Hazardous Waste Summary:

Waste Code:	D000
Waste Description:	Not Defined
Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT

MAP FINDINGS

509 WEST 34TH STREET (Continued)

S117851121

Site Description:

Location: The site is located at 509-527 West 34th Street, 435 Tenth Avenue and 447-449 10th Avenue in Manhattan. The site is comprised of five separate lots (i.e., lots 17, 20, 29, 35 and 36 of Block 706) and is 1.548 acres in size. Site Features: Lot 17 is a 0.07 acre vacant lot. Lot 20 is 0.49 acres and is entirely covered by a four-story vacant structure formerly utilized as a parking garage, photography studio, artist studio, elevator services and mixed office and warehouse space. Lot 29 is a 0.87 acre paved parking lot formerly utilized for commercial truck rental and parking. Lots 35 and 36, located in the northeast corner of the site, include two vacant buildings. Current Zoning and Land Use: The site, currently used for commercial purposes, is zoned C6-4, which is typically mapped within a major business district. There is a parking facility to the north, Hudson Park to the west, commercial development to the south and retail and multi-family residential housing to the east. Southeast of the site is a 16-story building that is utilized as a public school, office space and retail space. Past Use of the Site: Historic uses included an iron and brass foundry, a hatters fur cutting company (Lots 29, 35 and 36), an electrical conduit company (Lot 17) and a parking garage (Lot 20). Site Geology and Hydrogeology: Bedrock is present beneath the site at depths ranging from less than 2 feet to over 20 feet below grade. A fill layer comprised of sand, gravel, boulders, concrete, and brick fragments is present from grade to bedrock except in the western portion of the site the fill is underlain by a 3- to 6-foot thick native glacial silty sand layer. Groundwater is at a depth of 12 feet and flows towards the Hudson River located 1,500 feet to the west.

Env Problem:

This section summarizes the assessment of existing and potential future environmental impacts presented by the site. Environmental impacts may include existing and potential future exposure pathways to fish and wildlife receptors, wetlands, groundwater resources, and surface water. The RI report presents a detailed discussion of any existing and potential impacts from the site to fish and wildlife receptors. During the Remedial Investigation (RI), soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Soil vapor was analyzed for VOCs. As a result, the primary contaminants of concern at the site include Trichloroethene (TCE), Tetrachloroethene (PCE), Toluene, Lead, Nickel, Mercury, PCBs and Poly-Aromatic Hydrocarbons (PAHs). Surface soil, subsurface soil, soil vapor and groundwater are impacted because of historical uses including an iron and brass foundry, an electrical conduit company and a hatters fur cutting company, which historically utilized a chemical treatment process of nitric acid and mercury to treat animal fur. Dissolved mercury, found in overburden wells near the down-gradient property line, may have migrated off-site. However, the proposed extensive excavation of all site soils and into bedrock, which is not impacted by site-related contaminants, will address the source of the mercury in the groundwater. Otherwise, site-related contamination does not appear to extend off-site in soil or soil vapor. Soil VOCs: VOCs were detected site-wide in shallow (0-2 feet) soils. Cis-1,2-dichloroethylene (cis-1,2-DCE) and trichloroethylene (TCE) were detected at concentrations exceeding NYSDEC Unrestricted Use soil cleanup objectives (UUSCOs). The cis-1,2-DCE (1.7 ppm) and TCE (4.9 ppm) exceedances were from SSB-7 (0 ft. to 2 ft.). SVOCs: Maximum concentrations of SVOCs (PAHs) exceeding UUSCOs were all detected in

soil boring sample SSB-2B (0-2 ft. depth) including benzo(a)anthracene (71 ppm), benzo(b)fluoranthene (70 ppm), chrysene (62 ppm), fluoranthene (160 ppm), and pyrene (120 ppm). Metals: Metals were also detected site-wide in shallow soils (0-2 ft.). Mercury was detected in soil above UUSCOs, with a maximum concentration of 300 ppm within the footprint of the former hatter s fur cutting factory (Lot 29). Lead was detected in SSB-9 (840 ppm at 0 ft. to 2 ft.) and in SB-8 (2,100 ppm at 0 ft. to 2 ft.); both exceeded UUSCOs as did the majority of the other soil samples. PCBs: PCBs were detected sporadically throughout the Site (typically parking lots) in shallow soil samples (0-2 ft. depth) at concentrations between 0.234 ppm to 13.1 ppm with several samples exceeding the NYSDEC UUSCO. Pesticides and Herbicides: Pesticides and herbicides were detected in site-wide soils (0-9 ft. depth) including 4,4 - DDD (0.805 ppm), 4,4 DDE (0.468 ppm) and 4,4 - DDT (0.060 ppm) at concentrations above NYSDEC UUSCOs in over half of the soil samples. Groundwater VOCs: From nine groundwater samples collected at seven on-site monitoring wells, three VOCs - benzene, chloroform, and toluene were detected in samples at moderate to low concentrations exceeding NYSDEC Ambient Water Quality Standards and Guidance Values (AWQSGVs). Benzene (1.9 parts per billion [ppb]) and toluene (26 ppb) were from monitoring well SMW-02 and chloroform (10 ppb) was detected in monitoring well SMW-03. Historic underground storage tanks in the existing parking garage may be contributing to the benzene and toluene groundwater contamination. Chloroform does not appear to be site related and it is not a contaminant of concern. It is likely a byproduct of chlorination coming from chlorinated water leaking from adjacent water lines. No chlorinated compounds were detected in the groundwater. SVOCs: Four SVOCs, primarily PAHs, benzo(a)anthracene (0.05 ppb), benzo(a)pyrene (0.09 ppb), benzo(b)fluoranthene (0.05 ppb), and chrysene (0.04 ppb) were detected in one unfiltered groundwater sample from monitoring well MW-02 at concentrations exceeding NYSDEC AWQSGVs (0.002 ppb). Metals: Of the seven metals detected from nine on-site groundwater samples, Mercury was the only analyte of concern which exceeded the NYSDEC AWQSGV of 0.70 ppb. Unfiltered Mercury samples ranged from 28.45 to 153.1 ppb, and filtered Mercury samples ranged from 15.32 to 103.2 ppb. On-site soil is the source of mercury in groundwater. PCBs: PCBs were not detected in any groundwater samples (7). Pesticides and Herbicides: Pesticides and herbicides were detected in one groundwater sample, but none exceeded NYSDEC AWQSGVs. Soil Vapor Analytical data from eleven soil vapor samples across the site found several VOCs including chlorinated compounds (CVOCs) and petroleum-related compounds. PCE was detected in all samples (2.5 ft. to 3.0 ft. deep) ranging from 2.35 micrograms per liter (ug/m3) to 114 ug/m3 and TCE was detected in all samples ranging from 3.27 ug/m3 to 511 ug/m3. Toluene ranged from 1.09 ug/m3 to 16.4 ug/m3.

Health Problem:

People may contact contaminated soil if they dig below the ground surface. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of the buildings, is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site-related contaminants due to soil vapor intrusion does not represent a current concern. The potential exists

for the inhalation of site contaminants due to soil vapor intrusion in the event that on-site buildings are re-occupied and in any future buildings developed on the site. Environmental sampling indicates that soil vapor intrusion is not a concern for off-site buildings.

DEC Memo: "5/12/2006 Sangesland spoke with Joe Ostrowski at PTC about this site. He said the tank is in a tank room and began to leak. The owner hired PTC to ONLY vac out the tank. Joe says approx. 25-30 gal of #6 oil remains under the tank along with oil soaked debris. Unknown who is doing the cleanup. Property Shark says the building has several alternate addresses: a/k/a 548-552 West 28th St & 547-553 West 27th St NO PBS records found for any of these addresses.... Probably in PBS Violation Property Shark Owner: Mariners Gate, LLC 548 West 28th St, NY, NY 11101 Property manager- Jim Pastreich, Pinetree Group 212-279-5600 Sangesland spoke to Mr. Pastreich's secretary. He'll

call back. 5/12/06- DEC Piper responded to site. Oil soaked debris remains under tank. Tank was emptied and cleaned yesterday. Seam in tank was cracked. DEC Piper instructed Jim of Pinetree to contract cleanup co. ECO Kurt Bush responded to site and issued ticket for un registered tank. PTC issued proposal. PTC to cleanup on Monday and investigate presence of oil b/w tank and vault. 5/16/06- DEC Piper spoke w/ PTC. As per conversation, there is oil between the tank and the vault. A hole drilled through the vault revealed product. Piper issued CSL. 5/19/06- DEC Piper spoke w/ Jim. As per conversation, soil contamination removed. Repairs will be made to tank and retested. Jim did not mention contaminated material b/w tank and vault as PTC described to DEC earlier. Jim will contract out another contractor as PTC services were not rendered/ nor wanted. Piper faxed list of contractors to Jim. This work needs to be completed. 10/4/06- DEC Piper left message for Jip P to call back w/ update and documentation. Piper searched PBS and the tank is now registered. 4/27/07- DEC Piper has not recieved any info on cleanup or repairs. Additionally, the PBS reg is expired. Referred to PBS for inspection. 9/24/07- DECP iper recieved disposal manifests from work performed in 9/ 2006. Soil samples were recently collected. No VOC's over TAGM though there are a few SVOC's over. The tank has been repaired. PBS violations exist and has was referred to legal. This spill is closed. See edocs if warranted."

Remarks: "TANK IS LEAKING AND STILL INVESTIGATING CAUSE: IN PROCESS OF CLEANING AND IS IN A ENCLOSED TANK ROOM"

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Remarks: inches of crushed stone and an 8-mil polyethylene vapor barrier. Area was then covered with 6 inch reinforced concrete slab. Soil VOC pass TAGM, soil SVOC exceed TAGM but are due to fill composition. Site visit by Jacob Krimgold showed no visual evidence of contamination. Groundwater VOC and SVOC also pass TAGM. 12/13/2001 Spill closed as per Mark Tibbe, Jacob Krimgold and myself (all NYSDEC personnel). "SOIL SAMPLE RESULTS FROM REMOVAL OF 3 TANKS AT LOCATION. NO VISABLE SIGNS OF CONTAMINATION."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL 1/13/01: Tim DeMeo responded off-hours and called O'Connell for guidance. I advised him to remain on-site until temporary clamp was installed. Total leak amount 6500 gallons. (JHO) DeMeo's notes: Felix Industries, while performing contract work for Con Ed, cut into housing of 5-inch feeder cable. The work being performed was a saw-cut across 11th Avenue. Upon arrival Con Ed, NYPD and FDNY were on-scene. Material contained using sand dikes with minor impacts to sewers. Clean Harbors and S&D were retained by Con Ed for clean up. Street and sidewalk were to be pressure washed after absorbents cleaned up. (TD) 1/17/01: Chem lab on-site collecting post-ex samples, as follows: 4 sidewalls, 2 floor for benzene, TPH df. On site were John Tranchina (Con Ed TO) and Joe Floryshak (Con Ed Remediation). (JHO) 2/13/01: lab results indicate no detectable levels of benzene. All TPH results all below 1000 ppm. Close out. (JHO)"

Remarks: "UNDERGROUND LINE STRUCK DURING CONSTRUCTION AT ABOVE LOCATION. LEAK IS STILL ACTIVE AT TIME OF CALL. CON ED ON SCENE AND MATERIAL HAS BEEN CONTAINED. CON ED # NOT AVAILABLE, NO CALL BACK REQUESTED. UNKNOWN AMOUNT OIL WENT INTO THE SEWER UPDATED AT 17:58 01/13"

DEC Memo: "7/27/15 TJD Left messages on both work and cell phones for the notifier requesting callback with additional information. Received a call back from Kevin McGrath at Chazen with updated information. Email (pasted below) provides historical information and direction to assigned responder (Piper). I received a call back from the notifier, this is a redevelopment site with an old closed spill number (1306369 - Patel) and is also a NYCOER E-designation parcel. With the above stated it appears the reported condition is unrelated to either of these known conditions. The notifier describes an open excavation approximately 28 feet deep (4 feet into bedrock) that the bottom is level and graded pending construction. Today product, believed to be a weathered #2 fuel oil is migrating into the open excavation (from offsite parcel) from the seams on construction sheeting at an elevation of approximately 16 ft bgs. Product is accumulating at the bottom of the open excavation. The contractor has scheduled a vac truck for tomorrow morning to pump product (Atlas Disposal out of Dover NJ). Soil and product samples have been collected for product ID and 8260/8270 analysis. Your site contact is Eric Orłowski, his cell phone is 518.928.5823. Please perform a site inspection first thing tomorrow morning to investigate and document findings. THIS IS NOT A RECALL - however, if you want to modify your work hours and start your day early - please let me know. They are scheduled to start pumping at 8AM, but I have requested that they await your arrival estimated at before 9AM so you can take a look before there is nothing to see. 7/28/15- DEC Piper responded to site to inspect and meet Env coordinator. A seep of oil has entered the SW corner of the property. It appears that it was from the adjacent building. That building is now on gas though historical sandborns show tank. Unclear weather tank was AST or UST and / or fill line was buried and leaking. Contractor to pump out oil in bottom of excavation. 7/30/15- DEC Piper received email from contactor. A vac truck cleaned the oil off the water in the bottom of the excavation that day. Since then, no other oil has been observed. They will pour wall in a couple days with appropriate vapor. moisture barrier. Based on work to date and no reoccurrence, this spill is closed. 10/21/15-Vought-Received email

from OER Chawla with cc to RSE that Jeff and Randy:Please let me know who is managing this spill. thanks. Included in OER Chawla's email string was email from Integral (Kevin McGrath) to OER Alfieri dated 10/19/15 that Hi Alysha, Progress at the Site is still slow as the new CM transitions into the site. The construction contractor (Veritas) responsible for the excavation and removal of soil and bedrock has completed all of the removal action down to the bedrock final grade elevation. The last week was spent cutting the rock on the SE corner of the site and loading it out. The soil access ramp has been removed and the floor of the excavation is now ready for the final mud-slab, vapor barrier, floor slab installation. We had an issue last week with fuel oil leaking through the eastern barrier wall between the site and the adjacent Scores nightclub property next door. At least three of the seams in the barrier wall that were sealed back in July reopened. I inspected the site on Friday and it is clear to me that the oil is on the water table beneath the building next door. The CM was instructed to berm off and contain the leaking groundwater mixed with fuel and pump it to an oil-water separator so the free-product can be drained off and disposed of properly. They will also be mobilizing a team to the site to seal the leaking joints (again). At the moment they have less than 5-10 gallons of old fuel-oil, floating on the water in a pool in the SW corner of the site which should be cleaned up in the next couple days. I will speak to NYSDEC later this morning about the situation. We still have an open spill number for this issue so we do not need to report a new spill. I would like to get some understanding of what NYSDEC is doing with the adjacent property owner to help mitigate this issue so it stops being a problem for us. I also have a query in to the manufacturer of the pre-pruff vapor barrier material to assess the potential impact, if any, to the effectiveness of the vapor barrier layer from long-term exposure to free phase petroleum. You are of course welcome to visit the Site anytime. Thanks. As subject of spill was from OER Chawla was 1306369 (closed spill also at this site that was assigned to DEC Patel), Vought replied to all that Shaminder, This spill was closed by Kumar Patel on 12/10/13. Due to the reports of new product infiltration as per the below email which was not known at the time of spill closure, the spill will likely be reopened by Kumar. I will follow up with him to ensure he responds to all. DEC Patel responded to all parties that Please note that the spill number 1306369 was reported based on field observations during installation of soil borings at the site and the case was closed based on results of soil and groundwater samples which shows presence of metals and PAHs. Another spill case (#1504458) was reported on 07/27/2015 due to findings of petroleum product on groundwater. Ryan Piper was the case manager. Spill reopened by Vought after discussion with DEC Demeo and RSE. Vought corrected spill address and city spelling on UIS in case of future searches by address and project manager for spill to be determined by DEC Demeo. 2/1/16- DEC Piper- additional seep was less than 2 gal. Based on extent of petroleum and work completed to date on both properties, this spill is closed." "historical spill - clean up pending"

(active case), 0801913-discovered fuel tanks, 0806482-found oil in ground. The site is block and lot 699 and 9. The owner is 537 West 27 Street Owners, LLC, c/o RD Management, LLC, 810 7th Avenue, 28th Floor, NY, 10019. The site main address is 537 West 27 Street, but alternative addresses are 537-545 W. 27 Street and 538-546 W. 28 Street. The site had a one story garage/service station from old pictures in Property Shark. The site has an E-designation and the DEP contacts are Terrell Estes (718) 595-4473 and Maurice Winter (718) 595-4514. PBS case #2-610856 lists 6 closed 550 gallon tanks. Two had diesel fuel and the rest had #2 oil. The owner is listed as 537 W. 27 Street Owners, LLC. I visited the site today. I met Leeron Tagger, Environmental Technician from Environmental Waste Management Associates (973) 560-1400/FAX (973) 560-0400. He said that the FDNY was here and left. He said that they showed up because a neighbor had complained about strong odors in the air in their ventilation system. He said that 3 tanks were discovered at the site, two in the center and one in the southeast corner. He said that all three had a hole or two and had leaked oil. Mr. Tagger said that the two tanks that were in the middle of the property were discovered with oil in them. I noticed that they had dug out the site to about 7 feet below grade. I asked him how much more soil was going to be dug out. The construction foreman said that they will dig out to about 12 feet below grade, but groundwater is 10 feet below grade. I asked the foreman where bedrock was. He said it varied between 20 feet to 40 feet below the site. Mr. Tagger stated that they will conduct site dewatering and collect the contaminated water and filter it for the oil and other contaminants. I smelled a strong odor of diesel fuel. I asked him whether contaminated soil had been removed. He said that some had been removed and that he has a manifest for the soil. I asked him whether end-point samples were taken. He said that they had. I told him that I smelled strong diesel odors and that much more soil will need to be removed. He said that it will. I told him that EWMA will need to submit a report with a sit map showing the locations where the tanks were and where the oil contaminated soil is, manifests for the soil removed, and end point sample results. He said that a report is being prepared for the site right now. I asked him whether the tanks had been registered with DEC. He said that he thought they had been, and that two checks had been sent to DEC, but that I should talk to the project manager, Rob Edgar at (973) 560-1400, ext 159. I took 3 pictures of the site and left. Later, I tried to call Mr. Edgar regarding the need to remove more soil because the odors were strong and because there had been odor complaints from a neighbor. I could only leave a message. However, I did state that the matter was urgent and that EWMA had to institute an odor management/abatement program immediately and to call me back as soon as possible. Mr. Edgar called me back. He said that they already took out 55 truck loads of soil. He said that he has someone on site who is monitoring for fugitive dust and odors. He said that Mr. Tagger walks around with a PID meter and checks the vapor concentrations. He said that, so far, they have not been over the limits. I told Mr. Edgar that it's not just a matter of how high the vapor concentrations are, but also whether the odors are a nuisance. I told him that the vapors got into the ventilation system of a neighbor and there were complaints to DEC. He said that he was aware of this and that there's oil in the soil, so there are odors. He said that's the situation at the site. I told him that not only does he have to get the construction company to remove soil quickly, but that

he has to come up with a method of controlling and abating the odors. He suggested covering the affected areas with plastic. I told him that plastic may not be the best method. I told him that I will talk to my supervisor, Randall Austin, Chief of the Spills Unit. Mr. Austin recommended that they use odor suppressing foam to control the vapors and that they come up with an odor management plan. However, he said that plastic can be used as a temporary measure. I called Mr. Edgar and told him that the plastic sheeting can be used as a temporary measure, but that foam should be put down to control the odors while they dig. He said that the construction company doesn't like using the foam. I told him that he will have to come up with some plan to take care of the odors and that the odor control has to begin immediately. He said that EWMA always complies with all environmental regulations and laws. I told him that his company will have to get control of the odors fast and abate this problem, otherwise there could be more complaints and more problems. With that the conversation ended. 10/3/08 - Raphael Ketani. I made an unannounced site visit today at about 2:11PM. I met Mr. Tagger of EWMA and Mark Trashaj of L&M Builders, LLC - foreman for the development company (914) 833-3000. I saw that no digging was taking place, but the crew was laying plastic sheeting over the site where the oil had spilled (see photos in E-docs). The odors at the site were slight, except where the backhoe was sitting. My PID meter registered up to 2100 ppb of vapors at one foot above the soil with a slight breeze blowing. I showed Mr. Tagger and Mr. Trashaj that my PID meter was detecting up to 2100 ppb of total vapors. They said that the soil which comprises the platform for the excavator is contaminated with oil. I asked them when this soil will be removed and when the rest of the soil will be carted away. Mr. Trashaj said that they can't remove any more soil or else the steel sheet pilings will fall into the site. He said that the next step will be to install holdfasts for the steel pilings over the next two weeks. I told him that the contaminated soil has to be moved. He said that they will keep the contaminated areas covered with plastic at all times and if any gets ripped, then they will replace the damaged plastic. I told him that the contaminated soil which comprises the platform has to be removed next week. He said that this will be done as it doesn't affect the stability of the steel sheet pilings. Mr. Tagger assured me that when they dig, there are many trucks lined up to take loads of soil. He said that they will work hard to remove the rest of the soil after the holdfasts are installed and that they will maintain the plastic covering. After this, I left, but I told them that I will be back next week. 10/8/08 - Raphael Ketani. I spoke to the case manager for the site, Ryan Piper of DEC Region 2 Spills. I debriefed him on what when on at the site the two times I visited it and about the odor complaint. I told him about the installation of the plastic sheeting and that Randall Austin, Chief of the unit, had approved its use temporarily. I told Mr. Piper about the oil contaminated soil that was being used as a platform for the excavator and that no digging will take place over the next two weeks as tie backs need to be installed all around. I mentioned that I had informed Mr. Tagger, Mr. Trashaj, and Mr. Edgar that the contaminated platform soil had to go immediately. Mr. Piper told me to close out this case and refer it back to the active one, #0613440. Therefore, I am closing out this case today and referring it back to the initial spill case that is still active with Mr. Piper."

Remarks: "Unknown spill at a construction site. Caller had no further info."

DEC Memo: "09/09/08-Hiralkumar Patel. Visited site. Met Mark Trashaj, construction manager. Mark mentioned that as part of re-survey of the site, they need to excavate some soil to expose top of the some installed piles. After finishing excavation, found oil (similar to diesel or #2 fuel oil) coming out from ground. Observed free product and sheen on water collected inside excavation. Also found water in some piles (which are hollow round pipe) at about 25 ft bg and found sheen on water in pile. Heavy odors in the area. Spoke with consultant Environmental waste management associates. He mentioned

DEC Memo: "Sangesland spoke with Carol Owings of Key Environmental. She said the site is an industrial building that had several buried tanks removed. There is contaminated soil on the site that can not be removed, so the area will be treated in place. Key Environmental will work on a plan to submit to the DEC for review. Sangesland wrote a CSL letter and listed Ryan Piper as the contact for the site. CSL sent to one of the owners: William Cirillo, 33 Tiers St, Apt F, Bronx, NY 10464 5-31-07- EWMA- new contractor. will contact me. 2/6/08- DEC Piper reviewed RAWP addendum and approves. 05/20/08-Hiralkumar Patel. another spill reported (Spill #: 0801913) as found more tanks from site. during excavation, found three approx. 1000 gal size tanks, in middle of property. one tank was found empty and has been removed from ground. multiple holes noted on that tank. another two tanks sitting next to each other and has product in it. contractor will remove tank properly and will take endpoint samples. 09/10/08-Hiralkumar Patel. another spill reported (spill #: 0806482) as found oil coming out from ground in excavated area. 11/14/11- DEC Piper spoke with consultant. Report has been generated and will be sent shortly. 12/20/11- DEC Piper reviewed UST closure report. 5 permanent mw's installed . The wells were set to a depth of 25 feet b.s.g. and constructed with 10 feet of screen and 15 feet of riser. however groundwater is at 7.5- 8 feet bgs. On February 13, 2008 a representative of EWMA sampled MW-1 through MW-5 and MW-27 for VO+10, BN+15 and lead. Sample MW-1 was obtained from MW-1 (located downgradient of the former UST location and along 27th Street) and revealed concentrations of benzene at 471 ppb and in excess of the TOGS 1 ppb standard; and concentrations of toluene at 76.4 and in excess of the TOGS 5 ppb standard; and concentrations of ethylbenzene at 333 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 357 ppb and in excess of the TOGS 5 ppb standard; and concentrations of naphthalene at 99 ppb and in excess of the TOGS 10 ppb standard; Sample MW-27 was obtained from MW-27 (located along 27th Street) and revealed concentrations of benzene at 13 ppb and in excess of the TOGS 1 ppb standard; and concentrations of total xylenes at 11 ppb and in excess of the TOGS 5 ppb standard; Sample MW-2 was obtained from MW-2 (located along 27th Street) and revealed concentrations of benzene at 196 ppb and in excess of the TOGS 1 ppb standard; and concentrations of toluene at 27.7 and in excess of the TOGS 5 ppb standard; and concentrations of ethylbenzene at 243 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 578 ppb and in excess of the TOGS 5 ppb standard. The soil excavated that exhibited fill material type characteristics was transported by truck and delivered to Total Recycling Corporation (TRC) of Allentown, Pennsylvania. The excavated soils, including the soil that exhibited evidence of petroleum impacts from the former USTs were also transported to Total Recycling Corporation (TRC) of Allentown, Pennsylvania. Approximately 3,556 cubic yards of soil was excavated from the Property. In September

S108467893

2008, and following the initial four foot soil removal additional soil was removed from the site. The additional soil was removed because the original design of the building was changed to include a basement which required the additional removal of soil. Specifically, from September 29th 2008 through February 30th, 2009, representatives of Impact and EWMA coordinated the direct soil load out an additional 22 feet of soil from the Property. This phase of the excavation was coordinated during the installation of steel sheeting, tie backs and foundation piles following the initial excavation of soil to four (4) feet b.s.g. The soil excavated that exhibited fill material type characteristics was transported by truck and delivered to Total Recycling Corporation (TRC) of Allentown, Pennsylvania. The excavated soils, including the soil that exhibited evidence of petroleum impacts from the former USTs were also transported to Total Recycling Corporation (TRC) of Allentown, Pennsylvania. Approximately 19,556 cubic yards of soil was excavated from the Property. On May 20, 2008, during the Property redevelopment and the initial upper layer soil removal, three (3) additional unknown underground storage tanks (USTs) were encountered within the footprint and beneath the concrete floor of the former building. One (1) 1,000-gallon fuel oil and two (2) 550-gallon fuel oil USTs were observed during soil removal. The USTs were located in the footprint of the former building. Prior to the UST removal, Mr. Hiralkumar Patel of the (NYSDEC) visited the site, inspected the USTs, and approved the removal of the USTs. Mr. Patel requested that the USTs be properly removed, which included the pumping of liquids, cutting, cleaning and disposing of their contents. Soil samples were also requested by Mr. Patel in accordance with NYSDEC UST regulations and local and state guidelines. W.R. Grace Preprufe 300R/160R membrane was installed as a barrier between sub-grade soils and exterior surfaces of basement slab areas, and between vertical soil retention systems and exterior surfaces of sub-surface wall areas. These membranes are manufactured in accordance with ASTM Standards, demonstrate an ASTM E154 permeance of 0.010 Perms, and are comprised of multilayered composite high density polyethylene (HDPE) sheets. The 300R membrane has a thickness of 40 mils and the 160R membrane has a thickness of 32 mils. Ambient air venting systems are installed beneath the basement slab areas and the slab on grade areas. The basement sub-slab venting system consists of a 12-inch thick bed of 1/2-inch crushed stone beneath the slab, an embedded air inlet header with ambient air inlets at one end of the building, and an embedded vent header with venting outlets at the other end of the building. The slab-on-grade sub-slab venting system consists of a 6-inch thick bed of 1/2-inch crushed stone beneath the slab with a 6-mil polyethylene vapor barrier and a layer of geotextile fabric between the slab and the stone, an embedded air inlet header with ambient air inlets at one end of the building, and an embedded vent header with venting outlets at the other end of the building. The venting systems will be active, with radon fans and back draft dampers installed in the vent outlet piping at one end of the building at locations that can be inspected, monitored and maintained. The ambient air inlets will receive air from about two feet above ground surface at one end of the building, and the venting outlets will vent air from about twenty feet above ground surface at the other end of the building. The inlet and outlet locations can be inspected and monitored as needed. Together, the barriers and venting systems will provide two layers of vapor intrusion control and will provide a conservative and maintainable vapor intrusion control

COMMERICAL PROPERTY (Continued)

S108467893

system that will be an integral component of the planned building. During the week of September 3, 2010, Zebra Environmental Corp. of Lynbrook, New York installed five (5) permanent 2-inch monitoring wells at the property under the direct supervision of a EWMA representative. The intent was to re-install the replacement wells in or near the previous locations. Ground water was generally encountered between 10.0 and 12.0 feet b.s.g. Soil cuttings during installation activities were screened using a PID and split spoon samples were collected every five feet. EWMA did not note visual signs of contamination during the installation of the wells and no elevated PID readings were recorded. The monitoring wells were constructed using two-inch diameter, 0.020-inch machine slot Schedule 40 PVC well screen intersecting ground water at the time of the well installation. Solid two inch diameter Schedule 40 PVC completed the upper portion of the well. The connection between the riser and well screen was flush-joint threading with no adhesive required. The wells were filter packed with clean, No. 2 sand from the bottom of the borehole to approximately two feet above the top of the screen. The remaining annular space around the upper portion of each well was grouted using Benseal and cement. The monitoring wells were completed as flush mount wells with concrete pads. On September 20, 2010 a representative of EWMA sampled MW-1R, MW-27R, MW-2R, MW- 3R, and MW-5R for VO+10, BN+15 and lead. The results of the ground water sampling event revealed volatile organic compounds above the NYSDEC NYSDEC TOGS 1.1.1 Groundwater Standards/Criteria in the groundwater samples of four (4) monitoring wells, MW-1R, MW-27R, MW-2R, and MW-3R. EWMA notes that the results of the sampling event did not detect any exceedences in monitoring well MW-5R, which is located along West 28th Street. Laboratory analysis revealed the following: " Sample MW-1R was obtained from MW-R1 (located downgradient of the former UST location and along 27th Street) and revealed concentrations of benzene at 9.88 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 83.9 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 352 ppb and in excess of the TOGS 5 ppb standard; and concentrations of naphthalene at 16.1 ppb and in excess of the TOGS 10 ppb standard; " Sample MW-27R was obtained from MW-27R (located along 27th Street) and revealed concentrations of benzene at 5.11 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 54.3 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 227 ppb and in excess of the TOGS 5 ppb standard; " Sample MW-2R was obtained from MW-2R (located along 27th Street) and revealed concentrations of benzene at 3.29 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 39.9 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 173 ppb and in excess of the TOGS 5 ppb standard; and concentrations of naphthalene at 11.8 ppb and in excess of the TOGS 10 ppb standard; " Sample MW-3R was obtained from MW-3R (located along 28th Street) and revealed concentrations of benzene at 13.4 ppb and in excess of the TOGS 1 ppb standard; and concentrations of total xylenes at 10.1 ppb and in excess of the TOGS 5 ppb standard; " EWMA notes that the results of the September 20, 2010 sampling event did not detect any exceedences in monitoring well MW-5R, which is located along West 28th Street. On October 26, 2010 a representative of EWMA sampled MW-1R, MW-27R, MW-2R, MW-3R, and MW-5R for VO+10 and BN+15. The results of the ground water sampling event revealed volatile organic compounds above

S108467893

the NYSDEC NYSDEC TOGS 1.1.1 Groundwater Standards/Criteria in the groundwater samples of four (4) monitoring wells, MW-1R, MW-27R, MW-2R, and MW-3R. EWMA notes that the results of the sampling event did not detect any exceedences in monitoring well MW-5R, which is located along West 28th Street. Ground water flow is relatively flat throughout the Property however, topographic grade is to the southwesterly direction. Laboratory analysis revealed the following: " Sample MW-1R was obtained from MW-R1 (located downgradient of the former UST location and along 27th Street) and revealed concentrations of benzene at 4.99 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 186 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 808 ppb and in excess of the TOGS 5 ppb standard; " Sample MW-27R was obtained from MW-27R (located along 27th Street) and revealed concentrations of benzene at 3.62 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 35.2 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 156 ppb and in excess of the TOGS 5 ppb standard; " Sample MW-2R was obtained from MW-2R (located along 27th Street) and revealed concentrations of benzene at 3.60 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 19.3 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 85.8 ppb and in excess of the TOGS 5 ppb standard; " Sample MW-3R was obtained from MW-3R (located along 28th Street) and revealed concentrations of benzene at 4.33 ppb and in excess of the TOGS 1 ppb standard; and concentrations of total xylenes at 8.66 ppb and in excess of the TOGS 5 ppb standard; " EWMA notes that the results of the October 26, 2010 sampling event did not detect any exceedences in monitoring well MW-5R, which is topographically upgradient and located along West 28th Street. Two rounds of groundwater sample results from the wells indicate that the dissolved ground water contamination at the Property has been significantly reduced. However, groundwater contaminants continue to be present at low levels that exceed the GWQS in the perimeter ground water monitoring wells. Based on the presence of concentrations of contaminants above the GWQS in the upgradient wells, ground water contamination may be migrating on site from off site source(s). Due to the removal of site soils down to 25 feet and the water table, there are no source soils remaining at the site. Therefore, natural attenuation for the remaining residual ground water contaminants is proposed. EWMA recommend no further investigation and closure for NYSDEC Spill Case No. 0613440. The NYCDEP reviewed the Closure Report and the Property was provided with a Notice of Satisfaction. Based on work to date, this spill is closed. see edocs if warranted. "

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Sangesland spoke to Al Albano. Spill from a locomotive into a series of floor drains in Penn Station. They are working on cleaning the spill and will report back on 10/6/2010 10/8/10 Sangesland received this e-mail from Al Albano: The following provides details on how the above-referenced spill occurred and what was done to clean it up. Attached are the waste manifests for the removal/disposal of impacted material. Spill Summary October 5th, at approximately 11 AM, a compressor line on locomotive # 514 failed while it was parked at the west end of 18-Track at the LIRR's West Side Yard. West Side Yard is located in between 10th and 12th Avenue between 31st and 33rd Streets, in Manhattan. Lubricating oil from the ruptured line flowed into a retention tank on the underside of the locomotive until it overflowed the tank. Approximately 15 - 20 gallons of oil spilled onto concrete (under the tracks) and then into an adjacent storm drain. Upon discovery (within minutes of when the spill occurred), granular oil absorbent was spread over the spill area and into the catch basin to prevent the oil from migrating. In addition, several catch basins that were located down-stream of the initial catch basin were inspected to determine if the oil had spread through the piping

S110540912

network. Based on the inspection, it was determined that the oil (mixed with water) had been carried through a number catch basins to the south, before terminating in the line prior to reaching the catch basin at 4-Track. A catch basin at 11-Track that was readily accessible was plugged with absorbent pads to restrict the passage of any additional oil downstream. The storm drain on 4-Track is the next to last drain on the property and it was also plugged with oil absorbent pads to catch any oil that got through the plugged storm drain at 11-Track. When the LIRR's environmental cleanup contractor arrived (approximately 3:30) they cleaned up the used granular absorbent that was spread at the scene of the spill at 18-Track. They also plugged the outlet pipe in the storm drain on 4-Track with oil absorbent booms and removed/disposed the used pads from the storm drains at 4 and 11-Tracks. Starting at the storm drain at 18-Track, drains were flushed using a fire hose to push the oil all the way to the drain at 4-Track. As these drains were being flushed a pump truck was sucking up all the oil and water coming through the drainage system. The flushing continued in each storm drain until there was no visible oily sheen on the water. Oily sand at the bottom of the drain at 4-Track was removed. The outlet pipe boom was then removed in the drain at 4-Track and placed on the bottom of the drain at 4-Track to catch any stray bits of oil. This boom will be removed at a later date. A total of 1,090 gallons of oily water were sucked out of the drains during the flushing and 600 hundred pounds of oil soaked debris (pads, granular absorbent and miscellaneous material pre-existing in the catch basins) were removed. As mentioned above, copies of the waste manifests are attached. There was no rain during the cleanup effort to overwhelm the drainage system and no oil left the property. Based on the information provided above, it is requested that this spill be closed by the Department. If you have any questions or need any additional information, please don't hesitate to contact me. Thank you, Albert S. Albano Long Island Rail Road "

Remarks: "spill to paved area/also impacted catch basin/ clean up crew en route"

DEC Memo: "07/13/10 - DEC Piper spoke with Al Albano (347) 494-6020 of LIRR. Contractor spilled dielectric fluid around pad when changing gaskets. Leak occurred overnight and found this am. ABC tank en route with vactor. They will excavate and collect at least 1 endpoint. Results will be sent to DEC Ketani. 9/21/10 - Raphael Ketani. I received the 9/9/10 remediation report for the spill from Mr. Albano of the LIRR. I reviewed the report. Based upon the data and pictures contained therein, I determined that the spill had been cleaned up. As the spill had been cleaned up and as the data in the remediation report indicated that there were no PCBs or oil left in the soil, I have determined that the spill poses little or no threat to the public or the environment. Therefore, I am closing the spill case."

Remarks:

"Gasket failure onto soil. Clean up enroute today."

LIRR - WEST SIDE YARDS (Continued)

S106127120

NYC sewer system, therefore, vapors must be emanating from LIRR property. Trackdown investigation again did not reveal source. Vapor condition began to disipate inside control tower bldg. LIRR directed to ventilate space and continue to monitor. 12/22/03 TJD LIRR contacted. Vapors have not returned. Continuing to monitor. 1/23/04 TJD The following notes are copied from an e-mail meesage received from LIRR pertaing to this spill event: Per my discussions earlier today with Tim Fiske (LIRR Electrician), the Control Tower and ejector pit have been monitored since December 18, 2003 for the presence of petroleum odors and oil sheens. The petroleum odor, previously detected throughout most of the building, has dissipated; however, a faint odor remains in the ejector pit. Additionally, a light oil sheen has once again been detected at the bottom of the ejector pit. The current sheen may be the result of oil residue that has been hung up in the yard's drainage system. Recent precipitation may have resulted in this release. The LIRR plans to once again clean the ejector pit and all pumping equipment. Additionally, booms will be placed at both influent pipes at the bottom of the pit. The booms will help to isolate any residual oil that may enter the pit and will aid in identifying the source of the oil. A monitoring log will continue to be maintained for ejector pit observations and the documentation of petroleum odors in the building. I have scheduled an onsite meeting for Monday January 26th at 9:00 AM with AB Oil to plan the clean out and pumping of the ejector pit. If AB's personnel and equipment are available, work will be performed on Tuesday January 27th. I will advise you of our plans after meeting with AB Oil. Lew Wunderlich Environmental Engineer - LIRR System Safety 718-558-3252 3/23/05 - Austin - Transferred from DeMeo to Tibbe - end 06/8/05: LIRR cleaned pit again on 01/27/04. Sample of water taken from the pit. Results: ND. Pit was monitored thru April 13, 2004 without reoccurrence of odor or sheen. At least one heavy rain event but still no odor or sheen. MCT. "

Remarks: "LIRR reporting the control tower at West Side Storage Yard is being impacted by Diesel vapors. FDNY responded and temporarily evacuated bldg. LIRR to investigate problem."

Town: New York City
Record Added Date: 01/02/2013
Record Updated Date: 12/31/2014
Update By: BXANDERS
Site Description:

Location: The site is located at 514 - 520 West 28th Street in New York City, New York County and has an area of approximately 0.51 acres. It is between 10th and 11th Avenues and is bounded to the north by West 28th Street and the south by West 27th Street. Commercial structures are adjacent to the east and west boundaries. Site Features: Presently, the site is undergoing redevelopment. Prior to remediation and redevelopment, the two lots that made up the site contained a vehicle rental company and a scrap yard. Current Zoning and Land Use: The site is zoned commercial (C6-3) and is located in a commercial and residential area of the West Chelsea section of the Borough of Manhattan. Past Use of the Site: The site has been occupied by several residential structures, laundry cleaning, metal works, manufacturing, motor freight storage, automobile repair and a scrap yard. Site Geology and Hydrogeology: Prior to remediation, subsurface material present below the site included historic fill from prior developments that may have been used to stabilize soil or to elevate the existing ground. The fill included concrete, brick, cinders, and other construction debris mixed, silt, sand and gravel and was generally present from 1-10 feet below ground. Below the fill the shallow subsurface soil at the site consists of sands and silts, glacial till intermixed with lean clay. Depth to bedrock ranged from 15 to 25 feet below grade. The surface geology of Manhattan generally includes very thin layers of unconsolidated glacial deposits underlain by bedrock. Groundwater at the site is encountered at approximately 8 to 11 feet below ground surface. Regional groundwater flow direction is westerly toward the Hudson

Env Problem:

Soil: Investigations found no evidence of significant VOC contamination in soil. Trimethylbenzenes and xylenes were present in one of the 21 soil samples at concentrations above their unrestricted use SCOs, but well below residential use SCOs. PAHs were observed in about half of the samples at concentrations indicative of historic fill. Metals are also present in soil at concentrations typical of historic fill and urban background. However, mercury concentrations ranged from non-detect to 69.6 parts per million (ppm). The unrestricted use SCO for mercury is 0.18 ppm; restricted residential is 0.81 ppm. The entire site has been excavated beyond the site boundary on all side and to bedrock over about two-thirds of the site. The remaining soil meets unrestricted SCOs for all constituents. Groundwater: Cis-1,2-dichloroethene (DCE) was found in groundwater samples from two wells near the north-west corner of the site at concentrations up to 260 ppb. DCE has been documented in up-gradient groundwater and is not due to an on-site source. Soil Vapor: The presence of chlorinated VOCs in soil vapor and groundwater presents the possibility of vapor intrusion to future on-site buildings. The maximum concentrations of tetrachloroethene (PCE) and trichloroethene (TCE) were detected along the west boundary at the respective concentrations of 308 micrograms per cubic meter (ug/m³) and 828 ug/m³. The site has been excavated to below the water table and the new on-site building will have a water vapor barrier USTs Two

Health Problem: USTs were exhumed in August 2013 and disposed of off-site. Two more wells were removed during the site remediation activities. The site is fenced and covered by concrete, people will not come into contact with site related soil and groundwater contamination unless they dig below the surface. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains its water from a different source not affected by this contamination. Volatile organic compounds may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air or buildings, is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site related contaminants due to soil vapor intrusion does not represent a concern for the site in its current condition.

TEST BORE HOLE - SWK S/S W 27 ST BET 10 AVE & 11 AVE. Sherry R Login
96081,Senior Specialist reports that at this location on the above
date Jacques Winford Inc was digging test bore holes, and one of the
contractors Chad Pfeiffer reported to S.Login that the soil had an
odor of oil or fuel to it. this is a 3rd party spill and is a Z:
Abnormal Occurrence, for reporting reasons the amount found is one
pound. And she also adds she was advised to call this desk by Thomas
A Healy Environment, Health & Safety. There was no fire or smoke
involved and no sewer or waterway was affected. There were no
injuries related to the spill and no weather conditions contributed
to the hazards of the spill. There was no private property affected.
The source and cause of the spill is unknown. Logger F.Curtis 38078

DEC Memo: "CSL sent to property owner: (copy faxed to Mr Ray Kahn 212-330-7505)
Mr. Peter J. Filiberto 327 10th Ave Corp. 45-54 61st Street Woodside,
NY 11377 tanks will be pulled. 6/7/08- DEC Piper spoke w. Ray Kahn,
They have found 6 ust's filled w. water. They are pumping them out
today and will begin removal. endpoints will be collected. 10/1/07-
DEC Piper received call from Ray Espo. The excavation has been open for
some time now and is not covered. There is gross soil contamination
that is being washed down. Investigation work needed letter sent to
Mr. Peter J. Filiberto 327 10th Ave Corp. 10/9/07- DEC Piper reviewed
subsurface investigation of adjacent property, open spill 0700172. A
high rise is going to be built on four lots which includes 321-325
10th Ave. Soil borings revealed no VOC's in soil though BTEX
constituents and MtBE were found in GW. Some constituents were under
TAGM and some were over, particularly MTBE at 471 ppb at 321 10th
ave most downgradient well. The suspect source of the dissolved
contaminants are the adjacent gasoline station at 327 10th ave. (This
spill site)

***** 10/22/07- DEC Piper spoke with David Lent of
IVI Env. They are putting together a work plan. The site will be
redeveloped with a high rise. Excavation of the entire site will be
part of the project. IVI will conduct a subsurface investigation to
delineate the soils and gw. 2/23/16- DEC piper sent info req to 327th
10th Avenue Manhattan LLC 40-54 61st Street Woodside, NY 11377 3/9/16
- Obligado - Desk Duty - I received a call from Mr. Anthony
Nicoletti, who works on behalf of the Estate of Peter Filiberto,
(516-665-2659, tonick46@yahoo.com) inquiring why he received a
letter. He was under the impression that the spill issue has been
cleaned up and resolved. I told him the spill was still open and the
Case Manager is Ryan Piper who was currently out of the office but
could be contacted directly with regard to DEC requirements.
He requested prior violation notices. I emailed him the prior two
CSL letters and a copy of the Spill Report and advised him he could
submit a FOIL request if he requested additional information.
2/22/17- DEC piper emailed Anthony Nicoletti requesting site status.

 DEC Memo: "During quartely monitoring of transformers, crew noticed stains in four locations. of the four, three were minor though one was heavily stained. this area is a tight space adjacent to the building. Currently there is a different contractor working the area further hampering the cleanup. They are scheduled to work on friday. The oil does not contain pcb's (r-temnp)though they will contact us back with numbers. He will forward report when complete, manifests and analytical are in. DECPiper- I recieved and reviewed closure report documenting removal of contaminated soil and ballast. Endpoints revealed low level SVOC's. Area was backfilled. Based on work to date, this spill is closed. See e-docs if warranted."

Remarks: "slow leak discovered in transformer in rail yard today, unk how much leaked or when the leak started."

Update By:
Site Description:

06/12/2019
GWBURKE

Location: The Former NY Central Rail Yard site is located in an urban area in the Hell's Kitchen neighborhood of the Borough of Manhattan. The site is on the east side of 11th Avenue, north side of West 36th Street and south side of West 37th Street. The eastern boundary of the site is defined by a railroad easement. Site Features: The majority of the site is 20 feet below street level. The lower portion is used as a construction material staging area and the upper parking lot is used to park cars and horse-drawn vehicles. Current Zoning and Land Use: The site is zoned C6-4 (Commercial and Mixed Uses) and is currently being used as a construction staging area for structural steel, wood and roll off containers. Past Use of the Site: Former buildings on the site were built sometime prior to 1890 and utilized as a mix of numerous industrial facilities, warehouses, garages, stores and residential dwellings. Between 1930 and 1950, the buildings were demolished to make way for a NY Central Railroad rail line/yard. The rail line was present from 1951 through sometime prior to 1996. Site Geology and Hydrogeology: Soil at the site is described as historic fill material to a depth of approximately 5 feet below the surface followed by brown fine sand with silt which may or may not be native material. Bedrock is present directly below the fine sand/silt approximately 6 to 9 feet below the surface. The bedrock is a high-grade metamorphic rock consisting of a sequence of Cambrian and Ordovician age gneiss, schistose-gneiss, and marble. The bedrock is characterized by numerous faults and fractures, many of which contain groundwater. Groundwater at the site is present under perched conditions at a depth of approximately 7 feet below grade and is expected to flow west toward the Hudson River.

Env Problem:

Generally, the PAH and metals contamination is indicative of historic fill. Benzo(a)anthracene (5.7 ppm), benzo(a)pyrene (6.1 ppm), benzo(b)fluorathene (8.3 ppm), chrysene (6.0 ppm) and indeo(1,2,3-cd)pyrene (2.8 ppm) are present above restricted residential SCOs in up to 7 of the 12 soil samples collected. Mercury was observed at two locations above its restricted residential SCO and the protection of groundwater SCO at a maximum concentration of 1.23 ppm. PCB-1260 was detected in six of 12 locations above unrestricted SCOs. PCB-1260 was detected above its groundwater SCG at 0.16 ppb in one of the two groundwater samples obtained. Otherwise, the available data indicate that there were no exceedences in groundwater.

Health Problem:

Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

 DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL E2mis no. 142-723: On 05/08/02 at 10:34 Kerry Watts #19705 reported that at 09:00 the con Edison subcontractor while digging a excavation for a 460 volt reach in two locations (45.5' s/s/c w 27 st and 92.5' s/s/c w27 st) they found app. Five gallons in each location of something that smelled like fuel oil mixed in the dirt. This is a third party spill of unknown origin. Chem. lab to take samples. Updated 8/7/2002 @ 15:50 - As per Joe Fleigner, Project Specialist Construction Management EHS the Lab sample results indicated no contamination (Lab Seq. No. 02-04125 and 02-04126 date May 9 and 12). The soil was handled was C&D and disposed of at an approved recycling facility. Incident Closed. Updated by Bharat Mukhi, Project Specialist CM EHS."

Remarks: "caller had crew excvating and discovered unk oil in hole - sample will be taken - 2nd party spill - no clean up present time "

Mahat DEC Mahat called Brandon to get more updated information about the site. He mentioned that the abandoned tank has been removed and vertical delineation has been to the bedrock. A DFR of the spill date will be provided followed by recent DFR. 7/8/15: Mahat DEC Mahat received a DFR for 2/19/15 and it has been uploaded on D2 for reference. DEC is waiting for a complete report. 8/26/16: Mahat e/c : On 7/21/16, DEC Mahat received a closure report on the spill case. It has been uploaded on D2 for reference. Here are the conclusion of the report. The following spill investigation and closure activities were performed in response to NYSDEC Spill No. 1411001: -Removal, closure, and disposal of the UST by an FDNY-licensed and certified tank contractor -Removal of apparent petroleum-impacted historical fill, as confirmed by field observations and endpoint sample results -Off-site transportation of 370.20 tons of petroleum-impacted historical fill for disposal Collection of 14 endpoint soil samples (including two field duplicates) in accordance with NYSDEC CP-51 to document post-removal historical fill conditions -Endpoint soil sample data did not indicate spill-related contaminant concentrations above the CP-51 SCLs -Backfilling of source removal areas with clean -inch stone and on-site fill Based on the provided report, the Department does not warrant any further investigation on the spill case. Spill is closed on NYSDEC Spill Database. 7/25/16: Mahat e/c: On 7/21/16, DEC Mahat received a closure report on the spill case. It has been uploaded on D2 for reference. The report is under review." Contact Name:	BRANDON NATHE
DEC Memo:	"3/21/16-zhune spoke to Brandon Nathe (2120479-5590, Brandon said They have a pit for Wheel truing. They took the equipment our. They notice oil staining on the floor of the concrete pit. They will remove the concrete and investigate soil contamination. 3/22/16-Katlen A. Green Field Enginer-Corporate Safety Department from Long Island Rail Road sent the following email dated 3/22/16. Last week on 3/17/2016 a petroleum spill was called in for the Long Island Rail Road s West Side Yard located at 10th Avenue and 33rd Street, in Manhattan, New York. Spill No. 1511995 was assigned. During demolition of a portion of the train repair shop, the contractor on-site had indicated that it appeared that there was oil mixed with metal shavings located in a concrete pit that formerly serviced a wheel truing machine. Carbide bits are used to cut the train wheels to within required specifications. Cutting oil is not used during this operation. Metal shavings pass through a metal grate and are collected at the bottom of the pit. The shavings are transported off-site and sold for scrap. On 3/17/2016, the contractor working on-site removed the wheel truing machine located over the concrete pit. The machine was intact and was not found to be leaking any oil. However, at the time the contractor thought the metal shavings had an oily appearance and the spill was called in to the NYSDEC. This morning myself and Gloria Russo, Manager Environmental Planning and Compliance LIRR Corporate Safety Department inspected the wheel truing pit. The pit contained steel shavings that varied in color from silver to black. The shavings were moist from water that had pooled in the pit. There was not an oil sheen on the metal shavings or the pooled water. Oil absorbent spill pads in the pooled water did not contain oil. In addition, olfactory observations did not indicate the presence of petroleum. Attached are photos of the metal shavings and the pooled water. As described above no oil was present in the wheel truing pit and it was determined that this spill was called in error. Based on the visual and olfactory observations, the LIRR requests closure of this spill. Based on the email sent by LIRR-Kattleen Green this email is closed. "

 DEC Memo: "4/26/15 TJD Recall - LIRR reported a spill from portable generator affecting concrete and surrounding soil which occurred on 4/25/15. Due to access constraints, as the construction site is a secure area - redevelopment and building above the West Side Railyard, a morning inspection was scheduled. Upon arrival DEC met with a representative of the Prime Contractor (Tudor Perini) and constrction management consultant (Langan Engineers). The actual spill site is approximately 40 ft bgs and was reported to be associated with equipment failure on the portable generator. LIRR personnel (Paul Manskey) and their contractor AB Environmental were onsite but did not perform any remedial work as contractor personnel had performed necessary remedial work during the overnight shift. DEC has requested a short narrative of the cause of the reported discharge and the specific corrective actions that was taken to eliminate the defect which caused the spill. Awaiting further information from Langan and LIRR. 10/19/15 File review. Disposal manifest not received for an estimated 2 cu yds of petroleum impacted sand/stone associated with reported spill cleanup. Photo of spill and email communications have been uploaded to DECDOCS. Spill administratively closed."

DEC Memo: "11/24/08 - See eDocs for Con Ed report detailing cleanup and closure. Sangesland spoke to Dave Duke at Con Ed and Nick Chronopoulos at Petro Spill was from a vent line during a delivery. Less than 5 gal sprayed on side of building and onto sidewalk. Oil pads were laid down. Con Ed says some of the oil came near their sidewalk box (Con Ed men were working there when spill happened). Spill was cleaned. Very Heavy Rain in the 2-3 hours after the spill. Whatever was not cleaned up immediately by Petro was washed away in the downpour."
Remarks: "Caller is 3rd party reporting above spill. Unknown clean up at this time. Nick Chronopoulos from Petro oil (718-628-3305) called hotline at 10:51 a.m. to state approx 1 quart of oil spilled to sidewalk out of a vent from an overfill, due to a faulty gauge. Stated a pad was put down and does not believe any oil went into the catch basin. Oil was being delivered to 450 West 33rd. st.."

DEC Memo:

"DEC Piper spoke w. Vic, as per conversation plans are for a high rise. The property is three separate lots and all had some type of contaminants. Vic will forward Phase I and II and a work plan is going to be drawn up. This site is a E-designated site and will be monitored by the NYC DEP. High Line Development Group. Michael Shanbrook 212-937-8861 As per GZA, funding was lost in 2008. 1/9/12- csl sent to High Line Development Group. Michael Shanbrook 550 W 29th St. NY, NY 10001 04/24/14 - The project has been reassigned to M. MacCabe in the central office. Staff is reviewing a remedial work plan intended to address the chlorinated VOCs in groundwater. 02/25/16 - The site was remediated under the oversight of the NYC Office of Environmental Remediation project No. 13EHAN009M and has been closed."

Remarks: "WHILE TESTING SOIL AT ABOVE LOCATIONS FOUND CONTAMINATED SOIL: ALL PROPERTIES WERE EFFECTED"

Spiller Address: 511-515 WEST 35TH ST
Spiller Company: 999
Contact Name: AJ PIRES
DEC Memo: "11/6/08 - Raphael Ketani. The spill case was opened when contaminated soil was discovered in the ground during a phase II investigation. The call came in on 10/31/08. According to Property Shark, the site was a one story three vehicle garage. The garage has since been demolished. The block and lot are 707 and 26. The main address is 511 West 35 Street. The alternate address is 511-515 West 35 Street. According to ACRIS, the owner is HY707LLC, 20 Jay Street, Ste 1003, Brklyn, 11201. I checked the PBS database, but didn't find a registration for the site. However, a 550 gal. gasoline UST was below ground. I tried calling Mike Burke at Langan Engineering (212) 479-5413 and A J Pires (718) 222-8155 (from the architectural or design company). However, I could only leave messages. Mr. Burke returned my call. He said that the plan now is to build a parking lot as a temporary development measure. The owners just received the money from the bank, but their plans are not formalized yet. They will dig out the contamination to bedrock. I asked Mr. Burke for an investigation and remediation plan that includes soil and groundwater sampling. He said that he will send a RAP. Mr. Burke added that everyone is scheduled to meet this teusday, 11/11/08, to discuss the plans for the site. 11/7/08 - Raphael Ketani. Mr. Pires (py-reez) from Alloy Development (the parent company of HY707LLC) called to say that they are just starting the demolition of the building. A formal remediation plan will be sent to the DEC soon. He said that 8 borings were already done on site. He said that they went down 30 feet, but didn't hit groundwater. The site is on a hill near the Javitz Center. I asked him to include the soil boring logs in the remediation plan. He said he will. I asked him whether there were end point sample results. Mr. Pires said there are and that this will also be included in the plan. 11/13/08 - Raphael Ketani. Mr. Burke (212) 479-5413 called and left a message that the RAP is being prepared. However, excavation will need to take place. So he is working on a permit to do the excavation. He will also let the NYC DEP know that excavation will need to take place. 11/24/08 - Raphael Ketani. Susan Bianchetti (212) 479-5441 called to say that she is taking over the case from Mr. Burke. She said that she will have a well installed to comply with DEC's request that a groundwater sample be collected. She said that she can't put the well downgradient from the one location where there is contamination because there is no room for the drilling equipment. So she will put it just slightly upgradient. She said it's a small site and that this shouldn't make a difference. I told her the location sounded reasonable and to go ahead with the work. 12/12/08 - Raphael Ketani. Yesterday, I received the December 2008 Remedial Action Plan from Langan Engineering. I found the plan to be deficient. The number of borings that were performed during the first Phase II investigation were too few in number and too widely spaced to allow one to understand the subsurface conditions. I sent a letter to Ms. Bianchetti explaining this. I also wrote that they should wait at least 24 hours before developing the well. Lastly, I stated that they needed to wait at least two weeks from the date of well development before they collect a water sample. 12/17/08 - Raphael Ketani. I spoke to Ms. Bianchetti regarding the additional borings that were requested in the 12/12/08 DEC letter. She said that more borings weren't done before because the buildings were still up on the lots. However, she said, the buildings have all been knocked down

MAP FINDINGS

VACANT BUILDING (Continued)

S109373161

and the rubble has been carted away. I told her that we requested the additional borings because the plans showed that there were big areas where the subsurface conditions were unknown. I added that since the area is open, there should be no problem getting the equipment in there to do the requested borings. She said that she will talk to the client to have the additional borings performed. However, she wanted to hold off on the boring through the sidewalk. She said that a sidewall sample will be taken under the portion of the sidewalk that is near B-5 (the contaminated location). If this sample shows contamination, then Langan will do the sidewalk boring. I told her that this will be fine. I also told her that Langan has to get utility markouts before any borings are drilled. She said that she always does this because she doesn't want anyone to be injured. She mentioned that Gary Heath at the NYC DEP, 59-17 Junction Blvd. is her contact there. She said that she has groundwater data and waste characterization data. I asked that she send this information to DEC. She said she will. 12/22/08 - Raphael Ketani. Ms. Bianchetti (212) 479-5441 called to say that all of the soil on the three lots was going to come out anyway, and some of the bedrock. I told her that if all of the soil is coming out, then soil borings won't be necessary. I asked her whether they will do the sidewall sample adjacent to the sidewalk. She said that they will and that DEC will get the analytical data. I asked her for the groundwater data. She said that DEC will be sent this data, too. I asked whether all of the soil will be characterized. She said it will. I asked her for the characterization data and copies of all the manifests. Ms. Bianchetti said that all of this information will be submitted to DEC. She added that, in some places, the developer will go into the bedrock. I asked her why the plan to perform complete soil removal wasn't explained to the DEC in some document. She said that she wasn't aware either that this was what the developer intended to do. I asked Ms. Bianchetti to send DEC a revised plan and a reference to our conversation today and to the new agreement. She said she will do so. 12/23/08 - Raphael Ketani. Ms. Bianchetti sent me a letter from Langan by e-mail today. The letter stated the facts of our discussion on 12/22/08 regarding the changes in the DEC investigation and remediation requirements for the site. At the end of her letter, she requested a DEC letter confirming and memorializing our agreed upon new investigation and remediation strategy. I wrote a draft letter and submitted it to Jeff Vought, the acting unit head. He approved the letter and it was sent out. 2/4/09 - Raphael Ketani. Dan Cole of BEPA, NYC DEP (718) 595-4536 (59-17 Junction Blvd., 11th Floor, Elmhurst, 11373) called. He said that the site has an E-designation. He said that he was going to issue a no comment letter for the excavation, dependent upon the excavated area being small. However, I told him that they are supposed to excavate the entire area, and remove some bedrock. Mr. Cole said that he will make a site visit very soon. 2/13/09 - Raphael Ketani. I tried to contact Ms. Bianchetti (212) 479-5441 to find out whether progress had been made at the site, but could only leave a message. I tried to contact Mr. Cole regarding his site visit, but could only leave a message. Ms. Bianchetti called me back. She said that they haven't started excavating yet. They are waiting for the DOB excavation permits. They expect to get the permits in a week or two. She added that DEP isn't issuing anything yet as the developer doesn't have the full building plans drawn up right now. 3/13/09 - Raphael Ketani. I spoke to Ms. Bianchetti regarding progress at the site. She told me that they finally received the Notice of No

VACANT BUILDING (Continued)

S109373161

Objection from the NYC DEP. The receipt of this document was holding up everything. They submitted it to the lender so that the excavation work can start soon. The building will not be demolished until the real estate-development climate improves. She will keep me posted. 4/23/09 - Raphael Ketani. I spoke to Ms. Bianchetti regarding progress at the site. She said that now the only thing holding up progress is that the owner needs to get financing for the work. She said that she doesn't know when the excavation will start. The material that was going to be sent off as hazardous waste now needs to be resampled because the classification deadline has past. 7/8/09 - Raphael Ketani. Ms. Bianchetti (212) 479-5441 called to give me an update regarding progress at the site. She said that the owners are still working on removing some DOB stop work orders. Otherwise, excavation will start in a week or two. She said that the site is large and the excavation area is small. Bedrock is 10 feet down. Clean fill will be stored on site. Ms. Bianchetti will call me back in a week to let me know what is taking place. 8/4/09 - Raphael Ketani. I spoke to Ms. Bianchetti. She said that they are still waiting for the lender to disburse the money and for the DOB to remove the Stop Work orders. She said she will let me know when things start moving. 8/17/09 - Raphael Ketani. Ms. Bianchetti called today. She said that the work at the site will commence this thursday, 8/20/09. 8/20/09 - Raphael Ketani. I made an unannounced site visit and took pictures. I met Anthony of Langan Engineering. He was overseeing the excavation work that was taking place at the southwest corner of the property - where B-5 used to be. He said that 50 truck loads of gasoline contaminated soil had already been removed. I told him that he will need to send DEC the manifests for all of the soil that is removed and to take end points after he believes the contamination has been removed. He said that he will. The excavated pit measured about 45 feet long by 25 feet wide by 15 feet deep. The soil consisted of brick red brown, clayey, glacial till. The backhoe operator seemed to have hit bedrock in the very southwest corner of the pit. Dark gray soil could be seen in places. There was a slight gasoline odor about the pit area. I pointed out the dark gray soil to Anthony. He said that this was the contaminated soil and that it will be removed. There was nothing else to see. So I left the site. 9/22/09 - Raphael Ketani. I spoke to Ms. Bianchetti (212) 479-5441. She said that she was presently writing the closure report for the site. She said that contamination was found in the pit walls that I had seen during my site visit, and at the southwest corner of the site. However, she said, everything was excavated to the extent practical and safe (an occupied building was still standing next to the pit). She added that end point samples were taken and the results were below TAGM standards. She will give the report to the client this week and the DEC should have it by next week. 10/9/09 - Raphael Ketani. Today I received the Spill Closure Report dated October 2009 and submitted by Langan Engineering. 10/15/09 - Raphael Ketani. I finished my review of the October 2009 Spill Closure Report. End point sample SW-7 was taken right at the border with the sidewalk on West 35th Street. The analytical results show 5 TAGM VOC exceedences. SW-8, which is nearby and against a building, had one exceedence for n-propylbenzene. Both of these samples were near the original location of boring B5, which had 3 VOC exceedences from the leaking gasoline UST. Groundwater analytical results were not provided. Copies of the individual soil manifests were also not provided. I also re-reviewed the December 2008 Remedial

VACANT BUILDING (Continued)

S109373161

Action Plan that was submitted by Langan Engineering. This plan contained a copy of the 2007 Airtek Phase I, the NOVA Geophysical 7/11/07 report, and the Langan 8/6/07 Phase II. The Phase I mentioned the 550 gal. gasoline UST under the site. The NOVA Geophysical report stated that only minor anomalies were found during the survey of the 3 adjoining lots. These lots were the subject site (block 707, lot 26), 506-510 West 36th Street (block 707, lot 41), and 512 West 36th Street (block 707, lot 45). The Langan 2007 Phase II investigation found the contamination at boring B5 (lot 26). I checked the PBS registration for the three lots. No registrations were found. I sent Ms. Bianchetti (212) 479-5441 an e-mail requesting copies of the soil manifests and the groundwater analyticals. I also stated that the DEC wanted the contamination in the vicinity of SW-7 delineated and removed. Later, Ms. Bianchetti responded back via e-mail that she will send the groundwater analytical results and copies of the manifests. However, she wrote that excavating at the location of SW-7 would be a problem since it is close to the neighboring building. I left her a voice mail that we should discuss this issue by phone. 10/19/09 - Raphael Ketani. I spoke to Ms. Bianchetti (212) 479-5441 by phone. We agreed to Langan performing two (2) borings through the sidewalk near SW-7 in order to delineate the contamination. I told her that if there is significant contamination, then it will have to be addressed. She agreed. 11/6/09 - Raphael Ketani. Ms. Bianchetti sent me an off site boring plan by e-mail. The plan showed proposed borings B-1 and B-2. She asked whether these locations were alright, and, if so, whether the work can proceed immediately. I e-mailed back that she should move boring B-2 further west so that it is closer to boring SW-7, which had significant contamination. Then she can start the boring. She e-mailed back that she will do this. I received the November 2009 Spill Closure Report. One figure showed the two off-site (sidewalk) boring locations, B-1 and B-2. This closure report was essentially the same report as the October 2009 Closure Report. The November 2009 Closure Report contained the soil disposal manifests and the groundwater analyticals (in Appendix B). The groundwater results were almost completely non-detect, with the exception of one very low VOC hit. I had no comments regarding the entire report. 11/18/09 - Raphael Ketani. Ms. Bianchetti sent me an e-mail stating that tomorrow they will drill the two borings through the sidewalk. They will send off the samples for VOC and SVOC testing. 12/23/09 - Raphael Ketani. I tried to contact Ms. Bianchetti (212) 479-5441, but could only leave a message requesting the soil data for the two borings. Ms. Bianchetti (by-an-chettee) called me back. She said that they tried to install the two borings as requested. One boring was installed about where the DEC wanted it, but the other could not be placed close to SW-7. They tried 5 times, but either had refusal or the utilities were in the way. She said that there were a lot of utilities for the other building. Ms. Bianchetti said that the soil results weren't bad. The report was completed and given to the client to review. Once the client is done with it and has commented, then it will be sent to DEC. I told her that we just need the additional information regarding the two borings with a figure and data tables, not all of the previous appendices and reports that we have already received. She said that she will just send the small report for the two borings. 12/28/09 - Raphael Ketani. Ms. Bianchetti sent me the Amended Spill Closure Report (ASCR) today (see E-docs). I began my review of the report. 12/29/09 - Raphael Ketani. I finished my review of the ASCR. I

VACANT BUILDING (Continued)

S109373161

consulted with Jeff Vought (E.G. I of the Spills Unit and the acting head of the unit in Randall Austin's absence) regarding the analytical results for SW-7, and B-1 for the 6 to 8 foot interval. We both agreed that Langan needed to address the contamination at these two locations, and that they needed to obtain a representative groundwater sample from a location midway between the two locations. I sent Ms. Bianchetti an e-mail to this effect. 1/11/10 - Raphael Ketani. Ms. Bianchetti called me. She said that they will dig out the soil at SW-7 and at B-1. I sent an e-mail reminding her that they also needed to take a groundwater sample between these locations. 1/19/10 - Raphael Ketani. Ms. Bianchetti sent me an e-mail requesting that she be allowed to use well MW-6 near the southwest corner of the site and downgradient for obtaining the groundwater sample. She said it was from the Hudson Yards project for the DDC. She said that it may still be useable. I wrote back that this well is not close to B-2 and SW-7 where the significant contamination is, and, also, that this well may not even screen the same fracture in the bedrock. I insisted that a groundwater sample be taken between the two locations of concern. Ms. Bianchetti e-mailed me back that Langan will attempt to install a monitoring well in between B-2 and SW-7. 1/29/10/ - Raphael Ketani. A conference call took place today between Gared Dellavarie and A.J. Piries of HY707LLC, Ms. Bianchetti of Langan, and myself. Mr. Dellavarie and Ms. Bianchetti argued that they didn't want to dig out the gasoline contaminated soil under the sidewalk right now. They wanted to wait and dig it out 5 years from now when the entire lot will be dug out in order to put in the foundation for the building. I told them that the DEC has the mandate to see that contamination is removed in a timely manner in order to protect the public and the environment. Mr. Dellavarie asked what a timely manner would be. I told him that we expect the contamination from a typical spill to be removed in a matter of months, at the most, not years. I told him that we don't want to keep spill cases open. I added that if the responsible party doesn't act, then there are fines of \$37,500 per day per violation. I told him that HY707LLC owns the contamination as it came from their property and, therefore, HY707LLC is the responsible party. Subsequent to this statement, everyone became quiet for a moment. Ms. Bianchetti asked that she be allowed to use the well that is in the sidewalk in front of the site. She said that this well is near SW-7 and that she believed it was still functional. I told her that she could use it. I added that the contamination under the sidewalk has to be either dug out or treated. Mr. Dellavarie asked what if the contamination doesn't end there and extends under the street? I told him that, then, HY707LLC would be responsible for managing that contamination, as well. However, I said, let's not worry about something that we're not sure exists. I told everyone to deal with these two contaminated locations first, B-1 and SW-7, and then see where things lead. After this, the conversation ended. 3/11/10 - Raphael Ketani. Mike Burke of Langan (212)479-5413 called to say that Ms. Bianchetti had left Langan. He said that he wanted to know what needed to be done at the site. I told him that Ms. Bianchetti and DEC had agreed to taking a groundwater sample from a well from a previous project. I told him that this well is at the southwest corner of the site. He said that he had the groundwater results from that well and he will forward them to DEC. I added that we had also agreed to the excavation of the soil at locations of SW-7 and B-1. Mr. Burke said that he will talk to his client about this. 3/25/10 - Raphael Ketani. I spoke to Mr.

VACANT BUILDING (Continued)

S109373161

Burke today regarding the previous soil sampling, contaminated soil removal, and the groundwater sampling. Mr. Burke explained that well MW-6 is a Parsons-Brinkerhoff well from a previous investigation. He mentioned some of the analytical results and they were low enough, for the most part, that groundwater did not look as if it was presently being impacted by the soil contamination. Mr. Burke explained that the soil under the sidewalk could not be removed as there was bedrock directly underneath. Also, there are utilities under another contaminated soil location. So this soil also could not be removed. However, he said, the owners of the building next door are going to knock down their old building and take out the utilities. This will happen sometime in September 2010 and he believes that Langan will be able to remove this soil at that time. I asked Mr. Burke to send DEC a report explaining the site conditions and showing the bedrock, the boring locations, the location of MW-6, and the utilities. He said that he will do this. 4/9/10 - Raphael Ketani. Today I received the Progress Report dated 4/7/10 from Langan. I began my review of the report. 4/12/10 - Raphael Ketani. I finished reviewing the Progress Report. I found the report to be acceptable. The groundwater sample from the MW-SW (MW-6) well in the southwest corner was a little higher in benzene than TAGM limits (138 ppb) with two other analytes in the teens, but the rest of the analytes were at or below TAGM. So, I didn't consider groundwater to be an issue. I spoke to Mr. Burke (212)479-5413 about the progress report. I told him that the DEC's only concern is the high contamination at the location of sidewalk boring B-1. He said that the soil will definitely be dug out. However, he was not sure whether this excavation will be coordinated with the demolition of the building next door. If this doesn't work out, then the excavation of the soil below the sidewalk will take place earlier in the year, rather than at the end. 5/24/10 - Raphael Ketani. I tried to contact Mr. Burke regarding the excavation of the soil under the sidewalk, but could only leave a message. 5/25/10 - Raphael Ketani. I spoke to Mr. Burke (212)479-5413. He said that he spoke to the owners of the neighboring property recently and they told him that the demolition of their building will take place by the end of the summer. 7/28/10 - Raphael Ketani. Mr. Burke called me today. He said that the Javits Center will lease the property for 3 years and turn it into a parking lot. Allied will still be the owner of the site. The building next door is scheduled for demolition sometime during September or October of 2010. 9/2/10 - Raphael Ketani. I talked to Mr. Burke today about the site. He said that digging of contaminated soil under the sidewalk along West 35th Street and to the west will commence in about a month. He asked whether the owners have to break up the street if they find that the contamination extends beyond the sidewalk. I told him that there are a number of different methods for addressing off site contamination. I added that treatment solution injections can be used, in conjunction with confirmatory soil samples, to remove contamination that can't be dug out due to such things as closely spaced utilities. Mr. Burke commented that this sounded like a good idea. He said that bedrock is close to the surface, so he doesn't believe there will be much soil to dig out. I told him that digging to the bedrock in both directions may be the best way to get rid of the contamination. He ended the conversation by stating that he will give me an update some time later. 12/3/10 - Raphael Ketani. I spoke to Mr. Burke (212)479-5413. He said that no work has taken place since we last talked. He added that a meeting

VACANT BUILDING (Continued)

S109373161

took place with staff from the Office of Environmental Remediation at the Mayor's Office regarding the project. However, he hasn't heard anything since. He will contact OER again and see what they have to say. Then he will send me an e-mail update. 12/6/10 - Raphael Ketani. Mr. Burke called me today. He said that AJ from 35th Street has been talking to the Javitz Center people and there is an informal understanding in place right now. The Javitz Center people already have a drawing for the parking lot facility that they want. AJ will pay for the site cleanup and for hauling out the contaminated soil. However, the Javitz Center will pay for the heavy equipment to dig the soil out. So Mr. Burke is hopeful that a formal agreement will be reached and that the dig out will be completed early in 2011. 3/14/11 - Raphael Ketani. I tried to contact Mr. Burke (212)479-5413, but I could only leave a message regarding progress at the site. 3/15/11 - Raphael Ketani. Mr. Burke called me back. He said that the demolition contractor is on site and is presently beginning the demolition of the neighboring building. The work is expected to take until August 2011. Once the building is gone, the contaminated soil excavating will start. It is expected that the excavating will start sometime in September 2011. He will give me a two day notice regarding the excavating so that I can see the conditions. 6/7/11 - Raphael Ketani. I contacted Mr. Burke (212)479-5413 regarding progress at the site. He said that A-J hadn't called him in some time. I told him to call A-J and find out what is taking place and to call me back. Mr. Burke said that he will. Later, Mr. Burke sent me an e-mail. He wrote that the demolition contractor is behind schedule for knocking down the building next door. So the remediation excavation probably won't take place until the end of the year. 8/3/11 - Raphael Ketani. I spoke to Mr. Burke. He said that the empty lot is being used as a lay down area. Essentially, an open lot where equipment is stored. He stated that the demolition of the neighboring building is still on for the end of the year. 3/5/12 - Raphael Ketani. Mr. Burke (212)479-5413 called today. He said that the site has been excavated down to bedrock. However, the property owner has not bought the building next door. So it is still standing. The only work left to do is to excavate the contamination under the sidewalk. This will be done during March 2012. 5/24/12 - Raphael Ketani. Mr. Burke left a message that the excavation work will start during the week of June 4. 6/8/12 - Raphael Ketani. Mr. Burke informed me by phone that they had dug out as much contaminated soil as they could from under the sidewalk. They took soil samples. There were a lot of utilities in the excavation area. 7/18/12 - Raphael Ketani. I reviewed of the Langan Spill Closure Request report dated 6/27/12. The petroleum contaminated soil under the sidewalk along West 35th Street (south side of the site) was investigated and removed. The work took place from 6/6/12 to 6/8/12. About 650 square feet (439 tons) of contaminated soil were removed. The soil was shipped by Part 364 haulers to Soil Safe. Bedrock was exposed at 2 to 10 feet below grade. There were no fractures or weathered bedrock. Five (5) end points samples labeled SW-9 to SW-12 were taken on 6/7/12 in the former sidewalk area. These were sidewall samples only. There were only a small number of VOC hits and these were below the CP-51 standards. One soil sample, SW-10, had several very low benzo series exceedences which were just above the CP-51 standards. Fully signed manifests were included in Attachment D. Pictures of the former sidewalk area excavation were included in Attachment E. I found the report to be acceptable and drafted a letter for the review of Hassan

VACANT BUILDING (Continued)

S109373161

Hussein, supervisor of Unit C, Region 2 DER. The letter approved the data and the information in the report, but stated that the case would have to be presented to the Unit C closure committee for review and a decision regarding closure. 7/20/12 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out today. As a side note, the property at 511-515 West 35th Street used to contain a 1 story building which was a 3 bay garage. For a time, the building was used to house rental trucks. The adjoining property at 508 West 36th Street used to house a 1 story car service building. 8/22/12 - Raphael Ketani. I spoke to Mr. Burke (212)479-5413 today. I asked him whether he could take a groundwater sample from well MW-SW in the cleaned up area. He asked why. I told him that the last set of results were from 2010 and were a little old. He said that the well had been abandoned with concrete and was no longer there. I told him that this wasn't good and that somehow we needed more groundwater data. Mr. Burke said that the DEC had agreed two years ago that the benzene hit was not an issue. So more sampling wasn't expected. I told him that I didn't think that it was going to be an issue either, but I was told that 138 ppb of benzene was very high - even though the rest of the VOC analytes were no more than 17.8 ppb. He said that he will talk to his client. Lastly, I asked Mr. Burke to send the DEC a drawing showing where the vapor barrier will be installed in the foundation or under the foundation. He said that he will. 9/7/12 - Raphael Ketani. After a staff meeting regarding the site and the remediation project, an e-mail was sent to Mr. Burke with the following questions and comments: 1) please indicate on a broad map of the area the location of MW-6; 2) does Langan believe that MW-6 is in the same set of fractures as MW-SW; 3) what is the groundwater flow direction; 4) was a fill port or a fill pipe found leading to the former gasoline UST and what were their conditions; 5) was a fill port or fill pipe or any other feature seen at the location of SW-7 - particularly such that it may have hinted at the presence of contamination at this location and under the sidewalk; 6) Langan must submit a full table of the 2009 soil analytical results for sidewalk borings B-1 and B-2 listing all of the analytes that were tested for and their results (including the non-detects); 7) a new groundwater monitoring well must be installed at the former location of MW-SW that intersects the same fractures and a groundwater sample must be taken 9/10/12 - Raphael Ketani. Mr. Burke (212)479-5413 sent an e-mail today in response to the Department's comments in its 9/7/12 e-mail. Of note was that there was no comment regarding installing another groundwater monitoring well at the location of MW-SW. Mr. Burke states in his e-mail that there was plenty of opportunity to take more groundwater samples years ago before the well was abandoned. Also, of note was the response that the MW-6 Parsons-Brinkerhoff well IS the MW-SW well. The name was changed for the project. This was unknown to the Department until the sending of this e-mail. The 170 ppb of benzene in the groundwater at MW-6 was found in a sample taken on 8/29/07. While the 138 ppb benzene sample from MW-SW (MW-6) was taken on 2/9/10. So there was a significant drop in the benzene concentration without groundwater treatment. Lastly, Langan has no information regarding the gasoline UST. It was removed before his client bought the property. Mr. Burke requested a meeting on September 18 to discuss the site. I granted his request. 9/17/12 - Raphael Ketani. In preparation for our meeting tomorrow, Mr. Burke sent me a map showing where MW-6 was located, Table 1 with the soil VOC data for sidewalk samples B-1 and B-2, and Table 2 with soil SVOC

VACANT BUILDING (Continued)

S109373161

data for sidewalk samples B-1 and B-2. Table 1 for VOCs had very high minimum detection numbers in the parts per million range for sample B-1, but the annotations were almost all U for non-detect. Table 2 for SVOCs did not have results for boring B-1 at the 8 to 10 foot depth and for boring B-2 at the 6 to 8 foot depth. I will discuss these items with Mr. Burke at the meeting. 9/18/12 - Raphael Ketani. The meeting took place as scheduled. In attendance were A. J. Pires (py-reez), Vice President of Alloy Development (20 Jay Street, Ste 1003, Brklyn, 11201, (718) 222-8155, ajpires@alloyllc.com), his consultant Mr. Burke, Hassan Hussein - Unit C Supervisor, and myself. The meeting was not about data, but about a perception by Mr. Pires and Mr. Burke that the rules for closure had changed when the case and I had been transferred from the Spills Unit to Unit C headed by Mr. Hussein. Mr. Burke pointed out that the latest work plan from March 2012 had been approved by DEC. This plan included a statement at the end that after the work described within had been completed, then the case would be presented before the Closure Committee and the case would be closed. Mr. Burke also mentioned that I had told him some years back that the 2010 groundwater results from MW-SW were low enough that the well could be abandoned. I said that both statements were true and that, in the past, each Spills Unit case manager had the authority to close cases when it was determined that the site had been sufficiently remediated. Mr. Hussein stated that this was not the way to close a spill case and that how the Spills Unit does things is not relevant here in Unit C. Mr. Hussein added that he was put in charge to see to it that everyone adhered to the State soil and groundwater standards. That was the purpose of the Closure Committee review. Mr. Pires said that this sounded like a good idea to him, but he still thought that it was not right to refuse to close the case based upon the latest groundwater data. Mr. Burke stated that the source had been eliminated and that the groundwater concentrations had been attenuating, also. Mr. Hussein agreed to try and resolve the matter by presenting the case again to the Closure Committee, but he warned that he could not guarantee the outcome. Mr. Pires asked whether the case could be closed if the committee agrees to the closure. Mr. Hussein said Yes. With this, the meeting ended. 9/24/12 - Raphael Ketani. I received a Notice of No Objection for the site from Dan Cole of the NYC OER regarding performing 3 paving actions. 9/28/12 - Raphael Ketani. Mr. Burke had contacted staff at the Mayor's Office of OER and at the NYS DER in the Region 2 office. He had been contending that the case had been mishandled because the rules for closure had been changed and because the DEC was requesting another groundwater sample, even though he had been told he could close the well and had done so. I contacted Mr. Pires (718) 222-8155 regarding Mr. Burke's statements. I told him that this was unprofessional and that the DEC and him had reached an agreement that the spill case would be presented again for closure. I asked Mr. Pires to stop Mr. Burke's advocacy efforts as they were not going to get him anywhere and because they were ruining his relationship with the Department. Mr. Pires said he understood and would speak to Mr. Burke. 10/3/12 - Raphael Ketani. The case was presented today to the closure committee. The committee accepted the site for closure. Mr. Burke (212)479-5413 was informed that the closure committee had accepted the case. 10/5/12 - Raphael Ketani. I submitted a draft Spill Closure Letter to Mr. Hussein for his approval. The SCL was approved and was sent out. The case was closed."

Remarks: "Caller was doing a phase II inspection and found impacted soils.

DEC Memo: "Prior to Sept. 2004 data translation this spill Lead_DEC Field was VOUGHT 10/25/00 - REASIGNED FROM O'DOWD TO SANGESLAND. 12/2/2003 Transferred from Sangesland to Rommel. 1/8/04-Vought-Spill transferred from Rommel to Vought. 4/8/04-Vought-Spoke with Mathew Schieferstein (Anson Environmental 631-351-3555). Recently contracted by owners. Tradewinds were former contractor. Three monitoring wells onsite were abandoned. No groundwater analyticals on file. Vought approved Geoprobe samples at former well locations. Groundwater will be sampled for 8260/8270 and will take deepest dry soil samples or the highest PID. DEC will see report by 6/15/04. 9/23/05-FILE TRANSFERRED FROM VOUGHT TO OBLIGADO 2/2/06 - Obligado - called Anson Environemntal, Mathew Schieferstein no longer works there. Company was bought in 7/04. No recollection of this project. Will call back with any information they can dig up. 2/3/06 - Obligado - Received call from Fritzy Gros-Daillon at Anson Environmental. She said Anson in 2004 recommended geoprobing to owners however the Owners never approved work. No work was ever done. 10/16/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Called Steven Rosen Baum (212)687-3440 and left message to call me back. -QA 05/15/07: Called

Mr. Steven Rosenbaum at (212)972-0902 to discuss regarding spill. He was not there left message to call me back. -QA 06/19/07: Called Ms. Firtzi Mazzola (Anson Environmental) at (631)351-3555 to discuss regarding present status of the spill. She said that she will find out about the information of spill with in three four days and then she will call me back. -QA 10/03/07: Called Ms. Firtzi Mazzola (Anson Environmental) to discuss regarding spill. She was not there left message to call me back. -QA 06/26/2008: This spill case was transferred to A. Doronova. - AD 11/05/2008: Looked in Internet for the owner information without success. Spoke with Mr. Rosenbaum - attorney. Asked him about the owner of the property and contact information. He said that in order to obtain the contact number for his previous client (Four B's Realty) I have to submit him an official request. I spoke with Anson Environmental representative, he promised to get back with some information. AD 11/06/2008: Found name of the Company and its president. It is - Aviv Midtown Realty, Corp. and the president - Eyal Farage. Issued an Investigation Needed Letter. Sent it as a certified mail. DL to eDocs. AD 12/01/2008: Received an email from Jason Green of Aviv Realty saying: Dear Ainura Doronova: Please be advised that Aviv-Midtown Realty Corporation no longer owns 524 West 36th Street, New York, New York. On or about August 1, 2007, the City of New York acquired the property pursuant to eminent domain law. Best regards, Aviv-Midtown Realty Corporation The NYC Department which owns the property now is - DCAS. General phone: 212-669-7000 (ext - 5). Stuart Barth, Environmental Issues - 212-669-8722. Called and left him a message. He returned my call later. Explained him the situation. Mr. Barth said that he need to look in the files and that he will get back with some information. AD 12/29/2008: Did not receive any response yet. Called and left a new message to Mr. Barth of DCAS. AD 01/06/2009: Called and left a message to Mr. Barth. AD 02/11/2009: Called and spoke with Mr. Barth of DCAS. He asked to send him an email with information request. AD 02/11/2009: Sent an email letter to Mr. Barth. Response deadline is due March 27, 2009. AD 03/27/2009: No response was submitted yet. AD 04/01 2009: Called and left a message to Mr. Barth of DCAS. AD 04/07/2010: Contacted DDC office regarding the spill case. AD 05/19/2009: Received an e-mail from M. Asbagh of DDC saying: Dear Ainura: On or about April 7, 2009 you notified our office of an existing spill at the above site left unattended since Aug 2007 when NYDCAS acquire ownership of the property. According to the time line records provided to the URS, Jane Staten, your last contact on 4/01/09 to Mr. Barth of DECAS reg. Environmental issues went unanswered. I assume you have not heard from him yet. After a careful review of this case, we have decided to assign URS to begin the site history research, analysis and spill investigative process pending your official request directly to the DDC Transportation Unit, Deputy Program Director, Mrs Samani's attention at your earliest convenience. Thank you. Marcy Asbagh, Project Manager DDC/ Transportation Unit Tel: (718) 391-1292 05/28/2009: Discussed the site with J. Kolleeny of DER. Will send a Investigation Needed Letter to Ms. Samani of DDC. AD 05/29/2009: Sent the letter to A. Samani. (cc: J. Kolleeny-DEC; URS and eDocs). Response is due July 29, 2009. AD 06/08/2009: Received a phone call from J. Staten of URS. She asked if we have any investigation reports from Anson Environmental, Inc. (Anson) in our files. Told Ms. Staten that according to DEC remarks, Anson did not performed the site investigation, thus such reports were not submitted to DEC. Spoke with J. Vought of DER (one of the

FOUR B REALTY (Continued)

1001128017

first PM for the site), he confirmed that no report was received. No PBS registration was found for this address. AD 06/09/2009: Called and spoke with J. Staten of URS. Confirmed the absence of reports from Anson Env. and absence of PBS registration. Suggested to look in Sanborn map for USTs. There is some info in DEC remarks, about previous contractor - Tradewinds. Looked through old files and found hard copies of Tradewinds' investigation reports. Scanned the copies and DL them to eDocs. Sent an e-mail to J. Staten. AD 11/13/2009: Received the Soil and Groundwater Sampling Plan, submitted by URS Corporation (URS). Will review. AD 11/20/2009: Reviewed the work plan. The work plan proposes a soil and groundwater investigation in the vicinity of two former gasoline USTs and in a previously excavated area. URS will advance three soil borings followed by collection of soil samples, and install three groundwater monitoring wells, with soil and groundwater sampling. A summary report with conclusions and recommendations will be provided to DEC. AD 12/01/2009: Issued an approval letter to DEC with the following comment: " Two soil samples should be collected for analysis per boring/well: one sample from directly above the water table and a second from the sampling interval with the highest PID reading. In the absence of any field indications of contamination, a single soil sample should be collected from just above the water table. DL the letter to eDocs. AD 02/16/2011: Received an e-mail from URS saying: Hello Ainura, Recently URS mobilized to this site to conduct the site investigation plan that was approved by DEC but found that there was significant demolition occurring at the site. We have prepared a revised investigation plan based on these changed site conditions (see attached pdf). We would like a quick review and approval of this revised approach if possible as we now have an opportunity to aggressively address any impact present through excavation. I will call you later today to discuss. Figure 1 is the previous plan and Figure 2 is the new plan. The photos illustrate current site conditions. Thanks, Kevin J. Shanahan Project Manager URS Corporation 77 Goodell Street Buffalo, New York 14203 716-923-1215 AD 02/17/2011: Reviewed the Revised Soil and Groundwater Sampling Plan. The work plan proposes a soil and groundwater investigation in the vicinity of two former gasoline USTs. URS will advance six soil borings and install three permanent groundwater monitoring wells, with soil and groundwater sampling. A summary report with conclusions and recommendations will be provided to DEC. Discussed the plan with J. Kolleeny of DEC. AD 02/18/2011: Approved the work plan with the following comments: " If the previously installed wells MW-02 and MW-03 have been destroyed or are not functional, then of the six proposed soil borings, the one with the greatest field indications of contamination should be converted into an additional permanent groundwater monitoring well; " Two soil samples should be collected for analysis per boring/well: one from the sampling interval with the highest PID reading and a second from directly above the water table. In the absence of any field indications of contamination, a single soil sample should be collected from just above the water table. Sent the letter to A. Samani. DL pdf copy to eDocs. AD 06/28/2011: Received an e-mail from K. Shanahan of URS saying: Ainura, Today URS issued the findings of our recent soil and groundwater investigation plan for the above referenced site. We posted a pdf version to the web site and you will receive a hard copy in the mail. The report contained the following information: 1. Background/site history 2. Description of field work 3. Results of investigation work 4.

Recommendations for additional groundwater investigations 5. Recommendations for remediation This e-mail is intended to notify you that URS needs approval from you to proceed with installation of additional groundwater monitoring wells and for excavation in the area of the two former 550-gallon gasoline USTs. URS would like to proceed with the excavation work soon as the property is being redeveloped as part of the Hudson Yards project. It is our belief that it is appropriate to aggressively remediate the petroleum-impacted soils prior to property redeveloped since it may be difficult to access. Please expedite your approval given the fact the site is currently being redeveloped by HPD. Thanks, Kevin J. Shanahan Project Manager URS Corporation 77 Goodell Street Buffalo, New York 14203 716-923-1215 Reviewed the report. It states that six soil borings (B-3 through B-8) were installed and soil samples were collected on February 22, 2011. Two samples were collected from boring B-8. Only one sample was collected from each of the other borings since the driller encountered refusal at shallow depths, prior to reaching the water table. Although three monitoring wells were specified in the approved investigation plan, five monitoring wells were installed on March 15 and March 16, 2011. Groundwater and product levels were measured in the monitoring wells using an oil/water interface probe. The depth to groundwater ranged from 3.14 feet to 7.65 feet below the top of casing. Free product was detected in well MW-06 (0.1 foot). MW-06 was not sampled because product was present. A total of 0.25 gallons of product was removed from well MW-06 on March 31, 2011. There were no exceedances of the Title 6 NYCRR Part 375 Unrestricted Use standards for VOCs. However, the standards for one or more PAHs were exceeded in all samples. The type of contaminant (PAHs) is not typically associated with gasoline contamination as reported at this site. The presence of PAHs is commonly encountered in urban fill. Typical gasoline constituents (e.g. BTEX, MTBE, etc.) were detected in soil samples, but at very low concentrations. Groundwater analytical results show that there were numerous exceedances of VOCs in groundwater and a few exceedances of SVOCs. These contaminants are more typical of gasoline constituents. Summary tables with analytical results are missing in the report. The groundwater results show that product is present at the site and that groundwater contamination is significant in the general area of former USTs. VOC concentrations in samples collected from the wells closest to the former tanks, piping and fill (MW-07S and MW-07D) had the lowest VOC concentrations. This is contradictory to expectations and could support the case for other sources of contamination either on-site or off-site. The extent of groundwater contamination has not been completely delineated, suggesting that further groundwater investigation is necessary. URS recommendations for additional groundwater investigations are below: 1. Interim Remediation Measure (IRM): All monitoring wells including well MW-06 with a free product will be gauged on a monthly basis with an oil/water interface probe and product will be removed from impacted wells using a vacuum truck. URS will implement these measures immediately. 2. Soil Remediation: URS will excavate soils to the top of bedrock in an area measuring 30-feet by 30-feet in the vicinity of the USTs vault. Soil will be excavated to the top of bedrock which was encountered at a depth ranging from 4 to 8 feet bgs at the site. If it is conservatively assumed that the depth to bedrock in the excavation area will average 7 feet bgs, then approximately 230 cubic yards of soil will be excavated from the 900 square foot area. 3.

1001128017

Groundwater Remediation: The extent of the groundwater plume on site will be further defined by installing five new monitoring wells (MW-08 through MW-12). The final groundwater remediation approach will be based on the data collected from the additional groundwater investigation. Two general approaches will be considered for remediation as follows: 1.) groundwater extraction and treatment or; 2.) in-situ groundwater remediation by injection of oxidants, bioremediation stimulants, or surfactants into the bedrock aquifer. A detailed design for groundwater remediation will be submitted to the NYSDEC after the results of the groundwater investigation have been evaluated. Implementation of the groundwater remediation will depend on the redevelopment plan for the site and surrounding area and the schedule for redevelopment. To request submission of the missing tables. Will discuss it with J. Kolleeny of DEC. Changed site priority to P1. AD 06/29/2011: Called and spoke with K. Shanahan of URS. Asked to submit the tables. Later received the report with summary tables. Discussed the recommendations with J. Kolleeny of DEC. Issued and sent a letter to A. Samani approving the proposed recommendations with a comment regarding a soil sampling during new wells installation. DL pdf copy of the letter to eDocs. AD 05/16/2012: Called and spoke with K. Shanahan of URS regarding site status update. He said that EDC retained LiRo to do the excavation of the contaminated soil, and that the work will probably start in summer of 2012. URS is responsible for IRM, which consist of free product monitoring. He will send me an e-mail with summary info. AD 08/02/2012: met with DDC and URS on quarterly meeting. Discussed the site current situation and the next course of actions. Site status update report will be submitted to DEC. AD 09/14/2012; received the following e-mail from K. Shanahan: Ainura, Liro completed the tank removal and soil adjacent to the tank to bedrock this week (see attached photos). They want to replace well MW-7D and not well MW-7S since MW-7S only monitors the perched water in the tank excavation; the natural water table on-site is in the bedrock. Please let me know if DEC will require replacement of well MW-7S. I have attached the previous report we issued for this site. Thanks, Kevin J. Shanahan Senior Project Manager URS Corporation Will review. AD Looked at the data. Called and spoke with Kevin. Confirmed that re-installation of well MW-7S is not necessary. AD 09/17/2013: Received the following e-mail from K. Shanahan: Ainura, Recently URS was provided a report from LiRo Engineers documenting the remediation work they have completed at 524 West 36th Street under their contract with NYCEDC. LiRo is the Construction Managers involved with the Hudson Yards construction project in the area and they have control of the site. LiRo performed an excavation, removed an abandoned hydraulic oil tank, installed some wells and completed groundwater monitoring. URS now if back performing quarterly groundwater sampling. Today, we posted a new report to the website documenting the work completed at this site by URS and LiRo and we will be sending you a hard copy in the mail. If you have the time, it would be beneficial to review the report before our meeting on Thursday. If not, I will review during the meeting. Please note the area with groundwater contamination in the bedrock appears to be where a new road will be constructed. The report is attached for your convenience. Kevin J. Shanahan Senior Project Manager URS Corporation DL the report to eDocs. Will review. AD 09/19/2013: Attended quarterly meeting with DDC and URS. Discussed the site on this meeting. I was informed that due to some construction issues some of the proposed wells could not be

1001128017

installed. A meeting should be scheduled with all involved parties to discuss the different remediation scenarios after report will be reviewed. AD 09/24/2013: Received a hard copy of the URS's report. AD 09/16/2013: Reviewed the report. It states that 2011 Site Investigation - July Drilling for the additional site investigation was completed by Associated Environmental Services, Inc. (AES) between July 25 and July 27, 2011. Only three of the five proposed monitoring wells (MW-08A, MW-09A, and MW-10A) were installed. The remaining two wells could not be installed because there was insufficient clearance for the well proposed in the sidewalk and a second proposed well was located too close to the existing building foundation. The boring logs from these wells are generally consistent with the logs from previous borings at the site showing a 4-inch concrete layer and 6-inch stone layer underlain by fill and schist bedrock. Bedrock was encountered at depths between 3 and 9 feet bgs in these borings. On August 4, 2011, URS collected analytical samples from wells MW-04, MW-05, MW-07D, MW-07S, and newly installed wells MW-08A and MW-09A. Newly installed well MW-10A was found to be buried due to on-going construction at the site. Analytical results the August 2011 groundwater samples showed that no VOCs exceeded the NYSDEC Groundwater Quality Criteria in monitoring wells MW-07S, MW-08A, and MW-09A. However, total VOC concentrations in the remaining wells were elevated with 24,820 ppb in MW-04, 12,438 ppb in MW-05, and 5,705 ppb in well MW-07D. On October 11, 2011, URS met with representatives from HPD, EDC, the Hudson Yards Development Corporation (HYDC), and LiRo to discuss the on-going construction activities at the site and their impact on URS and the spill remediation efforts. During the meeting URS indicated the nature of the impacts and the need to complete the soil excavation (and possibly groundwater remediation) prior to new development. HYDC acknowledged the environmental conditions on-site and indicated a willingness to work toward environmental cleanup goals. Following this meeting it was determined that the best course of action would be for LiRo to oversee excavation of the contaminated soil and installation of the remaining monitoring wells from the original URS work plan (in addition to replacement of wells damaged during the soil excavation). Remedial Actions 2012-2013: In September 2012, LiRo completed excavation of the contaminated soil and the concrete vault as recommended by URS in the June 26, 2011 work plan. The remnants of what appeared to be a hydraulic system were also removed at this time. According to the report, all overburden soil from an area of approximately 30 feet by 30 feet was excavated to the top of bedrock and then backfilled with clean fill. A total of 57.71 tons of soil were removed for offsite disposal. LiRo reported that the bedrock in this area (outside of the tank vault) was encountered at depths of 2 to 3 feet bgs instead of 4 to 8 feet as reported in previous documents. Because of the shallow nature of the excavation, LiRo determined that sidewall samples from the excavation would not be possible. According to their report, no confirmation soil samples were collected. Monitoring wells MW-07S and MW-07D were destroyed during the excavation and were replaced by monitoring well MW-07R located approximately 9 feet to the east. LiRo also installed new monitoring wells MW-08 through MW-12 as presented in URS June 26, 2011 work plan. The depth to groundwater at the site has varied significantly in the past two years ranging from as little as 2 feet to as much as 18 feet bgs. It is possible that the fluctuating groundwater elevations are due to the contaminated soil excavation

FOUR B REALTY (Continued)

1001128017

and other construction activities at the site. Free product has been detected primarily at location MW-06. When this well was first installed in 2011, a product thickness of 0.10 feet was observed. URS collected an estimated total of 1.75 gallons of product from this well through 2012. Product thickness declined until only a sheen was observed during the last measurement on February 14, 2013. During the subsequent monitoring event on February 28, 2013, well MW-06 was reported as being destroyed. Occasional product sheens have been reported at other monitoring wells since 2011; however, these appear to be random occurrences and are not believed to indicate any significant quantity of free product at the site. The most recent product detections occurred in wells MW-08 and MW-09, which along with MW-06, are located west of the previous UST area. Groundwater samples were collected by LiRo in November 2012 and March 2013. A total of seven events have been conducted, the most recent by URS on June 28, 2013 where samples were collected from wells MW-04, MW-05, MW-08, MW-09, and MW-12. Results from this event show that no VOCs were detected above the NYSDEC Groundwater Quality Criteria in wells MW-05, MW-09, and MW-12. Well MW-04 was the most contaminated with 12,037 ppb total VOCs; well MW-08 contained only 75 ppb total VOCs. Well MW-07R was not sampled in June, but was sampled during the previous sampling event in March 2013 and found to have 12,233 ppb total VOCs. Based on the analytical data, URS concludes that the soil excavation had a positive impact in regard to the dissolved phase impacts at well MW-05. Total VOC concentrations at this well were on the order of 12,000 ppb prior to excavation of the contaminated soil, but have not been detected in three sampling events conducted following the excavation. Well MW-04 also showed similar improvement until the most recent sampling event in June. It appears that a small area of dissolved phase contamination exists in the vicinity of monitoring wells MW-04 and MW-07R, east of the original UST location. Results from well MW-08 show that the dissolved phase plume may extend somewhat to the north from the site. URS states that all known USTs, piping, fill ports, and other structures have been removed from the site. In regard to soil contamination, they expect that the 2012 excavation removed most or all of the contaminated soil at the site. Due to the apparent shallow depth to bedrock in the affected area, any remaining soil contamination at the site would be limited. Free product at the site was primarily limited to monitoring well MW-06. URS collected product from this well on eight separate occasions and the product levels appeared to be declining. However, the last measurement from this well before it was destroyed indicated that a product sheen still remained in the groundwater. Recent product detections occurred in wells MW-08 and MW-09, which along with MW-06, are located west of the previous UST area. It is expected that free product is no longer present in any significant quantity; however, this should be verified with future monitoring data. The most recent groundwater analytical data indicates that a small area of dissolved phase contamination exists in the vicinity of monitoring wells MW-04 and MW-07R, east of the original UST location. Only a few rounds of groundwater data have been collected following the excavation and removal of the contaminated soil. The extent of the contamination generally appears to be defined to the south, east, and west, assuming that the contaminant concentrations from the June sampling event remain relatively consistent. It is expected that the groundwater contaminant concentrations will decline further with continued monitoring. Based on the depth to groundwater and bedrock,

FOUR B REALTY (Continued)

1001128017

it appears that the groundwater contamination is located within the bedrock zone. Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: Actions: - Continue monitoring of the site product and water levels on a quarterly basis. - Continue quarterly groundwater sampling of all available monitoring wells. URS recommends that monitoring well MW-06 be replaced since there are no other monitoring wells in the immediate area and a product sheen was observed in the last measurement at this well. Monitoring well MW-06R will be used to determine whether free product is still present in this area and to delineate dissolved phase contamination to the west of the former USTs. - Install a monitoring well to the north and to the south of the most contaminated wells (MW-04 and MW-07R) to delineate dissolved phase contamination. - Reinstall a well at location MW-07D based on its historic indications of groundwater contamination, and to potentially serve as a groundwater treatment well. - URS will also assess the condition of the remaining monitoring wells and replace damaged or destroyed wells as site conditions will allow. - All four wells (and any additional replacement wells) will be constructed as four inch diameter wells to allow the wells to function as potential groundwater treatment wells in addition to monitoring wells. Because the wells are primarily replacements for previous wells, and since soil contamination was remediated, soil samples will not be collected for analysis. URS will document the presence of petroleum impacts by the field screening of soil recovered during drilling, including PID readings. DEC and DDC discussed this site on quarterly meeting and I was informed that due to some construction issues some of the proposed wells could not be installed. A meeting should be scheduled with all involved parties to discuss the site remediation. AD 10/15/2013: Left a message to A. Samani regarding a possible meeting. AD 10/29/2013: Called and spoke with A. Samani regarding the meeting with all involved parties. AD 11/01/2013: Scheduled the meeting for November 21, 2013. AD 11/21/2013: I and J. Kolleeny met with A. Samani, M. Asbad of DDC, K. Shanahan and Harvey Roberts of URS, Steve Frank and Dan Brodcen of LiRo. Discussed the site conditions and remediation options. DEC will approve the work plan proposed by URS with some modifications regarding well MW-6. LiRo will submit the GW analytical data from the excavation pit in the vicinity of the former MW-6. URS proposed to use EFR on most contaminated wells MW-04 and MW-07R and installation of ORC socks. AD 11/26/2013: Issued and sent an approval letter for the wells installation work plan. DL pdf copy of the letter to eDocs. AD 01/28/2014: Received the following e-mail from K. Shanahan of URS: Ainura, The purpose of this e-mail is to provide you with an update on our progress at this site and to request approval from you to adjust the locations of the proposed monitoring wells. We have attached our report dated September 19, 2013 for reference. During the meeting on November 21, 2013, it was decided that the following course of action should be implemented: 1. URS will redevelop the two most contaminated wells since the water table is within the bedrock and it the redevelopment may reduce the contaminant levels. 2. URS will sample all existing wells on-site. 3. Liro will provide as-built and existing utility drawings to allow URS to adjust proposed well locations, as necessary. 4. URS will install ORC socks into MW-04 and MW-07R, the two most contaminated well to stimulate bioremediation processes. 5. URS will install, develop and sample new wells MW-13, MW-14 and MW-15. Since the meeting, items 1 through 4 have been

Map ID
Direction
Distance
Elevation

MAP FINDINGS

Site

Database(s)

EDR ID Number
EPA ID Number

FOUR B REALTY (Continued)

1001128017

completed. Well MW-07R has been destroyed so the only remaining wells on-site are MW-04, MW-09 and MW-12. The groundwater sampling results from the December 30th event showed negligible VOCs in wells MW-09 and MW-12 but approximately 12,000 ppb in well MW-04 which is consistent with previous sampling events. The ORC socks were installed in well MW-04 on January 16, 2014. We requested from EDC (and their consultants) the base mapping for the new site developments including the new road, Hudson Boulevard East. The attached Figure 1 illustrates the current site conditions including the new road, the new power and storm sewer utilities, the two remedial excavation areas, the existing and previous wells, the three proposed well locations as specified in the last URS report and three alternate locations (shown in magenta color). We moved proposed well MW-13 from the middle of the road to one foot from the curb. This would allow future sampling when the road is open. We moved proposed well MW-14 from next to the underground cable TV line to inside the construction fence in between the new power utilities. Sampling this well after the new road opens may be impossible, but it will provide valuable delineation data in the near term. We moved proposed well MW-15 from directly over the new power conduit to one foot from the curb. This would allow future sampling when the road is open. Please let us know if you approve of these locations so we can schedule the drilling work. Thanks, Kevin J. Shanahan Senior Project Manager URS Corporation 77 Goodell Street Buffalo, New York 14203 kevin.shanahan@urs.com Office: 716-923-1215 Cell: 716-480-7352 Will review. AD 01/30/2014: Reviewed the submitted data. Discussed the proposed changes with J. Kolley of DEC. Issued and sent an approval letter to A. Samani of DDC. DL copy of the letter to edocs. AD 03/07/2014: Received a groundwater monitoring report for 3rd and 4th quarters of 2013. DL the report to eDocs. Will review. AD 04/10/2014: Reviewed the report. It states that during both the third and fourth quarter sampling events, groundwater samples were collected only from wells MW-04, MW-09, and MW-12. Results from the most recent event in December show that no VOCs were detected in wells MW-09 and MW-12. Well MW-04 contained 8,740 ppb total VOCs. Only minor concentrations of only a few semi-volatile organic compounds (SVOCs) were detected in the groundwater sample collected from well MW-09. Naphthalene was the only SVOC detected above criteria in well MW-04. According to URS, it appears that the soil excavation had a positive impact in regard to the dissolved phase impacts at the surrounding wells. It appears that a small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-04 and MW-07R (which was destroyed), east of the original UST location. Results from well MW-08 through June 2013 (the well was destroyed prior to the subsequent sampling event) show that lower concentrations of the dissolved phase plume may extend somewhat to the north from the site. Installation of the three additional monitoring wells as discussed above will help to delineate the remaining dissolved phase groundwater contamination at the site and facilitate future remediation. Conclusions: URS states that the most recent groundwater analytical data indicates that a small area of dissolved phase contamination exists in the vicinity of monitoring wells MW-04 and MW-07R, east of the original UST location. The extent of the contamination generally appears to be defined to the south, east, and west. It is expected that the groundwater contaminant concentrations will continue to decline during future monitoring events. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the

Map ID
Direction
Distance
Elevation

MAP FINDINGS

Site

Database(s)

EPA ID Number

FOUR B REALTY (Continued)

1001128017

bedrock zone. Proposals: Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: Actions: - Complete installation of monitoring wells MW-13, MW-14, and MW-15 in accordance with the January 2014 NYSDEC correspondence. - Continue monitoring of the site product and water levels on a quarterly basis. - Continue quarterly sampling of all available monitoring wells. The newly-installed wells will be included in future groundwater sampling events once they become available. Additionally, future groundwater samples will be analyzed for VOCs and naphthalene only. - Continue to install ORC socks in well MW-04 and other wells as appropriate. There is no proposals requiring DEC approval. AD 12/16/2014: Received Report for 2nd and 3rd Quarter of 2014. Will review. AD 01/22/2015: Reviewed the report. It states that the New York City Department of Housing, Preservation and Development (HPD) is redeveloping the site as part of the Hudson Yards project. LiRo Engineers (LiRo) is the construction manager for the redevelopment project, through a contract with the New York City Economic Development Corporation (EDC). This report presents the groundwater monitoring data for the second and third quarters of 2014 (through September). Monitoring wells MW-13, MW-14 and MW-15 were installed April 2 and 3, 2014 by AES, under URS supervision. Each soil boring was hand cleared manually to bedrock which was encountered from 1 to 4' bgs. One soil sample from above the bedrock was collected from each soil boring. No visual or olfactory evidence of petroleum contamination was noted. Some minor PID readings were recorded in the borings for wells MW-13 and MW-14. The highest PID reading at well MW-13 was 36.1 ppm at 4' bgs, and at well MW-14 the only PID reading was 8.1 ppm at 2' bgs. The analytical results for the soil samples were compared to 6NYCRR Part 375 Unrestricted Use SCOs. There were no VOCs detected above SCOs in any of the three soil samples collected. The highest concentration of total VOCs detected was only 1.3 ppb in the sample collected from MW-14. SVOCs were detected above SCOs in the samples from MW-13 and MW-15; total SVOCs in these soil samples were 15,757 ppb in MW-13 and 27,682 ppb in MW-14. Total SVOCs in MW-15 were only 2,587 ppb. Consistent with previous sampling events, all of the SVOCs that were detected above NYSDEC SCOs are PAHs and are attributed to urban fill, not petroleum contamination. In addition, naphthalene, commonly attributed to diesel fuel or heating oil petroleum contamination, was not detected above SCOs. In summary, based on soil sampling data collected, significant petroleum contamination was not present in the soil samples collected from borings MW-13, MW-14, and MW-15. Monitoring wells MW-13 and MW-14 were installed outside the area of soil excavation completed by LiRo in 2012. The sample collected from MW-15 located inside the excavation area likely represented fill material placed following the excavation. During the most recent sampling event in September 2014, GW samples were collected only from wells MW-04, MW-09, and MW-14. Wells MW-13 and MW-15 were not sampled because they contained product. No VOCs were detected in well MW-09. MW-04 had a total VOCs of 1,202 ppb and well MW-14 had a total VOCs of 3,219 ppb. Minor concentrations of SVOCs were also detected in these wells with 3 ppb TSVOCs in MW-09, 54 ppb in MW-04, and 130 ppb in MW-14. Naphthalene accounted for nearly all of the SVOCs detected. Conclusions: According to URS, the most recent GW data indicates that a small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-04, MW-13 and MW-14 (and possibly MW-15 which has not yet been sampled due to the

FOUR B REALTY (Continued)

1001128017

presence of free product). It is expected that the groundwater contaminant concentrations will continue to decline during future monitoring events, especially once the ORC sock installation can be implemented consistently. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following actions: - Continue monitoring of the site product and water levels on a quarterly basis. - Continue product recovery from affected monitoring wells. - Continue quarterly sampling of all remaining monitoring wells. Groundwater samples will be analyzed for VOCs and naphthalene only. - Continue to install ORC socks in wells MW-04, MW-13, MW-14, and other wells as appropriate. There are no proposals which require DEC approval at this time. AD 06/03/2015: Received the following e-mail from URS: Document report.sp9610133.20150603.524_w_36th.4th_q2014_and_1st_q2015.monitoring_rpt.pdf has been uploaded. This document is described as: Site Monitoring and Remediation Report for the Fourth Quarter 2014 and the First Quarter 2015 at the 524 West 36th Street Site. Please log in to <http://ddcreports.ursbufweb.com> to view the document. It can be found under the eDocs page. Thank you. URS Will review. AD 07/10/2015: Reviewed the report. It states that ORC Sock Installation URS utilizes ORC socks to stimulate bioremediation at sites where persistent dissolved phase VOCs are present at low concentrations. Environmental Assessment and Remediations (EAR) installed ORC socks in monitoring well MW?04 on January 16, 2014 since this was the only well that could be located due to construction at the site. On May 20, 2014, Clean Globe Environmental, Inc. (CGE) installed ORC socks at recently installed monitoring wells MW-13 and MW-14, but was not able to replace the ORC socks in well MW-04 since it was covered by a gravel pile. The most recent ORC sock installation was on December 9, 2014. During this event, CGE replaced the socks in monitoring well MW-14, but was not able to access any other monitoring wells at the site. URS will continue to attempt to replace the ORC socks in the affected monitoring wells approximately every six months. Historically, free product was detected primarily at location MW-06. When this well was first installed in 2011, a product thickness of 0.10 feet was observed. URS collected an estimated total of 1.75 gallons of product from this well through 2012. Product thickness declined until only a sheen was observed during the February 14, 2013 monitoring event. During the February 28, 2013 monitoring event, well MW-06 was reported as being destroyed. Occasional product sheens have been reported at other monitoring wells since 2011; however, these appear to be random occurrences and are not believed to indicate any significant quantity of free product at the site. No product was detected at the site from March 2013 (a sheen in well MW-08) until September 2014 when 0.02 feet of product was detected in MW-13 and 0.04 feet of product was detected in MW-15. These two wells are located 35 feet and 50 feet east of the former MW-6. An estimated 0.25 gallon of product was removed from each of these two wells during this event. During the November 2014 event, well MW-13 did not contain any product, but well MW-15 contained 0.01 feet; an estimated 0.25 gallons of product was removed from the well during this event. These two wells were inaccessible during the most recent event March 2015 since they were covered by ice and snow. Future monitoring events will indicate whether the product at these wells is persistent or simply a random occurrence. GW data: During the most recent

FOUR B REALTY (Continued)

1001128017

sampling event in March 2015, the groundwater from well MW-14 showed 2,306 ppb total VOCs and 74 ppb naphthalene. No other samples could be collected during this event. During the previous monitoring event in November 2014, the total VOCs in wells MW-09, MW-13, and MW-14 were 11 ppb, 890 ppb, and 641 ppb, respectively. URS concludes that the soil excavation had a positive impact in regard to the dissolved phase impacts at the surrounding wells. According to them, it appears that a small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-04, MW-13 and MW-14 (and possibly MW-15 which has not yet been sampled due to the presence of free product). Conclusions All known USTs, piping, fill ports, and other structures have been removed from the site. In regard to soil contamination, URS believes that the 2012 excavation removed most or all of the contaminated soil at the site. Due to the apparent shallow depth to bedrock in the affected area, any remaining soil contamination at the site would be limited. Free product at the site was primarily limited to monitoring well MW-06. URS collected product from this well on eight separate occasions and the product level appeared to be declining. However, the last measurement from this well before it was destroyed in 2013 indicated that a product sheen still remained in the groundwater. Product was last detected at this site in March 2013 until two of the newest monitoring wells at the site showed minor product in September 2014. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline during future monitoring events, especially once the ORC sock installation can be implemented consistently. Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: Actions: ? Continue monitoring of the site product and water levels on a quarterly basis. ? Continue product recovery from affected monitoring wells. ? Continue quarterly sampling of all remaining monitoring wells. Groundwater samples will be analyzed for VOCs and naphthalene only. ? Evaluate installation of replacement / additional monitoring wells at the site once construction activities at the site have been completed. ? Continue to install ORC socks in wells MW-13, MW-14, and other wells as appropriate. There are no proposals requiring DEC's approval. AD 09/24/2015: Received the following e-mail from URS: Document report.sp9610133.20150924.524_w_36th.2nd_and_3rd_q2015.monitoring_rpt.pdf has been uploaded. This document is described as: Site Monitoring and Remediation Report for the Second and Third Quarters 2015 for the 524 West 36th Street site. Please log in to <http://ddcreports.ursbufweb.com> to view the document. It can be found under the eDocs page. Thank you. Will review. AD 11/06/2015: Reviewed the report. This report presents the groundwater monitoring data for the 524 West 36th Street site for the second and third quarters of 2015 (through August). EAR conducted the most recent ORC sock installation on June 11, 2015 under contract R-97. During this event, EAR replaced the socks in monitoring wells MW-04 and MW-14, installed socks in MW-15, but could not access MW-13 for replacement of the socks in that well. URS will continue to attempt to replace the ORC socks in the affected monitoring wells approximately every six months. The wells available for sampling have varied during each event due to issues with access and wells that have been blocked, damaged, or destroyed. The only monitoring wells believed to be

1001128017

remaining at the site are MW-09, MW-13, MW-14, and MW-15. Well MW-04 was reported as destroyed but may still exist. The second quarter 2015 sampling event was conducted on May 7, 2015 and the third quarter sampling event on August 20, 2015. Wells MW-13, MW-14, and MW-15 were sampled during both events. Well MW-09 could not be located for the second quarter event. Over the past year, it appears that the overall general groundwater flow direction is to the west. The depth to groundwater at the site varies significantly and has ranged from as shallow as 2 feet bgs to as deep as 18 feet bgs since URS began monitoring in 2011. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. GW data: During the second quarter sampling event in May 2015, the total VOCs in wells MW-13, MW-14, and MW-15 were 6660 ppb, 152 ppb, and 9408 ppb, respectively. During the most recent sampling event in August 2015, the total VOCs in wells MW-13, MW-14, and MW-15 were 935 ppb, 1451 ppb, and 1651 ppb, respectively. No VOCs were detected in MW-09. It appears that a small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Newer monitoring wells MW-13 and MW-15 both showed a significant decrease in total VOC concentrations between the second and third quarter samples. Conclusions: The most recent groundwater analytical data indicates that a small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline during future monitoring events, especially once the ORC sock installation can be implemented consistently. Recommendations: URS recommends the following: Actions: " Continue monitoring of the site product and water levels on a quarterly basis. " Continue quarterly sampling of all remaining monitoring wells. Groundwater samples will be analyzed for VOCs and naphthalene only. " Evaluate installation of replacement / additional monitoring wells at the site once construction activities at the site have been completed. " Continue to install ORC socks in wells MW-13, MW-14, and MW-15 as appropriate. Proposals/Approval Required: " None. AD 03/10/2016: Received the following e-mail: Document report.sp9610133.20160309.524_w_36th.4th_q2015.monitoring_rpt.pdf has been uploaded. This document is described as: Monitoring and Remediation Report for the Fourth Quarter 2015 for the 524 West 36th Street site. Will review. AD 04/26/2016: Reviewed the report. This report presents the groundwater monitoring data for the 524 West 36th Street site for the fourth quarter of 2015 (through November). EAR conducted the most recent ORC sock installation on December 9, 2015 under contract R-97. During this event, EAR replaced the socks in monitoring well MW-15 only. EAR could not access MW-13, could not locate MW-04, and were unable to remove the previously installed socks from MW-14. EAR also reported the presence of asphalt in well MW-14. Well MW-04 is presumed destroyed from construction of the adjacent power vault. URS will arrange to have the ORC socks removed from well MW-14 and continue to attempt to replace the ORC socks in the affected monitoring wells approximately every six months. GW sampling: URS has been performing quarterly groundwater monitoring to document the progress of the remedial activities at the site. The groundwater samples are analyzed for petroleum-related VOCs and naphthalene using United States Environmental Protection Agency

1001128017

(USEPA) Method 8260B. The fourth quarter 2015 sampling event was conducted on November 16, 2015. Wells MW-09, MW-12, MW-13, MW-14, and MW-15 were sampled during the event. Over the past year, it appears that the overall general groundwater flow direction is to the west. The depth to groundwater at the site varies significantly and has ranged from as shallow as 2 feet bgs to as deep as 18 feet bgs since URS began monitoring in 2011. The depth to groundwater at wells MW-13, MW-14, and MW-15 has ranged from 2 feet bgs to 7 feet bgs over the last year. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. No product has been observed in any site wells since November 2014. During the most recent sampling event in November 2015, the total VOCs in wells MW-13, MW-14, and MW-15 were 5,576 ppb, 246 ppb, and 7,582 ppb, respectively. No VOCs were detected in MW-09 and MW-12. It appears that the soil excavation had a positive impact in regard to the dissolved phase impacts at the surrounding wells. It appears that a small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. The total VOC concentrations in the groundwater have shown a consistent downward trend over the past several years. The ORC socks appear to be effective in promoting the bioremediation of the remaining dissolved phase contamination in the groundwater. Conclusions: The most recent groundwater analytical data indicates that a small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline during future monitoring events, especially once the ORC sock installation can be implemented consistently. Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: " Continue monitoring of the site product and water levels on a quarterly basis. " Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene only. " Remove the ORC socks stuck in well MW-14. Inspect and evaluate the well for future use to collect representative groundwater samples. " Continue to install ORC socks in wells MW-13, MW-14, and MW-15 as appropriate. Proposals/Approval Required: " None. AD 05/26/2016: Received the following e-mail from URS: Document report.sp9610133.20160526.524_w_36th.1st_q2016.monitoring_rpt.pdf has been uploaded. This document is described as: Site Monitoring and Remediation Report for the First Quarter 2016 for the 524 West 36th Street site. Please log in to <http://ddcreports.ursbufweb.com> to view the document. It can be found under the eDocs page. Thank you. Will review. AD 06/23/2016: Reviewed the report. It states that the first quarter 2016 sampling event was conducted on February 15, 2016. Four wells: MW-09, MW-12, MW-13, and MW-15 were sampled during the event. Groundwater sampling could not be completed at well MW-14 because ORC socks are stuck in the well. The depth to groundwater at the site varies significantly and has ranged from as shallow as 2 feet bgs to as deep as 18 feet bgs since URS began monitoring in 2011. The depth to groundwater has been more consistent for the past several years, ranging from approximately 3 to 7 feet bgs at wells MW-13, MW-14, and MW-15. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone.

During the most recent sampling event in February 2016, the total VOCs in wells MW-13 and MW-15 were 11,663 ppb and 1,917 ppb, respectively. No VOCs were detected in MW-09 and MW-12. It appears that a small area of dissolved phase contamination remains in the vicinity of wells MW-13, MW-14, and MW-15. Conclusions: HPD has completed redevelopment of the site into a park and adjacent Hudson Boulevards East and West. All known USTs, piping, fill ports, and other structures have been removed from the site. In regard to soil contamination, URS believes that the 2012 excavation removed most or all of the contaminated soil at the site. Due to the apparent shallow depth to bedrock in the affected area, any remaining soil contamination at the site would be limited. This is supported by the 2014 soil sampling program discussed previously in this report. Free product at the site was primarily limited to monitoring well MW-06. URS collected product from this well on eight separate occasions and the product level appeared to be declining. The last measurement from this well before it was destroyed in 2013 indicated that a product sheen still remained in the groundwater. Product was last detected at this site in late 2014 in wells MW-13 (0.02 feet) and MW-14 (0.01 feet). The most recent groundwater analytical data indicates that a small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline during future monitoring events, especially once the ORC sock installation can be implemented consistently. Actions and Proposals: Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: Actions: Continue monitoring of the site product and water levels on a quarterly basis. Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene only. Remove the ORC socks stuck in well MW-14. Inspect and evaluate the well for future use to collect representative groundwater samples. Continue to install ORC socks in wells MW-13, MW-14, and MW-15 as appropriate. Make a concerted effort to ensure that the socks in wells MW-13 and MW-14 are replaced during the next socks installation event. There are no proposals requiring DEC approval at this time. AD 07/22/2016: Received the following e-mail from URS: Hi Ainura, Attached please find the report for 524 West 36th Street for the second quarter of 2016. A hard copy will be sent to you by regular mail. Thanks, Kevin J. This report presents the groundwater monitoring data for the 524 West 36th Street site for the second quarter of 2016 (through May). ORC Socks: URS utilizes ORC socks to stimulate bioremediation at sites where persistent dissolved phase VOCs are present at low concentrations. On June 13, 2016, AARCO Environmental Services Corp. (AARCO) removed the stuck ORC socks from MW-14. In addition, AARCO re-developed wells MW-14 and MW-15 by pumping until they were dry. Approximately 10 gallons of water were removed from each well. The ORC socks were then reinstalled in well MW-15. GW sampling: URS conducts quarterly groundwater monitoring to document the progress of the remedial activities at the site. The

1001128017

petroleum-related VOCs and naphthalene using United States Environmental Protection Agency (USEPA) Method 8260B. The third quarter 2016 sampling event was conducted on August 23, 2016. Wells MW-09, MW-12, MW-13, MW-14, and MW-15 were sampled during the event. No product has been observed in any site wells since November 2014. During the most recent sampling event in August 2016, the total VOCs in wells MW-13, MW-14, and MW-15 were 546 ppb, 1,776 ppb, and 372 ppb, respectively. No VOCs were detected above the NYSDEC Groundwater Quality Criteria in MW-09 and MW-12. Conclusions: it appears that the soil excavation had a positive impact in regard to the dissolved phase impacts at the surrounding wells. A small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline during future monitoring events, especially once the ORC sock installation can be implemented consistently. Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: - Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene only. - Continue to promote bioremediation of dissolved phase VOCs through installation of ORC socks in wells MW?13, MW?14, and MW?15 as appropriate. Proposals/Approval Required: - None. AD 02/17/2017: Received the following e-mail from USR: The document 524 West 36th Street - 4Q 2016 Report has been posted to the NYCDDC SharePoint site. Please click here to access the site. <https://nycddc.aecomonline.net/SitePages/Home.aspx> Please click here to open the file. https://nycddc.aecomonline.net/All_Reports/524%20West%2036th%20Street/report.sp9610133.2017-02-17.524_W_36th.4th_Q2016.monitoring_rpt.pdf Will review. AD 03/31/2017: Reviewed the report. This report presents the groundwater monitoring data for the 524 West 36th Street site for the fourth quarter of 2016 (through December). During the fourth quarter sampling event, there were no VOCs detected in MW-09 and MW-12. The total VOCs in wells MW-13, MW-14, and MW-15 were 2,528 ppb, 427 ppb, and 1,899 ppb, respectively. Several VOCs and naphthalene were present at MW-13, MW-14, and MW-15 at concentrations above NYSDEC groundwater criteria. As discussed in previous reports, it appears that the soil excavation had a positive impact in regard to the dissolved phase impacts at the surrounding wells. A small area of dissolved phase contamination remains in the vicinity of monitoring wells MW?13, MW?14, and MW?15. Conclusions HPD has completed redevelopment of the site into a park and adjacent Hudson Boulevards East and West. All known USTs, piping, fill ports, and other structures have been removed from the site. In regard to soil contamination, URS believes that the 2012 excavation removed most or all of the contaminated soil at the site. Due to the apparent shallow depth to bedrock in the affected area, any remaining soil contamination at the site would be limited. This is supported by the 2014 soil sampling program discussed previously in this report. Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: Actions: - Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW?14, and MW-15). <https://nycddc.aecomonline.net/SitePages/Home.aspx> Please click here to open the file.
https://nycddc.aecomonline.net/All_Reports/524%20West%2036th%20Street/report.sp9610133.2017-04-14.524_W_36th.1st_Q2017.monitoring_rpt.pdf
Uploaded the report. Will review. AD 05/19/2017: Reviewed the report. This report presents the groundwater monitoring data for the 524 West 36th Street site for the first quarter of 2017. ORC socks: EAR most recently replaced the ORC socks in well MW-14 on December 21, 2016; EAR could not locate wells MW-13 and MW-15 during this event. EAR returned to the site on February 24, 2017 and replaced the ORC socks in wells MW-13 and MW-15. URS will continue to replace the ORC socks in the affected monitoring wells approximately every six months. Conclusions: HPD has completed redevelopment of the site into a park and adjacent Hudson Boulevards East and West. All known USTs, piping, fill ports, and other structures have been removed from the site. In regard to soil contamination, URS believes that the 2012 excavation removed most or all of the contaminated soil at the site. Due to the apparent shallow depth to bedrock in the affected area, any remaining soil contamination at the site would be limited. This is supported by the 2014 soil sampling program discussed previously in this report. Free product at the site was primarily limited to monitoring well MW-06. URS collected product from this well on eight separate occasions and the product level appeared to be declining. The last measurement from this well before it was destroyed in 2013 indicated that a product sheen still remained in the groundwater. Product was last detected at this site in late 2014 in wells MW-13 (0.02 feet) and MW-15 (0.01 feet) until product was found in February 2017 in well MW-13 (0.03 feet). A petroleum absorbent sock has been installed in this well. The product recently detected at the site is likely a remnant of the product previously encountered at the site. The most recent groundwater analytical data indicates that a small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. MW-13 had 2328ppb on November 2016 sampling event. MW-15 had 667ppb on February 2017 event. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline during future monitoring events. Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: - Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene. - Continue quarterly free product recovery at well MW-13, periodically removing the absorbent socks to determine whether product continues to be present. - Continue to promote bioremediation of dissolved phase VOCs through installation of ORC socks in wells MW-13, MW-14, and MW-15 as appropriate. Proposals/Approval Required: - None AD 08/28/2017: Received an e-mail from URS: The document 524 West 36th Street - 2Q 2017 Report has been posted to the NYCDDC SharePoint site and copied to the public file store. Please click here to access the SharePoint site.
<https://nycddc.aecomonline.net/> Will review. AD 09/26/2017: Reviewed the report. This report presents the groundwater monitoring data for the 524 West 36th Street site for the second quarter of 2017 (through May). The second quarter 2017 sampling event was conducted on May 23, 2017. Wells MW-09, MW-12, MW-14, and MW-15 were sampled during the event. Well MW?13 was not sampled because it contained product. The depth to groundwater at the site varies significantly and has ranged from as shallow as 2 feet bgs to as deep as 18 feet bgs since URS began monitoring in 2011. The depth to groundwater has been more consistent for the past several years, ranging from approximately 3 to 7 feet bgs at wells MW-12, MW-13, MW-14, and MW?5. The depth to groundwater at well MW-09 is somewhat deeper, ranging from approximately 10 to 11 feet bgs over the past year. Based on the depth to groundwater and bedrock, it appears that the groundwater aquifer is located within the bedrock zone. During the second quarter sampling event, there were no VOCs detected in wells MW-09, MW-12, and MW-14. The total VOCs in well MW-15 was only 25 ppb. No naphthalene was detected in any of the samples that were collected during this event. It appears that the soil excavation had a positive impact in regard to the dissolved phase impacts at the surrounding wells. A small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Conclusions HPD has completed redevelopment of the site into a park and adjacent Hudson Boulevards East and West. All known USTs, piping, fill ports, and other structures have been removed from the site. In regard to soil contamination, URS believes that the 2012 excavation removed most or all of the contaminated soil at the site. Due to the apparent shallow depth to bedrock in the affected area, any remaining soil contamination at the site would be limited. This is supported by the 2014 soil sampling program discussed previously in this report. Free product at the site was primarily limited to monitoring well MW?06. URS collected product from this well on eight separate occasions and the product level appeared to be declining. The last measurement from this well before it was destroyed in 2013 indicated that a product sheen still remained in the groundwater. Product was last detected at this site in late 2014 in wells MW-13 (0.02 feet) and MW-15 (0.01 feet) until product was found in February 2017 in well MW-13 (0.03 feet). Small quantities of product continue to be found in well MW?13 as of the most recent monitoring event. The product recently detected at the site is likely a remnant of the product previously encountered at the site. The most recent groundwater analytical data indicates that a small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-13, MW-4 and MW-5. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline during future monitoring events. URS recommends the following: - Continue quarterly sampling of the five remaining monitoring wells (MW-9, MW-2, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene. - Remove the ORC sock currently

Will review. AD 12/15/2017: Reviewed the report. It states that HPD has completed redevelopment of the site into a park and adjacent Hudson Boulevards East and West. All known USTs, piping, fill ports, and other structures have been removed from the site. In regard to soil contamination, URS believes that the 2012 excavation removed most or all of the contaminated soil at the site. Due to the apparent shallow depth to bedrock in the affected area, any remaining soil contamination at the site would be limited. This is supported by the 2014 soil sampling program discussed previously in this report. Free product at the site was primarily limited to monitoring well MW-06. URS collected product from this well on eight separate occasions and the product level appeared to be declining. The last measurement from this well before it was destroyed in 2013 indicated that a product sheen still remained in the groundwater. Product was last detected at this site in late 2014 in wells MW-13 (0.02 feet) and MW-15 (0.01 feet) until product was found in February 2017 in well MW-13 (0.03 feet). No product was observed in well MW-13 during the most recent monitoring event in August 2017, although a petroleum absorbent sock is installed in the well. The most recent groundwater analytical data indicates that a small area of dissolved phase VOC contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline as a result of ongoing bioremediation processes. Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: - Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene. - Continue monthly free product recovery at well MW-13, periodically removing the absorbent socks to determine whether product continues to be present. - Continue to promote bioremediation of dissolved phase VOCs through installation of ORC socks in wells MW-13, MW-14, and MW-15 as appropriate. Proposals/Approval Required: - None 02/02/2018: Received the following e-mail from URS: The document 524 West 36th Street - 4Q 2017 Report has been posted to the NYCDDC SharePoint site and copied to the public file store. <https://nycddc.aecomonline.net/> Will review. AD 03/16/2018: Reviewed the Site Monitoring and Remediation Report for the Fourth Quarter 2017. This report presents the groundwater monitoring data for the 524 West 36th Street site for the fourth quarter of 2017 (through November). During the fourth quarter 2017 sampling event, there were no VOCs detected in the sample from well MW-09. The highest total VOCs was 1,767 ppb in well MW-15. The VOC levels in wells MW-12, MW-13, and MW-14 were lower, with total VOC concentrations of 27 ppb, 41 ppb, and 14 ppb, respectively. Naphthalene was only detected above NYSDEC criteria in the sample collected from well MW-15, at 30 ppb. It appears that the soil excavation had a positive impact in regard to the dissolved phase impacts at the surrounding wells. A small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Based on the most recent results from wells MW-13, MW-14, and MW-15, the ORC socks appear to be effective in promoting the bioremediation of the remaining dissolved phase contamination in the groundwater. However, the total VOC concentration in well MW-13 remains variable and is likely affected by the occasional detections of free-phase product noted at this location. The total VOCs at well MW-15 has also been increasing over the last two quarters. The most recent groundwater analytical data indicates that a small area of dissolved phase VOC contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline as a result of ongoing bioremediation processes. Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: - Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene. - Continue monitoring well MW-13 for product, periodically installing petroleum absorbent socks as needed. - Continue to promote bioremediation of dissolved phase VOCs through installation of ORC socks in wells MW-13, MW-14, and MW-15 as appropriate. Proposals/Approval Required: - None. AD 05/01/2018: Received the following e-mail from URS: The document 524 West 36th Street - 1Q 2018 Report has been posted to the NYCDDC SharePoint site and copied to the public file store. Please click here to open the file on the public server.

[report.sp9610133.2018-05-01.524_W_36th.1st_Q2018.monitoring_rpt.pdf](https://nycddc.aecomonline.net/All_Reports/524%20West%2036th%20Street/report.sp9610133.2018-05-01.524_W_36th.1st_Q2018.monitoring_rpt.pdf)

https://nycddc.aecomonline.net/All_Reports/524%20West%2036th%20Street/report.sp9610133.2018-05-01.524_W_36th.1st_Q2018.monitoring_rpt.pdf
Uploaded the report. Will review. AD 07/12/2018: Reviewed the report.

It states that during the first quarter sampling event, there were no VOCs detected in the sample from well MW-12. The highest total VOCs was 1,962 ppb in well MW-13. The VOC levels in wells MW-09, MW-14, and MW-15 were lower, with total VOCs of 13 ppb, 147 ppb, and 171 ppb, respectively. Naphthalene was only detected above NYSDEC criteria in the sample collected from well MW-13, at 17 ppb.

According to URS, it appears that the soil excavation had a positive impact in regard to the dissolved phase impacts at the surrounding

1001128017

wells. A small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. The total VOCs in the groundwater have shown a consistent downward trend over the past several years. Based on the most recent results from wells MW-13, MW-14, and MW-15, the ORC socks appear to be effective in promoting the bioremediation of the remaining dissolved phase contamination in the groundwater. However, the total VOCs in well MW-13 remains variable due to the occasional detections of free-phase product that also prevent the consistent use of ORC socks. The total VOCs at well MW-15 is also somewhat variable, but decreasing. Conclusions: The most recent groundwater analytical data indicates that a small area of dissolved phase VOC contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline as a result of ongoing bioremediation processes. Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: - Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene. - Continue monitoring well MW-13 for product, periodically installing petroleum absorbent socks as needed. - Continue to promote bioremediation of dissolved phase VOCs through installation of ORC socks in wells MW-13, MW-14, and MW-15 as appropriate. Proposals/Approval Required: - None AD 08/07/2018: Received the following e-mail from URS: The document 524 West 36th Street - 2Q 2018 Report has been posted to the NYCDDC SharePoint site and copied to the public file store. Please click here to open the file on the public server.

Please click here to access the SharePoint site.
<https://nycddc.aecomonline.net/> Uploaded the report. Will review. AD 09/05/2018: Reviewed the report. This report presents the groundwater monitoring data for the 524 West 36th Street site for the second quarter of 2018 (through May). Due to the detection of free product in well MW-13, URS directed EAR in July 2017 under work order R-97-08 to remove the ORC socks from this well and install a petroleum absorbent sock. Free product at the site is discussed further below. EAR most recently replaced the ORC socks in wells MW-14 and MW-15 on May 25, 2018; EAR reported that a petroleum absorbent sock was still located in well MW-13. EAR is scheduled to install ORC socks in MW-13 in August 2018. URS will continue to replace the ORC socks in the affected monitoring wells approximately every six months. Based on the most recent results from wells MW-13, MW-14, and MW-15, the ORC socks appear to be effective in promoting the bioremediation of the remaining dissolved phase contamination in the groundwater. However, the total VOC concentration in well MW-13 remains variable due to the occasional detections of free-phase product that also prevent the consistent use of ORC socks. The total VOC concentration at well MW-15 is also somewhat variable, but decreasing. Free product: No site monitoring wells contained product after November 2014 until the monitoring event on February 13, 2017 when product was measured in

well MW-13 at a thickness of 0.03 feet; a petroleum absorbent sock was installed in the well during this event. The petroleum absorbent sock was removed and replaced with an ORC sock on February 24, 2017. Product was found in MW-13 again during the monitoring event in May 2017 at a thickness of 0.01 feet and in June 2017 as a sheen. A petroleum absorbent sock was not installed during these events due to the presence of ORC socks in the well. The ORC socks were removed in July 2017 and replaced with a petroleum absorbent sock. In October 2017, after more than three months in well MW-13, the petroleum absorbent sock was only 25% saturated with product; the sock was removed in October 2017. No product has been observed in the well through the most recent monitoring event in May 2018. Future monitoring for free product will be conducted during the quarterly groundwater sampling events. Conclusions: HPD has completed redevelopment of the site into a park and adjacent Hudson Boulevards East and West. All known USTs, piping, fill ports, and other structures have been removed from the site. In regard to soil contamination, URS believes that the 2012 excavation removed most or all of the contaminated soil at the site. Due to the apparent shallow depth to bedrock in the affected area, any remaining soil contamination at the site would be limited. This is supported by the 2014 soil sampling program discussed previously in this report. Free product at the site was primarily limited to monitoring well MW-06. URS collected product from this well on eight separate occasions and the product level appeared to be declining. The last measurement from this well before it was destroyed in 2013 indicated that a product sheen still remained in the groundwater. Product was last detected at this site in late 2014 in wells MW-13 (0.02 feet) and MW-15 (0.01 feet) until product was found in February 2017 in well MW-13 (0.03 feet). The petroleum absorbent sock was most recently removed from MW-13 in October 2017; no product has been observed in this well through May 2018. The most recent GW data indicates that a small area of dissolved phase VOCs remains in the vicinity of wells MW-13, MW-14, and MW-15. Based on the depth to GW and bedrock, it appears that the groundwater contamination is located within the bedrock zone. It is expected that the GW contaminant concentrations will continue to decline as a result of ongoing bioremediation processes. Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: - Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene. All wells will be monitored for free product prior to groundwater sampling. - Continue to promote bioremediation of dissolved phase VOCs through installation of ORC socks in wells MW-13, MW-14, and MW-15 as appropriate. Proposals/Approval Required: - None AD 11/29/2018: received the following e-mail from URS: The document 524 West 36th Street - 3Q 2018 Report has been posted to the NYC DDC SharePoint Site. Please access required files: Please click here to pen the file on the Public Server: Public Folder File Link (no password required) Please click here to access the SharePoint Site: <https://nycddc.aecomonline.net> The Public File Server is at the link below for archived reports: Public Server Directory Uploaded the file. Will review. AD 12/14/2018: Reviewed the report. This report presents the groundwater monitoring data for the third quarter of 2018 (through August). The third quarter 2018 sampling event was conducted on August 29, 2018. All wells were sampled during the

1001128017

event. Over the past year, it appears that the groundwater flow direction is to the west. The depth to groundwater at the site has ranged from as shallow as 2 feet bgs to as deep as 18 feet bgs since URS began monitoring in 2011. The depth to groundwater has been more consistent for the past several years, ranging from approximately 3 to 7 feet bgs at wells MW-12, MW-13, MW-14, and MW-15. The depth to groundwater at well MW-09 is somewhat deeper, ranging from approximately 10 to 11 feet bgs over the past year. Based on the depth to groundwater and bedrock, it appears that the groundwater aquifer is located within the bedrock zone. GW data: During the third quarter sampling event, there were no VOCs detected in the samples collected from wells MW-09, MW-12, and MW-14. The total VOCs in wells MW-13 and MW-15 were 456 ppb and 64 ppb, respectively. Naphthalene was not detected above NYSDEC criteria in any of the samples collected during this event. A small area of dissolved phase contamination remains in the vicinity of wells MW-13, MW-14, and MW-15. The total VOCs in the groundwater have shown a consistent downward trend over the past several years. However, the total VOCs in well MW-13 remains variable due to the occasional detections of free-phase product that also prevent the consistent use of ORC socks. The total VOCs at well MW-15 is also somewhat variable, but decreasing. Conclusions: HPD has completed redevelopment of the site into a park and adjacent Hudson Boulevards East and West. All known USTs, piping, fill ports, and other structures have been removed from the site. In regard to soil contamination, URS believes that the 2012 excavation removed most or all of the contaminated soil at the site. Due to the apparent shallow depth to bedrock in the affected area, any remaining soil contamination at the site would be limited. This is supported by the 2014 soil sampling data. Free product at the site was primarily limited to well MW-06. URS collected product from this well on eight separate occasions and the product level appeared to be declining. The last measurement from this well before it was destroyed in 2013 indicated that a product sheen still remained in the groundwater. Product was last detected at this site in late 2014 in wells MW-13 (0.02 feet) and MW-15 (0.01 feet) until product was found in February 2017 in well MW-13 (0.03 feet). The petroleum absorbent sock was removed from MW-13 in October 2017; no product has been observed in this well through August 2018. According to the consultant, the most recent groundwater analytical data indicates that a small area of dissolved phase VOC contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Based on the depth to groundwater and bedrock, it appears that the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline as a result of ongoing bioremediation processes. Actions and Proposals Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: - Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene. All wells will be monitored for free product prior to groundwater sampling. - Continue to promote bioremediation of dissolved phase VOCs through installation of ORC socks in wells MW-13, MW-14, and MW-15 as appropriate. No proposals which require DEC approval at this time. AD 03/01/2019: Received the following e-mail from URS: The document 524 West 36th Street - 4Q 2018 Report has been posted to the NYC DDC SharePoint site. Please access required files: Please click

Will review. AD 03/19/2019: Reviewed the report. This report presents the groundwater monitoring data for the fourth quarter of 2018 (through November). The fourth quarter 2018 sampling event was conducted on November 26, 2018. All wells were sampled during the event except well MW-15, which was blocked by an apparent disabled police vehicle. During the fourth quarter sampling event, there were no VOCs detected in the samples collected from wells MW-09, MW-12, and MW-14. The total VOCs in well MW-13 was 1,612 ppb. Well MW-13 also contained naphthalene above NYSDEC criteria, at 20 ppb. It appears that the soil excavation had a positive impact in regard to the dissolved phase impacts at the surrounding wells. A small area of dissolved phase contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. No free product has been observed in the well MW-13 through the most recent monitoring event in November 2018. Future monitoring for free product will be conducted during the quarterly groundwater sampling events. Conclusions: The most recent groundwater analytical data indicates that a small area of dissolved phase VOC contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Based on the depth to groundwater and bedrock, the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline as a result of ongoing bioremediation processes. Free product was last detected at this site in late 2014 in wells MW-13 (0.02 feet) and MW-15 (0.01 feet) until product was found in February 2017 in well MW-13 (0.03 feet). The petroleum absorbent sock was removed from MW-13 in October 2017; no product has been observed in this well through November 2018. Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: - Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene. All wells will be monitored for free product prior to groundwater sampling. - Continue to promote bioremediation of dissolved phase VOCs through installation of ORC socks in wells MW-13, MW-14, and MW-15 as appropriate. Although there are no impacts at up-gradient well MW-12, URS will also install ORC socks at this location to increase the flow of oxygen diffusing into the remaining area of dissolved-phase contamination. Proposals/Approval Required: - None AD 10/24/2019: Received the following e-mail from URS: The document 524 West 36th Street - 3Q 2019 Report has been posted to the NYC DDC SharePoint site. Based on the depth to groundwater and bedrock, the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline as a result of ongoing bioremediation processes. GW data Well TVOSs (ppb) MW-12 ND MW-13 1,828 MW-14 86 MW-15 636 Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: Actions: - Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene. All wells will be monitored for free product prior to groundwater sampling. - Continue to promote bioremediation of dissolved phase VOCs through installation of ORC socks in wells MW-13, MW-14, and MW-15 as appropriate. Although there are no impacts at up-gradient well MW-12, URS will also install ORC socks at this location to increase the flow of oxygen diffusing into the remaining area of dissolved-phase contamination. Proposals/Approval Required: - None AD 02/06/2020: Received the following email from URS: The document 524 West 36th Street - 4Q 2019 Report has been posted to the NYC DDC SharePoint site. Please access required files: Please click here to open the file on the Public Server: Public Folder File Link (no password required) Please click here to access the SharePoint Site: <https://nycddc.aecomonline.net> The Public File Server is at the link below for archived reports: Public Server Directory Will review. AD 03/03/2020: Reviewed the report. It presents the groundwater monitoring data for the 524 West 36th Street site for the fourth quarter of 2019 (through November). URS conducts quarterly groundwater monitoring to document the progress of the remedial activities at the site. The groundwater samples are analyzed for petroleum-related VOCs and naphthalene using United States Environmental Protection Agency (USEPA) Method 8260B. The fourth quarter 2019 sampling event was conducted on November 12, 2019. All wells were sampled during the event except for well MW-15 which was blocked by a vehicle. The depth to groundwater has been more consistent for the past several years, ranging from approximately 3 to 7 feet bgs at wells MW-12, MW-13, MW-14, and MW-15. The depth to groundwater at well MW-09 is somewhat deeper, ranging from approximately 10 to 11 feet bgs over the past year. Based on the depth to groundwater and bedrock, it appears that the groundwater aquifer is located within the bedrock zone. During the fourth quarter sampling event in November 2019, there were no VOCs detected in the sample collected from wells MW-09 or MW-12. The highest total VOC concentration was in the sample from well MW-13, at 1,489 ?g/L. The total VOC concentrations in well MW-14 was 56 ?g/L. It appears that the soil excavation had a positive impact in regard to the dissolved phase impacts at the surrounding wells. A small area of dissolved phase contamination remains in the bedrock zone in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Based on the recent results from wells MW-13, MW-14, and MW-15, the ORC socks appear to be effective in promoting the bioremediation of the remaining dissolved phase contamination in the groundwater. However, the total VOC concentration in well MW-13 remains variable due to the occasional detections of free-phase product that also prevent the consistent use of ORC socks. No product has been observed in the well through the most recent monitoring event in November 2019. Future monitoring for free product will be conducted during the quarterly groundwater sampling events. Conclusions: The most recent groundwater analytical data indicates that a small area of dissolved phase VOC

1001128017

contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Based on the depth to groundwater and bedrock, the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline as a result of ongoing bioremediation processes. Based on the most recent groundwater monitoring data and other remedial actions at this site as summarized above, URS recommends the following: Actions: - Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene. All wells will be monitored for free product prior to groundwater sampling. - Continue to promote bioremediation of dissolved phase VOCs through installation of ORC socks in wells MW-12, MW-13, MW-14, and MW-15 as appropriate. Proposals/Approval Required: - None AD 04/02/2020: Received the following email from URS: The document 524 West 36th Street - 1Q 2020 Report has been posted to the NYC DDC SharePoint site. Please access required files: Please click here to open the file on the Public Server: Public Folder File Link (no password required) Please click here to access the SharePoint Site: <https://nycddc.aecomonline.net> The Public File Server is at the link below for archived reports: Public Server Directory Will review. AD 04/24/2020: Reviewed the 1st quarter 2020 monitoring report. It states that URS conducts quarterly groundwater monitoring at the site. The groundwater samples are analyzed for petroleum-related VOCs and naphthalene using USEPA Method 8260B. The first quarter 2020 sampling event was conducted on February 18, 2020. All wells were sampled during the event. During the first quarter sampling event in February 2020, there were no VOCs detected in the samples collected from wells MW-09 and MW-12. The highest total VOCs was in the sample from well MW-13, at 2,362 ug/L. The total VOCs in wells MW-14 and MW-15 were 4 and 589 ug/L, respectively. It appears that the soil excavation had a positive impact in regard to the dissolved phase impacts at the surrounding wells. A small area of dissolved phase contamination remains in the bedrock zone in the vicinity of monitoring wells MW-13, MW-14, and MW-15. The total VOC concentrations in the groundwater, have shown a consistent downward trend over the past several years, with the exception of the most recent data. Based on the recent results from wells MW-13, MW-14, and MW-15, the ORC socks appear to be effective in promoting the bioremediation of the remaining dissolved phase contamination in the groundwater. However, the total VOCs in well MW-13 remains variable due to the occasional detections of free-phase product that also prevent the consistent use of ORC socks. The total VOCs at well MW-15 is also somewhat variable, but decreasing. Over the past year, it appears that the groundwater flow direction is to the west. The depth to groundwater at the site has ranged from as shallow as 2 feet bgs to as deep as 18 feet bgs since URS began monitoring in 2011. The depth to groundwater has been more consistent for the past several years, ranging from approximately 3 to 7 feet bgs at wells MW-12, MW-13, MW-14, and MW-15. The depth to groundwater at well MW-09 is somewhat deeper, ranging from approximately 10 to 11 feet bgs over the past year. Based on the depth to groundwater and bedrock, it appears that the groundwater aquifer is located within the bedrock zone. ORC socks: Most recently, EAR replaced the ORC socks in wells MW-13, MW-14, and MW-15 on December 19, 2019. EAR also installed ORC socks in well MW-12 during this event. Although there are no impacts at upgradient well MW-12, ORC socks were installed to increase the

1001128017

diffusion of oxygen into the remaining area of dissolved-phase contamination. URS will continue to replace the ORC socks in the affected monitoring wells approximately every six months.
Conclusions: HPD has completed redevelopment of the site into a park and adjacent Hudson Boulevards East and West. All known USTs, piping, fill ports, and other structures have been removed from the site. In regard to soil contamination, URS believes that the 2012 excavation removed most or all of the contaminated soil at the site. Due to the apparent shallow depth to bedrock in the affected area, any remaining soil contamination at the site would be limited. This is supported by the 2014 soil sampling data. Free product at the site was initially limited to monitoring well MW-06. URS collected product from this well on eight separate occasions and the product levels appeared to be declining. The last measurement from this well before it was destroyed in 2013 indicated that a product sheen still remained in the groundwater. Product was also detected at this site in late 2014 in wells MW-13 (0.02 feet) and MW-15 (0.01 feet) and then again in February 2017 in well MW-13 (0.03 feet). The petroleum absorbent sock used to collect product from well MW-13 was removed in October 2017; no product has been observed in this well since. The most recent groundwater analytical data indicates that a small area of dissolved phase VOC contamination remains in the vicinity of monitoring wells MW-13, MW-14, and MW-15. Based on the depth to groundwater and bedrock, the groundwater contamination is located within the bedrock zone. It is expected that the groundwater contaminant concentrations will continue to decline as a result of ongoing bioremediation processes. URS recommends the following: - Continue quarterly sampling of the five remaining monitoring wells (MW-09, MW-12, MW-13, MW-14, and MW-15). Groundwater samples will be analyzed for VOCs and naphthalene. All wells will be monitored for free product prior to groundwater sampling. - Continue to promote bioremediation of dissolved phase VOCs through installation of ORC socks in wells MW-12, MW-13, MW-14, and MW-15 as appropriate. Proposals/Approval Required: - None AD "

Remarks:

"underground storage tanks each 550 gal have caused soil contamination over a period of 10 yrs-tanks were tested for tightness and do not appear to be leaking-contamination likely to have been caused by overfill at different periods based upon delineation by engineer contamination localized around fill pipe based on geo-probe boring and results of lab sample"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 05/18/2001 Reassigned from Tomasello to Demeo 3/25/2004 Reassigned from Demeo to Sangesland 2/28/2005 Sangesland received a note from John Raguso stating that Emteque was going to begin it's remediation process at the site. The contractor will mobilize and then clean and close the remaining tanks onsite. Once the permits have been finalized, the contractor will then begin the major construction phase of the project to break ground, put in the required shoring and conduct the required remediation/soil removal activities. Contact: John Raguso 631-271-6622 7/7/05 Excavation has begun on the western tank field. When all soil is removed down to the water table (10-13 ft) the pit will be kept open and a vac truck will be on site for several days to vac out any petroleum floating on the water table. The site has several structural issues with surrounding buildings and a Security wall Several end points will be taken, but we already know that this whole area was coal ash fill from the late 1800's. We will expect to see SVOC's, but we do NOT want to see any VOC's. They will dig down to the water table, so that is as much soil removal as can be done. This work (on western tank field) should be finished by 7/15/05. Then similar work will be done on the eastern tank field John Raguso cell #646-529-6531 3/13/2006 Sangesland completed the review of a Spill Closure Petition Report prepared by Emteque Corp. (John Raguso - 631-774-9519) The report provides a history of the site including details of the 6 USTs on site. 3 were closed out several years ago and the other 3 were closed out in 2005 during this closure process. In addition, large soil excavations were made in the areas around these 6 tanks (3 eastern tanks & 3 western

tanks) Due to structural issues, all of the contaminated soil could not be removed, but an overwhelming majority (over 95% according to Emteque) of the contaminated soil was removed. The end point sampling conducted in Oct 2005, show VOC and SVOC below TAGM and the GW samples were very good, with only some minor hits . The one item of some concern was Benzene. All 5 GW samples taken were above TAGM for benzene. The TAGM GW limit is 0.7ppb and the levels in all 5 GW samples ranged from 8.2ppb up to 43ppb. 3/30/2006 Sangesland confirmed with John Raguso at Emteque that another round of GW samples will be taken in April '06. If these numbers show a decline, the case may be closed due to natural attenuation. 5/22/2006 Sangesland reviewed a submittal from John Raguso of Emteque. As requested by the DEC, another round of groundwater samples were taken at the site. These samples showed the expected drop in contamination levels. While there are still some slight exceedences of the GW standards, the NYSDEC believes these levels will attenuate naturally over time. Based on the high commercial usage level of the area and the history of train yards, gas stations and historical fill the site is OK to close out as is with no further action Closure letter was sent to 601 West Associates c/o John Raguso with specific requirement to properly close out all monitoring wells on the site."

DEC Memo: "08/28/11-Hiralkumar Patel. 9:45 PM:- visited site. met Todd from Recovery. inspected boiler room. found water and oil in boiler room. Todd mentioned that they could not inspect the entire boiler room as water in rear of the boiler room is deeper and water level was rising. spoke with Mario, building super. he mentioned that there are no drains in the boiler room floor and only one sump pit in entire boiler room. sump pit has four pumps inside it. they had 3,000 gal vacuum truck which can not hold all the water/oil in the boiler room. also, they were not sure about condition in rear of the boiler room. absorbent pads were on water. as water level was rising, Todd was worried about impact to electric panels which is about 10 higher than water level in boiler room. Todd requested to turn on sump pumps to throw water only from bottom into city sewer system. he mentioned that by lowering water level, oil may impact the wall and other structure, but that can be cleaned easily with power wash at later time. but he was worried about impacting electric panels and other part of basement as water level was rising. after discussing with DEC Austin, approved Todd's request to turn on sump pumps so they can lower the water level in boiler room. after they remove most of the water (only), they will remove remaining water/oil into vacuum truck. asked Todd to secure sump area with absorbent pads and booms to prevent any oil get into city sewer system. also asked him to turn off pumps frequently to check boiler room for any unusual thing. asked Todd to call with update. Mario mentioned that the entire tank system is turned off. Mario Onichimiuk **building super** Ph. (917) 817-1927 Todd Hassold Recovery Environmental Services, Inc. PH. (973) 940-3144 (O) (973) 896-6185 (C) Fax (973) 940-3146 email: thassold@recoverysrvs.com 08/29/11-Hiralkumar Patel. 9:45 AM:- visited site. cleanup crew was still on-site removing oil. two sump pumps were still working. currently, contractor is skimming off oil from top of water. after water level dropped, super inspected the rear end of the boiler room and found two buckets were knocked down during flooding and caused spill. inspected tank room which is in garage area. site has two 20,000 gal #6 oil ASTs. no spill inside the tank room. boiler room is right underneath the tank room location. as per super, no leak noticed from any fuel piping. asked Mario to call back for re-inspection, once basement is dry. 5:09 PM:- received call from Tom from Recovery. he mentioned that during cleanup, they found oil/water separator in back of the boiler room. he requested a site inspection. 08/30/11-Hiralkumar Patel. 11:00 AM:- visited site. met Tom from Recovery. inspected boiler room. Tom mentioned that sump pumps were turned off yesterday night and when they left, area around sump was clean. but they found more oil this morning. during cleanup

S104275653

last night, they found oil/water separator in boiler room. inspected oil/water separator. found oil on top of oil/water separator, but no indication of any oil overflowed the separator. two pipes enters into oil/water separator. one pipe goes to a loading dock above the boiler room (contractor will find out where this pipe comes from) and second pipe goes into a tunnel located at the west end of the boiler room. there is an hatch boiler room ceiling in area where the oil/water separator inlet pipe crosses to loading dock. tunnel is located along the boiler room ceiling in west end of the boiler room. this tunnel runs east-west and then north-south. this tunnel structure is completely within building footprint and underneath the loading dock area. found oil leak from the northern most end of the tunnel. currently active tanks are located right above the northern end of the tunnel and currently active supply/return lines running aboveground in tunnel. no sign of leak found from currently active lines. found two sumps in the tunnel: first along the western wall of the north-south portion of the tunnel and another along the southern wall of the east-west portion of the tunnel. found a pipe coming out of the western wall of the tunnel in the area south of sump in north-south section. Tom closed the valve on this pipe and water flow into the separator was dropped. as purpose of this inlet pipe was unknown, asked Tom to leave valve open. Mario mentioned that there were three 20,000 gal #6 oil USTs abandoned-in-place behind the western wall of the tunnel (north-south section). found oil seepage from the northern wall of the east-west section of the tunnel. as sump pumps in tunnel are connected to the oil/water separator, it looks like whatever oil seeped into the tunnel was thrown into oil/water separator. as there was no oil recovery from the separator, oil followed the water discharge pipe into the main sump. informed Mario that main sump pumps must not be used until the cleanup is completed as water coming into sump may be contaminated (dissolved phase). all water from basement must be disposed off as contaminated material. as per Mario, the former 20,000 gal tanks were under the loading dock platform. Mario gave copy of tank abandonment documents. as per the documents: - Don Carlo Environmental abandoned three (3) 20,000 gal USTs on 07/10/2001. tanks were abandoned using foam and lines were discontinued and closed - Malbro Inc. abandoned three (3) 20,000 gal USTs in Aug. and Sep. of 2005. tanks and all associated piping were filled with lightweight cellular concrete slurry mixture during inspection, found a 3,000 gal diesel AST for emergency generator. Mario mentioned that emergency generator is located on first floor. during inspection, found a coned vault in boiler room containing high voltage lines. this coned vault is located on other side of boiler room, opposite of the main sump in the boiler room. met with Sandy Hahn, property manager. informed her that leak in the boiler room, could be left over spilled material inside the concrete vault (if any) around the former 20,000 gal USTs. due to heavy rain over the weekend (harricane Irene), water may have entered around the abandoned tanks and pushed oil into the tunnel which end up into main sump via oil/water separator. asked her to submit a scaled site map with old/current tanks, piping, tunnel, sumps (in passage as well as boiler room) and oil/water separator. asked her to find out purpose of the pipe that comes out from the old UST area. also asked her to investigate in the old tank area. RXR SL Owner LLC. **property owner** c/o RXR Realty 601 West 26th Street, Suite 1260 New York, NY 10001 Attn.: Sandra Hahn **property manager** Director of Operations PH. ***** 1) 03/19/2002: Summary of Preliminary Findings: - John Raguso (from Emteque) met with Romeo Santos, president of Don Carlo Environmental - according to Mr. Santos, he was contracted to decommission three of the six tanks and convert two of the three remaining active tanks to #2 oil to fuel on-site generator - as per Mr. Santos, he pumped out and cleaned all six tanks, then filled three of the tanks with foam and lined the three remaining active tanks with epoxy - one of the remaining three active tanks (tank #6 on map) was refilled with #6 oil, after passed tightness test - two remaining active tanks (tank #1 and tank #2 on map) were in process of being converted to #2 oil to be used by on-site generators - Emteque advanced nine soil borings (SB-1 through SB-9) in the vicinity of the west side tank group - west side tanks are partially submerged in groundwater - approx. 3 inches of fuel oil was floating on top of the groundwater table in the vicinity of the west side tanks (near SB-3 and SB-4) and approx. 0.5 inches oil found on water approx. 75 ft downgradient from tank field (in SB-5) - due to product on water, no samples were submitted for analysis - during site survey, Emteque found at least two large ASTs in a truck loading bay at the southwest corner of the building and possible a third large tank in the Williams Communications unit (area north of west side tanks) - no fuel oil appeared to be leaching from any of the three

masonry walls surrounding the eastern tank field 2) 06/11/2002: Phase II Petroleum Contaminant Investigation: - advanced total of thirteen (13) soil borings - found refusal in eight (8) of the borings which were abandoned - the remaining five (5) borings (MW-1 through MW-5) were installed to 7 ft bg and converted to 2 inch monitoring wells - soil sample was collected at 6 ft bg from boring MW-1 due to the presence of mild, but noticeable, noxious odor - minor VOC contamination found in soil sample from MW-1 which was installed in southwest corner of the building - found sheen in wells MW-1 and MW-2 and 0.25 inch product in well MW-3 - no product or sheen observed in wells MW-4 and MW-5 - monitoring wells were sampled in two events: first event was conducted within one week of development and second event was conducted approx. two weeks after development - water samples from first round were analyzed for VOCs and SVOCs via 8260 and 8270, respectively - water sample from second round were analyzed for TPH via 8015B - minor VOC contamination found in groundwater sample from MW-1, MW-2 and MW-3 (maximum 86 ppb of Benzene in MW-2) - product sample collected from MW-3 for fingerprint and was identified as hydraulic oil <----- - based upon field observations and analyticals results, two somewhat commingled contaminant plumes are present: free phase product on water which appear to be mixture of weathered #4 and #6 oil and a dissolved plume of a lighter hydrocarbon, which appears to be gasoline or a weathered kerosene 3) 04/23/2003: Final Phase II Environmental Site Assessment: - during inspection by NYSDEC project manager in Dec. 2002, found oil seepage through the tunnel wall adjacent to the eastern tank field - in Dec. 2002, Emteque was informed that the building's boiler was being inundated with oil/water coming from the house tank (tank # 6), which is located in the eastern tank field - Don Carlo Environmental performed a tightness test on the tank and tank found leaking - this investigation was performed to delineation contamination around eastern tank field and to complete delineation of contamination (by installing more monitoring wells) found around the western tank field - Emteque installed three (3) 4-inch monitoring well through the sidewalk equally spaced around the northeast corner of the intersection of 12th Ave and 26th street - three wells (MW-6, MW-7 and MW-8) were installed to a depth of 14 ft bg with 10 ft of screen - wells were set approx. 7 ft into the water table - no evidence of fuel oil contamination was identified in wells - soil samples collected at the water table during the well installation - no contamination found in soil samples collected during well installation - advanced five (5) soil borings (ETFSB-1 through ETFSB-5), to a depth of 12-16 ft bg, through the basement floor over the eastern tank field, collecting soil samples to a depth of approx. 4 ft below the groundwater table - soil samples collected at the water table during soil boring installation - no contamination found in soil samples collected from soil boring in eastern tank field - 1 inch piezometers installed in three borings (ETFSB-1, ETFSB-2 and ETFSB-3) surrounding the tank field to the south and east - tunnel's wall contains groundwater on west side of eastern tank field - access was not provided to the north side of the eastern tank field - free phase product found on water in eastern tank field area - investigation revealed that contamination associated with leak from the house tank appears to be contained within the vicinity of the house tank between the south wall, the north adjacent tank, the western tank tunnel and has not migrated more than 10 ft east of the tank 4) 06/16/2003: Revised Proposed Petroleum Contamination

S104275653

out oil/water from entire room before leaving site yesterday night, but more came back this morning. he mentioned that last night they closed the valve on pipe (recovery pipes installed next to western tank field) which discharges into oil/water separator so less water accumulated in boiler room. inspected tunnel again, specifically to see any seepage from tanks on eastern side of the tunnel. found oil seepage from eastern side tanks also. found multiple wells on and around property: one well in loading dock on west of western tank field, one well in loading dock ramp, one well on northern sidewalk of W 26th street, one well at the intersection of W 26th street and 12th ave, one well on eastern sidewalk of 12th ave, two wells on southern sidewalk of the W 27th street met with Todd and Michael Borello (from EBS). based on observations during site visits, asked Mr. Borello for following: - general scaled site map of entire property including all closed/in-service oil tanks (must include tanks owned/operated by tenants) - scaled site map (including old/current oil tanks, pipings, sumps, oil/water separator, seepage points, previous monitoring wells etc.) of area of concern - power wash of impacted areas in entire boiler room (pipes, walls, columns, floor etc.) - detailed cleaning of oil/water separator - turn on the oil/water separator system with proper DEP discharge permit - pump out of all water/oil from boiler room for off-site disposal until oil/water separator system turned on - collection of water sample (either from oil/water separator or from its discharge pipe) for 8260/8270 analyses - correction of PBS record (registration of existing in-service tanks, 3,000 gal diesel AST in loading dock ramp area and any other unregistered tank) Mr. Borello mentioned that they are planning to open small access in both east and west wall of the tunnel for preliminary inspection. they will consult with structural engineer and if safe, they will open larger access to both tank fields to clean any leftover contamination. Michael Borello Environmental Building Solutions, LLC. Ph. (646) 290-5925 Ext. 225 (917) 217-7334 (C) Fax (212) 867-9715 email: mborello@ebsllcnyc.com based on given information, a FBI rents building space on north side of eastern tank vault. 10:03 AM:- left message at FBI (212-384-5000). 09/01/11-Hiralkumar Patel. 8:00 AM:- received message from Mr. Borello. 12:25 PM:- spoke with Mr. Borello. he mentioned that based on available information, the new tanks are located right above the old western tank vault. they have collected water sample yesterday. he will submit scaled site map and water sample result by 09/08/11. 12:58 PM:- spoke with Eric at Emteque regarding missing initial spill closure report. Eric will check file and submit report, if available. Eric mentioned that they did Phase I report for Chase bank (lender) in 2010. Eric Telemaque Emteque PH. (212) 631-9000 email: eric@emteque.com 9/2/11-Vought-Received call from and spoke to Todd Hassold (Recovery Environmental Ph:973-896-6185) who noted that he had urgent issue on hand in that he was recovering approximately 25,000-gallons of oil/water mixture a day from the oil/water separator (source of water was seepage from adjacent Hudson River) and source of oil still undetermined. Hassold noted the liquid is mostly water with minor petroleum sheen. Hassold noted also that he was in the process of submitting a NYCDEP Discharge Permit Application to dispose of the water from the oil/water separator. Hassold noted that Clean Harbors was closed (disposal facility) and that he did not have the storage capacity for the 25,000-gallons per day over the weekend and such was requesting an emergency permit to discharge to the sewer. Vought spoke to DEC Elburn who noted that due

S104275653

to Hurricane (causing of flooding) that DEC had an emergency permit requirement exemption and as such no permit was needed for DEC. DEC Elburn noted however that NYCDEP also needed to be contacted (NYCDEP Leslie Lipton Ph:718-595-4730). Hassold called Lipton and as per Hassold, Lipton did not respond but Hassold was told by another DEP employee to call 311. Vought suggested that Hassold send an email with a description of the issue to DEC Vought as soon as possible so that he may forward email to DEC Patel, Elburn and DEP Lipton. Vought received email from Thomas Domke (VP Operations Recovery Environmental) confirming phone conversation but not including any details of issue. Vought sent reply email with cc to DEC Patel, Elburn and DEC Lipton that a full description is needed and that Vought on vacation for next two weeks and as such all parties should be copied on full description. Vought and all parties received full description and Vought reviewed description with DEC Water Unit Elburn and sent reply email that DEC had no objections to discharge to sewers as long as NYCDEP requirements were met also.

09/07/11-Hiralkumar Patel. 10:41 AM:- received call from Todd. he mentioned that NYC DEP approved water discharge to city sewer. now the entire boiler room is dry. 10:50 AM:- received call from Mr. Borello. he mentioned that no dissolved contamination found in water sample collected from boiler room last week. asked him to submit result for review. he also mentioned that they are waiting for result of water sample that was collected to get DEP permit to discharge water from oil/water separator into city sewer system. currently, they are planning to drill some holes in tunnel walls for further investigation. Mr. Borello will submit scaled site map today. 12:21 PM:- received message from Eric. he did not found spill closure report prepared probably in Oct. 2005. 09/08/11-Hiralkumar Patel. 10:22 AM:- received email from Mr. Borello including site map (including oil tanks on property), design of oil/water separator system and groundwater sample result. no dissolved contamination found in water sample. as per the submitted site map, the entire site has total of fifteen (15) tanks: - one 5,000 gal tank at the end of garage ramp (from W 27th street), owned by property owner - two 20,000 gal tanks (currently in-service #6 oil tanks) in loading dock area, owned by property owner - one 10,000 gal tank in loading dock area, owned by Broadview - one 3,000 gal tank (diesel tank) in loading dock ramp, owned by Level III - four 275 gal tanks on 3rd floor, owned by property owner - four 275 gal tanks on 4th floor, owned by Broadview - two 250 gal tanks on 6th floor, owned by Level III reviewed PBS record again. PBS #: 2-600389 - three 20,000 gal in-service #6 oil ASTs in vault with access and three 20,000 gal closed-in-place #6 oil ASTs in vault with access. this PBS registration has expired in July 2006. as per PBS record, tanks owned by previous property owner. as per available information, the remaining three tanks were also closed-in-place in 2005. this PBS registration needs to be renewed/updated/closed with correct information (tanks closed/new property owner). PBS #: 2-604877 - one 10,000 gal diesel AST on legs/saddles. as per PBS record, tank owned by Wiltel Communications Group, Inc. this registration has expired in Dec. 2010. this registration needs to be renewed. PBS #: 2-607987 - one 275 gal waste oil AST on legs/saddles. as per PBS record, tank owned by Verizon. registration currently active. PBS #: 2-611131 - one 10,000 gal diesel AST in contact with impervious barrier. tank was installed in Jan. 2000. as per PBS record, tank owned by Level III Communications LLC. registration currently active. this

registration may need to be updated because as per Mr. Borello, Level III owns a 3,000 gal diesel AST (which is located in loading dock ramp). 2:27 PM:- spoke with Timothy Kimball at Level III Communications. he confirmed that Level III owns 10,000 gal diesel tank which is located in loading dock area and a generator is located next to the tank. he mentioned that they don't own 3,000 gal diesel tank. he also confirmed that they don't have any day tanks on 6th floor. during conversation, he mentioned that Level 3 Communication acquired Wiltel Communications Group in 2007-2008. informed him that the tank registration under Wiltel Communication (for 10,000 gal diesel tank) has not been closed out properly. asked him to close the PBS registration that is under Wiltel Communications's name. Timothy Kimball Level 3 Communications LLC. (also owns Wiltel Communications Group) Ph. (720) 888-4744 email: timothy.kimball@level3.com 2:51 PM:- left message Gregory Myka (315-432-8486) at Verizon to confirm that Verizon only owns one 275 gal waste oil tank at the site. 3:05 PM:- left message for Mr. Borello and informed him that tanks' information provided on map is not accurate. 4:36 PM:- received message from Mr. Myka from Verizon. he confirmed that they have only one 275 gal waste oil tank at the site. they don't have any other tanks. 4:42 PM:- received message from Mr. Borello. he mentioned that he got tank's information from chief engineer. but they will do site survey and talk to each tenant to find out exact number of tanks and its owners. 09/09/11-Hiralkumar Patel. 9:18 AM:- visited site. inspected boiler room. no oil or sheen found on water in entire boiler room. boiler room walls/floor and other oil impacted structures were cleaned. found clean water going into main sump from oil/water separator. frac tank was on W 27th street, but wasn't connected to main sump. 9:27 AM:- spoke with Mr. Borello. informed him that there are multiple PBS records for the subject site. he requested copy of PBS records. 3:49 PM:- sent email to Mr. Borello including PBS records. asked him to submit all on-site tank's information (location, size, owner etc.) by the end of 09/16/11. informed him that PBS registrations must be updated/renewed immediately. email copied to Ms. Hahn. 09/14/11-Hiralkumar Patel. 10:43 AM:- spoke with Todd. he mentioned that insurance company requested an estimate for investigation. Todd is preparing the estimate and will submit to insurance company. 09/19/11-Hiralkumar Patel. received PBS application package in FedEx. as per submitted application, site has following tanks: - two 20,000 gal #6 oil ASTs in loading dock area; tank owned by property owner - one 5,000 gal #2 oil AST in basement (at end of garage ramp from W 27th street); tank owned by property owner - one 250 gal #2 oil AST in generator room on 3rd floor; tank being used to start up the generator; tank owned by property owner - one 250 gal #2 oil AST on 3rd floor along 12th Ave side by Verizon; tank being used to start up the generator; tank owed by property owner - two 250 gal ASTs on 3rd floor along 11th ave side; both tanks are closed-in-place; tanks owned by property owner - one 10,000 gal diesel tank in loading dock; tank owned by Broad View Network - one 250 gal #2 oil tank under the generator in central office on 4th floor; tank owned by Broad View Network - one 250 gal #2 oil tank closed-in-place in central office on 4th floor; tank owned by Broad View Network - one 250 gal #2 oil tank under the generator in data center on 4th floor; tank owned by Broad View Network - one 250 gal #2 oil tank closed-in-place in data center on 4th floor; tank owned by Broad View Network - one 10,000 gal diesel tank in loading dock (PBS #: 2-611131); tank owned by Level 3 Communication - one 247 gal waste oil tank in basement (PBS

S104275653

#: 2-607987); tank owned by Verizon - one 1,000 gal waste oil tank in basement; tank owned by FBI - one 500 gal oil tank on 2nd floor; tank owned by FBI there is no information about 3,000 gal AST observed in loading dock area. 09/20/11-Hiralkumar Patel. 12:18 PM:- received message from Mr. Borello. 4:29 PM:- spoke with Mr. Borello. he mentioned that they drilled some holes in both side tank vaults and found oil pouring out from holes. as such they will break larger access to these vaults for further inspection/cleanup. he will send pics that he collected today. he will also schedule a site inspection, once larger holes made in wall. 4:31 PM:- receive email from Mr. Borello including a pic and a video showing oil pouring out of vault. 09/23/11-Hiralkumar Patel. 1:18 PM:- received call from Todd. he mentioned that they drilled small holes in both vaults and found product coming out from eastern vault only. only water came out through holes in western vault. based on that observations, they made 18 inches by 24 inches hole in western wall of the eastern vault (vault towards the boiler room). found free product in the vault. Todd mentioned that the hole is about 2 ft above the product level in vault, so they are not concerned about overflow through this hole. as there is heavy rain for today and tomorrow, asked Todd to secure the hole to prevent any spill in boiler room, if water level rise in vault. scheduled a site inspection at 3:30 PM on 09/26/11. 1:55 PM:- spoke with Mr. Borello. informed him about possibility of oil overflow from hole in eastern vault due to heavy rain. Mr. Borello has already spoken with building management/super and they will inspect area frequently. if any spill noticed, they will call contractor for cleanup. also informed Mr. Borello about no information on PBS application about 3,000 gal tank observed in loading dock area. Mr. Borello will confirm that and will submit revised PBS application. 09/26/11-Hiralkumar Patel. 3:30 PM:- visited site. inspected hole made in eastern tank vault area. found free product and water in hole. the area behind the wall was filled with construction debris and filled with large concrete/stone pieces. met Ms. Hahn, Todd, Tom and Mike. informed them that the department requires delineation of soil/groundwater contamination on north and east side of eastern tank vault. no investigation needed on west and south of the eastern tank vault (as it is in tunnel area). Tom mentioned that they only found some water from holes made in western tank vault area. asked Mike to prepare a scaled site map for area around tank vaults. asked Ms. Hahn to submit an investigation work plan for delineation. during meeting, Mike confirmed that the 3,000 gal diesel AST observed in loading dock area is owned by Broad View Network and there is no 10,000 gal tank owned by Broad View Network. Mike will submit revised PBS application to DEC Nick. forwarded previously received (incorrect) PBS application (which includes a check) to DEC Nick. asked him not to process application as a new updated PBS application will be submitted. 10/12/11-Hiralkumar Patel. received email from Ms. Hahn (at 11:39 AM on 09/30/11) including copy of revised PBS application and letter describing tank owners. PBS application was sent to PBS unit. as per revised tank owner letter, Broad View Network owns 3,000 gal diesel tank in loading dock and not the 10,000 gal diesel tank as mentioned in earlier PBS application submitted on 09/19/11. all other tank info is the same. 10/26/11-Hiralkumar Patel. 4:18 PM:- received email from Joe Horowitz (Horow137@aol.com) including copy of letter from DEP with conditional authorization for water discharge. 11/02/11-Hiralkumar Patel. 3:21 PM:- received email from Mike including a draft work plan for review. he proposed to install nine

soil borings which will be converted to monitoring wells. these borings/wells are proposed around two sets of abandoned USTs. draft work plan doesn't include a work schedule. also need a site map with structures in basement (tunnel, sumps in tunnel, main sump in boiler room, oil/water separator and boring/well locations).

11/14/11-Hiralkumar Patel. 9:45 AM:- spoke with Mike. informed him that the draft work plan looks fine except it is missing two things: work schedule and a site map with structures in cellar (tunnel, sumps in tunnel etc.). he will submit final work plan. 02/03/12-Hiralkumar Patel. 4:31 PM:- left message for Mike. 4:32 PM:- sent email to Mike, Ms. Hahn and Todd inquiring update. 5:08 PM:- received email from Mike. they are in process of obtaining bids from drilling companies and will start work once contractor is selected. he mentioned that oil/water separator is working fine and no additional oil observed in basement. 02/07/12-Hiralkumar Patel. 2:13 PM:- sent email to Mike and asked him about schedule for contractor selection. also asked him about the amount of oil recovered since the oil/water separator turned on. email copied to Ms. Hahn. 02/21/12-Hiralkumar Patel. 11:15 AM:- received email from Mike. they are in final stage of hiring drilling contractor and will schedule work shortly. till now, they recovered less than 55 gal of oil. 07/24/12-Hiralkumar Patel. 2:27 PM:- received email from Mike. they have installed numerous borings and wells at the site. they are having some logistical problems in few areas and requested a site visit. 07/26/12-Hiralkumar Patel. 3:42 PM:- left message for Mike. asked him to submit status report for work done till now, prior to any site visit. 3:47 PM:- sent email to Mike and asked to submit status report for work done till now. informed him that site visit can be done only after completing review of the additional information. email copied to Ms. Hahn.

07/27/12-Hiralkumar Patel. 9:51 AM:- received email from Mike including site map and field notes. as per field notes, four wells installed at the site: two wells (Point A and Point B) on the west side and two wells (Point G and Point H) on the east side of the former tank field. fuel oil smell noted during installation of wells Point A and Point B. Mike mentioned that a third well could not be installed on east side (in the FBI space) due to refusal. he also mentioned that driller is hesitant to drill in the boiler room due to possible flooding. 11:28 AM:- spoke with Mike. he mentioned that installation of four wells was completed on 07/23/12. dark soil and petroleum odors were noted during installation of wells Point A and Point B on the west side of the tank field. no sign of contamination observed in wells on east side (Point G and Point H) in FBI parking space. he does not know about any product on water as wells are not developed yet. asked him to develop the four wells, define site-specific groundwater flow direction and collect groundwater samples for VOC/SVOC analysis. informed him that wells should not be installed in basement boiler room due to possible flooding issues. asked him to submit detailed boring/well logs for review. 11:47 AM:- sent email to Mike and asked to submit boring/well logs, results of groundwater samples and site-specific groundwater flow direction by the end of 08/20/12. email copied to Ms. Hahn. 09/07/12-Hiralkumar Patel. 11:53 AM:- received email from Mike including soil boring logs and soil/gw data. received boring logs for borings Point A, Point B, Point G and Point H. Point A and Point B were installed in RXR Parking Garage and fuel oil smell noted in both borings at 10 ft depth. wells were installed to 25-30 ft depth in Point A and Point B. borings Point G and Point H were installed in FBI parking space. in

Point G, bedrock encountered at 16 ft depth. found PID readings in Point A and Point B, but PID unit is not included in logs. as per lab report, four soil samples collected. one soil sample from 10 ft depth from each of four borings. no VOC contamination found in soil samples, but some SVOC compounds were detected (below cleanup standard) in soil samples. as per lab report, four groundwater samples collected from borings. no contamination found in groundwater samples. the site map does not show location of Point H. needs revised boring logs (with PID unit) and site map (with boring locations). 10/03/12-Hiralkumar Patel. 2:28 PM:- sent email to Mike. asked him to submit revised boring logs and site map. also asked him about amount of product removed till date using on-site recovery system. email copied to Ms. Hahn. 11/26/12-Hiralkumar Patel. went to site for inspection to see impact after hurricane Sandy. met with Mario. he mentioned that the entire basement was full of water, but no more oil observed on water. the oil/water separator, as part of the on-going cleanup, was emptied out right before storm. as boilers were damaged during storm, they have temporary boilers on street. they are also in process of converting to #2 oil. 01/15/13-Hiralkumar Patel. received message from Mike (at 1:11 PM on 01/14/13). he mentioned that he is waiting for response for data he submitted on 09/07/12. 11:33 AM:- sent email to Mike and informed him that the department responded on 10/03/12 and asked for revised boring logs and product recovery data, which has not received yet. 11:37 AM:- received email from Mike including copy of email that he sent on 10/09/12. email included revised boring logs and site map. 12:14 PM:- received email from Mike. they recovered less than 55 gal oil since oil/water separator installed. reviewed available boring logs, site map and sample results. borings A, B, G and H were installed to a depth of 25-30 ft bg (except boring G which was installed at 16 ft bg). maximum PID reading of 2 ppm was recorded at 10 ft in boring B which is located southwest of the former tank rooms. soil and groundwater samples were collected from these four borings. no contamination found in soil or groundwater samples. 12:23 PM:- spoke with Mike. asked him to submit depth of borings/wells and former tank room reference to single point. 3:14 PM:- received email from Mike. he mentioned that points G and H inside the FBI space were to a depth of 15 ft and would be below the 6 USTs that were closed in place. he also mentioned that points A and B were advanced to a depth of 20 ft but from street grade and are not below the USTs. 01/30/13-Hiralkumar Patel. discussed with DEC Austin. based on site history, available sampling data and observations during site visit after hurricane Sandy, Austin asked to close the case. 1:59 PM:- sent email to Mike. asked him to submit spill closure report. email copied to Ms. Hahn. 02/28/13-Hiralkumar Patel. 2:43 PM:- sent email to Mike inquiring about closure report. email copied to Ms. Hahn. 03/22/13-Hiralkumar Patel. 4:50 PM:- received email from Sharon Dyal (sdyal@ebsllcnyc.com) from Environmental Building Solutions, including spill closure report. 03/26/13-Hiralkumar Patel. based on available information, case closed. 2:45 PM:- sent spill closure letter to Ms. Hahn. letter emailed to Ms. Hahn and Mike." DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND Cross ref #9304676 1/21/2004 Sangesland contacted several parties associated with the spill in this building. Apparently on 1/20/2004 a leak was discovered in an elbow of the fill line in the basement Tunnel Room of this address. Building Manager: Harold Brody - Responsible Party According to Paul at New York Combustion (718-763-6100), Mr. Brody called NY Comb. to ask them to come and fix the leaking pipe. Paul informed Mr. Brody that a spill would need to be reported. Neither Mr. Brody or Paul reported the spill. Romeo Santos at Don Carlo Environmental (718-857-2100) was hired either evening of 1/20 or morning of 1/21 to do the actual clean up of the oil. Mr. Santos says that he called in the Anonymous spill report #0311818 earlier this morning and then he sub contracted the cleanup work to Petroleum Tank Cleaners. All clean up work is complete. Paul

from New York Combustion finished the pipe repair work. 1/23/2004 PTC called to say that they in fact DID NOT complete the clean up at the site. PTC was hired only to vac out the liquid portion of the spill. PTC was told by Don Carlo Environmental that they will be responsible for the final cleanup. Don Carlo says the clean up was done by PTC and DC will not be doing any further work. In frustration, Sangesland sent DEC Environmental Control Officer Paul Blanton to visit the site. He asked why the owner or consultants failed to call in the spill within the 2 hours required by law. There was considerable finger pointing and no one took responsibility for the error. There was some discussion of how the oil went into a second unused tank. No ticket was issued. 3/31/2004 As of this date, the case is still open. No follow up documentation has been submitted to the DEC to close out this case. 10-06-05: NYCT performing borings for #7 line extension. Two boring performed in the area of this facility noted strong contamination (04-06966 & 04-07003). Boring logs and notes in eDocs. MCT 3/30/2006 Sangesland closed this case and referenced this to spill #9304676. All tanks on site were removed. Impacted Soil was excavated. Still some impacted GW as of 10/05 Consultant will take another round of GW samples in 4/06. This spill is closed "

Remarks: "718-857-1800- DC Environmental phone, this is the only info I could get out of caller. Might be a leak in the fill line."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

test. He could not be sure though he thinks the tanks are still empty. He will look into this. Piper then contacted new owner Dov Hertz, Extell Group. 212.712.0633. He knows nothing and will have previous owner get info. Galden Frankel performed Phase I and II on property. Left message at GF requesting call back. 1/18/06- DEC Piper spoke w/ property manager, Rob Scharf 212.712.6111. Stewart Dean Co. -212.695.3180. He will fax info. DEC Piper to review and inform Rob of additional work if warranted. 2/6/06- DEC Piper spoke w/ Rob S. I explained to him that he was still in violation of PBS code. I have received analytical suggesting that there was no release at the site. The tank test results indicated a dry ullage leak. The tank is empty and still needs to be removed or closed in place. As per Rob, he will be sending in the new application this week. I instructed him to include a line item that that due to the razing of the building, that they will remove the tank when the activities have been completed. Afterwards, he will need to update the PBS records to insicate that the tank has been removed. Upon review of a limited phase II investigation of the site performed by Galden Frankel, of the six soil samples taken from various locations throughout the site, no elevated constituents were detected. However, three GW samples were collected. The results indicate 1,040 ppb of MtBE and slightly elevated levels of PERC and its byproducts. 5/15/06- DEC Piper. Referred to Remediation. 5/31/06 - reviewed file: MTBE was detected without other VOCs usually present in a petroleum release. The MTBE is likely the leading edge of an off-site impact. Low level of CVOCs are also detected. These CVOCs are only detected in GW with no soil contamination or other sources on site. Spill is closed, no NFA issued since no remediation was ever conducted at site. - KST" "they are going to abandoned the tank"

DEC Memo: "letter to be sent Last update by JBMCCULL on 12/20/05 - transferred back to R-2 3/5/08 - Austin - Assigned to Ketani for further investigation - end 4/21/08 - Raphael Ketani. The spill occurred on 5/11/89. The UST was filled with water and the top of the tank and the cement were seeping oil. The tank holds #6 oil. Richard Breslow, 559 W. 45 Street, NY (212) 265-4023 was on the original spill report as the spiller. There is no file for the case. I checked Property Shark, NYC Property Tax listings, and ACRIS and found the owners as: 27th Street Property, LLC, c/o Centaur Properties, LLC, 35 E. 21 Street, 3rd Floor, NY, 10010; and Gaiety Investments, Ltd., c/o Hartman & Craven, LLP, 488 Madison Avenue, NY, 10022. The PBS

registration is for 536 W. 27 Street. The number is #2-476560. It shows a 5000 gal. tank that was closed, but used to contain #6 oil. I sent CSLs to both 27th Street Property and Gaiety Investments, Ltd. 4/23/08 - Raphael Ketani. Joe Graceson of Centaur Properties (212) 308-4443 called and left his phone number in a voice mail message. I made contact with Mr. Graceson. He said that Centaur is the sole owner. He said that the building uses gas only. The building was bought from Gaiety a little while ago. Centaur has had little cooperation from Gaiety in obtaining old records. He asked for any records that DEC has. I told him we have nothing. He asked what the next step would be if he can't find any information regarding the cleanup. I told him that Centaur will have to hire an environmental company to do an investigation and cleanup. I told him that DEC will need to receive the investigation plan, the site investigation report, the remediation plan, and the remediation report. He said he understood. With that, the conversation ended. 4/28/08 - Raphael Ketani. Steve O'Connell of Hartman & Craven (212) 836-4933 called. He said he represents Gaiety. He said that his company was involved when Gaiety first purchased the property and when they recently sold it. He said that Gaiety has no involvement with the site. 5/28/08 - Raphael Ketani. Mohammed Ahmed of Fleming Lei Shue called and said that he can't find any records or plans showing where the fuel tank used to be. He asked whether DEC had any records. I told him No. He said he will try to put together an investigation plan. He said that he thinks he has a general idea of where the tank used to be. I told him that it may boil down to just doing some geoprobing all over the basement. He said that may be what will happen. 5/29/08 - Raphael Ketani. Mr. Ahmed called. He said that he found a 1 page document from the NYFD stating that the tank was removed. I told him to send the document to me. I also told him that this doesn't preclude doing a soil investigation. He said he understood and that he will send a proposal for the work to be done. I received the Fire Department document by FAX from Mr. Ahmed. 6/3/08 - Raphael Ketani. Today I received the site investigation plan dated 5/29/08 via e-mail from Mr. Ahmed. I reviewed the plan, found it acceptable and e-mail Mr. Ahmed to go ahead with the work. 8/15/08 - Raphael Ketani. In preparation for case transfer, I am annotating the database as regards what needs to be done at the site to resolve the alleged or known environmental contamination. Followup is needed to see whether Fleming Lei Shue conducted the investigation and to get a copy of the report. Mr. Ahmed (212) 675-3225 called me. He said that the report is complete. He said he will send it, but only a little contamination was found on the concrete slab that used to support the tank. He said the groundwater has a little benzene, but this is not from the tank as it had #6 oil. He said the benzene levels are in the single digits to about 19 ppb. 09/02/08-HRAHMED-Returned Mohamed of Flemming Lee Sue call and left a message to call back. 09/03/08-HRAHMED-Mohamed sent me Limited Site Assessment Report with end point sample analyticles. As per the report, New York City Fire Department (FDNY) records have indicated that the UST has been removed from the Site . 09/24/08-HRAHMED-Met with Mohamed of Flemming Lee Sue. No visual sign of affected drain or pit, no odor noticed. The opening of the basement is small. The base floor is a concrete finished basement. It used to be a club. this case is closed. "

Remarks:

"BURIED UNDERGROUND TANK FILLED WITH WATER BUT SURFACE SOIL AROUND TANKTOP & CEMENT IS SEEPING WITH OIL, OIL WAS SAMPLED."

O'CONNELL e2mis no. 130551: 03/24/00 14:45 R.Palladino (10563) while doing a routine inspection found unknown fluid in V-1606(16m71) at 368-80 10th Ave and it appears to have migrated via a weep hole to the adjacent structure-V-8173(16m69) at the same location. It appears to be diesel fuel but not sure. Taking 2 samples in each vault for ID,PCB analysis,and for flashpoint. Have 50 gallons of water total in both structures. No cracks in either structure. Unplugged sump pump. Entry into sewer or waterways is unknown at this time. Will disassemble sump and the piping to determine same. Unknown fluid amount is 25 gallons. Cleanup pending results. 04:45 am As of this time analysis indicates the presence of a substance similar to light fuel oil (lab seq# 00-02807). Lab results are as follows for two vaults Location: 368-380 10 Ave. v-1606 16m71 ppm <1.00 Aroclor-None Location:368-380 10Ave. v-8173 16m69 ppm <1.00 Aroclor-None 01.Date: 3/27/00 02.Time: 1200 03.Incident No: 130551 04.Structure: V1606 05.Location: 368 10TH AVE 07.Cleanup Type: <50 25.Final Cleanup: Yes 31.Sample No: 00-02806 33.PCB Count: <1.0 61.Cleanup Info: 03-26-2000 REMOVED 100 GALS OF OILY WATER FROM VAULT FLOOR AND PIT. FINAL CLEAN UP WHEN CAN GET FLUSH TRUCK. TIME 1645 TO 1815. 03/27/2000 CLEANED VAULT WITH FLUSH TRUCK FROM 281 11TH AVE. REMOVED ALL SOLID WASTE. DOUBLE WASHED VAULT WITH OIL FREE AND REFLUSHED WITH FLUSH TRUCK. CLEAN UP COMPLETE,REMOVED OIL TAG #18083. "

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE DEC (Sigona) hired Milro Associates to conduct state funded cleanup. Contamination tracked back to Commercial Garage which services Taxi's located directly above the spill. USCG provided statement on their investigation. Milro took samples and conducted subsurface investigation. Cleanup prevented further seepage into Jacob Javits Convention Center. ISR prepared on 8/4/98. 6/04 transferred from sigona to tippie 8/23/05 - Raphael Ketani. Case transferred to Jeff Vought. 9/20/05-Vought-Contract Payment Package (National)-Four biweekly well monitoring and gauging events. 1/06/05-Vought-Received call and spoke to Jerry Hickson (212-465-5512) who is doing possible phase II onsite by MTA due to possible 7 line extension. 03/07/06- Thomas- Contract Payment Package- National Env. Mgmt- fluid level monitoring and data recording, report preparation,preparation of hydrographs and tables for report.(06/01/05-09/30/05) 03/15/06-Thomas- Contract Payment Package-(National)- fluid level monitoring and data recording, review and copy files, fluid recovery (10/01/05-11/30/05). 3/17/06-Vought-Receive call from Erica Hogan (Singer Environmental 718-437-9600) and owners are interested in closing the spill. Singer is consultant of buyer looking to close next week. 3/20/06-Vought-Appoval given to National (Menegio) to review file as buyer may not buy property and file review is needed. 03/24/06-Vought-Received message from Ed Klein (212-661-9400). Vought returned call and left message to return call to DEC. Vought received message from Klein and returned call and spoke to Klein. Klein is attorney for owner. 04/1/06-Vought-Received call and spoke to Ed Klein as per Klein contamination onsite was waste oil and site was monitored until 2004. Tenant left site in 2003. Site is currently an taxi repair facility with two shops. No current leakage as per Klein. Ed representing current owner: Fazday Realty Corp., Jeffrey Connor

c/o Klein and Solomon 275 Madison Avenue 11th floor New York NY 1001
fax: 212-661-6606 04/27/06-Vought-Due to lack of information in file
Vought called National Enviro (Menegio) to see if any reports on file
and for current monitoring data. Greg will look at file and return
call or email to Vought. See also spill #'s: 0010648(closed spill
adjacent to site) and 0007141(open spill across street). Vought
called Jeremy Feedore (NYSOAG) for status of site and no answer.
Vought changed spill address from 448-450 11th Avenue to 450-454 11th
Avenue to reflect the actual address of the site as per NYC Tax
Assessor's Office. 04/27/06-Vought-File review by Vought: Lease for
550 West 37th Street-1/11/84. Lease between owner (Ralph and Frank
Chiaia) and tenant (Delory Limousines Ltd.) for entire building. Deed
of adjacent railroad property-6/20/86. Deed between CRC Properties
and National Railroad Passenger Corporation. Letter from Kalco Pump
and Tank to Perfect Auto SS (456 11th Ave)-2/27/87. Tested five-550
gallon gasoline tanks and found vent risers leaking from tanks.
Replaced old vent risers... Owner did not want to use the 550 gallon
tanks anymore so I left the water in the tanks that I put in for the
test, thus discontinuing the use of the 5 550-gallon tanks. I sealed
and cemented all openings except vent lines. This work was done in
Nov ov 1996 . Lease for 550 West 37th Street-6/8/92. Lease between
owner (Ralph and Frank Chiaia) and tenant(National Coffee Break
Supply Inc.) for entire building. Letter from Fasday Realty to NY
Auto Service re:556 West 37th Street-2/1/94. ...we are in the process
of obtaining a surrender of the Premises from A&M Javits Center Auto
Repair Inc (A&M). We have been given to understand that a surrender
agreement has been executed by A&M and that the keys are in the
process of being delivered to you . Letter from Kalco Pump and Tank
Corp to State of New York-1/30/95. That on Jan 26, 1995 I purged one
two thousand gallon gasoline tank. Capping and sealing all lines
except the vent line . Letter from Amtrak Northeast Corridor to Rich
Mohlenhoff-4/25/97. Amtrak (according to my records) does not own any
property in this bolick in fee, our interest is a permanent easement
for Railroad purposes and extends to variable height above the top of
rail . Insurance Statement-4/12/97. Insurance of New York Auto
Service Inc and Best Cars Inc by NPA Associates Ltd. Letter from MJM
Plumbing Incorporated to Abels Coffee Service-5/15/97. Application
for Self Certification of Removed or Existing Boiler was file with
NYCDOB. Bill sent to Phil Rizzuto. Notes from DEC Sigona-11/6/97.
...oil was puddled on southeast foundation wall of Jacob Javits below
11th Avenue which crosses above between 38th & 37th Street. The
puddle is approximately 70 feet x 50 feet x 2 feet. Also, there is
water mixed in with the oil . Oil was thick and black. Notes from DEC
Sigona-11/7/97. Sigona onsite with Milro. There is a corner on the
northeast corner of underpass which is composed of bedrock, brick and
concrete where oil is trickly, running down. Immediately above this
corner is NY Auto Service.... . NY Auto Service was a taxi center.
Sump in basement of Javits was impacted with skim of oil . Inspection
of NY Auto Service was performed and oil tank vault had oil spill
around chamber . No records of waste oil disposal were able to be
produced. Milro performed cleanup of Javits via spill pads and drums,
power wash and vacuum truck. GC Extractables (Analab Inc)-11/11/97.
99% match of spill oil with that of source. Notes from DEC
Sigona-11/13/97. Removal of waste oil tank. ...vault is subsurface
with gaps. There was oil filled into vault 1/3 full from bottom of
vault . Notes from DEC Sigona-11/14/97. Milro onsite with two vacuum
trucks. Impact to adjacent train tracks. Letter from Richard

Mohlenhoff to DEC Sigona-11/18/97. Enclosed is a copy of a deed and map showing Amtraks property ownership around the above area. The documents show Amtrak has an easement for the existing tracks only. Amtrak acquired the easement from CRC Properties, Inc. Fax from USCG to DEC Sigona-11/20/97. Pollution Incident Statement. ...upon entering the garage I noted a funnel in one of the holes in the concrete floor with oil and speedy dry around it. Leon stated that he was instructed by the boss to use this dump spot when the waste oil tank was full. Report from Analab Inc to Milro Associates-11/20/97. Analytical results of three samples (metals, fingerprint and PCB). Two samples from waste oil tank and one from oil spill. Analysis Report (Environmental Testing Laboratories)-11/21/97. Foundation Wall and Floating product both show presence of Lubricating Oils. Notes from DEC Sigona-11/26/97. Site meeting with Milro. Milro pumped free product below train platforms. The corner of NY Auto Service is exposed and there is a large weephole where oil is leaking into/out. Seems like there is a void under the building where oil is pocketed. Letter from Conrail to DEC Sigona-12/2/97. Per our telephone conversation on November 26th, this is to advise that Block 708, Lots 62 and 65 were not conveyed to Conrail. Notes from DEC Sigona-12/3/97. Field Inspection of cleanup by Milro. The oil is now concentrated into large rectangular pools on W37 Street under 11th Avenue immediately below and to the west under NY Auto Service. Oil also pooled under two railway platforms. Letter from Milro (Glen Katz) to DEC Tomasello-1/17/98. ...grab oil samples were collected from the spill site (CR No.1) and from the waste oil tank of New York Auto Service Center (AS No. 1 and AS No. 2) a commercial property adjacent to the spill location. The fingerprint comparative analysis revealed that the oil samples collected from the spill site and the waste oil tank located at NY Auto Service Center were a match (99.7% and 98.8%). Fingerprinting also performed identified the oil was lubricating oils. Cleanup via oil skimmers and vacuum trucks. Milro estimated that 60000 gallons of used oil was recovered from the impacted area. 210 cubic yards of oil contaminated debris was also removed from the site and 32 yards of soil was removed. Oil spill impacted sump pit in Javits Center. Two holes found in foundation walls of Javits. Holes were patched and sump was pressure washed and interior and exterior walls of Javits were sealed. Milro received approval from DEC to use bentonite to encapsulate southern platform, the south and west walls of New York Auto Service and the western wall of the convention center. Letter from Milro (Katz) to DEC Tomasello-3/9/98. Summary of design and installation of a recovery system. Milro deviated from the original remediation plan (dated January 17, 1998) and designed a separate phase product recovery pond and associated drainage system. Drainage system included trenching and installation of a 4 inch diameter perforated plastic pipe that discharges to a recovery pond located of the southwest corner of NY Auto Service. Construction was completed 2/20/98. Milro also proposes to and install an additional recovery pipe along the southern wall of NY Auto Service. Contractors Authorization to Do Work-5/1/98. Authorization for Milro for installation of groundwater observation wells and sampling and development. Letter from Harwood Lloyd LLP to DEC Tomasello-6/29/98. Harwood represents owners of former conrail property. FOIL request. 05/1/06-Vought-Continued File Review by Vought: Disposal Manifest-7/2/98. Manifest for disposal of 715 gallons of waste lubricating oil. Investigative Summary Report-8/10/98. Spillers listed as NY Auto Service (448-450 11th

Avenue) and 556 West 37th Street leased to NY Auto Service. Analytical Results (ANALab)-8/13/98. This technical report contains the analytical results of one (1) sample submitted to ANALab on July 13, 1998. Requested analysis was for GC Fingerprint. Analytical Results (ANALab)-8/14/98. Analytical of sample taken from foundation wall shows: 1600ppb toluene, 3000ppb xylene, 5800ppb n-propylbenzene. Disposal Manifest-12/1/98. Manifest for disposal of 55 gallons of waste lubricating oil . Analytical Results (ANALab)-8/14/98. This technical report contains the analytical results of one (3) samples submitted to ANALab on July 13, 1998. Requested analysis was for GC Fingerprint. Samples collected from well 3, well 4 and trench. Disposal Manifest-03/10/98. Manifest for disposal of 55 gallons of waste oil . Letter from Milro (Katz) to DEC Tomasello-04/14/98. Milro will return to the above referenced location to investigate the source of increased residual petroleum seeping from the outcrop behind New York Auto Service. As an interim measure, Milro personnel will maintain the existing recovery trench on a weekly basis to recover and prevent the oil seepage from recontaminating the site . Letter from NYSOAG Feedore to Fasday Realty Corp c/o Jeff Konner-6/2/99. The State has determined that you are liabledemand in hereby made for full payment of costs and penalties... Letter from NYSOAG Feedore to NY Auto Service-6/2/99. The State has determined that you are liabledemand in hereby made for full payment of costs and penalties... Letter from KLein & Solomon, LLP to DEC Robert Lieblein)-6/7/99. FOIL request stemming from cost assessment you filed against my client, Fasday Realty Corp . Letter from Marvin Kramer to FOIL Officer-9/1/99. Recently in connection with an investigation project, my client had occasion to remove the plate which covers the top of the vault which formerly contained UST for Waste Oil. He was shocked to observe that the vault again contained waste oil of obviously significant quantities. The waste oil tank which had been formerly underground was moved at the time of initial clean-up many months ago and was not leaking. Since that day only aboveground disposal has been employed. In view of the fact that the vault has not been used for any purpose by my client, this apparently validates that the waste oil is coming from a source other than New York Auto. THC Analyticals (Environmental Testing Laboratories)-11/29/99. THC Content of roll-off is 89200ppm. THC Analyticals (Environmental Testing Laboratories)-12/22/99. THC Content of roll-off is 2470ppm. Analyticals (Environmental Testing Laboratories)-1/28/00. Oil collected from trench shows 100% lubricating oils, sample from wall below bodyshop was also analyzed for petroleum product ID and showed 169000ppm lubricating oils. Well Monitoring Logs (7/1/98-2/19/00). Four monitoring wells. Logs from 7/1/98 show .02 free product in Well #4. Logs from 2/19/00 show .05' free product. Depth to groundwater is from 9-13' below grade. Letter from DEC Sigona to Pedneault Associates (John Pedneault)-2/22/00. The DEC requests that Pedneault Associates prepare a formal report to evaluate all of the laboratory test reports for this project which I have provided to you. Primarily, we are interested in the results of the samples collected on November 7, 1997 and whether the product collected from the waste oil tank at the New York Auto Services compares to the product spilled underneath the facility behind the Javits Center . Affidavit in Support of Search Warrant (DEC Sigona)-3/9/00. Notes from DEC Sigona-3/23/00. Borings performed through waste oil tank vault and by drilling into the spaces, DEC Sigona observed significant free product in the soils behind the

vault . NYCDEP Order (Zingaropoli)-03/30/00. Oder to submit engineering plans for a properly sized oil/water separator for the auto parts washing unit. No material what-so-ever is allowed to be dumped, discharged into floor, sidewalk, street catch basin or any manhole . Pedneault Associates report to DEC Sigona-4/20/00. Pedneault conducted a review of analytical services previously performed... . Comparisons of the chromatographs produced by Pedneault Associates indicated the hydrocarbon layer of the samples to be motor oil with gasoline constituents present. Review of previous information virtually identical matches with chromatographs produced by Environmental Testing Laboratories and Analab. Letter from Environmental Assessment & Remediations (EAR) to DEC Tomasello-5/10/00. Site visit performed to document bedrock structures and to make an initial site evaluation . EAR recommends: 1)power wash stained outcrop 2)dye trace test by applying dye to tank 3)install 3-4 monitoring wells 4)surge block all existing wells 5)determine groundwater flow direction 6)install drains into foundation of NY Auto Service Center. Letter from Environmental Assessment & Remediations (EAR) to DEC Tomasello-6/8/00. Site visit performed to document bedrock structures and to make an initial site evaluation . EAR recommends: 1)power wash stained outcrop 2)dye trace test by applying dye to tank 3)install 3-4 monitoring wells 4)surge block all existing wells 5)determine groundwater flow direction 6)install drains into foundation of NY Auto Service Center 7)collect round of groundwater samples 8)weekly bailing and monitoring 9)create site specific health and safety plan. Letter from DEC Sigona to NYCDEP Nickelson-6/29/00. The DEC will be conducting a dye test of an underground vault at the New York Auto Service garage . Water was supplied from DEP fire hydrant. Please provide Environmental Assessment & Remediation with the necessary permits to operate a fire hydrant and supply the necessary water to conduct the dye test . NYSDEC Petroleum Spill Investigation Report-7/10/00. Dye test conducted on 7/10/00. The used motor oil spill has been cleaned up except for some seepate which continues from the west side and south side of foundation of 450 11th Avenue building . The dyed water readily drained from vault which is perforated by gaps present between the concrete block constructed vault. The dyed water flowed directly from the vault to the ground below 450 11th Avenue from the bottom of the foundation . Red dye was observed flowing from below foundation during test. Cross Referencing of Analytical Samples (Pedneault Associates)-7/26/00. ... we have at your request made a comparison between the most recent sample and analytical work performed for the same site received at our laboratory 3/22/00... ...we conclude that while and exact chromatographic match is not possible motor oil are constituents are present... ...a comparison was conducted between samples of dye tablets and a liquid matrix sample in an attempt to render evidence of the dye existing within the liquid sample. The results of the analysis do not support a definitive conclusion that dye exists in the liquid matrix sample . Letter from DEC Sigona to EAR Rochetta-8/7/00. DEC requesting EAR to surge block wells MW1 thru MW4. Letter from Marvin Kramer to Klein and Solomon-8/16/00. ...I and my client have reached a conclusion that it is appropriate that the apparent 3000 gallon underground tank in the 37th Street portion of the Premises be excavated . Kramer's client is willing to surrender the use of a portion of his leased premises for several days to enable this work to be completed . Letter from Marvin Kramer to NYSOAG Feedore, DEC Sigona and Klein and

S103517562

Solomon-8/16/00. Request to have DEC witness tank excavation of 3000-gallon UST. 05/03/06-Vought-Letter from DEC Sigona to Marvin Kramer-9/7/00. This letter serves as a confirmation of our meeting with representatives from NYS Attorney General's Office along with DEC and it's contractors on Wednesday, September 13, 2000. Letter from Klein & Solomon to DEC Sigona-9/11/00. ...attached please find copies of our last two letters to Marvin Kramer sent on behalf of our client, the landlord... To sum up our clients position he had had no knowledge of the existence of an underground tank below his property, and should such existence be determined, no permission to use same was ever expressly or impliedly granted to NY Auto Service or to any other tenants... . Report from EAR Trego-9/14/00. Please find enclosed the original photographs and color copies (on 8 1/2 x11 paper) of the scanned images . Letter from Klein & Solomon to NYSOAG Feedore and Marvin Kramer-9/20/00. This letter confirms that Fasday Realty (the Landlord) will be kept apprised of any appointments and/or testing to be completed... The tenant will complete said inspection and/or testing with its Contractor at its sole cost and expense, with no contribution by the Landlord . Notes from DEC Sigona-9/20/00. Site meeting with Interboro Sign and Maintenance (licensed sign erectors) to put up sign on 456 11th Avenue. USTs discovered at 456 11th Avenue (site was former Mobil service station). Letter from DEC Sigona to Phil Rizzuto-9/25/00. Certified letter sent requiring PBS registration, testing of soil and groundwater, notification to the Department so duplicate samples can be collected, Letter from Phil Rizzuto (property agent of 550 West 37th) to DEC Sigona-10/2/00. I am in receipt of your letter to me dated September 28, 2000 with reference to installation of a groundwater monitoring well at 550 West 37th Street, New York, NY . I have contacted two companies that you have recommended to either remove the existing tanks or test the ground for any contamination. After my meeting with them we will decide upon the installation of a the groundwater monitoring . Notes from DEC Sigona-9/26/00. Site visit to witness removal and endpoint sampling of six (550-gallon) gasoline USTs from 456 11th Avenue (property across street from NY Auto Service Center. Letter from DEC Sigona to Phill Rizzuto-9/28/00. This letter is a follow-up to our meeting yesterday to discuss the registration, inspection and removal if formner diesel and fuel oil tanks at the Public Parking Facility . The DEC has hired Environmental Assessment & Remediation . to perform subsurface investigation. The DEC would like to install a monitoring well in your parking garage on the west side of your property . Consent form included with letter. Letter from DEC Sigona to Summit Drilling Co.-9/29/00. Request to install four monitoring wells. Tank Removal Documentation Report (EAR)-October 2000. DEC hired EAR to document tank removal activities at corner lot located at 456 11th Avenue. Site was under control of Interboro Sign Company who was excavating for footing for a commercial advertisement sign. Removal being performed by Yellowstone Construction. EAR only performed observations. Impacted soil was encountered during excavation resulting in reporting of spill #007141. Groundwater at depth of 8-12' below grade. Removal of six (550-gallon) gasoline USTs and one one (2000-gallon) gasoline UST. As the excavator removed soil from the west side of Tank #7 concrete vault, black liquid drained from the vault base into the open hole. As the excavator removed the liquid and impacted soil from the excavation, strong gasoline odors permeated the ambient air . Visual observations did not indicate

NY AUTO SVC JAVITS CTR (Continued)

S103517562

gross contamination or free product in the sample location area . The fingerprint ID analysis indicated gasoline to be the petroleum product that caused the impact . By observations made during the five days EAR was on-site, it appears that the seven tanks formerly located at 456 11th Avenue did not contribute to the 60, 000 gallons of waste oil discovered south of West 37th Street . Fax from NYSOAG Feedore to DEC Sigona-10/3/00. Order to Show Cause, Affirmation in Support and Affidavit. State of New York (plaintiff) and Fasday Realty Corp (defendant). Fax from NYSOAG Feedore to DEC Sigona-10/11/00. Attorney Affirmation. Letter from DEC Sigona to Verizon Wireless-10/30/00. Investigation of soil at 555 West 37th Street due to the former location of seven (550-gallon) gasoline UST. Site immediately east of NY Auto Service Center. The DEC will be installing a monitoring well in front of your facility and would also like to collect samples from soils and/or groundwater beneath your site with the assistance and cooperation of IT Corporation . The DEC would appreciate your written permission for access onto your property by signing a formal access agreement . Laboratory Analyticals (Pedneault Associates)-9/27/00. Fingerprinting ID for samples collected from 456 11th Avenue. Laboratory Analyticals (Pedneault Associates)-10/6/00. Fingerprinting ID for wells MW1 thru MW4 show lubricating oil . Letter from DEC Sigona to Phil Rizzuto-11/2/00. Removal of USTs from 550 West 37th Street. Fenly & Nicol will be performing tank removal. DEC required: 1)notification 5 days prior to removal 2)submission of PBS registration. Letter from DEC Sigona to Miller (Cannella)-11/2/00. DEC requesting installation of four monitoring wells. Letter from Verizon (Strobel) to DEC Sigona-11/3/00. It is premature to discuss actions associated with the registration, inspection or removal of USTs when, as of this date, and despite dilligent efforts, we have found no such USTs anywhere on our property . Despite seven vent pipes on roof of Verizon building no tanks have been able to be located to date. IT Corporation was also hired to do subsurface investigation to see if USTs were present. Verizon allowed access to property. Letter from DEC Sigona to Milro (Basso)-11/28/00. The DEC must have complete documentation on the status of Milro's investigation and remediation of used oil which was discharged from NY Auto Service Center... We would like a proposal from Milro to complete a repair of the foundation wall and cleanup of the inside of the building . Letter from Milro (Basso) to DEC Sigona-12/14/00. Milro Associates, Inc is pleased to present this proposal to clean used oil spilled in the New York Auto Service building . Scope of work includes power washing inside wall of south side of building and encapsulation the oil contaminated area with epoxy. Report of Findings Exploratory Soil Boring Program 555 West 37th Street (IT Group)-12/15/00. Magnetometer and GPR could not locate USTs and records search yielded no information. Eighteen soil borings were performed and seven samples were collected for analysis. Soil sample results clearly indicate that there has been no apparent release of waste oil or other contaminants from the subject property . Report concludes that based on the work completed to date, the general quality of soils in the area of the suspected USTs has been determined and there is no indication that a relationship exists between the constituents detected at the subject facility and the nearby waste oil release... IT recommends a subsurface excavation in the area of soil boring SB-8 which is a potential location of a UST . Soil and groundwater analyticals show no TAGM 4046 Soil Cleanup Objective exceedences and

no TOGs 1.1.1. Groundwater Standard exceedences. Letter from Milro (Basso) to DEC Sigona-12/18/00. Milro continues to maintain the existing recovery trench behind New York Auto Service on a weekly basis.. Milro has observed oil seeping from the outcrop below New York Service and collecting in the recovery trench . Milro also performed groundwater monitoring in wells until 6/1/00. Heaviest impact to well MW4. Contains summary of depths to water, product thickness and recovery amounts from 4/99 to date. Spill report for 0010648 (550 West 37th Street) for the discovery of contaminated soil during tank removal. Spill reported by Fenley & Nicol. Contamination is on top of tanks . Tank Removal/Closure Documentation Report 550 West 37th Street (EAR)-December 2000. EAR onsite to witness tank removal by Fenley & Nicol. Removal of four (550-gallon) gasoline USTs and one 275-gallon waste oil UST. Groundwater at depths of 8-12' below grade. Nine soil samples and four product samples were collected. Soil analyticals show: 2600ppb xylene (West Wall tank 1,2,3), 16000ppb 1,2,4-trimethylbenzene(west wall tank 1,2,3), 3800ppb xylene(Bottom of tank 1,2,3), 18000ppb 1,2,4-trimethylbenzene(Bottom of tank 1,2,3,). Report concludes that analyticals are consistent with an older spill . Report concludes that by observations made during the seven days EAR was onsite, it appears that the four (550-gallon) USTs, one 275-AST and the oil/water separator located at 550 West 37th Street are not a contributor to the 60,000 gallons of waste-oil discovered south of West 37th Street . EcoTest Labaoratory Analyticals-1/11/01. Analyticals for above report. Letter from DEC Sigona to Long Island Analytical Services-1/17/01. The DEC has allowed New York Auto Service to conduct some limited subsurface remedial investigation work, to locate and remove any possible Underground Storage Tanks (USTs) at the site. It is my understanding that Long Analytical Laboratories will be applying for permits from New York City Department of Business Services to obtain a permit to excavate and remove USTs and operate heavy equipment on the sidewalk... Please call me to confirm that this work will begin on January 22, 2001 . Letter from Marvin Kramer to DEC Sigona-1/29/01. I am sorry I missed you when they started work on West 37th Street, New York, last Monday. I understand that it was completed before the end of the week. Request for reports of UST removals at adjacent sites. Notes from DEC Sigona-2/1/01. Conducted dye line test on discharge line for oil water separator and line for former connection for parts washer and sink for cleaning transmissions... The test confirmed that oil from parts washer was being discharged to sanitary sewer ...no evidence of upgradient oil contamination or source of oil other than NY Auto . 05/04/06-Vought-Continued file review by Vought: Tank Removal/Closure Documentation Report (EAR)-January 2001. The tenant of NYAS (New York Auto Service) contacted Long Island Analyticals Laboratories (LIAL) to search for and remove suspected underground storage tanks (USTs) beneath the service garage floor. Groundwater at depth of 8-12' below grade and flow to the southwest. Removal of two (550-gallon) USTs from one excavation. One tank was a 550-gallon motor oil located in a concrete vault beneath the garage floor. An initial inspection revealed that the USt had more than five holes throughout the tank and oxidation with pitting on the bottom . Second (550-gallon) tank was a motor oil UST also located in a concrete vault beneath the garage floor. Tank #2 had more than five holes throughout the tank, heavy oxidation and pitting on the bottom . Final excavation area was 10' wide, 19' long and 7' deep. The manager of NYAS insisted that a

NY AUTO SVC JAVITS CTR (Continued)

S103517562

third tank existed beneath the concrete floor of the first bay (furthest bay east). Excavation was performed without success in locating the tank. Seven endpoint soil samples were collected. Based on visual/olfactory observation of the tanks, and laboratory sample results from Pedneault laboratory, the two USTs located on the subject property contained waste/motor-oil. Construction of tanks indicated that they may have been at one time used for gasoline. ...gross contamination from free product was not observed in the native soil... By observations made during the three days EAE was on-site, and findings listed above, it is apparent that Tanks #1 and #2 and the vent/fill lines are not a contributor to the 60,000 gallons of waste oil discovered south of West 37th Street . Soil analyticals show; 1900ppb xylene(Bottom #2). High SVOC PAH's also detected in soils. Tank Search Documentation Report 555 West 37th Street(EAR)-February 2001. Tank search at Verizon property located across 37th Street north of site due to presence of seven vent pipes on roof. Verizon property was formerly operated by Adirondack Trailways. Verizon contracted IT Corp to look for tanks. See 12/15/00 entry above for IT Corp report. Miller installed bedrock well located in front of 555 West 37th Street. The purpose of well installation was to delineate possible waste oil contamination from NYAS. EAR concludes that despite GPR, magentometer survey, records search and soil borings that it is undeterminable if USTs exist at 555 West 37th Street . EAR also concluded that Gross waste oil contamination was not encountered during the installation of eighteen soil borings and one bedrock monitoring well indicating that is unlikely that the Verizon Wireless suspected USTs contributed to the 60,000 gallons of waste oil discovered south of West 37th Street . EcoTest Laboratory Analyticals-02/07/01. Copy of laboratory analyticals for tank removal at 450 11th Avenue (NYAS). See January 2001 report. Letter from Marvin Kramer to Amtrak-03/09/01. ...we are trying to determine what knowledge was had by the company or employees of the entity responsible for the railway and track . Letter from Milro (Basso) to DEC Sigona-04/18/01. Weekly maintenance of recovery trench. During these visits, Milro had observed soil seeping from the foundation below New York Auto Service and collecting in the recovery trench . The area below 11th Avenue is presently flooded with surface water and the trench area is failing. Milro recommends restoring the area to increase product recovery. Milro recommends dewatering the flooded area below 11th Avenue . Due to runoff the trench has been filled in with soil over time . Milro will excavate contaminated soil from the trench and containment area and wash foundation of building and outcrop. Examination before trial of the plaintiff (State of New York) by: Anthony Sigona. Notes from DEC Sigona-5/2/01. There was some oil seepage under NY Auto on the west foundation and south walls . Area under NY Auto is flooded. No further removal of soils appears necessary. Project Summary (EAR)-July 2001. Milro continues to use pads and booms to recover oil in trenches, EAR bails monitoring wells . Weekly monitoring and maintenance by EAR. Adddavit of DEC Sigona-10/31/01. Photographs-6/20/02. Photos of oil stain on wall below New York Auto and oil contaminated pads in trench . Retainer Agreement from Klein and Solomon to EAR Rochetta-8/11/03. Klein and Solomon on behalf of Fasday seeks to engage you to provide expert assistance, consultative services and possibly expert opinion evidence at trial... . Fax from Klein and Solomon to DEC Tipple-8/12/03. Jeremy Feedore from the Attorney General's Office indicated that my client could enter into a Stipulation of Take Over of Clean Up with

your office, for the Premises . Please be so kind as to prepare such a Stipulation for the Premises at your earliest convenience . Judicial Subpoena Duces Tecum to DEC Sigona-8/25/03. Subpoena for site files. Letter from NYSOAG Feedore to DEC Sigona-2/4/04. The court has ruled that NY Auto/Rony Abramove is liable for all the costs and cleanup of the discharge, and is required to indemnify Fasday Realty... . Attached is decision and judgement of State of New York Supreme Court. Project Summary EAR-March 2004. Milro continues to use pads and booms to recover oil in trenches, EAR bails monitoring wells . Weekly monitoring and maintenance by EAR. Site plan shows 3000-gallon UST onsite and seven monitoring wells. Email from EAR Rochetta-4/8/04. As approved in the March 19, 2004 meeting, EAR will be using Biosolve to clean onsite wells . EcoTest Groundwater Analyticals-6/2/04. Groundwater analyticals show: 30ppb benzene(MW1), 7ppb xylene(MW1), 6ppb isopropylbenzene(MW1), 8ppb n-propylbenzene(MW1), 21ppb 1,2,4-trimethylbenzene(MW1), 34ppb xylene(MW2), 38ppb 1,2,4-trimethylbenzene(MW2), 6ppb benzene(MW4), 8ppb benzene(MW6), 17ppb toluene(MW6), 110ppb ethylbenzene(MW6), 420ppb xylene(MW6), 320ppb 1,2,4 trimethylbenzene(MW6), 33ppb naphthalene(MW6), 480ppb benzene(MW7), 3600ppb toluene(MW7), 3800ppb ethylbenzene(MW7), 1300ppb xylene(MW7), 5500ppb 1,2,4-trimethylbenzene(MW7), 930ppb naphthalene(MW7). Groundwater analyticals (STL)-02/23/06. Groundwater analyticals show: 6.5ppb benzene(MW2), 18ppb benzene(MW4). FOIL Review-KTR NewMark-Anthony Galasso (212-906-9422). Fax from Envirosience (Mead)-5/1/06. Groundwater monitoring results show no free product in well MW1 since 10/05, no free product ever in MW2, MW3, MW5, MW6, .08' free product in MW4 on 12/27/05 and .02' free product in MW7. Groundwater analyticals show: 05/03/06-Vought-DEC requires: 1)contact with NYSOAG for status of enforcement and whether STIPULATION should be sent 2)monthly monitoring of wells 3)monthly monitoring, cleaning and recovery of foundation wall, recovery trench 4)verify presence of 3000-gallon UST 5)possible offsite contribution to groundwater contamination of MW7 6)permission to discuss site with Billy Masonette(646-725-2190) who has been calling for states requirements 7)site visit to inspect Javits sump system, train tracks, verify presence of 3000-gallon UST and verify presence of all monitoring wells 8)possible investigation under garage floor as per DEC Austin. 05/04/06-Vought-DEC requires: 1)monthly monitoring and quarterly sampling of wells 2)monthly monitoring, cleaning and recovery of foundation wall and recovery trench 3)verify presence of 3000-gallon UST 4)permission to discuss site with Billy Masonette(646-725-2190) who has been calling for DEC requirements 7)site visit to inspect Javits sump system, train tracks, verify presence of 3000-gallon UST and verify presence of all monitoring wells 8)possible investigation under garage floor as per DEC Austin. 05/09/06-Vought-Site visit by Vought with Ken Mikkelsen/Mark Younger(developers Singer Group 718-403-0900), Scott Dunley(financer 212-944-6620), Joseph Abutel (212-643-6770), Billy Masonette(working for developer), Andrew Gassparro Ed Klein. Possible development plans for property include construction of hotel on site and adjacent sites (450-454 11th Avenue and 550 West 37th Street). Billy Masonette(aka Brothers Environmental) performed three geoprobes in NY Auto Service for soil characterization. No groundwater was reached and refusal at 5 on bedrock. Report will be submitted to DEC. 3000-gallon UST was searched for and no indications of tank were found such as concrete patches, former vents/fills/dispenser islands, no dissolved BTEX in

S103517562

adjacent wells and such no further investigation of tank is required. Oil/water separator was opened (historical source of spill) and minor amount of product and water in bottom of separator. Two waste oil tanks in secondary containment in garage with no spill to secondary containment. As per Klein, Stipulation should be addressed to him with cc to KTR. Vought inspected Javits Center with Gasparro and Masonette. Vought met with Javits Center Operations (Carola Henderson 212-216-2806 and Dan Matuck 212-216-2233) to inspect Javits Center sumps and basement walls. No impact to sumps and minor impact (1 stain and fresh black oil (possibly waste oil) on basement plenum wall. No signs of staining on wall so no historical infiltration to Javits. Vought instructed Henderson and Matuck to contact DEC if oil began seeping through or impact to sump. Vought inspected foundation of NY Auto Service Center, trench area and adjacent tracks with Masonette and Gasparro. Foundation showed some waste oil staining and one minor area of groundwater seepage however trench was dry and no recoverable product. Dry impacted pads noted in trench. Possible closure date of sale is 7/1/06 and States contractor will not perform monitoring until after 7/1/06 (if RP does not sign STIP and take over site). Vought sent email to National (Menegio) requesting no further work till 7/1/06. As per Dunley site may not be developed for up to two years. Vought explained that until development occurs, monitoring/sampling of site will suffice. Vought sent residential construction STIPULATION with requirements of: 1)vapor barrier and possible sub-slab depressurization system 2)monthly monitoring and quarterly sampling of wells 3)monthly monitoring, removal of impacted adsorbent pads and recovery of impacted groundwater(if applicable) from recovery trench 4)possible investigation under garage floor as per DEC Austin or excavation to bedrock for new construction. STIP due back to DEC by 7/1/06 (closing date of property). Vought sent Stipulation with cc to NYSOAG Feedore to: Edward E Kein, Esq Klein & Solomon LLP 275 Madison Avenue 11th Floor New York, NY 10016 (fax) 212 661-6606 email:edklein@kleinsolomon.com 05/15/06-Vought-Received call from AG Feedore that he spoke with Klein and some language of letter is too strong. Vought called Feedore and removed section referring to outstanding violations of Navigation Law as case was already settled by AG. 06/02/06-Vought-Spoke with National (Menegio) and requested that well monitoring be suspended until the month of July (after STIP from Klein is due back). 06/27/06-Vought-Received call from Michael Wahba (212-221-3001) who is looking to purchase property and is in contract for closing. Site will be Mariott Hotel. Vought referred Whaba to Ed Klein for copy of Stipulation and DEC requirements. Vought received call from Zeb Youngman (PW Grosser 631-589-6353). Vought called Zeb Youngman and left message to return call. Vought spoke to Zeb and his client (Witkoff Group) may be purchasing property. Zeb got site info from Ed Klein. 07/14/06-Vought-Received signed Stipulation Agreement from Baruch Singer(developer) dated 6/27/06 representing Javits Center Development LLC. Vought called NYSOAG Feedore for to ensure that STIP can be signed by developer (not RP). Feedore approved signing of STIP by Singer. STIP implemented by DEC Austin and as per CAP, OMMP plan due on 9/14/06. 08/10/06-Vought-Received message from Ed Klein that he was on top of the buyer to make sure he takes care of his obligations . 09/06/06-Vought-Received message from Billy Masonette(646-725-2190). Vought returned call and left message to return call to DEC. 09/08/06-Vought-Received call and spoke to Masonette and groundwater samples have begun to be collected. Samples

were collected monthly for past three months. Report will be prepared and submitted to DEC and to Klein. 06/18/07-Vought-Received call from Anthony Galasso(212-906-9422) regarding status of site who is working for current owners. Property was sold. Galasso doing research for due diligence. Vought will review report and get back to Galasso with update on adjacent property. 08/21/07-Vought-Received call from Mohammed Ahmed (AKRF 212-675-3225). Site will be redeveloped as hotel. Ahmed working for Gertel Associates who is new owner of site. Site is E designated. Contamination will be removed to bedrock and bedrock will be removed for foundation. Vapor barrier will be installed. Excavation tentatively scheduled for 7-8 months. RAP will be submitted to DEP and DEC by 4/1/08. 01/03/08-Vought-Received note from DEC Leung that FOIL request was submitted by Shulem Pfeiffer from Jericho Group Ltd (718-643-4200). Pfeiffer looking for more recent data from file eventhough he has seen copy via FOIL review. Vought spoke to Pfeiffer and he abruptly hung up phone saying that DEC had no further info and we already told him as such. 01/30/08-Vought-DEC Sangesland received call from Elaine who was working for potential purchaser of site and was inquiring as to further remedial requirements. DEC Sangesland referred her to FOIL. Due to inquiry on 1/30/08 and 1/03/08 all further inquires will be directed to FOIL Department and or Ahmed AKRF. 06/13/08-Vought-Current file review by Vought: Well Monitoring Report (Brothers Environmental Services -Billy Masonette Ph:877-839-6009)-9/11/06. Well monitoring performed on behalf of Rosma Development. Groundwater samples obtained from MW5, MW6 and MW7. Report concludes that impacted water was found in MW7. Report recommends continuation of monthly well monitoring. Groundwater analyticals show: 28ppb 1,2,4-trimethylbenzene(W-5), 100ppb benzene(W-7), 100ppb toluene(W-7), 100ppb ethylbenzene(W-7), 4100ppb xylene(W-7), 7000ppb 1,2,4-trimethylbenzene(W-7), 7300ppb 1,3,5-trimethylbenzene(W-7), 1000ppb naphthalene(W-7). Remedial Investigation Report (Fleming Lee Shue(FLS)-Mohammed Ahmed)-4/9/08. FLS working for Gertel Associates. Alternative addresses include 556 West 37th St, 446-450 11th Ave, 558 West 37th St, 452 11th Ave and 450-454 11th Ave. Proposed construction of 29-story hotel which will require excavation to a depth of at least 30' below grade. Groundwater depth is 8-11'bg. Eleven soil borings installed via Geoprobe in Jan/March 2008. Bedrock from 3-12'bg. Petroleum staining and odor observed in SB-1(10-11'bg), and SB-8(8-12'bg). Soil analyticals show no TAGM 4046 VOC exceedences with minor PAH exceedences attributable to fill material. Groundwater sample analytical from MW2 (called in this report MWA) shows non-detect for VOCs. Reviewed RAWP from AKRF (Mohammed Ahmed Fax:212-675-3224) dated May 2008 and received on 5/30/08. AKRF working for 37-11 Development LLC. The site consists of three 1-story buildings....were formerly occupied by two auto repair shops and one check cashing facility . Site is E designated. Site proposed to be developed with 29-story hotel with two sub-floors which will require excavation to 32 feet below grade. Groundwater estimated to flow to the southwest. Depth to groundwater is 8-11'bg. However, approximately 20 vertical feet of bedrock will be remmoved during pre-construction activities to a depth of approximately 32ft bgs... . Groundwater likely to infiltrate site during bedrock removal activities. It is expected that all onsite soil will be removed during excavation activities due to the shallow depth of bedrock. ...a waterproofing membrane will be installed... which will be a Grace Preprufe 300R, a 46-mil thick high

density polyethylene membrane and the selected waterproofing membrane for the sidewalls is Grace Preprufe 160R, a 32 mil thick HDPE membrane . 06/16/08-Vought-DEC approves RAWP pending inclusion of following requirements: 1)call to AG to determine if new STIP warranted to 37-11 Development LLC 2)cc to AG, Ahmed,DEP as site is E designated 3)sampling of dewatering water for new construction 4)round of groundwater sampling from all wells. Vought called FLS Ahmed and discussed above requirements and Ahmed will send email with current owners contact info and contact info for NYCDEP. Vought called NYSOAG Feedore and he requested that a new STIP be sent and he review STIP prior to sending. 06/17/08-Vought-Received email from FLS Ahmed and new mailing address for STIP is: 37-11 Development, LLC 158-13 72nd Avenue Flushing, NY 11365 Vought sent draft copy of STIP to AG Feedore for review. 06/18/08-Vought-Received email from Ahmed that NYCDEP contact is Innocent Taziva (718-595-3585 fax:718-595-4479). 07/23/08-Vought-Received fax copy of signed STIP that was signed by David Marx an official, authorized corporate representative for the Respondent . 07/25/08-Received original copy of signed STIP on 7/24 and STIP implemented by DEC Mattei on 7/25/08. As per CAP, Addendum to RAP due to DEC by 8/25. Copy of signed STIP faxed to FLS Mathew Carroll. 10/07/08-Vought-Reviewed Remedial Action Work Plan Addendum dated 8/19/08 and received on 8/22/08 from FLS Nathe. Although groundwater does not exist onsite according to RIWP activities and monitoring wells do not exist onsite, groundwater samples will be collected from all three off-site monitoring wells (MW-A, MW-B and MW-C) to characterize groundwater that may require dewatering during construction activities . Dewatering discharge will be sampled on a regular basis including intitial, intermediate and final sampling via 8260/8270 . Vought sent letter approving RAP addendum with cc to FLS Nathe. 12/22/08-Vought-Vought spoke with FLS Ahmed and wells will be monitored and put property developement put on hold due to economic conditions. 01/20/09-Vought-Received and reviewed letter from FLS Ahmed dated 12/22/08 and received on 12/26. Due to fiscal constraints, the construction of the new hotel building has not commenced at the above referenced site. Accordingly, FLS recommends that quarterly groundwater sampling be performed in accordance with the CAP until site redevelopment begins and quarterly groundwater monitoring reports be submitted as deliverables to the NYSDEC . Vought sent letter approving of proposal. Vought sent letter approving of proposal with cc to FLS. 11/23/09-Vought-To date file review by Vought: Letter from FLS Ahmed to DEC Vought-2/24/09. FLS working on behalf of Gertel Associates and submitting quarterly groundwater results. Laboratory analysis indicated absence of any VOCs or SVOCs in all samples collected. No site plan or analyticals in report to describe which samples were collected. Letter from Associated Environmental (John Schretzmayer) to DEC Vought dated 5/9/09. Please be advised that Associated Environmental Services, Ltd. has been retained by 37-11 Development LLC located at 158-13 172nd Avenue, Flushing, NY 11365 to perform quarterly groundwater monitoring and submit required reports for the above referenced site . Owner of site is: Mr. Yossi Fischer 37-11 Development LLC 158-13 172nd Avenue Flushing, NY 11365 Quarterly Groundwater Monitoring Report (Associated)-5/20/09. Sampling of three monitoring wells installed in sidewalk in front of the subject property. Groundwater is 8-11'bg. VOC's were non-detect for all three wells. Vought discussed adjacent property spill (456 11th Ave) with DEC Patel and he will follow up to ensure that that owner is assuming monitoring

and decommissioning responsibility for those wells. Vought called Associated (Christine Mazarella (631)234-4280) and spoke to John Schretzmayer and informed him of prior DEC acceptance of RAWP based on removal of contaminated soil down to bedrock. Vought required confirmation of development plans and submission of updated letter ensuring installation of vapor mitigation efforts on future development and sensitive receptor survey. Schretzmayer will return call to Vought. 2/11/10-Vought-Received email from Associated (Mazzarella) requesting update. Vought called and left message to return call. 3/1/10-Vought-Received call from and spoke to Mazzarella and discussed requirements of confirmation of development plans and submission of updated letter ensuring installation of vapor mitigation efforts on future development and sensitive receptor survey. Vought sent email of same. 5/20/10- Vought-Called and spoke to Mazzarella and as per Mazzarella, Schretzmayer conveyed DEC requirements to client and Schretzmayer will send email to Vought with updates regarding sensitive receptor survey and installation of SSD/vapor barrier if site is to be redeveloped. 6/10/10-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin due to Vought transfer to Section A. 8/9/10 - Raphael Ketani. Kevin Murphy of Associated Environmental Services (631) 234-4280 sent a letter to DEC that was written by Yossi Fischler of ATRIA Builders, LLC. The letter was a short paragraph in which was stated that ATRIA will institute vapor mitigation efforts during the construction of the hotel that will be on the site. The vapor mitigation will consist of a vapor barrier, a sub-slab depressurization system (if applicable), and a sensitive receptor survey (if applicable). This letter was shown to staff at DEC and was found unacceptable as it was not a legally binding instrument for the owners. 8/10/10 - Raphael Ketani. Today, I sent Mr. Murphy an e-mail requesting that the owners put together a draft deed restriction and submit it to the DEC for review and approval. The deed restriction should state that there had been an oil spill at the site and that a vapor barrier and a sub-slab depressurization system must be installed as part of the building construction. 5/18/11 - Raphael Ketani. I still hadn't received the draft deed restriction. I sent Mr. Murphy another e-mail with the same content as the one that I had sent on 8/10/10. 5/20/11 - Raphael Ketani. Earlier today, I received a call from Kumar Patel of the Region 2 Spills Unit. He said that he was investigating a spill that was called in yesterday (5/19/11) at 3:30PM. The spill number is #1101875. The spill was called in by Joe Enang (917) 335-2438. It consisted of an unknown oil that was found in the MTA Seven Line tunnel extension at 11th Avenue and 36th Street about 25 feet below ground. Workers put down pads to collect the oil. Mr. Kumar believes the oil is from the site and is waiting for a representative from the MTA to meet him at the site in order to see what the problem is and whether the oil is still coming in. I contacted Mr. Murphy by phone (631) 234-4280. I reminded him that the DEC was still owed a sensitive receptor survey and a draft deed restriction. Mr. Murphy said that he was aware of this and that he had passed the message along to Yossi Fischler (917) 929-2440 of ATRIA Builders, LLC (the owner of the property). However, Mr. Murphy told me that his company is not presently under contract to ATRIA. Mr. Patel returned to the office and briefed me regarding what was found. He said that Rosemarie of the MTA and him investigated the spill and determined that it was definitely coming from the auto service shop above. The shop is still active and doing repairs. According to Mr. Patel, MTA

Direction
Distance
Elevation

MAP FINDINGS

Site

Database(s)

EDR ID Number
EPA ID Number

NY AUTO SVC JAVITS CTR (Continued)

S103517562

personnel discovered water in the tunnel with a little oil on top. This was cleaned up. Then they discovered oil in the dirt that they were digging out to extend the tunnel. Mr. Patel told me that, right now, the MTA is willing to continue to remediate the spill by digging out more soil, which they have to do anyway. Mr. Patel will let me know the progress of the digging and what is found. If the contamination turns out to be from an active spill from the service shop, rather than residual material, then Mr. Fischler will be notified and asked to clean up the spill. Later, Gregory Ernst of Associated Environmental Services (631) 234-4280 sent me the sensitive receptor survey by e-mail. He added that the draft deed restriction will be sent sometime in June 2011 when the primary property owner returns. I reviewed the sensitive receptor survey. I had no comments. 6/3/11 - Raphael Ketani. Ed Shea (shay) of LAMCO (212) 237-1140 called. He said that he had represented Lehman Brothers during 2007 and 2008. He was counsel for LAMCO (Leeman Brothers Asset Management). He is taking care of the part where Lehman Brothers was a lender. He is trying to decide what should be done with the property. Right now, he needs an update. At one time, Ernie Fleming of Fleming Lee Shue had received approval to develop and clean up the site. Mr. Shea said that he has documents showing that owner of the taxi company had recovered 60,000 gals. of oil that was under the Javits Center and had reimbursed DEC. Mr. Fleming had the idea that there were no fractures in the bedrock and so there would be no migration of oil to the deep subsurface. Mr. Shea was very surprised to learn from me that there were fractures and that the oil had moved 30 feet down below grade to where the MTA was digging the subway tunnel extension. He said that he will contact Kumar Patel of the Spills Unit to find out what is happening with the tunnel digging and the residual oil removal. 6/6/11 - Raphael Ketani. I spoke to Mr. Patel regarding the #7 line tunnel extension digging. He said that he hadn't heard anything more since his last visit. He will call the construction company. 6/8/11 - Raphael Ketani. Mr. Shea called. He didn't realize we had spoken earlier in the month. I told him that there wasn't much new regarding the site. The MTA contractor was still digging and the DEC was still owed the deed restriction. Mr. Shea thanked me and the conversation ended. I spoke to Mr. Patel about progress with the MTA digging. He said that the results came back for the soil sample that they had thought had contained oil. The results indicated that the substance wasn't oil. Mr. Patel added that there isn't much soil to dig out anyway. The end of the #7 line extension will be next to, NOT UNDER, the site. After the soil is dug out that covers the bedrock, then a retaining wall will be constructed under the adjacent side of the site and that will be the end of the construction. The extension WILL NOT go to the Javits Center. I spoke to Mr. Vought regarding what it will take to close the spill case. He said that if the development will be a high rise hotel, then the soil will be dug out and then some of the bedrock. So the RAWP will not be necessary. However, if the site will not be developed whereby a tall structure needing a deep foundation will be built, then the contaminated soil must come out and the RAWP will apply. Without deep development and soil removal, the spill case CAN NOT BE CLOSED. 6/9/11 - Raphael Ketani. I made an unannounced site visit. The former car service station is at 450 11th Avenue. It is between West 37th Street and West 36th Street. The site faces the Javits Center. It is bordered on the north by a defunct check cashing store. A gigantic pile of covered soil and rock sits next to the

Map ID
Direction
Distance
Elevation

Site

Database(s)

EDR ID Number
EPA ID Number

NY AUTO SVC JAVITS CTR (Continued)

S103517562

south side of the site. This material is from the #7 Line subway extension project to the south. I found three well covers adjacent to the former check cashing store along West 37th Street. There was nothing else of note regarding the site. 7/6/11 - Raphael Ketani. Mr. Fischler (917) 929-2440 of ATRIA Builders, LLC (the owner of the property) called. We discussed the easement/deed restriction. I told him that this was the only document that was needed to close the case. I told him that the document must include the statements that there has been an oil spill on the site, and that a vapor barrier and a sub-slab depressurization system must be installed as part of the building construction. I told Mr. Fischler to submit the draft deed restriction/easement to the DEC and we will review it. He said that he agreed to submit the draft document. 7/7/11 - Raphael Ketani. Greg Ernst of Associated Environmental Services (631) 234-4280 called. He wanted to know what the soil results showed from the sample that had been taken. I told him that the results indicated that the material WAS NOT oil. 8/25/11 - Raphael Ketani. I spoke to Mr. Fischler (917) 929-2440. He said that a meeting was held last week between Michael Bogan (environmental lawyer hired by ATRIA), representatives of Lehman Brothers (the lender), and representatives of Associated Environmental Services. The meeting was held to discuss the site and the environmental situation. Mr. Fischler said that they decided that the DEC should submit a letter to ATRIA describing what should be done in order to close the spill case. I told him that the DEC needed a draft deed restriction and easement. I added that the draft document should indicate what will be done to mitigate any vapors. Mr. Fischler said that this should be included in the letter and anything else the DEC would require. I told him that I will send this letter. Later, after reviewing the case notes again, I determined that there still was an issue regarding the second STIP which had not been complied with. The RAWP Addendum had been approved by the DEC and a letter was sent to the owner on 10/7/08, but no action was taken by the owner. This STIP was signed by David Marx, a managing member, for Marx Development - Atria Builders. He signed the STIP on 7/21/08 and it became effective on 7/25/08. According to ACRIS, the owner of the site (block 708 and lot 65) is still 37-11 Development, LLC at 158-13 72 Avenue, Ste 2F, Flushing, NY, 11365. The deed document is dated 5/18/07 and was filed on 6/22/07. Gertel Associates and ATRIA Development, LLC are also at this address. 9/8/11 - Raphael Ketani. A certified return receipt letter was sent to Mr. Fischler today. The letter stated that 37-11 Development, LLC has to comply with the requirements in the CAP for the STIP. One of these requirements was the excavation of the contaminated soil below the site. Additionally, 37-11 Development, LLC was being required to do monthly off site groundwater sampling, gauging and product collection and to submit a monthly report. A deadline of October 6, 2011 was set for the excavation and groundwater monitoring to begin. The letter also stated that legal action would be taken if the work didn't start by the deadline. 9/9/11 - Raphael Ketani. Mr. Fischler called me. He said that he had just received the DEC 9/8/11 letter. He said that he was very taken aback by the change in direction and that he was very angry about it. Mr. Fischler went on to say that he didn't know how he could approach his bosses about what 37-11 Development, LLC has to now do. He said that they can't get the funding to do the excavation in such a short period of time, let alone get the contractor on board to start working. He added that construction was still going on for the subway extension to the Javits Center. I told Mr. Fischler that

NY AUTO SVC JAVITS CTR (Continued)

S103517562

the change in direction for the DEC was due to the fact that putting the environmental excavation wording into a deed restriction or an easement was not how the DEC manages contaminated sites. I added that this determination was made during a discussion amongst staff here and in our Albany office. Also, there was still an outstanding STIP that had never been acted on. He asked why the previous case manager and I were originally telling him that all they needed to do to close the case was a sensitive receptor survey and a deed restriction. I told him that I didn't know why the previous case manager had decided that the receptor survey and the deed restriction were the right approach. I explained that the sensitive receptor survey was needed by the DEC anyway, but the real issue was the STIP which was signed by Mr. Marx of his company and never acted upon. I reminded him that the STIP is a legal document and contract and must be adhered to. There are timelines to follow. I told him that, if he wants, his company lawyer can talk to John Urda of our Office of General Counsel. Mr. Fischler stated that his lawyer will contact Mr. Urda. Later, I talked Greg Ernst of Associated Environmental Services (631) 234-4280 about the case. He said that John Schretzmeyer of Associated was much more familiar with everything that took place. I then spoke to Mr. Schretzmeyer. He said that Jeff Vought had told him that the groundwater sampling could stop since the samples were all non-detect and that Mr. Vought had put this in a letter. He will look for Mr. Vought's letter. So the 2009 groundwater report was the only one that was required. Mr. Schretzmeyer added that Mr. Vought had told him that all Associated needed to do was to submit the sensitive receptor survey and the deed restriction. I told Mr. Schretzmeyer that there was an active STIP in place that was never followed. Mr. Schretzmeyer said that this was news to him. He added that 37-11 Development just told them to do groundwater monitoring and sampling. I thanked Mr. Schretzmeyer for the information and the conversation ended. I checked the E-docs and found a 6/30/08 DEC letter in which Mr. Vought described the groundwater sampling. In paragraph No. 1, he states additional groundwater investigation and monitoring may be required pending review of the samples. In paragraph No. 2, he states one round of groundwater samples must be collected from all on-site and off-site wells. 9/20/11 - Raphael Ketani. A clarification letter went out to Mr. Fischler regarding the environmental monitoring and remediation requirements under the STIP. Reference was made to the approved Fleming Lee Shue letters dated 8/19/08 and 12/22/08. 37-11 Development was in violation of the STIP due to their failure to conduct the quarterly groundwater monitoring. It was also stated that quarterly groundwater monitoring and reporting were required to begin this September, and that this should continue until they are ready to excavate the contaminated soil. Failure to comply will result in legal action. 9/26/11 - Raphael Ketani. Matt Carroll of Tenen Environmental (646) 827-1061 called. He said that his company will do the quarterly groundwater monitoring for the site. They will begin the quarterly sampling this week. Mr. Carroll said that a few employees from Fleming Lee Shue had left and had formed this new company, Penen Environmental. 9/28/11 - Raphael Ketani. I received the green return card for the 9/9/11 Fischler letter. It was signed by Rose Voutan. 10/25/11 - Raphael Ketani. Mr. Carroll (646) 827-1061 called to say that he was sending the groundwater results from the latest round of sampling. A short time later, Mr. Carroll sent me a pdf file with the groundwater reports from 2006 to 2009. They had been produced by various environmental consultants. He also sent me

S103517562

the Tenen Environmental October 2011 groundwater analytical results report. I reviewed the report and found the results to be almost entirely non-detect. I sent him a response e-mail stating that groundwater sampling can be reduced to semi-annually (twice a year). The next sampling should be during June 2012. 10/31/11 - Raphael Ketani. This PIN case is being transferred to Jeff Vought as per the request of Randall Austin, Chief of the Spills Unit, and as part of the caseload realignment. A synopsis of the case history is listed below: The spill was received by the DEC on 11/5/97 as the appearance of oil at the Javits Center. The oil spill was traced to NY Auto Service. Sixty thousand gallons of oil and 32 cu. yds. of contaminated soil were removed. Three groundwater monitoring wells were installed along the north side of the site. A STIP was signed by a representative of the current owners and became effective on 7/25/08. As part of the CAP, quarterly groundwater monitoring and reporting were required. Reports hadn't been received as required until Tenen Environmental sent the October 2011 monitoring report. The results were almost entirely non-detect. The DEC approved semi-annual groundwater sampling until site development takes place. Then, the owners will be required to remove all of the contaminated soil and install a vapor barrier and sub-slab ventilation system. 5/9/12-Vought-Spill report sent by RSE to NYSOAG Feedore as well as Stipulation Agreement and asked him for review and determination on how DEC can proceed with his request for a Final ISR. 7/20/12-Vought-Left message for Mr. Carroll with name and info that Vought new project manager and left request to return call to DEC with current site status. Vought received return message from Carroll and he noted that there are no development plans for the site to date and they will adhere to DEC approved RAP upon development. 7/31/12-Vought-Spoke with and received email from Arcadis (Steven Feldman Ph:631-391-5244 email:steven.feldman@arcadis-us.com) requesting locations of former product recovery systems. Vought sent Feldman copy of DEC summary site plans showing recovery trenches and also added plans to e-docs. 04/22/13-Hiralkumar Patel. after discussing with DEC Austin and DEC Vought, case transferred from Vought to Patel. 5/15/13-Vought-Received call from Denise D'Ambrosio (Ph:914-393-9578) who was inquiring about spill and Vought to returned call. 05/22/13-Hiralkumar Patel. 1:24 PM:- received call from Ms. D'Ambrosio, attorney for Midtown Development who owns property at 555 W 36th Street (Block# 708/Lot# 1). Ms. D'Ambrosio asked for update. informed her that the department has not received anything since Oct. 2011. Denise D'Amborsio **attorney for neighbouring property** PH. (914) 393-9578 1:51 PM:- left message for Matt at Tenen Environmental. Matt Carroll Tenen Environmental Ph. (646) 827-1061 2:01 PM:- spoke with Mr. Fischler at 37-11 Development LLC. Mr. Fischler mentioned that the property is currently in foreclosure and he doesn't know who owns it actually. he will call back with update. 37-11 Development LLC. **property owner as per ACRIS** 158-13 72nd Avenue Flushing, NY 11365 Attn.: Yossi Fischler Ph. (917) 929-2440 37-11 1031 LLC. **property owner as per ACRIS** 242 Warren Street Brooklyn, NY 11201 2:11 PM:- spoke with Jeremy Feedore, attorney at AG's office. Jeremy mentioned that the case has been settled with RP and waiting for final ISR to close the pin case. 05/23/13-Hiralkumar Patel. 4:14 PM:- sent final ISR to DEC Farrar. final ISR emailed to DEC Farrar, AG Feedore and DEC Austin. 07/15/13-Hiralkumar Patel. 10:52 AM:- received call from Mohamed Ahmed from Tenen Environmental. he mentioned that Mr. Fischler has

settled foreclosure issue and wants to work on spill closure. Mr. Ahmed inquired about what needs to be done. informed him that file review is pending. Mohamed Ahmed Tenen Environmental **owner's consultant** Ph. (646) 606-2332 Ext. 101 email: mahmed@tenen-env.com 07/16/13-Hiralkumar Patel. 1:18 PM:- received call from Mr. Ahmed. he mentioned that property owner has 60 days to finalize on either spill closure or further requirements, to satisfy bank requirements. as such, owner decided to collect groundwater sample for analysis. informed Mr. Ahmed that the department may not be able to comment on future requirements in 60 days. 08/28/13-Hiralkumar Patel. received email from Mr. Ahmed (at 559 PM on 08/27/13) including groundwater sampling report. abstract: - three wells MW-A, MW-B and MW-C are located on north side of the site, along W 37th Street - groundwater samples from monitoring wells were collected on 08/05/13 - groundwater was encountered at depths ranging between 11.20 and 29.7 ft bg - no contamination found in samples Mr. Ahmed requested spill closure based on groundwater sample results from three wells (MW-A, MW-B and MW-C) which are located upgradient and in straight line. he requested closure based on groundwater sampling data from sampling in Feb. 2009, May 2009, Sep. 2011 and Aug. 2013. Mr. Ahmed also included copy of groundwater sampling occurred in 2006 from wells MW-5, MW-6 and MW-7. during sampling in 2006, heavy contamination was noted in well MW-7. report does not include location of wells MW-5, MW-6 and MW-7. before commenting on spill closure request, need to review entire file. 09/10/13-Hiralkumar Patel. 2:39 PM:- received call from Mr. Ahmed inquiring about comments on closure request. informed him that file review is still pending and can not comment on such request at this time. 09/16/13-Hiralkumar Patel. 12:04 PM:- received message from Mr. Ahmed. he inquired about a date when DEC will comment on spill closure request. he also stated that owner's attorney is planning to discuss with DEC attorney if no response. discussed with DEC Austin and DEC Vought. DEC Vought previously managed this project. he stated that property owner signed a STIP and there was a requirement of quarterly groundwater monitoring and report submission until site development occurs. reviewed available documents. DEC Vought sent letter to property owner on 01/20/2009 requiring quarterly groundwater monitoring and report submission, until site redevelopment occurs. based on available documents, groundwater samples were collected on 02/10/09 (results not included in recent report dated Aug. 2013), 05/08/09, 09/28/2011 and 08/05/2013. also, reports were submitted on 02/24/2009 (only included cover letter in recent report dated Aug. 2013), 05/20/09, Oct. 2011 and Aug. 2013. all these does not satisfy the requirement of quarterly sampling/report submission (as part of signed STIP) until site redevelopment. 09/17/13-Hiralkumar Patel. 12:01 PM:- spoke with Mr. Ahmed. informed him that file review is still pending. informed him that groundwater sampling occurred from three upgradient wells and there is no data from downgradient of the site. also informed him about findings of black oil in monitoring well on north side of W 37th St (along 456 11th Street, spill #: 0007141), and owner of that property had claimed impact from the subject site. also informed him that as per the signed STIP, the department required quarterly groundwater monitoring and report submission until site redevelopment, but property owner failed to comply. 10/04/13-Hiralkumar Patel. received message from Mr. Ahmed (at 3:49 PM on 10/03/13). 11/06/13-Hiralkumar Patel. DEC Oliva received call from Mike Bogan, attorney representing property owner, requesting

spill closure. after discussing with DEC Austin and DEC Vought, case transferred to DEC Vought. 11/7/13-Vought-Received call from Louis Oliva who received inquiry from Mike Brogan (Esq) as to status of site. Spill transferred back to Vought due to decreased workload as well as familiarity with historical aspects of case due to complete file review. 11/13/13-Vought-Received call from and spoke to Mohammed Amhed (AKRF) who noted that sie was going under foreclosure and it was likely that the current owner would also be the developer. Vought requested all current AKRF groundwater reports (excluding the two named in e-docs) and Ahmed will return call or email to Vought with additional reports if available. Vought received email from Tennen (Ahmed) that Jeff, Tennen was only performed groundwater sampling twice, October 2011 and August 2013. However, attached please find an additional groundwater sampling report prepared by AES in May 2009 which indicated no detection in the three samples. Please let me know if you have any question. To date file review by Vought from 6/10/10 (when Vought last managed project) to present: Letter from Atria Builders (Yossi Fischler Ph:718-380-8882x16) to Vought-7/30/10. Letter notes that As per your email dated March 1, 2010 during the future development and construction by Atria Builders of hotel at the above referenced property, vapor mitigation efforts will be implemented during the construction process. This will include an engineered vapor barrier (if applicable), a sub slab depressurization system (if applicable) and a sensitive receptor survey . Letter from DEC Ketani to Fischler-9/8/11. Letter sent requiring monthly offsite groundwater sampling, gauging and product collection with submission of monthly groundwater reports. Letter also notes DEC set deadline of 10/6/11 for the beginning of soil excavation or otherwise case will be referred to OGC. Letter from DEC Ketani to Fischler-9/20/11. Letter wrote to clarify the environmental monitoring and remediation requirements . Letter notes that soil by excavation as per the RAWP dated 8/19/08 and quarterly monitoring as per the 12/28/08 FLS letter were never performed and as such DEC requires that quarterly monitoring and reporting resume to begin September 2011 and must continue till property is developed. Quarterly Groundwater Sampling Report (Tennen Environmental)-October 2011. On behalf of: 37-11 Development, LLC. 158-13 72nd Avenue Flushing, NY 11365 Three bedrock wells along 37th Street were sampled and based on results Tennen concludes that the petroleum release associated with Spill #9709152 is not impacting the groundwater beneath the sidewalk and recommends that quarterly sampling be suspended. Upon Site redevelopment, the NYSDEC approved 2008 will be implemented. Groundwater from 3-12'bg and is representative of a bedrock aquifer and while some local areas of perched water may be present, an unconsolidated groundwater aquifer is not present above the bedrock. Groundwater analyticals show no TOGS 1.1.1 Groundwater Standard exceedences. Quarterly Groundwater Sampling Report (Tennen Environmental)-August 2013. Three bedrock wells along 37th Street were sampled and based on results Tennen concludes that the petroleum release associated with Spill #9709152 is not impacting the groundwater beneath the sidewalk and recommends that the spill case be closed. If subsurface contamination is encountered during excavation activities associated with future redevelopment, a spill will be reported to NYSDEC and any necessary remediation will be conducted in consultation with NYSDEC during redevelopment activities. Groundwater analyticals show no TOGS 1.1.1 Groundwater Standard exceedences. 12/3/13-Vought-Discussed data with RSE as groundwater analyticals were non-detect since 2009 and recent

realignment of closure goals via working with DEC Central Office and RSE approved Spill Closure. Vought called and spoke to NYSOAG Berchard and they received 1.25 Million in reimbursement to Fund including fines and penalties and no outstanding final expenditures. Vought spoke to OGC Oliva and no Regional enforcement cases on site as well. Spill closed by Vought and closure letter with soil contamination clause sent to: 37-11 Development, LLC. 158-13 72nd Avenue Flushing, NY 11365 Final ISR in e-docs by DEC Patel. 1/24/17-Vought-Copied on email from OER Chawla with attached BCP Application Fact Sheet and email that 37-11 Development, LLC has applied to enroll in the City VCP. 450 11th Avenue site is located in Hell s Kitchen section of Manhattan, New York and consists of 9,875 square feet and currently consists of a vacant one-story building previously occupied by two automotive repair shops and a check cashing facility. The proposed future use of the Site will be a 41-story hotel with commercial space and a multi-level underground basement. Public comment period on 450 11th Avenue site runs through February 18, 2017. "

Remarks:

"ECO Parris notified by Jacob Javits Center President of oil puddles in the yard East of the Convention Center - Apperaed to be vacant land located directly beneath NY Auto Service. The oil is impacting the rear of the Javits Center, causing odors and seepage into facilities covention halls."

DEC Memo: "Spoke with Deborah Brown at G&C, 631-206-3700.G&C doing Phase II investigation and found elevated level of SVOCs in soil samples. Property Owner: G&R 11th Avenue Associates, LLC 60 Cutter Mill Road#303 Greatneck, NY 11021 Attn: William Bouton, 516-466-3100.(sr) 06/19/13-Hiralkumar Patel. 1:54 PM:- spoke with Debroah. she mentioned that some SVOCs found above cleanup standards. as Phase II report is not ready yet, asked her to submit lab data and boring location map for review. Deborah Brown GC Environmental Ph. (631) 206-3700 06/27/13-Hiralkumar Patel. 9:06 AM:- received limited Phase II report from Ravi from GC Env. abstract: - Phase I done in Apr. 2013 - site improved by two structures: five (5) story and seven (7) story buildings - seven (7) story building is located at 549 W 26th St, constructed circa 1911. building is occupied by NYC government offices - five (5) story building (Annex Building) is located at 547-557 W 26th St, constructed circa 1901 - ground level of Annex building is occupied by Chelsea Truck Rental - upper four floors of Annex building are connected to main building and are occupied by NYC government offices - property is located at an elevation of approx. 9 ft above mean sea level - historical Sanborn maps shows two (2) 550 gal gasoline USTs in the eastern portion of the garage of the annex building and two (2) 275 gal gasoline USTs along the eastern wall of the main building in the area of current fire sprinkler room ----- - three (3) former hydraulic lifts along the eastern wall of the Annex building - GPR survey revealed two anomalies on the southeastern portion of the garage. data collected indicate the possibility of two (2) 550 gal gasoline USTs on the southeastern portion of the garage. visual inspection revealed the presence of two (2) vent pipes in that area of the garage ----- - GPR survey revealed an anomaly on the central western portion of the garage - traced anomalies for the product lines underneath the sidewalk along the W 26th St leading towards/inside the shop area of the garage from the southwestern wall, in the area of the concrete patch for the two (2) suspected 275 gal USTs where product line anomalies colimate - visual inspection revealed the presence of three (3) former hydraulic lifts inside the garage building, out of which two former lifts were identified on the northern portion and one former lift on the southeastern portion of the garage - lift still contains oil - two concrete patches were suspected to be former hydraulic lift locations were identified on the northeastern portion of the garage building - visual inspection also revealed the presence of one (1) former oil/water separator on the southwestern portion of the garage building - oil/water separator was concrete structure with solid base - found oil, grease and water in oil/water separator - floor drians connected to oil/water separator - advanced nine soil borings (B-1 through B-9) to approx. 10 ft bg - no indication (PID/visual/olfactory) of contamination noted in any soil boring - collected nine soil samples, each from 5-10 ft interval - submitted eight samples (S-1 through S-8) for VOCs and SVOCs analyses; samples from B-1 and B-2 were combined in S-1 - geology consists of approx. 2

to 3 ft of fill, represented by dark clay, underlain by approx. 7-8 ft of brown clay material with little gravel ----- depth to groundwater at the property is 7-10 ft bg ----- groundwater samples were collected from boring B-1 and B-3, but did not analyzed as no field indication of contamination noted in soil samples ----- no VOCs found in any sample - few SVOC compounds noted in sample S-1 (composite of boring B-1 and B-2; slightly above cleanup values) and S-7 (boring B-5; max. 8,400 ppb Benzo(a)anthracene) as per cover letter of the limited Phase II report, following work is planned: - excavation in area of boring locations B-1/2 and B-5, to a depth of 8 ft to remove impacted fill material - removal of existing hydraulic lift systems and associated contamination - collection of endpoint samples from excavations for VOC/SVOC/PCB analyses 06/28/13-Hiralkumar Patel. 1:41 PM:- spoke with Ravi and asked to submit previous Phase I and GPR reports for review. also asked him to submit property owner/manager's contact information. 4:06 PM:- received call from Greg Collins from GC Env. he mentioned that as part of refinancing, bank asked for subsurface investigation due to tanks on Sanborn maps. as there was no indication of contamination noted, Bank refused to analyze groundwater samples. Greg mentioned that there is an existing monitoring well on sidewalk, possibly near former fillport for gasoline tanks. based on available information, informed Greg that groundwater sample must be collected and analyzed. 07/01/13-Hiralkumar Patel. received email from Ravi (at 6:52 PM on 06/28/13) including Phase I and GPR report. he also submitted their client's contact information. G&R 11th Avenue Associates, LLC. / Gould 11th Avenue, LLC. **property owners** c/o Majestic Property Management Corp. 60 Cutter Mill Road, Suite 303 Great Neck, NY 11021 Attn.: William Bouton **property manager** Ph. (516) 466-3100 (516) 773-2740 email: billb@majprop.com Ravi inquired about analytical methods for groundwater samples. abstract of Phase I: - report dated 07/29/05 - address: 260 11th Ave. Block 698 / Lot 1 - site consists of irregularly-shaped parcel developed with two contiguous, interconnected office buildings - main building consists of seven (7) stories, and the attached annex building consists of five (5) stories - property also consists of a concrete paved surface parking lot located on the northeastern portion - property was developed with the existing improvements in the early 1900s - property is listed as a RCRA facility. NYC HRA, a former tenant at the site, is listed as a RCRA hazardous waste generator. NYC HRA previously conducted automobile maintenance activities and generated petroleum and hazardous waste ----- - partial basement level below the main building in the northwest corner of the building consists of the boiler room, heating oil storage room and other utility meter rooms - observed groundwater seepage into the basement of the property building. discolored groundwater is appeared to be contaminated with rust and tar. source of water seepage was suspected to be a broken water main ----- - historical sanborn maps (1930 to 1996) showed presence of two 550 gal gasoline USTs within the southeastern corner of the annex building, and two 275 gal gasoline tanks along the southeastern wall of the main building - observed the presence of three vent pipes (similar to those typically attached to gasoline USTs or oil-water separators) located on the southwest corner of the annex building - no other evidence of 550 gal or 275 gal tanks was observed - observed the presence of two (2) monitoring wells along the W 26th street sidewalk - historical use of the property included

07/15/13-Hiralkumar Patel. 10:05 AM:- spoke with Debra at GCE. informed her that endpoint samples must be collected, as per DER-10, from each excavation and sample number must not be limited to five. also asked her to clarify cleanup/investigation method for oil/water separator (confirmation about no discharge into subsurface). asked her to submit revised scope of work. 12:33 PM:- received email from Greg from GC Env. including scope of work. abstract: - will collect endpoint bottom and sidewall samples, as per DER-10, from excavation area around B-1/2 - will collect endpoint bottom sample only from lift excavation area, as lifts are only approx. 1 ft in diameter and based on the size of the excavation to reach the end point, the diameter will be at least five feet - excavation in lift area will be expanded, if needed - endpoint samples will be analyzed for 8260/8270 (PAHs)/PCBs - will do a die test of the oil/water separator system - if oil/water separator system discharges to any point other than city sewer, will collect samples from the discharge point

07/18/13-Hiralkumar Patel. 11:48 AM:- sent email to Greg approving scope of work (email dated 07/15/13), pending inclusion of collection and analysis of water sample(s) if present in any excavation. asked him to submit report by the end of 08/30/13. email copied to Ravi, Debra and Mr. Bouton. 08/30/13-Hiralkumar Patel. 11:09 AM:- received email from Ravi. they collected total 14 soil samples, from different excavations. he sent samples to lab to analyze for 8260/8270/8082. Ravi inquired if any change needed in analytical methods. 12:43 PM:- sent email to Ravi approving sample analyticals methods. email copied to Greg and Debra. 09/19/13-Hiralkumar Patel. 3:08 PM:- received email from Ravi including spill closure report. area around previous borings B1/B2, B3, B5, B6 and B7 excavated to a depth of 8-8.5 ft below surface. total 14 endpoint soil samples were collected for analysis from four excavations. no contamination noted in endpoint samples. during excavation, no tanks or piping found in suspected UST area. based on available information, no further remediation needed in former tank/lift area. report is missing information about oil/water separator. 09/24/13-Hiralkumar Patel. 2:18 PM:- sent email to Ravi and inquired him about oil/water separator. email copied to Greg. 09/25/13-Hiralkumar Patel. received email from Ravi (at 4:46 PM on 09/24/13). they will schedule work with respect to oil/water separator this week and will send update. 09/27/13-Hiralkumar Patel. 10:50 AM:- received email from Ravi including result of oil/water separator investigation. they did dye test and confirmed that oil/water separator discharges into sewer system. based on available information, case closed."

Remarks:

"soil samples are elevated"

 Contact Name: JOE ENANG
 DEC Memo: "Joe Enang from MTA 917-335-2438. While doing excavation for line 7 they found soil contamination at 25 ft. MTA stopped the excavator. MTA will have a meeting tomorrow morning with DEC-Kumar. 05/20/11-Hiralkumar Patel. 9:30 AM:- visited site. met with Joe (LiRo), Akta (on-site environmental engineer), Rose-May (MTA) and Vincent (MTA). MTA is working in area under the 11th Ave. area under the 11th ave, by the Javits center, is an open unoccupied space. as per one of the construction worker, there were some rail tracks in this area in past and most recently there was an underground walkway from Jevits Center to a park across the street between the W 35th and W 36th Street. as part of #7 subway extension project, MTA has planned to construct a 14 ft wide retaining wall running north-south from W 37th Street to W 36th Street and then running east-west from west side of 11th ave to some distance along the W 36th street. the east-west line of the retaining wall will be along the north side of W 36th Street. as per Akta, after constructing the 14 ft wall, MTA will backfill the void space underneath the 11th Ave. there will a building (not MTA project) in the remaining open space underneath the 11th ave. as part of the retaining wall construction, MTA is going to

dig all soil out to bedrock in the 14 ft width area. bedrock is about 6-7 ft below the existing surface. while diggin along the west side of the building at 450-454 11th Ave (spill #: 9709125), contractor found contaminated soil and some oil on rain water collected in excavation. until now, contractor has dug about 4-5 ft wide area along the southern half portion of buiding at 450 11th ave. some minor odors detected in the excavation area. found sheen and minor product on rain water accumulated in excavation. contaminated soil has been stockpiled on plastic and was covered with plastic. observed bedrock along the foundation wall of building 450 11th ave, in the northern portion. as no active leak found from bedrock in northern portion or foundation wall in southern portion, asked MTA to pump out contaminated water. MTA will continue excavating soil for retaining wall project and will call for re-inspection (probably next week) once all soil removed along the building foundation wall. the area where oil found will be backfilled and will not be occupied in future. Rose-May Toussaint-Portes MTACC/NYCT Sustainability and Environmental Management Ph. (646) 252-3291 email: rose-may.toussaint-portes@nyct.com Vincent Mutarelli MTACC Ph. (646) 210-4963 Akta Patel Assistant Project Engineer Distinct Engineering Solutions, Inc. Ph. (732) 658-1052 (201) 349-2658 (C) Fax (732) 398-1699 email: apatel@distinct-esi.com Joe Enang LiRo Ph. (917) 335-2438 currently, the site 450 11th ave has following businesses: Check Cashing in the northern portion and 11th Ave Auto Repair and Body Shop (212-643-6770)in the southern portion. based on location of oil seepage, changed site address, in spill report, from '11th Ave and 36th Street' to 'underneath 450-454 11th Ave'.
05/25/11-Hiralkumar Patel. 1:59 PM:- spoke with Akta. they haven't done further excavation as wanted to see lab results of soil and water samples collected before. she got parital data and found some contamination. she will send lab results once complete data is available. today they are pumping water into drums for later disposal. 06/06/11-Hiralkumar Patel. received email from Rose-May including results of soil and water samples collected. VOCs were not present in any of the soil samples. the excavated soil is non-hazardous and has low level of metal contamination. water samples detected the presence of some SVOCs and metal contamination. contractor will continue excavation needed for the project. 10:39 AM:- sent email to Rose-May and asked to send complete lab package for soil and water sample results. also asked for update regarding soil excavation. 1:38 PM:- received email from Rose-May including lab package. she mentioned that no further excavation in the area yet. 06/16/11-Hiralkumar Patel. 12:56 PM:- sent email to Rose-May inquiring update regarding further excavation. 06/20/11-Hiralkumar Patel. 12:54 PM:- received email from Rose-May. no further excavation happened yet. 07/19/11-Hiralkumar Patel. 2:22 PM:- spoke with Akta. she mentioned that as there is no NYC DOT permit issued, no excavation done in area. she confirmed that there are no odors in area. after discussing with DEC Austin, as no contamination found in soil/water samples and as no odors in area, case closed."
Remarks: "Unknown petroleum was found in the soil 25 underground during excavation of a tunnel. Contracted clean used absorbent pads."

 Contact Name: STUART KNOOP
 DEC Memo: "03/10/17 - The data do not support the claim of a spill. The spill was closed. 3/1/17-Zhune spoke to Stuart Knoop from Langan Engineering 212-479-5461. Stuart said the site is own by Tishman Steyer. They did a phase II investigation. The found impacted soil. odors and elevated PIDs readings. The soil and groundwater analytical result of one sample indicated VOCs above the CP-51 standards. they apply for an amendment to include the site in the BCP program. They will develop a commercial building at the site. They are going to do remediation during construction. Steven Latargia Tishman Steyer 45 Rockefeller Plaza NewYork, NY 1011"
 Remarks: "cleanup pending"

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill case was reassigned from DEC (Sigona) to Rommel on 01/07/2004. On December 22, 2000, DEC (Sigona) observed the excavation and removal of 4 x 550 gallon USTs. The contents of 3 x 550 gallon USTs was found to contain a mixture of gasoline and water. 1 x 550 gallon UST contained water only. The excavation was being performed by Fenely & Nicol for Public Parking, Inc. The project was also supervised by DEC contractor EAR under PIN project for New York Auto Service which was impacting the Jacob Javits Center. Does not appear to be related to New York Auto Service spill or have an impact on the Javits Center. 2/24/05-Vought-Spoke with Phillip Rizzuto (973-470-25510) who is agent for property owners. Rizzuto asked for status of Tank Closure Report review and Vought required that a copy be sent to DEC for review. Spill transferred from Rommel to Vought. 3/16/05-Vought-Reviewed Tank Closure Report(Fenley & Nicol - Angel Ramirez) dated 1/18/01 and received on 3/2/05. Project was prepared for: Mr. Phil Rizzuto Classic Sanitation Corporation 99 Route 3 Clifton, NJ 07014 Removal and closure of one (275-gallon) fuel oil AST and four (550-gallon) gasoline USTs. Subject site is used as a public parking garage. Three (550-gallon) gasoline USTs were removed from the north-east front of the interior of the building(Tank Area 1) and one (550-gallon) gasoline UST was removed from southwest of Tank Area 1. Depth to groundwater at site estimated to be 20 feet below grade and flow to the west. Inspector Anthony Sigona of the NYSDEC was present at the time of the excavation to inspect the tanks and excavated area . The bottom and sidewalls of the excavation consisted of Manhattan Schist and bedrockit was discovered that soil above the tanks exhibited evidence of gasoline contamination . All product lines were removed and disposed. Soil were analyzed for 8260/8270 TCLP as per Sigona. Soil analyticals only showed on minor exceedence of naphthalene at 11ug/L (Guidance value is 10ug/L). No PID readings were detected. Report recommends No Further Action. Spill closed by Vought due to one minor TAGM 4046 Soil Cleanup Objective exceedence."

Remarks: "DURING TANK REMOVAL SOIL CONTAMINATION HAS BEEN DISCOVERED. CONTAMINATION IS ON TOP OF TANKS. AREA TO BE EXCAVATED AND FURTHER SAMPLING/TESTING TO BE DONE. NO CALL BACK REQUESTED. CALLER HAS BEEN IN CONTACT WITH REGION 2 OFFICE."

DEC Memo: "5/3/2002-VOUGHT-See spill #9704661, #9200058, #9506257 at same location. DO NOT CLOSE THIS SPILL UNTIL THE ABOVE REFERENCED SPILLS ARE ADDRESSED. 11/18/03 Transferred from Vought to Foley. File review (KMF) Depth to groundwater 5-10 ft bgs. Depth to bedrock approx 1.5-8.5 ft bgs. Most likely impacted. Delta submitted Monitoring Well Abandonment Report on 7/3/03. MW-2 through MW-5 were abandoned because of unknown construction, the well did not exhibit significant impacts, the well no longer served a productive purpose in the monitoring network, and/or the well presented a risk of cross contaminating deeper strata. MW-1, MW-6 and MW-7 remain in place. Delta submitted First Quarter 2003 Monitoring Report on 10/1/03. LNAPL present in MW-7 since April 2002. BTEX concentrations fluctuating but above GWQS, except for MW-5. MTBE concentrations are consistently above GWQS. Max conc of total BTEX 3680ug/L (MW-4) Max conc of MTBE 34200ug/L (MW-2) 12/15/03 2Q2003 monitoring report received. Sampling event from 5/9/03 showed 0.42' of LNAPL in MW-7 and high BTEX and MTBE in other wells. MW-2, MW-3, MW-4 and MW-5 have been adandoned since. 5/7/04 Portfolio meeting: shallow bedrock, DTW 4-9'bgs. Diesel/#2 fuel oil detected in MW-1. Bedrock fracture

analysis shows possible source as adj. commercial property. Need to investigate further. Will continue monitoring. Need to collect sample from MW-7(new well). Upgrade to be done this year as part of spill prevention initiative. 7/8/04 Received 3Q03 & 4Q03 monitoring reports. 0.41 ft(3Q03) and 0.04ft(4Q03) of product in MW-7. 7/27/04 Stipulation due 8/17/04. 8/17/04 1Q04 monitoring report received. Shallow bedrock. Three wells on site. BTEX from 69ppb(MW-6) to 1152ppb(MW-1). MTBE from 38000ppb(MW-6) to 117000ppb(MW-1). 0.07' LNAPL in MW-7. 2Q04 monitoring report received. BTEX from 110ppb(MW-6) to 648ppb(MW-1). MTBE from 2190ppb to 58700ppb. 8/19/04 Stip signed and returned. 8/23/04 Stip fully executed by T. Kunkel.

----- 10/26/04 Investigation summary report received.
Historic Investigations: 7/1/91 Amoco Oil activated a lease agreement with Spartan, the current property owner. Spartan conducted a baseline gw quality assessment, the results which detected dissolved product in gw. 11/20/01 Delta, as part of an assessment to support lease termination, advanced four soil borings (SB-1 thru SB-4) by Geoprobe. They were advanced around the tank mat and pump islands to refusal between 1-3'bgs. Four existing wells were identified and samples were taken from MW-1 and MW-2 on 11/20/01 (MW-3 & MW-4 were obstructed). Total BTEX from 35ppb(MW-1) to 2124ppb(MW-2). MTBE was detected at 129000ppb in MW-2 and 130000ppb in MW-1. 4/3/02 Three additional wells (MW-5,6,7) were advanced at previously installed boring locations SB-1, 2, and 3. Bedrock was encountered between 1.5 and 3.5 ft bgs and GW in bedrock fractures between 8 and 11'bgs in MW-6 and MW-7. Bedrock GW not encountered in MW-5. The MWs were advanced thru bedrock to depths between 16-26'bgs. Also cleared obstructions in MW-3 and MW-4. BTEX ranged from 50ppb(MW-3) to 4383ppb(MW-4). MTBE from 49ppb(MW-3) to 40700ppb(MW-2). Trace LNAPL was detected in MW-7 and was sampled. Results identified it as highly weathered regular grade gasoline that does not contain MTBE. 12/10/02 Geophysical survey conducted. Identified competent bedrock between 1 and 8'bgs. 6/12/03-6/24/03 Rehabilitated MW-1, MW-6 and MW-7 for use in fracture survey. Abandoned MW-2, MW-3, MW-4 (unknown construction) and MW-5. All were uncased and had potential of contaminating the bedrock GW. 7/2/03 Fracture survey conducted. Possible path from south pump island to MW-1 identified. 2/4/04 0.02' LNAPL observed in MW-1. Identified as 90% weathered/highly degraded diesel/fuel oil distillate and 10% weathered/degraded premium gasoline. 4/15/04 Installed sorbant socks in MW-1 and MW-7. The lease may be terminated prior to its scheduled end during December 2006. At the time of the lease termination, BP will remove all USTs and related piping. If it is to be razed within the timeframe noted in the CAP, Delta intends to address the overburden impacts via excavation. If the site will not be razed within the noted timeframe, Delta will develop an interim remedial plan to effectively address the overburden site impacts until excavation can occur. Quarterly GW monitoring to continue concurrently.

----- 11/12/04 3Q04 monitoring report. Three wells on site. 0.32' free product in MW-7. BTEX ranged from 226ppb(MW-6) to 6095ppb(MW-7). MTBE from 20900ppb(MW-7) to 36100ppb(MW-1). 2/17/05 4Q04 monitoring report. BTEX ranged from 177ppb(MW-1) to 2876ppb(MW-7). MTBE from 7980ppb(MW-7) to 38200ppb(MW-1). DTW 7-10'bgs. 4/27/05 Portfolio meeting- No source identified, assumed to be tanks. Subsurface impacts in the capillary fringe, vadose and

BP AMOCO STATION #11248 (Continued)

S106003274

saturated zones in the NE part of the site. Hydrophobic socks installed in MW-1, MW-7 to address LNAPL and subsequently removed to evaluate recharge. LNAPL not present currently. Vapor evaluation done in 10/04 for adjacent property. MPE well in area of bedrock depression(MW-8) installed 4/05. Pilot test tomorrow. Reinvestigate vapor recovery system as potential source of vapor complaints during fuel delivery. To be demolished in 18 months. RAP by 6/15/05. 7/1/05 Received pilot test report for portable multi-phase extraction(MPE). Pilot performed on MW-8 on 4/28 and 4/29/05. DTW at 6.26' bgs. The stinger was set at 8' bgs (1.5' below the watertable.) The test was run at 25%, 50%, 75% and 100% vacuum levels while monitoring response levels. No influence was recorded at neighboring wells but vapors were recovered with decent recovery rates. Delta proposes extraction by a portable MPE unit. 7/8/05 Received RAP for portable MPE unit. Pilot test removed hydrocarbons from capillary fringe and unsaturated zone, but due to a lack of overburden groundwater, removal from the saturated zone was not achieved. Propose to use twice a month and reevaluate after two months. 7/27/05 1Q05-DTW 6.51-9.25' bgs. Total BTEX from 313ppb(MW-6) to 806ppb(MW-7). MTBE from 990ppb(MW-7) to 16900ppb(MW-6). 8/1/05 2Q05-DTW 6.60-9.38' bgs. Total BTEX from 104ppb(MW-1) to 350ppb(MW-6). MTBE from 929ppb(MW-7) to 9810ppb(MW-6). 8/24/05 Conditionally approved RAP to be implemented by 12/24/05. Six-month evaluation(6/06) of MPE to include proposal to address saturated zone contamination. To include contaminant mass estimation. It is unclear if recovery well, MW-8, will be sufficient to address entire impacted area. 11/8/05: Reviewed quarterly monitoring report dated November 3, 2005. Only three of four MW's were sampled on September 15, 2005 because MW8 was dry and MW's 2,3,4 and 5 were abandoned because they could not be converted into cased, open-borehole bedrock wells. No free product present. Groundwater flow beneath the site is dictated by the bedrock fracture pattern. Max BTEX is 2,774 ppb (MW-7) and max MTBE is 14,200 ppb (MW6). Only monitoring occurred this quarter (no remedial action). There was a large increase in MW7 BTEX and MTBE concentrations, as well as MW 1 and MW6 MTBE concentrations. A tightness test should be conducted on existing tanks. 12/20/05 Received Subsurface Hydrocarbon Assessment report dated 12/6/05 which documents installation of MW-8 on 4/4/05. Soil sample collected from 5-8.5' bgs. Too many cobbles in split spoon to submit sample. Completed to 8.5' bgs within overburden, not bedrock like MW-1,6,7. DTW was 7.3' bgs at installation. GW sample collected 5/20/05, total BTEX 181ppb and MTBE 2340ppb. 12/21/05 Received copy of Notice of No Objection from Darryl Cabbagestalk, NYCDEP, addressed to L. Osorio, Manhattan Borough Commissioner for NYCDOB. High Point Engineering sent in plans to demolish the existing structures and remove the USTs, piping and contaminated soil. They are not planning to change use to residential. The property has been designated with a Hazardous Materials and Noise E as part of the Hudson Yards Rezoning action. 2/1/06 Spoke to Julie, Galli Engineering, representing prospective purchaser who will be constructing a residential high rise. Planning to blast out bedrock down to 20' bgs. Based on current data, not expecting to dewater but after blasting will possibly need to dewater. Will submit construction details, to include vapor barrier. Also to submit a remedial action plan, which will include contingency plans. May propose a surface application such as ORC and effectiveness monitoring depending on water infiltration. 3/3/06 4Q05- 3 of 4 wells sampled on 11/16/05. DTW 6.75-9.61' bgs, in bedrock. 0.02' LNAPL detected in MW-1. BTEX from 21ppb(MW-8) to

Map ID

BP AMOCO STATION #11248 (Continued)

S106003274

1872ppb(MW-7). MTBE from 129ppb(MW-8) to 5550ppb(MW-6). 3/16/06 Met with BP and Delta. Source removal to be conducted 4/06. Remediation contract starts after demolition contract. 3/21/06 Conference call with Nick Onufrak, BP, and Paul Meyer, Delta, to discuss future of site. Delta will do EFR events to try and recover product from wells prior to doing source removal down to bedrock. Recommended they coordinate with buyer. Bottom of slab is going to be at 30' bgs. Tanks already pulled. 3 bedrock wells to be destroyed during construction. Possibly to install slotted piping for subslab depressurization. 4/11/06 Update from P. Meyer, Delta. Delta has completed seven 8-hour days of bedrock groundwater remediation at the site. The work was completed using a mobile Multi-Phase Extraction system to remove LNAPL, groundwater, and soil vapors from the underlying bedrock. It appears that the residual amount of LNAPL (0.02 ft) that was noted in MW-1 during the fourth quarter of 2005 has been successfully remediated. No LNAPL was observed subsequent to Delta's remediation work. Delta collected ground water samples from monitoring wells MW-1 and MW-7 following conclusion of the bedrock remediation activities. Laboratory analytical results indicate stable or reduced concentrations of BTEX and MTBE for both monitoring wells with the exception of MW-1 which showed an increase in the xylenes concentration. 4/17/06 MPE O&M report received for Oct & Nov 2005. 1lb BTEX, 0.15lbs MTBE, and 61lbs TPH have been recovered. 4/25/06 Conference call with N. Onufrak, BP, and P. Meyer, Delta. Paul will submit groundwater results. Construction is to start next week. No additional groundwater sampling is proposed due to construction. All source soils are to be removed. Expecting to have report submitted by 6/1/06. 4/26/06 Sent email to P. Meyer, Delta. VOCs remain elevated. Petition for closure is denied. If excavation is to be the groundwater remedy, then it must be demonstrated that the contaminant concentrations will decrease to standards through degradation/retardation/dispersion in a reasonable timeframe. 5/11/06 Spoke to Nick Onufrak, BP. Nine abandoned 550s were uncovered and expect three more. Will register and close out properly. There has been some water accumulation on bedrock at some elevations and they have been pumping it out. Sometimes groundwater has a sheen. He also said that Delta would be looking for locations to install wells to show a reduction in concentrations. Expect to be on site for next two weeks. They are developing a plan for groundwater monitoring. P. Meyer, Delta, anticipates demonstration of contaminant reduction in the ground water through comparison of the present site conditions with modeled results of expected contaminant levels following removal of the source. During the source removal activities they are collecting sidewall samples for closure purposes as well as samples of the excavated material (i.e. the overburden soil that is being removed from the site) for modeling purposes. Soil removal work commenced on Monday May 1st and is anticipated to be completed by Friday May 19th. 6/8/2006 - Feng - project reassigned to RJFeng. (RJF) 8/11/2006 - Feng - Spill Site Inactivation Report, June 29, 2006, by Delta Environmental. The bedrock is extended from 1' to 2' bg at the south and southwest and 10' to 13' bg at the north and northeast. On May 2006, Delta removed 16 USTs, all the soil overburden and weathered bedrock off site. Before the removal activities, Delta did an 8 hours per day, 7 days EFR on a bedrock well, W-1 which has been detected free product (0.02') and W-7. The last groundwater sampling results (4/3/2006) show that W-1 has found 2,174 ppb BTEX and 9,830 ppb MTBE, and W-7 has found 141 ppb BTEX and

BP AMOCO STATION #11248 (Continued)

S106003274

411 ppb MTBE. Since Delta was not able to collect groundwater sample due to the wells abandonment, Delta did a contaminant fate and transport model using WinFlow/WinTran software. The result from the model indicated that there will be no BTEX or MTBE concentration in groundwater after 187 days. Delta requested to close the spill. Emailed to Joe Haas (Region 1) for comments on the application of WinFlow/WinTran on bedrock site like this. In his reply, he stated Based upon the limiting assumptions in associated with WinFlow, any WinFlow / WinTran application to flow and chemical transport in fractured rock is immediately suspect and likely inappropriate. Discussed with Joe Sun and A. Obligado about the site closure. The closure is denied due to the continued presence of elevated level of groundwater contamination. The WinFlow/WinTran model is not appropriate to apply in the bedrock situation. As BP and Delta mentioned in the meeting of 7/20/2006, the new developer will blast the bedrock down to 20 feet below grade and dewatering process would be needed at that time is expected. So DEC requires the following items: 1) Monthly influent groundwater samples from the dewatering system. 2) Installation of water-proofing vapor barrier. The DEC will re-consider closure after completed vapor barrier installation and based on dewatering system data. In case groundwater contamination remains, additional remediation might be required. Emailed Nick Onufrak (BP) about DEC's requirement and asked for a pre-construction meeting with BP and the new developer. (RJF) 9/22/2006 - Feng - Quarterly Monitoring Report, 1Q2006, 7/27/2006, by Delta. Groundwater sampling and gauging on 1/4/2006. Groundwater depth at 6.15' to 9'. MW-1, 0.02 feet of free product. MW-6, 217 ppb BTEX, 5,290 ppb MTBE. MW-7, 394 ppb BTEX, 328 ppb MTBE. MW-8, 5.8 ppb BTEX, 1.4 ppb MTBE. (RJF) 9/29/2006 - Feng - Portfolio meeting with BP and Delta. Construction on hold. The new owner couldn't get the loan from the bank due to open spill. Delta provided 2 options. Option 1, provide some data or drill some bedrock well (may not be the same fracture as previous). Option 2, close the spill based on the current data and re-open spill if contamination encountered during the construction. DEC will discuss internally about this matter. (RJF) 11/7/2006 - Feng - Updates from Nick Onufrak (BP). Delta will try to install 3 wells and will collect groundwater samples. And will put all the new data into the closure petition report. (RJF) 1/22/2007 - Feng - Letter from Delta serves as Post Remedial Subsurface Hydrocarbon Assessment Report, dated 1/17/2007. On December 1 and 4, 2006, Delta has installed 3 new bedrock wells. DTW 14.05' at MW-1A, 42.54' at MW-6A, 10.22' at MW-7A. Groundwater samples collected from these 3 wells. MW-1A, 143 ppb BTEX, 1,710 ppb MTBE. MW-6A, 244 ppb BTEX, 9,480 ppb MTBE. MW-7A, 1,947 ppb BTEX, 358 ppb MTBE. Delta will continue to sample the wells on a quarterly schedule and will re-evaluate site conditions and the remedial alternatives. 4/19/2007 - Feng - Portfolio meeting with BP and Delta. RAP for Fenton or persulfate injection might be proposed. Pre-injection data, and post injection data will be collected. Injection plan will be submitted. BP is still willing to comply with the items set forth in the previous BP's letter. (RJF) 8/15/2007 - Feng - 4Q2006, 7/2/007. Groundwater sampled 12/13/2006. All 3 monitoring wells were sampled. DTW 10.22' to 42.54' bg. No LNAPI. MW-1A, 143 ppb BTEX, 1,710 ppb MTBE. MW-6A, 244 ppb BTEX, 9,480 ppb MTBE. MW-7A, 1,947 ppb BTEX, 358 ppb MTBE. (RJF) 8/14/2007 - Feng - 1Q2007, 7/10/2007. Groundwater sampled 2/22/2007. All 3 monitoring wells were sampled. DTW 10.31' to 14.26' bg. No LNAPL. MW-1A, 106 ppb BTEX, 1,680 ppb MTBE. MW-6A, 189 ppb BTEX,

BP AMOCO STATION #11248 (Continued)

S106003274

11,200 ppb MTBE. MW-7A, 2,432 ppb BTEX, 18.7 ppb MTBE. (RJF) 10/10/2007 - Feng - Portfolio meeting with BP and Delta. The site is currently vacant. The developer planning to build 28-story hotel with 2-story basement. Removing bedrock down to 30 feet is in the plan. In the future, BP and Delta will coordinate with the new owner during the development to: 1) provide for disposal of impacted bedrock in any, 2) provide for treatment of groundwater removed during the dewatering process as needed, 3) provide for installation of vapor barrier under and around the building foundation. And prepare the closure report for completion of the subsurface remediation work. (RJF) 1/15/2008 - Feng - Email to E. Larson (BP) and Delta on the requirement of RAP for the site. (RJF) 1/31/2008 - Feng - Email from E. Larson and requested to close out the onsite monitoring wells, MW-1A, 6A and 7A. 2/11/2008 - Feng - Approved the closure of onsite monitoring wells MW-1A, 6A and 7A since BP has done the baseline groundwater sampling on 12/18/2007. Email from E. Larson, the closure of the monitoring wells will no later than 2/22/2008. 2/27/2008 - Feng - Reviewed the Remedial Action Plan Addendum, dated 2/7/2008, prepared by Delta. The new building will consist with 2-story basement, and foundation excavation depth will be extended down to 25 feet bg. The excavated bedrock/soil will be disposed off site. A dewatering plan will be implemented and regular influent and effluent groundwater will be sampled for NYCDEP permit. BP will arrange onsite groundwater treatment and daily sampling if the effluent exceed NYCDEP's limit. At the conclusion of dewatering, an additional groundwater will be collected and sampled. If the contaminants level exceeded DEC standard, remediation/investigation will be arranged. 3/7/2008 - Feng - Letter is received via email from M. Ahmed (Fleming-Lee Shue). 3/17/2008 - Feng - Email is received from M. Ahmed (Fleming-Lee Shue). 3/19/2008 - Feng - Approval letter to BP and cc to Delta and Fleming-Lee Shue. (RJF) 3/20/2008 - Feng - eDoc Quarterly Monitoring Report 3Q2007 and 4Q2007. (RJF) 5/20/2008 - Feng - Reviewed RAP dated 4/25/2008. The site owner s development schedule is unclear at this time and the March 19, 2008 approved RAP Addendum will not be implemented at this time. It is, however, BP s desire to continue its remedial effort in bringing the spill number toward closure and therefore this RAP is proposed. The RAP details the proposed work to re-install three onsite bedrock monitoring wells and to continue implement quarterly monitoring well sampling program. As per the conversation between you and the Department staff, the scheduled investigation/remediation work are: - Monitoring wells installation will be completed by June 2008 - Monitoring wells sampling will be completed by July 2008 - First quarter of monitoring wells sampling will be completed by October 2008 - Second quarter of monitoring wells sampling will be completed by January 2009 - Evaluating the collected groundwater data and discussing the appropriate remedy by March 2009 (the RAP proposed MNA, but we will discuss whether MNA is effective or not) Approval letter to BP and cc to Delta. (RJF) 6/26/2008 - 3Q2007, 2/25/2008. Vacant undeveloped lot. The monitoring well network was gauged and sampled on 9/20/2007. 3 monitoring wells. DTW 10.01' to 11.84' bg. Flows in bedrock, not determined. NO LNAPL. BTEX range 10.7 ppb (MW-1A) to 959 ppb (MW-7A). MTBE range 219 ppb (MW-7A) to 4,630 ppb (MW-6A). 4Q2007, 2/27/2008. Vacant undeveloped lot. the monitoring well network was gauged and sampled 12/18/2007. 3 monitoring wells. DTW 9.76' to 11.29' bg. NO LNAPL. BTEX range 6.3 ppb to 684 ppb (MW-7A). MTBE range 107 (MW-7A) to 4,350 ppb (MW-6A). (RJF) 10/28/2008 - 3Q2008, 9/5/2008, by

EnviroTrac. Currently a vacant lot. The monitoring well network was gauged and sampled on 7/2/2008. MW-1B, MW-6B and MW-7B were installed on 6/17 and 6/18/2008. Boring logs are attached. 3 wells were gauged. No LNAPL. DTW 9.08' to 43.15' bg. 3 wells were sampled. Max benzene 53 ug/L (MW-6B). Max BTEX 550.7 ug/L (MW-7B). Max MTBE 2,300 ug/L (MW-6B). (RJF) 3/4/2009 - 4Q2008, 1/5/2009, by EnviroTrac. Currently a vacant lot. The monitoring well network was gauged and sampled 10/13/2008. 3 wells were gauged. NO LNAPL. DTW 9.50' to 13.52' bg. Flows in bedrock. 3 wells were sampled. Max benzene 33 ug/L (MW-6B). Max BTEX 79.2 ug/L (MW-7B). Max MTBE 980 ug/L (MW-6B). (RJF) 6/8/2010 - 4Q2009, 1/8/2010, by EnviroTrac. Currently a vacant lot. The monitoring well network was gauged and sampled on 11/2/2009. 3 wells were gauged. NO LNAPL. DTW 8.62 - 11.46' bg. Unknown flow (bedrock wells). 3 wells were sampled. Max benzene 27 ug/L (MW-6B). Max BTEX 122.5 ug/L (MW-7B). Max MTBE 1,100 ug/L (MW-6B). 1Q2010, 4/2/2010, by EnviroTrac. The monitoring well network was gauged and sampled on 1/24/2010. 3 wells were gauged. NO LNAPL. DTW 9.09 - 14.83' bg. unknown flow. 3 wells were sampled. Max benzene 12 ug/L (MW-6B). Max BTEX 53.7 ug/L (MW-7B). Max MTBE 740 ug/L (MW-6B). 7/27/2010 - 2Q2010, 6/17/2010, by Delta. NO LNAPL. 3 wells. Max BTEX 24.3 ug/L (MW-7B). Max MTBE 730 ug/L (MW-6B). 8/6/10 Spill case temporarily transferred from June Feng to J.A. Maisonave. - JAM 11/10/10: Spill case temporarily transferred from J. Maisonave to J. Kolleeny. - JK 4/11/2011 - Spill transferred back to JFeng. 6/17/2011 - email to Chris Meyer of Antea Group Chris, We had some discussion about this site and we need some more information. Do you have the information on how the sampling was actually done, such as depth to water, how much water was purged, final water depth, and how did you sample? 7/5/2011 - received 2Q2011. eDoc. Reviewed the report. The groundwater samples were collected on April 22, 2011. 3 wells were sampled. Max BTEX 31.7 ug/L (MW-6B). Max MTBE 510 ug/L (MW-6B). JF 11/3/2011 - 3Q2011, 9/27/2011, by Antea Group. The groundwater samples were collected on July 8, 2011. 3 wells were sampled. MW-1B, 3.9 ug/L BTEX, 300 ug/L MTBE. MW-6B, 8.51 ug/L BTEX, 560 ug/L MTBE. MW-7B, 59.2 ug/L BTEX, 45 ug/L MTBE. 1/6/12 - Raphael Ketani. I spoke to Chris Meyer of Antea Group (800) 477-7411. He said that a closure report was written for the site and sent to the DEC in October 2011. I told him that we had not seen it. Mr. Meyer said that he will re-send it. I told him to send it to me and I will review it. 1/11/2012 - 4Q2011, 12/29/2011, by Antea Group. Groundwater samples were collected on 10/28/2011. 3 wells. MW-1B, 13.8 ug/L BTEX, 1,200 ug/L MTBE. MW-6B, 16.1 ug/L BTEX, 570 ug/L MTBE. MW-7B, 60.2 ug/L BTEX, 26 ug/L MTBE. 2/8/12 - Raphael Ketani. Nick Onufrak of BP (410) 825-8213/cell (443) 838-7143 called me today to discuss the case. Bedrock is anywhere from at the surface to 15 feet below grade. Marriott will build a hotel on the site with a parking garage 30 feet below grade. He added that sometimes the wells are dry and sometimes the water is at 7 feet below grade. He will send me the 2011 closure report for my review. 2/8/12 - Raphael Ketani. Mr. Onufrak sent the Delta 12/31/09 Remedial Action Completion Report (RACR), the Delta 11/15/10 Follow Up and Mobile Multi-Phase Extraction Event Report (MMPEE) and the Antea Group 9/27/11 Third Quarter 2011 Monitoring Report (GWMR). I reviewed all three reports. The RACR described the remaining soil contamination that was present after the tanks had been pulled and most of the soil contamination had been removed. PBS case #2-272523 indicates that 16 tanks were removed. The end point results were very high along the northern border of the property with

BP AMOCO STATION #11248 (Continued)

S106003274

the five story brick building. However, there was a note on the map that these results were from before this soil was removed down to bedrock. There were high hits in the endpoint samples (5/1-19/06) from SW-4 (2.5') and SW-8 (11.5'), but these were at the western sidewalk. The MMPEE report stated that 525 gallons of total liquids had been extracted from the 3 wells. The GWMR contained data from the 7/8/11 sampling round for wells MW-1B, MW-6B and MW-7B. The majority of the analytical results were non-detect to 40 ppb of total xylenes. However, MW-1B had 300 ppb of MTBE, MW-6B had 560 ppb of MTBE and MW-7B had 45 ppb of MTBE. I determined that the 7/8/11 groundwater results were not a significant issue. Though Mr. Onufrak had sent me the 2011 closure report, I could not close the spill case. Certain pieces of documentation were missing. These were an architectural plan depicting the subterranean garage, its total depth, and the inclusion of a vapor barrier. Also, the developer needed to submit a statement in a letter indicating how much more excavation will take place, whether the soil under the sidewalk will be removed, and if not removed, what they will do about any contamination under there. 5/1/2012 - 1Q2012, 3/28/2012, by Antea Group. Groundwater sampled on 1/11/2012. MW-1B, 110 ug/L MTBE. MW-6B, 1.7 ug/L benzene, 610 ug/L MTBE. MW-7B, 1.6 benzene, 15 ethylbenzene, 80 xylenes, 25 ug/L MTBE. The next sampling will be in April 2012. Attached with the Mobile Multi-Phase Extraction Event report dated 11/15/2010 with the Remedial Action Completion Report dated 12/31/2009. Antea requests spill closure. DEC Hassan Hussein, Raphael Ketani and June Feng spoke to Mohamed Ahmed who is the consultant for the developer. He stated that they are the developer's consultant who is responsible for meeting the OER's e-designated requirement for the site. They will be overseeing whatever work that BP will be doing onsite. 5/2/2012 - email Chris Meyer for the clarification on what BP will be doing in addressing the soil (i.e. as shown in the endpoint samples SW-4 and SW-8 located at the 10th Ave and 34th Street sidewalk) and the groundwater issues (i.e. BTEX and MTBE in the monitoring wells that installed into bedrock). DEC Raphael Ketani spoke to Chris Meyer. DEC required BP to remove the soil hot spots in the sidewalk, remediate the groundwater. And restating the requirement for building plan depicting the subterranean garage, its total depth, and the inclusion of a vapor barrier. And if they could not feasibly fulfill our requirements, they need to have a statement letter stating why they can't do it. Mr. Meyer understand our requirements. 8/27/2012 - 2Q2012, 6/29/2012, by Antea Group. The groundwater was sampled 4/16/2012. The next sampling will be in 7/2012. MW-1B, BTEX ND, <0.5 MTBE. MW-6B, 27.5 BTEX, 570 MTBE. MW-7B, 93.8 BTEX, 33 MTBE. 3/29/2013 - 4Q2012, 12/27/2012, by Antea Group. The groundwater was sampled on 10/11/2012. the next sampling will be in 1/2013. MW-1B, 8.81 BTEX, 460 MTBE. MW-6B, BTEX ND, 470 MTBE. MW-7B, 42.4 BTEX, 28 MTBE. Observed increase or fluctuation of MTBE. 4/11/2013 - review 1Q2013. MW-1B, BTEX ND. 13 MTBE. MW-6B, 46.8 BTEX, 430 MTBE. MW-7B, 12 BTEX, 12 MTBE. Antea continues to conduct quarter monitoring and the previously requested monthly vacuum extraction events on the 3 bedrock wells. In the mean time, Antea Group requests to consider their previous submitted request for closure. 4/17/2013 - Present the spill closure to Jeff Vought. Spill closure based on: 1) Source removal: Tanks excavation in 2006 and removed soil down to bedrock. The weathered bedrock was removed and the bedrock was power washed. 2) 2 out of 12 soil samples collected from the excavation show exceedances. These are SW-8 (11.5') and SW-4 (2.5') along sidewalk of

10th Ave and 34th Street which makes the remediation of the soil reached the extent of feasible. 3) Groundwater concentration is low. Groundwater is in bedrock. Remediation of the groundwater is reached to the extent of feasible. 4) No development has been happened in the last few years. At this time, there is no development plan has been submitted to DEC. Noted in the Spill Closure Letter As a precaution, we must bring your attention to our concerns for the future use of this site. If subsurface contamination is encountered while excavating for any construction activity, appropriate remedial and vapor mitigation efforts must be taken to fully prevent vapor intrusion into any site development and to ensure human health and safety. This spill closure does not exempt the Responsible Parties from compliance with any applicable laws and regulations. 4/19/2013 - Spill closure letter sent to BP, Antea Group and the owner/developer, 34-10 Development, LLC and ATRIA Builders, LLC. 5/23/2013 - received Well Abandonment Letter, dated 5/22/2013, by Antea Group. "

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "leak was as a result of a crack on the tank top. DSNY knew about this before long ago but failed to notify DEC. (Moses Ajoku) 5/19/16 - Austin - Spill assigned from PBS (Moses Ajoku) to Spills (Kumar Patel) for follow up on this spill event, to determine if it can be closed out - end 06/07/16-Hiralkumar Patel. discussed with DEC Moses. he mentioned that during PBS inspection, he noted petroleum product in a tank sump for the 1,000 gal waste oil UST (tank # 006). as per one of the employee, there is a crack on top of the tank which is causing spill. PBS #: 2-605738. as per PBS record, the site has following tanks: - two (2) 1,000 gal motor oil USTs, in-service, installed in Aug. 1994 - one (1) 1,000 gal hydraulic oil UST, in-service, installed in Aug. 1994 - one (1) 1,000 gal transmission fluid UST, in-service, installed in Aug. 1994 - three (3) 1,000 gal waste oil USTs, in-service, installed in Aug. 1994 3:19 PM:- spoke with Mr. Nae, building engineer. he mentioned that oil found in tank sump must have spilled from connecting hose during transfer of waste oil by disposal company. he mentioned that the sump was cleaned up and building plumber has tested tank to confirm no leak from the tank. asked Mr. Nae to submit letter report including cause of release, summary of cleanup activities and copy of tank test result. loan Nae NYC Department of Sanitation Ph. (212) 807-6861 email: inae@dsny.nyc.gov 3:36 PM:- sent email to Mr. Nae and asked to submit report including cause of release, summary of cleanup activities and copy of tank test result. 06/08/16-Hiralkumar Patel. 8:29 AM:- received email from Dave Almodovar from DSNY including cause of release, cleanup activities, site pics and result of tank test. he mentioned that oil spilled from a hose that was stored inside the water oil tank that the contractor used when removing product. contaminated gravel removed and sump was cleaned. AARCO performed vacuum test on the waste oil tank which passed. David M. Almodovar Supervisor Of Plumbers/BBM operations NYC Department of Sanitation PH. (718) 334-9134 (O) email: dalmodovar@dsny.nyc.gov case closed. 9:32 AM:- sent email to Mr. Almodovar and informed him about case closure."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "03/20/08 - See eDocs for Con Ed report detailing cleanup and closure. 158962. June 06, 2005 @ 09:00 @ 08:45 UG Supervisor S. Falkowski reported to T. Haynes that, UG Splicer Carmen Cabbell #20479 was pumping out service box 5231, located at 517 W 28 St. She noticed oil being pump out also. The oil didn't leak into the City drain. She had placed absorbent pads on the asphalt to absorb the oil. The oil in the service box is contained. Approximately 1 pint of oil and 20 gallons of water in total less than .05 was pumped onto the street. Incident occurred at 08:40. Acct. 12018 No sewer/waterways affected. No fire/smoke involved. No injuries related to the spill. Weather condition did not contribute to the spill. No private property affected. Spill on concrete and asphalt. Clean-up is set-up for 15:00 06-06-2005. No, sewer connection. No concrete sump. No visual water movement. No sump pump. Yes, standing water. Environmental tag #17086 Two samples taken 1-pcb 1-oil id. Chain of custody #dd 04443. Logger: T. Haynes CIG: M. Piropato #18699 notified @ 09:44"

Remarks: "Employee PUMPED OIL OUT: NO TO 5 QUESTIIONS: PADS WERE PLACED DOWN: ALL CONTAINED: LESS THEN 1 PINT; 158962"

DEC Memo:

"09/25/95: PIN-4169 - ASSIGNED TO CHRIS FOR TRACKING PURPOSES.
10/6/03 See also PIN 4169, spill #s 8605682, 8606807, 9410208,
9410209. 1/8/04 Reassigned from Tomasello to K Foley. 06/20/06:
Re-assigned from Foley to Yau. (Yau) 06/22/06: Prepared and sent an
old spill letter to property owner through certified mail. A site
investigation report (SIR) is expected to be due on 07/22/06. (Yau)
06/27/06: Owner called to inquire about the spill. Stated that he
brought the property recently (around 2002) and had no idea where is
the spill was. Told him that DEC will look into it and call him back
with the exact location of the spill. (Yau) 08/02/06: Owner called to
request an update to the site. Told him that a review is underway.
Found that DEC had a PIN job for this site. Unsure whether the
cleanup is complete. If the cleanup is incomplete, the owner might
have to re-do the cleanup. Will call owner back as soon as review is
completed. (Yau) 10/16/06 Reassign from Yau to Chanda (Chanda)
12/12/06-Vought-Spill reassigned from DEC Chanda to DEC Vought.
03/20/07-Vought-File review by Vought: See also open spill #0603967
at same location. Videotape-unknown date (circa 19884)-tape showing
well being bailed with free product thickness of 1 . Registered CSL
Letter sent by DEC Yau to Tenth Gas Inc (address as per Property
Shark). FOIL request from Brinkerhoff-8/18/06. Vought called AG
Bechard for status of PIN case. PIN case assigned to AG John Nyhoff.
Vought called Nyhoff and left message to return call.
3/20/07-Vought-See also closed spill numbers: 8605682, 9410208,
9410209 and 8302630(Open pin #). Vought spoke to DEC Krimgold who is
preparing Consent Order for PBS violations and requested to add
remedial requirements. Conference call with DEC Urda, AG Nyoff and AG
Riggi showed that approximately 354K still owed to AG for past
cleanup costs. Due to same ownership (Citigas) prior costs may be
included in Consent Order. Vought submitted CAP for below
requirements to DEC Urda. Riggi and Nyhoff also approved submission
of Final ISR and closure of spill as any new funds spent by the DEC
need a new PIN number since settlement already reached with old
responsible party. Vought called Snyder, summarized consent order and
left message to return call. 03/21/07-Vought-Left message for AG
Nyhoff to call Vought with status of PIN. Vought and DEC Urda spoke
with AG Nyoff and as per Nyoff default judgement was made against
former owner of property resulting in lean of approximately 354K.
3/26/07-Vought-Received ISR from Nyoff. Vought left message for Nyoff
to return call with which party was found responsible (Alex Goffman
or Westside Tripple Auto Repair). 4/23/07-Final ISR submitted to DEC
Austin for review and spill closed by Vought. "

DEC Memo: "03/15/07-Vought-File review by Vought: Letter from American Environmental Solutions (AES)- Brain Pendergast (ph:631-475-0020 fax:631-475-0025) to DEC Falvey-12/19/06: Atlantic Development Group, LLC has retained Brinkerhoff Environmental Services, Inc. as the environmental consultant and American Environmental Solutions, Inc. (AES) as the remediation supervisor... In 9/06, AES removed one (4000-gallon) diesel UST and three (4000-gallon) gasoline USTs from the site. The tanks were encased in concrete and there was no evidence of a petroleum release . A small amount of contaminated soil was located in the area east of the former pump island . Approximately 20 tons of soil was excavated in 11/06. Revised PBS application being submitted by AES. Five PBS violations found by DEC Falvey during inspection. Remedial Action Report (Brinkerhoff Environmental-732-223-2225). Site was formerly occupied by a gasoline station and auto repair facility. In 9/06 AES collected endpoint samples from waste oil UST excavation and endpoint sampling was not conducted in the gasoline and diesel UST excavation since the USTs had been encased in concrete. No evidence of discharge was observed in the field in either the gasoline/diesel UST excavation or in the waste oil excavation . In 11/06 Brinkerhoff directed excavation of soil in the area of the dispenser island and the former sample location that reported VOCs. Report proposes No Further Action. Nine soil boring performed in 6/06. PID readings, petroleum staining and petroleum odors were encountered in Soil Boring SB-4 and SB-9 . Soil analyticals from boring show both samples were DILUTED: 260ppb benzene(SB9 3'bg),111000ppb xylene (SB9 3'bg), 70000ppb 1,2,4-trimethylbenzene(SB9 3'bg), 26000ppb 1,3,5-trimethylbenzene(SB9 3'bg), 370ppb MTBE(SB9 3'bg). SITE IS E DESIGNATED. Four endpoint samples collected from excavation of soils at SB9 show no TAGM 4046 Required Soil Cleanup Objective exceedences. SVOC exceedences attributed to urban fill material. Endpoint samples from excavation of SB9 collected at least ten feet away from initial soil boring location. Samples collected from 11'bg at SB9 show VOCs below TAGM. Tank Closure Report (American Environmental Solutions-January 2007. The site is currently being redeveloped for future use as a hotel. Five USTs were removed from 9/06-11/06 including one (1000-gallon)waste oil UST, three (4000-gallon) gasoline USTs and one (4000-gallon) diesel. All lines and piping associated with the tanks located on the site were removed . Thirty tons of soil was disposed from site. Soil was excavated from the area just east of the pump

FORMER GAS STATION (Continued)

S108058323

island. AES collected five endpoint soil samples from waste oil excavation in 9/06 and Brinkerhoff collected soil samples in 11/06. No endpoint samples collected from gasoline and diesel USTs because they were entirely cased in concrete and there were no holes in any of these tanks and no evidence of a petroleum discharge was observed. Report recommends no further action. Waste oil samples show no TAGM exceedences except for PAHs attributed to fill material. Endpoint soil samples collected from pump island excavations show no TAGM 4046 Soil Quality Objective exceedences except for PAHs attributable to fill material. 3/20/07-Vought-See also closed spill numbers: 8605682, 9410208, 9410209 and 8302630(Open pin #). Vought spoke to DEC Krimgold who is preparing Consent Order for PBS violations and requested to add remedial requirements. Conference call with DEC Urda, AG Nyoff and AG Riggi showed that approximately 354K still owed to AG for past cleanup costs. Due to same ownership (Citigas) prior costs may be included in Consent Order. Vought submitted CAP for below requirements to DEC Urda. Riggi and Nyhoff also approved submission of Final ISR and closure of spill as any new funds spent by the DEC need a new PIN number since settlement already reached with old responsible party. Vought called Snyder, summarized consent order and left message to return call. DEC requires: 1)collection of water sample at SB9 due to shallow groundwater table and historical video for spill #8302630 showing bailer from monitoring well adjacent to pump islands with free product 2)expected depth of foundation 2)vapor barrier/SSDS 3/26/07-Vought-Received call from Matt Snyder (212-318-1650x253 cell 914-522-0759) and returned call and spoke to Snyder. Contact at Brinkerhoff that Urda is using is Doug Harm. Vought referred Snyder to Doug Harm at Brinkerhoff. DEC sent Consent Order to Doug Harm. 04/04/07-Vought-Received message from Doug Harm (732-223-2225) regarding site and returned call and left message to return call. 4/5/07-Vought-Received call from and spoke to Harm who received CAP for Consent Order. Brinkerhoff will collect groundwater samples on 4/10 and report will be submitted to DEC. Workplan submitted to DEP for their additional requirements and DEP will not approve plan until they receive plan for building. Building will not occur until Consent Order obligations are completed. ISR will be submitted to DEC. RAP may not be submitted for 90-120 days as owner not decided on how to develop property as of yet. 4/6/7-Vought-Vought called Harm who proposed 60 days for ISR and 180 days for submission of RAP as owner still undecided on development plans. Harm assured DEC Vought that development will not take place as permits cannot currently be obtained from DEP due to outstanding E designation requirements. Vought approved of proposed changes to CAP and submitted to DEC Urda. Harm also sent in letter with request as per Vought. 4/13/07-Vought-Reviewed Corrective Action Plan Extension Request dated 4/5/07 submitted by Brinkerhoff (Harm). Groundwater sampling scheduled to be conducted on 4/10/07. An extension for submittal of the RAP of 180 days is requested. See above entry for 4/5/07 as 120 day extension for RAP is acceptable by Department. Vought sent email to DEP Naizaire requesting information on DEP project manager. 06/04/07-Vought-Received email from DEC Nazaire that DEP project manager is Tracy Goldman (718-595-6443) and left message to return call. 06/26/07-Vought-Received call from and spoke to Suman Khanna (718-349-0555) who put in foil request and he received detailed PDF report and was not aware of prior Attorney General action. 10/23/09-Vought-Received message from Harm (732-223-2225) on 9/28 that property being developed with residential apartments and

FORMER GAS STATION (Continued)

S108058323

that vapor barrier and SSD installed. Vought spoke to Harm and 3000 tons of soil was removed and post excavation samples were collected. Excavation occurred to water table. No sidewalk wells remain. DEC will receive closure and excavation report within the next couple of weeks (by 12/1/09). Vought called and spoke to NYSOAG John Nyhoff and informed him of property development. 8/6/10 - Raphael Ketani. I took over the case from Jeff Vought of Spills who transferred to Unit A, Superfund Sites and Brownfields, within DER. On 7/11/06, oil contaminated soil was discovered during a site investigation. The site was a former gas station. The address is 303 10th Avenue in Manhattan. The consultant was Doug Harm of Brinkerhoff Environmental (732-223-2225). The site is located at 303-309 10th Avenue, Manhattan. The block and lot are 699 and 33. According to ACRIS, the deed shows that 303 10th Avenue Hospitality, LLC is still the owner of the property. Their address is 20 West 46th Street, 2nd Floor, NY, 10036. There are two PBS registrations. The earlier one, #2-601361, shows four 4,000 gal. USTs with gasoline and diesel fuel. They were installed on 9/1/98 and removed on 2/1/77. The second registration is #2-604322. There is one 250 gal. lube oil UST. I left a message for Mr. Harm (732) 223-2225 requesting the closure report for the site along with the groundwater results. Also, I spoke Mr. Vought regarding the site. He said that they were putting in the foundation for a building when he had the case. 8/9/10 - Raphael Ketani. Mr. Harm called me back. He said that the last step in the investigation would be to install a monitoring well in front of the building. However, for a long time, there had been scaffolding in place which prevented any well installations. The scaffolding has finally come down and Brinkerhoff will install the well. The groundwater analytical results will be sent to the DEC in about 60 days. 10/26/10 - Raphael Ketani. Today I received the 10/5/10 Closure Report from Brinkerhoff Environmental Services, Inc. I began my review of the report. 10/27/10 - Raphael Ketani. I finished my review of the Closure Report. According to the information contained in the report, almost all of the soil within the footprint of the former gas station was removed down to 13 feet from 5/27/08 to 3/17/09. Eight (8) soil end point samples were taken from 8/27/08 to 3/19/09 and indicated that there was no BTEX contamination and generally low concentrations of SVOCs. The only SVOCs that exceeded the TAGM standards were the benzo series and their associated combustion products. Given that only these analytes exceeded the TAGM standards, the soil results resemble those for historical fill. Groundwater samples were taken on 9/25/07, and 2/11/08 from wells MW-1 to MW-3. After 2/11/08, the wells were destroyed due to the foundation construction for the new apartment building. The results for MW-1 were in the thousands of parts per billion for samples that were taken during both rounds. The other two wells had non-detect or very low analytical results during the second round. A groundwater sample was taken on 03/19/09 from a test pit and the results indicated that the tested VOCs were non-detect, except for slightly elevated results for MTBE and TBA. A later well, MW-4, was installed on 8/12/10 downgradient to the former location of MW-1 after the construction was finished in order to check the groundwater analyte concentrations. The analytical results for the sample that was collected on 8/26/10 were almost entirely non-detect. According to the Closure Report, a sub-slab vapor barrier and a passive vapor ventilation system were installed. Based upon the information in the 10/5/10 Closure Report, I have determined that the petroleum contamination has been remediated. Also, as a vapor barrier

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 DEC Memo: "email from Paul Matli We came to do a phase II investigation at the property 440 10 Avenue in Manhattan, which is located in the northwest-adjacent vicinity of a former gasoline station 436 -438 10 Avenue at which, a spill case # 0201270 was closed conditionally back in April 2013. The findings of our Phase II at the 440 10 Avenue revealed the presence of soil vapor beneath the slab and likely impact to indoor air. I appreciate if you can advise what agency; NYSDEC or NYSDOH should be notified of this findings and find out the requirements to install a vapor mitigation system at 440 10 Avenue, which is a mixed use commercial and residential facility. 1/9/2014 - J. Vought and J. Feng talked to Paul Matli. They did a Phase II in the 440 10th Ave where next to the former BP site 436 10th Ave. They collected soil and soil vapor samples in the boundary next to the former BP site. They also collected soil samples around the AST onsite, no sign of contmaination. The property is now used as commercial/residential building with tire shop in the bottom. No other agency has been involved, but probably an e-designated site. They also collected indoor air and outdoor air sample and show some hits. They will submit a work plan for an active SSDS and will need

NYSDOH to review and approve it. 1/29/2014 - received the SSDS design work plan from HydroTech. Forwarded it to Mike Hughes of NYSDOH for review and comments. 2/4/2014 - Comments from NYSDOH Mike Hughes I reviewed the SSDS Design Work Plan for the 440-442 10th Ave. site. I have one specific comment on the methodology which is if any air samples are to be collected it is very important that the list of analytes be expanded to include compounds not normally present in the TO-15 lab standard. DOH guidance (<http://www.health.ny.gov/environmental/indoors/air/guidance.htm>), details the necessary compounds to be included for various types of petroleum mixtures. For example, the indicator compounds for gasoline should include BTEX, trimethylbenzene isomers, the appropriate oxygenate additives (MTBE, ethanol, etc.), and the individual C-4 to C-8 aliphatics (e.g., hexane, cyclohexane, dimethylpentane, and 2,2,4-trimethylpentane [iso-octane]). My other comment is more general, in that collecting indoor air samples post SSDS installation may not be the most prudent approach to verify if the system is working effectively. It is my understanding that the two buildings are occupied and include residential and commercial tenants, one of which is a tire shop on the ground floor. Interpretation of indoor air samples can be difficult under the best of circumstances, let alone when known interference's are likely to be present. Such an evaluation will require the analysis of concurrent sub-slab vapor samples to be able to compare the vapor composition. A better evaluation of the SSDS system would be a pressure field extension test to measure depressurization under the slab outwards to the perimeter of the building footprint. I understand there may be some logistical access issues, but it should be considered. I have discussed this issue with Jeff in the past, but let me know if you need anything else. 2/27/2014 - Received revised SSDS Design work plan and forwarded to NYSDOH and NYCDOH for comments. 3/10/2014 - email from Mike Hughes. he did review the revised work plan and has no comment. 3/13/2014 - sent approval letter to Madison Capital Realty and cc HydroTech. 3/30/2016 Feng - This spill is transferred from J. Feng to J. Vought as per J. Vought. 12/18/17 - Austin - Project reassigned from Vought to Patel - end 03/06/18-Hiralkumar Patel. DEC Feng sent approval letter for SSDS installation work plan on 03/13/2014, but SSDS post start-up report has not been received yet. SSDS work plan from Hydro Tech proposes installation of the system beneath existing buildings at site 440 10th Ave and 442 10th Ave. based on this information, added site address 442 10th Ave in the spill report. 9:15 AM:- spoke with Dorina Aliu at Hydro Tech and asked her to submit Phase II reports and SSDS Post Start-Up report for review. alternate address for 440 10th Ave (block #: 732/lot #: 73): none alternate address for 442 10th Ave (block #: 732/lot #: 72): none no PBS or spill records were found for site 442. no other spills found for site 440. PBS # for site 440: 2-151750, 2-508632 as per PBS record, site 440 has one (1) 2,000 gal #2 oil AST in vault, in-service, installed in Jan. 1965. PBS registration expired on 08/26/2017 and is currently under previous owner's name. current property owner purchased the site in 2013, but never registered the tank system. ----- PBS record 2-508632 is duplicate of PBS record 2-151750. 440-10 Owner LLC. **owner of site 440** 442-10 Owner LLC. **owner of site 442** c/o Silverstone Property Group, LLC. 825 Third Ave, 36th Floor New York, NY 10022 Attn.: Mike Radoncic PH. Silverstone and informed him about expired PBS and open spill case for site 440. Mr. Radoncic is unaware of these records and requested further information. 10:17 AM:- sent email to Mr. Radoncic including PBS application. informed him about discussion with Dorina regarding Phase II/SSDS Start-up reports. also asked him to submit PBS application to properly register the tank system. email copied to Dorina. 1:07 PM:- received call from Rosemary from Silverstone and requested copy of revised SSDS plan and workplan approval letter. 1:15 PM:- sent email to Rosemary (rcarela@silverstonepg.com) including copy of revised SSDS and work plan approval letter. email copied to Mr. Radoncic and Dorina. 03/08/18-Hiralkumar Patel. received email from Paul Matli (at 5:09 PM on 03/06/18) stating that he manages project at Hydrotech. 8:52 AM:- sent email to Paul and asked him to submit Phase II investigation report from 2013 and SSDS Post Start-Up report. 2:38 PM:- received email from Paul including link to Phase I, Phase II and SSDS post start-up reports. summary of Phase I report dated 11/25/2013: - study included two sites: 440 10th Ave (block # 732/lot # 73) and 442 10th Ave (block # 732/lot # 72) - 'e' designation for noise ----- - property is developed with two 5-story commercial and residential buildings with full cellars - footprint of two buildings combined is approx. 3,632 sq. ft. the remaining portions of the site consist of a rear yards and an open alley at cellar level at lot 72 - commercial use at the site occupies the ground floor and consists of a tire shop at lot 73 and chain repair workshop at lot 72 ----- - upper floors consist of residential apartments - cellars at the site consist of boiler rooms, utility rooms and storage rooms ----- - heating at the subject property consists of two individual gas fired boilers located in the boiler rooms in the cellar of each building - elevation of the subject property is approx. 37 ft above mean sea level - according to information available under adjacent spill case at 436 10th Ave, groundwater in the vicinity of the site is encountered within bedrock fractures - regional groundwater flow direction in the vicinity of the site is presumed to be toward the west, in the direction of the Hudson River - it appears that the subject property was developed prior to 1890 with two 5-story buildings - adjacent property (436 10th Ave) to the southwest is identified in the Sanborn maps as gasoline filling station between 1930 and 2004 - one (1) active 2,000 gal #2 fuel oil AST enclosed within a concrete vault is located in the western portion of the cellar in building 440 - AST is associated with a fill pipe and a vent pipe observed in the sidewalk to the northwest of the building 440 - no evidence of spill, staining or odor was identified in the vicinity of the AST or in the vicinity of the fill pipe summary of Phase II report dated 12/09/2013: - three soil probes (SP-1, SP-2 and SP-3) were installed in the vicinity of the vaulted AST located in the northern portion of the cellar of building 440 - soil probes were installed only to 2 ft below cellar slab at which point refusal indicative of bedrock was encountered - no groundwater was encountered in any of the soil probes - general soil type consists of coarse sand mixed with bricks, pebbles and cobbles - no visual or olfactory evidence of petroleum contamination was identified - organic vapors ranging between 1.1 ppm to 3.7 ppm were detected in soil samples from soil probes - soil sample from 0-2 ft below cellar slab was collected from each soil probe for analysis - two (2) sub-slab vapor probes (SB-1 and SB-2) were installed in the southern and western portion of cellar of building 440 along the site boundary

MAP FINDINGS

COMMERCIAL/RESIDENTIAL BUILDING (Continued)

S116155976

with the southeast adjacent property (former gas station) - one indoor air sample (IA-1) and one background outdoor air sample (OA-1) were collected - indoor air sample was obtained from the central portion of the cellar in building 440 - outdoor air sample was obtained from a representative upwind location in the vicinity of the western building faade at building 440 along 10th Ave - prior to indoor air sample, the cellar of building 440 was sealed for at least 18 hours - no contamination found in three soil samples from around the AST - lab indicated that summa canister labelled SB-1 contained no air volume as the starting vacuum and final vacuum in the canister were the same, and as such, no sample analytical results were reported for SB-1 ----- - petroleum and chlorinated VOCs were detected in sub-slab, indoor and outdoor air samples - boring logs for all three soil probes (SP-1 to SP-3) are identical with same PID readings ----- vapor sample analyticals (ug/m3):

	SB-1	IA-1	OA-1
Benzene	9	6	
Toluene	79	14	17
Ethylbenzene	24	4	3
Xylene	128	18	12
1,2,4-Trimethylbenzene	47	7	5
1,3,5-Trimethylbenzene	13	2	2
TCE	10	74	4
PCE	14*	1	26 *

* - reporting limit summary of SSDS Installation and Operation Report dated 08/05/2014: - fieldwork consisted of the performance of a pre-mitigation diagnostic testing to verify the extent of suction field beneath each building at the site, the installation of individual SSD systems beneath each of the two buildings, the testing of each system for operational integrity prior to start-up and post start-up monitoring of system parameters including airflows, vacuums and vapor concentrations utilizing PID - in addition, air investigation consisted of the collection and analysis of indoor air samples, an outdoor air sample and sub-slab vapor samples - a quantitative pre-mitigation diagnostic testing exercise was performed on 04/03/14 - suction pit was established toward the center of the cellar of each building at proposed location of the SSD system suction pit - three vacuum monitoring points or test holes were installed laterally at various distances from each suction pit - prior to test, a visual inspection was performed to identify any breaches in the cellar slab in order to avoid short-circuiting problems during the establishment of a negative pressure field - numerous cracks and holes were identified on the cellar floor, which were properly sealed using caulk prior to the test - an evaluation of the diagnostic test findings indicates a good communication was achieved beneath the slab of the two buildings - two individual SSD systems have been in operation since 05/06/2014 - PID measurements performed at the exhaust of each SSD system indicated no organic vapor detected - monitoring of the SSD system operation will be performed on an annual basis - collected two indoor air samples (IA-1 and IA-2) in the cellars of two buildings, two sub-slab vapor samples (SV-1 and SV-2) at the effluent of the SSD system installed in each building, and a background outdoor air sample (OA-1) - lab indicated that the summa canister associated with soil vapor sample SV-2 (collected from building 442) did not contain any sample volume and as such, no analytical data was provided for this sample ----- - sample results indicates that the indoor air

MAP FINDINGS

03/20/18-Hiralkumar Patel. 9:32 AM:- spoke with Paul and inquired him about result of any subsequent testing after 2014. Paul mentioned that HydroTech was not retained for any further testing. 2:22 PM:- sent email to DOH Mike including copy of SSDS Installation/Operation Report for review and comment. also included copy of approved SSDS Plan and previous email correspondences. informed Mike that post start-up indoor air sampling was conducted in June 2014, and not in Apr. 2014 as proposed in the approved plan. email copied to DOH Nathan. 03/22/18-Hiralkumar Patel. 10:19 AM:- received email from DOH Mike inquiring about current occupancy status of the building, occupants (if occupied) and operational status of venting system. reviewed PBS record, which has been renewed and corrected. ----- 10:42 AM:- sent email to Mr. Radoncic and asked him to immediately provide details about building's current occupancy status, occupants (if building is occupied) and operational status of SSD system. 03/29/18-Hiralkumar Patel. 1:33 PM:- sent email to Mr. Radoncic and asked him to submit details about building's current occupancy status, occupants (if building is occupied) and operational status of SSD system. 04/12/18-Hiralkumar Patel. 10:24 AM:- received email from Mr. Radoncic. he is unaware of installation of SSDS. he mentioned that the building is currently 88% occupied (16 units occupied, 2 units vacant). 04/19/18-Hiralkumar Patel. 9:03 AM:- left message for Mr. Radoncic. 04/26/18-Hiralkumar Patel. 10:15 AM:- visited site. tire shop business owner provided access to both buildings, as building super was not on-site. could not get access to basement of building 442, but noted a PVC pipe (with blower attached) extending above roof line along building's southern foundation wall, in alley between building 440 and 442. inspected basement of building 440. noted an AST, wrapped in cinder blocks, located in northwest corner of the basement. noted PVC pipe from basement floor travelling through building's eastern wall. could not confirm location of PVC pipe outside the building. pressure gauge on PVC pipe was at zero. 10:26 AM:- left message for Joe, building super. Joe Sinanaj **building super** Ph. (347) 920-0773 12:23 PM:- received call from Joe. he confirmed installation of venting system in both basements. 1:04 PM:- spoke with Mr. Radoncic and informed him about PVC pipes noted in basements. suggested him to discuss with Hydro Tech Env. who installed venting systems. Mr. Radoncic request copy of available reports. 1:29 PM:- forwarded Mr. Radoncic's email dated 04/12/18 to DOH Mike and DOH Nathan. 1:29 PM:- sent email to Mr. Radoncic including copy of Phase II report, SSDS work plan, work plan approval letter and SSDS installation report. suggested him to contact HydroTech in reference to installation of venting system. email copied to Paul. 08/01/18-Hiralkumar Patel. 2:05 PM:- spoke with Thomas Romero, current property manager. Tom started managing the

MAP FINDINGS

COMMERCIAL/RESIDENTIAL BUILDING (Continued)

S116155976

property in July 2018 and doesn't know anything about open spill case. informed him about the case and email sent to Mr. Radoncic. Tom requested copy of the previous email. Thomas Romero **current property manager** Ph. (646) 627-1096 email: tromero@silverstoneegg.com 2:13 PM:- forwarded previous email dated 04/30/18 to Tom. asked him to contact HydroTech about pending investigation. 07/03/19- 10:23 AM:- received message from Harry from ECMS. Harry Sudwischer Environmental Consulting and Management Services Inc. (ECMS) Ph. (860) 915-1116 (203) 241-1030 email: harrys@ecmsny.com 07/05/19-Hiralkumar Patel. 8:57 AM:- spoke with Harry. he mentioned that ECMS was retained two weeks ago by property owner to manage spill case. he inspected the site recently and noted SSDS turned off. he tested the system, but could not develop vacuum. Harry suspects some kind of blockage in the system that requires further investigation/repair. Harry stated that SSDS was installed based on detection of petroleum compounds in sub-slab samples due to possible off-site contamination (former gas station) which may have been removed during redevelopment of the adjacent former gas station into a high rise hotel. as there may not be anymore off-site source for soil-vapor contamination, Harry proposed to conduct sub-slab/indoor/outdoor air sampling prior to determining whether to repair or decommission SSD system. based on review of available information, approved Harry's plan for soil-vapor investigation. asked him to analyze samples for expanded list of analytes (including compounds not normally included in TO-15) 9:21 AM:- received email from Harry including proposed sampling location plan. he proposed to collect two sub-slab vapor samples from building 440, one sub-slab vapor sample from building 442, one indoor air sample from building 440, one indoor air sample from building 442 and one outdoor ambient air sample. 9:49 AM:- sent email to Harry approving the proposed sampling plan and asked to analyze all samples as per NYSDOH guidance (may need to expand analyte list to include compound not normally present in the TO-15). asked him to submit schedule for sampling/data submission. email copied to Mr. Randoncic and Marc Rutstein (marc.rutstein@ecmsny.com). 07/09/19-Hiralkumar Patel. 12:57 PM:- received call from Harry. he will collect sub-slab/indoor/outdoor air samples tomorrow. 08/26/19-Hiralkumar Patel. received email from Harry (at 5:01 PM on 08/09/19) including vapor intrusion investigation summary report. summary: - ambient air was screened using PID prior to sampling. no discernible VOC odors were present and background recoded PID readings ranged from 0 to 0.7 ppm - olfactory evidence of odors from laundry machines and dryer's equipment was present but it did not affect PID readings - no chemical appeared to be stored in the basement that would affect indoor air quality - total of six air samples were collected: three sub-slab soil-vapor samples (SV-1, SV-2 and SV-3: SV-1 in building 442; SV-2 and SV-3 in building 440) were collected by installing inert tubing to 2 inches beneath the foundations; two indoor ambient air samples (IA-1 from building 442 and IA-2 from building 440) were collected from laundry rooms at 3-4 ft above the ground; one outdoor ambient air sample (OA-1) was collected from alleyway between two buildings soil-vapor/air sample analyticals (ug/m3):

Harry recommended another full round of indoor air/sub-slab sampling in Oct. 2019 prior to establishing a need to repair/restart the SSDS. 09/04/19-Hiralkumar Patel. 1:02 PM:- forwarded vapor intrusion investigation summary report to DOH Nathan for review/comments. 09/16/19-Hiralkumar Patel. 10:23 AM:- received email from DOH Nathan. based on report review, Nathan recommended to recollect sub-slab vapor and indoor air samples in the heating season (November 30 March 30th) from both buildings (440 and 442 10th Ave) as there are more petroleum compounds in the sub-slab vapor in the 440 building and the identified TCE in building 442. 12:09 PM:- sent email to Mr. Radoncic. informed him that the department requires additional soil-vapor investigation in both buildings during the heating season. asked him to provide schedule for the additional investigation. email copied to Harry and Marc Rutstein (marc.rutstein@ecmsny.com). 1:10 PM:- received email from Mr. Radoncic. he mentioned that Julie Rodriguez will be point of contact moving forward. Julie Rodriguez Silverstone Property Group email: jrodriguez@silverstonepg.com 10/24/19-Hiralkumar Patel. received message from Harry (at 8:49 AM on 10/23/19). he has scheduled sub-slab/indoor air sampling on 10/28/19. 10:58 AM:- spoke with Harry and asked him to confirm that heating system is on in the building before sampling. 03/04/20-Hiralkumar Patel. 10:02 AM:- received email from Harry including vapor intrusion investigation summary report. summary: - collected total of eight (8) air samples on 10/28/19 between two buildings 440 and 442 10th Ave - prior to sample collection, PID survey was conducted - no odors noted in buildings and PID background readings were ranged from 0 to 1.5 ppm - three (3) sub-slab soil-gas samples were collected via inserting tube to 2 inches beneath the basement slab: one sample SV-1 442 from building 442 and two samples SV-2 440 and SV-3 440 from building 440 - four (4) indoor ambient air samples (IA-1 442, IA-2 440, IA-3 442 and IA-4 440) were collected from basement and first floor common areas of building - one (1) outdoor ambient air sample (OA-1) was collected from alleyway between two buildings soil-vapor/air sample analyticals (ug/m3):

Chloroform-----13 1:52 PM:- sent Oct. 2019 Vapor Intrusion Investigation Summary Report to DOH Nathan for review/comment. 03/09/20-Hiralkumar Patel. 2:19 PM:- received email from DOH Nathan requesting conference call from with Harry due to presence of TCE in both buildings. 04/02/20-Hiralkumar Patel. 12:00 PM:- spoke with Harry and asked him to schedule a conference call to discuss soil-vapor investigation results. 04/08/20-Hiralkumar Patel. 10:15 AM:- spoke with Harry and DOH Nathan to discuss detection of CVOC in indoor air samples. based on sample results, DOH recommended PID screening (using ionization lamp that can detect CVOC) and inventory in tire shop to locate possible indoor source of CVOC. Harry will provide schedule for PID screening/inventory, that may vary based on guidance in reference to COVID-19. 04/10/20-Hiralkumar

Patel. 9:38 AM:- received email from Harry stating that the tire shop at the site is closed at this time. Harry inquired if PID screening is needed in residential space of the building. 11:26 AM:- sent email to Harry. informed him that based on site's historical use, the department does not see need for an immediate screening unless NYSDOH requires such action. email copied to DOH Nathan. 04/13/20-Hiralkumar Patel. 9:29 AM:- received email from DOH Nathan. he concurred that there is not an immediate need to perform the screening and it can wait until things are back to normal operational conditions. **SSDS plan proposed post start-up sampling towards end of heating season, but sampling in 2014 was conducted in June.** **waiting for DOH review/comments.***

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: "TTF was sent out to BROADWAY REAL ESTATE SERVICES 450-460 WEST 33RD STREET NEW YORK, NY 10043 ATTN: JAVIER CORRIPIO ** PBS 2-456721 ** 2/26/13 TJD File review. Tank failed tightness test on 9/8/12 - intially reported as a wet leak. Tank was uncovered and corrosion was identified at tank top fittings and associated piping. Repairs were performed and a tank only (isolation test) was performed on 10/2/12 which passed. A complete system tightness test was then permformed on 10/11/12, also with passing results. Contractor has provided the following statement in their closure report, Throughout excavation operations, close inspections indicated neither visual nor olfactory evidence of petroleum contamination, confirming that there was no loss of product into the subsurface. all required closure documentation has been submitted and uploaded to EDOCS. No further action is required at this time."

DEC Memo: "9/18/00 On site. Across the street from Javits Center. Former gas station. Removing old 550 tanks to install billboard. Concrete broken and piping exposed. As per owner, Ari Zubli, tanks temp closed with water 15 years ago by Mobil. No evidence of contamination. They will collect endpoint soil samples and submit the a tank pull report to my attention. First tank they encountered was still filled with water. Structural borings performed by Scott Lewis Eng. Firm - Bedrock at 12 feet no water. Tanks not registered. Mailed PBS application and instructions. Spoke to Chief Mooney. When the FD was on site, they encountered explosive levels of vapors in piping and stopped work.

They referred this to their buried tanks unit to follow up and ensure that the contractor is FD certified. DEC Sigona met with facility owners provided PBS application to register existing tanks 6 x 550 gallon and 1 x 2,000 gasoline USTs. The tanks were removed and excavation completed on Monday October 2, 2000. Environmental Assessment and Remediation (John Rochetta) documented the removal of the tanks under PIN Project investigation for Javits cleanup. EAR collected endpoint soil samples to fingerprint samples for comparison to used oil cleanup under 11th Avnue and West 37th Street/West 36th Street. The material appeared to be gasoline and different from the material cleaned up by DEC state contractor Milro Associates. No used oil USTs were found during the excavation of the site. Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill case was reassigned from DEC (Sigona) to Rommel on 01/07/2004. 08/19/05 Determination needs to be made whether all tanks at site removed. Next step- call property owner to determine whether tank closure report exists. LNK. 05/04/06-Vought-See spill #9709152 for three groundwater wells installed by NYS to see if possible upgradient contribution to site located at 450-454 11th avenue (Spill #9709152 PIN00334). EcoTest Groundwater Analyticals-6/2/04. Groundwater analyticals show: 30ppb benzene(MW1), 7ppb xylene(MW1), 6ppb isopropylbenzene(MW1), 8ppb n-propylbenzene(MW1), 21ppb 1,2,4-trimethylbenzene(MW1), 34ppb xylene(MW2), 38ppb 1,2,4-trimethylbenzene(MW2), 6ppb benzene(MW4), 8ppb benzene(MW6), 17ppb toluene(MW6), 110ppb ethylbenzene(MW6), 420ppb xylene(MW6), 320ppb 1,2,4 trimethylbenzene(MW6), 33ppb naphthalene(MW6), 480ppb benzene(MW7), 3600ppb toluene(MW7), 3800ppb ethylbenzene(MW7), 13000ppb xylene(MW7), 5500ppb 1,2,4-trimethylbenzene(MW7), 930ppb naphthalene(MW7). Wells MW6 and MW7 located on sidewalk of 456 11th ave show contamination consistent with gasoline. Vought called DEC Brand (project manager for Spill #0007141 at 456 11th Avenue) regarding dissolved groundwater contamination in MW7 and MW6 located on sidewalk of 456 11th Avenue. Martin indicated that spill was going to be transferred back to Region 2 due to end of spill closure initiative in Albany. Martin indicated that he would put spill in Long Term list for transfer back to Region 2. 08/17/2006: As noted above, spill may be associated with adjacent spill 9709152. NYSDEC contact name changed to Vought, spill transferred back to Region 2 for evaluation. M.Brand NYSDEC DER Albany. 4/25/2007 - Sangesland spoke to Mr. Zubli (property owner) the spill case needs to be reassigned to someone in the Remediation Group. Sangesland provided Mr. Zubli with a contact name/number for Vadim Brevdo-DEC Remediation. 11/08/07 The owner of the site Ari Zubli called and in a telephone conversation voiced lots of concerns that the spill was opened without evidence of contamination; that his site is being affected by the site across West 37th Street (which is handled by Jeff Voight - PIN Job, Spill No. 9709152), specifically by the oil-related contamination emanating from PIN Job site, and that his site does not have gasoline contamination. Conversation between Vadim Brevdo and Jeff Voight on 11/08/08 following Mr. Zubli's call and review of documentation related to PIN Job, Spill No. 9709152 reveal that wells installed during PIN Job in 2004 on West 37th Street show high gasoline concentrations and it is not clear which site is the source and which one is being impacted. Groundwater flow direction is unknown. At least, PIN Job site did not appear to have used gasoline, whereas Mr. Zubli's site operations did use gasoline. This all confirms that if Mr. Zubli wants spill closure, he should

retain consultant implement additional investigation which would prove that his site is being affected from by off-site source. Without such evidence/investigation report it is not prudent for DEC to close this spill. (Vadim Brevdo) 4/2/09 - Austin - Transferred from Needs Reassignment to Patel for further work to remediate and close - end 04/13/09-Hiralkumar Patel. visited site. met Isaac Zubli, property owner. site is occupied by a parking lot and a auto body shop (not a repair shop). no tanks on the property. as per Mr. Zubli, he bought property in 1979 and at that time, site was a gas station. then gas station was closed in 1980s and tanks were closed in-place. after that, he converted site into parking lot. and in 2000, Atlantic Outdoor signed a contract to install a billboard at the site. as per Mr. Zubli, according to contract with Atlantic outdoor, Atlantic took responsibility of removing tanks property which were located in area where existing billboard is. Mr. Zubli mentioned that Atlantic removed all tanks and associated material. asked Mr. Zubli to provide Atlantic's phone number. site is located at the corner of 11th ave and W 37th street. during site inspection, found two monitoring wells on sidewalk of W 37th street: one at the corner of 11th ave and W 37th street and second well slightly west of auto body shop entrance along W 37th street. during site visit, Mr. Zubli mentioned that these wells were installed by DEC as part of pin project across the W 37th street (Spill #9709152). U&I Realty Inc. **property owner** Isaac Zubli 456-460 11th Avenue New York, NY 10018 Ph. (212) 695-7878 Fax (212) 695-3075 04/17/09-Hiralkumar Patel. received message from Ari Zubli, owner's son. 04/20/09-Hiralkumar Patel. spoke with Ari. he will call back with bill board company's contact info. Ari Zubli Ph. (516) 316-9297 (C) email: azubli@yahoo.com 05/20/09-Hiralkumar Patel. left message for Isaac Zubli. alternate address: 561-567 W 37 St PBS #: 2-604710. according to ACRIS record, property owner is: U&I Realty Inc. 224-05 Horace Harding Blvd. Bayside, NY 11364 05/26/09-Hiralkumar Patel. sent letter to U&I Realty at both addresses (NY and Bayside), via certified mail, requiring submission of work plan (with schedule) for complete soil and groundwater delineation. letter faxed to Isaac Zubli and emailed to Ari Zubli. asked Ari to provide billboard company's information. 05/29/09-Hiralkumar Patel. 12:21 PM:- received signed return receipt for letter that was sent to the site. 06/11/09-Hiralkumar Patel. 5:06 PM:- received email from Ari Zubli with copy of some pages of Phase I done previously. he mentioned that billboard company hired Yellowstone Industries to remove tanks and associated contamination. as per Mr. Zubli, DEC employees were present at the site for almost two weeks supervising the removal and clean up. as per Phase I, initial spill was opened due to an alleged above ground spill. when the billboard company broke the concrete to begin the excavation of the site they encountered the tank vent pipes which were right beneath the surface. this released some petroleum vapor and the tenant next door called the fire department with a complaint of a gas smell. Mr. Zubli mentioned that the Fire departments spill report clearly states that ZERO gallons of gasoline were spilled. There was NO spillage of gasoline at all. Phase I report also shows that ALL The affected soil had been removed by Yellowstone and under the supervision of your DEC employees. entire area that once housed the gas tanks is now solid concrete. for a billboard of that size to be installed there is a massive space of rebar and concrete that needs to be installed. 06/16/09-Hiralkumar Patel. 12:13 PM:- letter that was sent to Bayside address came back undelivered. 3:25 PM:- left message for Ari Zubli.

3:30 PM:- received call from Ari Zubli. explained him that the case is open as proper documents never submitted to the department. asked him to submit complete Phase I report. he mentioned that during installation of billboard, company excavated 50 ft by 50 ft area to a depth of groundwater and poured concrete to support billboard. asked him to contact billboard company to get site map with billboard installation details and excavation area. explained him that if most of the area where tanks were located had been excavated then the department requires installation of third well (assuming two wells on W 37th street still works) to define groundwater flow direction and groundwater sampling from each wells. Atlantic Outdoor Advertising Matt Perline Eric Forman PH. (212) 787-5100 06/17/09-Hiralkumar Patel. 12:15 PM:- received email from Ari with copy of Phase I. abstract: - historical utilization of the subject property as an auto repair facility, car laundry, grease shed and gasoline filling station - little E restriction for the subject property is listed as Hazmat/Noise less than ----- - elevation of the site is approx. 20 ft above mean sea level - depth to groundwater is approx. 12 ft bg - regional groundwater flow towards the northwest, in the direction of Hudson river - sanborn map 1950 indicates that the southern portion of the site was developed as a gasoline filling station with a car laundry, grease shed and store located on eastern side and six USTs and pump island on the western side less than ----- Phase I also include copy of Tank Removal/Closure Documentation Report, prepared by EAR. abstract of tank closure documentation report: - EAR was on-site as an observer only, and was not responsible for collecting samples related to a site assessment or soil disposal - groundwater is located at the interface between the bedrock and the overburden at 8 to 12 ft bg - soil samples were collected from the south sidewall of tank #7 (one 2,000 gal UST, PID: 80 ppm), the composite bottom of tanks # 1-6 (six 550 gal USTs, PID: 1,600 ppm) and the final extent of excavation 8.5 ft bg - no other endpoint samples collected due to concrete wall and nearby building and above/below grade structures - liquid samples were collected from the interior of the tanks # 1, 3, 4, 5, 6 and 7 - all seven tanks were 48 inches in diameter - six 550 gal USTs were encased in concrete - all tanks were closed since 1987 and filled with water - tank #1 (furthest north of six tanks) to tank #4 and tank #6 (furthest south of six tanks) were found with no holes and appeared to be in good condition - top of the tank #1 was punctured by excavator - tank #5 was documented to be in poor condition, having a two-inch hole in bottom, however the tank was holding product and water when it was unearthed - tank #7 (2000 gal) was 48 inches in diameter - no holes found in tank #7 and appeared to be in good condition - as the excavator removed soil from the west side of the tank #7 concrete vault, black liquid drained from the vault base into the open hole. as the excavator removed the liquid and impacted soil from the excavation, strong gasoline odors permeated the ambient air less than --- - final excavation dimentions were 30 ft in length, 24 ft in width and 8.5 ft deep (where bedrock was exposed) - south sidewall sample from tank #7 excavation was collected at 6 ft bg and fingerprint analysis indicated motor oil or diesel oil - previously used vent and product lines were not removed during the time EAR was on-site - all tanks were holding liquid when unearthed, it appears that overfills, line leaks and/or surface spills may have contributed to the impact of the subsurface less than ----- - samples were analyzed via TCLP methods (could not ready values in report) 06/29/09-Hiralkumar

Patel. 10:05 AM:- spoke with Eric at Atlantic. he mentioned that they removed contaminated soil and collected endpoint samples. asked him to submit cleanup report. 10:11 AM:- received call from Matt from Atlantic. he will look for documents. 08/03/09-Hiralkumar Patel. 11:50 AM:- spoke with Matt. he looked in record and found no reports. 12:42 PM:- spoke with Ari Zubli. asked him to provide contractor's info by end of 08/14/09. 08/11/09-Hiralkumar Patel. 4:50 PM:- received email from Ari. he spoke with Jill at Preferred environmental regarding required investigation. Ari will send update once he receive comments from Jill. 09/11/09-Hiralkumar Patel. 3:59 PM:- received email from Ari. he hired Preferred environmental. will start work soon. 09/14/09-Hiralkumar Patel. 12:43 PM:- sent email to Ari to submit work schedule. 11/23/09-Hiralkumar Patel. 3:51 PM:- spoke with Jill at preferred. she sent proposal, but no response from owner yet. 3:56 PM:- left message for Ari to repsonse with contractor's contact info by 11/27/09 or else case will be referred to legal. 11/24/09-Hiralkumar Patel. 3:33 PM:- received call from Ari. he was out of country for some time and is sending signed contract to Jill now. Ari will asked Jill to contact to confirm that they will do work. 12/01/09-Hiralkumar Patel. 1:52 PM:- sent email to Ari to submit copy of signed contract, between owner and consultant, by end of 12/04/09. 12/17/09-Hiralkumar Patel. 11:54 AM:- left message for Ari. 12:15 PM:- received message from Ari. he sent signed contract to Jill at Preferred. 1:41 PM:- spoke with Ari. he will send copy of work proposal which details what work will be done. asked Ari to provide work schedule also. 12/21/09-Hiralkumar Patel. 2:10 PM:- spoke with Bill at Preferred and asked him to submit work plan/schedule. Bill will send update by end of 12/24/09. 01/06/10-Hiralkumar Patel. 10:21 AM:- received work plan from Jill. Preferred enviornmental inspected site on 12/29/09 and located seven monitoring wells in area. preferred gauged all seven wells and found free product in two wells: black thick oil (could not find thickness) found in well MW-4 which is located in front of auto shop at the site and 0.35 ft of product with gasoline-like odor in well MW-7 which is located in southwestern corner of the property (close to intersection of W 37th street and 11th Ave). Jill is proposing to install eight soil borings to a minimum depth of 12 ft or until bedrock is encountered (bedrock is estimated to be at approx. 8.5 ft bg). will install three 2-inch diameter wells based on PID results during soil borings. will sample new well and previous well MW-6 (MW-4 and MW-7 will not be sampled as has product in it). Jill is proposing to submit report within two months from work plan approval date. 01/19/10-Hiralkumar Patel. 12:51 PM:- sent work plan approval letter to Isaac Zubli. letter emailed to Ari Zubli and Jill. asked to submit investigation report by 03/19/10. 03/03/10-Hiralkumar Patel. 10:33 AM:- received email from Jill requesting extension for investigation report submission from Mar. 2010 to Jun 2010. she mentioned that due to heavy snow and some other problems, project got delayed. 03/09/10-Hiralkumar Patel. 3:34 PM:- sent email to Jill approving deadline extension to 05/31/10. email copied to Ari Zubli. 03/29/10-Hiralkumar Patel. 3:39 PM:- received email from Bill. they have scheduled soil boring/well installation on 04/05/10. 04/06/10-Hiralkumar Patel. received email from Bill (at 5:26 PM on 04/05/10) stating that investigation work has been rescheduled for April 15-16, 2010 due to scheduling conflicts of the property owner. 05/21/10-Hiralkumar Patel. 9:18 AM:- received message from Bill. they received sample results but waiting to do well survey which will be

1,3,5-Trimethylbenzene-----1,500
Naphthalene-----1,200

07/14/10-Hiralkumar Patel. 10:36 AM:- spoke with Jill. Jill mentioned that, based on field notes, they gauged wells across the West 37th Street (MW-1, MW-2 and MW-3) and no waste oil product found in those wells. asked Jill to send copy of field notes, as this information is not in report. asked Jill to collect product samples from wells MW-4 and MW-7 and pump out product from wells, immediately. 10:46 AM:- spoke with Isaac Zubli and asked him to collect product sample and pump out product from two wells. asked him to submit work schedule for sample/pump out by end of 07/23/10. 11:02 AM:- received email from Jill with copy of field note which shows no product found in wells across the street. 07/22/10-Hiralkumar Patel. 1:17 PM:- spoke with Bill. they haven't done product removal yet. asked him to contact property owner to schedule product sampling (for fingerprint analysis) and product removal. asked Bill to call back with work schedule by end of 07/26/10. 08/04/10-Hiralkumar Patel. 10:38 AM:- left message for Ari Zubli to submit work schedule for product sampling and pump-out by

end of 08/05/10. 08/05/10-Hiralkumar Patel. 3:45 PM:- received call from Ari Zubli. he mentioned that he authorized required work last week and asked Bill to schedule product sampling and removal. he spoke with Bill yesterday also. suggest Mr. Zubli to call Bill again by 08/09/10 if doesn't get work schedule. 09/13/10-Hiralkumar Patel. 10:24 AM:- left message for Bill. 10:25 AM:- left message for Ari Zubli. 1:12 PM:- received message from Bill. due to unpaid account, they haven't done any work yet. 09/15/10-Hiralkumar Patel. 3:07 PM:- spoke with Isaac Zubli and informed him to submit work schedule by end of today. 4:27 PM:- received call from Ari Zubli. he mentioned that he will send payment today and ask Bill to submit work schedule by end of 09/20/10. 10/08/10-Hiralkumar Patel. 1:35 PM:- received message from Bill. they got approval and will go to site on 10/11/10 to collect product samples, gauge wells and remove product from wells. 11/15/10-Hiralkumar Patel. DEC Sangesland received call from Jeremy Heller (917-576-8040) from DEP Hazmat. 12:38 PM:- spoke with Mr. Heller at DEP. Mr. Heller mentioned that they found two drums on sidewalk. as per property owner, those drums were generated by Preferred during investigation work and on-site for past six months. owner is claiming that preferred refused to remove those drums. so property owner wants DEP to remove drums. as drums contains contaminated material, Mr. Heller will going to issue commissioner's order to property owner to dispose these drums properly. 12:41 PM:- spoke with Bill and informed him about drums on sidewalk. he doesn't remember but check with property owner. he also mentioned that they went to site on 10/11/10 for required product sample and product removal. they also gauged all wells (including across the street). no product found in wells across the street. results of fingerprint analysis on both product samples (one from MW-4 and one from MW-7) came back unclusive. product sample from MW-4 (which looks like waste oil) is mixture of fuel oil and unknown diesel range organics. Bill will submit report this week. 12:56 PM:- spoke with Ari Zubli and informed him about drums on sidewalk. 11/29/10-Hiralkumar Patel. 4:24 PM:- received email from Bill including report for fingerprint analysis and VEFRing event. 11/30/10-Hiralkumar Patel. discussed with DEC Austin. Austin asked to check well logs for off-site wells MW-1, MW-2 and MW-3, for any indication of soil contamination near bedrock surface which may be impacting well MW-4. checked files for spill #: 9709152 but could not find logs for wells MW-1, MW-2, MW-3 and MW-4. 12/01/10-Hiralkumar Patel. discussed again with DEC Austin and based on groundwater contamination, case transferred to DEC Vadim. summary: - six 550 gal and one 2000 gal tanks removed - all tanks were 48 inches in diameter - all tanks were closed and filled with water in 1987 - tank #5 (550 gal) was found with two inch hole in bottom, but was holding oil/water when removed - gasoline contamination observed underneath tank #7, contaminated water drained from the base of the excavation into the open hole, strong gasoline odors noticed - final excavation dimentions were 30 ft in length, 24 ft in width and 8.5 ft deep (where bedrock was exposed) - 1,600 ppm PID reading noticed in composite endpoint bottom sample from 550 gal tanks excavation pit - no other endpoint samples were collected due to concrete walls and other structures - no document about removal of associated lines (could be removed lateron by bill board company's contractor) - all tanks were holding liquid when unearthed, it appears that overfills, line leaks and/or surface spills may have contributed to the impact of the subsurface less than ----- - 0.35 ft product found in MW-7 with gasoline-like odor - black thick oil found in MW-4 similar to

waste oil (no record of waste oil tank on the site) 05/03/2012 - Brevdo - Called Ari Zubli and left message representing myself and that I am calling about this project and would like to discuss the status and further course of action. Also called and left similar message to Jill S. Haimson, CGWP, PG Principal PREFERRED ENVIRONMENTAL SERVICES 323 Merrick Avenue North Merrick, New York 11566 Port Authority of NY & NJ, NYS & NYC Certified Women-Owned Business Enterprise www.preferredenv.com TEL: 516- 546-1100 x 32 CELL: 516-647-4211 FAX: 516-213-8156 Brevdo 05/11/2012 - Brevdo - Received a call from Bill Schlagether of Preferred Environmental. In the conversation Bill indicated that unless his client receives some sort of letter or communication from DEC he is unlikely to cooperate. His client asserts that the free product oil is attributable to a taxi stand near the site. I expressed to Bill that site also has gasoline contamination that is coming from the on-site operations. Bill will send me contact information for site owner and himself and I will have to send a letter or s STIP to the owner. If owner does not want to cooperate, DEC may need to go to enforcement. Consulted with Kumar Patel who managed the site before its transfer to petroleum remediation. Kumar agrees that site owner is liable for its own contamination with gasoline. They operated parking lot and auto repair shop which is the nature of business which caused gasoline contamination just like taxi stand nearby. There may be contributing off site factor but site definitely has its own contamination that needs to be addressed. Brevdo 5/11/2012 10:37 AM Mr. Brevdo: My contact information is below and the property owner contact information is as follows: Mr. Ari Zubli 212 695-6262 516 316-9297 We have a mailing address for him @ 2226 Jericho Turnpike Garden City Park, NY 11040 William J. Schlageter Operations Manager/Senior Hydrogeologist PREFERRED ENVIRONMENTAL SERVICES NYS, NYC, PANY/NJ, New York City School Construction Authority-certified WBE 323 Merrick Avenue North Merrick, New York 11566 516 546 1100 fax 516 213 8213 06/12/2012 - Brevdo - e-mail to William J. Schlageter of PREFERRED ENVIRONMENTAL SERVICES, consultant for the Responsible Party: Dear Mr. Schlageter: As you requested, attached are Stipulation Agreement, Corrective Action Plan and Cover Letter for Stipulation Agreement which I mailed today to U&I Realty Inc., 2226 Jericho Turnpike, Garden City Park, NY 11040 Attn.: Mr. Ari Zubli via Certified Mail, Return Receipt Requested. If you have any questions regarding this matter, please contact me at 718-482-4928 or via e-mail. Respectfully, Vadim Brevdo 02/06/2015 - V. Brevdo Received a call from Jason Haith of Langan Engineering. Langan is a consultant for a potential buyer of the property and inquired what needs to be done at the site do close the spill case. Proposed development may be residential or residential /commercial. I explained that there is free product in wells - 0.35 ft product found in MW-7 with gasoline-like odor and black thick oil found in MW-4 similar to waste oil (no record of waste oil tank on the site). Explained that free product and grossly contaminated soil will have to be removed, at minimum. Explained that if they are consultant, they will have to proposed remedial action work plan. Jason asked if I believe investigation is complete. I explained that overall we have idea of nature and extent of contamination, there were several wells installed at the site and from the Department's prospective it is more about remediation than investigation. However, if Langan needs additional investigation in order to propose effective remedy, the Department will be fine with that. I explained that if development is

Remarks: residential, then in addition to product and grossly contaminated soil removal the Department is likely to request for incorporation of engineering controls into the construction plans for the building, such as vapor membrane barrier and Sub Slab Depressurization System or Enhanced Ventilation System. Jason stated that if deal goes through for buying the property, and they are retained as consultant, Langan will contact me. Telephone for Jason Haith is 212-479-5427 or (917) 859 - 4908 (cell). V.B. 02/04/19 - Central office staff sampled all on-site wells on 11/2/18. Based on lab results one on-site well had slight exceedances of fuel oil constituents (MW-8). The site is currently used as a parking lot. Based on the site inspection and sampling results the site is closed not meeting standards. -RJW"

1000382741

complete delineation of soil and groundwater contaminations, submittal of an Investigation Summary Report followed by a Remedial Action Plan. The Department set a deadline of 12/10/04 for signing the Stipulation Agreement. The Stipulation Agreement was signed by Penske on 12/10/04 and implemented by the Department on 12/27/04. -On 12/21/04, Sun sent a letter to Richard Saut of Penske informing him that the Department has approved the Remedial Action Plan (RAP)/HypeAir Work Plan prepared by his Consultant, Groundwater & Environmental Service (GES) for the subject site; specifically two in-situ chemical oxidation events at the site via HypeAir air and Hydrogen peroxide injection system. The Department requires that due to the proximity of existing utility corridors, temperature, pH, pressure, oxidation-redox potential (ORP), conductivity and dissolved oxygen (DO) shall be monitored on all the monitoring wells. Any potential accumulation of vapors during the injection activities shall be avoided. (Sun) 02/21/06: Sun received 4th Quarter 2005 Site Status Update Report. Review of this report is pending. (Sun) 02/27/06: The Department approves the GES s request for two (2) additional injection events to be completed in April and May 2006; specifically two in-situ chemical oxidation (Chem-Ox) events at the above referenced site utilizing a hydrogen peroxide, ozone, and persulfate injection system (HypeAir). (Sun) 07/23/07-Sun: On 07/23/07 the Department approves the GES s request for performing enhanced product recovery through the injection of surfactant into MW-5. The Department also approves a series of high intensity targeted (HIT) remediation events using high vacuum extraction at monitoring wells MW-3, MW-4, and MW-5 to reduce residual hydrocarbons impacts on-site for 8-hour events for approximately four (4) months. (Sun) 08/09/07-Sun: On 7/18/07 Joe Sun of DEC was informed by Kevin Heaphy of Parson Brinckerhoff Americca (PB) that the MTA will be using this site (Lot 60) and the adjacent Fed Ex lot for a mocking pit to build the initial shaft for Tunnel boring machine to be used for the No. 7 subway extension project. In general, the site is slated to be used as a staging area for the project. A meeting was held on 8/9/07 to discuss project among all the key parties, including DEC, MTA, NYCT, Developer, Parson Brinckerhoff (PB), Penske, property owner (Michael Silvermintz)and Penske s consultant, GES. The meeting concluded that PB will first review the GES s investigation and remediation reports and then will discuss with GES and MTA project team to assess if other viable remedial action plans (RAP) can be implemented to expedite the cleanup process. Any new proposed RAP will be submitted to DEC for review and approval. (Sun) 08/23/07-Sun: Sun received 2nd Quarter 2007 Site Status Update Report. Based on laboratory analytical results, a 64% reduction of disslved benzene, toluene, ethylbenze, and total xylenes (BTEX) concentrations has been observed on and off-site since initiating hydrogen peroxide and ozone injections at the site. (sun) 08/30/07: Sun received the following email from Heather Cloud of GES Joe, Penske and GES submitted all historical documents to Kevin Heaphy for his review. He reviewed the documents and we had a follow up call with him and the MTA this past Monday (8/27). During the call, Kevin brought up a suggestion of relocating the wells off-site or installing remote access points in the sidewalk. As discussed at the NYSDEC meeting, we told Kevin that that locating the wells offsite was not an option, and installing remote access points in the sidewalk could not be sufficient for our liquid level measurements and groundwater sampling activities. Additionally, there is a high

MAP FINDINGS

PENSKE TRUCK LEASING CO L P (Continued)

1000382741

pressure gas main in the sidewalk, so we would not be able to drill safely in this area. They did not have any additional suggestions or ideas beyond relocating the wells. (Sun) Since they did not have any additional suggestions, it was decided that GES is going to proceed with our approved work plan. We are actually scheduled to conduct our surfactant injection on September 5 and the high vacuum extraction events on the 6th and 7th. Once we get the data back from the first event, we will evaluate the effectiveness and move forward from there. (Sun) 11/19/07-Sun: Sun received the following email from Heather Cloud of GES, Hi Joe, We conducted the Surfactant Injection at MW-5 on September 5, 2007 followed by a high vacuum extraction event on September 7, 2007 to remove and recover residual product at MW-5. Since conducting the injection event, we have not seen any product at MW-5. Groundwater data at MW-5 prior to the injection (July 3, 2007) was 489 ppb BTEX (144 ppb benzene). Following the injection (October 12, 2007), groundwater data at MW-5 was 87 ppb BTEX (66 ppb benzene). Since the injection event, we have conducted 2 high vacuum extraction events on MW-3 and MW-4. These events were completed in September and October. Between the 2 high vacuum extraction events, we have recovered 5 pounds of mass and 1,300 gallons of water. We were at the site today and are at the site tomorrow to complete our 3rd high vacuum extraction event on MW-3, MW-4, and MW-5. The 3rd QTR Site Status Update Report is currently being reviewed by the client, so you should have it shortly. (Sun) 02/15/08-Sun: DEc received the following email from Andrew Cullen of Penske, All, After much review, we have come to the conclusion that we will make an attempt to meet the requirements of the contractor and complete the necessary remediation work required by the NY DEC on two Saturday's per month. However, I need all the parties to understand that our agreement specifically states we need 2 to 3 days per month to perform the necessary remediation. Limiting us to only two days per month may cause the remedial efforts to go past our original estimates. Moreover, MTA also agreed to reimburse Penske for any premium costs associated with work that must be scheduled outside of normal working hours (i.e. Monday to Friday 8:00am to 5:00pm) . If at any time we find the contractor is not cooperating, our remedial efforts will require more than 2 days per month, or any invoices for premium costs or damage by the contractor are not paid in accordance with our agreement, we will alert the appropriate parties. I do not anticipate this happening, but given the events that have lead us to this point, I feel compelled to remind everyone of the terms and conditions of our agreement. (Sun) 03/04/08-Sun: Sun sent the following email to all the parties involved, Penske may have to conduct remedial efforts more often than 2-3 days a month if project demands. The required frequency and nature of remedial efforts will depend on results of on-going remediation to be received in future. If current extraction method does not produce acceptable (to the NYSDEC) results, DEC reserves its rights to require Penske to undertake more aggressive remedial efforts. NYSDEC is not a party to any of the agreements between Penske and MTA, and reserves all rights under the existing Laws and Regulations. (Sun) 03/25/08-Sun: Sun received the 4th Quarter 2007 Site Status Update Report. (Sun) 07/03/08-Sun: Sun received from Heather Cloud of GES on the current site status: We are currently conducting quarterly groundwater monitoring and sampling. Our next groundwater sampling event is scheduled for this month. - Based upon the recent groundwater data, we are not seeing a reduction in the BTEX concentrations. See

1000382741

attached groundwater analytical tables. Therefore, the high vacuum extraction events don't appear to be overly effective at this time. We are currently evaluating alternate options to address the dissolved phase impacts. We are looking at potentially injecting sodium percarbonate or other potential oxidizers. The total BTEX concentrations are primarily comprised of benzene. We have seen great success in reducing benzene levels with sodium percarbonate at other sites. Also, this type of technology is not intrusive at all. With the MTA project going on, we are limited with the technologies that we can go with. - The 1st QTR QMR is currently being reviewed by Penske. You should have this report within the next week or so. (Sun) 8/4/08 - Carlson: Case reassigned to Carlson. Reviewed 1st Quarterly 2008 report. Wells sampled on 1/3/08. Maximum BTEX concentration 5,425 ppb (MW3), maximum MTBE concentration 64 ppb (MW3). Report notes that VEFR is not effective. Sent letter requiring submission of a new RAP and additional delineation by 9/12/08. 9/11/08 - Carlson: Approved extension to 11/14/08 for submission of a new RAP. Scheduled site visit for 9/25/08 to discuss potential locations for an additional delineation well. 9/30/08 - Carlson: Performed site visit on 9/25/08. Met with Heather Cloud of GES, Richard Saut of Penske, Charles Stives of Liro Engineering, as well as representatives from MTA and NYCT. Five monitoring/remediation wells have been destroyed during recent activities. A location was identified for the installation of an additional monitoring well. RAP due 11/14/08. 10/6/08 - Carlson: Reviewed update report dated 9/23/08. Wells sampled on 4/26/08. Maximum BTEX concentration 3,537 ppb (MW3). They are pilot testing sodium percarbonate. 3/20/09 - Carlson: Reviewed Site Status Report dated 2/25/09. Delineation well discussed during 9/30/08 site visit was not installed. Destroyed wells were not replaced. Sodium percarbonate solution was injected into MW-1, MW-2, and MW-4 on 9/20/08. Wells were sampled on 10/25/08. Decreased concentrations were found in MW1 and MW2, but BTEX increased in MW4. Spoke to Heather Cloud at GES. She will submit workplan. Received Remediation and Delineation Work Plan dated 2/10/09. 4/16/09 - Carlson: Meeting held with Penske. Mark requested the addition of another boring. 4/23/09 - Carlson: Meeting held MTA. Access to most of the site not possible for 1 year because the TBM is in operation. Access to the sidewalk can be arranged. MTA will submit a construction timeline. 5/4/09 - Carlson: Received phone message from Sal McCabe - construction timeline will be submitted. 5/7/09: Received update report. Received email from Christopher Ward - mw5 has been located and will be abandoned (under future muck bin). 5/15/09 - Carlson: Received email. MW5 will be abandoned tomorrow. 7/1/09 - Carlson: Received cc of penske access request to sample wells on 7/25 7/2/09 - Carlson: Paul matthews of mta responded - requested sampling be delayed for one month. 7/2/09 - Carlson: I replied saying one month delay is ok. Construction timeline was not submitted as requested at the last meeting. 7/6/09 - Carlson: Received cc of penske access request to sample wells on 8/22/09. 9/18/09 - Carlson: Left voice message for Chris Ward to followup on case status. 11/5/09 - Carlson: Received cc of letter requesting access from MTA to sampling wells. Left voice message for Chris Ward to see if they were given access - need to get phone number for MTA contact Paul Matthews. 11/10/09 - Carlson: GES received access from MTA to sample wells. 2/12/2010: Received cc of letter from GES to MTA - access requested to sample wells on 2/20/2010. Spoke to Chris Ward. Update report will be submitted. 5/26/2010 - Carlson: Received cc of

access request by GES to MTA to sample wells on 6/12/2010. 6/25/2010 - Carlson: Received cc of access request by GES to MTA to sample wells on 6/12/2010. Left message for MTA Philip McGrade to followup on status of construction. 6/29/10 - Carlson: Spoke to Paul Matthews at MTA (212-616-4462). TBM is still in operation 5 days/wk 24hr/day. No construction on weekends when GES samples wells. Remedial work on Saturdays would be very difficult due to access on site. Project completion scheduled for 2013. 7/27/2010 - Carlson: Meeting held with Penske on 7/27. NYSDEC to organize meeting with MTA to discuss access/remedial plan. 8/24/2010 - Carlson: Meeting held with MTA and Penske on 8/24. Penske to reinstall wells on a weekend. Wells to be covered with roadplates. Contractor will remove roadplates prior to remedial activity at the site. Penske/MTA/NYSDEC to perform site visit to confirm locations of new wells. 9/22/2010 - Carlson: Site meeting held to discuss well installation locations and procedures. GES will prepared updated site plan. 3-11-11. - Breen: Consultant, GES, sent in Site Status Update Report on CD today. Heather Cloud is Operations Manager. Sarken Dressler is the Staff Hydrogeologist. Report for 9610811 is on the same CD. 6/6/12 - Carlson: Reviewed Site Status Update Report dated 4/30/12. Wells sampled on 2/25/12. Wells destroyed in 2008 were not replaced. Max BTEX only 588 in MW-4. Max MTBE only 3 ppb in MW-8. Called MTA Philip McGrade at number in file. Voice mail indicated this is not his number anymore. Left message at this number for help getting status of MTA 7-line extension project at this site. 6/8/12 - Carlson: Left message for Phil McGrade (646 252 8315) to follow up on 7 train extension project. 7/11/12 - Carlson: See new spill 1201147 at site - MTA found a diesel/#2 fuel oil in tank shaft location. Tank was removed. 9/14/12 - Carlson: Reviewed 2nd quarter 2012 update report. Existing wells show low concentrations. Destroyed wells were never replaced. Continue to followup on status of 1201147. Need to contact MTA to get status of MTA project. 11/19/12 - Carlson: Spoke to Paul Matthews at MTA - he isn't involved in project anymore. New contact is Steve Asquith 646-252-8326. Left message for Steve Asquith. 11/26/12 - Carlson: Spoke to Steve Asquith (917-217-4765). He is arranging access with Penske/GES. Send him my email address, he will cc me on correspondence with penske/GES; 11/27/12 - Carlson: Emailed Steve Asquith (sasquith@mtacc.info) - please cc me on correspondence with Penske/GES as discussed during yesterdays phone conversation. 12/11/12 - Carlson: Site meeting with Healthier Cloud (GES) and Dave Mariani (Skanska). Well locations were marked out. Wells will be installed in January. 9/17/2013 - Carlson: Received FOIL request from Michael Silvermintz (michaelsilvermintz@gmail.com, 646-831-1443). Forwarded to DEC Silva for processing. 9/23/13 - Carlson: Received phone call from Steve Cambruschini - new owner will purchase this property and redevelop. They intend to sign a new stip. They plan on excavating impacted soil. He will email me for a FOIL request of file. Need to get contact info of new owner to send new stip. 10/10/13: received phone call from Christopher McMahon requesting FOIL review. Sent email to email Gloria Silva for FOIL review. Also, I requested he send me contact info for new owner so I can send new stipulation agreement. 10/28/2013 - Carlson: Reviewed 3rd Quarter 2013 Site Status Report. Monitoring wells gauged and sampled on 9/28/2013. Sheen (0.04ft) in MW-3R. Maximum BTEX concentration 1,410 ppb (MW-3R). 10/29/2013 - Carlson: Issued new Stipulation Agreement to 293 Tenth Ave. Corp, c/o Michael Silvermintz. Signed Stip due by 11/12/2013. RAWP due 30 days after effective date of the Stipulation.

PENSKE TRUCK LEASING CO L P (Continued)

1000382741

2/21/14 - Carlson: Reviewed RAWP dated January 2014. Site to be excavation, dewatered, and redeveloped. Site will be excavated in former tank area to 11 ft below grade (4 ft below gw table). Excavation will be dewatered in order to extend below groundwater table. Hotspots encountered will be overexcavated, to the extent feasible. Two downgradient wells will be reinstalled in southern portion of property that will not contain a basement. Endpoint samples will be collected as per DER-10. Issued approval letter.

3/31/14 - Raphael Ketani. As of today, I am taking over case management from Ms. Carlson. The contact person is Chris McMahon at Langan Engineering, River Drive Center 1, 619 River Drive, Elmwood, NJ, 07407, (201) 794-6900. The proposed development of the site is as a 7 story combined commercial and office building. 4/9/14 - Raphael Ketani. I made an unannounced site visit. The site contained triple stacked office trailers on the West 26th Street side of the site. Standing from the outside, I could see that there was a lot of activity and equipment on site from the MTA construction next door for the 7 Train tunnel construction. So, I didn't enter the bounds of the site. However, I did take pictures of the site from the outside. I could see that workers were still finishing the brick work outside the MTA building that had been constructed above the tunnel shaft.

4/10/14 - Raphael Ketani. I tried to contact Steve Asquith (917) 217-4765 of the MTA to let him know that I was the new DEC project manager, but I could only leave a message. Later, I contacted Mr. McMahon (201) 794-6900. He told me that the MTA plans to be done with their work and off of the site by the second week in May 2014. Mr. McMahon added that the new owner intended to first demolish the former Fed Ex building that is adjacent to the east of the site during July 2014. Excavation of the entire site will take place to 14 feet below grade. Endpoint samples will be taken as per the plan included in the approved RAWP. I told Mr. McMahon that Langan should follow the soil contamination as much as possible before taking endpoint samples. This way, the samples will be low or non-detect with regard to any analytes and the whole process will go smoothly. Mr. McMahon stated that groundwater was about 8 or 9 feet below grade and asked about sampling the groundwater after the MTA leaves. I told him that this wont be necessary as Langan will dig out all of the contamination below the water table. Mr. McMahon stated that the beginning of redevelopment is planned for either September or October of 2014. I asked Mr. McMahon to send me the endpoint sampling map with a cover letter describing what will take place regarding the endpoint sampling and sample processing. I added that, later, the DEC will need the letter of acceptance from the facility that will receive the soil. Also, I stated, the DEC will need a letter from the facility that will accept the contaminated water that is collected. Mr. McMahon stated that once they know where everything will go, then he will send these letters. After this point, I said, the DEC will need a schedule describing the excavating, endpoint sampling, sample processing, foundation construction and so forth. Mr. McMahon said that he will send this to the DEC. At the end of our conversation, Mr. McMahon asked about the request by the owner for a change in the Stipulation Agreement whereby Penske is let off of the hook. I told Mr. McMahon that this is something Lou Oliva, Region 2 Chief Counsel, will have to work out with Penske. With that, the conversation ended. Mr. Asquith (917) 217-4765 called me back. He said that Skanska, the construction company building the ventilation shaft, is presently cleaning up the site. They told him that they expect to be off of the

PENSKE TRUCK LEASING CO L P (Continued)

1000382741

site by the end of April 2014. 5/2/14 - Raphael Ketani. I reviewed the First Quarter 2014 Site Status Update Report dated 4/29/14 that was submitted by GES. Groundwater sampling took place on 3/15/14 for wells MW-1, MW-2, MW-3R, MW-4, MW-6 to MW-8 and MW-10. MW-9R was not sampled as MTA equipment was over it. There was 0.02' of product in MW-3R. All of the analyses were for just BTEX. MW-1 had results from non-detect to just above the TOGS 1.1.1 standards. MW-3R had the results 660 ppb total xylenes, 913 ppb ethylbenzene, 95.5 ppb benzene, 13.1 ppb toluene. MW-4 results were 237 ppb ethylbenzene, 215 ppb benzene, 18.4 total xylenes, 10.7 ppb toluene. MW-10 had 2 non-detects and 2 very low hits. For MW-2, MW-6 to MW-8, the results were either entirely non-detect or mostly non-detect with one very low hit. MTBE varied in concentration from mostly non-detect to 8.98 ppb. Quarterly sampling is planned for June 2014. 5/19/14 - Raphael Ketani. Today I received a copy of the signed Stipulation Agreement from 293 Tenth Avenue Corporation. It was signed by Michael Silvermintz, President of the corporation, on 5/2/14. I hand delivered the Stip to the Region 2 legal division. According to the schedule in the approved Remedial Action Work Plan dated 1/24/14, the remedial activities are anticipated to take 4 months beginning in October 2014. Later, I was informed that the DEC needed the original signature page in order to make the executed Stipulation Agreement. I contacted Mr. McMahon (201) 794-6900 and asked him to have his client send the original signature page with Mr. Silvermintz' original signature as soon as possible by regular mail. Mr. McMahon agreed to do this. 6/13/14 - Raphael Ketani. The Stipulation Agreement with the original signature of the president of 293 Tenth Avenue Corporation, Mr. Silvermintz, was given to me today. 6/17/14 - Raphael Ketani. The Stipulation Agreement was submitted to the Region 2 legal division for processing. 6/23/14 - Raphael Ketani. The Stipulation Agreement was signed by Venetia Lannon, Region 2 Director, and the original was sent to Mr. Silvermintz. 8/1/14 - Raphael Ketani. I reviewed the second quarter 2014 groundwater monitoring report for the site. The document was titled Site Status Update Report and dated 7/31/14. On 6/21/14, groundwater sampling took place at 6 onsite wells. Groundwater elevations were from 6.04' bgs at MW-8 to 6.71' bgs at MW-6. Flow was to the south. The wells sampled were MW-1, 2, 4, 6, 7 and 8. Wells MW-3R, 9R and 10 were inaccessible at the time. Well MW-5 had been abandoned some time ago. The VOC results for wells MW-1, 2, 6 and 7 were entirely non-detect for BTEX and MTBE. The sample from MW-8 had hits just above and just below the TOGS 1.1.1 standards. The results for MW-4 had 260 ppb of benzene and 424 ppb of ethylbenzene. In addition, a sample was taken from IW-2R on 3/21/13 and had 3530 ppb of benzene. Why this well was not sampled again was not explained. The contamination in the groundwater at MW-4 needs to be addressed. IW-2R needs to be sampled again. Also, wells MW-3R, 9R and 10 need to be made available for sampling, given that their loss is significant as there are not many wells for sampling. Additionally, I checked the property database ACRIS for the current ownership information. The property is still owned by 293 Tenth Avenue Corporation at 5 Rosewood Lane, Wesley Hills, NY, 10901. The property block and lot are 697 and 56. There is a UCC1 with 540 West 26th Street Property Debt Investors IIA, LLC at 10 East 53rd Street, 37th Floor, NY, NY, 10022. 8/4/14 - Raphael Ketani. A letter was sent today to Mr. Silvermintz of 293 10th Avenue Corporation. In the letter, I stated that the work plan was overdue and that 293 10th Ave was in violation of the Stip. I added that if the work plan is not

PENSKE TRUCK LEASING CO L P (Continued)

1000382741

received by August 22, 2014, then the Department will take legal action. 8/28/14 - Raphael Ketani. Mr. McMahon (201) 794-6900/cell (201) 218-2339 had called and left a message that he wanted to talk to me about the site. I tried to return his call, but could only leave a voice message. 9/8/14 - Raphael Ketani. I spoke to Mr. McMahon (201) 794-6900/cell (201) 218-2339 today about future monitoring work at the site. He said that, right now, the owner is having trouble with the tenant of the building on the other lot. He refuses to move. So, the excavating has been pushed back to March 2015. Mr. McMahon stated that the MTA had destroyed all but two wells on the truck leasing site. He proposed that groundwater sampling be stopped as all of the contamination will be removed by the excavating. The excavating will include the areas of MW-2 and IW-2R, the two most contaminated locations. I asked Mr. McMahon whether end point samples will be taken. He said that the sides of the pit and the bottom will be sampled as per the guidance in the DEC regulations. I told him that the DEC will need manifests for all of the material that is removed. He said that we will get copies of every manifest. I told Mr. McMahon that this will be the approved plan of action for the foreseeable future. With that, the conversation ended. Later, Mr. McMahon sent me an e-mail clarifying and memorializing the excavation plan in more detail. He included 3 figures with the e-mail. 7/9/15 - Raphael Ketani. As I hadn't received any information about the spill case in some time from Mr. McMahon, I sent him an email requesting an update. Mr. McMahon sent a response email today: Progress at the site has been advancing; however, our schedule may have been a bit aggressive when we last spoke. The existing building demolition is nearing completion and we are working with the NYC TA to clear up a couple of issues regarding the building plans and the influence with their neighboring building and subway tunnel. Those issues are supposed to be resolved within the next two weeks and the site will pull their building and start construction immediately thereafter. I actually had put it in my mind to give you a heads up today or tomorrow that construction was going to begin shortly to give you a little advance notice if you were interested in visiting during construction/remediation. My client is VERY eager to start the project and has already signed a lease for 80% of the building that carries very heavy penalties for not meeting certain deadlines that are driving the project forward at this point. I am certain that barring further issues with TA that we will be mobilizing to the site within weeks. 7/10/15 - Raphael Ketani. I responded today by email to Mr. McMahon [(201) 398-4535/cell (201) 218-2339/cmcmahon@langan.com] and stated that the Department requires a report showing the work that had taken place to demolish the building, copies of all manifests for all materials that are removed from the site, copies of manifests for asbestos and asbestos contaminated material disposal - the receiving facility must be permitted for asbestos and the Department needs a copy of this permit, pictures of the demolition and excavation work, end point sample results, groundwater grab sample results (if any samples are taken), manifests for all liquids, contaminated soil and clean soil removed from the site and maps showing where the end point samples were taken. 8/20/15 - Raphael Ketani. Mr. McMahon (201) 398-4535/cell (201) 218-2339 had called and left a message yesterday and I returned his call today. He stated that preliminary construction had begun at the site. However, he stated that the building that was going to be demolished was not on or part of the spill site. It was on an

EPA ID Number

PENSKE TRUCK LEASING CO L P (Continued)

1000382741

adjacent property. I told him that, in this situation, he didn't need to send the Department any manifests or information regarding the demolition. He added that the groundwater would be prevented from entering the site by the construction of a barrier wall around where the basement would be. A machine would be used which would auger down 10 feet below grade. The auger will have holes in it. Once the auger reaches the target depth, then concrete will be pumped down the auger and the auger withdrawn. This will leave a column of concrete. Mr. McMahon mentioned that this would be like creating a secant pile wall, except that there would be more soil left between the piles. They would auger all around the proposed basement area. Any contaminated soil and groundwater will be collected and sent to appropriate disposal sites which heat the materials as a means of disposal. I told Mr. McMahon that this sounded alright to the Department. 12/1/15 - Raphael Ketani. Melissa Ng, Senior Staff Engineer from Langan (212) 479-5490/mng@langan.com sent Ryan Piper of the Spills Unit an email requesting information regarding the site as she was writing a Phase I for another site nearby. I sent her a copy of the case notes. 12/2/15 - Raphael Ketani. Ms. Ng contacted me directly by email and requested the 1/29/14 Remedial Action Work Plan for the site. I sent her the plan. 12/11/15 - Raphael Ketani. As there have been no updates since 8/20/15, I sent an email to Mr. McMahon [(201) 398-4535/cell (201) 218-2339/cmcmahon@langan.com] requesting information regarding the demolition of the building and the excavating of the site. 6/23/16 - Raphael Ketani. As there have been no reports submitted or progress updates, I sent an email to Mr. McMahon requesting an update, soil and groundwater analytical data, disposal manifests and pictures. Mr. McMahon responded to my email. He stated the following: The majority of the material at the site has been removed in conjunction with the remedial efforts at the site associated with the foundation construction. To date, we have collected 29 post-excavation soil samples and have a single sample that remains to be collected. Of the 29 samples, we have results for 27 of them. Based on a preliminary review of the results, there have been no exceedances of the CP-51 criteria. As of today, trucking is still occurring occasionally at the site. All petroleum impacted material has been shipped to the Bayshore facility in Keasby, NJ for treatment. We have yet to receive the manifests from the foundation contractor, but they were requested last week. I anticipate that it will take a few weeks to compile them. I have provided a link below for you to access recent pictures (6/17/16) of the site and I'd be happy to speak with you regarding the project. <http://clients.langan.com/lph/default.aspx?postTransaction=1231963216> Mr. McMahon [(973) 560-4861/cmcmahon@langan.com] included a list of 15 pictures which were available at the internet link. Two pictures, 6801 and 6804, showed cylindrical objects sticking up in groups of 3 or 5 with some showing rebar sticking out of them. I sent an email to Mr. McMahon asking him what these structures were. He replied by email that they are concrete and steel filled caissons, which are drilled foundation elements that provide support to the building, several dozen were installed as part of the building foundation construction. The purpose of the picture is to show the waterproofing going beneath the pile caps and grade beams at the site. 9/19/2016 - Colton McPartland. Scanned paper file for DEC Raphael Ketani and placed on computer desktop for future bulk upload once naming convention is received from DEC Jane Obrecht. 9/22/16 - Raphael Ketani. I spoke to Mr. McMahon today by phone. He stated that the

PENSKE TRUCK LEASING CO L P (Continued)

1000382741

foundation has been constructed. Twenty three thousand cubic yards of soil was removed. The contaminated soil was taken to Bayshore for burning and recycling. Thirty post-excavation soil samples were taken. The results were non-detect for VOCs with only a small number of SVOCs. The last groundwater sample was completely non-detect. Samples taken from the dewatering system were clean. Another groundwater sample will be collected very soon. Two 550 gallon tanks were removed and will be registered. Two wells will be installed outside the foundation footprint. A private school will be constructed in the lower part of the building. 2/27/17 - Raphael Ketani. As no communications nor reports had been received in many months regarding the remediation of the site, I sent an email to Mr. McMahon [(973) 560-4861/cmcMahon@langan.com] requesting the documents. A due date of 3/17/17 was set for the submission of the remediation report and the PBS registration. 4/12/17 - Raphael Ketani. I sent an email to Mr. McMahon informing him that the reports were overdue and requesting their immediate submission. Mr. McMahon called me today regarding my email today. He stated that the report was delayed because they wanted to collect a second round of groundwater samples. They did collect the samples and found that one sample had 230 ppb of benzene. So he will recommend quarterly sampling to the client. He added that he had most of the documentation for the report and that it is in draft form right now. I asked him when the DEC might receive the report. He stated that he believed Langan could send it by the end of next week. With that, the conversation ended. 6/16/17 - Raphael Ketani. As the analytical results report was never sent, I sent an email to Mr. McMahon stating that 293 Tenth Avenue Corporation was in violation of the Stipulation Agreement. I added that we required the submission of the report by June 30th, 2016 or else fines and legal action can and may be taken. 6/21/17 - Raphael Ketani. Mr. McMahon (973) 560-4900 called to apologize for not sending the analytical results report. He said that the DEC will receive the report next week. He added that the latest groundwater sample was taken on 6/6/17 from the one remaining well which is outside the secant/foundation wall. He sent me an email with the VOC and SVOC analytical results table. All of the analytical results had decreased significantly, except for benzene. It was 230 ppb in the previous sample and was now 240 ppb in the current sample. He said that he didn't understand why only benzene remained high. He added that the earlier low analytical results for benzene were due to groundwater being pumped from the site. The pumping system was turned off during late 2016 and after this the benzene concentration rose. I told Mr. McMahon that, as a result of the cessation of pumping, the water table at the well may have also risen into some more contaminated soil and, thus, more oil dissolved in the groundwater. However, I could not explain why benzene would be affected, but not the other analytes. Mr. McMahon stated that the well will be sampled 3 months from now in order to see what the long term concentration trend is. I told him that would be fine. With this, the conversation ended. 6/30/17 - Raphael Ketani. I reviewed the Langan Engineers June 2017 DRAFT Remedial Action Report. The site will be developed by constructing a 7 story tall building which will house various facilities, including a multifloor private school. Six USTs containing gasoline and diesel were removed from the site. As a deep foundation was required for the building, a deep pit was dug which included removing 219 tons of petroleum contaminated soil. Initially, a groundwater monitoring well array was installed and elevated

PENSKE TRUCK LEASING CO L P (Continued)

1000382741

concentrations of various analytes were detected in the samples. Site investigations took place during 2002, 2003 and 2004. Wells MW-1 to MW-10 were installed both on and off site. Vacuum extraction events and LNAPL recovery took place. This resulted in the collection of 174.63 gallons of product. Injection wells IW-1 to IW-4 were installed during December 2004. Hydrogen peroxide, ozone, sodium persulfate, sodium percarbonate and surfactant were injected from 2005 to 2008. The vacuum events were completed during 2007 and 2008 and recovered 4,827 gallons of oil contaminated groundwater. Also, 8.80 lbs. of product were collected in the vapor phase. Quarterly monitoring took place from October 2003 to March 2013. During March 2013, 12 wells were sampled. About 0.01 feet of product was found in MW-3R. BTEX was present in all of the on site water samples and in the off site sample from MW-8. LNAPL thickness varied from 0.01 feet to 0.18 feet and historically appeared in MW-1, MW-4 and MW-5 during monitoring events which took place from 2004 to 2006. The site was remediated in accordance with the January 2014 RAP. Soil and fill were excavated to 11 feet below grade. A total of 364 tons of non-hazardous soil and fill and 11,378 tons of petroleum contaminated soil and fill were removed. The materials were sent to Capital Development in Bangor, Pennsylvania and Bayshore Soil Management in Keasbey, New Jersey. Grace Preprufe 300R, Grace Preprufe 160R and Grace Bituthene 4000 vapor barrier sheeting with a minimum thickness of 20 mil was installed as part of the foundation construction. Grace Preprufe 300R vapor barrier with a thickness of 46 mil was installed beneath the cellar slab, elevator pit slab, first floor slab and on the interior of the elevator pit sidewalls. Grace Preprufe 4000 vapor barrier with a thickness of 62 mil was installed on the exterior elevator pit sidewalls. Grace Preprufe 160R vapor barrier with a thickness of 32 mil was installed on the exterior of the western foundation sidewall and Grace Bituthene 4000 vapor barrier with a thickness of 62 mil was installed on the exterior of the northern, eastern and southern foundation sidewalls. A Health and Safety Plan (HASP), Community Air Monitoring Plan (CAMP), Soil Materials Management Plan (SMMP), Stormwater Pollution Prevention Plan (SPPP) and groundwater dewatering were conducted during the remediation of the site. Utilities and easements were located prior to any invasive work. Excavated soil and fill were screened for contamination. Suspect contaminated soil was stockpiled on site and covered prior to delivery to the disposal facilities. Each dirt hauling truck was inspected for contaminated soil on the undercarriage and tires prior to leaving the site. If contaminated material was present, then it was removed before the truck entered the street. The USTs were encountered at about 7.5 feet below grade in the eastern part of the site. They were 42 inches in diameter and 87 inches long. AARCO removed the two 550 gallon gasoline USTs on 9/26/15. About 630 gallons of mixed liquid was collected and disposed of at Tyree Services Corp. in Farmingdale, NY. Residual sludge and water was drummed and taken to Triumvirate Environmental in Astoria, Queens. The USTs were cleaned and cut up and sent to TNT Scrap in Brooklyn, NY. Thirty soil end point samples (PE-1 to PE-30) were taken from the sidewalls and the bottom of the tank graves from 3/31/16 to 6/28/16. The samples were sent to York Analytical Labs for processing via methods 8260B and 8270C. The analytical results were compared to the CP-51 standards. Five groundwater dewatering samples were collected before treatment from 6/22/16 to 8/11/16 and sent to the lab. The samples were processed via methods 8260B and 8270C. On 7/27/16, two

1000382741

permanent monitoring wells were installed (LMW-1 and LMW-2) to the south of the southern cellar foundation and soilcrete walls. The borings were drilled to 15 and 16 feet below the ground surface. Each well was constructed with a 10 foot long 10 slot screen. Post remediation monitoring was conducted using 5 onsite wells. Wells MW-6 to MW-8 were situated upgradient and across West 26th Street from the site. LMW-1 and LMW-2 were sampled on 8/11/16, 3/16/17 and 6/6/17. MW-6 to MW-8 were sampled on 6/1/17. Table 1 indicated that the results for the PE series of soil end point samples were almost entirely non-detect for VOCs and SVOCs. Table 2 showed that the influent water sample results for Discharge 1, 2 and 5 were almost entirely non-detect for VOCs and SVOCs. The results for Discharge 3 and 4 were more limited, but still showed that there were no detections. The groundwater sample results for LMW-1, LMW-2, and MW-6 to MW-8 were displayed in Table 3. LMW-1 had consistent very low to high (max. 240 ppb) analyte exceedences, but, with the exception of a sample from LMW-2 (3/16/17) and one from MW-8 (6/1/17), the VOC results for the other samples and the SVOC results for all of the samples were almost entirely non-detect. 7/6/17 - Raphael Ketani. I reviewed the Langan Engineers FINAL Remedial Action Report dated 7/5/17. The contents of the FINAL report appeared to be the same as in the DRAFT report. I approved the report without comment. 10/25/17 - Raphael Ketani. I sent an email to Mr. McMahon [(973) 560-4861/cmcmahon@langan.com requesting the latest groundwater analytical data. 12/8/17 - Raphael Ketani. I sent an email to Mr. McMahon requesting the latest groundwater data. 12/14/17 - Raphael Ketani. Mr. McMahon sent me the 12/5/17 and 12/6/17 groundwater sample analytical data for the site. Samples were taken from MW-1, MW-2, MW-6, MW-7 and MW-8. Locations MW-6 to MW-8 were upgradient and across the street to the north. MW-2 was in the southwestern quarter of the site. MW-1 was in the southeastern quarter of the site, but almost in the center of the site. The VOC exceedences for the samples from MW-2 and MW-6 to MW-8 were either none or no more than 19.2 ppb. However, the MW-1 12/5/17 sample had 10 VOC exceedences. Most of the exceedences varied from 6.3 ppb to 73.1 ppb, but benzene was 238 ppb. Mr. McMahon called me on the phone and we discussed the results. We agreed that the benzene result for MW-1 stood out. I commented that it was too high to close the case with. We looked at the historical trend for benzene from MW-1. The decreasing trend was noted. I asked Mr. McMahon whether any treatment solutions has been injected into MW-1. He stated that Langan had not done this. I told him that the Department will require that another round of groundwater sampling take place in order to see whether the decreasing trend continues and whether the benzene concentration has decreased further. He agreed to do more sampling. I also asked him to include a Kendall-Mann trend graph in the next monitoring report. With that, the conversation ended. 3/28/18 - Raphael Ketani. Yesterday, I received Table 1 and Figure 2 for the March 2018 groundwater sampling results. The samples were collected on 3/6/18 and 3/9/18. The VOC results were almost entirely non-detect for the samples from LMW-2 and LMW-6 to LMW-8. Though most of the VOC results for the sample from MW-1 were non-detect, there were still 9 exceedences of the TOGS 1.1.1 standards. The highest exceedences were for total xylenes at 63.7 ppb and benzene at 228 ppb. However, with both analytes, a decreasing concentration trend continued to be present. The SVOC results for all of the samples were almost entirely non-detect.

Remarks: ----- I reviewed the case file. The information in the case file described the removal of 6 USTs and many tons of oil contaminated soil in the process of digging out the site for a deep foundation. Chemical treatments to remove additional contamination also took place at various times in the past. Based upon this information and the decreasing concentration trends which were evident from the latest versions of Table 1 and Figure 2, I determined that the gross contamination had been removed. Any residual contamination would not be a threat to the public or the environment. Therefore, I closed the spill case effective today and sent a spill closure letter to Peter Rosenthal and Eric DeSimone of Savanna at 430 Park Avenue, 12th Floor, NY, NY, 10022, Mr. McMahon (cmcmahon@langan.com) and Steven Ciambuschini of Langan. "CALLER RESPONDED TO ABOVE LOCATION TO REMOVE FUEL TANKS. UPON REMOVAL SOME SOIL CONTAMINATION DISCOVERED. TANKS REMOVED AND SOIL EXCAVATION IN PROGRESS. NO CALL BACK REQUESTED."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "10/8/09 - Raphael Ketani. Two gallons of diesel fuel were discovered today in a sump for a tank at the Kings Bridge Depot, 465 10th Avenue in Manhattan. I spoke to Christina Ryszewski (646) 252-5777 regarding the spill. She said that the oil leaked from a tank. She didn't know which tank, but that it was now put out of service. She said that the cleanup crew was on their way. She said that I can contact Josephine Brown (718) 566-3415 for more information. I sent a CSL to: Office of System Safety, Environmental Remediation Section, NYC Transit, 2 Broadway, 27th Floor, NY, 10004. 10/9/09 - Raphael Ketani. Ms. Brown called me today. She said that the oil in the sump for the suction pipe was cleaned up. It was put in the waste oil tank. The secondary was tested and passed. A company is coming to evaluate the subject tank, which is out of service. 6/24/11- DEC Piper recieved and reviewed repair documentation and passing tighness test for the line. Based on work to date, this spill is closed. "
Remarks: "SPILL CONTAINED TO THE SUMP OF THE TANK."

DEC Memo: "Site is a 40ft x 100ft x very deep shaft used in the construction of the #7 subway extension on the corner of 11th Ave and West 26th St. Site had a building on it which was leveled several months ago. Now, a different contractor is dealing with buried utilities and structures and discovered a buried vault which housed an oil storage tank. Tank had been damaged and contractor has pumped it out, cleaned the tank, removed the tank and is now dealing with some contamination in the former vault area. They also had a problem with a minor mercury spill (1 oz) that came out of a pipe in the vault area. The whole thing is being excavated and will have end point samples taken. Mercury area was very small and that area will also be over excavated to ensure the mercury is fully removed.
05/09/12-Hiralkumar Patel. 2:28 PM:- received call from Nick from Skanska Railworks. they are working next to a 40 ft wide shaft. as part of the work, they have to install metal box piling to bedrock, next to the shaft on south side. during work, they discovered a diesel tank at 4 ft bg. they pumped out about 150 gal oil from the tank. the tank was sitting on a concrete pad. found sand underneath the concrete pad and then groundwater at 7 ft depth (right under the sand). they removed tank, concrete pad and sand. no PID readings were recorded in sand, but found layer of product on water table. the southern sidewall of the tank excavation is the concrete shaft wall and the northern sidewall was the former building's brick foundation wall. they removed the brick wall and remove some soil also towards north. excavation was extended to clean soil on the east side, but could not remove all contamination from the western sidewall due to a dewatering system in that area. asked Nick to collect endpoint sidewall samples from north, east and west sides. also asked to collect product sample for fingerprint analysis. Nick mentioned that as part of the project, they have to dewater the excavation and remove soil to bedrock. so all soil contamination at the former tank location area will be removed. the current tank excavation is about 5 ft wide, 10-12 ft long and 7 ft deep (to groundwater). he mentioned that the subject site was a former penske truck rental. during conversation, Nick mentioned about open spill number (9801954) at nearby building and suspects that could be the source for contamination in groundwater. informed Nick that owner of the subject site has to conduct investigation to prove any off-site impact. asked him to provide site owner's information (MTA or private

party?). Nick Bishop Skanska USA Civil Northeast Environmental Health & Safety Ph. (718) 340-0735 (O) (917) 560-2869 (C) Fax (718) 340-0701 email: nicholas.bishop@skanska.com 3:24 PM:- sent email to Nick. asked him to collect endpoint sidewall soil samples, product sample for fingerprint analysis and removal of product from the excavation. also asked him to submit site address and property owner's contact info. email copied to Lew Wunderlich at MTA. 05/14/12-Hiralkumar Patel. 3:46 PM:- received email from Nick. they pump out impacted water from the excavation. he mentioned that analytical identified the free phase product to be diesel. they over-excavated the area and took endpoint samples from north, west and east sidewalls. 05/15/12-Hiralkumar Patel. 1:42 PM:- received email from Mary Coletti, project administrator for Coastal Environmental Group. she asked for analytical parameters needed for endpoint samples. Mary E. Coletti Project Administrator Coastal Environmental Group, Inc. Ph. (631) 234-4100 Ext. 3562 Fax (631) 234-4160 email: mcoletti@coastalgrp.net 05/18/12-Hiralkumar Patel. 10:07 AM:- received call from Nick. he asked about analytical methods. asked him to analyze endpoint samples for 8260/8270 parameters. he mentioned that they haven't installed any piling yet and the excavation is still open. asked him to check excavation hole as water might have recharged in it. asked him to check for thickness of product, if any. 05/21/12-Hiralkumar Patel. 2:57 PM:- received call from Nick. he mentioned that very little amount of oil seeped into excavation. they are waiting for endpoint sample results. he mentioned that there was some monitoring wells on the property. he does not know the purpose of those wells. he also mentioned that he received email last week about couple of wells needs to be installed in area where they work. he does not remember all the details. asked him to submit information about owner of the subject property. Nick mentioned that as per tank closing affidavit, address for the subject site is 220 11th Ave. alternate addresses: 220-240 11th Ave, 557-559 W 25th Street, 562-564 W 26th St no PBS record for the site. other spills: 1010587. spill reported due to release of 250 gal Meyco Accelerator, chemical used for subway construction. case closed. 05/23/12-Hiralkumar Patel. 2:16 PM:- received email from Nick including property owner's contact info. 220 Eleventh LLC c/o The Moinian Group 530 Fifth Avenue, Suite 1800 New York, NY 10036 Attn.: Oskar Brecher Ph. (212) 808-4000 Ext. 237 Fax (212) 808-4114 email: oskar@moiniangroup.com 05/24/12-Hiralkumar Patel. 9:36 AM:- received call from Nick. he asked permission to backfill the excavation so they can install piling for their project. as contaminated soil from the work area has been removed, approved his request. informed him that the department may require additional investigation/cleanup, by the RP, based upon review of the sample results, once available. 9:38 AM:- sent email to Nick approving his request to backfill the excavation. 06/08/12-Hiralkumar Patel. DEC Sarah came to discuss the spill. she mentioned that the subject spill area is the part of former Penske operation and contamination found in the corner of the property could be the result of old spill on-site. 1:15 PM:- received call from Rose-May from MTA. she will send results of soil and groundwater samples and a PBS application for registration of diesel tank found during work. Rose-May Toussaint-Portes MTACC/NYCT Sustainability and Environmental Management Ph. (646) 252-3291 email: rose-may.toussaint-portes@nyct.com 06/11/12-Hiralkumar Patel. 2:06 PM:- received email from Rose-May including a PBS application. it was unsigned application. 2:21 PM:- received email from Rose-May

including a tank update. abstract: - spill in northwest corner of Site A, adjacent to shaft - found a 550 gal diesel UST - about 160 gal diesel was in the tank - Coastal Environmental removed tank from the ground - found petroleum product in the excavation after removing tank - concrete pad underneath the contaminated soil - Coastal removed concrete pad and sand under the pad - continued to follow the contamination both in an eastward and westward direction - the north side of the excavation was brick and the south side of the excavation was the concrete collar from the shaft - product found to be #2 fuel oil - excavation is about 8 ft wide by 20 ft long and about 7 ft deep - collected total four samples on 05/08/12: two samples from waste pile, 1 sample from drum #1 and 1 sample from drum #2 - collected total four samples on 05/10/12: two water samples and two soil samples - collected total four samples on 05/11/12: 1 sample from west sidewall, 1 sample from east sidewall, 1 sample from north sidewall and 1 sample from bottom - some SVOCs and minor VOCs found in sidewall and bottom samples collected on 05/11/12

06/12/12-Hiralkumar Patel. 1:56 PM:- spoke with Rose-May. asked her about results of groundwater samples for VOC and SVOC analyses, if done. she will check with the contractor. 3:18 PM:- left message for Nick. discussed with DEC Austin. he asked to check with DEC Sarah. if contamination found is the part of larger plume, which is under remediation, then case can be closed and referred to old spill # 9801954. otherwise, case needs to be investigated separately.

06/13/12-Hiralkumar Patel. 12:11 AM:- received call from Nick. he mentioned that the area where tank was found has been backfilled to facilitate equipments needed for other work. he mentioned that if the required work was not completed then the tank area will be re-opened in future. 12:36 PM:- sent email to Rose-May and asked her to submit signed PBS application to PBS unit. 06/15/12-Hiralkumar Patel. discussed with DEC Austin and DEC Sarah. Sarah mentioned that several monitoring wells, installed by Penseke, have been destroyed during MTA's work on-site. she will check historical records to see if the diesel plume extended towards the intersection of 11th Ave and 26th Street. Austin mentioned that as a new tank was discovered during work, it is property owner's responsibility to investigate further. Austin asked to find out about dewatering in the area, as part of MTA work. Austin asked to investigate the subject spill separate from the former remediation project (spill #: 9801954). he mentioned that once the monitoring well installed at the site and based on findings in the well (free product/dissolved contamination) and with site-specific groundwater flow direction (which has been defined by Penseke as part of on-going remediation), case can be transferred to remediation group. 10:59 AM:- left message for Nick. 11:06 AM:- left message for Oskar Brecher, property owner/manager. 11:08 AM:- left message for Rose-May inquiring about person-in-charge for MTA's work at the site. 06/18/12-Hiralkumar Patel. 10:25 AM:- received message from Rose-May. she asked to contact Jimmy Ho, construction manager from MTA. Jimmy Ho Construction Manager MTA Ph. (646) 252-8345 (O) (646) 201-1847 (C) email: jho@mtacc.info 10:55 AM:- left message for Mr. Brecher. 11:53 AM:- received call from Mr. Brecher. informed him about the spill report. informed him that the department requires further investigation in the area. he mentioned that MTA has a lease till end of Aug. 2014. 06/19/12-Hiralkumar Patel. 12:39 PM:- received message from Rose-May. 12:44 PM:- left message for Rose-May. 12:46 PM:- spoke with Mr. Ho. he mentioned that they are pumping groundwater from the bottom of the shaft, into city sewer system.

S110751595

asked Mr. Ho to schedule a site visit. 3:15 PM:- visited site. met Rose-May, Nick and Jorge Guerrero. Nick showed location of the shaft and former diesel tank. Nick mentioned that tank was found during excavation for installation of caisson (concrete/metal pile on which the future building will be supported) at C-4 location which is on north side of the shaft. Nick mentioned that the tank was found on west of the caisson location. caisson has been installed which is from 3 ft bg to 50 ft bg and is 48 inch in diameter. bedrock is found at 30 ft bg. currently, there is a frac tank along the south side of W 26th street, north of caisson at C-4. frac tank is being used as part of dewatering system at the bottom of the shaft, which is at 150 ft bg. pumps at the bottom of the shaft pumps water from the tunnel that runs towards 34th street. Nick mentioned that they had sampled water before and no contamination was found. informed them that the department requires groundwater delineation, beginning with a well installation at the former tank location. Nick will check plans for any excavation work in the tank area which may destroy the well. Rose-May will check lease agreement for responsibility and site access. Rose-May mentioned that the work on site will continue for another 15 months. Jorge Guerrero **on-site person** HDR Ph. (212) 542-6000 (917) 577-0510 (C) Fax (212) 542-6100 email: jorge.guerrero@hdrinc.com based on all available information, changed following information in the spill report: address: from 11th Ave and West 26th St to 220 11th Avenue - northwest corner . original spill report on e-doc. 06/25/12-Hiralkumar Patel. 1:09 PM:- sent letter to Mr. Brecher requiring soil/groundwater delineation via installation of monitoring wells, beginning with well installation at the former tank location. asked him to submit report by the end of 08/31/12. letter emailed to Mr. Brecher, Rose-May, Nick and Jorge. 1:36 PM:- received email from Mr. Brecher confirming receipt of the letter. 07/17/12-Hiralkumar Patel. 4:35 PM:- received call from Lew Wunderlich from MTA inquiring about work required. informed him that the department requires groundwater investigation beginning with well installation at the former tank location. if groundwater contamination found, then further delineation is needed. Mr. Wunderlich mentioned that MTA is currently discussing with property owner about who will perform the investigation. 08/09/12-Hiralkumar Patel. 11:20 AM:- spoke with Nick. they got change order and MTA's contractor will install the well. Nick will send work schedule. 08/17/12-Hiralkumar Patel. 12:45 PM:- spoke with Nick. he mentioned that change order has not been approved yet. he will talk to contractor and will call back. 08/20/12-Hiralkumar Patel. received email from Nick (at 4:52 AM today) including copy of message from David Mariani of Skanska. David mentioned that Preferred will schedule a driller once underpinning is done in northwest corner. 11:27 AM:- received email from David. he mentioned that driller is scheduled for 08/23/12 to install well. David Mariani Skanska USA Civil Northeast 7-Line Finishes Skanska-Railworks Ph. (646) 808-1412 (O) (917) 295-6390 (C) Fax (646) 430-5235 email: David.Mariani@skanska.com 08/27/12-Hiralkumar Patel. 1:21 PM:- received email from David. he mentioned that well was drilled on 08/23/12 and Preferred will return to the site to develop the well on 08/29/12. David mentioned that Preferred has collected a soil sample during well installation. he mentioned that the former tank area was excavated to water table and was backfilled with clean RCA. David inquired if they need to analyze soil sample collected during well installation. 1:26 PM:- sent email to David. informed him that

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Only soil samples collected. Site appears to be contaminated with gasoline (BTEX & MTBE) from a neighboring gas station. Groundwater is approx 4ft deep. This building does NOT have any petroleum tanks. Owner is trying to convert the space into an art gallery. Gallery owner will not come into the space until the problem is solved Soil borings were done through the floor of a building. Some BTEX and MTBE was found in the borings. Consultant plans on doing additional soil borings & groundwater testing (4 ft to GW) Environmental Enigneer has been hired to work on the project: Nicholas Canonico - Nova Consulting 516-352-3233 266 Jericho Tpk. Floral Park NY 11001 cell 516-244-4069 Nearest gasoline source appears to be a former gas station on the corner located on a lot with the following addresses: 285, 287, 289, 291 & 293 Tenth Ave. There are NO PBS permits for any of these addresses. There is an open spill at 291 10th Ave - #8701549 - DEC contact Joe Sun. - Sangesland 10/22/04 Rommel, received call from Nick, location formerly used for cab storage and maintenance. Aboveground Waste oil tank formerly on site. Additional investigation to include soil and groundwater sampling. Rommel. 12/06/04 File Update by Sun: Based on the Subsurface Investigation Report for the

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region: 2
DER Facility ID: 269881
DEC Memo: "tff ltr sent 1/14/2005 2/14/2005 Received a letter from Morton Usdan (212-564-2006) saying that he hired a company to work on the tank. If it can be fixed, it will be. If not, it will be abandoned. 5/2/2005 Sangesland spoke to Mr. Usdan. He said PTC found a dry leak in the vent line and replaced the line. Tank was retested and passed, no contamination was visible. Sangesland asked Mr. Usdan to submit all of this in writing to DEC. 5/5/2005 Sangesland received a letter from Mark Salamack at Petroleum Tank Cleaners. Tank was originally tested and failed by another company. PTC emptied the 1500 gal tank, isolated the lines and the stickline and vent line were found to leak. The gasket was replaced and then the tank was tested alone and passed. All necessary piping was replaced and no contamination was found. Spill Closed "

Waste Description: IGNITABLE WASTE

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND Question on proper address of this building. Originally called in as 525 W 25th. Later called 543-545 West 25th St. 5/22/02 - Sangesland spoke with Mark Robbins of Hydro Tech (631-462-5866) cell # 516-996-5559 Property owner Jack Fuchs - Whitehall Business Archives, Inc. 40 Worth Street, NY, NY 10013 Hydro Tech was pulling a buried 3,000 gal #2 oil tank from a parking lot. 15 ft to nearest neighbor, south end of tank is at the sidewalk line. They discovered 10 large holes in the tank. The pit has product in it. Hydro will vac out the hole and will excavate out contaminated soil to clean endpoints. If all contamination can not be excavated a remediation plan will be prepared and submitted. 7/2/2002 - Mark Robbins of Hydro Tech submitted a report which outlines the removal of a UST and the over excavation of the tank pit area. Sidewall endpoint samples were all below TAGM levels for VOC and SVOC's except for a handful of slight exceedences. No bottom soil samples were taken because of the presence of ground water. Hydro Tech recommends the installation of a monitoring well in the north side of the excavation area. The well

should be monitored for the presence of separate-phase and dissolved phase product. DEC instructs Hydro Tech to install a monitoring well on the site, develop the well and sample for VOC's and SVOC's. The DEC will require 2 rounds of Clean samples taken at least 3 months apart in order to close out. 10/29/2002 - Sangesland reviewed submittal from Hydro Tech Environmental. Water sample taken from monitoring well on site showed no product and sample was clean for everything except a minor hit 1.1 ug/l of Benzene. SVOC all below detect. 4/11/2003 - Sangesland reviewed a submittal from Hydro Tech dated Feb 28, 2003. This report shows the second round of GW sampling. All results were ND, therefore the spill can be closed out. Spill Closed."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 DEC Memo: "According to Mohammed Ahmed, the property owner is: Jack Guttman Bass Associates 141 Fifth Ave, Penthouse NY NY 10010 Fax copy to Fleming - Fax #212-675-3224 10.17.05-Sharif// I sent a stipulation with corrective action plan. The Corrective Action Plan requires delineation of groundwater contamination offsite and dewatering discharge contamination. 11.18.05 Sharif//Property Owner's lawyer Larry Schnapt,(212)756-2205 Called me to say his client is not going to sign the stipulation since it waives his right to claim cost of remediation to Spill Fund, instead he will send a statement about their agreement to remediate the groundwater contamination if it exists. 12/20/05-Sharif// Case was transferred to Koon Tang for reassignment with files. 12/20/05-Sun//The Case was reassigned to June Feng. 12/28/2005 - Feng - File reviewed by Feng and summarized site history : 1) The site will be constructed as multistory commercial structure w/ basement. 2) Groundwater encountered at 8' below grade, so basement will below water table. 3) Removed a crushed 550-gallon UST during excavation beginning construction, no sign of contamination was seen. 4) Dewatering system was installed, soil removal was found to have petroleum odor and sheen. 5) Soil was

S106868504

sampled. Soil contamination was found beginning at 8' bg to 16' bg. Soil samples taken from the four quadrant at depth of 12-16 feet below grade. 6) Soil were excavated to 11.5' bg after dewatering. Total of 1,218.71 tons of soil was excavated (reached the excavation limit). Endpoint samples were taken. 7) ORC applied in southwestern covered with gravel and poured with concrete. 8) Foundation was poured and basement was built. 9) A 47.24 mil high density polyethylene vapor barrier (Preprufe 300R waterproof system) was installed between the mud-slab and the basement slab. Items need to be addressed: 1) Groundwater sampling. WT @ 8' and soil was found to be contaminated from 8' to 16'. Soil excavation only to 11.5'. If contamination was found in groundwater, treatment will be required. 2) Indoor air sampling. Vapor barrier was not extended to the walls below grade, so indoor air samples will be needed upon completion of the structure. 12/30/2005 - Feng - Contacted the consultant, Chris De Carlo (Fleming Lee Shue), and will submitted all the requested information, included groundwater samples result, constrction detail and vapor mitigation effort design. (RJF) 2/16/2006 - Feng - Reviewed the supporting documents and construction drawings. Vapor barrier designed was provided. Extension to install groundwater monitoring wells in June 2006 is approved. Letter to Bass Associates and CC to Fleming Lee Shue and Schulte Roth & Zabel (lawyer). 10/4/2006 - Feng - Called Chris DeCarlo. Fleming Lee Shue has submitted a proposal to the owner and never get approved. The consultant for this site may have been changed and Fleming Lee Shue might be be the consultant next round. Called Jack Guttman at the number Chris DeCarlo provided and the number has been changed. Email to Lawrence Schnapf and asked him to contact Jack Guttman for the status of the groundwater samples. (RJF) 10/10/2006 - Feng - Site visit and met with Mohamed Ahmed (Fleming Lee Shue). Groundwater flows in a direction to Hudson River. No upgradient well will be installed due to the underground utilities. One downgradient well will be installed. Sidewalk permit letter sent to Fleming Lee Shue. (RJF) 5/29/2007 - Feng - Subsurface Investigation Report, dated 12/20/2006, submitted by Fleming Lee Shue. On 11/22/2006, soil boring was advanced to 20 feet bg. No PID reading and soil sample was not taken. DTW 9 feet. On 11/29/2006, groundwater sample taken. Analyticals show low contamination, 13.7 ppb MTBE. 2nd Quarterly Groundwater Sampling report, 3/19/2007. Groundwater sampled on 2/16/2007. No product. Analyticals show 14.9 ppb MTBE and some trace of SVOCs. Fleming Lee Shue will keep monitoring. (RJF) 7/24/2007 - Feng - Spoke with M. Ahmed (Fleming Lee Shue), quarterly report will be sent out within this week. (RJF) 8/21/2007 - Feng - Quarterly Groundwater Sampling Report #3, 7/25/2007, by Fleming Lee Shue. Groundwater sampled collected 6/13/2007. No product. No exceedance found. (RJF) Discussed with DEC J. Sun. Spill closed for: 1) Impacted soil was excavated down to 8 feet and endpoint samples show some minor SVOCs exceedance. 2) Application of 1,500 lbs of ORC at the basement excavation to remediate the groundwater. 3) Installation of a 47.24 mil of vapor barrier to prevent the vapor intrusion into the building. 4) Low/ND downgradient groundwater sample indicates no offsite impact. NFA issued. (RJF)"

DEC Memo: "Emis# 239653 3/6/2015 - Feng - Duty Desk. Spoke to Chris of ERT (212-580-8383). They have lost about 15 gallons of hydraulic fluid to the street from a truck that cleans the manhole. They have shut off the PTO and the leak stopped. The spill has been contained by speedy dry. The transportation team will come to fix the truck. The cleanup is in progress. 4/24/15 - Austin - Con Ed contained and cleaned up the spill, and towed away the vehicle for repairs - See document files for further information - Spill closed - end"

Remarks: "Oil spilled to pavement. Clean up is in progress."

DEC Memo: "10/7/05-Vought-As per DEC Sangesland (Duty Desk Officer). Great Bear Auto Repair. PBS records show two waste oil USTs (300 gal and 275-gallon). Caller says one of the auto repair bays (near the restroom) has a metal cement plate over a vault area which the owner has dumped waste oil illegally. The caller is associated with someone who was recently fired from his job at Great Bear. Sangesland forwarded this site to DLE for inspection/enforcement. ECO Michael Jordan assigned to the case. 11/7/05-Vought-DEC Austin received anonymous call on 11/4/05 from callers acquaintance who worked for New York State but would not leave name or contact info but wanted an update on the spill. Vought called ECO Jordan and spoke to him and he will perform site visit today and contact Vought with results. 11/17/2005 Sangesland - anonymous caller called again asking for an update on the spill case. 12/1/05-Vought-Site visit performed including DEC Vought, DEC Piper as per DEC Austin. No metal cement plates or concrete patches in bay next to bathroom. Concrete is unbroken. As per onsite mechanic (David) as waste oil tank was located in bay 15 years ago and was abandoned in place. Vought spoke to tenant (Moe Givner 646-721-0642)and he has been tenant for only three years. As per Moe, owner's address is: 26-10 Corporation Park-It Management 250 West 26th Street New York, NY 10001 Vought spoke with DEC Austin and instructed to check on PBS registration of tank. PBS registration requirements effective as of 1/14/95 and since UST was abandoned 15 years ago it is not required to be registered. Further investigation not warranted as per DEC Austin due to anecdotal nature of information. Spill closed as per Austin."

DEC Memo: "11/18/08 - Raphael Ketani. I made a site visit. I first went into the apartment building at 454 W. 36 Street because this was the address of the spill location that was first listed on the spill report. I talked to the super of this building. He told me that the spill was at 452 W. 36 Street. There were slight oil odors in the interior of 454 W. 36 Street. I went to 452 W. 36 Street and met the super, Franklin Scott. The odors in the building were very low, about 100 ppb total VOCs on the meter or less. He told me that Castle Oil (718) 823-8800, 440 Mamaroneck Avenue, Ste 402, Harrison, NY, 10528 had made the delivery. He said that the delivery man didn't check to see how much oil was in the tank. He just began filling it as soon as the nozzle was in the fill port. I didn't notice any oil spillage on the sidewalk in front of the building. I didn't see the vent pipe either. Mr. Scott said that the vent pipe was in the alleyway in the center between 452 and 454 W. 36 Street. He took me to the alleyway. It was essentially a breeze way, a space, between the two buildings. The vent pipe stuck out from the wall of 452 W. 36 Street. I saw black oil coating the vent pipe, oil soaked soil, oil soaked cinder blocks and lots of Speedi Dri that had been put down by the Fire

APARTMENT BUILDING (Continued)

S109373808

Department. I asked Mr. Scott whether a clean up company was coming. He said No. I asked him for the name of the management company. He said it was Keystone Management (212)684-4141 at 1201 Broadway, NY, 10001. I told him that I will contact both Castle Oil and Keystone and get them to clean up the mess. The owners of the building are Sereno Partners, LLC, 452 W. 36 Street, NY, 10036. I spoke to Rob Hill of Castle Oil. He said that he is sending one of his guys there right now to investigate the situation. He said that BLT delivered the oil on behalf of Castle. However, he said, the building gets only #2 oil, not #6 as was listed on the spill report. I told Mr. Hill that what I saw looked and smelled like #6. I told him that vapors are getting into both buildings and that the DEC wants the spill cleaned up fast. Next, I called up Keystone Management, but could only leave a message on their emergency maintenance mail box. A little while later, Chris Darbidian, Maintenance Director, called me up. He said that Keystone manages the properties from California, even though they have a New York office. He said that the mailing address is: Keystone Management, 15165 Ventura Blvd., Ste 140, Sherman Oaks, CA, 91403. He asked me to send any correspondences to that address. I sent CSLs to both Mr. Hill and Mr. Darbidian.

11/19/08 - Raphael Ketani. Today I called up the 311 New York City number in order to file a notice that the vent pipe was in a place where the whistle could not be heard. The 311 operator took the site address information, my information, and the nature of the complaint. He gave me the DOB complaint number 1242512. Rob Hill of Castle Oil called today. He said that he had a crew of 5 people out at the site cleaning up the oil spill. He said that it was #2 oil and that they filled three and a half drums with oil soaked material. The soil was removed and they found the going tough. He said that there had been other oil spills and the ground had hardened. However, they removed all of the contamination and when they got to the bottom, they discovered that the breezeway had a brick floor. A bioremediation agent was put down on the floor to remove the film of oil that was still present. Mr. Hill also said that the paper chart for the tank was for #4 oil (25 api gravity). So this was corrected. Also, the tank was originally thought to be 2000 gal. capacity, but it is actually 1500 gals. capacity. Mr. Hill added that the spill date was only the second time that Castle had made a delivery to the site. This is a new account. All deliveries are presently stopped until the owners of the site move the vent pipe to the front of the building. He will send DEC a cleanup report with manifests and pictures and other documentation.

12/19/08 - Raphael Ketani. Lydia of Keystone Management called requesting more time to get all of the paperwork together for the cleanup report. I gave her until January 2, 2009 to submit the report to DEC. She said that would be fine.

1/2/09 - Raphael Ketani. Mr. Hill left a message that he will e-mail me the rest of the documentation that DEC needs for closing the case.

1/5/09 - Raphael Ketani. Lydia (212) 684-4141 ext 313 called to say that she spoke to Rob Hill of Castle Oil (718) 579-3413 and he told her that the report will be sent directly to DEC, rather than she receiving the report and then forwarding it to DEC. I told her that will be fine. She said that she was just letting me know how things are going.

2/13/09 - Raphael Ketani. Lydia called and asked why DEC hadn't closed the spill case. I told her that DEC never received a cleanup/closure report and so we don't know whether the site has been cleaned. I added that if we don't know whether the site has been cleaned, then we must assume the site is still contaminated. I told

S109373808

her that building's status will not change until we receive a report showing that the spill has been cleaned up. She said she will talk to Mr. Hill and have the report sent to DEC. 3/13/09 - Raphael Ketani. I tried to contact Ms. Lydia Montoya, but could only leave a voice mail. In the message, I mentioned that the DEC may take legal action if it doesn't receive the cleanup/remediation report very soon. 3/23/09 - Raphael Ketani. I received a message from Ms. Montoya that the cleanup report for the site had been sent. I checked my file, but there was nothing in it. So I called up Mr. Hill from Castle Oil (718) 579-3413 and asked him to send the report. He said that he had sent it back in January. I told him that DEC never received it. He said that he will send it by e-mail again. I never received the report from Mr. Hill. However, Ms. Montoya called and said that she was sending a FAX of the cleanup report cover letter that she received from Mr. Hill. I received the cover letter a little while later. I called Mr. Hill and told him that, again, I didn't receive the report by e-mail. He said that he didn't understand why as he has my correct e-mail address. He said that he will FAX the report soon. Mr. Hill FAXed me the cover letter with a manifest, a page regarding the spill and the wrong API chart displayed, the delivery ticket, and a copy of the e-mail page from the 1/7/09 e-mail that he had sent, but that I had never received. 3/24/09 - Raphael Ketani. I spoke to Mr. Hill and asked him to send me just several pictures of the cleanup. I told him that he was trying to send too many pictures and that is why I am not receiving the e-mail. He said that that he will send the pictures in two groups, one of 8 pictures and one of 5 pictures. I received two e-mails from Mr. Hill with many pictures. They were placed in the E-docs. I spoke to Mr. Hill about the stain on the wall. He said that they had tried to pressure wash it, but it didn't clean up. He said that it was devolitized #6 oil and happened before Castle started making deliveries to the site. He said that Castle is delivering #2 oil only. Based upon the pictures that Mr. Hill had sent me, and the cleanup report that was submitted by Castle Oil, I have determined that there are no impacts to the environment and so I am closing the spill case."

Remarks: "CALLER STATES THAT THERE WAS A TANK OVERFILL TO THE BASEMENT. TANK SIZE IS UNK, SPILL IS CONTAINED AND CLEAN UP IS PENDING. **FDNY IS REQUESTING SPILLS TO RESPOND."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 01/05/90: (6) MONITORING WELLS INSTALLED,OIL TANKS BEING TESTED BY CONTRACTORS(TRINITY & FENLEY & NICOL), ALL TANKS PUMPED & CLEANED, REPAIRING WATER MAIN. 10/10/2003-Vought-Spoke with LaJuana Smith (works for Clinton Housing-212-967-1644) and she is looking to resolve spill). In Nov 1996 DEC required further work from DEC. Ms Smith will call back on Wed for current site status and will possibly submit FOIL request upon her discussion with bank. 10/17/2003-Vought-File review by Vought: Community Board 4 Meeting Notice-2/21/90-Meeting held with DEC, NYFD, NYPD, DCA and NYCDEP to discuss current status and plans of site. Fax to DEC from Gaseteria-2/22/90-Pedneault Associates (516-467-8477)-Groundwater analyticals from six monitoring wells and two soil disposal piles (no site plan in file). Groundwater analyticals show 275ppb benzene(W1), 341ppb benzene(W2), 327ppb benzene(W3), 448ppb benzene(W4), 158ppb benzene(W5) and 128ppb benzene(w6). Disposal samples show 1433ppb benzene(east pile) and 188ppb benzene(west pile). Groundwater

analyticals-5/21/90-Pedneault Associates-Groundwater analyticals from six monitoring wells (no site plan in file). Groundwater analyticals show 2308ppb benzene(W1), 1091ppb benzene(W2), 680ppb benzene(W3), 385ppb benzene(W4), 736ppb benzene(W5) and 810ppb benzene(W6). Subsurface Investigation-7/90-Environmental Management Services. In Jan 1990 a subsurface water line broke beneath 10th avenue near the northwest side of the site. Water entered the basement of the adjoining building along with some gasoline. DEC required installation of six monitoring wells on Gaseteria property. Gasoline vapors detected in sewers in building across 10th Avenue. This subsurface investigation consisted of eight soil borings and installation of two additional monitoring wells. Three pump islands serviced by 12 (550-gallon) gasoline USTs and one (2000-gallon) diesel UST. Local topography slopes to the north. Groundwater at depth of 7-9' below grade. Bedrock is 7-11' below grade and slopes downward toward the northwest and southwest corners of site. Groundwater suspected to flow northward. All wells onsite were set firmly on bedrock and there is not sufficient information available to determine specific groundwater flow. No free product detected in wells. Groundwater appears to flow from 10th Ave towards the USTs. Report recommends groundwater monitoring with possible additional delineation. No soil samples submitted for analysis nor were screened via PID. Letter from DEC to Gaseteria-7/12/90. Letter from DEC (Sigona) to Gaseteria (Oscar Porcelli) requesting subsurface investigation work plan to be approved by the DEC to investigate the presence of gasoline vapors. Plan must be received by the DEC by 7/17/90. Odor complaints in January 1990 and again in July 1990. Sigona performed site visit on 7/13/90. Fax to DEC-7/17/90. Letter from Environmental Management Services to DEC (Sigona) proposing: 1) investigation of subsurface utilities as potential pathways 2) determination of groundwater flow direction 3) groundwater monitoring 4) installation of six soil borings along western margin of station and installation of two additional monitoring wells. Letter from DEC to Gaseteria-1/5/95. Letter from DEC (Sigona) to Gaseteria (Angel Chang) requiring cleanup and removal of discharge. Letter also required immediate steps to abate seepage into basement of 403 W 40th Street. Response from Gaseteria required to DEC by 1/15/95. Letter from Gaseteria to DEC-1/20/95. Letter from Gaseteria (Chang) to DEC (Sigona) stating that Gaseteria will: 1) divert the flow of surface water away from the south wall of the building 2) install a SVE system in the basement alongside of the south wall between the concrete floor and the building foundation. Gaseteria does not believe there is a need to install new groundwater monitoring wells or to further develop existing wells.....since the problem appears to be surface related. Sample analyticals from basement of 480 10th Ave-8/96. Soil analyticals show 20664ppb ethylbenzene(sample 48334), 59164ppb xylene(sample 48334), 11000ppb naphthalene(sample 48334). Letter from DEC to Gaseteria-9/10/96. Letter from DEC(Rommel) to Gaseteria(George Esayan). DEC in possession of analyticals from Clinton Housing(403 W. 40th Street). Gaseteria required to sample two of the onsite monitoring wells for 8021/8270/lead. Letter from Clinton Housing Development Company-9/11/96. Letter from Clinton(Joseph Tuana) to DEC(Rommel) with copies of analyticals discussed above. Letter from Carl Sulfaro (attorney for Gaseteria) to DEC (Rommel)-9/20/96. Letter stating that Sulfaro authorized EMS Environmental Services to take two samples of the onsite monitoring wells. Samples will be taken 9/27/96. Groundwater

analyticals-10/10/96. Analyticals from MW5 by EMS showing 42.56ppb methylene chloride, 5549ppb benzene, 107.33ppb toluene, 1024.75ppb ethylbenzene, 393.15ppb xylene and 0ppb MTBE. Letter from Clinton(Kathy Prioleau) to DEC(Rommel)-11/11/96. On 10/27/96 strong fumes entered basement of 480 10th Ave . NYFD onsite. Letter requests that DEC relay information on testing done at Gaseteria and UST inspection of Gaseteria . Letter from DEC(Rommel) to Gaseteria(Sulfaro)-11/25/96. Letter stating that requirements of fax dated 9/10/96 were not met because only one well was sampled and 8270/Lead analyses were not performed. Letter requires: 1)submittal of an investigation plan to delineate soil and groundwater contamination 2)source determination 3)installation of three additional monitoring wells 4)installation of an air sampling port on the exhaust line of the venting system and monthly sampling for benzene and THC. Letter states that action must be taken within 45 days . Letter from DEC(Rommel) to Prioleau(Clinton)-11/26/96. Letter stated that DEC was never notified of odor complaints as 11/11/96 letter stated. Also attached to letter was copy of 11/25/96 letter from DEC to Gaseteria. Letter from Gaseteria(Sulfaro) to DEC(Rommel)-1/15/97. Letter stating that Gaseteria would prefer to perform site investigation, soil removal and/or remediation as needed concurrent with excavation anticipated as part of Federal EPA UST upgrade mandate and the work is expected to take place in Spring 1997 . Letter from DEC(Rommel) to Gaseteria(Roberto Porcelli)-7/29/98. Letter serving as final notification of obligations regarding petroleum contamination and vapor incidents . On 6/28/03 petroleum contaminated groundwater infiltrated basement of 480 10th Ave due to heavy rains. This is the seventh vapor complaint associated with Gaseteria since Jan 1990 . Letter states that the Department is allotting 30 days for Gaseteria to satisfy all requirements in DEC letter dated 11/25/96 . Deadline of 8/31/98 given by DEC. Letter from Gaseteria(Seth Friedland) to DEC(Rommel)-8/13/98. Letter stating that the June 1998 episode was caused by heavy rains and appears to be an isolated event and that Gaseteria does not agree with Departments conclusions . Letter stated that the station will be taken out of service on 9/15/98, permanently close the USTs and reinstall upgraded USTs on the northern boundary of the site. Letter from DEC(Rommel) to Gaseteria(Roberto Porcelli)-8/28/98. Letter serving as a reminder of 8/31/98 deadline . Letter from Gaseteria(Oscar Porcelli) to DEC(Rommel)-8/28/98. Letter stating that new USTs were ordered and that work will start the second week of September. Gaseteria intends to install four monitoring wells to replace those destroyed by station upgrade and will retain Environmental Management services to develop remedial plan. Letter from DEC(Rommel) to Gaseteria(Oscar Porcelli)-8/31/98. Letter confirming phone conversation where an agreement was reached that Gaseteria will comply with following requirements and complete the tank upgrade prior to 9/30/98. Letter also required that a workplan be submitted prior to 9/4/03 which included 1)complete delineation 2)soil and groundwater sampling plan for use during excavation activities 3)sampling of SVE emissions 4)installation of three monitoring wells into bedrock and 5)cleaning and proper disposal of oil in the building floor drains and all associated discharge points. Letter from Camin Cargo Control(Gaseteria's Enviro consultant) to Gaseteria-10/5/98. Letter from Camin(Patricia Badding) stating that a site investigation and report shall be prepared. Investigation with Geoprobe and subsequent installation of monitoring wells scheduled for 10/16/98. Soil samples will also be collected

during excavation for new USTs. Venting system emissions will also be sampled. Cleaning and proper disposal of any oil in the building floor drains and all associated discharge points is the responsibility of Gaseteria . Letter from DEC(Rommel) to Gaseteria(Oscar Porcelli)-10/8/03. Letter acknowledging receipt of Camin 10/5/98 proposal and requiring the following by 10/13/98: 1)Site plan with proposed boring locations 2)discussion of locations 3)discussion of endpoint sampling locations from UST excavation 4)discussion of delineation procedure 5)include MTBE with analyticals 6)collect groundwater samples from Geoprobe locations. Letter from Camin(Badding) to DEC(Rommel)-10/13/03. Submission of 1)site plan with ten boring locations 2)Collection of six endpoint soil samples from UST excavation 3)excavation and disposal of contaminated soil encountered during tank installation 4)Inclusion of MTBE analyticals 5)collection of groundwater samples(if encountered). Investigation Results from Camin(Badding) to DEC(Rommel)-11/6/98. Results of eight soil borings performed. Soil analyticals show 2149ppb MTBE(SB1), 526ppb benzene(SB2), 188ppb benzene(SB4), 212ppb benzene(SB5), 4576ppb MTBE(SB6), 1458ppb benzene(SB7), 29114ppb naphthalene(SB7), 187ppb benzene(SB8). Groundwater analyticals show 1239ppb benzene(SB4), 1975ppb benzene(SB5), 5360ppb benzene(SB6). Subsurface Investigation Report Camin Badding 908-523-0616 10/16/98). Investigation report including results above of eight soil borings performed. There is approximately 2-4 inches of contaminated soil at the soil/bedrock interface in soil boring locations SB2, SB4, SB5, SB7 and SB8. Bedrock at depths of 6-11.5' below grade . A sheen was detected on all samples (groundwater). Venting system was samples on 12/11/98 via a vacuum canister attachment to vent. Removed dispenser island is the proposed location of new USTs. See analyticals above. Venting analyticals show 264ppm TPH and no other volatiles. Baseline Acquisition Assessment Report-10/10/02 Delta Environmental (Brad Fisher). Purpose was to establish baseline conditions prior to proposed lease and raze and rebuild of site by BP. One soil borings performed in 4/02 to depth of 11.5'. Two borings drilled to 24.5 via air rotary and converted to temporary monitoring wells (MW1 and MW2). Delta recommends 1)gaseteria install permanent monitoring wells to delineate contamination. It is Delta's understanding that Gaseteria will retain the environmental liability of the subject site until spill closure has been obtained . At time of assessment three USTs on site (two 6000-gallon gasoline USTs and one 6000-gallon diesel UST) and four pump islands with six dispensers. Surrounding area is multiple story apartment buildings. Groundwater is located within bedrock fractures at depths between approximately 12.5 and 13.5 ft bgs . Former USTs onsite which were CLOSED IN PLACE include two (6000-gallon) gasoline USTs in 1998 , one 6000-gallon diesel in 1999, ten 550-gallon gasoline USTs in 1998, one 550-gallon waste oil in 1998 and one 550-gallon fuel oil in 1996. Soil analyticals show 4570ppb xylenes(SB1) and 3970ppb isopropylbenzene(SB1) from depths of 10-11.5'. Groundwater analyticals show 148ppb benzene(MW1), 24800ppb MTBE(MW1) and 30.7ppb benzene(MW2). 10/21/2003-Vought-Reviewed site with DEC(Rommel). Sent Stipulation Agreement with the following requirements: 1)Groundwater delineation via installation of bedrock monitoring wells at former boring locations SB1, SB4, SB5, SB6, SB7 2)Monitoring of vapors and groundwater intrusion 480 10th Ave 3)current status of SVE system and submittal of historic and current SVE effluent samples for benzene analysis or collection of indoor air samples from 480 10th Ave. 10/24/2003-Vought-Called LuJuana Smith

(212-967-1644) and left message and explained requirements of 10/21/03 letter. 10/27/2003-Vought-Received message from Steve Muller will be taking indoor air samples from 480 10th Avenue. Vought returned call to Muller (516-395-5957). 10/28/2003-Vought-returned call to Steve Muller to discuss indoor air samples. Left message to return call to DEC. Left message for LuJuana Smith to call DEC. Vought spoke with Muller and okayed PID and stated that SUMA sample as per NYSDOH guidance was not necessary until 1)closure of SVE system or 2)PID indications of petroleum vapors followed by subsequent remediation. Vought also instructed Muller to check sumps. Vought spoke to LuJuana Smith who will be sending in FOIL Request for continuous updates on site. Vought also called Muller and gave him LuJuana's phone (212-967-1644) for access arrangements. 11/6/2003-Vought-Spoke with Steve Muller who was onsite. No PID readings and no olfactory evidence of petroleum and no groundwater infiltration into basement and no product in sump. Muller will produce summary letter and send to DEC. 11/7/2003-Vought-Received Summary Letter from Applied Geosolutions(Muller). Site visit performed on 11/6/03 and inspection of basement at 480 10th Ave. AGS observed no olfactory detection of odors or vapors consistent with hydrocarbons related to gasoline . PID readings of 4.8ppm were attributed to moisture in basement. Small amount of standing water present near leaking hose. No signs of product in sump. Vapor abatement system unoperational during site visit. Photos of basement submitted with report show no free product or petroleum impact. 11/24/2003-Vought-Received signed STIP from Adam Good(Gaseteria) with revised Corrective Action Plan. 11/26/2003-Vought-Spill transferred from Rommel to Vought. Vought received call from LuJuana Smith and she requested update. Vought faxed her copy of 11/7/03 report and letter sent to Gaseteria on 10/21/03. Vought submitted STIP for implementation to DEC Kunkel. 12/2/03-Vought-STIP implemented by Kunkel. Copy sent and faxed to Good and Muller. 12/17/2003-Vought-See closed spill 0301220 at same location. 9/14/04-Vought-New file review by Vought: Letter from Applied Geosolutions (Steven Muller 516-395-5957). On November 6, 2003 Applied Geosolutions inspected the basement of 480 10th Avenue to perform vapor monitoring and to identify the presence of groundwater . During the inspection AGS observed no olfactory detection of odors or vapors consistent with hydrocarbons related to gasoline. The air space was monitored with a portable PID indicating a measurement of 4.8 ppm... This detection is likely the result of low atmospheric pressure followed from periods of rain causing the basement to be damp. The basement floor did not indicate the presence of groundwater... . Line and Dispenser Upgrade Report (Delta Environmental Brad Fisher 914-765-8180). This Line and Dispenser Report summarizes the results of pump island and product piping upgrade assessment activities conducted by Delta Environmental and Gasoline Installations on behalf of BP Products North America . Work performed included the removing and installing new spill containment boxes beneath each dispenser, removal and replacement of product piping and installation of electronic line leak detection systems. Soil analyticals only show minor TAGM 4046 SVOC exceedences attributable to fill. Subsurface Investigation Workplan (Applied Geosolutions)-July 2004. Bedrock at depth of 10' below grade and groundwater at depth of 12.5-13.5' below grade. Report proposes installation of four wells via air rotary followed by groundwater sampling. Groundwater flow direction not determined as of yet. 9/14/04-Vought-Sent letter to Gaseteria approving of Subsurface

Investigation Workplan. Vought received message from Lujuanna Smith (212-967-1644) and returned call. Vought spoke to Smith and no indication of vapors was noted. Ms. Smith requested info on the applicability of the BCP program for 480 10th Avenue and Vought replied that was only available if HPD was willing to take responsibility of the spill and that she should call Albany for further information. Vought also suggested that she return the call to DEC on 11/14/04 which is when the workplan results are due to DEC.

9/17/04-Vought-Received fax from Applied Geosolutions (Muller). 466 10th Avenue-AGS is currently getting drilling quotes and will complete the Workplan within the 60 day time frame .

1/6/05-Vought-Reviewed Subsurface Investigation Summary Report (Applied Geosolutions) dated December 2004 and received on 1/3/05. Location north of USTs not possible due to concrete with rebar. Installation of three monitoring wells. Groundwater from 7-11' bgs and flow to the west. Groundwater analyticals show 48ppb xylene(MW1), 13ppb 1,2,4-trimethylbenzene(MW1), 17ppb 1,3,5-trimethylbenzene(MW1), 26ppb naphthalene(MW1), 1400ppb MTBE(MW1), 23ppb MTBE(MW2), and 20ppb MTBE(MW3). The existing groundwater monitoring wells should be monitored on a monthly schedule and sampled on a quarterly schedule to document changes in groundwater elevation and contaminate concentration trends in order to develop and appropriate remedial strategy . DEC requires: 1)installation of monitoring wells on West 37th Street north northeast of site and downgradient from abandoned tankfield along 10th Avenue. 1/19/05-Vought-Meeting at DEC with ASR Tomasello. Will examine possibility of borings across 10th Avenue (may not be possible due to utilities) and also onsite adjacent to 480 10th Avenue. If onsite boring adjacent to 480 10th Avenue is not possible then boring will be installed on 37th Street.

2/17/05-Vought-Spoke to Muller and site visit scheduled for 2/24 at 10am to discuss possible well installation locations.

2/24/05-Vought-Site meeting with ASR Tomasello and no borings possible across 10th Avenue. Well will be installed onsite under canopy downgradient of abandoned tankfield. Well will also be installed on West 37th Street north northeast of site. Obligado- SITE TRANSFERRED FROM VOUGHT TO OBLIGADO 10/12/05 - Spoke with Tomasello ASR, requests to talk about closure for sp0206783. 10/17/05- Obligado - File Review: Final Subsurface Investigation Report, dated June 2005. 4 monitoring wells installed at the site. Wells were installed into Bedrock down to 25 ft bgs. 3 wells installed in December 2004, one additional well installed in March 2005. Groundwater encountered at approximately 7 to 11 feet. No product encountered. Initial gw samples in Dec. 2004 show ND for Benzene in all wells, 1400 ppb MTBE (MW-1), 23 ppb MTBE (MW@), 20 ppb MTBE (MW-3), 48 ppb Xylene (MW-1). March 2005 gw results show 140 ppb benzene (MW1), 2100 ppb MTBE (MW-1), 26 ppb benzene (MW-3), 16 ppb MTBE (MW-3). June 2005 results show 45 ppb benzene (MW-1), 11 ppb Ethylbenene (MW-1), 750 ppb MTBE (MW-1), 52 ppb benzene (MW4), 10 ppb toluene (MW-4), 170 ppb Napthalene (MW4), 55 ppb MTBE (MW4), 193 ppb xylenes (MW-4). 4Q05 Monitoring Report, dated 10/15/05. Ground water analyticals at show 20 ppb benzene (MW-1), 580 ppb MTBE (MW1), 23 ppb MTBE (MW-2), 21 ppb benzene (MW-3), 15 ppb MTBE (MW-3), 16 ppb benzene (MW-4), 52 ppb ethylbenzene (MW-4), 140 ppb MTBE (MW-4). 11/14/05 - Obligado - Site visit with ASR Tomasello. Request to see at least 2 more quarters of monitoring at a minimum. 12/8/05 - Obligado - Will do a sensitive receptor survey. Continue monitoring. Only 2 quarters of data at MW4. 3/1/06 - Obligado - PPhone call with Chris/STeve, ask that site be

S100167794

monitored quarterly not monthly. 4/12/06 - Obligado - review 1Q06 monitoring report. BTEX ND to 33 ppb, MTBE ND to 800 ppb. 11/21/06 - Obligado - Reviewed Closure Petition/Sensitive Receptor Survey. Sent email to ASR denying NFA stating the following: Due to historical vapor issues in the adjacent apartment, and the presence of benzene above guidance levels in ground water, the Department requires laboratory analyzed vapor samples from either the slub slab system (if operational) or indoor air samples to confirm no vapor intrusion. The Department also requires an additional round of ground water monitoring to confirm benzene and MTBE levels are still decreasing. NYSDOH Vapor Intrusion Guidance should be followed when collecting air samples available at http://www.health.state.ny.us/environmental/investigations/soil_gas/svi_guidance/index.html. Please submit the results of the additional investigation by January 21, 2007. 12/1/06 - Obligado - Steve Muller will be onsite today to collect additional data. 5/19/09 - Obligado - Meeting with DEC, ASR, GAseteria. They conducted a groundwater monitoring event and a vapor intrusion investigation in the adjacent residential building. According to report no Vapor intrusion was occurring. Ground water results found low levels of BTEX in GW, max 23 ppb and MTBE is continuing to decrease from 1400 ppb in 2004 to 250 ppb in 1Q09. They will submit a workplan for a confirmatory soil boring investigation by 7/31/09. 11/20/09 - Obligado - Reviewed a revised Investigation Work Plan. The plan proposes to install 3 monitoring wells at the site. 2 wells are proposed in the area of the former abandoned 550 USTs and one is downgradient of the dispenser island. I sent a letter to Gaseteria approving the plan. 3/22/10 - Obligado - Review the 4th quarter 2009 monitoring report. Max BTEX is 8 ug/L. Max MTBE is 140 ug/L. No LNAPI present. 6/14/10 - Obligado - I reviewed the Remedial Investigation Report. 2 Additional soil boring/monitoring wells were installed. 1 soil boring/well location was not completed due utilities in that area. Soil samples were collected from one of the 2 locations, but the other location had shallow bed rock so no soil sample was collected. No soil impacts were detected at the one location where soil was collected. Ground water results showed 13 ppb total BTEX at newly installed MW5. MW6 had no exceedences of TOGs The existing monitoring wells were sampled as well. MW4 had max MTBE at 150 ppb, and BTEX at 14 ppb, and total VOCs were 174 ppb. MW2 had 15.3 ppb BTEX and 11 ppb MTBE. This site has minimal ground water impacts the 6 wells on the site, and lack of evidence of contaminated source soils. Also a VI investigation was previously performed at the adjacent apartment building and no vapor intrusion was determined to be occurring. After discussion with DEC Tibbe, this spill has been closed. "

DEC Memo: "160745. On 8/26/05 at 21:31 P. Abel # 10966 Shift Manager Of substation operations called to report a spill of Dielectric fluid. He states that at 21:10 they discovered that feeder M-54 has been leaking at a rate of 13 gallons per hr. They know this from the flow meeter. 350 gallons was reported as of that time as per CIG P. Didonato # 01669. They do not know where the spill is as of yet they are in the process of looking for it. P. Abel states that the substance is non-pcb. At this time we do not know if any sewers or water ways were affected. Nor do we know if any private property was affected. No fire or smoke has been reported to be involved with this spill. At this time no injuries were reported to be involved with this spill. 8/26/05 21:41 CIG P. Didonato # 01669 was notified. 2 PFT vans sent out. TO crews sent out to check manholes. Allstate and Manetta notified to respond to East River S/S and standby. At 00:55 8/27/05 TO crews found leak in Mh 61732 on 12th Ave & 38th St. Leak was on weld for 1 save-a-valve formerly used for thermo-probes. Allstate responded and cleaned out manhole and at 04:27 leak was contained using half drum under pipe. Allstate continued to power was manhole. At 08:29 Feeder M54 was removed from service and at 12:52 feeder was on reduced pressure. Safeway started excavating street to break out wall. 5' barrel installation started at 05:30 8/28/05 and at 10:30 8/28/05 welding was completed. Normal pressure was requested and at 17:55 Feeder was at normal. At 02:26 08/29/05 Feeder was returned to service. Allstate measured 2 tankers that were used to pump out manhole and reported that 5650 gallons of dielectric fluid was removed from the manhole. VS 78367 06:45 8/29/05. Sam, Below are soil sample results taken to verify the cleanup associated with the subject incident. In short, we discovered a leak in MH 61732 and in making repairs we broke out the manhole wall. We discovered that some dielectric fluid escaped through the manhole penetrations on the north end of the manhole. We estimated the amount as 5 gallons. Contaminated soils were removed and Jacques Whitford conducted sampling on the north end. The results are below. The report is also attached for your review. Please let me know if I can close this spill or if there are additional efforts we need to make. Thanks for your help. Mike. 9/06/2005 Lab Sequence Number: 05-09152-001.

DEC Memo: "11/24/17-Hiralkumar Patel. alternate address: 201-215 11th Ave, 164-178 12th Ave, 601-631 W 24th St PBS #: 2-452645. as per PBS record, the site has/had following tanks: - eight (8) 4,000 gal diesel USTs, in-service, installed in Dec. 2000 - two (2) 4,000 gal gasoline/ethanol USTs, in-service, installed in Dec. 2000 - one (1) 4,000 gal motor oil UST, in-service, installed in Dec. 2000 - one (1) 4,000 gal waste oil UST, in-service, installed in Dec. 2000 - four (4) 4,000 gal #2 oil USTs, in-service, installed in Sept. 1999 - one (1) 280 gal motor oil AST in contact with impervious barrier, in-service, installed in Jun. 2000 - one (1) 280 gal gear oil AST in contact with impervious barrier, in-service, installed in Jun. 2000 - one (1) 150 gal motor oil AST in contact with impervious barrier, in-service, installed in Jun. 2000 - one (1) 280 gal transmission oil AST in contact with impervious barrier, in-service, installed in Jan. 2007 - ten (10) 4,000 gal diesel USTs, removed in Mar./May 1999 - two (2) 4,000 gal gasoline USTs, removed in Dec. 1999 - two (2) 4,000 gal lube oil USTs, removed in Dec. 1999 - two (2) 12,000 gal #2 oil USTs, removed in Sept. 1999 - one (1) 280 gal waste oil AST, removed in Mar. 2013 - one (1) 4,000 gal waste oil UST, removed in Nov. 1999 other spills #: 8908706, 9005469, 9209596, 9300109, 9815241, 0308121, 1411653 spill # 1411653 was reported on 03/13/2015 due to discharge of dyed diesel (#2 oil??) onto asphalt surface. upon inspection, oil was found in tank top sumps and storm catch basin. multiple violations were noted during a PBS inspection and NYSOGC was pursuing enforcement case. four fuel oil UST systems were tested tight. case closed. spill # 0308121 was reported on 10/31/2003 as 110 gal of hydraulic oil spilled due to ruptured hydraulic oil lift. spill was contained and cleaned up. case closed. 10:30 AM:- spoke with Ms. Byrens. she mentioned that on-site crew noted oil coming out of vent pipe. she mentioned that there was no oil delivery today. she will confirm if on-site tanks are manifold and if return line delivering oil to only one tank. 11:11 AM:- spoke with Mr. Conover. he noted that four heating tanks on-site are manifolded in two sets: Tank # 13 & 14, and Tank # 15 & 16; and there are three boilers on-site. he mentioned that the boilers were found turned off this morning, but crew noted pump running. they also found oil coming out of the vent pipe for Tank # 15/16. Mr. Conover doesn't know if pump was running whole night and how many gal of oil pumped into Tank # 15/16. DEC Veronica responded. 12/7/17-Ann Marie Byrnes emailed the report dated 12/7/17. the letter stated that On November 24 2017 at approximately 10:05 there was an overfill alarm on heating oil tanks 15 and 16. Larry Le, USPS Lead Auto Tech investigated. Technician Lee found heating oil coming out from the vent tubes. He then immediately went into the heating pump room and shut off the pumps. Approximately 20 gallons of heating oil was spilled. It was immediately contained within the facility with the spill kits. The spill was continue to concrete within our facility, The oil did not impact soil, water or

storm drain, Our internal spill team cleaned up the oil on the concrete. The oil debris was placed in 1 drum. It will be transported and disposed as non-hazardous waste by our waste contractor, Safety-Kleen. We had our boiler contractor come to investigate the issue that caused the spill and they said the check valve failed on the heating oil tank supply tank. They made the repair the same day. Base on the information in the spill closure letter this spill is closed. "

Contact Name: JOSEPH LADOLCETTA
DEC Memo: "3/13/15- DEC Piper spoke with caller. Caller informed me that spill of approx 20-25 gallons out the ATG line due to cap being left off. Spill was not out vent. It spilled to asphalt and to sewer though not believed to be impacted. Cleanup is in progress. DEC Piper had DEC Demeo respond. 3/16/15 TJD On 3/13/15, Spills staff responded to a reported 25 gallon spill of #2 fuel oil during a delivery at the USPS Manhattan Vehicle Maintenance Facility. Upon inspection of the spill site and interviews with involved parties, DEC staff determined the spill cause was not a tank overfill but was due to an equipment failure likely associated with the manifolded underground tank system (4 4,000 gallon UST s). The fuel carrier performed the initial cleanup of affected asphalt surfaces prior to DEC arrival. Upon further inspection, product was found in tank top sumps and in a NYC storm catch basin. USPS facility representatives refused to retain an environmental contractor to recover separate phase product identified in the aforementioned underground structures. Notifications were made to the NRC and callbacks were received from both the USCG and EPA. Neither of these agencies were able to mobilize an emergency contractor. NYC OEM was also notified and responded to the location with FDNY and DEP. As the product was contained FDNY took no action. NYC DEP issued a Commissioner s Order requiring a cleanup of the affected city sewer, but also had no contractor to recover the product from the catch basin. As heavy rains were forecast, Spills staff retained the services of a State PIN contractor, who responded and recovered an estimated 200 gallons from the storm catch basin. On 3/16/15, Spills staff, along with PBS staff, conducted a PBS inspection of the facility which included 20 petroleum storage tanks (16 UST s). Multiple violations were identified during the inspection. Onsite during the PBS inspection were representatives of the USPS safety and environmental units. USPS hired a contractor to pump the product from the tank top sumps. DEC required a system tightness test to determine the current condition of the fuel oil tank system and identify any failed components which may have contributed to the reported petroleum condition. The testing is scheduled for 3/18/15. A NOV is being prepared for the violations identified during the PBS inspection and will be referred to OGC for enforcement. USPS has paid the state contractor who performed the cleanup of the affected storm catch basin. 5/15/15 TJD Surface spill was cleaned by fuel carrier prior to DEC arrival to site - concrete/asphalt only. DEC contractor, Island Pump & Tank was retained and responded for pump out of affected roadway catch basin. During DEC/EPA PBS inspection, USPS retained AB Environmental to recover fuel from affected tank top sump - completed. As per DEC directive, USPS tested (4) fuel oil UST's - passing tightness test report has been received. Unknown cause of product discharge. No further clean-up required. OGC is pursuing enforcement case. All documentation has been uploaded to DECDOCS. No further action is required associated with reported spill event. Spill closed."
Remarks: "25-30 gallons lost to parking lot and sidewalk at Post Office. Driver took cap off storage tank at above location, inside cap was

Spiller Name: Not reported
Spiller Company: owner of building
Spiller Address: 531-535 w 25 st
Spiller Company: 999
Contact Name: Not reported
DEC Memo: "4/18/13 - Austin - Recieved call from notifier, who complained about pet. vapors coming from excavatation in from of building, causing commercial building residents to get sick - apparently related to tank work (removal? repair?) at location - described what sounded like a Baker tank at construction site - Address is related to PBS # 2-511234, an expired registration at 531 W. 25 St. (one of the entrance addresses for the building in question)showing a 5K # 2 fuel oil AST installed in 1920 - She is requesting an investigation of this matter to abate the vapors 4/18/13-Zhune visited the site. While doing excavation in the sidewalk to install the ConEd transformers a tank was found. The tank was removed and contaminated groundwater was pumped to a frack tank. At the time of my inspection there was a vaccum truck pumping the contaminated groundgwater from the frack tank. The excavation was backfilled and no odor was percived outside and inside the building located on 535 west 25 street during my inspection. 11/13/13- Randy sent me an email requesting What is the status on this spill report?. Update on this spill report. He had a call from a consultant about the spill's status. 11/14/13- EPI consulting did Phase I for the entire building. As per the consultant they were hired for the bank who is provided a loan to the owner. As part of the Phase I they searched the spills records. They found this spill # 1300622 open. Superintendent- Miguel Hernandez mherandez@unitybuildingservices.com 718-285-1605 Manager of the building- Will Grooner 646-937-3104. Jenni Siva- 212-401-6117 4/8/19-Assistant Property manager Max Moehlen 212-255-3613 5/9/19-Tomor Bellcishta 917-794-8205 5/9/19-Zhune inspected the site and met to Tomor Bellcishta. Based on field observations no current release, no smell in the basement, no sign of oil in the sump and no report of contamination observed by Con Ed. Spill Closed."
Remarks: "Complainant indicated strong petroleum odors coming from tank excavation/Baker tank in front of this address - Indicates she is getting headaches and nausea"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL Called Afected Party (Kathy) and got history regarding the vapor problem. She said that this is an ongoing poblem w/ gasateria. They have been asked to do something about the problem by the DEC. According to Kathy, they dug a hole to help the problem and left it open. She said that the rain washed away the excavated material. Kathy had opened the doors to the basement to vent the vapors before they built up. She felt that the venting was working fine and she didn't need any further response. She wanted to follow J. Rommel's instuctions to call in these incidents. SS Tansfered to J. Rommel 10/17/2003-Vought-see spill #8909614 at same location. This spill closed by Vought. "

Remarks: "they have gas fumes at the residential apartment building at 480 tenth ave.they opened up the ground at the gas station and the dirt was was washed away by rain today.the fumes went into the basement of the apartment complex.no fd is on the scene. 212-279-4079-clinton housing development is where the complaint is "

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 8/16/2000 Sangesland went to the site. Building was closed, but the contractor was in his truck out front. Several 550's were pulled from the floor (interior) of what was a garage space in the building. There was long term contamination from the piping and fill lines. Contractor said quite a bit of soil was going to be removed. Sangesland repeated the requirement for endpoint samples. Contractor was given the Spill number and the address to send the tank closure report to. 9/13/2000 Long Island Analytical Laboratories Inc. (631-472-3400) submitted a 4 page report dated Sept 7, 2000

which says: ...LIAL was retained to conduct a limited subsurface investigation with respect to the removal of five-550 gallon fuel oil tanks that were recently registered and removed by Arlen Contracting.... following scope of work is submitted to your dept. for review and comment ... Aug 25,2000 LIAL conducted subsurface investigation to delineate the contamination. the area in question is contained in the western portion of the building
 ... 8 Geoprobe soil borings to the groundwater / soil interface (approx 10 feet) were done..... analytical date indicates that an area approx 45 ft long (running north to south) and 25 feet wide (east-west) is contaminated with virgin fuel oil. The contamination layer appears to be limited to a band approx. 4 feet thick starting at four feet below grade and continuing to the groundwater....
 ...Since the tanks that have been removed were along a load bearing wall, excavation must be done in small segments in order to protect the building.... Upon completion of the removal of the contaminated soil endpoint samples will be collected and analyzed for 8021/8270. Letter is signed: Michael Veraldi Laboratory Director 9/13/2000 Sangesland called LIAL and said the digout to clean endpoints with a follow up confirmation report would be acceptable..... NYSDEC will require 2 wells in the event future treatment is necessary.
 10/10/2000 LIAL sent in a report which shows 6 end point samples were taken at the site (2 bottom - 4 sidewall) all samples were non detect for EPA 8021/8270. 10/17/2000 Since 5 - 550 tanks were pulled and there was contamination of the soil, Sangesland requested a water sample be taken from the site. Mr. Veraldi (LIAL) said he would pull a sample and run it for 8021/8270. 11/10/2000 LIAL installed a well in September and took a water sample. Sample taken Sept 27 - Analyzed Sept 27 Tested for 8021/8270: Results show the water sample was clean. All results <5ppm Spill Closed 11/10/2000"

DEC Memo:

"DEC Piper spoke w/ Charles Rose. Assistant to the principal. As per conversation, they were getting ready for winter and noticed a leak. When the janitor inspected found approx 200 gal in vaulted area. Spill is contained and in vault. PTC to respond today and pump out remaining oil and oil on floor. No drains, sewers effected. PTC to contact DEC upon completion of emergency cleanup. School is not in session and no children are present. Odors present in basement only and not in school. 9/11/06- DEC Piper spoke w/ Sister Kathleleen, PTC had cleaned up emergency spill. Piper spoke w/ PTC, tank was above ground on concrete. Concrete was in good shape. School is going to replace tank. 6 drums of oil soaked speedy dry removed. Closed."

UNDERGROUND TANK (Continued)

S110751780

(646)225-6284 12/09/11 Email from Brian Connolly on 12/07/11 wrote:
 As a part of the remediation process, STV directed the first in a series of product recovery from three (3) on-site wells today (12/7/2011). Brookside Environmental removed 1,500 gallons of groundwater via a vac-truck. The groundwater exhibited a slight sheen on the surface but no discernable and/or quantifiable product was observed during the event. A slight odor but no PID readings were recorded. The next event is scheduled approximately two weeks from today's event. 04/16/12 Spill closure report in edocs. STV prepared the closure report. 10,000 gallon UST was removed along with associated piping. Excavation extended 2 ft below the ground water to remove petroleum contaminated material. Installed two recovery wells in the loading bay and one in the pump room of the cellar. Installed a vapor barrier system beneath the entire disturbed slab areas and foundation sidewalls. Installed two offsite monitoring wells to the south and west of the building foot print. Post remediation ground water samples result showed no VOC or SVOcs above DEC guidelines. Case closed. "

Remarks: "Abandoned tank on was found on the property, soil boring showed #6 fuel in the soil."

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 1/13/2000 Rep from Whitman Companies called requesting a partial no further action required letter from the DEC. In the loading dock area (site of former gas tanks) they removed 500 tons of soil, Installed ORC powder in open pit area, installed a pipe system for future potential SVE system, and are now ready to put back clean fill and install a new concrete floor In the rear area (heating oil tank area) - soil was removed, endpoints taken (Whitman says a few soil samples just over limits and well sample found to be clean) Sangesland requested a letter which says: 1)no further action on rear heating oil tank area and 2)no more soil to be removed from the loading dock gasoline contamination area. 1/19/2000 Site apparently was NOT clean... Whitman now requests well testing every 6 months and report submittals once per year. Sangesland sent a letter to Whitman. It says no more digging required, but DEC requires: Testing of wells #2, 3, 4, & 5 every 6 months with a submittal to this office due April and Oct of each year. Next round of sampling will include both BTEX and MTBE. If MTBE is very low or ND, then only BTEX will be required. This frequency of sampling will be required until a close out of the site is approved. In order for a final close out to be approved, a site close out report will be prepared including a full round of GW testing for all STARS and MTBE. 2/22/2000 DEC received a monitoring report. MW #3 shows product in the well. 9/13/2004 Sangesland spoke with Todd Gerber of Whitman companies. Per the Whitman site report dated August 1, 2003 There are 3 wells with exceedences (history of free product in 2002). Sangesland sent a letter requesting one more round of sampling of 3 wells. If the wells have no free product and the desolved phase material is low, the DEC will consider a closeout of this case. 3/21/2006 Sangesland received another closure request from Whitman Companies. GW contamination level in one of the wells is still 2,233 ppb for BTEX. Other wells are also above TAGM. This is a persistant long term problem that needs to be addressed by the DEC Remediation Group. Spill Case has been transferred from Sangesland to Koon Tang for reassignment. 5/16/06 - Spoke to Mr. Todd Gerber, asked him to submit a sensitive receptors survey before closure can be considered. There is still residual BTEX in GW at about 2 ppm range. - KST 6/16/06 - received Sensitive Receptor Survey. No sensitive receptor will be likely impacted by the residual dissolved phase VOCs. SORuce removal was implemented and most contaminated soil has been excavated. Over 2 to 3 years of GW samples were collected on a quarterly and semiannual basis. GW conatmination has been decreasing over the 8 rounds of sampling events. Spill closed - KST"

Remarks: "CALLER STATES THAT SOIL CONTAMINATION WAS FOUND DURING TESTING IN REFERENCE TO A SHARE TRANSACTION. ENVIRONMENTAL COMPANY IS REMEDIATING THE PROBLEM."

DeMeo. site name: West 30th Street Heliport PBS #: 2-342211. as per PBS record, the site has/had following tanks: - one (1) 8,000 gal other product AST on saddles, in-service, installed in Apr. 1997 - one (1) 8,000 gal other product AST on soil, converted to non-regulated use, installed in Apr. 1997 (this could be same tank as above) 10/27/14 TJD File review - based upon above information obtained from Patel. - eleven (11) 550 gal other product USTs, closed-in-place, in Apr. 1997 - five (5) 550 gal other product USTs, closed prior to Mar. 1991 other spills #: 8804707, 8901091, 9504121 spill # 8804707 was reported on 08/29/1988 by USCG due to petroleum patch. case closed. spill # 8901091 was reported on 05/04/1989 due to tank test failure for eight (8) 550 gal jet fuel tanks. case closed. spill # 9504121 was reported on 07/06/1995 by USCG due to 40 gal jet fuel spill result of collision between two helicopters. case closed. reviewed documents on e-docs for PBS: - 12/18/1988: tanks 9 to 16 (550 gal jet A fuel) were passed - 12/07/1991: tanks 1 to 8 (550 gal jet A fuel) were passed - 06/11/2007: N. D. Eryou sent letter to DEC Falvey. he mentioned that the eleven (11) 550 gal USTs owned by Port Authority and they were conveyed with the land lease to NYS DOT (Aviation Division). he was not present during tanks abandonment in 1997, but believed that NYSDOT was going to remove the USTs as part of the stormwater upgrades that were underway as part of the immediate adjacent Route 9 upgrades. 10/27/14 TJD File review. Based upon summarized review discussed above - (8) 550 gallon UST's passed tightness tests (Tanks 9 to 16) prior to reported spill (1988). Remaining (8) 550 gallon UST's (Tanks 1 to 8) passed a tightness test subsequent to reported spill (1991). As per PBS inspection 1/9/07 (Falvey) all UST's have been permanently closed on site. New 8K AST's are currently in operation at this facility. A total of (3) spill reports have been reported and closed at this facility since initial TTF report. Unknown what tank # failed the tightness test, however, all UST's are reported out of service. Due to proximity of the failure to the Hudson River if a significant petroleum discharge had occurred impacts to the adjacent surface waters would have been observed. No further action is required at this time. Spill is administratively closed."

Remarks:

"550 GALLON TANK FAILED HORNER EZY CHECK WITH A LEAK RATE OF .179GPH, TANK #8, PARTIALLY PUMPED OUT TANK, WILL FINISH PUMPING TANK LATER TODAY."

reviewed the report and DEC requires additional data to make a determination for closure. (KST) 3/14/05- Spill reassigned to I. Islam by KST. 4/18/05- Mailed a letter to Mr. Merritt asking for a revised Investigation Summary Report after thorough investigation by June 30/05. It's noted here that Echosystems Strategies, Inc.(ESI) was the previous consultant who prepared the Summary (Tank Closure)Report and was retained by The Producing Co., 145W 45th St.,NY, NY and the current consultant is Merritt Consulting Engineers, Inc., retained by a Bank who financed to Dev. the property. - II 6/8/05- Attorney John Curran(at 212-508-6717) called to extend the June 30/05 deadline for submission of the required ISR by one more month. Advised him to send us a formal request for time extension.- II 6/22/05- Received letter (dt. 6/14/05) from the Attorney requesting formal time extension for required submittal until Aug.19/05. He also mentioned in the letter that the entire site is now developed with a new 15-story building for which foundation excavation removed residual contaminated soil, if any. However, time extension has been approved and asked to submit a site-specific technical report prepared by a NYS P.E along with drawings, plans, etc. in support of their claim by the extended deadline.- II 8/29/05- Reviewed the Technical Analysis Report dt. August 12, 2005 prepared by Galdun Frankel (G. F.)Envtl. on the previously prepared UST Removal report by ESI in Feb.2001 and re-submitted by Merritt Engineering dt. March 9, 2005. Based on the information provided and analyses made by G.F. Envlt., it is believed that the petroleum contamination did not extend beyond the underlying bedrock and the foundation excavation of the building-in-place approx. 20' deep has removed any staining or residual surface contamination of the bedrock, and GW was not encountered. As such, the spill case is hereby closed. - II"

Remarks:

"2 550 GALLON TANKS WERE REMOVED ON TUESDAY & CONTAMINATION WAS NOTICED UNDER THE CONTAINMENT UNIT TODAY - SOIL HAS BEEN REMOVED & STOCK PILED ON SITE TO BE REMOVED EARLY NEXT WEEK"
