidance values. Sample results indicate that soils beneath the 11th Avenue property line show the greatest levels in exceedance of criteria and will probably require further remediation. PDM noted complications with obtaining a certificate of occupancy until contaminants have been removed to below acceptable levels. A letter was issued by S. Saccacio on 11/22/00 which states that the spill number will not be considered for closure until additional investigation is conducted and the Dept reviews the results. Seespill #s 0001837, 0001719, 9501693.

 DEC Memo: Church thought they were using more oil than usual. Hired ProTest to pressure test the tank (outside/buried 1080 gal)(Non-PBS site). Tank could not hold any pressure (gross failure). ProTest is working with the church to set up temp tanks and will begin the process of opening the old tank to see how much of a problem there is. Tank has been pumped and cleaned. Soilborings will be conducted shortly. 5/5/08- DECP iper reviewed closure report. As per report, tank was cut open and inspected. no holes were identified in tank. Geporobe invesigation revealed no vocs and no elevated SVOC.s Tan kwill be abandoned and new tan kwill be installed in basemnt. Closed. see e-docs if warranted.

Remarks: GROSS LEAK

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/30/2008	Source: EPA
Date Data Arrived at EDR: 05/06/2008	Telephone: N/A
Date Made Active in Reports: 06/09/2008	Last EDR Contact: 07/28/2008
Number of Days to Update: 34	Next Scheduled EDR Contact: 10/27/2008
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/30/2008	Source: EPA
Date Data Arrived at EDR: 05/06/2008	Telephone: N/A

Number of Days to Update: 34	Next Scheduled EDR Contact: 10/27/2008
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/18/2008
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/17/2008
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/09/2008	Source: EPA
Date Data Arrived at EDR: 07/22/2008	Telephone: 703-412-9810
Date Made Active in Reports: 08/25/2008	Last EDR Contact: 07/22/2008
Number of Days to Update: 34	Next Scheduled EDR Contact: 09/15/2008
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007	Source: EPA
Date Data Arrived at EDR: 12/06/2007	Telephone: 703-412-9810
Date Made Active in Reports: 02/20/2008	Last EDR Contact: 06/17/2008
Number of Days to Update: 76	Next Scheduled EDR Contact: 09/15/2008
	Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 06/13/2008	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/27/2008	Telephone: 202-564-6023
Date Made Active in Reports: 08/08/2008	Last EDR Contact: 08/18/2008

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 06/25/2008	Source: EPA
Date Data Arrived at EDR: 06/30/2008	Telephone: 800-424-9346
Date Made Active in Reports: 08/25/2008	Last EDR Contact: 06/02/2008
Number of Days to Update: 56	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: Quarterly

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 05/12/2008
Date Data Arrived at EDR: 06/13/2008

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

STATE AND LOCAL RECORDS

NY VAPOR REOPENED: Vapor Intrusion Legacy Site List

"Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

Date of Government Version: 02/04/2005	Source: Department of Environmental Conservation

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

NJ SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NJ LIENS: Environmental LIENS

A listing of properties with environmental liens. The listing includes sites from the Site Remediation & Waste Management Program Sites where the Department has placed either a 1st Priority or Regular Spill Fund Lien against. 1st Priority Type Lien - a lien placed against the property where the discharged occurred providing that the owners of the property have some responsibility towards the discharge. First Priority Lien is superior to other types of liens. Non-Priority (Regular) Type Lien - a lien placed against the Responsible Party & their revenues and all real and personal property, other than the real property comprising the location of the discharge.

NJ ISRA: ISRA Database

The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA. An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NY SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

NY E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

NJ HWS RE-EVAL: Site Re-Evaluation Report

The locations were removed from the Known Contaminated Sites list for a variety of reasons. Some of the sites were taken off the list because they were inactive, some were not assigned a case worker and some were no longer contaminated. Inspectors from the DEP are now undertaking a full re-evaluation of each of the locations statewide. That includes visual and environmental tests to see whether contamination still exists.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> NEW YORK, NY	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> WEEHAWKEN	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile SE
Site Name:	MANHATTAN GENERAL MAIL FACILITY
Site EPA ID Number:	NY6180000352
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Ordovician
Series: Lower Ordovician and Cambrian carbonate rocks
Code: OC (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Subject: FOIA Request - 319 11th Ave, NY, NY

Ms. Calderon,

The Louis Berger Group, Inc. is requesting information regarding the known or potential environmental hazards present at the following site:

Caemmerer West Side Yard (Western Rail Yard)
319 11th Avenue (Block 676, Lot 3)
New York, NY 10019

The site is also known as 319-323 11th Avenue, NY and 601-603 West 30th Street, NY.

This would include information regarding spills from petroleum and chemical storage tanks, detailed site reports, monitoring data, chemical storage, wastewater discharge, and documents or studies regarding cleanup of the sites.

If you have any questions or require any additional information, please do not hesitate to contact me. Thank you in advance for your assistance.

Re: Freedom of Information Request No. **02-RIN-02161-08**
Dated: September 08, 2008

Dear Ms. Ali:

Your request for information has been referred to this branch for response. We have searched the Resource Conservation and Recovery Act (RCRA) files and/or computer database as appropriate to respond to your request. In addition, you may also receive more information from other program areas within this Regional Office.

We were unable to find RCRA hazardous waste information concerning the properties at 319-323 11th Avenue & 601-603 West 30th Street all in New York, New York.

If you consider this response to be a denial, you may submit a written appeal to HQ FOIA OPERATIONS STAFF, U.S. Environmental Protection Agency (2822T), 1200 Pennsylvania Avenue, N.W., Washington, D.C. 20460. The appeal must be made in writing, and must be received within 30 calendar days of the date of this response to receive consideration. The Agency will not consider appeals received after the 30-day limit. The appeal should be marked "Freedom of Information Act Appeal", and should reference the Freedom of Information Request Number of this response.

Also, RCRA information is now available on the World Wide Web as described on the enclosed sheet.

Please include the above referenced request number in any subsequent communication relating to this response.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Adolph S. Everett".

Adolph S. Everett, P.E.
Chief, RCRA Programs Branch

Enclosure

Environmental Protection Agency Internet Information

EPA Region 2

While Freedom of Information Act (FOIA) requests will be honored by directly writing to Region 2, EPA provides an increasing amount of environmental media information, and other Regional activities via Internet at <http://www.epa.gov>.

Region 2 has provided a FOIA Web site <http://www.epa.gov/region02/foia/> with several online databases from which the environmental information can be retrieved.

- **“RCRA Reports Index”** Web site <http://www.epa.gov/region2/foia/rcra/reports> provides general information and preformatted FOIA reports/extracts for the Region 2 RCRA Program and its National Databases, Resource Conservation and Recovery Act Information (RCRAInfo) and Biennial Reporting System (BRS).
- **“Frequently FOIAed Files”** Web site <http://www.epa.gov/region2/foia/fff.htm> covers RCRA and many other media Programs. Through this Web site, you can learn about each media Program, associated databases, and special points of interest. In particular, the ability to “directly download” all of the most commonly requested Region 2 Export Files (.xls) and Reports (.pdf) - all compressed for quicker downloading.

EPA Region 2 has established a **list of contaminated facilities** that are a high priority for cleanup in New York, New Jersey, Puerto Rico and the U.S. Virgin Islands. You can view each facility fact sheet at <http://www.epa.gov/region2/waste/cleanup.htm>

EPA- Headquarters

- **Envirofacts Data Warehouse** Web site http://www.epa.gov/enviro/index_java.html is a one-stop source to the environmental information. This Web site provides access to several EPA databases with information about environmental activities that may affect air, water and land anywhere in the United States.
- **“Window to My Environment”** Web site <http://www.epa.gov/enviro/wme> is a powerful tool that provides a wide range of federal, state and local information about environmental conditions and futures in an area of your choice.
- **The Enforcement and Compliance History Online (ECHO)** Web site <http://www.epa.gov/echo/> provides a list of all inspections and enforcement under most of the environmental statutes.
- **Right-To-Know Network (RTK Net)**, a non-EPA Web site <http://www.rtk.net/> on-line query engine provides free access to numerous databases and resources on environment.
- **National Biennial RCRA Hazardous Waste Report** Web site <http://www.epa.gov/epaoswer/hazwaste/data/biennialreport/index.htm> provides documents and data on hazardous waste reports.
