ATOM Rail
Designated Supervisor of Locomotive Engineers
3662 John G Richards Rd.
Liberty Hill, SC 29074

March 31, 2025

Dear Mr. McDowell:

This letter responds to the ATOM Rail submission dated February 23, 2025, to the Federal Railroad Administration (FRA), seeking approval of its material modifications to the ATOM Rail Conductor Certification Program, which FRA received on February 23, 2025. ATOM Rail has complied with the FRA's procedures for submitting and approving programs described in Appendix B to 49 CFR part 242. FRA reviewed the railroad's program modification and determined that it conforms with the requirements of 49 CFR part 242 for the reasons discussed below.

Your submission package states that no labor organizations represent the railroad's employees.

The program modifications are consistent with the model of the previously approved Class III railroad programs. FRA understands that the modifications are intended to provide more details about the conductor certification process and update contact information. Additional modifications to the submission also addressed deficiencies in the standard requirements of 49 CFR part 242, appendix B. Standards have been established regarding re-qualification over a specific territory. Detailed training standards have been established in Section Four of your conductor training program.

Please continue in your efforts to improve railroad safety on your system.

Please contact us with any questions regarding this submission at (202) 366-0978 or FRAOPCERTPROG@dot.gov or reach out to Kevin Lewis at Kevin.Lewis@dot.gov or Kurt Erickson at Kurt.Erickson@dot.gov.

Sincerely,

Kurt Erickson
FRA Rail Safety Specialist – Certification
