Route Mileage Statistics by Category (Table 1) -----	137
Line Identification Code Reference (Table 2) -----	138
Sector/Zone Cross Reference (Table 3) -----	200
LIC/Railroad Abbreviations (Table 4) -----	204
National Network Map -----	(foldout)
Line Designation Correction/Update Form -----	(inside back cover)

VOLUME II

CODING OF CATEGORIES

Line designation information is presented graphically in each of the 132 sector maps. The category of designation is indicated by color coding the individual line segments as follows:

- Red—Category A Mainlines
- Blue—Category B Mainlines
- Brown—Category A Branchlines
- Purple—Category B Branchlines
- Yellow—Nondesignated lines

[Corridors of Consolidation Potential (CCP) are depicted graphically on the National Map only. Refer to Table 2 for specific line segment CCP designation.]

LINE IDENTIFICATION CODE

Each rail line segment on the sector maps is identified by a Line Identification Code (LIC). The traffic density, designation and related information for each LIC is provided in Table 2. The LIC is a five-digit code incorporating the alphabetical abbreviation of the owning railroad and a sequence number (e.g. "LN016" would be the 16th segment of the Louisville and Nashville Railroad.) Generally, standard railroad abbreviations developed by the Association of American Railroads are used.⁶ Table 4 lists the corporate titles for the abbreviations used. In cases where a line segment is owned by more than one railroad, an "XX" is utilized in the LIC (e.g., "XX015".)

NONDESIGNATED LINE SEGMENTS

Four types of line segments are not assigned a designation but are included in the sector maps for structural connectivity

and are consequently assigned an LIC. In cases of extreme network complexity a line segment would be used to connect urban and complex junctions. In these instances the line segments are identified by "UBN". Secondly, switching and terminal lines are nondesignated. Thirdly, lines owned by independent Class II Railroads (defined by the ICC as a railroad earning less than \$10 million in annual revenues) are also nondesignated. Under the provisions of Section 503, Class II Railroads were not required to submit line information. The fourth type of nondesignated lines are reported line abandonments.

TECHNICAL CORRECTIONS/UPDATES

Suggestions for changes in line designations can be forwarded through the use of the correction sheet printed on the inside back cover. Types of corrections which will be updated are:

1. Line abandonments
2. New line construction
3. Changes in line density (especially those which would result in a change in designation)
4. Changes in line ownership
5. Changes in line configuration

The Department will periodically publish updated editions of Volume II to include designation changes.⁷ Future editions of the Report may address changing the standards for line classification consistent with developments in analytical methodologies and data availability.⁸ In this manner, Volume II will continue to provide comprehensive information that will be useful for rail planning activities.

Final Volume II contains designations of all Class I Railroad lines in the United States based upon the standards developed in final Volume I. Each Class I Railroad line segment¹ in the national rail network was subjected to individual analysis, using the most current information available. Line segment analysis included verifiable information provided by the Rail Services Planning Office of the Interstate Commerce Commission as well as other correction/update information that was forwarded to the Federal Railroad Administration following the publication of Volume II (Interim) on January 19, 1977. Correction/update information that was received by May 13, 1977, has been included in final Volume II. Designation and identification of individual line segments in the U.S. railroad network structure are presented using a computerized network information system.² Statistical summaries of route mileage by line designation are presented in Table 1. Cross-reference information is presented in Tables 2 through 4. Following the tables in an enlarged fold-out national network map displaying the line designations by category.

SECTOR MAPS

The structural complexity of the U.S. railroad network requires the use of 132 geographic sector maps³ to display the line specific information (see Figure 1). Each sector map portrays either a state or a portion thereof.⁴ All rail lines within each sector are identified, with the exception of urban areas and complex junctions⁵ where lines are aggregated to single points of intersection. These occurrences are noted on the sector maps.

FOOTNOTES

¹A line segment is defined as the portion of a rail route that is located between points of intersection.

²The Railroad Network Information System used for this report was designed by the Research and Analysis Division, Office of Policy and Program Development, Federal Railroad Administration. The graphics subsystem was developed under contract by the Transportation Program and the Laboratory for Interactive Computing, School of Engineering, Princeton University. All inquiries should be directed to:

Project Director, Rail Network Information System
Office of Policy and Program Development
Federal Railroad Administration
Washington, D.C. 20590

³Sectors are aggregations of the 486 transportation zones developed by the U.S. Department of Transportation. Zone information was prepared under contract DOT-FR-40012 and the report entitled "United States Transportation Zone Maps", was published in October, 1975.

⁴A sector does not cross a state border. Consequently, a zone that crosses state borders is divided among two or more sectors.

⁵A complex junction is defined as an area that has a high concentration of intersecting rail trackage within three square miles.

⁶In some cases, the abbreviations were shortened due to the large number of line segments owned by particular railroads (e.g., P1029). In addition, standard abbreviations which ended in the letter "O" were altered to prevent possible interpretation as the number zero (e.g., BX339 instead of BO339).

⁷Please notify the Project Director (see footnote #2 for address) if your organization wishes to be included on the mailing list for future editions of the Report. Include number of copies desired and complete mailing address.

⁸Refer to "Evaluation Report of the Secretary of Transportation's Classification and Designation of Rail Lines", a Report of the Rail Services Planning Office (Interstate Commerce Commission) to the Secretary of Transportation, May 16, 1977.

TABLE 2—LINE IDENTIFICATION CODE REFERENCE

Introduction

Table 2 provides traffic density, line designation, category analysis summary and sector map location of all railroad line segments. The table format is as follows:

LIC	DEN	DES	ANL	SEC1	SEC2	SEC3	<i>Explanation of Headings (see notes)</i>
							Line Identification Code
							Traffic Density Code
							<i>Code Value (in millions of annual gross tons)</i>
							1 Less than 1
							2 At least 1 but less than 5
							3 At least 5 but less than 10
							4 At least 10 but less than 20
							5 At least 20 but less than 30
							6 30 and over
							— Not applicable (for nondesignated lines)
							Line Designation
							<i>Code Definition</i>
							AM A Mainline
							BM B Mainline
							AB A Branchline
							BB B Branchline
							- Not applicable (for nondesignated lines)
							Category Analysis Summary
							<i>Code Definition</i>
							C A through route in a CCP
							M A through route required for defense (STRACNET)
							P Intercity Passenger Service
							S Provides service to major markets
							2 Class II line
							3 Partially abandoned line
							4 Abandoned line
							5 Urban line
							6 Partially Class II line
							Sectors in which the line is located (see note)

Notes:

1. Only one line extends over three sectors (MW144). Its fourth sector is shown separately.
2. A small number of LIC's have more than one designation. Appropriate information is shown separately.
3. Line segments and portions of line segments owned by participating carriers but not conveyed to Conrail are indicated with an asterisk (*) added to the LIC. For example, P0233* indicates that line segment P0233 was owned by Penn Central but was not conveyed to Conrail.
4. Intercity passenger service (i.e., ANL=P) is included in Table 2 for informational purposes only. Passenger service was not used as a criteria for determining line designation.

TABLE 3—SECTOR/ZONE CROSS-REFERENCE

Introduction

TABLE 3A—Specifies zones that are assigned to the various sector maps.

TABLE 3B—Specifies sectors maps to which zones are assigned.

Note: Zones that are split between two or more sectors (i.e., those that cross state borders) will be listed in each of the associated sectors.

TABLE 4—LIC*/RAILROAD ABBREVIATION

Introduction

Table 4 identifies the corporate abbreviation and name of the railroads used in the Line Identification Code format. Standard AAR abbreviations are used primarily. In some cases, however, the abbreviations were shortened.

Note: ConRail and several other railroads are shown with prior corporate or subsidiary names.

* Line Identification Code

SUBMITTED AS PART OF FINAL STANDARDS, CLASSIFICATION, AND DESIGNATION OF LINES OF CLASS I RAILROADS IN THE UNITED STATES, A REPORT BY THE SECRETARY OF TRANSPORTATION,
JANUARY 19, 1977 IN ACCORDANCE WITH SECTION 503(b) OF THE RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976 (P.L. 94-210). U.S. DEPARTMENT OF TRANSPORTATION

DATA SOURCE: FRA NETWORK PLANNING INFORMATION SYSTEM
(UPDATED JUNE, 1977)

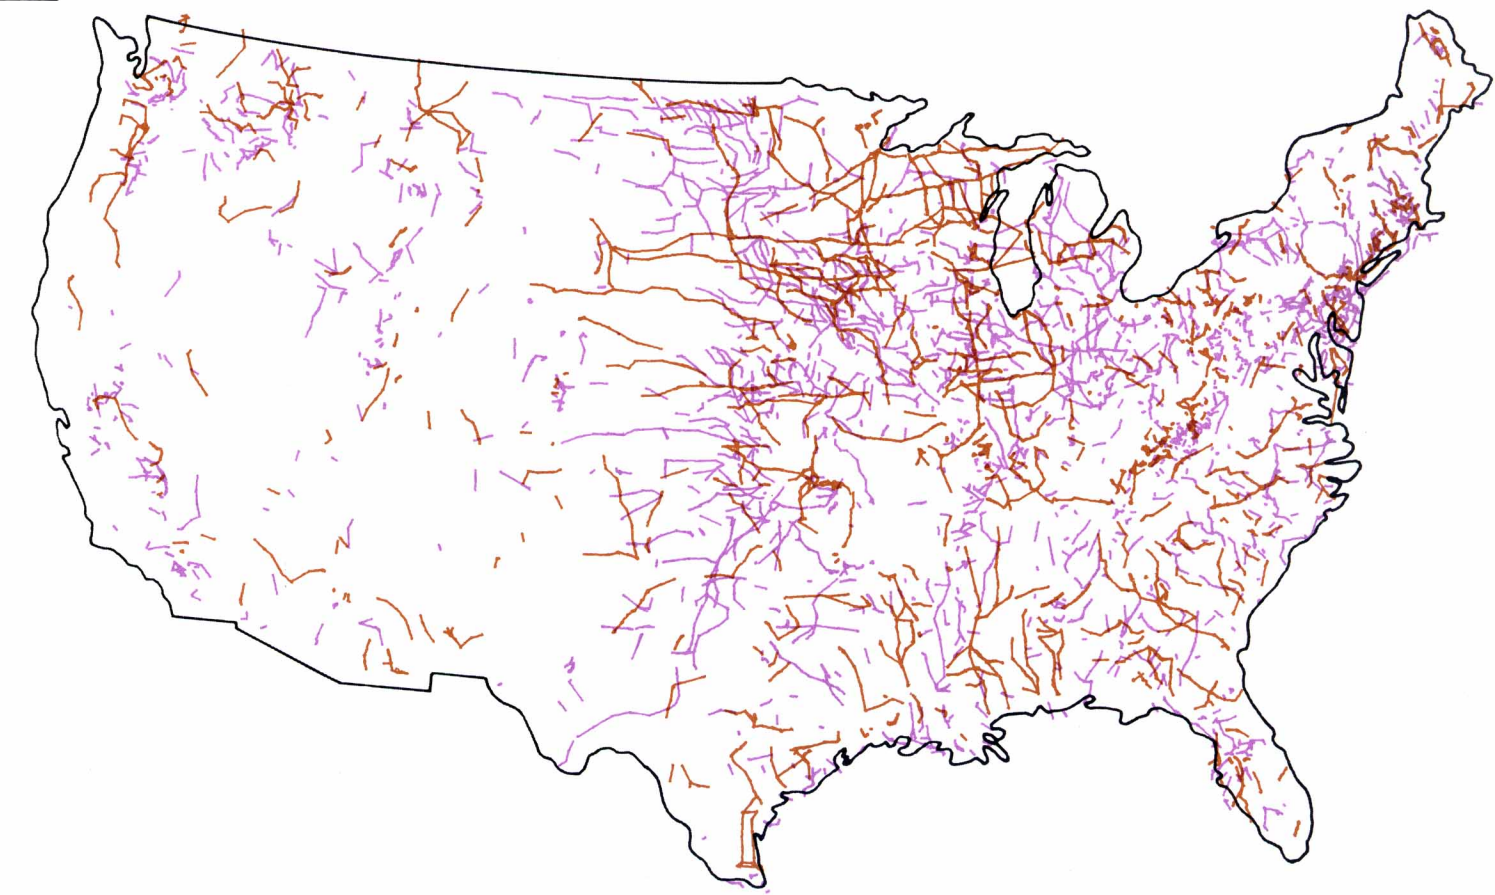

FINAL MAINLINE AND BRANCHLINE DESIGNATIONS FOR CLASS I RAILROADS

—STRUCTURE CHART—

A MAINLINES

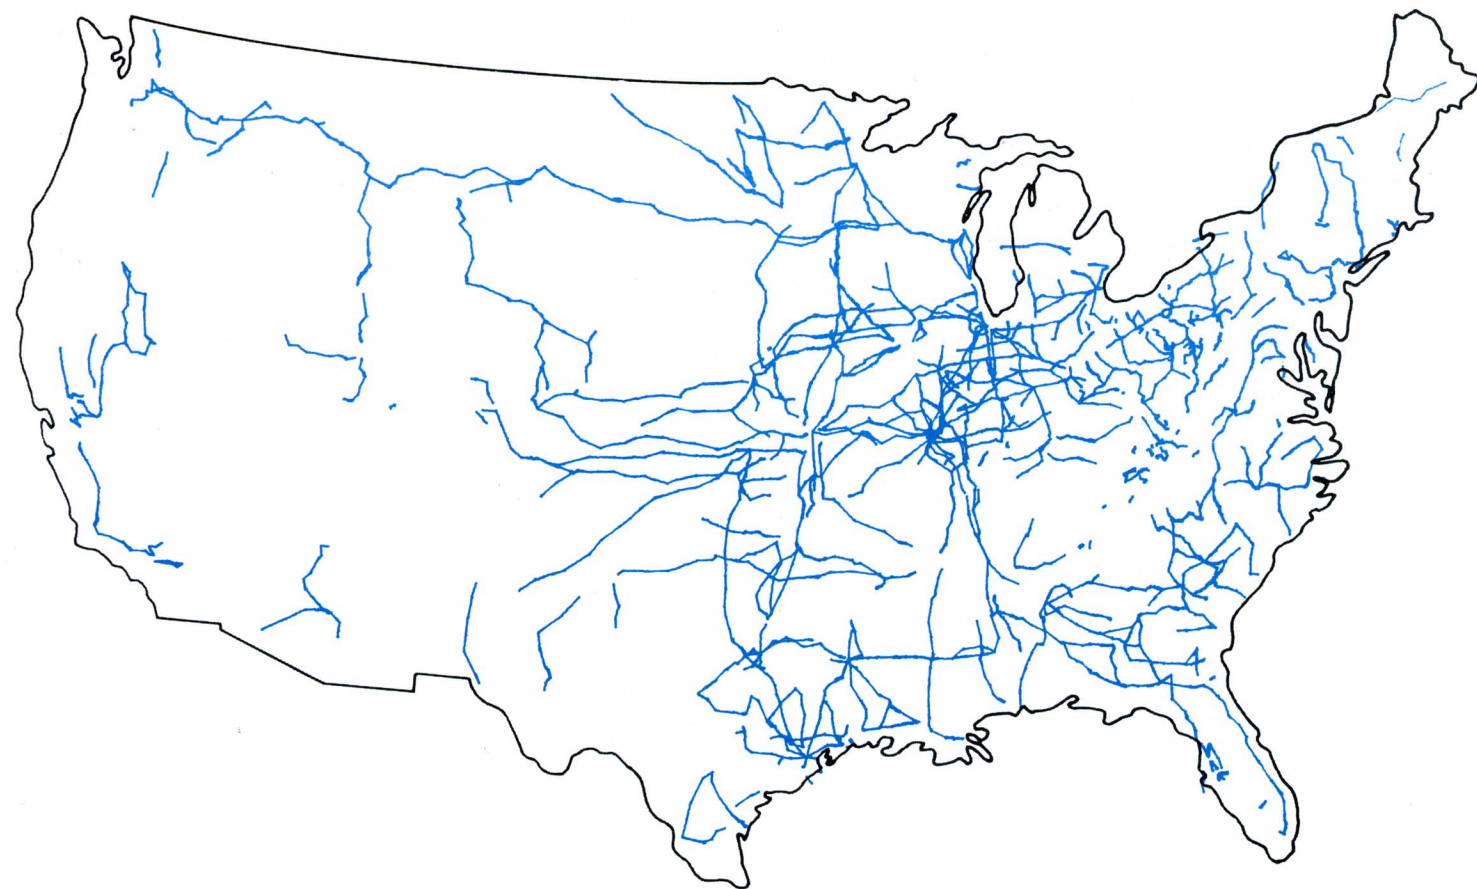

THE DESIGNATION IS BASED UPON THREE STANDARDS AND A LINE THAT MEETS ANY ONE OF THE STANDARDS QUALIFIES AS A MAINLINE. A LINE WILL QUALIFY AS A MAINLINE IF IT HAS A TRAFFIC DENSITY OF 20 MILLION OR MORE GROSS TONS ANNUALLY. SECONDLY, A LINE WILL QUALIFY AS A MAINLINE IF IT IS REQUIRED TO SERVE A MARKET GENERATING MORE THAN 75,000 CARLOADS ANNUALLY. THIRDLY, A LINE IS DESIGNATED A MAINLINE IF IT IS REQUIRED TO PROVIDE A THROUGH RAIL ROUTE IN CORRIDORS DESIGNATED AS ESSENTIAL IN THE STRATEGIC RAIL CORRIDOR NETWORK (STRACNET) FOR NATIONAL DEFENSE.

A/B BRANCH LINES

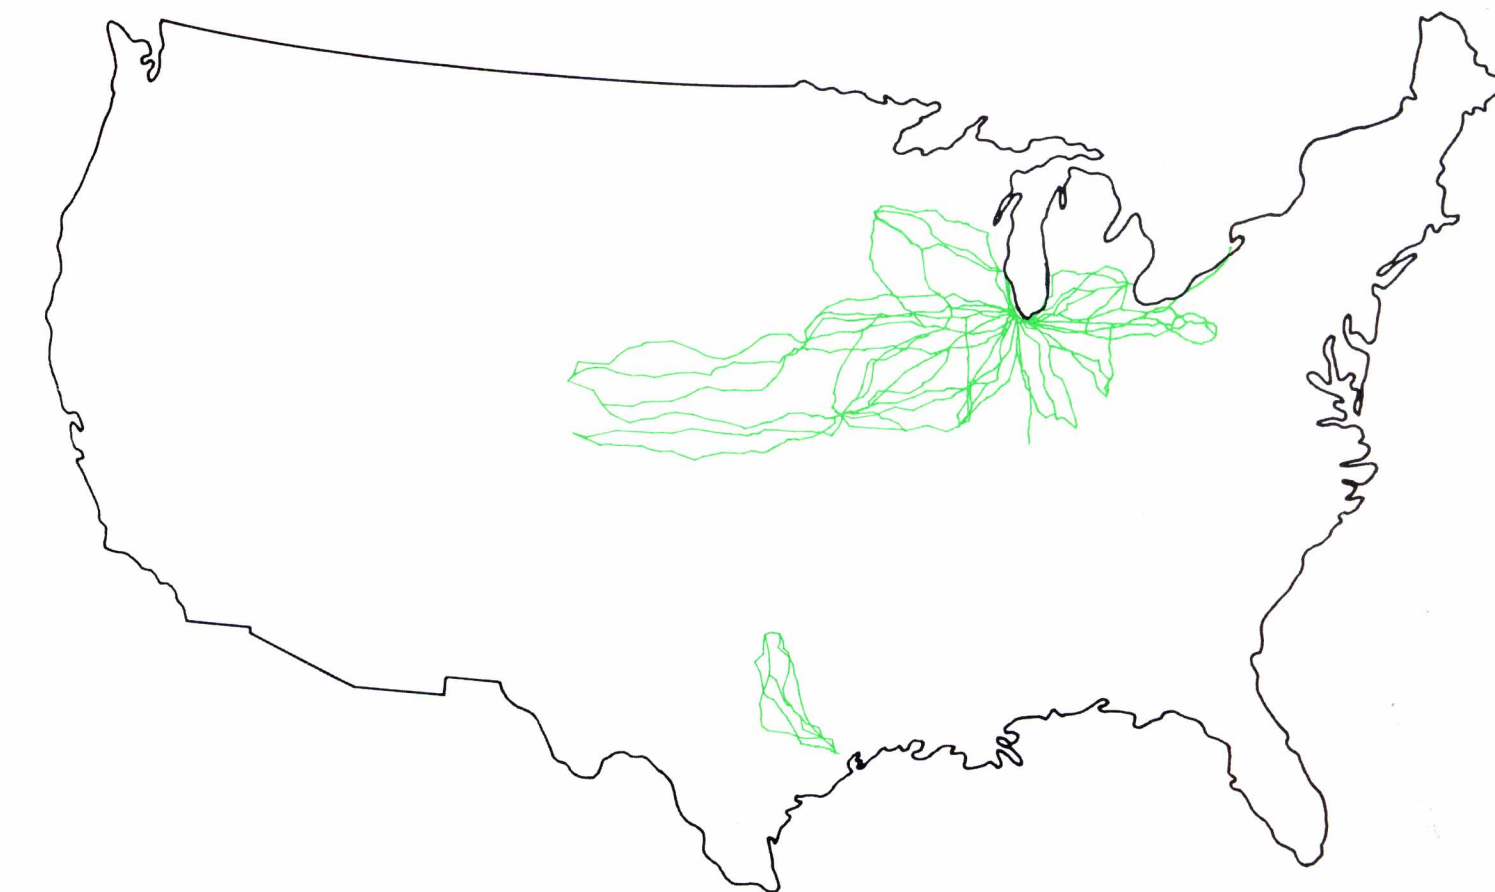

A LINE IS DESIGNATED AS A BRANCHLINE IF IT HANDLES AT LEAST ONE MILLION BUT LESS THAN 5 MILLION GROSS TONS ANNUALLY AND IS NOT OTHERWISE DESIGNATED AS A MAINLINE.

A LINE IS DESIGNATED B BRANCHLINE IF IT HANDLES LESS THAN ONE MILLION GROSS TONS ANNUALLY AND IS NOT OTHERWISE DESIGNATED AS A MAINLINE.

B MAINLINES

A LINE WILL QUALIFY AS B MAINLINE IF IT IS A THROUGH OR FEEDER ROUTE WHICH CARRIES LESS THAN 20 MILLION GROSS TONS BUT AT LEAST 5 MILLION GROSS TONS ANNUALLY. IT QUALIFIES NEITHER FOR A MAINLINE STATUS ON THE BASIS OF SERVICE TO MAJOR MARKETS NOR ON ESSENTIALITY AS PART OF THE STRATEGIC RAIL CORRIDOR NETWORK (STRACNET).

CCP LINES

THIS CATEGORY IS PROVIDED FOR ALL THROUGH ROUTES LOCATED IN A CORRIDOR OF CONSOLIDATION POTENTIAL (CCP). A CCP LINE IS DEFINED AS ONE IN WHICH THREE OR MORE PARALLEL THROUGH-ROUTES, OPERATED BY THREE OR MORE CARRIERS, SERVE THE CORRIDOR AND THE PRACTICAL TRAFFIC-HANDLING CAPACITY OF THE COMBINED ROUTES EXCEEDS THE ACTUAL TRAFFIC DENSITY BY 50 PERCENT OR MORE. IN SUCH A CORRIDOR, ALL THROUGH RAIL LINES BETWEEN MAJOR MARKETS, WITHOUT REGARD TO EITHER THEIR ACTUAL DENSITIES OR ANY OTHER DESIGNATION WHICH THEY MAY RECEIVE, ARE DESIGNATED AS CCP LINES. TABLE 2 DENOTES SPECIFIC LINES WHICH, IN ADDITION TO THEIR DESIGNATION, ARE CATEGORIZED AS CCP LINES.

REQUEST FOR LINE DESIGNATION CORRECTION/UPDATE

INSTRUCTIONS: Prepare a separate form for each change or correction requested. Please use photocopies of this form. If possible, include copies of supporting material to clarify request, such as I.C.C. Dockets, maps, sketches, etc. Mail completed form and pertinent material to Federal Railroad Administration, 400 Seventh Street, S.W., Washington, D.C. 20590, Attention: Project Director, Rail Network Information System, RPD-20, telephone: (202) 426-2920

Line Identification Code _____ Sector(s) _____

Line Description (branch name, first and last station, etc.) _____

This line of railroad is designated in the Report as _____
The designation of this line should be changed to _____
for the following reason(s): _____

This line of railroad is designated in the Report as _____
This line has been authorized for abandonment between _____ and _____
 Service was discontinued over this line on _____
Authority: _____
 Subsidized operations commenced over this line between _____ and _____ on _____
Authority: _____

This line of railroad has not been assigned a designation. This line should be designated as _____
for the following reason(s): _____

This line of railroad was identified in the Report as being owned by _____
This line is actually owned by _____ and should be designated as _____
for the following reason(s): _____

Other changes _____

Comments _____

Name _____
Title _____
Organization _____
Address _____
