### INTRODUCTION

The 1979 Summary of Accidents Investigated by the Federal Railroad Administration (FRA) includes 173 railroad accidents.

This report provides the following essential information:

- o the railroad(s) involved
- o the location and time of the accident
- o the method of operation and movements involved
- o the speed involved
- o the type of track
- o the number of casualties
- o the estimated cost of railroad damages
- o the probable cause and any contributing factor(s).

The railroad codes used in this report can be found in the FRA Guide for Preparing Accident/Incident Reports, 1979, Appendix A.

Estimated railroad damage includes labor cost, and all other costs to repair or replace damaged on-track equipment, signals, track, track structures, or roadbed. The cost of lading and clearing the wreck, as well as the cost to society, is not included.

Request for further information or details concerning any of the accidents summarized in this document should be directed to:

> Federal Railroad Administration Office of Safety 400 Seventh Street, S. W. Washington, D. C. 20590

## ACCIDENT SUMMARY

# 1. Accidents Investigated

During Calendar Year 1979, the Federal Railroad Administration investigated and determined the probable cause of 173 railroad accidents.
